New Bedford, Massachusetts (including Fairhaven, Massachusetts)	The area North of a line extending fr Wilbur Point in the East to Mishaum Point in the West.
New Harbor, Maine	The waters of Muscongus Bay, Nort Monhegan Island, East of Pemaquid Point, and West of Georges Island.
New Haven, Connecticut	The waters of New Haven Harbour bounded on the South by a line from Oyster River Point, West Haven, CT the RW"NH" Mo (A) Buoy, thence t Morgan Point, East Haven, CT. and the North by the Quinnipiac River Bridge.
New London and Groton, Connecticut	See "Enclosure No. 2".
New Orleans, Louisiana	Sea Buoy to Mississippi River Mile 255.2. Includes New Orleans, Baton Rouge and Burnside, Louisiana.
New York, New York (including the Port Authority of New York and New Jersey).	North of a line drawn between Sand Hook, NJ. and East Rockaway, NY. West of the Throgs Neck Bridge, So of the George Washington Bridge a East of Interstate 95 in New Jersey.
Newport, Rhode Island	Narragansett Bay, South of a line extending from Conanicut Point to C Point.
North Bend, Oregon	See Coos Bay, Oregon.
Oakland, California	See San Francisco, California.
Ogdensburg, New York	Ogdensburg Harbour, including the Oswegatchie River to the limits of navigation.
Olympia, Washington	Coincident with Thurston County, Washington.
Orange, Texas	The ICW from Mile 276.5 to Mile 2 the Sabine River from the intersect with the ICW; North to the Navy Ya
Oswego, New York	Oswego Harbour, including Osweg River to Lock 8.
Pago Pago, American Samoa	Pago Pago Harbour and access channel, located on the South side Tutuila Island at 14° 16.5' S., 170° 42' W.
Pascagoula, Mississippi	From the sea buoy of Horn Island Channel Pass to Mile 1 of the Pascagoula River, including the Pascagoula Channel; and from the Bayou Cassote Harbour proper to junction buoy of Bayou Cassotte Channel and the Pascagoula Chan
Panama City, Florida	See "Enclosure No. 2".
Pensacola, Florida	See "Enclosure No. 2".
Philadelphia, Pennsylvania	The waters of the Schuylkill River, Delaware River, and Delaware Ba from Trenton, New Jersey to the Demarcation at the entrance to Delaware Bay, excluding the port of Wilmington, Delaware.
Pittsburg, California	See Stockton, California.
Point Comfort, Texas	The Matagorda Ship Channel fro sea buoy to the Calhoun County Navigation District Turning Basin.
Point Judith, Rhode Island	Narragansett Bay South of a line extending from Sauga Point Eas to Conanicut Point.
Ponce, Puerto Rico	Bahia de Ponce proper.
Port Arthur, Texas	The ICW from Mile 276.5 to Mile including the East Basin, West B and Turning Basin of Taylor Bay
Port Canaveral, Florida	See "Enclosure No. 2".
Port Everglades, Florida	The Atlantic Intracoastal Waterw South of the 17th Street Causew North of, but not including the D Cutoff Canal, including the Oute Cut and Bar Cut.
Port Hueneme, California	See "Enclosure No. 2".
Port Huron, Michigan	See Detroit, Michigan.
Port St.Joe, Florida	See "Enclosure No. 2".

Portland, Maine	Hussey Sound and Fore River to the limits of navigation at the Veterans Memorial Bridge at Mile 3.0 on the Fore River.
Portland, Oregon	Three Oregon Counties: Multnomah, Clackamas, and Washington, and the Port of Vancouver, Washington.
Portsmouth, New Hampshire (including Kittery, Maine, and Dover, New Hampshire, on the Piscataqua River).	See "Enclosure No. 2".
Providence, Rhode Island (including East Providence and Pawtuckett)	Seekonk River, Providence River and Narragansett Bay extending North of a line stretching from Sauga Point East to Conanicut Point and Carr Point.
Quonset Point, Rhode Island	Includes that area between and including Sauga Point, Quonset Point and Davisville, Rhode Island.
Redwood City, California	See San Francisco, California.
Richmond, California	See San Francisco, California.
Richmond, Virginia	James River from Benjamin Harrison Memorial Bridge, Hopewell, Virginia, to limits of navigation.
River Rouge, Michigan	See Detroit, Michigan.
Rockland, Maine	The waters of Rockland Harbor and West Penobscot Bay North of a line drawn from Owls Head Light to Browns Head Light and South of a line drawn from Northeast Point to Webster Head.
Rota Harbour, Rota, CNMI	The waters of Sasanhaya Harbour, all waters North of a line drawn between Puntan Pona and Puntan Taipingot. The waters of Sasanlago Harbour, all waters West of the Island of Rota within an arc of 1.5 miles drawn from the centre of the town of Rota.
Sacramento, California	All waters of the Sacramento River Deep Water Ship Channel from Sacramento River Deep Water Ship Channel Light 1 to the William G. Stone Lock.
San Diego, California	See "Enclosure No. 2".
San Francisco, California (including Alameda, Oakland, Berkeley, Richmond, Martinez, Benicia, and Redwood City)	All waters of Suisan Bay, the Carquinez Straits, and San Pablo Bay and all waters of San Francisco Bay shoreward of a line drawn from Point Bonita Light through Mile Rocks Light to the shore.
San Juan, Puerto Rico	Bahia de San Juan proper.
San Pedro, California	See Los Angeles, California.
Savannah, Georgia	Savannah River from the Route 17 Bridge to the territorial sea limit.
Seattle, Washington	Waters coincident with King County, Washington.
Seward, Alaska	All headwaters of Resurrection Bay to a line from Cape Resurrection to Callisto Head.
Sitka, Alaska	Sitka Sound and Silver Bay, North of a line between Cape Edgecomb on Kruzof Island to Pavorotni Point on Baronof Island and South of a line between Point Brown on Kruzof Island to Lisianski Point on Baronof Island.
Skagway, Alaska	Taiya Point (in Tiaya Inlet on Lynn Canal) to the town of Skagway, Alaska.
Stockton, California	All waters of the New York Slough, the San Joaquin River, and the Stockton Deep Water Channel from Suisan Bay Light 30 to the Interstate 5 Bridge.
Superior, Wisconsin	See Duluth, Minnesota.
Tacoma, Washington	Coincident with Pierce County, Washington.
Tampa, Florida	That portion of Tampa Bay contained within Hillsborough County.
Tanapag Harbour, Saipan, CNMI	The waters of Garapan Lagoon and Puetten Tanapag (Tanapag Harbour) North of 15° 30.0' N. and South of 15° 15.5' N.
Terminal Island, California	See Los Angeles, California.
Texas City, Texas	See Galveston, Texas.
Tinian Harbour, Tinian, CNMI	The waters of Tinian Harbour and Sunharon Roads enclosed within a line drawn between Carolinas Point and Gurguan Point.
Tiverton, Rhode Island	Sakonnet River from the Route 138 Bridge to a line extending from Sachuset Point to Sakonnet Point.
Toledo, Ohio	Maumee River to limits of navigation.
Trenton, Michigan	See Detroit, Michigan.
Vancouver, Washington	See Portland, Oregon.
Whittier, Alaska	All waters of Passage Canal, West of Trinity Point.
Wilmington, California	See Los Angeles, California.
Wilmington, Delaware	The waters of the Delaware River and Bay, including the Christina River and the Salem River, from the Delaware/ Pennsylvania state border to the Line of Demarcation at the entrance to Delaware Bay.
Wilmington, North Carolina	The Cape Fear River, from the Sea Buoy to Point Peter, and then the N.E. River to the Turning Basin at Mile 2.
Woods Hole, Massachusetts	See New Bedford, Massachusetts.
Yabucoa, Puerto Rico	Puerto de Yabucoa proper.

Enclosure No. 2:
CONTROLLED PORT AREA DESCRIPTIONS:

U.S. Port	*Geographical Description*
Charleston, South Carolina	Charleston Harbour and approaches from the sea buoy to the navigable limits of the Cooper River, Wando River and Ashley River.
Hampton Roads, Virginia (including Norfolk, Newport News, Jamestown, Yorktown and Portsmouth, VA.)	All the waters of a line from Cape Henry Light to New Point Comfort, which includes the Southwest portion of Chesapeake Bay, Hampton Roads, and the Elizabeth and York Rivers.
Honolulu, Hawaii	All internal waters and waters of the Pacific Ocean out to three nautical miles from and including Honolulu Harbor Westward to and including Barbers Point Harbor (with the exception of Pearl Harbour).
Kings Bay, Georgia	All waters of Cumberland Sound from the entrance to St.Marys River at Intracoastal Waterway Statute Mile 712.5 North to the entrance of Crooked River at Statute Mile 705.
New London/Groton, Connecticut	All waters encompassed by a line from Goshen Point, Waterford, CT. to Dumping Ground Buoy Y"NDA", thence to Avery Point, Groton, CT.
Panama City, Florida	From the Panama City Harbour Channel Entrance Buoy "SA" to Panama City proper, including St.Andrews Bay.
Pensacola, Florida	The Pensacola Ship Channel from the sea buoy to Pensacola Bay, inclusive.
Port Canaveral, Florida	All waters of the Atlantic Ocean within 3.0 nautical miles of the seaward extremity of the Port Canaveral Entrance Channel jetties including all waters of the Entrance Channel Westward to the Canaveral Barge Canal Lock.
Port Hueneme, California	The waters of Port Hueneme Harbour shoreward of a line drawn from Port Hueneme East Jetty Light 4 to Port Hueneme West Jetty Light 3.
Port St. Joe, Florida	From Port St.Joe Harbour proper to Buoy 6 of the Port St.Joe Entrance Channel, the entrance to the Gulf County Canal and St.Joseph Bay.
Portsmouth, New Hampshire (including Kittery, Maine and Dover, New Hampshire on the Piscataqua River)	Portsmouth Harbor from the COLREGS Demarcation Line to the limits of navigation on the Piscataqua River to include Kittery and Eliot, Maine, and Portsmouth, Newington and Dover, New Hampshire.
San Diego, California	San Diego Bay and all waters of the Pacific Ocean adjacent to the cities of Ocean Beach, San Diego, Coronado, National City and Chula Vista out to three nautical miles.

Enclosure No. 3.

On behalf of the vessel's Owners, we request that the vessel be allowed to enter the port of New London with only a 2-Day Request due to failure of refrigeration system causing food to thaw and spoil. Estimate repairs to be completed within 48 hours.

NOTE: This must be received at the SIV desk no later than the close of the Official Port Approval Date and Time.

LIGHTERING ZONES IN THE GULF OF MEXICO: (See Plan)

Note: Refer to 33 CFR 156 for full text.

General: *Summary:* The Coast Guard is designating 4 lightering zones in the Gulf of Mexico, each more than 60 miles from the baseline from which the territorial sea of the United States is measured. By using these lightering zones, single hull tank vessels contracted for after 30th June 1990, and older single hull tank vessels phased out by the Oil Pollution Act of 1990, will be permitted to offload oil in the U.S. Exclusive Economic Zone (EEZ) until 1st January 2015, for transhipment to U.S. ports. This rule establishes the first lightering zones designated by the Coast Guard. It also establishes 3 areas in the Gulf of Mexico where all lightering will be prohibited.

Effective Date: This rule is effective on 29th August 1995. The Director of the Federal Register approves as of 29th August 1995, the incorporation by reference of certain publications listed in Art. 156.111.

Addresses: Unless otherwise indicated, documents referred to in this preamble are available for inspection or copying at the office of the Executive Secretary, Marine Safety Council (G-LRA/3406), U.S. Coast Guard Headquarters, 2100 Second Street, S.W., Room 3406, Washington, DC 20593-0001, between 0800 hrs. and 1500 hrs., Monday through Friday, except Federal holidays. Tel: (202) 267-1477.

For Further Information, Contact: Project Manager, Oil Pollution Act (OPA 90) Staff, (G-MS-A), Tel: (202) 267-6740. This telephone is equipped to record messages on a 24 hour basis.

Pre-Arrival Notices: In addition to the other requirements, the Mas Owner or Agent of a vessel that requires a Tank Vessel Examina (TVE), or other special Coast Guard inspection in order to lighter i designated lightering zone, must request the TVE or other inspec from the cognizant Captain of the Port at least 72 hours prior commencement of lightering operations.

Designated Lightering Zones: The following lightering zones designated in the Gulf of Mexico and are more than 60 miles from baseline from which the territorial sea is measured:

(a) *Southtex – Lightering Zone:* This lightering zone and the geogra area for this zone are co-terminous and consist of the waters boun by a line connecting the following points beginning at:

Latitude	Longitude
27° 40' 00" N.,	93° 00' 00" W., thence to
27° 40' 00" N.,	94° 35' 00" W., thence to
28° 06' 30" N.,	94° 35' 00" W., thence to
27° 21' 00" N.,	96° 00' 00" W., thence to
26° 30' 00" N.,	96° 00' 00" W., thence to
26° 30' 00" N.,	93° 00' 00" W., and thence

to the point of beginning.

(b) *Gulfmex No. 2 – Lightering Zone:* This lightering zone and geographic area for this zone are co-terminous and consist of the wa bounded by a line connecting the following points, beginning at:

Latitude	Longitude
27° 53' 00" N.,	89° 00' 00" W., thence to
27° 53' 00" N.,	91° 30' 00" W., thence to
26° 30' 00" N.,	91° 30' 00" W., thence to
26° 30' 00" N.,	89° 00' 00" W., and thence

to the point of beginning.

(c) *Offshore Pascagoula No. 2 – Lightering Zone:* This lightering and the geographic area for this zone are co-terminous and consis the waters bounded by a line connecting the following points, begin at:

Latitude	Longitude
29° 20' 00" N.,	87° 00' 00" W., thence to
29° 12' 00" N.,	87° 45' 00" W., thence to
28° 39' 00" N.,	88° 00' 00" W., thence to
28° 00' 00" N.,	88° 00' 00" W., thence to
28° 00' 00" N.,	87° 00' 00" W., and thence

to the point of beginning.

(d) *South Sabine Point – Lightering Zone:* This lightering zone and geographic area for this zone are co-terminous and consist of the wa bounded by a line connecting the following points, beginning at:

Latitude	Longitude
28° 30' 00" N.,	92° 38' 00" W., thence to
28° 44' 00" N.,	93° 24' 00" W., thence to
28° 33' 00" N.,	94° 00' 00" W., thence to
28° 18' 00" N.,	94° 00' 00" W., thence to
28° 18' 00" N.,	92° 38' 00" W., and thence

to the point of beginning.

Prohibited Areas: Lightering operations are prohibited within following areas in the Gulf of Mexico:

(a) *Claypile – Prohibited Area:* This prohibited area consists waters bounded by a line connecting the following points, beginni

Latitude	Longitude
28° 15' 00" N.,	94° 35' 00" W., thence to
27° 40' 00" N.,	94° 35' 00" W., thence to
27° 40' 00" N.,	94° 00' 00" W., thence to
28° 33' 00" N.,	94° 00' 00" W., and thence

to the point of beginning.

(b) *Flower Garden – Prohibited Area:* This prohibited area consis the waters bounded by a line connecting the following points, beg at:

Latitude	Longitude
27° 40' 00" N.,	94° 00' 00" W., thence to
28° 18' 00" N.,	94° 00' 00" W., thence to
28° 18' 00" N.,	92° 38' 00" W., thence to
28° 30' 00" N.,	92° 38' 00" W., thence to
28° 15' 00" N.,	91° 30' 00" W., thence to
27° 40' 00" N.,	91° 30' 00" W., and thence

to the point of beginning.

(c) *Ewing – Prohibited Area:* This prohibited area consists of the bounded by a line connecting the following points, beginning at:

Latitude	Longitude
27° 53' 00" N.,	91° 30' 00" W., thence to
28° 15' 00" N.,	91° 30' 00" W., thence to
28° 15' 00" N.,	90° 10' 00" W., thence to
27° 53' 00" N.,	90° 10' 00" W., and thence

to the point of beginning.

Maximum Operating Conditions: Unless otherwise specifie maximum operating conditions in this section apply to tank operating within the lightering zones designated in this subpart.

(a) A tank vessel shall not attempt to moor alongside another when either of the following conditions exist:

(1) The wind velocity is 56 km./hr. (30 knots) or more, or
(2) The wave height is 3.0 m. (10 ft.) or more.

(b) Cargo transfer operations shall cease and transfer hoses drained when:

(1) The wind velocity exceeds 82 km./hr. (44 knots); or
(2) Wave heights exceed 5.0 m. (16 ft.).

Operations:

(a) Unless otherwise specified in this subpart, or when authorised by the cognizant Captain of the Port (COTP) o Commander, the Master of a vessel lightering in a zone desi this subpart shall ensure that all officers and appropriate me the crew are familiar with the guidelines in Paragraphs (b) a this section and that the requirements of Paragraphs (d) – section are complied with.

(b) Lightering operations should be conducted in accordance with the Oil Companies International Marine Forum Ship to Ship Transfer Guide (Petroleum), Second Edition, 1988, to the maximum extent practicable.

(c) Helicopter operations should be conducted in accordance with the International Chamber of Shipping Guide to Helicopter/Ship Operations, Third Edition, 1989, to the maximum extent practicable.

(d) The vessel to be lightered shall make a voice warning prior to the commencement of lightering activities via VHF Channel 13 and 2,182 kHz. The voice warning shall include:

- (1) The names of the vessel involved;
- (2) The vessels geographical positions and general headings;
- (3) A description of the operations;
- (4) The expected time of commencement and duration of the operations; and
- (5) Request for wide berth.

(e) In the event of a communications failure between the lightering vessels or the respective persons-in-charge of the transfer, or an equipment failure affecting the vessel's cargo handling capability or ship's manoeuvrability, the affected vessel shall suspend lightering activities and shall sound at least 5 short, rapid blasts on the vessel's whistle. Lightering activities shall remain suspended until corrective action has been completed.

(f) No vessel involved in a lightering operation may open its cargo system until the servicing vessel is securely moored alongside the vessel to be lightered.

(g) If any vessel not involved in the lightering operation or support activities approaches within 100 m. of vessel engaged in lightering, the vessel engaged in lightering shall warn the approaching vessel by sounding a loud hailer, ship's whistle, or any other appropriate means.

(h) Only a lightering tender, a supply boat, or a crew boat, equipped with a spark arrestor on its exhaust, or a tank vessel providing bunkers, may moor alongside a vessel engaged in lightering operations.

(i) Lightering operations shall not be conducted within 1 nautical mile of offshore structures or mobile offshore drilling units.

(j) No vessel engaged in lightering activities may anchor over charted pipelines, artificial reefs, or historical resources.

(k) All vessels engaged in lightering activities shall be able to immediately manoeuvre at all times while inside a designated lightering zone. The main propulsion system must not be disabled at any time.

(l) In preparing to moor alongside the vessel to be lightered, a service vessel shall not approach the vessel to be lightered closer than 1,000 m., unless the service vessel is positioned broad on the quarter of the vessel to be lightered. The service vessel must transition to a nearly parallel heading prior to closing to within 50 m. of the vessel to be lightered.

AUTHORITY: See "General" above.

PILOTAGE: North West Coast of U.S.A.

Columbia River Bar Pilots are "Sea Pilots" for all ports in Columbia and Willamette Rivers. Namely, Astoria and Portland (Oregon), Longview, Kalama and Vancouver (Washington) – when entering from sea and if providing above Astoria, Columbia River Pilots relieve Bar Pilots for balance of transit.

COLUMBIA RIVER BAR PILOTS
Foot of 14th Street,
P.O.Box 87, Astoria, Oregon 97103
TWX 9104668014
FAX (503) 325-5630
Marisat 00259104668014+
Telephones (503) 325-2641 or 325-2642

RADIO FACILITIES

Pilot Boat Peacock..........................WS 7217
Pilot Boat Columbia.......................WYE 7344
Bar Pilots Office, Astoria ....KOK 360
(Ch. 16) (156.80 MHz)
Astoria Marinephone "KFX"
Ship's Call on .... 2206 kHz
KFX Answers on......................... 2598 kHz
Or call on and receive KFX on Channel 26.

In order there be no delays, vessels due to arrive at the Columbia River and desiring a Bar Pilot, must cable or telephone the Columbia River Bar Pilots. (Pilot normally not on station unless cable or telephone message received.) USE RADIO STATION KLB, EVERETT, WASHINGTON at least 12 hours before arrival at the lightship. Code address, "BAR PILOT ASTO, STATING THE TIME OF ARRIVAL". If transmitted by any other radio station, delay may occur. If vessel is equipped with VHF, use Channel 16 (156.80 MHz) to call the pilot boat or Bar Pilots' Office, Astoria (KOK 360) and shift to Channel 13 (156.65 MHz).

PILOT LADDER INSTRUCTIONS

1. Please contact the pilot boat via voice radio (Channel 16 or Channel 13 approximately 30 minutes prior to arrival for desired lee and boarding instructions.

2. The Columbia River Bar Pilots have 2 pilot vessels; the "Peacock" and the "Columbia". When the "Peacock" is on station, Masters will be instructed to rig their pilot ladder 4 ft. above the water's edge. When the "Columbia" is on station, the Master will be instructed to rig the ladder 10 ft. – 12 ft. above the water's edge. The above-mentioned distances above the water are of the utmost importance, particularly in the case of the "Columbia", as the pilot boat can and has pulled the ladder down when it becomes pinched between the pilot boat and the side of the vessel. Pilot ladders and boat ropes shall not be permitted to drag in the water. No tag lines, pull ropes or trailing lines shall be attached to the bottom of the ladder. All pilot ladders must comply with SOLAS Regulations.

3. Pilot ladders shall be rigged amidships, over "draft marks" clear of all obstructions, such as accommodation ladders, and clear of overside discharges from the engine room and deck scuppers.

4. The pilot ladder should be kept clean and used for embarking and disembarking Pilots only. The ladder shall be made in one continuous length, not 2 sections shackled or lashed together. The ladder shall be equipped with spreaders approximately 10 ft. apart in accordance with SOLAS regulations. The ladder must be in good condition, the treads horizontal and the upper surface of rough non-skid quality.

5. The ladder must be adequately lit at night by means of a light shining well over the ship's side in the vicinity of the ladder. The area of the deck where the Pilot boards and leaves should be free of debris and well lighted. Where portable stanchions and bulwark steps are used, they shall be rigidly attached to the ship's structure. A life ring with water light and lifeline attached should be ready at hand. Rigging of the ladder and embarking and disembarking of the Pilot must be under the supervision of a licensed officer.

6. Boat ropes are not to be used, all pilot boats are power propelled.

7. Manropes shall be of manila 3 in. circumference. The manropes shall be free of any knots including the lower end. The manropes should be rigged 1 ft. – 2 ft. longer than the pilot ladder. Manropes are not to be rigged for boarding unless otherwise advised.

8. If vessel is to take a deck load of logs, please discuss with your Agent the building of a catwalk to provide safe passage to and from the pilot ladder.

Long Island Sound and Connecticut Ports:

The Connecticut State Pilots Association is offering pilot service for all foreign and registered vessels en route to and from Connecticut Ports via the Long Island Sound. U.S. enrolled vessels will continue to be services by Interport Pilots using the same boats and pilots. Pilots are licensed by the Federal Government and the State of Connecticut.

The Pilot Station established off Montauk Point provides a more direct route to Long Island Sound ports. Vessels using Connecticut State pilots through the mile wide, 58 ft. deep, Montauk Passage, will save between 1 hour and 3 hours steaming time as opposed to being diverted to Pilot Stations at Point Judith or Brenton Reef, Rhode Island.

The U.S. Navy uses the Montauk Passage for its nuclear submarines bound to and from Connecticut ports and, as Interport Pilots, we have used this route for vessels in the coastwise trade for over 30 years.

Notice of Arrival is required. A 24 hour to 36 hour advance notice of ETA is suggested. A 12 hour update and a 6 hour update is necessary in order to co-ordinate dispatching of pilots.

The Pilot boarding point is 3 miles East of Montauk Sea Buoy.

Connecticut State Pilots Association, State Pier, New London, Ct. 06320. Tel: 1 (800) 346-4877 or in New Jersey 1 (201) 291-1310. Cables: Port Pilots, Atlantic Highlands, N.J. Pilot Boat: Call Sign – "Connecticut Pilot".

Constitution State Pilots Association also offer pilot service in Long Island Sound and all Connecticut ports.

Constitution State Pilots Association, offer a pilotage service in Block Island Sound, Long Island Sound, the Harbours of Bridgeport, New Haven and New London, Connecticut and Long Island Sound platforms. They also provide docking pilot services in the afore-mentioned harbours, and have 2 Pilot Stations, one located at Montauk Point in Block Island Sound (Lat. 41° 01.7' N., Long. 71° 41.8' W.) 3 miles East of Montauk Sea Buoy, and the other station at Block Island (Lat. 41° 18' N., Long. 71° 35' W.). These stations are serviced by the Pilot Boat "Constitution", a 65 ft. blue and white vessel which monitors VHF Channels 16 and 8.

Constitution State Pilots Association, 500 Waterfront Street, New Haven, Connecticut 06512. Tel: 203-468-0255 (24 hours). Fax: (516) 582-6550. Telex: 940103 WU Pubtlx BSN. All Constitution State Pilots carry cellular telephones and are in constant communication with Agents and Terminals.

The Long Island Sound State Pilots Association is offering total pilot service for all foreign and registered vessels on Long Island Sound and Connecticut Harbours, also New York Platforms.

U.S. Enrolled Vessels will also be served by Long Island Sound Pilots Association. Licensed by the U.S. Federal Government and State of Connecticut, Long Island Sound State Pilots Association have established the first pilot boat station off Montauk Pt., Long Island, New York, for a shorter route to the Sound and Connecticut (See "Plan").

Vessels using Long Island Sound State Pilots Association will save between 2-3 hours of steaming time, as opposed to being diverted to Pilot Station at Pt.Judith, Rhode Island.

Long Island Sound State Pilots have been serving the Industry for over 30 years.

Long Island Sound State Pilots Association Inc., 1440 Whalley Avenue, Suite 123, New Haven, Connecticut 06515. Tel: (203) 772-0101 (24 hours). Cables: Lispilot New Haven, Connecticut. Fax: (302) 629-9392.

Southwest Alaska Pilots Association: P.O. Box 977, Homer, Alaska 99603. Tel: (907) 235-8783. Fax: (907) 235-6119.

SWAPA is the only service authorised to provide pilotage in the Southcentral Alaska region which extends from 141° to 156° West longitude. This includes Icy Bay, all of Prince William Sound, Seward/Resurrection Bay, all Cook Inlet ports and all Kodiak Island ports.

Pilotage services can be arranged through the Agent or directly to the Pilots. SWAPA maintains 24 hour dispatch at Homer via Tel: (907-235-8783) for all ports except Valdez. Facsimile messages during business hours (Monday – Friday, 0800 hrs. – 1700 hrs.) can be sent to the Homer Dispatcher (907-235-6119).

Pilot Boarding Stations:

- (1) Icy Bay – 9.0 miles × 180° true from Claybluff Point Light; approximate position Lat. 59° 49.0' N., Long. 141° 35.0' W.
- (2) Cordova – 2.0 miles × 180° true from Sheep Point; approximate position Lat. 60° 35' N., Long. 146° 00' W.
- (3) Valdez and Whittier – approximately 3.6 miles × 246° true from Bligh Reef Buoy; approximate position Lat. 60° 49' N., Long. 147° 01' W.

(4) Seward – 1.1 miles × 152° true from Caines Head Light; approximate position Lat. 59° 58' N., Long. 149° 22' W.
(5) Cook Inlet – 1.0 miles × 180° true from Lands End Light; approximate position Lat. 59° 35' N., Long. 151° 25' W.
(6) Kodiak (City) or Womens Bay – 2.0 miles × 100° true from St. Paul Harbor Entrance Light; approximate position Lat. 57° 44' N., Long. 152° 22' W.
(7) Discoverer Bay – 2.0 miles × 000° true from Posliedni Point; approximate position Lat. 58° 28' N., Long. 152° 20' W.
(8) Port Wakefield – 1.0 miles × 298° true from Kekur Point; approximate position Lat. 57° 52' N., Long. 152° 49' W.
(9) Port Bailey – 1.5 miles × 000° true from Dry Spruce Bay Light; approximate position Lat. 57° 59' N., Long. 153° 06' W.
(10) Uganik – 2.0 miles × 284° true from East Point; approximate position Lat. 57° 51' N., Long. 153° 32' W.
(11) Larsen Bay – 1.0 miles × 090° true from Harvester Island; approximate position Lat. 57° 39' N., Long. 153° 57' W.
(12) Alitak – 2.4 miles × 131° true from Cape Alitak Light; approximate position Lat. 56° 49' N., Long. 154° 15' W.
(13) Old Harbor – 1.0 miles × 082° true from Cape Liakik; approximate position Lat. 57° 07' N., Long. 153° 25' W.

AUTOMATIC RADAR PLOTTING AIDS: With effect as from July 1st, 1982, vessels carrying oil or hazardous materials in bulk must have automatic radar plotting aids.

A fine for failure to carry an ARPA could be multiplied by the number of days of the violation.

The United States Coast Guard has stressed, however, that its official policy is enforcement by denial of entry and restriction of operation and not primarily by the enforcement of fines.

While the Coast Guard recognises that the Public Law enables financial penalties to be incurred, it is believed that the terms of the Port and Tanker Safety Act under which the U.S. Coast Guard operates directs it to monitoring and identification of previous offenders and enforcement by prevention of entry into U.S. ports or subsequent restriction of trade and departure.

COAST GUARD REGULATIONS: The U.S. Coast Guard has announced its intention to develop the following regulations implementing sections of the 1978 U.S. Port and Tanker Safety Act requiring:

1. Existing crude oil carriers of 20,000 d.w.t. or above but less than 40,000 d.w.t. to have segregated ballast tanks (SBT) or a crude oil washing system (COW) by January 1st, 1986, or when they reach 15 years of age, which ever occurs later; and
2. Existing product carriers of 20,000 d.w.t. or above but less than 40,000 d.w.t. to have SBT or dedicated clean ballast tanks (CBT) by January 1st, 1986, or when they reach 15 years of age, whichever occurs later.

POLLUTION: Any vessel which does not have a valid I.O.P.P. Certificate on board will not be allowed to transit U.S. waters.

NOTICE: *B.A. Notice to Mariners No. 3013(T) of 1983:*

UNITED STATES OF AMERICA – Chart and Publication requirements.

A statement concerning the U.S. Navigation Safety Regulations relating to Navigation, charts and Publications has been issued in the U.S. Notices to Mariners Weekly 44/83. This is reproduced below. Admiralty Annual Notice to Mariners No. 22 will be amended as appropriate in the 1984 edition.

CHART AND PUBLICATION REQUIREMENTS

Sections 164.30 and 164.33 of Title 33 of the Code of Federal Regulations Part 164 (33 CFR 164), which detail requirements for the carriage of nautical charts and publications, are amended effective October 28, 1983. The regulations contained in these sections are applicable to each self-propelled vessel of 1,600 g.r.t. or more, operating on the navigable waters of the United States, except the St. Lawrence Seaway, and are reprinted as follows:

§164.30 Charts, publications, and equipment: General.

No person may operate or cause the operation of a vessel unless the vessel has the marine charts, publications, and equipment as required by §§164.33 through 164.41 of this part.

§164.33 Charts and publications.

(a) Each vessel must have the following:

(1) Marine charts of the area to be transited, published by the National Ocean Service, U.S. Army Corps of Engineers, or a river authority that:

(i) Are of a large enough scale and have enough detail to make safe navigation of the area possible; and

(ii) Are currently corrected.

(2) For the area to be transited, a currently corrected copy of, or applicable currently corrected extract from, each of the following publications:

(i) U.S. Coast Pilot.

(ii) Coast Guard Light List.

(3) For the area to be transited, the current edition of, or applicable current extract from:

(i) Tide tables published by the National Ocean Service.

(ii) Tidal current tables published by the National Ocean Service, or river current publication issued by the U.S. Army Corps of Engineers, or a river authority.

(b) As an alternative to the requirements for paragraph (a) of this section, a marine chart or publication, or applicable extract, published by a foreign government may be substituted for a U.S. chart and publication required by this section. The chart must be of large enough scale and have enough detail to make safe navigation of the area possible, and must be currently corrected. The publication, or applicable extract, must singly or in combination contain similar information to the U.S. Government publication to make safe navigation of the area possible. The publication, or applicable extract must be currently corrected, with the exceptions of the tide and tidal current tables, which must be the current editions.

(c) As used in this section, "currently corrected" means corrected with changes contained in all Notices to Mariners published by Defense Mapping Agency Hydrographic/Topographic Centre, or an equivalent foreign government publication, reasonably available to the vessel, and that is applicable to the vessel's transit.

SHIP'S OFFICER'S REPORT: The information given for the port of N Orleans (U.S.A.) applies to all the ports in the U.S.A. in the event of vessel arriving from abroad or from a previous U.S. port. All documents such as Crew List, Passenger List (Form I-418), De Engine, Steward's and Bonded Stores Lists (Form 1303), Crew's Effe Declaration (Form 1304), are required in duplicate at each port for en inward.

ALBANY, New York: 42.40 N. 73.45 W. (See Pla

DOCUMENTS: If first port of call in U.S., 2 complete Customs Manife describing all cargo on board and ports of discharge. Also 1 Cargo L for Albany cargo, 3 Crew Lists, 3 Stores Lists, 3 Curio Lists, Sh Register, Load Line Certificate and Tonnage Tax Certificate.

PILOTAGE: Hudson River Pilot boards vessel off Yonkers, N.Y. Ca address: "Hudpilots, Yonkers, N.Y."

ANCHORAGES: Several anchorage areas in Hudson River en rout Albany if required due to weather. Vessels cannot anchor at Por Albany.

RESTRICTIONS: Hudson River Channel to Albany has controlling de of 32 ft. MLW. Vessels with draft in excess of 28 ft. will be require transit river on favourable tide as directed by Pilot.

MAX. SIZE: Max. permissible length 750 ft., breadth 110 ft., draft u 31 ft. Turning basin at Albany 1,100 ft. in width.

HEALTH: See "Health: All Ports" before first U.S.A. port.

AGRICULTURE: See "Agriculture" before first U.S.A. port.

TUGS: One 2,000 h.p. tug stationed at port at all times; additional t available upon advance request. Normally 1 tug is sufficient for tur and docking. Tug's lines are used.

BERTHING: 5,000 linear ft. of marginal wharf available at APDC term for general cargo, grain, lumber, etc., 25 ft. – 31 ft. alongside wh Various privately operated deep-water petroleum terminals in port at

Facilities: 13.5 million bushel grain elevator. 17 million gallon molas storage – 2 terminals. Scrap Iron Terminal, 350,000 sq. ft. cove warehouse space.

Equipment: Available at the Port of Albany:

2 Diesel powered 5,000 lb. lift trucks.
2 Diesel powered 6,000 lb. lift trucks.
4 Diesel powered 52,000 lb. lift trucks.
8 Diesel powered 9,000 lb. lift trucks, all are available with bale cla
1 Diesel powered 30,000 lb. lift truck.
1×225 ton capacity crawler type crane.

BRIDGES: Minimum vertical clearance of bridges on Hudson Rive route to Albany is 135 ft.

STEVEDORES: Rates and information can be obtained from Fe Marine Terminals Inc.

TANKERS: Bray/Getty Terminal:

Location: The Bray/Getty Terminal is located approximately 126 m from the Battery (NYC), about 0.8 miles Northward of Island Cree is an offshore wharf 250 ft. long with a dock height above the wate of 11 ft.

Berthing: Normal berthing is starboard side to with the use of only 1,800 h.p. tug. An additional tug may be required if adverse wea conditions exist. The vessel approaches the berth from midstrea approximately a 30° angle to the pier. The tug is used on the por to control the direction of the vessel during the approach. Once alon the pier, spring lines are run out and the vessel is held in positio her own engines until the tug is secured. See "Plan".

Gangway: The terminal does not provide a gangway.

Fresh Water: Not available at this terminal.

Bunkers: Fuel is not available at this terminal.

Slop/Deballast: The terminal is not equipped to receive slops or ballast.

Security: The terminal is fenced and guarded.

Pollution: Although an oil boom is permanently in place inside the area, outside contractors must be contacted for clean-up in the ev the oil spill.

Firefighting: The terminal is equipped with one 150 lb. dry che extinguisher with additional firefighting support by shorebased fire f

Cirillo Terminal:

Location: The Cirillo Terminal is located approximately 125 miles the Battery (NYC), about 0.5 miles Northward from Island Creek bulkhead wharf 280 ft. long with a dock height above the wate 10 ft. It is owned by Albany Port District Commission and opera Cirillo Brothers.

Berthing: Normal berthing is port side to with the use of one 1,8 tug. An additional tug, may be required if adverse weather con exist. The vessel approaches the berth on the ebb tide and approaches the marginal berth in the usual manner. The curren area sets fair with the dock face creating an ideal docking enviro See "Plan".

Gangway: The terminal does not provide a gangway.

Fresh Water: The terminal can supply fresh water upon reques

Slop/Deballast: The terminal is not equipped to receive slops ballast.

Security: The terminal is fenced and guarded at all times.

Pollution: Although an oil boom is readily available for containment, all clean-up must be performed by outside contra

Metropolitan/Arco Terminal:

Location: The Metropolitan/Arco Terminal is located appro 126 miles from the Battery (NYC). The dock is of an offsho construction with dolphins.

Berthing: Normal berthing is starboard side to with the 2×1,800 h.p. tugs. All ships are usually docked at Slack Hig The vessel approaches the dock from the centre of the chann carefully breasted alongside the pier, using her tug and the slide over against the breasting dolphins. Spring lines are followed by breasts, then head and stern lines. See "Plan".

Gangway: The terminal does not provide a gangway.
Fresh Water: Piped fresh water is available.
Bunkers: Fuel is not available at the dock.
Slop/Deballast: The terminal is not equipped for slops or dirty ballast receipt.
Security: The terminal is fenced and guarded. The main gate is locked when no vessels are at the dock. When a vessel arrives the dock is continually manned by terminal employees.
Pollution: The terminal is equipped with a workboat and 1,000 ft. of boom for spill containment. Local contractors must be contacted for clean-up operations.
Firefighting: The dock is equipped with one 150 lb. dry chemical extinguisher. Additional back-up is supplied by local firefighting departments.

Niagara/Mohawk Terminal:
Location: The Niagara/Mohawk Terminal is located approximately 125 miles from the Battery (NYC).
Berthing: Normal docking is port side to with the assistance of one 1,200 h.p. tug. The vessel approaches the marginal berth at minimum velocity with the ship's engines used to maintain relative position of vessel while lines are passed. The tug assists in the breasting of the vessel towards the dock. See "Plan".
Gangway: The terminal does not provide a gangway.
Fresh Water: Piped fresh water is available at the dock.
Bunkers: Fuel is not available at this terminal.
Slop/Deballast: The terminal is not equipped to receive slops or dirty ballast.
Security: The terminal is fenced and guarded.
Pollution: The dock is equipped with 2,500 ft. of boom for oil spill containment.
Firefighting: Portable CO_2 extinguishers provide adequate firefighting capabilities.

Sears Terminal:
Location: The Sears Terminal is located approximately 124 miles from the Battery (NYC), about 1.2 miles Southward of Island Creek. It is an offshore wharf 191 ft. long with a dock height of 10 ft. above the waterline.
Berthing: Normal berthing is port side to with the use of one 1,800 h.p. tug. An additional tug may be required if adverse weather conditions exist. The vessel approaches the dock on the first of the ebb tide, slowly stemming the tide during the approach. The tug is positioned on the starboard bow to control the vessel's movements. After a normal approach, the vessel is spotted and spring lines are led out. The vessel is then held in position with the tug and own engines while the breast, head and stern lines are led out. See "Plan".
Gangway: The terminal does not provide a gangway.
Fresh Water: Not available at this dock.
Bunkers: Fuel is not available.
Slop/Deballast: The terminal is not equipped to receive slops or dirty ballast.
Security: The terminal is fenced and guarded at all times.
Pollution: Although the terminal is equipped with a workboat and boom for oil spill containment, all clean-up equipment and personnel must be secured through local contractors.

Roseton, N.Y.: Central Hudson Gas & Electric Terminal:
Location: The Central Hudson Gas and Electric Terminal is located on the Hudson River approximately 74 miles from the seabuoy.
Berthing: Normal berthing is starboard side to with use of one 3,500 h.p. tug. An additional tug may be required during adverse weather conditions. The vessel proceeds to a point opposite to or a little above the dock, turns midstream with the aid of the tug and comes down parallel to the dock. She is then breasted in and held alongside by the tug while the spring and breast lines are led out. The tug then handles the head and stern lines (synthetic required). See "Plan".
Gangway: The terminal does not provide a gangway.
Fresh Water: Not available at the dock.
Bunkers: Fuel is not available at this terminal.
Security: The terminal is fenced and guarded.
Pollution: Booms and absorbent materials are available on the dock in the event of an oil spill.
Firefighting: The dock is equipped with one 250 lb. purple K extinguisher, 2×2.5 in. fire hoses with fog nozzles on a 6 in. main.

Ravena, N.Y. (Port of Albany): Atlantic Cement Terminal:
Location: The Atlantic Cement Terminal is located on the Hudson River approximately 127 miles from the seabuoy and is under the jurisdiction of the Port of Albany.
Berthing: All vessels must dock and undock during daylight hours only. Normal berthing is port side to with the use of one 2,100 h.p. tug. An additional tug may be required during adverse weather conditions or when docking on a rising tide. The dock is of a marginal design, parallel to the channel axis. Normal approach is with a tug breasting the vessel onto the dock.
Gangway: The terminal does not provide a gangway.
Fresh Water: Not available at the dock.
Bunkers: Fuel is not available at this terminal.
Slop/Deballast: The terminal is not equipped to receive slops or dirty ballast.
Security: Although the terminal is not fenced or guarded, dock personnel are in attendance at all times.
Pollution: In the event of an oil spill, the containment and clean-up equipment available at the dock consists of:

1. 7,400 ft. of 12 in. collar boom.
2. Oil retention gate mounted on dock.
3. 23 ft. 150 h.p. tow boat.
4. 30 ft. deck barge for oil boom.
5. 500 ft. of 2.5 in. fire hose.
6. 100 bags of oil absorbent material.
7. 15 bags plastic "Oil Snares".
8. Air bubbling system-along dock face.

Firefighting: The dock is equipped with one 500 lb. dry chemical extinguisher, 350×2.5 in. hose and fog nozzles located adjacent to the dock manifold.

FRESH WATER: Supplied during regular working hours daily, except Saturdays, Sundays, and holidays, at $2.75 per 100 cu. ft. plus $22.00 service charge per daily delivery on straight time. Additional charge if supplied during other periods.
CONSULS: Italian Vice-Consulate located at Albany, other consulates available at New York City.
REPAIRS: Minor deck and engine repairs can be handled.
GANGWAY/DECK WATCHMEN: Available via ship chandler, not required but recommended.
AIRPORT: 7 miles distant from port: served by Allegheny, America, Altair and Executive Airlines.
TIME: Eastern Daylight Saving, (GMT minus 4 hours) from first Sunday in April till last Sunday in October.
HOLIDAYS: Standard U.S. holidays; cargo work can be arranged on all holidays at overtime rates, except July 4th, Labour Day and Christmas Day.
SHORE LEAVE: Crew members allowed ashore unless restricted by Customs or Immigration requirements.
GARBAGE DISPOSAL: Service not available.
WASTE OIL DISPOSAL: Arranged through local Agents.
SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: February 1980.
Pilotage: Compulsory. Pilot boards at Ambrose Light Tower and Hudson River Pilot boards at Yonkers.
Restrictions: Vessels able to enter and leave during darkness at any stage of the tide.
Max. Size: LOA 750 ft. (Approx). Max. Draft: 31 ft. to 32 ft. depending on height of river.
Tugs: One tug stationed at Albany (approx. 2,500 h.p.). Additional tugs come from New York.
VHF: Tug only listens out on VHF before vessel arrives.
Services: Following services available: Fresh water, fresh provisions, small repairs, machine shop, airport, Lloyd's surveyor (from New York), Salvage surveyor (from New York), lubricating oil, groceries and meats.
Berthing: Pier No. 2 Albany: Berth located 3 miles from Albany and 145 miles from the entrance. Vessel's size limited by draft and space available in swinging room in basin. Max. size approx. LOA 600 ft., draft 31 ft. Least depth of water in channel from sea to berth 33 ft. (approx). Vessels able to dock and undock at any stage of the tide, day or night.
Grain Loading Facilities: Available.
Ro/Ro Facilities: Available in New York Harbour.

AUTHORITY: Albany Port District Commission, Administration Building, Port of Albany, Albany, N.Y. 12202. *Tel:* (518) 463-8763. *FAX:* (518) 463-8767. *Contact:* F. Keane, General Manager.

ALEXANDRIA, Virginia: 38.48 N. 77.03 W. (See Plan)

LOCATION: On the Potomac River 7 miles from Washington D.C.
DOCUMENTS/PILOTAGE: Refer to "Hampton Roads".
RESTRICTIONS: Anchoring necessary between 2200 hrs. – 0600 hrs. Berthing daylight only.
Channel: Width 200 ft. Depth 24 ft. Turning basin: length 6,700 ft. Width 300 ft.
MAX. SIZE: Governed by draft only – max. 22 ft. 6 in. all times.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore, Md.
TUGS: None required.
BERTHING: 2 open piers. Berthing 0600 hrs. to 2200 hrs.
BRIDGES: 1 bridge, closed Monday through Friday 1600–1830 hrs. and 0630–0900 hrs.
STEVEDORES: Informally arranged through Receivers or Shipper's Agents.
MEDICAL: Hospital available.
FRESH WATER: Available at berth – 10 t.p.h.
FUEL: Not available.
REPAIRS: Minor facilities.
GANGWAY/DECK WATCHMEN: Shore watchman provided.
OPENING/CLOSING HATCHES: Stevedores. Vessel – depending on understanding.
REPATRIATION: Facilities exist.
AIRPORT: 3 miles. Washington National – multiple flights.
TIME: GMT minus 5 hours.
POLICE/AMBULANCE/FIRE: Agents arrange. Watchmen on duty.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required by Immigration.
DELAYS: No unusual delays.
SERVICES: Searle Consortium, Ltd. in Alexandria (Tel: (703) 768-6026) and their sister company, Seaward Marine Services can provide the following: Diving and general underwater inspection services; underwater hull cleaning; Salvage survey and underwater repairs of a salvage nature; assistance in the refloating of stranded vessels and assistance in the arranging/engineering of towage.
AUTHORITY: Virginia Port Authority, 600, World Trade Center, Norfolk, Va. 23510. *Tel:* (804) 683-8000. *Telex:* TWX 710-881-1231. *Cables:* Vastports-Norfolk. *FAX:* (804) 683-8500. *Contact:* J. Robert Bray, Executive Director.

ANACORTES, Washington: 48.31 N. 122.36 W. **(See Plan)**

DOCUMENTS: Refer to "Tacoma".
PILOTAGE: Port Angeles Pilots. Tel: Seattle 728-6400, Dispatcher 448-4455. Pilots on VHF Channels 13 and 14.
ANCHORAGES: East End Guemes Channel, 54 ft. minimum depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Join vessel in Guemes Channel at Anacortes – lines optional.
BERTHING: *Pier No. 1:* Length 580 ft., depth 34.5 ft.
Pier No. 2: Length 452 ft., depth 44 ft.
CRANES: 1×15 tonne mobile crane.
TANKERS: *Texaco:* Berth No. 1: Length 1,000 ft., depth 45 ft.
Berth No. 2: Max. LOA 650 ft., depth 40 ft.
Shell: Outer Berth: Max. LOA 810 ft., max. draft 45 ft.
Inner Berth: Max. draft 40 ft.
STEVEDORES: Request 24 hours' notice. Working hours: 0800 – 1200 and 1300 – 1700, 1800 – 0300 and 0300 – 0800.
Weekend work on overtime rates.
FRESH WATER: Available from city water system.
FUEL: Available from Shell and Texaco (Bunker "C" and light diesel).
REPAIRS: Minor repairs only.
DRY DOCKS: Synchrolift (306 ft. × 75 ft.) with capacity 5,000 tons. It can accommodate vessels up to 350 ft. LOA.
Floating dry dock (312 ft. × 90 ft.) with capacity 9,000 tons. It can accommodate vessels up to 400 ft. LOA.
GANGWAY/DECK WATCHMEN: Not required by port.
OPENING/CLOSING HATCHES: Stevedores or crew before vessel's arrival.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
CARGO GEAR: ILWU requirements.
AIRPORT: 75 miles Seattle International.
TIME: GMT minus 8 hours. From end April to end October, Pacific Daylight Saving Time, GMT minus 7 hours.
HOLIDAYS: See "Tacoma".
POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire dial 911.
TELEPHONES: Available at Pier 2 and at Pier 1 by Phone Co.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
AUTHORITY: Port of Anacortes, P.O.Box 297, Anacortes, Washington 98221. *Tel:* (206) 293-3134 (Scan System (206) 576-6371). *FAX:* (206) 293-9608. *Contact:* M. Hardy, Marine Terminal Supervisor.

ANCHORAGE, Alaska: 61.12 N. 150.00 W. **(See Plan)**

DOCUMENTS:
- 3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (Curio List).
- 2 copies Stores List.
- 2 copies Passenger List (Form I-418).
- 2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: The Pilot Station for Anchorage is at Homer, Alaska (See "Homer").
ANCHORAGES: The best anchorage for deep-draft vessels is West of Anchorage in depth of 10 fathoms to 12 fathoms, silt bottom. Holding ground is good.
TIDE AND CURRENTS: The diurnal range of tide is 29.6 ft., currents from 1.7 knots to 6 knots or more in mid-channel.
RESTRICTIONS: Flow and pan ice is encountered in the Cook Inlet from approximately the end of November until the end of February. This ice does not freeze solid due to the tidal action. The port is in year-round use and expert information on Winter conditions may be obtained from any of the highly qualified licensed ship pilots available in the area.
MAX. SIZE: All berths 35 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Port of Anchorage "KBT-42" on HF-AM and SSB. "WHJ-82" on VHF-FM.
Radio Advice: Masters must notify Agents at Anchorage of ETA at Homer Spit, Alaska, as early as possible. Homer Spit position: 59° 35′ N., 151° 40′ W. To avoid confusion ETA message to Anchorage should indicate Time Zone used. Alaska Communication System Stations are located at Juneau – call sign AKM – Keeping watch on 500 kHz and working on 452 kHz. This station is reported to be very difficult to contact and is closed during weekends.

The fastest way to forward radio messages in the North Pacific is via San Francisco Radio KPH.

The U.S. Coast Guard Station Kodiak – call sign NOJ – keeps W/T watch on 500 kHz, working on 470 kHz.

Due to difficulties reported in contacting local Alaskan stations, Masters of vessels engaged on trans-Pacific crossings are advised to route radio messages to Alaska and Europe via Singapore Radio or Choshi Radio until the dateline, thereafter via San Francisco radio.
TUGS: Join vessel 1.5 miles S.W. of docks.
BERTHING: 180 ft. P.O.L. No. 2 "T" Dock with dolphins (600 ft. LOA).
415 ft. P.O.L. Terminal with dolphin.
600 ft. General Cargo Terminal No. 1, apron width 95 ft., live road 600 lb. per sq. ft.
General Cargo Terminals No. 2 and 3, 610 ft. and 893 ft. respect apron width 69 ft.
Depth alongside all Terminals 35 ft. at MLLW.
SPECIALISED CARGO HANDLING FACILITIES: 2×30 ton and 1×40 ton Mitsubishi container cranes servicing general Terminals 1, 2 and 3; private bulk cement pipelines to shore Ro-Ro service available.
CRANES: Portable, Paceco and Mitsubishi container cranes. Capa Portable to 150 tons. Container cranes 30 tons and 40 tons. Outr from fender face is 79 ft. for the Paceco and 86 ft. for the Mitsub Clear height above MLLW is 132 ft.
STEVEDORES: *Working Hours:* Stevedores do not work on Jan 1st, September 6th, November 25th and December 25th. The 6 hours of any shift between 0800 hrs. and 1500 hrs. is at the str time rate. Work performed on Saturdays, Sundays, holidays between 1700 hrs. and midnight is at overtime rate. Meal breaks 1145 hrs. to 1300 hrs. and 1745 hrs. to 1900 hrs. Stevedores between 0100 hrs. (double overtime rate) and 0700 hrs.
MEDICAL: All facilities available. 3 local hospitals.
TANKERS: Petroleum Terminal No. 1 at the Port of Anchora contiguous to the general cargo piers. The POL Pier is 612 ft. long contains multiple petroleum manifolds. Depth alongside 35 ft.
Petroleum Terminal No. 2 is a new "T" Pier located South of existing facility. POL No. 2 is 645 ft. long including dolphins and con multiple manifolds. Pier will accommodate vessels to 600 ft. alongside 35 ft.
DENSITY: From 1009 to 1010.
FRESH WATER: Public Health Service certified water station.
FUEL: All grades available.
SURVEYORS: B. J. Logan and Associates, (Lloyd's Agas correspondence to AIMU; National Cargo Bureau), 237 E. Third Ave Anchorage, Alaska 99501. Tel: (907) 272-7724.
GANGWAY/DECK WATCHMEN: Required shipside.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: At the discretion of Customs Of Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wi spirits per man. Additional allowances may be given if consi necessary, due to length of vessel's stay in port.
AIRPORT: 5 miles; served by regular foreign and domestic airline
HOLIDAYS: New Year's Day (January 1st); Lincoln's Bir Washington's Birthday; Seward's Day (March 30th); Memorial Independence Day (July 4th); Labour Day; Columbus Day; Alaska (October 19th); Veterans' Day; Thanksgiving Day; Christmas (December 25th).
POLICE/FIRE/AMBULANCE: Police 786–8900; Ambulance/Fire 4900.
BANKS:
Alliance Bank
First National Bank of Anchorage
Key Bank
National Bank of Alaska
Ranier Bank Alaska
STORING: See "Prelims".
1. Yes.
2. No restrictive regulations.
3. Yes: Immediately adjacent to ship.

TUGS: Tugs normally join vessels just inside harbour entrance. Use ship's or tug's lines optional; if tug lines used an additional charge of 10% of the tonnage will be added. For tug service call ship-to-shore tug Idaho, FM Channel 51.

BERTHING: Pinney Dock and Transport Co.: Dock No. 4 – length 2,000 ft., depth 27 ft. 2×45 ton cranes

Pinney Dock and Transport Co. (Ex-Con Rail Minnesota slip): Realigned berth with length 1,500 ft. and depth 28 ft.

Con Rail: Dock No. 10 – length 1,200 ft., depth 27 ft. 1 shiploader, rate 7,000 t.p.h. Max. size: LOA 1,000 ft., beam 105 ft. and max. draft 26 ft.

STEVEDORES: Work gangs for loading and unloading provided by the Pinney Dock and Transport Company.

MEDICAL: Vessels requiring medical attention call U.S. Coast Guard station located in the main river by calling AM Channel 20. Ambulance and hospital service available. No inoculation, vaccinations, or fever certificates required.

DENSITY: Fresh water.

FRESH WATER: Available at stevedoring dock.

FUEL: Available on 24-hour notice.

FIRE PRECAUTIONS: City fire department. Also water line on face of the dock available.

CONSULS: Nearest at Cleveland.

REPAIRS: All types of deck and engine repairs available; also topside shell repairs.

GANGWAY/DECK WATCHMEN: Overseas stevedoring dock enclosed wire fence, watchmen on dock at all times, guard at main gate.

OPENING/CLOSING HATCHES: Optional by crew or stevedores.

CUSTOMS ALLOWANCES: Only allotments per person consumed aboard allowed.

REPATRIATION: Can be arranged.

AIRPORT: Nearest airport approx. 10 miles South with commuter services to Cleveland Hopkins Airport. Cleveland Hopkins Airport approximately 70 miles West.

TIME: Local Eastern Standard Time except from first Sunday in April till last Sunday in October – Daylight Saving Time.

HOLIDAYS: Stevedoring docks double time on holidays and time plus one-half on Saturdays and Sundays.

POLICE/AMBULANCE/FIRE: Police, 998-2221; Ambulance, 998-2345; Fire, 998-2121.

TELEPHONES: No provisions for placing telephones aboard vessels.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available. 72 hours notice required.

WASTE OIL DISPOSAL: Service available using tanker trucks. 72 hours notice required.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: Ashtabula Port Authority, 4400 Main Avenue, Ashtabula, Ohio 44044. *Tel:* (216) 992 8428. *Contact:* Ron Kiester, Chairman.

ASTORIA, Oregon: 46.11 N. 123.50 W. (See Plan)

PILOTAGE: Columbia River Bar Pilots, Astoria, Oregon, 97103. See "General – Pilotage" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tugs are available for assisting ships at the option of the vessel.

BERTHING: The 3 piers, including Ro-Ro facilities and barge ramp, comprising the Port of Astoria Terminals are located in the Western part of the City of Astoria at the confluence of Youngs Bay and the Columbia River. Astoria is served by 1 railroad, 3 major highways and 6 barge lines. The piers extend to the main ship channel, allowing vessels to berth or sail at any time. The terminals are operated by the Port of Astoria Commission as a public property open to all carriers and shippers.

Pier No. 1:

Location: Foot of Portway Street, adjacent to Pier No. 2, and separated therefrom by a water slip 400 ft. in width.

Principal Commodities: General commodities, break bulk, plywood, frozen tuna, grain, sacked goods.

Berths: 2 vessels. 875 ft. face or Northerly end; 1,000 ft. slip or Westerly side, depth 40 ft.

Pier Apron: Width 24 ft., slip side; 70 ft., face or end. Dock is 16.1 ft. above MLW.

Equipment: Dock tractors, 2 container straddle carriers, fork lift trucks, trailer trucks, hand trucks and other necessary miscellaneous cargo handling equipment.

Water Services: Portable meters and hose connections for vessel service. Rates of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Fire Protection: Hose stand pipes.

Electric Current: Face Pier No. 1 – 440 volt, 3 phase. Lighting 110 volt, 2 phase, 60 cycle, 35 amperes, alternating current. Portable meter and plug-in service available at all berths.

Pier No. 2:

Location: Between Piers No. 1 and 3. Separated from Pier No. 1 by a water slip, 400 ft. wide, and from Pier No. 3 by a water slip, 350 ft. wide.

Warehouse Shed: 65,000 sq.ft. steel building with foundation and sprinkler system.

Principal Commodities: Lumber, logs, general cargo, break bulk, bulky cargo in open storage.

Berths: 5 vessels; 425 ft. face or Northerly end; 1,307 ft., slip Easterly side, 40 ft. depth; 1,445 ft., slip Westerly side, 35 ft. depth.

Open Dock: 535,000 sq.ft. Dock level 16.1 ft. above MLW.

Equipment: Modern lighting. Tractors, fork trucks, etc. as listed under Pier No. 1, when required. Portable meters and hose connections. Pipe lines on pier for bunkering.

Barge Ramp: A barge ramp capable of handling loads up to 50 tons is now in operation at the outer berth of Pier No. 2. The ramp is utilised for transfer of cargo from barge or vice versa.

Water Service: City service. Portable meters and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Electric Current: Lighting 110 volt, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service at all berths.

Pier No. 3:

Location: Foot of Hamburg Avenue, (adjacent to and separated from Pier No. 2 by water slip 350 ft. wide).

Principal Commodities: Canned goods, wood pulp, paper products, general cargo, break bulk, dry bulk.

Berths: 2 vessels. 1,750 ft. slip on Easterly side; 20 ft. in depth.

Warehouse Transit Shed: Floor area 248,000 sq.ft. Floor load 600 lbs. East side; 1,000 lbs. West side, per sq.ft.

Shed width 160 ft. Shed length 1,550 ft. Mill type reinforced concrete walls and floor construction. Concrete and blacktop floor. Complete automatic sprinkler system.

Pier Apron: Width, slip side 24 ft. Dock level, 16.1 ft. above MLW.

Equipment: Tractors, trailers, fork trucks, etc., as listed under Pier No. 1, when required.

Water Supply: Portable meters and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Fire Protection: Automatic dry sprinkler system. Hose stand pipes.

Electric Current: Lighting 110 volts, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service available at all berths.

CONTAINER HANDLING: Container Yard (West of Pier No. 3) 11.5 acres paved, fenced and lighted.

CRANES: 30 ton crane on Pier No. 2 and 1 × P+H 6250TC mobile crane.

STEVEDORES: Stevedore Services of America and Jones-Oregon-Rogers.

FRESH WATER: Available, delivery to vessel through portable hose.

FUEL: Bunkering oil facilities for ocean vessels are maintained at Pier No. 2. The rate of delivery for heavy fuel oil is 1,500 b.p.h., and for diesel oil, 800 b.p.h.

GARBAGE DISPOSAL: Garbage disposal is available locally for American vessels; foreign vessels calling at Port of Astoria can contract this service through companies located in Portland, Oregon.

WASTE OIL DISPOSAL: Waste oil disposal not available on location. This service may be obtained through companies located in Portland, Oregon, who can truck/barge waste disposal away.

GENERAL: The Port of Astoria Terminals are located 10 miles up-stream from the mouth of the river and 86 miles downstream from the City of Portland, Oregon.

The channel in the Columbia River, from the ocean to Astoria, has a width of 600 ft. and project depth at low water of 53 ft.

At Astoria, the mean range of tide is 7.5 ft. with extreme tidal range of about 12 ft. On a flood tide a velocity of 2 knots is seldom exceeded, but the velocity sometimes attains 5 knots during the ebb tide. This variation is due largely to the strength of the river discharge, with maximum velocity during the freshets which occur during the months of May, June and July. These freshets, however, do not effect the height of water at Astoria. The Columbia River is navigable throughout the year.

A total of 9 berths at the Port of Astoria Terminals are periodically dredged to 35 ft. and 40 ft. at zero tide, but depths vary from time to time.

AUTHORITY: Port of Astoria, 1 Portway, Astoria, Oregon 97103. *Tel:* (503) 325-4521. *FAX:* (503) 325-4525. *Contact:* Jonathan Krebs, Executive Director.

BALTIMORE, Maryland: 39.17 N. 76.35 W. (See Plan)

PORT LIMITS: North Point is the outer limit of Baltimore Harbour for arrival purposes. The anchorage off Annapolis at Thomas Point, for vessels assigned thereto, is considered arrived for charter purposes.

DOCUMENTS:

3 copies Cargo Manifest (Form 1302).

Direct Arrival – 2 All Cargo on Board.
1 Cargo this Port.

Coastwise Arrival – 1 All Cargo on Board.
2 Cargo this Port.

3 copies Crew Manifest (Curio List) (Form 1304).
3 copies Stores Lists (Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port.

Master's Oath (Customs Form 1300) 3 copies.
General Declaration (Customs Form 1301) 3 copies.
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
U.S. vessels from foreign ports to submit Form 226 "Foreign Repairs" in order to calculate duty.
Certified Crew List (Visa Crew List – U.S. Immigration).

International Tonnage Certificate showing the official gross and nett tonnage of the vessel.

Note: Masters must retain all CF 368 "Customs Receipts" on file from previous U.S. ports of call.

PILOTAGE: Each vessel entering the Chesapeake Capes under foreign flag or carrying foreign cargo is required to employ a Pilot of the Association of Maryland Pilots. Pilots are furnished with a small transistorised portable radio unit, which provide ships' bridge to bridge communication system to ensure navigational safety while traversing the waters of Chesapeake Bay. It is a positive means of communication to ensure ship's position reporting, the safety and movement of vessels, as well as messages related to the operational needs of vessels proceeding to the port, and provide the Pilots' communication instructions expediting operations of vessels when they are aboard.

Under selective conditions, Pilots carry DGPS units for position determination.

Send ETA via Telex to pilots or vessel's agent, 48 hours before arrival and confirm 24 hours before arrival.

The ETA message should state whether arriving via Chesapeake and Delaware Ship Canal or Cape Henry, and deepest draft and speed of vessel.

Cable address of Pilot: "Marpilot Baltimore". Cape Henry Pilot Tower on VHF Channels 11, 13 and 16. Telex: 87-574. Telephone: (410) 342-6013. Fax: (301) 276-1364.

The large ocean station pilot vessel has been removed from station. Inbound and outbound traffic is monitored by the new Cape Henry Pilot Tower on shore just seaward of Cape Henry Light. The Pilot Tower maintains both a radar and radio watch for the area. Vessels should contact the Pilot Tower on VHF Channel 16 whence they will be directed to a working frequency. Vessels are requested to contact the tower 2 hours prior to arrival at the pilot boarding area.

Pilots are despatched from Lynnhaven Inlet by high-speed all-weather boarding launches and will rendezvous with vessels at CBJ Buoy, approximately 2 miles ENE of Cape Henry Light.

Pilots may request a relief pilot during transit who will board the vessel at the Pilot Transfer Station located 90 miles Northward near the Patuxent River. Under certain conditions of speed and draft, 2 pilots will be provided at the outset of the transit (Currently a second Pilot is provided if the passage is expected to be more than 15 hours). Relief pilots are provided at no extra charge.

ANCHORAGES: Numerous anchorages located within harbour limits for ocean-going vessels. 6 such areas are available for vessels of light and deep draft. 4 of these anchorages are located on the East side of the main ship channel between the entrance channel to the Canton Grain Elevator and Fort Carroll. 2 are on the West side of the main ship channel. Anchorage space is limited for large vessels and a 72 hour limit is in effect. At Thomas Point, approximately 22 miles South of Baltimore, there is an emergency anchorage in natural deep water with depth of 50 ft. or more. The U.S. Coast Guard is responsible for the anchorages, but in practice, the Pilots make the assignments.

RESTRICTIONS: There are two different approaches and exits to the sea lanes. The principal route is by way of the Southerly course through the Chesapeake Bay and Cape Henry to the ocean. The distance by this route is approximately 150 nautical miles. There is a main ship channel 20 miles long from Baltimore to the Chesapeake Bay; this channel is 700 ft. wide and 50 ft. deep (There are 60 miles of channels marked by buoys).

The other route to the sea lanes is via the Chesapeake and Delaware Ship Canal. This offers a short protected route between Baltimore and other leading North Atlantic ports by way of Delaware Bay and allows ships serving North Atlantic European ports to save about 125 miles sailing distance.

Entrance to the Chesapeake and Delaware Ship Canal is located about 50 miles North of Baltimore. Depth of channel 35 ft. The width of the channel is 450 ft. Max. LOA 960 ft. Vessels longer than 760 ft. must have bow thruster. Max. draft 33 ft. 06 in. The canal itself is 15 miles in length, and from the Delaware Bay side the distance to sea lanes is about 60 miles. Navigation lights are maintained so the canal is open to navigation day and night. Mean range of tide is 1.1 ft. at Baltimore. Currents are 0.8 knot on flood and ebb tides.

MAX. SIZE: Length 1,250 ft., draft 50 ft. at Consolidated Coal Sales and Bayside Coal Piers. No restriction on beam.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: See "Pilotage".

TUGS: The port has an efficient fleet of tugs in operation. The tugs usually take vessel in tow at Francis Scott Key Bridge. Tug's lines are used at no extra charge.

BRIDGES: The Chesapeake Bay Bridge-Tunnel is located across the entrance to the Bay, between Cape Henry and Cape Charles. This vehicular crossing consists of fixed causeways and bridges 15 miles in length, and 2 tunnels – one under the Chesapeake Channel and one under the Thimble Shoal Channel. A horizontal clearance of 1,400 ft. at 60 ft. water depth exists.

The Francis Scott Key Memorial Bridge crosses the main ship channel in Baltimore Harbour and is 8,640 ft. long, with main channel horizontal clearance of 800 ft. and vertical clearance of 185 ft. Vessels en route to the harbour from the ocean via the Chesapeake Bay pass under the Chesapeake Bay Bridge (2 parallel bridges), about 138 statute miles above the ocean entrance to the bay. This bridge is 3.7 miles long from shore to shore; its Western end is 0.5 miles S.W. of Sandy Point and its Eastern end is on Kent Island, 4 miles S.W. of Love Point. Least clearance width of 1,500 ft. and vertical clearance 186 ft.

By way of the Chesapeake and Delaware Canal the least horizontal clearance is 500 ft. and vertical clearance to + 136 ft. (Current air draft for vessels is 136 ft.).

The Curtis Creek and Middle Branch sections of harbour are each crossed by highway and railroad bridges (lift and swing).

BERTHING: Major piers and terminals:

DEVELOPMENTS: Brewerton Extension Channel to Baltimore is dredged to 35 ft. and widened to 450 ft., with portions to 600 ft.

SHIPMASTER'S REPORT: October 1991 (Updated 1994).

Charts: Delaware: B.A. Charts No. 2564 and 2603.

Chesapeake and Delaware Canal: B.A. Chart No. 2922.

Chesapeake: B.A. Charts No. 2919, 2920, 2921 and 2850.

Pilotage: If vessel is coming from the North it is best to take Delaware Pilot at Cape Henlopen and transit the Delaware River, and Chesapeake and Delaware Canal. This reduces the distance to the port by some 153 miles, as opposed to entering through Chesapeake Bay.

The Delaware Pilot embarks at Buoy No. 8 from a fast cutter which is stationed in the breakwater harbour.

Pilots have radar coverage which extends out to Five Fathoms Light Float. The Delaware Pilot takes the vessel to Chesapeake City in the Chesapeake and Delaware Canal. The Maryland Pilot takes over about 13 miles from the Delaware entrance.

The distance from Cape Henlopen to Locust Point berths at Baltimore is 106 miles.

From Baltimore to Cape Henry using Chesapeake Bay is 150 miles (or about 12 hours at 13 knots). For vessels with an expected transit time of more than 15 hours, 2 Pilots are required (Note: No extra pilotage fee). In this case, either 2 Pilots board or a single Pilot changes at Patuxent River which is 75 miles above Cape Henry. The pilot launch is stationed at Solomon's Island in the river mouth and the actual boarding position is Lat. 38° 20' N., Long. 76° 20' W.

Channel: The Delaware River allows transit for vessels drawing 40 ft. (FW) and transit for deep-draft vessels takes place on a rising tide.

Deep-draft vessels occasionally have to wait outside Cape Henlopen if there is a swell, to avoid "bottoming" off Cape Henlopen.

The Chesapeake and Delaware Canal is continuously being improved with bend straightening, and dredging in the Western part. The present maximum draft is 33 ft. 6 in. (1994) (FW), with Panamax vessels usually being the largest vessels to transit. At the present time traffic is reduced to 3 or 4 ocean-going vessels per day.

Transit from the Delaware River entrance (Dutch Neck) to Tolchester Channel takes about 5 hours at 10 knots (46 miles). The Canal is under the control of a Despatcher on the South bank opposite Chesapeake City. There are video cameras at intervals along the Canal and speed is strictly observed. The Canal is open throughout 24 hours each day of the year, except at times of fog and if the vessel is already in the Canal it proceeds at its own risk.

Chesapeake Bay has been dredged to 50 ft. from Baltimore to the sea at Cape Henry and the present maximum draft is 47 ft. but may be increased to 48 ft. in the near future.

Anchorages: Bigstone Beach Anchorage (B.A. Chart No. 2564) on the Delaware River can accommodate 12 large tankers with up to 55 ft. draft.

There are numerous anchorages in the upper reaches for smaller vessels.

Chesapeake and Delaware Canal has anchorages in the Western part.

Vessels have been known to anchor in the Canal itself if proceeding against the current.

Chesapeake Bay has numerous anchorage areas.

Berths: Baltimore is the largest latex port in the U.S.A. The berths are Locust Point No. 3 (Goodyear and Firestone), Locust Point No. 4 (Guthrie) and Locust Point No. 10 (Ennar Latex).

Locust Point No. 10: The berth is an old railroad dock which has been modernised and has a reported depth of 31 ft. at MLW, tidal range about 1 ft. Vessels can berth either side alongside. The berth is nearest to the city and is in the Northwest Harbour, about 1.5 miles from the Inner Harbour (See "Plan").

There are a lot of old pier piles near the berth so the berthing operation is to be conducted very carefully.

There is above ground latex tankage for about 300,000 U.S. gallons (10,500 tonnes). Shore pumps and lines used. Cargo is also discharged into rail cars.

Fresh water only available by barge. Brow gangway required. Storing is difficult as trucks are not allowed alongside. Asphalt also handled at this berth.

Locust Point No. 3: The berth is situated at the end of Pier No. 3 and is about 0.5 miles East of Berth No. 10.

Vessels berth starboard side alongside in order that they may leave the berth without tugs.

If weather conditions are favourable, Masters are requested to leave the berth without a pilot or tug in order to save expense (pilot not compulsory). The Bay pilot takes over once the vessel is in the Northwest Harbour. When we left the berth, the wind was very squally so we obtained a pilot and tug for departure.

The fenders on the quay were good. The berth is an old general cargo quay with 19 latex tanks above ground. Capacity of each tank is 30,000 U.S. gallons (1,000 tonnes).

Discharge is with shore pumps and lines, either direct into the tanks or to rail cars. The berth is very busy with product being continuously shipped out by road and rail tankers.

Depth alongside the berth reported to be 35 ft.

Brow gangway required. Stores truck can proceed alongside.

Fresh water is available from a shore hydrant through a meter at a reasonable rate. Ship's hoses and an international shore connection are required.

Fresh Water: There is a water barge with capacity 400 tonnes, early booking is recommended.

Fuel: Fuel is available by barge, or tank truck at Locust Point No. 3, but is reported to be expensive.

Health: Health inspectors may make lightning visits to the vessel and will impose fines for the slightest violations. One vessel was fined U.S.$300.00 when discarded fruit was found on the after deck.

Airport: Baltimore Washington International Airport is about 15 miles S.W. of Baltimore.

AUTHORITY: Maryland Port Administration, World Trade Center Baltimore, Baltimore, Maryland 21202-3041, U.S.A. *Tel:* (410) 385-4400. *Telex:* 710-234-1075. *FAX:* (410) 333-1126. *Cables:* Marport. *Contact* : Michael Angelos, Executive Director.

BANGOR (including Brewer and Orrington), Maine: 44.49 N. 68.47 W. **(See Pla**

LOCATION: Bangor is located on the West bank of the Penobscot R at the head of navigation. Brewer is on the East bank of the river oppo Bangor and Orrington is on the East bank of the river 2 miles be Brewer.

DOCUMENTS:

1 copy of Crew List.
1 copy of Passenger List.
2 copies of Stores Lists.
2 copies of Foreign Purchase Lists.
2 copies of Inward Foreign Manifest.
1 Form 1300 (Master's Oath on entry of vessel).
2 Forms 1374 Outward Foreign Manifest.

PILOTAGE: Pilotage is compulsory for all foreign vessels and vessels under register in the foreign trade, with a draft of 9 ft. or m entering or departing from any port or harbour within the water Penobscot Bay and Penobscot River North of a line drawn from Mars Point Livat Port Clyde, thence to Matinicus Rock Light, and thenc Western Head, Isle Au Haut. Pilotage is optional for vessels powe by sail.

Cable PENBAY via Chatham Radio. Ship's Agent usually notifies 48 hours and 24 hours before arrival at the Pilot Station. Pilot boat usu stands by on their radio 1 hour before ETA on RT 2182 kHz and Channel 16. Pilot boards at Monhegan Is., Lat. 43° 45 Long. 69° 22' 5" W. Pilot uses a white boat 36 ft. long and displays by day and the Pilot signals at night. Vessels awaiting Pilot in weather must heave-to outside.

ANCHORAGES: The usual anchorage for vessels waiting at the entrance for a towboat or favourable wind and tide is Northward of Point on the West side of the channel.

Vessels bound up the river anchor anywhere in the channel wh soft bottom is found. Vessels towing to Bangor, if the tide does not se often anchor off Winterport. On account of the strong ebb current, better for vessels going to Bangor, particularly large vessels, to an off Fort Point and start up the river about 3 hours after LW.

RESTRICTIONS: CHANNEL:– The controlling depth in the ma channel in Penobscot River from Bucksport to Bangor is 19 f Winterport, thence 13 ft. to Bangor. The channel is marked by buoy a point about 1.5 miles below South Brewer.

Caution: Deep-draft vessels should exercise caution above Fort P as depths of 31 ft. to 32 ft. are in mid-channel, about 0.5 miles East of Sandy Point, and rocky ledge, covered 34 ft., also in mid-chann reported about 0.2 miles S.W. of Odom Ledge Daybeacon.

The most difficult sections for vessels are off Lawrence and Coves just North of Bucksport where it is difficult to mark the best and off Frankfurt Flats where large vessels experience difficulty wi sharp turns.

The channel in Penobscot River is crooked and narrow in places frequent changes occur. Vessels should not attempt to carry greater than 10 ft. to Bangor at LW. With a deeper draft a Pilot or tow should be used; 14 ft. or 15 ft. is carried to Bangor and Brewer at and deeper drafts occasionally to the oil berth at South Brewer. safest time is on a rising tide. Navigation of the river at night is extre dangerous due to lack of lighted navigation aids. After unusually tides many logs, dangerous to small craft, are in the river. At tim maximum ebb currents, buoys are occasionally pulled under.

Tides: The mean range of tide varies from 10.3 ft. at Fort Point to 1 at Bangor. Currents of 3 knots are not unusual from Odom Led Orrington, and during Spring runoff currents approaching 5 knots be encountered. Because of these currents, larger vessels shoul caution navigating the river. Passage up the river is more adv during flood current.

Ice impedes but usually does not prevent navigation above Wint for nearly 5 months each year, beginning about December. D extreme Winters the river is closed to the mouth. The most difficul below Winterport is abreast Fort Knox, where ice jams occur. If ve can pass this point, they usually can go to Winterport. The river open by an icebreaker, which prevents much of the damage tha otherwise be caused by ice and freshets. However, in recent according to local information, there has been very little ice and th has seldom frozen over below Bangor. The brackish water form tidal action and the river current no doubt have contributed to th

Freshets occur in the river during March and April; at times th dangerous to vessels.

MAX. SIZE: At present ships of 560 ft. are taken up the river before HW during daylight. Size and draft of ship depend on the

HEALTH: See "Health: All Ports" before first U.S.A. port (Alban

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alba

RADIO: Vessels arriving Bangor use radio station at Chatham, or call on the R/T through station WOU at Boston, Mass.

TUGS: 4 tugs available up to 1,200 h.p. Tugs join at Belfast in turning and berthing.

BERTHING:

Texaco Oil Co. Terminal: A timber pile, timber-decke approximately 5,250 sq.ft., used for berthing oil tankers. Th 8 storage tanks and 1 warehouse/office building with 1,920 sq.ft space.

Mobil Oil Co.: A timber crib pier approximately 8,500 sq.ft., berthing tankers. There are 10 storage tanks and a garage at this

Webber Terminal Inc.: A timber crib pier, approximately 2,340 sq for berthing tankers. Adjacent to this pier, there is another tim pier, approximately 5,280 sq.ft., also used for berthing tanke are 2 storage tanks and a storage building with 480 sq.ft. of flo

Astroline Petroleum Corp. of Maine: There is a log filled bulkh for berthing tankers. This facility includes 5 storage tanks an shed.

Bangor Municipal Dock: A new wooden and steel float with gangway, 1,500 sq.ft. located just below the Joshua Chamberlain Bridge, so 4×4 ton guest moorings are available for recreational use.

Webber Tanks Inc. – Brewer: A rock and timber crib, timber decked pier, approximately 7,200 sq.ft., used for berthing tankers. There are 5 storage tanks and a warehouse with approximately 3,850 sq.ft. of floor area.

C. H. Sprague – Brewer-Orrington: A timber pile wharf, approximately 1,600 sq.ft., used for berthing tankers. The wharf is in Orrington and fuel is pumped to 3 storage tanks located in Brewer. There is one building, a pump house, approximately 600 sq.ft.

Hampden Recreational Boating Facility: 2 launch ramps with ground float; landing dock; 2 guest moorings, 8 ft. MLW to ramps, 80 ft. wide channel.

Town Launch Ramp – Orrington. This is a paved launch ramp; no docking facilities. There is a 40-space (30 car – 10 trailer) gravel parking area.

BRIDGES: 1 suspension bridge below Bucksport with a height of 135 ft. at HW. Horizontal clearance is 750 ft.

The overhead power cable that crosses the river just above Bucksport has a clearance of 145 ft.

MEDICAL: No advance notice required. There are 3 large hospitals.

TANKERS: 1 berth for ocean-going vessels. 1×8 in. hose with a 10 in. line. 22 ft. at low water. Also see "Berthing".

DENSITY: Nearly fresh water.

FRESH WATER: Supplied at ocean-going berth at the rate of 50 t.p.h.

FUEL: Only available at oil berth.

CONSULS: None.

REPAIRS: Only machinery repairs.

CERTIFICATES:

Load Line.
Foreign Clearance.
Safety Certificate.
Radio Operator's Licence.

CUSTOMS ALLOWANCES: 200 cigarettes per man, 1 bottle wine/spirits per man.

REPATRIATION: Arrangements must be made ahead of time by telegram.

TIME: GMT minus 5 hours in the Winter and minus 4 hours from first Sunday in April till last Sunday in October in the Summer.

AIRPORT: Bangor International is 2 miles from the city.

POLICE/AMBULANCE/FIRE: Police 9427377; Ambulance 9893311; Fire 9422293.

TELEPHONES: None put aboard. 1 pay phone on ocean-going berth.

SHORE LEAVE: Allowed subject to Immigration approval.

IDENTIFICATION CARDS: Form I – 95 must be filled out upon arriving unless seaman has made one out before on a previous trip.

AUTHORITY: State of Maine, Department of Transportation, State House Station No. 16, Child Street, Augusta, Maine 04333, U.S.A. *Tel:* (207) 287-2841. *FAX:* (207) 287-8300. *Contact:* Robert D. Elder, Director.

BATON ROUGE, Louisiana: 30.28 N. 91.12 W.

(See Plan)

DOCUMENTS:

Original and 3 copies Crew Lists.
Original and 3 copies of Passenger Lists.
Clearance from last foreign port.
Original and 3 copies of Inward Manifest.
Derat Certificate.
Load Line Certificate.
Safety Certificate.
Ship's Register.
3 copies Curio List.

PILOTAGE: Advise Agents ETA sea-buoy 48 hours in advance. Agent then makes arrangements for Pilots. Seven 46 ft. pilot boats – red hulls white cabins, flying white and blue pilot flags. Suggest pilot ladder 6 ft. above water level, no life-line. Call on 2738 kHz or VHF Channel 9, 30 miles to 40 miles out. Safe anchorage within 2 miles South Pass or S.W. Pass entrance.

ANCHORAGES: Anchorages within the river are limited; therefore, whenever possible, vessels should utilise the large anchorage area located East of the entrance of Southwest Pass.

RESTRICTIONS: No night-time restriction for entry or clearance, docking or undocking.

Caution should be exercised when anchoring in the vicinity of pipelines.

MAX. SIZE: Federal Project Depth of 45 ft., from the entrance to the jetties to Head of the Passes and up to Mile 180, is obtained through continuous maintenance dredging.

Exxon Terminal: LOA 810 ft. (246.8 m.); Beam, no restriction; Displacement, 90,000 ton; Draft, normally 45 ft. alongside.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: ETA cables can be routed through Tropical Radio WNU New Orleans.

If destined for Exxon Terminal, send ETA messages to "Stanship Baton Rouge"; 72 hours, 48 hours and 24 hours in advance of arrival at Southwest Pass. Telex: 510-993-3575, Answerback: HOBRM. Also, contact Exxon Docks (KZA 891) on VHF Channel 16, 3 hours prior to berthing. Berthing instructions will be provided on Channels 9 or 18.

TUGS: Available at Baton Rouge for docking and undocking. Ship's lines used.

At Exxon, 2 tugs are required for all vessels in excess of 12,000 d.w.t., for docking and undocking.

BERTHING: No time restrictions on berthing. One general cargo dock with total 462,000 sq. ft. transit shed and 3,000 ft. long, 40 ft. – 60 ft. wide apron with double marginal tracks; grain elevator and bulk terminal at Burnside, for handling ores, concentrates, etc.; container marshalling yard adjacent cargo docks; also 20-acre paved staging area for project cargo.

CRANES: 4×150 ton crawler; 2×70 ton crawler; 1×250 ton crawler.

BULK HANDLING FACILITIES:

Grain: Cargill Grain Elevator: Max. draft 40 ft. Loading rate 1,000 t.p.h. Silo storage 160,000 tons.

Dry Bulk: Burnside Terminal: 2 unloading gantries for bauxite. Rate 2,000 t.p.h. Max. draft 40 ft. See "Burnside".

Molasses: Molasses terminal, leased to Westway, has an 11 million gallon capacity.

Midstream Transfer: The Port's midstream anchorage buoy facility is located in the Mississippi River just opposite its docks for the transfer of cargo between barges and ships. Primarily for the transfer of export coal, the operation is capable of handling import or export steel, salt, coke, unitised cargoes in slings and other bargeborne commodities by the use of floating cranes.

BRIDGES: Sufficient clearance for all stages of river at all times; 3 bridges cross at New Orleans, 1 at Baton Rouge, 1 at Gramercy, and 1 at Luling-Destrehan.

STEVEDORES: May be obtained by Agent with 4 hours' notice.

MEDICAL: Agents should receive 24 hours' notice when medical attention is required. 2 excellent hospitals at Baton Rouge, U.S. Public Health Hospital at New Orleans.

TANKERS: *Exxon Refinery Terminal:* 4 tanker berths available with 2,260 ft. of berthing space. Normally handles 3 tanker simultaneously. See "Max. size".

Exxon also have a gas dock on the West bank of the river opposite the tanker terminal.

Oil slop facilities available, but 48 hours advance notice required to be given to terminal.

Baton Rouge Port Authority: 4 berths; 914 m.; Apex Oil – heavy fuel oil; and Westway – Molasses.

Placid Oil Company: Crude and products, 330 m. berthing space.

Formosa Plastics: Caustic soda, ethylene dichloride, 240 m. berthing space.

Report:

Approaches – Cautionary Advice: Vessels make arrival at the S.W. Pass Sea Buoy located in position Lat. 28° 52.7' N., Long. 89° 26' W. Approach to the Sea Buoy should be made from the South to S.E. Vessels should remain in the fairways because of numerous structures in the approach area. Pilots board just South of the Sea Buoy. Precautions should be taken to remain to the East of the Sea Buoy, Buoy No. 1, and Buoy No. 3, when approaching the bar. At times strong cross-currents are encountered in the area of S.W. Pass Channel Entrance and precautions should be taken to prevent the vessel from being set onto shoal grounds on the West side of the channel. There is a large anchorage area to the East of the S.W. Pass Entrance Channel.

Exxon Refinery Terminal:

Docking: 1 tug is used for docking and 1 is used for undocking. On a very high river with a swift current 2 tugs should be used to turn the vessel when sailing, due to the close proximity of the Baton Rouge Highway Bridge as well as the limited turning basin. 2 tugs should also be used when the ship must be berthed between 2 other vessels. Vessels berth starboard side to. Vessels should not drop anchor due to numerous submerged pipelines.

A normal mooring configuration should be used with additional head lines in view of the river current.

Cautionary Advice: Channel traffic which is passing close by could cause ships to move away from the berths which could result in damage to the hard arms. It is essential that more than usual attention be given to maintaining the ship in position alongside. It is recommended that several crew members be specifically assigned to tend the mooring lines and winches.

Under no circumstances should mooring lines be slack.

Exxon U.S.A. Refinery Terminal: 232 miles AHP: The refinery dock, consisting of 5 berths, is a concrete and steel structure 50 ft. wide and running in a North – South direction along the river bank for about 2,750 ft. The berths are numbered 1 through to 5 from South to North. All products are transferred through hoses or 10 in. hydraulically operated steel loading arms. The loading arms for crude oil at No. 1 Berth, however, are 12 in. connections. Cargo hoses are handled by electric hoisting equipment. Vessels are moored to 50 ton quick release hooks located on the dock. Electric capstans are used for hauling the mooring lines to the mooring hooks.

The loading arms and hose connections are manifolded to permit washing into a slop line for change of grade.

All hose diameters are 4 in., 6 in. and 8 in. The 10 in. loading arms have 8 in. reducers.

Each berth has an office equipped with a telephone which is tied into a public address system. In addition, each berthman is equipped with a portable radio for communicating with the dock as well as all control centres. The emergency shut down system for the dock can be operated from each office.

The main control centre for the entire dock is equipped with telephones, a process radio, an FM and AM marine radio and the control station for the public address system. All loading line pressures are displayed on a panel. The public address system provides communication with each transfer location or berth office. The dock emergency shutdown system may also be operated from the control centre.

Cargo Handled and Shore Installations: Berth No. 1 handles nearly all products except lubes and some chemicals. It is also the primary berth for receiving crude oil.

Berth No. 2 handles specialties, chemicals, carbon black, asphalt and wax. Caustic soda is not handled at this berth.

Berth No. 3 handles clean products, lubes, chemicals, carbon black and dirty products.

Berth No. 4 handles clean and dirty products, chemicals and carbon black.

All berths can handle crude.

Pipelines range from 4 in. to 24 in.

Berthing: The River Pilot berths the vessel starboard side to.

Approach to Berth No. 1 should never be attempted from directly below the dock, due to a shoal area. This shoal area is known to the Pilots and must be given a wide berth. The Pilot should be consulted as to the exact location of the shoal area.

Vessels should approach dock at dead slow ahead and as parallel to it as possible.

All vessels over 30,000 d.w.t. must use 2 tugs for docking and undocking. Light vessels under 30,000 d.w.t. must dock and undock with at least 1 tug. A bow thruster does not substitute for a tug. A normal mooring configuration should be used with additional head lines due to the river current. Minimum mooring requirements are 4 bow lines, 2 breast lines, 2 forward springs, 2 after springs and 2 stern lines. Mixed moorings in the same direction are discouraged.

When the Baton Rouge River gauge is 30 ft. and above, vessels greater than 30,000 d.w.t. must use a minimum of 6 bow lines plus 2 breast lines. In addition, all vessels over 60,000 d.w.t. must be attended by a tug actively pushing on the bow until the vessel has discharged 75% of its cargo.

When the Baton Rouge gauge is above 40 ft. a tug is required during entire time vessel is alongside Berth No. 1, regardless of ship size.

In the event of an emergency, tugs are readily available within 15 minutes. Tugs can be contacted via VHF Channel 13.

Mooring: Mooring is provided through the use of fairleads and quick release hooks at all of the ship berths. These hooks are rated at 38 tons and 50 tons throughout the berths.

The refinery provides a line handling crew for each ship berthing/unberthing. The line handling crew is assisted by electric driven capstans. This service is provided at no extra charge to the vessel.

Normal mooring line sequence: Forward springs, head and forward breast lines, after springs and stern lines. It is the ship's responsibility to provide all mooring equipment.

Terminal monitors mooring throughout operations and provides each vessel with a standard mooring plan.

Terminal has no requirements to limit wind area of vessel; however, in the event of unexpected high winds, vessel may be required to ballast down.

Manifold Criteria: The vessel's manifold must not be allowed to get more than 42 ft. above or below the dock deck. When connected to a vessel, the end of the arm should be positioned between 13 ft. and 19 ft. from the edge of the vessel if the 12 in. loading arms are used; between 4 ft. and 10 ft. for the 8 in. arms. The vessel's flanges to which the arms are to be connected must be spaced at least 3 ft. 6 in. apart and be vertical and parallel to the vessel's side. The vessel's flange should be no more than 3 ft. from the last permanent support and it should be attached to that support.

Before a vessel arrives at the dock, vessel personnel are advised of the size of flanges needed for connection to the loading arms or hoses.

Dock Communications: The Baton Rouge dock is equipped with a positive ship-to-terminal radio communications system. On arrival, vessel will be provided with a radio for which a signed receipt is required. The radio must be monitored by the English-speaking person in charge at all times. The ship's personnel will be instructed in the proper use of these radios at the time of receipt. If these radios are not returned in good condition, a charge of $2,000 will be levied against the vessel.

Each berthman is equipped with a portable radio on the same frequency as the radio provided to the ship. This will be the primary means of communication.

The main control centre for the entire dock is equipped with telephones, a radio on the same frequency as the berthman and an AM/FM marine radio with Channels 9, 16, 18 and 22.

Bunkers and Fresh Water: Bunker C, diesel and fresh water are available.

Ballast Facilities: Ballast facilities are limited to 20,000 barrels.

DENSITY: No tide – fresh water at all times.

FRESH WATER: At public docks. At Exxon, water available for flat fee, presently $300. Ship's crew to make water connections.

FUEL: All grades subject inquiry. Barging essential.

No fuel available at Exxon.

FIRE PRECAUTIONS: Usual fire lines and sprinkler systems. Fireboat "Exxon Bayou State" on station.

Ship's fire plan should be available at gangway.

CONSULS: Norwegian only, all other consuls at New Orleans – 85 miles distant.

REPAIRS: All types of deck and engine repairs may be carried out.

At Exxon, no repairs allowed without permission from terminal. Vessels shall be able to get underway as soon as possible.

SURVEYORS: *Testing, Sampling, Weighing and Cargo Certification:*

Caleb Brett USA Inc., P.O.Box 46039, Baton Rouge 70895. Tel: 927-0020.

Chas. Martin, Inspectors of Petroleum, 2835 Plank Rd., Baton Rouge. Tel: 355-8833.

Pittsburgh Testing Lab., 2166 Monroe Ave., Baton Rouge. Tel: 355-2641.

Saybolt, E. W. Co., 10023 Mammoth Avenue, Baton Rouge. Tel: 925-1231.

Transport Management & Consulting, Inc., 4137 Sherwood Forest Blvd., Suite 110, Baton Rouge 70816. Tel: 293-3025.

USDA, FGIS, Port Allen. Tel: 389-0373.

USDA, FGIS Field Office, Lutcher. Tel: 536-2811.

Marine Surveyors:

McAnally Engineering Co., Box 66012, Baton Rouge 70809. Tel: 766-8992.

National Cargo Bureau, 7414 Perkins Rd., Suite 180, Baton Rouge. Tel: 769-6353.

GANGWAY/DECK WATCHMEN: Only if Master requires.

OPENING/CLOSING HATCHES: Depending on terms of char
usually by ship's crew.

CUSTOMS ALLOWANCES: Tobacco, each crew member allo
1 carton cigarettes. Master allowed reasonable quantity. Wine and
Spirit, each crew member allowed 1 bottle each of wine and spi
Master allowed reasonable quantity.

CARGO GEAR: Safety Certificate required for ship's gear.

REPATRIATION: Crew repatriation and crew changes may be mad

AIRPORT: 6 miles to Ryan Airport, served by regular airlines.

TIME: Local time is Central Standard Time – GMT minus 6 hours; fr
April through October local time is CS daylight saving time, GMT mi
5 hours.

POLICE/AMBULANCE/FIRE: Tel. Nos. Public Dock: Police 343 – 92
Ambulance 343 – 6691; Fire 343 – 6691.

TELEPHONES: No arrangements for placing telephones aboard.

SERVICES: Because of restricted river width inadvisable ad
compasses. This is usually accomplished below New Orleans wh
river of sufficient width to permit large vessels to swing. 3 firms engag
in tank cleaning, namely, Watson Marine, Robin Hood Fleeting and F
Allen Marine Cleaning Plant. Slop facilities available at the Exxon O
Refining Co. dock.

SHIP SUPPLY SERVICE: *Launch Service:*

Capital Marine Supply, Inc., Box 3018, Baton Rouge. Tel: 343-83

Tri-G Marine Supply, Inc., Box 3808, Baton Rouge. Tel: 344-766

SHORE LEAVE: Shore leave permitted except when detained abo
by U.S. Immigration.

IDENTIFICATION CARDS: Usual Passports.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. p
(Albany). Collection service available through Browning-Ferris Indust
(Tel: (504) 356-2478). Garbage disposal boxes and liners are availa
at $2.00 each. Disposal of each box is $49. 24 hours notice is requ
before providing this service, collection as required. The boxes ca
placed on board. The vessel's agent will make all the necess
arrangements with Browning-Ferris Industries.

WASTE OIL DISPOSAL: Waste oil will be received by Port Allen Ma
Services Inc., for disposal. 24 hours notification period is required.
barge will come alongside the vessel to receive the waste oil and
the capability to pump from the vessel. The cost of this service depe
on the mixture to be disposed of. The agent will make the necess
arrangements for this service.

SEAMAN'S CLUBS: A Seaman's Center is located on port property
a minibus is provided for transportation to and from the Center.
facility has indoor recreation such as table tennis and pool tab
Transportation is provided to the various locations within the area
shopping. International telephone service is available. The Seam
Center is a function of the Ministries to Internationals. Judson Ba
Association located in Baton Rouge. Tel: (504) 927-6500. Rev.
Hilburn is the Center's coordinator who will arrange for seam
activities at the Center.

CURRENCY: U.S.Dollar (U.S.$).

DELAYS: Normally no delays at Exxon Oil docks in berthing ex
when vessel's tanks unsuitable for loading. Normally no delay a
wharf.

Vessels loading Isopropanol Alchohol must have tanks appr
before berthing.

NOTICE: To all Masters from a Ship's Agent:

Please be advised that the Agent will need a copy of the Notic
Readiness and Dry Tank Certificate. The Agent will pick these
certificates up from the Master on sailing of vessel. These are nee
by the Agents to send out to the Owners and/or Charterers along
the other documents. We have been having problems receiving t
documents from the terminal and/or Cargo Surveyor. The termina
require, on the vessel's arrival at the berth, one copy of the Bill of La
and/or Customs Manifest. It would be appreciated if you could mak
additional copy of these documents when they are prepared by
vessel.

GENERAL: Tankers in ballast advised of drift wood conditions in
and ballast their vessels accordingly so as to avoid propeller dam

BAYTOWN, Texas: 29.44 N. 95.01 W. **(See**

DOCUMENTS, PILOTAGE, etc.: Refer to "Houston".

HEALTH: See "Health: All Ports" before first U.S.A. port (Alban

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alba

RADIO/VHF: Exxon Dock "KNQ-Baytown" on VHF Channel 19

TUGS: Required. Tel: 713-928-5406.

BERTHING: All berths at Baytown 40 ft. (Fresh water). Agent
verify safe arrival/departure draft with Exxon Docks prior vessel

STEVEDORES: Available. Call L. S. Mitchell Co. Tel: 713-4264

MEDICAL: All medical assistance available.

TANKERS: *Caution:* Channel traffic which is passing close b
cause ships to move away from the berths which could result in
to the hard arms. It is essential that more than usual attention b
to maintaining the ship in position alongside. It is recommend
several crew members be specifically assigned to tend the moo
and winches.

Under no circumstances should mooring lines be slack.

The terminal prefers the use of self-stowing winches with
wires.

Berthing: Tugs of up to 4,000 h.p. and bollard pull of up to 60 tons are available. Tugs use the "alongside" method. Tugs normally use a head line and quarter line; however, larger tugs will usually use 2 head lines.

By pre-planning discussions with the Pilot, Masters are to assure themselves that a sufficient number of tugs, each with sufficient horsepower, are ordered well in advance by the Pilot.

Depending on the size and draft of the vessel, 2 – 4 tugs will meet the vessel in the vicinity of the tunnel about 1 mile below Baytown and escort the vessel into the turning area. Vessels scheduled to Berth No. 1 will moor starboard side to, bow up stream. Vessels at Berth No. 2 will be turned about and moor port side to. Vessels scheduled to Berths No. 3, 4, 5 or 6 will be turned and backed into the berth, bow out. There are virtually no exceptions to these mooring rules. Winch mounted wires are preferred, however, mooring ropes are acceptable. Additional lines will be required for vessels not equipped with all wire moorings. Vessels are passed close to by ships transitting the Ship Channel, therefore, all moorings must be well-tended and tight.

Tidal height is monitored by the Baytown Dock Co-ordinator. This information may be obtained prior to berthing by calling KNQ Exxon on VHF Channel 19.

This information is particularly important when turning ship and backing into Berth No. 5.

Exxon Berth No. 1: Vessels assigned to this berth must dock starboard side to, bow upstream.

Products handled at this berth include gasolines, distillates, lube oils, and various petro-chemicals. All products are handled through 4 in., 6 in. or 8 in. hoses. All hose connections are bolted-type connections. Maximum pressure that all products are pumped at is 100 p.s.i. Ballast and slops are handled at this terminal. Maximum pumping pressure for ballast and slops is 100 p.s.i.

Exxon Berth No. 2: Bow to manifold should not exceed 320 ft. and stern to manifold is limited to 400 ft. due to berth overhang and interface with Berth No. 3.

Vessels assigned to this berth must dock port side to, bow downstream.

Products handled at this berth include gasolines, distillates, lube oils, and various petro-chemicals. All products are handled through 6 in. or 8 in. hoses. All hose connections are bolted-type connections. Maximum pressure that all products are pumped at is 100 p.s.i. Ballast and slops are handled at this terminal. Maximum pumping pressure for ballast and slops is 100 p.s.i.

Exxon Berths No. 3 and 4: Berth No. 3 has a beam restriction of 106 ft. and Berths No. 3 and 4 have a restriction of maximum displacement of 50,000 tons.

Vessels assigned to these berths are backed alongside the berth and then pushed by tugs against the dock. Extreme care should be taken not to approach the berth at too great an angle, and every effort should be made to manoeuvre into position prior to making contact with the breasting works. 2 or more tugs are required depending on vessel size and weather conditions.

Vessels always manoeuvre stern first into the slip utilising the turning area adjacent to the docks. Vessels are moored starboard side to Berth No. 3 and port side to Berth No. 4.

Winch mounted wires are preferred, but ropes are acceptable. Usually the spring lines are taken first followed by the stern then bow moorings.

Berthing of vessels at Berth No. 4 is predicated by the presence of a ship or tows at adjacent Berth No. 5. Terminal regulations are based upon the sum of the beam of vessels in adjacent berths to allow sufficient room for manoeuvring.

Products handled at Berth Nos. 3 and 4 include motor fuels, aviation fuel, distillates, solvents, petro-chemicals and bunkers. All products are transferred through 6 in., 8 in. and 10 in. hoses, and 12 in. arms. Maximum pumping pressure for all products is 100 p.s.i. Ballast and slops are handled at both berths.

Exxon Berths No. 5 and 6: Vessels always manoeuvre stern first into the berth, utilising the turning area adjacement to the berth. 3 or 4 tugs are usually used to assist the vessel, depending on vessel size and weather conditions. Vessels are moored starboard side to Berth No. 5 and port side to Berth No. 6. Products handled include crude oil, process gas oil and fuel oil. Products are transfered through 8 in. and 12 in. hoses. Max. pumping pressure for all products is 125 p.s.i.

Docking: There is a large round mooring dolphin at the head of the finger-pier forming Berth Nos. 5 and 6 where loaded 80,000 – 90,000 d.w.t. vessels normally berth.

Although this dolphin has a fender system its sole purpose is to provide mooring points. It is not suitable to land on nor can it be used as a turning dolphin. On several occasions ships have come into contact with this structure resulting in both hull damage and damage to structure itself.

To prevent recurrence of such incidents it is necessary that the Master:

1. Before the berth approach is made reviews with the Pilot the intended docking manoeuvres which provide the widest possible berth to the mooring dolphin.
2. Monitors the docking manoeuvre carefully and plans corrective action in a timely fashion so that ship's contact with the dolphin will be prevented.

Tug Assistance: 3 tugs of minimum 3,000 h.p. each are to be used for loaded 80,000 + d.w.t. vessels. The tugs making fast on the outward side – not facing the berth – should use 2 headlines and a quarterline.

The Master should include these tug requirements in his first ETA message to the port Agent and ask for confirmation that such arrangements have been made.

Tidal Information: Having knowledge of tidal conditions in the Baytown area is of particular importance with regard to the docking manoeuvre.

Information on the velocity and direction of the current should be obtained from the Pilot.

Water level information should be obtained from the Baytown Dock Co-ordinator by VHF radio.

DENSITY: Mainly fresh.
FRESH WATER: Available ex-wharf.
FUEL: No bunkering by barge.
REPAIRS: Should be cleared with terminal before vessel arrives at dock.
GANGWAY/DECK WATCHMEN: Required only if crew detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco; 1 quart wine/spirits.
STORING: Only permitted in an emergency.
SHORE LEAVE: No restrictions. Terminal bus transports crew from dock to refinery entrance.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available. Contact BFI - Tel: 635-6225.
WASTE OIL DISPOSAL: Ballast system can only handle clean ballast.
SEAMAN'S CLUBS: None.
AUTHORITY: Port of Houston Authority.
Operator: Exxon Company, U.S.A., P.O.Box 3950, Baytown, Texas 77520, U.S.A. *Tel:* (713) 425-4452, 425-4453. *FAX:* (713) 425-3539. *Contact:* Dock Co-ordinator.
Secondary Contact: Sea River Shipping Company, P.O.Box 3251, Baytown, Texas 77520, U.S.A. *Tel:* 713-427-7370. *Contact:* Department Head.

BEAUMONT, Texas: 30.05 N. 94.05 W. (See Plan)

LOCATION: On Neches River, above Sabine Lake.
DOCUMENTS, PILOTAGE, RADIO, etc., Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING:

Wharf	*Length* (ft.)	*Depth* (ft.)	*Remarks*
1	580	30	
2, 3 and 4	1,373	38	Ro-Ro Ramp
5, 6 and 7	1,483	36	
Harbour Island Marine Terminal	1,200	40	Ro-Ro Ramp
Carroll St. Wharf	1,165	40	
Grain Wharf	543	40	3.5 million bushel grain elevator Loading Rate: 1,875 t.p.h. (grain); 1,100 t.p.h. (soya).

CARGO HANDLING FACILITIES: For container ships, conventional break-bulk ships, heavy lift ships or side-loading Ro-Ro ships, the Harbour Island Marine Terminal – 1,200 linear ft. berthing space; 150,000 sq.ft. transit shed; 93 ft. wide apron facing transit shed; 18 acres heavy duty hard stand adjacent to wharf; twin marginal rail tracks for full length of wharf; 220 ton capacity truck-mounted mobile crane for containers and heavy lifts; 40 ton forklift machine with, expandable spreaders for container handling and 3-high container stacking or, blades for heavy cargo; 780 ft. undercover working track for all-weather rail car unloading inside transit shed; 40 linear ft. of truck height unloading platform along rear of open wharf; 20 ft. high × 18 ft. wide shed doors for high wide loads and entry for all-weather truck unloading or container stuffing; 40 ft. of water alongside; 1,200 lb. per sq. ft. deck load capacity.

Carroll Street Wharf extension, recently constructed, provides an additional 700 linear ft. of open dock and berthing area. This facility also provides an additional 600 linear ft. of barge docking area and 40 linear ft. of truck height unloading platform on open dock.

For stern loading Ro-Ro vessels, wharves 2 and 3 – 758 ft. in length with 75 ft. wide Ro-Ro platform at one end of the wharf. Ro-Ro platform deck elevation +15.89 ft. above mean low Gulf. (12 ft. 7 in. above average tide) 36 ft. of water alongside wharf; convenient roadway access to Ro-Ro platform from 15 acre storage area adjacent to the wharf; double marginal rail tracks for full length of wharf; 60 ton capacity gantry crane travels 700 ft. along face of wharf; 120,000 sq. ft. open wharf space; wharves 2 and 3 may also be used as an alternate to Harbour Island Wharf for containers, conventional break bulk, heavy lift or side loading Ro-Ro vessels. Covered wharf 4 is adjacent, extending total wharf length to 1,300 ft. and offering 57,000 sq. ft. covered area.

For security of cargo, all Port of Beaumont wharves are entirely within a chain link, barbed wire topped security fence, and all vehicular access is through the port's main gate, guarded 24 hours a day. The port is an approved outport of the Military Traffic Management Command, Eastern Areas, U.S. Army, is heavily used for shipments of military material, equipment and supplies, and is subjected to regular security inspections by Army personnel who have given the port high ratings.

For security of small, high value items that are considered especially subject to possible pilferage, the port will permit fencing and shelving of a limited designated security area within a transit shed.

For heavy lift requirements beyond the capacity of the 60 ton gantry (at Wharf No. 2 & 3) or the 220 ton mobile crane (at Harbour Island Marine Terminal), a 500 ton capacity derrick barge is available.

STEVEDORES: *Public Wharves:* Normal working hours 0800/1200 and 1300/1700 Monday to Friday.
MEDICAL: All facilities available.
TANKERS: *Amoco:* Terminal is located on the Neches River Channel 44 miles from the sea buoy. The controlling depth for the channel and turning basin is 40 ft. while the controlling depth for the North and South berth is 35 ft. The water is fresh (density 1000). The maximum size vessel normally received at the terminal is approximately 28,000 d.w.t. The limited strength of the docks combined with passing traffic should be noted. Vessels dock and undock day and night. A minimum of 2 tugs are used to dock and undock vessels. Pilings are not to be used as

turning points. Vessels in ballast are turned prior to berthing starboard side to. Loaded vessels are berthed port side to and turned after discharge. Judicious use of tugs during turning manoeuvres is essential as vessels have a tendency to "overshoot" the pier when turning. Several mooring dolphins have been knocked out of position. Short wire springs are accepted. All other lines must be rope due to the weak pile clusters. Docks do not have winches nor do they supply a gangway.

Fuel and water are not available.

The terminal is fenced and guarded.

Pollution Control: Consists of 2,000 ft. of spill booms and a launch. Amoco is a member of Neches River Oil Control Committee.

Fire Protection includes a foam system with a tank on the dock. Water monitors and hoses are kept in readiness.

Mobil: Terminal is located on the Neches River Channel 56 miles from the sea buoy. The controlling depth for the channel and turning basin is 40 ft. The water at the terminal is brackish. The maximum size vessel normally received at the terminal is 50,000 d.w.t. Depth alongside 36 ft. The berths are subject to passing traffic and Master's are advised to keep mooring lines tight. No repair work may be done while transferring cargo at this port.

While berthing, a minimum of 2 tugs are used. 1 tug is needed when unberthing. 3 hours advance notice is required when ordering tugs.

Vessels normally proceed to the berth directly from the channel, prior communications establish whether ship will berth head-up or head-down the channel depending upon the LOA and hose connections. Ships can berth starboard side to; however, port is preferred. A normal complement of mooring lines is used. Wire lines are accepted with nylon pendants recommended. A mooring contractor is employed. The vertical range of hoses is 40 ft., 50 ft., if vessel uses its own derrick.

Fuel and fresh water are available at the Mobil Terminal.

The terminal is fenced and guarded.

Pollution Control consists of 1,500 ft. of spill boom and a launch. Terminal has vacuum trucks.

Fire protection is provided by a terminal fire brigade. Monitors are situated on the shore, foam and water along with dry chemical are located on the dock. Fire hose is on reels, water is under pressure and spray nozzles are located under the wharf.

Also see "Smith's Bluff".

DENSITY: Fresh water.

FRESH WATER: Available at berths, or by barge.

FUEL: Available ex-wharf at Mobil Terminal. All grades available by barge to other locations.

CONSULS: Nearest at Houston.

REPAIRS/DRY DOCKS: Beaumont's Trinity Shipyard offers all types ship repair or reconditioning – plus vessel conversion and jumboizing. 2 side-launching ways over 800 ft. each. Floating dry dock with extreme length of 648 ft.; length on bottom 576 ft.; breadth at entrance, 87 ft.; and lifting capacity 17,500 tons. Active in design and construction of mobile drilling platforms and oil and gas production and storage facilities for service offshore.

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine/spirits for each man.

HOLIDAYS: Longshore holidays are: New Year's Day: Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday; Texas Independence Day (March 3rd); St. Patrick's Day (March 17th); Good Friday; Memorial Day (last Monday in May); Emancipation Day (June 20th); Fourth of July; Labour Day; Columbus Day; Veteran's Day (November 11th); Thanksgiving Day; Christmas Day.

IDENTIFICATION CARDS: Foreign crew require only Immigration landing permit.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service provided by Browning-Ferries Ind. Waste Systems, 100 Ginger St. & Hwy. 69, P.O.Box 1056, Nederland. Telex: 77627. Services provided: Shoreside and ship generated garbage collection alongside as required. Collection service provided. Reference: MARPOL Annex V. No monies involved.

WASTE OIL DISPOSAL: Service available from Carotex Inc., 110 Yacht Club Rd., P.O.Box 3901, Port Arthur, Texas 77642. Services provided: Provide for the receipt of oily waste from ships at the Port of Beaumont in accordance with MARPOL 73/78 (33CFR 154-156) Annex V.

SEAMAN'S CLUBS: Beaumont International Seamen's Center, Port of Beaumont, Harbor Island Terminal, Beaumont, Texas. Tel: (409) 833-8931. Services available: International telephone services, minibus transportation, postage service, games available, library books, give-away bibles all languages, snacks available free of charge.

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: Port of Beaumont, P.O.Drawer 2297, 1255 Main Street, Beaumont, Texas 77704, U.S.A. *Tel:* 409-835-5367. *FAX:* 409-835-0512. *Contact:* Billy G. Masters, Port Director.

BELLINGHAM, (Including Cherry Point), Washington: 48.45 N. 122.31 W. (See Plan)

DOCUMENTS: Refer to "Tacoma".

PILOTAGE: Compulsory.

ANCHORAGE: Deep water available, but poor holding ground.

RESTRICTIONS: Channel depth 32 ft.

HEALTH: See "Health: All Ports" before first U.S.A. Port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, join vessel in Bellingham Bay.

BERTHING: Whatcom International Shipping Terminal, Berths No 2, length 1,360 ft., depth alongside 31 ft. MLLW. Berth No. 3, le 400 ft., depth alongside 25 ft. MLLW. Georgia Pacific Dock, Be length 600 ft., depth alongside 28 ft. MLLW. Ro-Ro facilities ava within the port.

TANKERS: Crude oil discharge through 2×12 in. Chicksan arm 36 in. shoreline, 2.5 miles long. Shore tanks are situated 164 ft sea level, initial back pressure 65/70 p.s.i.

FRESH WATER: Available from shore lines.

FUEL: Can only be delivered by barge. Averate rate 300 t.p.h.

DEVELOPMENTS: Current plans call for development of a co container terminal.

AUTHORITY: Benicia Port Terminal Company, P.O.Box 315, California 94510, U.S.A. *Tel:* (707) 745-2394. *FAX:* (707) 74 *Contact:* J.A. Gaidsick, Vice-President.

BOCA GRANDE, Florida: 26.43 N. 82.15 W. (See

LOCATION: On the Eastern side of the Southern end of G Island, about 60 miles South of Tampa Bay.

DOCUMENTS: See "Tampa".

Government Officials must travel from Tampa to Boca G vessel's expense.

APPROACHES: The oil tanks are clearly indicated on the approximately 25 miles distance.

PILOTAGE: Compulsory for all foreign-going merchant vess Pilot boards vessel near the sea buoy. Pilotage available 24 day.

Request should be made to ship's Agents via Tampa Marine VHF Channels 16, 12 and 13.

ANCHORAGES: Good holding ground near the sea buoy (Lat. 26° 39.8' N., Long. 82° 19.6' W.)

RESTRICTIONS: The channel is less than 300 ft. wide in some places. Project depth 32 ft. at MLW. The traffic is one way and vessels enter only when the stream is half strength or less. Strong Westerly winds may cause a swell which prevents vessels using the channel.

MAX. SIZE: Beam: 80 ft. with 24 ft. max. distance from outside ship's hull to inside hatch coaming.

Draft: 28 ft. recommended by Pilots. The channel is 30 ft. deep at MLW.

Length: 700 ft. should be a maximum.

HEALTH: Same procedure as for any other U.S. port.

A U.S. Public Health physician is located on the island.

RADIO: Tampa Radio – WPD.

VHF: Pilots on VHF Channels 16, 12 and 13. U.S. Coast Guard on Channel 16.

TUGS: A small tug for light towing operations is available.

BERTHING: An oil handling berth with 28 ft. depth is located close Southward of the phosphate pier.

TIDES: Approximately 2 ft. variation.

TANKERS: *Oil Terminal:* Depth 28 ft.

Vessels enter and berth only when currrent is at half strength or less. The strength of the current has been reported to reach 4 knots. The current generally flows in 030°–210° direction, although the flood tide varies in direction. The pier face lies in a 060°–240° direction. A vessel uses an anchor to swing around and then to hold its head up into the current while mooring lines are run out to mooring buoys and the breasting cells. 2 mooring buoys forward for headlines and 2 mooring buoys aft for stern lines are used. A total of 14 mooring lines are required to safely tie up. Wires are permitted as spring lines only. Lines must be carefully tended and maintained in a tight condition with vessel snug alongside at all times.

Also see "Berthing".

DENSITY: Salt water.

FRESH WATER: Available.

FUEL: No local facilities. Prior arrangements with ample notice must be made via the ship's Agent at Tampa.

CONSULS: See "Tampa".

REPAIRS: No local facilities. To be arranged via Agents with ample notice.

SURVEYORS: The nearest Lloyds' office is at Jacksonville. American Bureau available from Tampa.

STORES AND PROVISIONS: No facilities available for normal ship chandlering. Prior arrangements should be made via Tampa.

GENERAL: All agents are based at Tampa, about 100 miles by road.

AUTHORITY: Robert W. Johnson, Harbour Master. P.O.Box 274, Boca Grande, Fl. 33921. *Tel:* (813) 964-2348. *FAX:* (813) 964-2245.

BOSTON, Massachusetts: 42.21 N. 71.05 W. (See Plan)

DOCUMENTS:

- 3 copies Cargo Manifest (Form 1302), 2 copies showing all cargo on board, and 1 copy showing only cargo for this port.
- 3 copies Crew Manifest (Form 1304).
- 3 copies Stores List (Form 1303).
- 3 copies Passenger List (Form I-418).
- 3 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register, Safety Equipment Certificate and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

- General Declaration (Form 1301).
- Health Pratique.
- Master's Oath (Customs Form 1300).
- All foreign clearances.
- Certificate of Financial Responsibility (Oil Pollution).
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: Pilotage is compulsory for all foreign vessels, with few exceptions, and for United States vessels under register in foreign trade. It is optional for coastwise vessels which have on board a Pilot licensed by the Federal United States government for these waters.

Pilot boats meet vessels within sight of Boston Lighted Horn Buoy B. During Winter, with a Northwesterly wind, pilot boats may meet vessels to the Northwestward of Boston Approach Light Buoy BG. Pilot boats often land or pick up Pilots at the town wharf at Nahant Harbour.

Both the 70 ft. (21.3 m.) "Boston Pilot" and the 52 ft. (15.8 m.) "Thomas Knox" have black hulls with the word "Pilot" in black letters on either side of the white superstructure. Both are equipped with radar and maintain a 24 hour radio watch on VHF Channel 16 and a 0700 to 1800 hrs. watch on VHF Channel 11.

Vessels are asked to give a 4 hour advance notice of their time of arrival. Pilots for Weymouth, Quincy, Lynn and Saugus are obtained from the Boston pilot boat. Pilots can be notified by radio, telegraph or by radiotelephone through the Boston Marine Operator.

Boston Pilots: Pier 1, Bremen Street, East Boston, MA. 02128. Tel: (617) 569-4500. Cable: BOSPILOT.

ANCHORAGES:

ANCHORAGE No. 1. *Upper Harbour Anchorage:* Steam and motor vessels permitted to anchor in this basin anchor within the following area: S.E. of a line bearing 205° True from N.E. corner of Boston and Albany Pier No. 5, East Boston; N.E. of a line bearing 122° True from S.E. corner of Lewis Wharf, North Pier; S.W. of a line bearing 292° True from N.E. corner of Southernmost Airport Approach Pier; N.W. of a line bearing 025° True from Buoy No. 12, Fl.R.6 sec.

ANCHORAGE No. 2. *President Roads Anchorage* (40 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 237°, 522 yards from Deer Island Light; thence to a point bearing 254°, 2,280 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; thence to a point bearing 279°, 2,438 yards from Deer Island Light; thence to a point bearing 319°, 933 yards from Deer Island Light; thence to a point bearing 319°, 666 yards from Deer Island Light; and thence to point of beginning. *President Roads Anchorage* (35 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 256°, 2,603 yards from Deer Island Light; thence to a point bearing 258°, 3,315 yards from Deer Island Light; thence to a point bearing 264°, 3,967 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; and thence to point of beginning.

ANCHORAGE No. 3. *Nantasket Roads Anchorage:* Vessels anchoring in this anchorage basin anchor within following area: Westerly of a line bearing 143° from wharf at Gallups Island to Bell Buoy No. 2, S.W. of Georges Island; Northerly of a line bearing 260° from Bell Buoy No. 2, Georges Island, to the Northerly end of Rainsford Island; Northerly of a line bearing 273° from the Northerly end of Rainsford Island to Bass Point, Long Island; Southerly of a line bearing 270° from the wharf at Gallups Island to Long Island.

ANCHORAGE No. 5. *Peddocks Island and Explosive Anchorage:* Vessels anchoring in this anchorage basin anchor within following area; S.W. of a line bearing 122° True from the Easterly end of Rainsford Island to the N.E. end of Rainsford Island to the N.E. end of Peddocks Island, N.E. of a line bearing 165° True from the Westerly end of Rainsford Island to the S.E. end of Peddocks Island.

RESTRICTIONS: There are 3 main entrance channels from sea to President Roads.

Broad Sound North Channel from Broad Sound to President Roads from N.E. Dredged 35 ft. deep and 1,500 ft. wide and is deepened to 40 ft. in a width of 900 ft. to 1,100 ft. It is well marked by lighted buoys.

Broad Sound South Channel from Broad Sound S.W. and Westerly to President Roads. Dredged 30 ft. deep and 1,200 ft. wide. This channel is well marked by buoys and ranges but most aids to navigation are not lighted.

The Narrows is channel leading into Boston Harbour from S.E. between Boston Lighthouse and Lovells Island on the N.E. and Point Allerton, Georges Island and Gallups Island on S.W. Depth is 27 ft. Width is generally 1,000 ft. except in a section between Narrows Light and Georges Island where shoaling on N.E side limits it to 700 ft. Channel is well marked.

The Main Ship Channel of Boston Harbour extends from President Roads to the mouths of the Chelsea and Mystic Rivers and to Charlestown Bridge on the Charles River. Channel has been dredged 35 ft. deep and 1,200 ft. wide to the inner end where widths decrease near the river mouths. It has been deepened to 40 ft. for 600 ft. width from President Roads to the mouth of the Mystic River, with a widening to 1,200 ft. at the bend just Northerly of Commonwealth Pier No. 5, South Boston.

Charles River is approach by water to Cambridge and Watertown. About 0.5 mile above the lower bridge there is a dam with a lock 45 ft. by 350 ft. with depth of 17 ft. over the lower sill. Depths above dam decrease gradually to 9 ft., basin level, at head of navigation.

Mystic River is approach by water to Everett, Malden and Medford. Controlling depths are 35 ft., from Mystic River bridge to approximately 1 mile above, thence 20 ft. from the 35 ft. channel to 800 ft. above the Malden Bridge to a point abreast Monsanto Chemical Company plant.

Chelsea River is approach to City of Revere. Channel from entrance to a point opposite the Belcher Oil Co. Terminal has a controlling depth of 35 ft.

Weymouth Fore River is approach by water to Quincy and Weymouth. Controlling depth is 30 ft. to Fore River Bridge. Controlling depth for a distance of 2,800 ft. above Fore River Bridge is 30 ft.

Town River extends N.W. from Weymouth Fore River at Quincy Point. River has a controlling depth of 34 ft. from deep water in Weymouth Fore River to a point opposite the Quincy Oil Co. Terminal. Opposite Quincy Oil Co. Terminal there is a turning basin 34 ft. deep, 400 ft. wide and 1,000 ft. long.

MAX. SIZE: The primary entrance to Boston Harbour is via the North Channel and President Roads. Controlling depth is 35 ft. MLW. Average rise of the tide in Boston is 9.5 ft.

Generally speaking, vessels drawing 40 ft. are taken at the top of the tide to Belcher Oil Terminal and Exxon only. Vessels going to berths in the Mystic River above the Mystic River Bridge are limited by the bridge's vertical clearance of 135 ft. MHW.

Vessels consigned to berths in the Chelsea Creek are limited to a length of 661 ft., beam of 90.5 ft. and draft of 36 ft. high water docking. Furthermore, vessels which exceed 630.5 ft. length and 85.5 ft. beam going above the Chelsea Street Bridge are restricted to daylight docking. Daylight sailing is required from the berths above the McArdle Bridge if the vessel is over 585 ft. long.

As a rule, vessels are docked bow in at the Chelsea Creek berths. If docked between the bridges, departure is stern first through the McArdle Bridge. If docked above the Chelsea Street Bridge, then on sailing, the vessel is turned in the basin West of the B.P. and Belcher Terminals.

The controlling depth in the channel leading to Weymouth Fore River is 28 ft. MLW. Vessels with a max. draft of 33 ft. 6 in. will be taken at high water, but it should be noted that docking and undocking in Fore River are daylight operations – between sunrise and sunset – and no vessel longer than 628 ft. will be handled.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: *Advance Notice of Arrival:* 24 hours advance notice of arrival be given. This notice is made to the office of the Captain of the Port – 223-3025.

The information to be provided consists of: Vessel's Agent's name; Vessel's name, type, flag, and call sign; the ETA; Berth; Last port and next port; Dangerous cargo on board. In return the Captain of the Port will assign a consecutive log number to the vessel.

In the event the vessel's ETA is changed by more than 24 hours from first notice, the Captain of the Port should be so notified, identifying the vessel by its assigned log number.

VHF: The following VHF Channels are able:

Coast Guard, Boston pilot boat and shore station: 6, 10, 11, 12, 13, 14, 16, 21, 22, 23, 81 and 83.

Distrigas: 16 and 10.

In the event of an emergency, Channel 16 or 13 will be guarded.

TUGS: Vessels can proceed from the sea to Boston Upper Harbour under own power. Barges usually left by the outside tugs at the anchorage grounds, to be docked later by harbour tugs.

Tugs up to 4,300 h.p. are available at Boston for towing, docking, undocking and shifting. Tugs maintain radio communications on VHF Channel 18. Inbound vessels are usually met in the vicinity of Anchorage Areas 1 or 2. Arrangements are usually made in advance through ship's Agents.

BERTHING: There are 114 piers or wharves in the Port of Boston. Many of them have railroad connections. The depths of water available alongside these terminals range up to a maximum of 40 ft. at mean low water. Practically all terminals fronting on main ship channel are in close proximity to storage warehouses, both cold and dry which greatly facilitates transfer of cargo between vessel and warehouse.

Conley Terminal, Castle Island, South Boston:

Operator – Massachusetts Port Authority. Tel. 973-5354.

Stevedore – John T. Clark and Son. Tel: 330-7810.

Type of Pier – Single face. 6 berths 3,705 ft. (Berths No. 11 – 16). Berths No. 12 – 15 handle break bulk general cargoes. Berth No. 11 – containers. Berth No. 16 – automobiles. 4 million sq.ft. open storage (including 32 acres fenced in automobile storage), total 103 acres. 50 ton crane, rail service. Terminal equipped with 2×40 ton gantry cranes and 1 × 30 ton Paceco portal crane.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. Minimum 40 ft. apron.

Products handled – General cargo, containers.

J. F. Moran Container Terminal, Charlestown:

Operator – Massachusetts Port Authority. Tel. 973-5354.

Type of pier – Single face, 1,100 ft. long. 1×45 ton container crane, 1×70 ton container crane, 38,000 sq.ft. container stuffing shed, 50 acre container storage area, rail service.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Containers.

Boston Army Base, South Boston:

Operator – Port Terminals, Inc. Tel. 542-4500.

Type of Pier – Single face, three sides: South 3,705 ft., East 351 ft., North 964 ft., 950,000 sq.ft. covered storage, rail service, 2×27.5 ton rail mounted cranes.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 50 ft. apron incorporates rail lines.

Products handled – General cargo, containers.

Massport Marine Terminal – South Boston:

Owned and operated by: Massport, Maritime Department. Tel: 973-5391.

Adjacent to the former South Boston Naval Annex, this terminal features a 47 acre (19 ha.) site used for discharge and handling of automobiles; 800 ft. (244 m.) face; 38 ft. (11.58 m.) alongside depth; 16 ft. (4.88 m.) deck height; 750 lb./sq.ft. (340 kg./sq.cm.) load capacity. Railway track connection; stevedore equipment available as needed. An estimated 50,000 imported cars processed here yearly.

Black Falcon Cruise Terminal, South Boston:

Operator – Massachusetts Port Authority, Maritime Department. Tel. 330-1500.

Type of Pier – Single face, 600 ft.

Depth alongside at MLW – 32 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 20 ft. apron incorporates rail lines.

Used for docking excursion vessels, and occasional passenger vessels.

Pier 1, East Boston: No cargo activity.

Operator – Massachusetts Port Authority. Tel. 567-0331.

Type of Pier – Single face, three sides: East and West 605 ft., South 390 ft., 196,000 sq.ft. covered storage.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Coastal Oil New England, South Boston:

Operator – Coastal Oil New England. Tel. 284-4494.

Type of Pier – Single face.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Port (bow in).

Line handling boat – required.

Access to vessel (for stores and repairs) – limited, trucks can appr only to within 150 ft. of gangway or ship's side.

Products handled – Avjet, Heating Oil, No. 6 Oil, Molasses.

Size and number of pipelines – Numerous – 24 in., 20 in., 16 in.,

Bbls. per hour discharge capacity – 12,000 to 18,000.

Average distance to storage tanks – 1,000 ft.

Pollution control equipment – 1,600 ft. boom, 16 ft. boat, absorbent pillows, 2,000 gallon pumpout truck.

Atlantic Fuels Marketing Corp., Chelsea:

Operator – Atlantic Petroleum. Tel. 729-3000.

Type of Pier – Timber pile, offshore.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Starboard (bow in).

Line handling boat not required.

Access to vessel (for stores and repairs) – by hand cart only.

Products handled – Heating Oil, No. 6 Oil.

Size and number of pipelines – 2 × 8 in.

Bbls. per hour discharge capacity – 6,000 to 8,000.

Storage tanks adjacent to berth.

Pollution control equipment – 1,000 ft. boom, 18 ft. boat, 50 absor pillows, 150 gallons Aqua-clene.

Note:– Bow to manifold 370 ft. No wire ropes used to moor vess

Vessels require 3 tugs while docking, depending on the deadwe of the vessel. A minimum of 2 tugs are required for undocking. Ca is advised while docking and undocking due to traffic congestion in area of the channel.

Exxon Company U.S.A., Everett:

Operator – Exxon Company U.S.A. Tel. Marine Department 387- Marketing Terminal 381-2828.

Type of Pier – Timber pile wharf with caissons.

Depth alongside at MLW – 42 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – by rail-mounted hand

Products handled – Asphalt, Chemicals, Diesel Oil, Jet Fuel, Kerosene, Gasoline, No. 2 and No. 6 Oil.

Size and number of pipelines – numerous.

Bbls. per hour discharge capacity – Up to 35,000.

Average distance to storage tanks – 5,000 ft.

Pollution control equipment – 1,500 ft. boom, skiff.

Vessels meet tugs and Docking Master off Castle Island and proceed up the main channel. Vessels pass under the Mystic Bridg the approach to the berth and then dock starboard side to. If the v is equipped with a bow thruster 2 tugs are required when docking undocking, otherwise 3 tugs are required. The vessel turns on depa from berth. A gangway is provided by the Terminal.

Distrigas of Massachusetts Corporation, Everett:

Operator – Distrigas of Mass. Corporation. Tel. 381-9444.

Type of Pier – Single face, 165 ft. long, with 900 ft. berthing s with dolphins and use of adjacent wharves. Concrete platform co 5 Chicksan Marine LNG unloading arms.

Depth alongside at MLW – 36 ft.

Normal ship side to dock – Port (bow out).

Line handling boat is required.

Access to vessel (for stores and repairs) is limited.

Products handled – Liquefied Natural Gas.

Prolerized New England, Everett:

Operator – Prolerized New England Company. Tel. 389-8300.

Type of Pier – Straight face.

Depth alongside at MLW – 36 ft.

Normal ship side to dock – Port (bow out).

Access to vessel (for stores and repairs) – trucks to ship's sid access may be limited due to vessel's position at conveyor.

Products handled – Ferrous scrap (including Prolerized shr scrap).

General notes: Pier is equipped with 2×50-ton cranes. Shr scrap is loaded from fixed conveyor requiring vessel to be shi each hatch is served.

U.S. Gypsum, Charlestown:

Operator – U.S. Gypsum Co. Tel. 241-9100.

Type of Pier – Single face. (410 ft.).

Depth alongside at MLW – 27 ft.

Normal ship side to dock – Port.

Line handling boat not required.

Access to vessel (for stores and repairs) – access to berth.

Products handled – Gypsum rock from Nova Scotia, ca company's own vessels, specially fitted and adapted for disch this berth. Silo storage 25,000 tons. Open storage 38,000 tons

Mobil Oil, East Boston:

Operator – Mobil Oil Corporation. Tel. 567-9080.

Type of Pier – Straight face, with centre relieving platform.

Depth alongside at MLW – 32 ft.

Normal ship side to dock – Starboard.

Line handling boat required.

Access to vessel (for stores and repairs) – trucks to ship's

Products handled – Gasoline, Heating Oil.

Size and number of pipelines – Various.

Bbls. per hour discharge capacity – 8,000.

Average distance to storage tanks – tank farm adjacent to

Pollution control equipment – 950 ft. boom.

Amerada Hess Oil Terminal – East Boston: (No cargo activity).
Owned and operated by: Amerada Hess Corp.
For receiving and shipping petroleum products; 20 ft. (6 m.) face, 296 ft. (90.2 m.) total berthing space with dolphins, 35 ft. (10.67 m.) alongside depth, 13 ft. (3.96 m.) deck height. Pipe-lines extend from wharf to 10 steel storage tanks with total capacity of 595,250 bbls.

Gibbs (B.P.) Oil Company, Revere:
Operator – Gibbs (B.P.) Oil Company. Tel. 289-4201.
Type of Pier – Timber pile, wooden deck.
Depth alongside at MLW – 10 ft. – 35 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – only by hand cart.
Products handled – Heating Oil, Gasoline.
Size and number of pipelines – 3×10 in., 2×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,600 ft. boom, 16 ft. boat.
3 tugs are normally used for docking and undocking vessels at this berth. Vessels normally dock starboard side to.

Belcher New England Ship Pier – Revere:
Owned and operated by: Belcher New England, Inc.
Used for receiving and shipping petroleum products, the South side of pier has 600 ft. (182.88 m.) of berthing space; 37 ft. (11.27 m.) LW alongside depth; 15 ft. (4.57 m.) deck height. Pipe-lines extend to storage tanks with 1.25 million barrel capacity.

Coastal Oil New England Inc., Revere:
Operator – Coastal Oil New England Inc. Tel. 284-4494.
Type of Pier – Timber pile, wooden deck.
Depth alongside at MLW – 37 ft.
Normal ship side to dock – Port.
Line handling boat required.
Access to vessel (for stores and repairs) – only by hand cart.
Products handled – Heating Oil, Mogas, Alcohol, No. 6 Oil.
Size and number of pipelines – 5×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,600 ft. boom, 16 ft. boat. (Shared with B.P., Arco, Northeast.)
Vessels meet tugs and Docking Master in vicinity of Castle Island. The maximum size vessel which can be safely accommodated at this berth is about 38,000 d.w.t. Vessel normally require 2 tugs when docking and undocking at Union Oil Terminal. Vessels dock starboard side to, and when undocking are turned in the turning basin. Vessels must utilise their own gangway at this berth. Fully loaded vessels are docked or undocked at HW only, day or night.

Gulf Oil Company, Chelsea: (Cumberland Farms)
Operator – Gulf Oil Company. Tel. 884-5980.
Type of Pier – Single face.
Depth alongside at MLW – 36 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Heating Oil, Gasoline, Jet Fuel.
Size and number of pipelines – 5×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 1,000 ft.
Pollution control equipment – 1,600 ft. boom, 16 ft. boat.
Vessels require 3 tugs when berthing and normally 2 when unberthing. Vessels dock daylight only, normally port side to, and when undocking proceed up river to the turning basin and are turned before proceeding outbound.

Atlantic Fuels, Chelsea:
Owned and operated by: Atlantic Petroleum Inc.
Used for receiving and shipping petroleum products, bunkering vessels; can accommodate vessels up to 690 ft. (210.3 m.) in length; 33 ft. (10 m.) alongside depth; 14 ft. (4.26 m.) deck height. Pipe-lines extend from wharf to 14 steel storage tanks with total 660,000 barrel capacity.

Coastal Oil New England, Chelsea:
Operator – Coastal Oil New England. Tel. 289-4494.
Type of Pier – Single face.
Depth alongside at MLW – For 575 ft. vessels: 31 ft. fwd., 34 ft. aft. For 624 ft. vessels: 21 ft. fwd., 34 ft. aft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Avjet, Diesel Oil, Gasoline.
Size and number of pipelines – 7×12 in.
Bbls. per hour discharge capacity – 5,000 to 10,000.
Average distance to storage tanks – tank farm adjacent to berth.
Pollution control equipment – Automatic boom being installed.
3 tugs are normally required for berthing and 2 for unberthing. Vessels require a 300 ft. messenger fore and aft for handling lines. Vessels normally dock port side to. Due to the limited manoeuvring area adjacent to the berth, vessels when unberthing are towed out stern first and then turned in the main channel.

Quincy Oil, Quincy:
Operator – Quincy Oil Company. Tel. 773-2500.
Type of Pier – Timber pile, timber deck, offshore wharf.
Depth alongside at MLW – 35 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – by hand cart only.
Products handled – Gasoline, Heating Oil.
Size and number of pipelines – 2×8 in.
Bbls. per hour discharge capacity – 6,000.
Average distance to storage tanks – tank farm adjacent to berth.
Pollution control equipment – 800 ft. boom, work boat.
Vessels meet tugs and Docking Master in the vicinity of Nantasket Roads and then proceed up the Weymouth Fore and Town Rivers to the Quincy Terminal.
Vessels should enter Town River at S.W. Extreme caution should be used when turning into Town River because of the narrow channel. Narrow channels demand extreme caution when navigating up to the terminal. Vessels normally berth port side to, and are swung around in the turning basin when unberthing. 3 tugs are required when docking or undocking. Vessels must utilise their own gangways.

Proctor and Gamble, Quincy:
Operator – Proctor and Gamble. Tel. 770-3155.
Type of Pier – T-head with dolphins.
Depth alongside at MLW – 32 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Palm Oil.
Size and number of pipelines – Various.
Bbls. per hour discharge capacity – 8,000.
Average distance to storage tanks – tank farm adjacent to berth.
Pollution control equipment – shared with Sprague.

C.H. Sprague & Son Co., North Weymouth:
Operator – C.H. Sprague & Son Co. Tel. Terminal 337-2040, Offices (603) 431-1000.
Type of Pier – Timber pile, concrete deck.
Depth alongside at MLW – 35 ft. 06 in.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – No. 6 Oil.
Size and number of pipelines – 2×12 in.
Bbls. per hour discharge capacity – 10,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 500 ft. boom, 16 ft. boat. (Shared with Mobil.).
Vessels dock and sail during daylight only. 3 tugs are required when berthing and unberthing. Vessels met the tugs and Docking Pilot in the vicinity of Nantasket Roads and then proceed to the manoeuvring area near the berth where the vessels are turned and berthed starboard side to. Vessels must utilise their own gangway at this berth.

Citgo Petroleum Corp., Braintree:
Operator – Citgo Petroleum Corp. Tel. 848-2595.
Type of Pier – 4 cylindrical caissons.
Depth alongside at MLW – 35 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Heating Oil, Gasoline.
Size and number of pipelines – 1×10 in., 4×12 in.
Bbls. per hour discharging capacity – 10,000.
Average distance to storage tanks – 2,500 ft.
Pollution Control Equipment – 1,500 ft. boom, work boat.
Vessels meet tugs and Docking Master in the vicinity of Nantasket Roads and then proceed up the Weymouth Fore River, through the Fore River Bridge, and berth starboard side to at the terminal. Vessels dock and undock during daylight hours only. 3 tugs are normally required when docking and undocking. Vessels must utilise their own gangways.

Bulk Cement Piers:
There are 2 berths in Boston used exclusively for the discharge of bulk cement from barges. Both are in the Mystic River.
No. 28: Independent Cement Corp.
No. 33: Blue Circle Atlantic Cement Company, Inc. Tel: 241-9040.

CRANES: 1×60 ton floating crane and mobile cranes up to 150 tons capacity.

SPECIALISED CARGO HANDLING FACILITIES: Also see "Berthing".

C.H. Sprague.	Weymouth	35

Berthing at all berths normally effected on a rising tide. It is the practice of the port for deep draft vessels to pump part cargo overside in order to bring vessel to a safe draft by the next Low Water. Berthing at Sprague, North Weymouth is usually starboard side to, which involves swinging vessel.

LNG/LPG: Handled at Distrigas on the Mystic River, Everett.

U.S. Coast Guard Instructions: The following is only part of the instructions. Full copies may be obtained from U.S.C.G. Marine Safety Office, 447 Commercial Street, Boston, MA 02109-1096. Tel: (617) 565-9000.

Foreign flag vessel owners intending to transport liquefied gases in U.S. ports must obtain a Certificate of Compliance from the Coast Guard. The procedures for obtaining a Certificate of Compliance are detailed in 46 CFR 154. Both U.S. and foreign flag vessels must meet essentially the same requirements. Most requirements conform to the IMO Gas Carriers Code, but some construction requirements are more stringent.

PART A – LNG/LPG VESSEL OPERATIONS IN BOSTON HARBOUR

I. NOTIFICATION

The Master of an LNG/LPG vessel notifies COTP Boston 72 hours in advance of arrival at Broad Sound Anchorage. This advance notice of arrival is by message and includes the vessel's Agent in Boston, distance from keel to highest projection, maximum draft, and a statement by the Master to the effect that:

"To the best of my knowledge and belief, there are no known casualties to this vessel or its machinery which might affect her seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition and has been operating for the duration of this passage."

Signed ____________

Master ____________

Should any deficiency develop after the 72 hour advance notice is given, another message describing the discrepancy or condition in detail is sent to COTP Boston immediately.

Telex 910-2506309 (Answerback "US CG")

In addition to the certification of equipment, the Master includes the names and qualifications of crew that have changed since the last port visit.

The Vessel Movement Office (VMO) at the U.S. Coast Guard Marine Safety Office, Boston is the contact point for all notifications and requests of the COTP. Upon notification of arrival, the VMO:

a. Initiates an action file including vessel data, messages, letters, etc.
b. Reviews the vessel history and communicates any special requirements with the Coast Guard inspectors.
c. Notifies appropriate Coast Guard units.
d. Maintains daily updates of the vessel's estimated time of arrival.
e. Arranges and co-ordinates Coast Guard inspection, escort and monitoring details.
f. Passes any unusual or additional information to interested parties.
g. Obtains a long range weather forecast for the period of transit and transfer and compiles updates as they occur.

One day prior to arrival of the vessel, the VMO:

a. Firms up probable transit time for planning purposes.
b. Prepares and transmits Oporder and marine information broadcast messages, and
c. Notifies other concerned parties of the estimated time of harbour transit and any special requirements affecting harbour transit.

II. ARRIVAL AND ENTRY

U.S. Coast Guard inspectors from MSO Boston board and inspect each vessel prior to its entry into port. The purpose of this inspection is to ensure that the vessel meets the requirements of its certificate and that all cargo control equipment and safety equipment is operative. Vessels will normally anchor in Broad Sound pending inspection.

The vessel's Master must provide safe access for the Coast Guard inspectors. Should sea conditions preclude a safe boarding while anchored, the LNG/LPG vessel may be required to resume manoeuvring and provide a lee. A combination of the vessel's accommodation ladder and pilot ladder is acceptable.

While the vessel is at anchor, a live bridge watch shall be maintained. LNG/LPG vessels arriving at the Port of Boston must maintain a radio guard on VHF-FM Channels 13 (156.65 MHz) and 16 (156.8 MHz). A round of bearings fixing the vessel's position shall be taken and recorded at least hourly, followed by a report if there is a significant change in position or other problem aboard the vessel. The report may be made to COTP Boston by radio via the U.S. Coast Guard Group Boston or via the vessel's agent if timely notification is possible.

An LNG/LPG vessel must have its cryogenic sensing and indicating instrumentation and gas detection system in operation while the vessel is in U.S. waters. The Master of the ship must be prepared to demonstrate that the cryogenic handling and gas detection equipment is in proper working order. The vessel shall have on board a cylinder of properly certified span gas for testing the gas detection system.

In addition to a valid Certificate of Compliance, vessels must h onboard all required ship's documents and an up-to-date set of pl in English, specifying:

a. Cargo tank arrangement
b. Cargo tank venting arrangement
c. Cargo piping arrangement
d. Capacity plan
e. Firefighting plan
f. Up-to-date cargo system operating and safety procedures.

The vessel may enter the harbour only after the vessel equipm publications and documents are inspected, confirmed to be satisfactory condition, and COTP Boston has cleared the vessel for en

The U.S. Coast Guard, Captain of the Port must ascertain that cr are qualified to carry out transfer operations safely. On U.S. flag vess carrying LNG, the Master, Chief Engineer, Chief Mate and First Assis Engineer must be licensed and certified by the Coast Guard. On vess other than U.S. flag, a valid Certificate of Compliance issued by Coast Guard and a valid Certificate of Fitness (issued in complia with the IMO Gas Carriers Code) is evidence of compliance with spec U.S. equipment requirements and home state requirements certification.

Crew training standards of the Code (Chapter 18) require t personnel involved in cargo operations be adequately trained. All offic should be trained to deal with emergencies involving cargo leaks, s or fires. The code also refers to the 1978 International Convention Standards of Training, Certification and Watchkeeping for Seafarers

Each officer and rating with specific duties involving cargo and ca equipment should complete a course of instruction, or undergo onbo training, applicable to his or her duties. As crew members change, operator must keep the Coast Guard apprised of the new memb training. A company initiated letter or message indicating the comple of an administration approved formal training course will serve evidence of this training. All crew members should have formal train or onboard instruction, in the special hazards of LNG and LPG and awareness of the general safety features of the vessel.

Serious discrepancies found during any boarding or examination wh affect the safety of the port must be corrected prior to vessel entr cargo transfer operations. Examples of serious discrepancies are lea cargo tanks, inoperative leak detectors or inoperative fire-figh equipment. Determination to permit or deny port entry or cargo tran is made by the COTP. In unusual circumstances, however, Comman (G-MTH) may be requested to advise or furnish a techn representative.

A fully or partially loaded LNG/LPG vessel will always transi harbour within a moving safety zone. This concept enhances safe avoiding crossing or passing situations. The LNG/LPG vessel may enter the main ship channel until clearance is received from C Boston and U.S. Coast Guard escort vessel is in position to begin es

III. LNG/LPG VESSEL TRANSIT MANAGEMENT

Fully or partially loaded LNG/LPG vessels may transit the harbour during the hours between sunrise and sunset and then only du periods of adequate visibility.

One hour prior to scheduled LNG/LPG vessel transit, the Ve Movement Officer assumes the watch in Group Boston Communica Centre, to perform the following duties:

a. Ensure that the tugs and the Coast Guard escort vessel a position, two emergency towing lines are rigged fore and a the LNG vessel within 6 ft. of the water, and the inspectors found no discrepancies in the condition of the vessel.
b. Contact the LNG/LPG vessel and initiate the transit.
c. Ensure that the Marine Information Broadcast is being pro sent by Group Boston and the escort craft. Keep Group Bo Duty Officer informed of LNG/LPG vessel position as report the escort vessel.
d. Notify Logan Airport Control Tower of the LNG/LPG vessel t when the vessel approaches Deer Island.
e. Monitor Channel 13 VHF-FM and communicate with vess ensure no unauthorised vessels get underway in violation o safety zone.
f. Address all vessel movement questions received via radi telephone during the transit.
g. Keep the COTP informed of the progress of the evolution.
h. Notify Group Boston Duty Officer when safety broadcast a terminated.
i. Maintain a logbook with appropriate entries (transit comme escort craft and adequate number of tugs on scene, emer tow lines rigged, names of Boston Pilot and Docking M onboard, vessel moored etc.).

The Vessel Movement Officer (VMO) can be contacted at the V Safety Office (565-9000) or by radio (Channel 13 VHF-FM)

If the visibility falls to less than 2 miles at any point in the trans Master shall notify the VMO of the situation and request autho to proceed.

When the LNG/LPG vessel enters Boston North Channel inbou Master notifies the Vessel Movement Officer via Channel 13 VH The VMO will then notify the Chief or Assistant Chief Controller at Airport. The Federal Aviation Administration imposes flight rest over the LNG/LPG vessel in keeping with the desire to m maximum standards of safety during an LNG/LPG vessel move

The vessel's Master shall ensure that calculations are comparing the air draft of the LNG/LPG vessel to the height of a objects under which it must pass. These calculations are to be available to the Docking Master as an assurance that the LN vessel can safely transit Boston Harbour.

Tugs meet the incoming LNG/LPG vessel at the Eastern President Roads and are used as needed during the vessel's Boston Harbour. During the docking and undocking operation will be strategically positioned consistent with the Master's judgement and consultation with the Docking Master. Emergenc lines must be rigged fore and aft within 6 ft. of the water durin

For vessels under 60,000 cu.m. cargo capacity, a minimum of 3 tugs with total of 5,400 shaft horsepower or greater shall attend the needs of the vessel.

Vessels of 60,000 cu.m. or over will be required to use a minimum of 5 tugs. Two of the tugs must be 3,000 h.p. or greater. The remaining 3 tugs must be 1,200 h.p. or greater. Note that the referenced 3 or 5 tugs are minimums. Nothing herein should be construed to overrule the Master's sound judgement in employing additional tugs.

While a fully or partially loaded LNG/LPG vessel is underway in the harbour, all other vessels in the harbour are required to remain moored unless otherwise authorised by the COTP. The COTP has given permission for towing vessels without tow and other vessels under 100 gross tons to transit outside the main ship channel:

IF they establish bridge to bridge radio contact with the LNG/LPG vessel upon their approach and advise the Master of their intent, AND they can safely navigate outside the main ship channel.

Other examples of vessel movements that may be allowed are:

a. A cargo ship requests permission to get underway in the main ship channel and transit Boston Harbour outbound while a LNG/LPG vessel is inbound. Permission may be granted by the COTP for the transit outbound if the cargo ship will not approach within 2 nautical miles ahead or one nautical mile astern of the LNG/LPG vessel.

b. A tankship requests permission to get underway for inbound transit of the harbour at the same time an LNG/LPG vessel is inbound. Permission by the COTP may be given for the tanker to proceed but to remain at least one nautical mile astern of the LNG/LPG vessel.

During an LNG/LPG vessel transit, the maximum allowable speed for any vessel permitted within the moving Safety Zone will be 8 knots. This speed applies to all vessels within the restricted area. At least one Coast Guard escort craft will be present to enforce the safety zone restrictions. Additional craft may be assigned to the escort if conditions warrant.

Marine information broadcasts will be made on Channel 16 VHF-FM, switching to Channel 22, beginning 24 hours prior to the ship's harbour transit. The escort craft will issue a broadcast bridge to bridge on Channel 13 at the beginning of the transit and every 30 minutes thereafter until the LNG/LPG vessel is moored. At the end of each broadcast, the escort craft will state the current location of the LNG/LPG vessel.

The escort craft should normally take station several hundred yards ahead and to one side of the bow of the LNG/LPG vessel and precede it through the harbour. The escort craft is responsible for enforcing the vessel movement requirements of the safety zone. The escort craft will monitor and use Channel 13 VHF-FM to provide vessel traffic control during the transit of the LNG/LPG vessel.

An officer from MSO Boston will be assigned to ride each LNG/LPG vessel during the inbound transit. The senior member of the pre-arrival inspection team will assume this role when the inspection and transit occur on the same day. When these events occur on separate days, arrangements will be made to place an officer aboard the vessel prior to commencing the harbour transit.

This officer will remain in the pilothouse, maintain radio communications with the VMO via Channel 13 VHF-FM, and shall be responsible for the following:

a. Serve as a direct communications link to the VMO to report any casualties or unusual incidents, obtain amplifying information, and relay instructions to the vessel's Master or Pilot as directed by the VMO.

b. Assist in making determination as to the nature and seriousness of a casualty and if the inbound vessel should be directed to exit the harbour and return to anchorage in Broad Sound or if it should be permitted to proceed to its berth.

c. Remain vigilant and report any situation that could affect the safety of the port or that could adversely impact the safety zone and vessel escort.

Should an emergency situation occur aboard the LNG/LPG vessel (loss of steering, grounding, fire, etc.) the Master/Pilot will immediately notify the MSO Officer on board who will inform the VMO of the emergency via Channel 13 VHF-FM. The escort craft will then provide traffic control to keep all vessels (other than tugs, fireboats, etc.), clear of the LNG/LPG vessel.

IV. CARGO TRANSFER OPERATIONS

The COTP will provide personnel to ensure safety during the process of cooling down and to monitor the progress of transfer operation. A Coast Guard patrol craft will also be present to provide continuous waterside safety zone enforcement to prevent any vessel approaching within 50 yards of the LNG tanker while it remains in a loaded condition or is conducting cargo operations.

LNG/LPG vessels must moor bow to seaward with at least 2 wire cable mooring lines (firewarps) at the water's edge, fore and aft on the outboard side, for emergency towing hook-up if the need should arise. The vessel must be maintained in a state of readiness with sufficient crew on board to enable the ship to get underway and clear the pier in an emergency within 30 minutes of notification. The LNG/LPG vessel must also be capable of navigating out of the Port of Boston, using the main ship channel, at all times and under all prevailing tidal conditions.

The following minimum personnel must be on board the vessel during transfer operations:

a. Two Licensed Officers, fully qualified to supervise cargo transfer operations.

b. Two deckhands.

c. One Licensed Deck Officer for duties other than cargo transfer.

The officers on the vessel supervising cargo transfer operations should be fully rested prior to commencing tranfer operations. A minimum of 8 hours sleep is recommended. All ship's personnel directly involved in the transfer operation must be able to communicate in the English language, or be provided with an interpreter.

Venting cargo gas to the atmosphere is not permitted in port. However, nothing in this instruction should be construed to require or authorise elimination of installed ship safety equipment. If emergency venting is necessary, the officer supervising cargo transfer on the vessel will immediately notify the COTP Boston. This notification should include location and amount of venting, the cause of the emergency venting, wind velocity and direction at the time of venting.

All LNG/LPG facilities in the Port of Boston shall meet the requirements of 33 CFR 127. The facility will be responsible for controlling access to the vessel while it is at the dock.

The facility and the vessel must discuss arrangements for emergency shutdown of cargo transfer and emergency breakway of the vessel from the facility.

During cargo transfer, the facility shall have at least one person onboard the vessel and one person in the facility control centre who will be in constant communication with each other at all times. In addition to sufficient personnel to safely conduct all physical transfer operations, a person specially trained and certified as knowledgeable in the properties and hazards of the cargo to be tranferred shall oversee all discharge operations.

The permission of the Captain of the Port is required before loading stores or bringing vessels alongside the LNG/LPG vessel during cargo transfer operations. Bunkering or other transfer of petroleum products or other compressed or liquefied gases is prohibited while the vessel has gas or liquid cargo in the transfer piping.

The transfer of liquid cargo shall not begin until the Coast Guard inspector is satisfied with cooldown. The inspector must certify that all items in the Cooldown Inspection List are examined. The primary function of this inspection is to ensure that all connections, piping, pumps, etc. are in satisfactory operating order and that no deficiencies develop during the cooldown phase. Full pumping may commence upon satisfactory completion of cooldown operations.

The monitoring detail supervises the LNG/LPG transfer operation from hookup to disconnect and maintains an official logbook. The primary function of the monitor is to ensure compliance with safety requirements during the transfer and to maintain an alert security posture.

The individual Coast Guardsmen that make up the monitoring detail represent the Captain of the Port. Their responsibility is to keep informed of the progress of transfer and to oversee the safety of the operation. The person representing the facility onboard the vessel and the vessel cargo officer *must* promptly report all problems or abnormal conditions encountered during transfer operations, on the vessel or facility, to the Coast Guard watchstander. Updates of the condition and corrective action planned are also required.

The monitoring detail logs the commencement of pumping, completion of pumping, disconnecting times and any unusual occurrences and informs the COTP at each stage in the operation.

All cargo operations must cease if electrical storms are observed nearby. However, cargo transfer connections should be maintained. If gale warnings are posted, additional mooring lines and/or tug assistance may be required.

Should an emergency occur, the monitoring detail should immediately get clear and inform the COTP of the situation. Detailed emergency instructions to the monitoring detail can be found in Part B (Emergency Operations) of this plan.

The safety zone enforcement craft will be located so that vessel movements within a mile of the LNG/LPG vessel can be readily observed in order to detect any unusual waterborne activities that may pose a threat to either the vessel or the facility. Any unusual circumstances such as suspicious craft in the vicinity of the LNG/LPG vessel, approaching thunderstorms, sudden changes in the direction or increase in wind speeds, or any leaking gas vapour cloud wil be reported to the monitoring detail.

All firefighting equipment on the safety zone enforcement craft will be on standby, ready for immediate use in the event of an emergency. In the event of a threat of or actual fire or explosion, the enforcement craft will be positioned upwind and clear of the danger area to assist in response efforts.

Upon completion of the transfer operations when all cargo transfer piping is disconnected, the monitor on watch will notify COTP Boston. The MSO Duty officer will ensure that the safety zone broadcast is cancelled. A safety zone will normally be continued after cargo operations are complete and until the LNG/LPG vessel clears Deer Island Light *only* if the LNG/LPG vessel is partially loaded. When the vessel is empty, the VMO notifies Group Boston Communications Centre and releases the safety zone enforcement vessel.

V. LNG/LPG VESSEL DEPARTURE

A fully or partially loaded LNG/LPG vessel will always transit the harbour within a moving safety zone. This concept enhances safety by avoiding crossing or passing situations involving other vessels in the harbour. A U.S. Coast Guard escort craft will enforce the safety zone until the outbound LNG/LPG vessel clears Deer Island Light. The same requirements set forth in Section A-III will be used for transit of LNG/LPG vessels if a safety zone is set for departure.

LNG/LPG vessels departing the Port of Boston that are empty (in heel) will not require a safety zone. A Coast Guard escort or other additional requirements may be established in certain circumstances at the discretion of COTP Boston. Empty LNG/LPG vessels may transit the harbour during darkness.

When an empty LNG/LPG vessel gets underway outbound, the Master notifies the Vessel Movement Officer. The VMO will then notify the Chief or Assistance Chief Controller at Logan Airport. The Federal Aviation Administration imposes flight restrictions over the LNG/LPG vessel in keeping with the desire to maintain maximum standards of safety during an LNG/LPG vessel movement.

CERTIFICATES AND DOCUMENTS
(May be completed by Master prior to vessel entry and checked by attending inspector.)

REPAIRS/DRY DOCKS: Any type of repair undertaken.

East Boston, Massachusetts	Length	Capacity
Floating Dry Dock No. 1	622 ft.	18,000 tons
Floating Dry Dock No. 2	479 ft.	20,000 tons
Graving Dry Dock No. 4	256 ft.	

Modern facilities for repair, overhaul, and conversion of vessels of all sizes:

(a) a 10,000 ton capacity floating dry dock serviced by 2×150 ton overhead cranes with a yoked capacity of 350 tons. The 5-section dock is 415 ft. long, 120 ft. wide, and has an inside dimension of 85 ft. 7 in.

(b) 3 building basins (actually a 3-positioned graving dock). 2 are 132 ft. wide, 867 ft. long; 1 is 150 ft. wide, 938 ft. long. Each basin serviced by 2 Whirley type cranes of 75 and 50 ton capacity.

(c) 4 outfitting piers capable of handling up to 10 ships simultaneously provide adequate space for dockside work and for mooring personnel or service barges.

(d) 3 conventional "sliding" ways capable of handling ships up to 1,000 ft. in length.

Major Shops: 2-bay fabricating shop served by 17 bridge cranes. Machine shop equipped with large vertical and horizontal mills planers, lathes and a complete small machine complement. Fully equipped sheet metal, joiner, boiler, blacksmith, pattern foundry, galvanising, pipe and copper, and electrical shops. Complete facilities for inspection of all types including non-destructive testing such as radiography, magnetic particle, liquid penetrant and ultrasonic.

General Ship Corporation, East Boston: Dry docks for vessels up to 680 ft. × 90 ft. Damage and voyage repairs.

CUSTOMS ALLOWANCES: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

GANGWAY/DECK WATCHMEN: Available at prevailing prices.

OPENING/CLOSING HATCHES: Performed by stevedores.

REPATRIATION: Good facilities exist.

AIRPORT: Logan International Airport, East Boston.

HOLIDAYS: New Year's Day (1st January); Martin Luther King's Birthday (15th January) Washington's Birthday (3rd Monday in February); Evacuation Day (17th March); Patriots' Day (3rd Monday in April); Memorial Day (last Monday in May); Bunker Hill Day (17th June); Independence Day (4th July); Labour Day (first Monday in September); Columbus Day (8th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).

Note: "Or any day celebrated in lieu thereof".

POLICE/AMBULANCE/FIRE:POLICE/AMBULANCE/FIRE: Boston Fire Dept. 725-2880; Boston Police Dept. (Harbour Master) 242-6096; Everett Fire Dept. 387-7443; Everett Poice Dept. 3878-1212; Chelsea Fire Dept. 884-1410; Chelsea Police Dept. 884-1212.

IDENTIFICATIONIDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

GARBAGEGARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available through the following contractors:

BFI Waste Systems (Brown-Ferris Industries), 170 Market Street, Brighton, MA 02135. Tel: (617) 254-1800.

Laidlaw Waste Systems, 66 Cambridge Street, Charlestown, MA 02129. Tel: (617) 445-8383.

Waste Management of MA, Inc., 530 East First Street, South Boston, MA 02127. Tel: (617) 269-5800.

Charles Lee Disposal, Inc., 1 Ellery Street, So. Boston, MA 02127. Tel: (617) 361-3900.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight savin from first Sunday in April till last Sunday in October.

WASTE OIL DISPOSAL: Oil Pollution Clean-up Contractors:

Clean Harbors, 900 East First Street, Boston, MA 0 Tel: (617) 269-5830.

Jet Lines Services, 441 Canton Street, P.O.Box 180, Stoug MA 02072. Tel: (617) 344-2510.

SEAMAN'S CLUBS: Boston Port and Seaman's Aid Society, Mar House, 11 North Square, Boston, MA 02113. Tel: (617) 227-3979.

New England Seaman's Mission, Inc., Bremen Street, E.Bo MA 02128. Tel: (617) 569-6179.

Boston Seaman's Friend Society, 45 Church Street, Bo MA 02116. Tel: (617) 426-1665.

BRIDGEPORT, Connecticut: 41.07 N. 73.11 W.

(See P

DOCUMENTS: Refer to "New York".

APPROACHES: *Via New York:*

Charts: 12339, 12366, 12367, 12363, 12369.

Vessels leaving New York bound for Bridgeport will be transitting York's East River and Western Long Island Sound. All shoals and are well marked and the close proximity to the shore line provid excellent radar target for position checking. During Summer mo thick fog will present a hazard on this route. Long Island Sound is a major yachting centre, so extreme care must be exercised transitting this area. There are several dangers to be wary of making the passage from New York to Bridgeport.

In order of approach they are:

1. East River and Hell Gate are areas of strong tidal cur averaging 4.6 knots for the ebb current which sets in Southwe direction. Vessel drawing up to 35 ft. may transit Hell Gate at slack Water only. Sluggish handling vessels should arrange for tug assis up the East River and through Hell Gate.
2. 26-ft. Buoy "32A" usually passed well clear to the South.
3. Cable and Anchor Reef usually passed to the South.

Via Block Island:

Charts, 13205, 13215, 13209, 12354, 12369.

Block Island's Southern shore high rock cliffs provide a good target. Also, bearings can be taken from the RDF station at S.E. Care should be exercised by vessels deeper than 30 ft. to a approach Block Island to East in views of the numerous shoals Western side of the Island.

It is also advisable to remain at least 1 mile to the East of Block due to the numerous shoals close in shore.

There are numerous dangers to be wary of when making the pa from the Pilot Station to Bridgeport. In order of approach they ar

1. Block Island North Reef Buoy "1B1" marks a dangerous sho should be passed well clear.
2. The Race is a narrow channel into Long Island Sound. Stron to West currents exist during maximum ebb or flood and knowle position should be maintained in view of the possibility of unusu Valiant Rock may be passed on either side.
3. Great caution should be exercised during the Summer m when transitting through Block Island and Long Island Sound due heavy small boat traffic, especially the area in proximity to The R
4. Dense fog is prevalent during the Summer months. judgement should be used before transitting the area during fog.

Good water is found in Long Island Sound from The Race to Bri as long as the mid-channel Buoys "P1" and "CF" are passed aboard and care is taken so as not to pass North of Twenty-Eig Shoal buoy.

Vessels usually pass one mile to the South of Stratford Shoa before altering course for Bridgeport. Radar is the best navigatio in this area. There are numerous RDF stations that can be u conjunction with echo sounder readings to ascertain positions.

PILOTAGE: Vessel usually notifies Agent 48 hours before arriv will arrange Pilot boarding. Pilot boards either at Brenton Reef in Lat. 41° 25' N., Long. 71° 23' W. or Point Judith in position Lat. 41 Long. 71° 29' W.

Note: Non-U.S. flag vessels and U.S. flag vessels under approaching from Block Island embark Pilot about 2.5 miles S Point Judith.

U.S. flag vessels under enrolment approaching from Bloc embark Pilot 1.4 miles East of Old Harbour - Block Island.

Constitution State Pilots provide Docking Masters for the po

Notice from State of Connecticut, Department of Transportatio

Pilotage is compulsory for vessels transitting the waters of Lo Sound via Block Island Sound bound to or from ports and ha Long Island Sound. Vessels bound for Bridgeport via Block Isla Island Sound usually board a pilot at either the Point Judith Pil (41° 17.2' N., 71° 28.5' W., 2 miles South of the Point Judith R "2 buoy) or the Montauk Pilot Station (41° 02' N., 71° 42' W., 3 m East of Montauk whistle buoy Mo (A) "MP"). Some Block Isl Island Sound pilots also serve as pilots for Bridgeport Harbour. harbour pilot is to be boarded, he will usually board vessel in Bridgeport Sea Buoy, marked "BH" – short and long flash; red vertical stripes.

ANCHORAGE: 2 miles South of the entrance with depths in 50 ft.

RESTRICTIONS: Entrance channel has a project depth of 35 ft. at MLW, is 400 ft. wide and 3 miles in length.

Normal time allowed for transit from outside to off the dock is 30 – 40 minutes. Docking time varies from 30 minutes to 1 hour, dependent on which terminal is the destination, and weather conditions.

The New Haven – Bridgeport Pilots Association believe 4 ft. of water in excess of the ship's draft is needed. As a rule of thumb, 31 ft. at low to 37 ft. at high. Any variations from this, a Pilot should be directly consulted. The range of tide is 6.7 ft. Wind strongly affects the tide in the main entrance channel. Flood and ebb cross the channel at a right angle, and velocities depend on the rise of tide for the day.

Vessels up to 70,000 d.w.t. and LOA 825 ft. call at the port.

MAX. SIZE: See "Berthing and Restrictions".

HEALTH: Vessel to cable Agent 24 hours prior to arrival of any illness on board, otherwise Radio Pratique not necessary.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.

BERTHING: *Cilco Terminal:* Cilco is a bulkhead dock, length approximately 1,100 ft. Vessels dock port or starboard side to. Two ships can moor at the same time. This is a dry cargo facility. Ships load or discharge all kinds of products. Several mobile cranes are available. Depth 33 ft. at MLW. Bunkers are only available by truck. Fresh water is available.

TUGS: Tugs available from Red Star. The Despatcher monitors VHF and is available 24 hours a day through Channel 24 at Bridgeport.

MEDICAL: All facilities available.

TANKERS: *Bridgeport Shell – Buckley Bros.:* The Shell berth is located on the East side at right angles to the main entrance, and ships must be turned 90° to approach the dock. The dock is approximately 200 ft. long with 2 main dolphins and catwalks to shore. Head lines and stern lines are run ashore by a messenger. The size of vessels is governed by manifold distance. Light oil products 300 ft. and heavy oil 350 ft. Vessels of length 700 ft. have been moored, 38 ft. at MLW in ship berth. Ships dock port side to.

Bunkers and fresh water are available.

United Illuminating: Berth is 0.6 miles inside the breakwater on the West side of the channel. A turn to port of 120° must be made into a dredged cut 140 ft. wide. The dock is concrete caissons on pilings with catwalks and centre platform. Depth 32 ft. to 37 ft. at MLW. Vessels of 70,000 d.w.t. call, but bow to manifold distance governs size of vessel (350 ft. – 375 ft.). Vessels dock starboard side to.

Fresh water is available, but bunkers are not. Every tanker, when moored here, has an anti-pollution boom placed around it.

FRESH WATER: Available at all berths.

FUEL: No fuel barge service available. In emergency, tank truck delivery can be arranged.

CONSULS: All countries represented in New York.

AIRPORT: Bridgeport Airport about 3 miles away. New York airports about 50 miles distant.

TIME: Daylight Saving Time, GMT minus 4 hours from April to October.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (18th February); Good Friday; Memorial Day; Independence Day (4th July); Labour Day; Columbus Day (14th October); Veterans' Day; Election Day (5th November); Thanksgiving Day (28th November); Christmas Day (25th December).

SERVICES: Ship's stores and launch service available from New Haven. Vessels must provide their own gangway at all docks.

AUTHORITY: Bridgeport Port Authority, 177 State Street, Bridgeport, Connecticut 06604, U.S.A. *Tel:* (203) 384-9777. *FAX:* (203) 384-9686. *Contact:* Joseph C. Savino Jr., Harbour Master (After hours Tel: 374-7795).

BROWNSVILLE, Texas: 25.54 N. 97.28 W. **(See Plan)**

DOCUMENTS: See "Houston".

PILOTAGE: When a vessel is scheduled to arrive at Brownsville, the vessel's Agent notifies the Harbour Master's office of the approximate ETA. Later, when a firm ETA is received, the Harbour Master's office notifies the pilot office that the vessel is expected on the bar at a certain time and also gives the time which she would like to enter.

The telegraphic address of the pilot office is: Brazos-Santiago Pilots, c/o Harbour Master, Port of Brownsville, Brownsville, Texas.

If possible, it is desired that the Harbour Master's Office be notified 2 hours in advance of the ETA of any vessel.

The VHF Channel to be used when contacting the pilot boat and Harbour Master is 16. When contact is made, this will be switched to Channel 12.

The pilot boat is a steel hull length 43 ft., beam 16 ft. and draft 8 ft. 250 h.p. diesel. Gross tonnage 36 tons.

No light or sound signals are necessary from vessels requiring a Pilot, although light signals may sometimes be used at night – ordinarily a vessel is picked up by visual sighting.

The pilot boat is located on the South tip of Padre Island – the Pilot station is adjacent to the entrance to ship channel with a clear view of the approach to the jetties.

The Pilot is taken on board an incoming vessel at the sea buoy which is located 2 miles off shore.

The anchorage for a vessel awaiting Pilot is 1.5 miles North of sea buoy.

ANCHORAGES: Anchorages are marked on charts.

RESTRICTIONS: *Brazos Island Harbour:*

Name of Channel	*Width* (ft.)	*Dredged Dimensions Length* (miles)	*Depth* (ft.)	*Minimum depths in channel entering from seaward Left Outside Quarter* (ft.)	*Middle Half of Channel* (ft.)	*Right Outside Quarter* (ft.)
Brazos Santiago Pass:						
Entrance Channel	300	1.9	38	40.0	39.0	37.0
Channel across Laguna Madre	200	2.9	36	38.0	38.0	38.0
Brownsville Channel:						
Junction Basin to Boca Chica Passing Basin	200	4.0	36	38.0	38.0	38.0
Boca Chica Passing Basin to Goose Island Passing Basin	200	5.4	36	38.0	38.0	38.0
Goose Island Passing Basin to Brownsville Turning Basin	200	2.8	36	37.0	38.0	37.0
Brownsville Turning Basin (extension)	500	1.4	36	37.0	38.0	37.5
Brownsville Turning Basin	500-1000	0.5	36	36.0	37.0	35.0

MAX. SIZE: The max. permissible length 875 ft., beam 135 ft., draft 35 ft.

RADIO: ETA cables to Agent, etc., should be addressed to the Agent via WLC – Galveston, WLO – Mobile or Slidell Radio. When within 60 miles range of the port, calls may be made through the Harbour Master's office on VHF Channel 16 and the calls will then be transferred to land lines to any point. Also Brownsville Marine Operator, VHF Channel 26.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: A vessel approaching the Port of Brownsville may contact the Harbour Master's office on VHF Channel 16.

TUGS: Tugs normally join an incoming vessel 1.25 miles before she enters the turning basin. The tug's lines are used for which there is no charge.

BERTHING: Cargo facilities include over 7,500 ft. of modern, marginal dry cargo wharves, 9 deep sea dry cargo docks, 4 deep sea liquid cargo docks and 10 barge berths, together with over 583,000 sq.ft. of transit shed space. In addition there is 242,000 sq.ft. of open storage space at the deep-draft docks and 271,000 sq.ft. of open storage at the shallow draft docks.

BULK HANDLING FACILITIES:

Public Grain Elevator: Located at the approach to the Turning Basin, the privately and operated elevator has a capacity of over 3,800,000 bushels. An adjacent bulk plant provides flat storage for all types of dry bulk commodities.

Two large gantry cranes handle the loading of vessels. The maximum spout clearance for loading vessels is 45 ft. above the water.

Equipped with two truck dumps and two hopper car dumps, the elevator has the rated loading capacity of 1,200 short tons per hour (1,000 L/T per hour on bulk carriers without wing tanks and 600 L/T per hour on tween deckers).

The 400 ft. wharf is 12 ft. above water and has an unlimited berth length. The draft at dockside is 34 ft. and the channel control depth is 36 ft.

The grain elevator also has the flexibility of unloading vessels (barge unloading capacity is 300 t.p.h.).

Liquid Bulk Handling: Total liquid bulk storage available for petrochemicals and combustible oils is 3.4 million barrels, tank capacities from 1,000 to 200,000 barrels, at Itapco, Statia, Petro Liquids, and Brownsville Refinery terminals. Additionally, Citgo and Interlube maintain private terminals. Four liquid cargo docks on the North side of channel and one on the South side serve these entities. Three terminals, Itapco, Petroliquids and Statia, have Foreign Trade Zone status.

CRANES: Two large floating cranes, rated at 150 metric tons each, are available for heavy lifts at any dockside location in the port area.

STEVEDORES: To arrange for gangs the vessel needs to notify the ship's Agent of ETA; the Agent will in turn notify the stevedores. It is necessary that the Agent be advised of an ETA before 1900 hrs. for an 0800 hrs. start.

Main commodities and average load discharge rates:

Grain	Bulk carrier 1,200 t.p.h.
Grain	tween deck 600 t.p.h.
Cotton	100 bales per hour per gang
Lead and zinc pigs	40 tons per hour per gang
Citrus in boxes	22 tons per hour per gang
Onions and carrots in bags	22 tons per hour per gang
General cargo	25 tons per hour per gang

MEDICAL: When medical attention is required, advance notice should be given to the Agent by ship's radio.

TANKERS: Ballast facilities are available up to 6,000 barrels per hour. The port loads refined petroleum products. The port has 4 tanker berths, with max. draft 34 ft. 7 in.

Vessels proceeding to Brownsville normally turn in the basin and berth Port side to. Berthing at Port Isabel Oil Wharf also generally Port side to. Mooring boat employed.

DENSITY: The average density is 32 parts per 1,000.

FRESH WATER: Fresh water is available and can be delivered to a vessel through hose or pipeline at 150 gallons per minute.

FUEL: No fuel is available locally. It must be barged in from Corpus Christi – advance arrangements are necessary.

FIRE PRECAUTIONS: Preferred berthing for tankers, head out.

CONSULS: Mexico: Tel. 542-4431.

REPAIRS: Amfels, located at the port, is equipped to handle all normal temporary ship repairs.

DRY DOCKS: None available.

GANGWAY/DECK WATCHMEN: Such services are necessary only when detainees are held on board.

AIRPORT: The regional airport, Valley International, is located 30 miles from the port. American, Southwest and Continental Airlines provide passenger service.

Brownsville – South Padre Island International Airport, 5 miles from seaport, provides freight/package service via Federal Express, Burlington Northern and Continental passenger service.

OPENING/CLOSING HATCHES: This work is done by the stevedores.
REPATRIATION: There are facilities for this service.
TIME: Local Time is 6 hours behind GMT.
HOLIDAYS: The following holidays are observed here: Veterans' Day (4th Monday of October); Thanksgiving; Christmas; New Year; Washington's Birthday (Feb. 22nd); Texas Independence Day (March 2nd); Emancipation Day (June 20th); July 4th; Labour Day (1st Monday in September); Decoration Day (last Monday in May).

No work shall be performed on Labour Day or Christmas Day except in case of fire or where property is in danger. When holidays fall on Sunday, the following day will be recognised as the holiday. Also, no work will be performed between 1600 and 1900 hrs. on election days.
POLICE/AMBULANCE/FIRE: Sheriff 544-0860; Emergency Fire and Ambulance, dial 911.
TELEPHONES: Telephones are not available for placing on ships.
SERVICES: Tank cleaning service is available at the port. Ballast facilities are available at Oil Docks 1, 2 and 3. P.I.B. can take care of compass adjusting, etc.
IDENTIFICATION CARDS: Immigration requires Form No. I - 95 Landing permit.
GARBAGE DISPOSAL: BFI Waste Systems. Tel: 512-542-5550.

Containers provided by reservation, alongside or may be lifted aboard ship. Collection as required.
WASTE OIL DISPOSAL: Bilge water and contaminated ballast water discharge available at Oil Dock No. 1. Contact party, S.A.Beckwith, Port Safety Director/Environmentalist. Tel: 512-831-4592. Fax: 512-831-5006. Vessel must provide hoses to manifold. List of waste engine oil disposal companies available upon request.
SEAMAN'S CLUBS: Port of Brownsville International Seaman's Centre, P.O.Box 4033, Brownsville, Tx. 78520. Tel: 512-831-4304. Rev. Wilbur Aten. Facilities: Shop, international telephone service for seafarers, church services, mini-bus collection, postage facilities, games.
DELAYS: There are no delays unless an incoming ship has been assigned to a berth now occupied. Bunkers must be barged in; arrangements may be made ahead of time to avoid delay.
DEVELOPMENTS: The Federal Government has commenced deepening the channel to 42 ft., widening up to 400 ft., and enlarging the turning basin to 1,200 ft. Anticipated completion date 1996.

One new liquid cargo dock, 42 ft. depth, out for construction bids.

One new heavy lift/dry bulk dock, 42 ft. depth, for construction 1996.

The Port of Brownsville/Mexico International Truck/Rail Bridge Project is awaiting Presidential Permits from the U.S. and Mexican Federal Governments. Funding for the project is in place.
AUTHORITY: Brownsville Navigation District, Port of Brownsville, P.O.Box 3070, Brownsville, Texas 78523-3070, U.S.A. *Tel:* (512) 831-4592. *FAX:* (512) 831-5006. *Contact:* C. James Kruse, Port Director. E.E. Cockrill, Deputy Port Director – Marine Services. Rey Ramirez, Harbour Master. Judy Adams, Foreign Trade Zone Manager.

BRUNSWICK, Georgia: 31.09 N. 81.30 W. (See Plan)

DOCUMENTS:
- Crew Lists: 1 certified copy for Immigration; 2 copies uncertified for Customs.
- 1 copy Pratique.
- 3 copies Inward Customs Manifests.
- 3 copies each Stores, Curio & Narcotics List.

APPROACHES: The harbour is located about midway between Savannah and Jacksonville. The harbour is reached by a channel from the Atlantic Ocean, running between St. Simons and Jekyll Island. The channel has a minimum width of 500 ft. and a depth of 32 ft. to St. Simon's Sound, thence a width of 400 ft. and a depth of 30 ft. to Sidney Lanier Bridge, where the channel divides, 13 miles from sea. The Northern branch leads to Lanier Dock, State Dock and the city, 400 ft. wide and 30 ft. deep. The other branch leads N.W. to the pulp plant dock, chemical docks and electrical generating plant, 300 ft. wide and 30 ft. deep.
PILOTAGE: Compulsory. 24-hour Pilot service arranged by Agent with 48 – 24 hour prior notice from ship. Pilot boards vessel day or night approximately 1 mile outside "STS" Buoy (Lat. 31° 03' 20" N., Long. 81° 15' 20" W.). Distance to East River Terminals is 13 miles. Pilot contacted on VHF Channels 12, 14 and 16. Pilot boat is 25 ft. white hull. Marking is "Pilot" on hull.

Brunswick Bar Pilots' Association, 411 Arnold Road, St. Simons Island, Ga. 31522. Tel: (912) 638 2380.
ANCHORAGES: 3 miles S.E. of Buoy "STS", sand and mud bottom. In event of deep draft (30 ft.) and high winds, anchorage obtained near Ocean Buoy "2B" and inform Pilot as in "Pilotage". Vessels in need, or for other good reason, may anchor in St. Simon's Sound, depth 10 fathoms.
RESTRICTIONS: Vessels with a draft of 28 ft. may enter at any time and over 28 ft. on flood tide. Max. size vessel is Panamax. Vessels with draft of 34 ft. may proceed to or from Colonel's Island on high tide. Vessels with 30 ft. draft berth in the East River on high tides. Tidal range 6 ft. – 8 ft.
MAX. SIZE: Max. permissible length 650 ft. Max. d.w.t. over 33,000 tons.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Prior arrival, use Commercial Lantana, Chatham Radio for advices to Agent, 48-24 hours in advance.
TUGS: Tugs join vessel near Sidney Lanier Bridge if inbound fo East River and Mayor's Point Terminals and just West of Lanier B if bound for Colonel's Island. Harbour pilot on board vessel carrie the docking manoeuvre with tugs. 3 small tugs (500 h.p.)
BERTHING: 1,600 ft. continuous marginal wharf; steel and con construction, 57 ft. wide apron. Vessels normally turned to moor side alongside unless deck cargo or other vessel obstruction m cargo may not be worked over port side. Gantry crane of 27 tons cap available.

The Brunswick Port Authority operates a bulk commodity termin Lanier Dock. The facility is 500 ft. long and constructed of steel concrete, with a project depth of 30 ft. MLW (mean low water), equi with a grab bucket, conveyors and marginal tracks for handling cargoes at rates up to 600 t.p.h. It operates covered warehouses a capacity of approx. 60,000 tons. A limited amount of open sto space is available equipped with a conveyor system and reclaim facil Lanier Dock lies directly adjacent to the Brunswick State Docks warehouses. Both wharves have a turning basin of 1,000 ft. in le and 600 ft. wide with a project depth of 30 ft. MLW also Barge facility 250 ft. long.

Colonel's Island: Multi-product dry bulk facility. 1×2,400 t.p.h. trav ship-unloader, outreach 100 ft. Length of berth 600 ft. Storage 135,000 sq.ft.

Mayor's Point: 3 berths. Total length 1,500 ft. 235,000 sq.ft. of t sheds and 5 acres of open storage.
BRIDGES: Lanier Bridge lift bridge; 235 ft. horizontal clearance bet fenders, 139 ft. vertical clearance in up position at HW. Vessels u control of Pilot and tugs when passing through.
STEVEDORES: Radio to Agent 48-24 hours prior arrival with nu of gangs, working hatches and space in hatch, and special fa e.g. pilferable cargo, autos, heavy-lifts, etc.
MEDICAL: Advance notice to Agent, or notify on arrival.
TANKERS: Liquid bulk cargo is pine oil distillates loading. Petro storage 310,000 barrels, 3 tanks.

Outward Passage – Cautionary Advice: The berth is located just up from the Sidney Lanier Bridge.

In view of the short distance to the bridge and the fact t considerable course alteration must be made to port just before rea the bridge, it is essential that the ship is properly lined up on the b before proceeding into the bridge passage.

It is advisable that the Master acquaints himself with the Pilot's for the approach and passage of the bridge.

An anchor party should be standing by and anchors should be to let go. Special attention should be given to make certain tha helmsman accurately follows the Pilot's orders.
DENSITY: Average 1016 (high) to 1014 (low). Water inside consi brackish.
FRESH WATER: From shore connections at 20 t.p.h.
FUEL: Bunker "C" available at piers. Distillate and blends by bar required. 72 hour advance notice to Agent, giving type and quant
CONSULS: None. Consulates at Savannah, Ga., and Jacksonville may be used as required by vessel.
REPAIRS: Limited to minor replacement parts to engine, radio, ra standard makes. Major repairs may be arranged with shipyar Savannah or Jacksonville.
DRY DOCKS: None.
SURVEYORS: American Bureau of Shipping (912) 232-3793. A Marine Surveying, Inc. (912) 354-9938. Coleman, Kenney & Sila (912) 352-7420. International Adjusters Southern Ltd. Stone, Sand and Dry Bulk:
Gateway Metroport: Operator: Gateway Trade Centre, Inc.
Dock Length: 3,900 ft. Depth: 26 ft. Storage Capacity: (West side) Coke - 40,000 tons; salt – 25,000 tons; steel – 100,000 tons. (East side) stone - 300,000 tons; steel – 200,000 tons; salt – 300,000 tons. Loading Equipment: (West side) 1×100 tons movable crane; 2 portable conveyors (800 t.p.h. each). (East side) 1×100 tons movable crane and 1×230 tons gantry crane. Rail alongside entire dock. Short line service with connections to all Class 1 railroads.
SPECIALISED CARGO HANDLING FACILITIES: A mobile gantry crane capable of handling lifts of 55 tons at 40 ft. and portable bulk conveyors. Crawler crane, capacity 230 tons. Conveyor, capacity 2,200 t.p.h. Additional heavy lift equipment available from the Port of Buffalo and commercial sources.
STEVEDORES: Gangs to be ordered by 1700 hrs. for 0800 hrs. start following day, ample gangs available.
MEDICAL: U.S. Public Health Outpatient Clinic as well as numerous hospital facilities.
DENSITY: Fresh water.
FRESH WATER: Available at most berths.
FUEL: All grades available by tank truck delivery or by harbour tank barge.
CONSULS: Canada, Costa Rica, Ecuador, France, Germany, Italy, Mexico, Netherlands and Sweden.
REPAIRS: Machinery and above-water repairs available.
AIRPORT: 5 miles, served by 4 regular airlines.
SHORE LEAVE: No restrictions when cleared by U.S. Immigration Officials.
GENERAL: Refer to "Great Lakes Pilot".
AUTHORITY: Gateway Metroport, 2544 Clinton Street (P.O.Box 880), Buffalo, NY 14224. *Tel:* (716) 826-7310. *FAX:* (716) 826-1342. *Contact:* Fred W. Finger, Port Director.

BURNS HARBOUR, Indiana: 41.38 N. 87.11 W. (See Plan)

The entrance to Burns International Harbour is at Lat. 41° 38' N., Long. 87° 11' W., and is located on the South shore of Lake Michigan at Portage, Indiana, some 30 miles East of Chicago in an area known as the Indiana Dunes.
PILOTAGE: Compulsory.
RESTRICTIONS: Average Navigation Season: Domestic cargo by lake freighters – March 15th to February 1st. Ocean going vessels via Seaway – April 1st to December 15th. Lake river barges – 12 months.
Approach to Harbour: Controlling depth of water at harbour entrance 30 ft., entry is from deeper water. Length and beam limitations – none. Approach open 24 hours per day.
Harbour: Controlling depth of water for outer harbour 28 ft.; East and West harbour arms 27 ft. Turning basin – 1,600 ft. radius with water depth of 28 ft. Accessible 24 hours a day. Length and beam limitations – none.
MAX. SIZE: Max. draft 8.22 m. (27 ft.).
VHF: Port on Channel 16.
TUGS: Available if required.
BERTHING: General Cargo, Ro-Ro and Bulk: 9 berths for vessels up to 230 m. (755 ft.) in length; depth alongside 8.22 m. (27 ft.).

Liquid bulk and containers also handled at these berths.

Tankers: 114.3 m. (375 ft.) barge berth, and 198.11 m. (650 ft.) ship berth.

Storage/Warehousing: Warehouse storage capacity of 13,560 sq.m. (146,000 sq.ft.) for general cargo; 2 dry bulk storage buildings of 5,600 sq.m. (60,000 sq.ft.) and 19,500 sq.m. (210,000 sq.ft.), or 60,000 tons and 150,000 tons respectively; open storage area of 7.3 ha. (18 acres); grain elevator storage capacity of 176,196 cu.m. (6,222,360 cu.ft.); refrigerated storage capacity of 465 sq.m. (5,000 sq.ft.).
Equipment:
1×300 ton 4600 W. Manitowoc.
4×240 ton Manitowoc.
2×150 ton 4000 Manitowoc.
1×80 ton 318 link belt.
1×60 ton 3900 Manitowoc.
1×40 ton wagon crane.
Buckets: 1×26 cu.yd.; 1×22 cu.yd.; 2×21 cu.yd.; 1×11 cu.yd.; 1×10 cu.yd.; 1×6 cu.yd.
6×72 in. magnets.
3 grapples.
14 caterpillar loaders.
2 D6 caterpillar bulldozers.
3 light loaders (bobcats).
24 forklifts.
1×100 ton Winslow truck scale.
1×60 ton Cardinal truck scale.
Loading conveyors: 42 in × 130 ft. portable belt type; 3 tractors with 3 low-boy 100 ton trailers; 3×100 ton dump trailers; specialised gear for heavy-lift or project cargo on site.

MEDICAL: Porter Memorial at Valparaiso.
TANKERS: See "Berthing".
DENSITY: 1000.
FRESH WATER: Available.
FUEL: Available.
CONSULS: See "Chicago".
REPAIRS: Facilities available.
AIRPORT: Chicago (O'Hare International) and Gary Regional.
HOLIDAYS: *Port Holidays:* New Year's Day; President's Day; Good Friday; Memorial Day; Independence Day; Labor Day; Election Day; Veteran's Day; Thanksgiving Day and Christmas Day.
SERVICES: Launch service, provisions, gyro/radio repairs, surveys, dirty ballast, garbage collection.
AUTHORITY: Burns International Harbour – Port of Indiana, Indiana Port Commission, 150 West Market Street, Suite 603, Indianapolis, IN. 46204, U.S.A. *Tel:* (317) 232-9200. *Telex:* 510-601-4224.

Port of Indiana – Burns International Harbour, 6600 U.S. Highway 12, Portage, Indiana 46368, U.S.A. *Tel:* (219) 787-8636. *FAX:* (219) 787-8842. *Contact:* James H. Hartung, Port Director.

BURNSIDE, (including Convent and St. James), Louisiana: 30.08 N. 90.55 W. (See Plan)

Also see "South Louisiana".
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Normally required, see "Tankers".
BERTHING: Bulk Marine Terminal: Berth 877 ft. long, 45 ft. depth.

Ormet Corporation: Situated at Mile 170 AHP. Max. LOA 305 m. Max. beam 41 m. Max. draft 12.19 m. (60,000 d.w.t. or 130,000 d.w.t. part load) 2 travelling gantry cranes (1,000 t.p.h. each) and 1 shiploader (1,500 t.p.h.). Height above LWL 27.5 m., outreach 19.2 m. Travel 198 m. Loading rate 600 – 1,000 t.p.h.

Rogers Terminal and Shipping (Cargill Inc.): Floating feed transfer facility at Convent. 330 ft.×75 ft. Loading rate to vessels 1,300 t.p.h.

TANKERS: *Shell – St. James:* The facility is located on the West bank of the Mississippi River at Mile 160 above Head of Passes (AHP).

There are 2 berths, one of which is 800 ft. long and the other 1,100 ft. long. At the newer dock there are 2×16 in. arms and the berth is capable of unloading 28,000 bbls.p.h.

The depth alongside these berths is 55 ft. to 60 ft. However, the draft of the vessel is limited to that available at Southwest Pass.

It is important to note that due to the design of this terminal it is impracticable for vessels to receive stores at this location. Additionally there are no bunkers provided at this terminal nor is there any fresh water available from the terminal and there is no authorised anchorage in the immediate area of this facility. Vessels expecting less than 24 hours delay awaiting berth are generally anchored at New Orleans and then proceed to the terminal (which is a different port of entry for Customs) otherwise vessels would have to anchor at Burnside which is about 10 miles up river from St. James.

Because of an underwater pipeline near the dock, the terminal management requires all vessels using their facility to have at least 1 tug of 1,800 h.p. to assist in docking and undocking.

As a point of reference it generally takes approximately 15 or 16 hours transit from Southwest Pass to St. James Terminal for most vessels.

Texaco – Convent: The Texaco Dock is located 167 miles AHP. The berths are located near the edge of the navigable channel and interaction caused by downbound laden vessels can result in excessive surge by deeply loaded vessels docked alongside.

Current in the river at this location varies between 3 and 8 knots, depending on the height of the river.

The docks are located near an area of revetment, therefore anchors should not be used while alongside.

Cargo Handled and Shore Installations: Berth No. 1 handles mainly clean products and petrochemicals, e.g., aviation gas, jet fuel, unleaded gasoline, hi-test gasoline, etc., and serves mainly as a loading dock.

Berth No. 2 handles clean as well as dirty products including crude oils, charge stocks, petrochemical feed stock, furnace and fuel oils, etc. This dock both ships and receives cargoes.

All cargo transfer is made through 12 in. Chicksan arms which are bolted at the ship's manifold. Maximum rail pressure for discharging vessels is 125 p.s.i.

An emergency loading stop control is located in each dock house and portable unit is provided for vessels docked at the berths.

Docking: Docking is always performed by the River Pilot or Docking Master, with the aid of at least 2 tugs. 2×1,800 h.p. tugs are required for vessels up to 60,000 d.w.t. docking and undocking, vessels larger than 60,000 d.w.t. are required to use 3×1,800 h.p. tugs for these operations. Approach is made parallel to the berths, stemming the current with 2 or 3 tugs on the port side. Mooring lines, either wire or synthetic, are run to mooring dolphins by boat.

At least 12 mooring lines are required for all vessels, i.e., 2 head lines, 2 stern lines, and a combination of 4 breast and or spring lines, depending on available leads, both forward and aft.

Nylon messengers or heaving lines are not permitted and will be refused by line handlers in the boats or on the docks.

Bunkers and Fresh Water: Bunker-C and fresh water are available upon request; however, no barges are allowed alongside vessels at any time.

Ballast/Slop Facilities: A maximum of 10,000 bbls. of oily slops may be discharged ashore for storage/treatment.

DENSITY: Fresh water, 1000.

FRESH WATER: Available ex-berth.

FUEL: Not available.

NOTICE:

Agent to Shipmaster:

Vessels over 100,000 Summer Deadweight:

This is to advise you that the Pilots will not allow your vessel to transit outbound between Pilottown and Southwest Pass during darkness hours if your vessel is at a draft in excess of 35 ft. fresh water upon arrival at Pilottown outbound. The times involved are from 1600 hrs. until 0700 hrs. the next day.

We feel certain with various ballasting procedures you will be able to comply with this draft upon reaching Pilottown even though you may leave the *St. James Berth* at a greater draft. If you cannot comply, please advise your Agent boarding with this letter in order that he may inform all parties interested.

By anchoring at Pilottown you will be costing yourself an additional $3,500 minimum in tug and Pilot expense. Therefore, we sincerely require your utmost co-operation.

SHIPMASTER'S REPORT: February 1979.

Location: St. James – West Bank.

Documents: Ship's stamp on cash receipts.

Anchorage: Usually at Grandview in the Customs District of Gramercy, where launch service available and about 1 hour's drive to New Orleans.

From Capline (St. James) about 45 minutes' drive to Baton Rouge.

VHF: All berthing and river pilotage on Channel 13.

Tugs: 3 tugs recommended.

Berthing: Always port side to. No shore gangway, moorings 4, 2, 2 each end for tankers of 100,000 d.w.t. and upwards.

Cranes: Not available.

Tankers: Require ship's gangway at Berth No. 2.

Consuls: Honorary British Consul at New Orleans. (321 St. Charles Avenue). Open 1000 hrs. – 1200 hrs. and 1400 hrs. – 1600 hrs.

AUTHORITY: Port of Greater Baton Rouge, P.O.Box 380, Port Allen, Louisiana 70767, U.S.A. *Tel:* (504) 342-1660. *FAX:* (504) 342-1666. *Contact:* Gary C. Pruitt, Executive Director.

Burnside Bulk Marine Terminal, P.O.Box 25, Highways 44 22, Burnside, Louisiana 70738. *Tel:* (504) 473-0793. *Contact:* Dan Hales, Vice-President and General Manager. Glenn Schernayer, Sales.

The Port of South Louisiana, 152 Belle Terre, P.O.Box 909, La Place, Louisiana 70069-0909. *Tel:* (504) 652-9279, 568-6269. *FAX:* (504) 652-9518. *Contact:* Virginia D.Simons, Assistant Port Director - Economic Development.

Note: The Port of South Louisiana has jurisdiction from River Mile 114.9 A.H.P. to River Mile 168.5 A.H.P. which area includes St.Charles, St.John the Baptist and St.James parishes.

CAPE COD CANAL, (including Sandwich Oil Termina Massachusetts: (See Pla

The Cape Cod Canal is a sea-level canal, extending from a point Cape Cod Bay about 50 miles S.E. of Boston Harbour, Mass., Cleveland Ledge Lt., Buzzards Bay, Massachusetts.

PILOTAGE: The Corps of Engineers, Department of the Army , do not maintain pilot service but independent Pilots, licensed by the U Coast Guard, are usually available at the canal.

Pilotage is compulsory and available 24 hours.

Pilot boards:

1. East Entrance: Position Lat. 41° 47.9' N., Long. 70° 28.5' midway between the Sea Buoy and the breakwaters.
2. West Entrance: Near West end of Cleveland Ledge.
3. By special request: Near Brenton Reef Light (Lat. 41° 25.6' Long. 71° 23.4' W.) or 2 nautical miles South of Point Judith Light Bu No. 2 in position Lat. 41° 19.2' N., Long. 71° 28.5' W.

Pilots are available from the following associations:

Northeast Marine Pilots Incorporated, Newport, Rhode Island (T 401-847 9050 (HJ), 401-331 4824 (HN) and 800-274-1216).

Interport Pilots Associates. Tel: 201-291 1310 and 800-346-4877,

Boston Pilots, East Boston. Tel: 617-569 4500.

Associated Coast Pilots. Tel: 201-887 7114.

Association of East Coast Pilots. Tel: 609-435 1239.

NAVIGATION: Navigators are warned to be on the alert for possi "bank suction" and "bank cushion", the effects of which may caus vessel to take a sudden and decided sheer. Shipmasters are direc to notify the Marine Traffic Controller in advance of entering the chan of any known defects their ship may have which would effect the hand of their vessel in the Canal.

(a) Vessel traffic drawing 25 ft. and over are directed not to enter Canal Channel at the Cleveland Ledge Light entrance and s lay-to or anchor in the vicinity of Buzzards Bay Buoy No.11 (Fl & Bell) until clearance is granted by the Marine Traffic Control

(b) Vessel traffic with drafts in close proximity to the 32 ft. mean water project depth of the Canal should make themselves t aware of the controlling dimensions of the waterway and tra the Canal during the maximum stages of high water at a sp consistent with safe navigation.

Aids to Navigation:

(a) Aids to navigation for the Cape Cod Canal approach chan are under the jurisdiction of the First Coast Guard District, Bos Massachusetts, and are shown on U.S.Coast & Geodetic Sur Charts No. 13230, 13236, 13246 and 13218, and are descri in Department of Transportation, U.S.Coast Guard, "Light Atlantic Coast of the United States, Volume I, CG-158", a amendments thereto.

(b) The channel limits of Cleveland Ledge and Hog Island Chan are defined by buoys. The navigation beacon lights in Hog Is Channel No. 3, 5, 7, 9 and 11, and No. 4, 6 and 8, are loca 125 ft. outside the limits of the channel, in shoal water. Bea lights No. 12, 18 and 20 are located on Hog Island, Basset P and Greenwood Point, respectively, and are South of Southerly limit of the channel as follows: No. 12, 481 ft.; No 100 ft. and No. 20, 90 ft. Beacon Light No. 27 is a fixed ye mercury light located 120 ft. North of the Northerly channel at Canal Station 391 (Canal Administration Area).

Please note: The buoys have since been re-numbered, see Coast and Geodetic Survey Chart No. 13236, for correct num and loctions.

(c) The Canal in the Land Cut Section is lighted at night by La 500 ft. apart, 140 ft. from the edge of the channel and 25 ft. a mean high water. The lights are yellow on the North bank white on the South bank.

(d) Red navigation lights are installed on the lower chords o Bourne and Sagamore Highway Bridges 250 ft. North and S of the centre line to mark the 480 ft. wide channel. Green l denote the centre of the channel.

(e) Immediately preceding the lowering of the Railroad Bridge s the operator will sound 2 long blasts on an air horn. Immed preceding the raising of the span, the operator will sound long blast on an air horn. When the bridge span (nor maintained in an open or raised position) is in a down or low position, during periods of low visibility, there will be 4 blas an air horn on the span every 2 minutes. The navigation (360°) are fixed green when the lift span is in a fully raised po and stay green until the span starts to lower (6 ft. to 8 ft.) it becomes a fixed red. The 4 red flasing lights affixed to th of the bottom chord on both East and West sides of the start flashing when the centre light becomes red and con flash red until the bridge returns to the raised position, wh centre light becomes green.

RESTRICTIONS:

	Width bottom (ft.)
Easterly Entrance (Station -75 to Station -12)	540
Canal Land Cut, (Station -12 to Station 413)	480*
Hog Island Channel, (Station 413 to Station 661)	500
Cleveland Ledge Channel, (Station 661 to Station 880)	700

*Except narrows to 450 ft. opposite State Pier (Buzzards Bay) and through the railroad bridge.

The canal and approach channels have been dredged to the depth of 32 ft. below MLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Alba

RADIO/VHF: Direct communications with the Cape Cod Canal are available at all hours by means of telephone and radio telephone. The telephone number is 508-759-4431. Direct radio communications may be made with the Cape Cod Canal office on VHF radio telephone. Call the Cape Cod Canal office on Channel 13 to establish contact. The radio transmissions will then be switched to Channel 12 or 14 as the working channels to pass information. Channel 16 is also available at the Canal office; however, Channel 16 use should be limited to emergency situations or whenever vessels do not have one of the other above channels.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: The U.S. Army Engineer Division, New England, Corps of Engineers, Cape Cod Canal Field Office does not supply towage service, except in emergency situations

BERTHING: *Mooring Basins:* Mooring basins are located at the East and West ends of the Canal Land Cut.

The East Mooring Basin is located on the North side of the Canal at Sandwich. It is 550 ft. wide and 1,660 ft. long at the line of dolphins and approximately 3,000 ft. in length at the approach to the basin from the Canal channel and has been dredged to a depth of 25 ft. at M.L.W. There are 9 steel mooring dolphins located along the Northerly basin limit, spaced approximately 85 ft. apart.

The West Mooring Basin is located on the S.E. side of Hog Island Channel, Buzzards Bay. It is 350 ft. wide and 2,700 ft. long at the line of dolphins and approximately 4,000 ft. in length at the approach to the basin from the Canal channel and has been dredged to a depth of 32 ft. at M.L.W. There are 7 steel mooring dolphins along the Southerly limit of the basin for a length of 775 ft. Vessels moored at the Sandwich Bulkhead and East and West Mooring Basins shall have sufficient crew aboard at all times to ensure the safety of the vessel.

Small Boat Basins and Channels:

(a) The East Boat Basin located on the South side of the Canal opposite the East Mooring Basin has been dredged to 13 ft. at M.L.W. for 4.3 acres and 8 ft. M.L.W. for 4 acres.

(b) An improved channel, 15 ft. at M.L.W. and 100 ft. in width leads from the N.W. side of Hog Island Channel, abreast of Hog Island, to the existing harbour for small vessels in Onset Bay.

(c) An improved channel, 7 ft. deep at M.L.W. and 100 ft. wide, leads from a point opposite the Easterly end of the West Mooring Basin at approximately Canal Station 435 and extends to deep water in Cohasset Narrows at the approach to Buttermilk Bay. The natural channel leading into Buttermilk Bay is crossed by 2 fixed bridges, having a least horizontal clearance of 25 ft. and a vertical clearance of 6 ft. at M.L.W.

Seasonal Yacht Facilities:

(a) At the Easterly entrance of the Canal in the East Boat Basin, water, fuel, oil and gasoline are obtainable for the convenience of vessels from private sources.

(b) At the West end of the Canal Land Cut, there is a 15 ft. improved channel into Onset Harbour where water, fuel and supplies of all kinds are obtainable from local, private sources.

Coast Guard Station: A U.S. Coast Guard Station is located near the Easterly entrance of the Canal on the South bank.

BRIDGES: 2 fixed span high-level highway bridges and 1 vertical lift railroad bridge cross the canal. The horizontal distance between channel piers is 550 ft. at the highway bridges and 500 ft. at the railroad bridge.

The minimum bridge clearance for the available width of channels are as follows:

	Horizontal Clearance	*Vertical Clearance (MHW)*
Highway Bridges	480 ft.	135 ft.
Railroad Bridge (vertical Lift)	466 ft.	135 ft. (open) 7 ft. (closed)

TANKERS: See "Shipmaster's Report".

GENERAL: *Tides:* The mean tidal range in Cape Cod Bay is 9.4 ft., and in Buzzards Bay it is 4.0 ft. Predicted times and heights of tides for each day of the year can be obtained from the National Oceanic and Atmospheric Administration publication, "Tide Tables, Atlantic Ocean, East Coast of North and South America, (including Greenland)". A Canal Tide book is published annually and is available from the Cape Cod Canal Field Office at Buzzards Bay, Massachusetts.

Currents: Strong tidal currents occur in the Canal. Predicted times and velocities of maximum Eastward and Westward currents and predicted time of slack tide for each day of the year are given in the National Oceanic and Atmospheric Administration Tidal Current Tables publication, "Current Tables, Atlantic Coast of North America".

Cable Crossings: A submarine telephone cable crosses the Hog Island Channel, positioned in a direction of 319° True at a point on the centre line of the channel, 1,000 ft. West of Hog Island Beacon No. 9. The least depth of water over the utility is 36 ft. at M.L.W. Two aerial power cables cross the Canal at Bournedale, 1.2 Statute Miles West of the Sagamore Bridge and have a least vertical clearance of 160 ft. above M.L.W.

Traffic Lights: Red, Green and amber yellow signal lights, visible for a distance of about 2 miles in clear weather, day or night, are located at the following points:

(a) Eastern (Cape Cod Bay) entrance on the South side of the Canal with a mean elevation of 55 ft. above M.H.W.

(b) Western (Buzzards Bay) entrance to Hog Island Channel at Wings Neck, East side of the Canal at a mean elevation of 48 ft. above M.H.W.

Two Way Traffic: Two way traffic through the Canal will be allowed when, in the opinion of the Division Engineer's representative charged with controlling traffic, conditions are suitable.

SHIPMASTER'S REPORT: September 1984.

Sandwich Oil Terminal: 41° 46.3' N., 70° 30.9' W. (See "Plan").

Location: 2,200 m. inside North Breakwater from Cape Cod Bay, South side of Cape Cod Canal.

Max. Draft: 40 ft. (salt water).

Salinity: 1025.

Anchorage: Good anchorage N.E. of Breakwater.

Berthing: Berthing and unberthing only when slack tide.

Berthing port side alongside when arrival from Cape Cod Bay.

Berth must be approached with care.

Ship's gangway to shore.

Derrick rigged to take onboard two cargo hoses 10 in. diameter.

After discharging, vessel to proceed through Cape Cod Canal as there is no turning basin. Max. draft 28 ft. Airdraft 135 ft. when passing 3 bridges.

Vessel can also enter from Buzzard Bay but draft according to Canal Control is 28 ft.

AUTHORITY: Department of The Army, New England Division, Corps of Engineers, Cape Cod Canal Field Office, P.O. Box 1555, Buzzards Bay, Mass. 02532-1555, U.S.A. *Contact:* F.N. Ciccone, Engineer-in-Charge.

CASTLE ISLAND, Alaska: 56.39 N. 133.11 W.

Located in Duncan Canal off Kupreanof Island between Wrangell and Petersburg. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: From sea via Dixon Entrance up Clarence Strait to Guard Island. Under pilotage from Guard Island.

ANCHORAGE: Fair weather anchorage only.

MAX. SIZE: Harbour depth 45 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TIDES: Diurnal range 16 ft. Also see "Berthing".

CUSTOMS: Quarantine and Immigration available from Guard Island. Customs available from Petersburg or Guard Island.

TUGS: From Wrangell, 3 available 500 h.p. each.

BERTHING: Alaska Barite facility: Dolphins and 2 floats. Present facilities limited to about 22,000 ton ships. Loading equipment consists of 1 loading spout for bulk cargo. Production average of 1,000 t.p.h.

STEVEDORES: Sufficient to work ore loading facility 24 hours a day when necessary.

MEDICAL: Facilities available in Petersburg or Wrangell.

REPAIRS/WATER/FUEL: None.

AIRPORT: Charter airplane only.

AUTHORITY: Chromalloy Mining and Minerals, P.O.Box 650, Petersburg, Alaska 99833. *Contact:* D.Brant, Harbour Master.

CHARLESTON, South Carolina: 32.47 N. 79.56 W. (See Plan)

DOCUMENTS:

3 Crew Lists.

3 Curio Lists.

3 Stores Lists.

3 Manifests.

At least 1 copy of Bill of Lading, if provided by shipper, and 1 copy of Parting Crew List.

PILOTAGE: Shipmasters to notify Agent 48, 24 and 12 hours prior arrival at C-2 Buoy. Pilot may be contacted by VHF Channels 16 and 18. Pilot boards on lee side from black-painted launch with "Pilot" painted in white letters on the side. Normally vessel is berthed by Docking Master from tug company.

Charleston Branch Pilots Association: 2 North Adgers Wharf, Charleston. Tel: (803) 577-6695. Monitors VHF Channel 16 and 18A, Channel 14 also available.

Masters please advise ETA and deepest draft and changes in ETA as soon as possible. If no contact is made please announce ETA and draft over the air. Savannah and Cape Fear Pilot Stations will also pass on this information for you.

Pilot vessels: Call sign WZF 7266 "Carolina" 55 ft. length; "Palmetto State" 55 ft. length; "Sis" 37 ft. length.

Pilot vessel when on station guards following frequencies: VHF Channel 16; VHF Channel 13; VHF Channel 18A, 156.95 MHz.

Location of Pilot Station: Charleston C-2 Buoy Lat. 32° 40.7' N., Long. 79° 42.9' W., in 42 ft. of water.

Pilot ladder requirements: Have ladder in good repair, clean and approximately 6 ft. above water. Please provide escort to and from bridge. Personal portable VHF transceivers are carried by Pilots.

Distances from Pilot Station to all berths approximately:

	Nautical Miles
Union Pier	12
Columbus Street	12.5
Exxon Dock	14.5
Wando Terminal	14
Ship Yard River	15 – 16
Navy Yard	16 – 19
Other Oil Docks	19 – 20
State Port Terminals of North Charleston	21
Army Transportation Docks	22
Naval Weapons Station	25
Cainhoy	22.5

ANCHORAGES: Rarely required.
RESTRICTIONS: Only restriction affecting operation relates to channel depth of 35 ft. at low tide.
MAX. SIZE: Can handle vessels 930 ft. long. Present private tanker facilities measure 475 ft. from centre of discharge pipeline to end of dock.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
RADIO: Normal procedure. No special or unusual procedures required.
RADAR/VHF: Services required are handled through Agent.

Tug Companies: Marine Contracting and Towing: 723-7442 Radio frequency Channel (7A).

White Stack Towing: 577-6556 Radio frequency Channel 19A.
Marine operator on Channel 26 VHF.
Weather Station on Channel 39 VHF.

TUGS: Tugs usually join tankers between Cooper River Bridge and Coal Pier, approximately 0.5 miles from dock. Tug lines used. No charge made for this service.

Tugs are required for any vessel docking at or sailing from any state port berth which has a crane.

BERTHING: *Union Pier:* State Pier No. 2: 4 berths. Break-bulk terminal, length 2,470 ft. (752.86 m.) Depth 40 ft. MLW. LASH barge handling capabilities, and 12 acres (48,561 m.) of open storage area.

Columbus Street Terminal: State Pier No. 8. 6 berths. Length 3,875 ft. (1,181 m.) Depth 40 ft. MLW. Terminal handles break-bulk and containers. 1×75 ton gantry crane, 1×50 ton gantry crane and 1×150 ton gantry crane serve 1,940 ft. of berthing space along the South end of the pier. 1×90 ton truck crane and 3×40 long ton container cranes.

North Charleston Terminal: State Pier No. 15: Total length 2,500 ft. 3 container berths, 6 container cranes, one grain elevator, capacity 1.5 million bushels. 131 acres open container support space.

Wando Terminal: 4 container berths, total length 3,800 ft. 4 container cranes each 40 tons capacity, 3 Morris container cranes and 2 IHI container gantry cranes. Depth 40 ft. MLW. Paved container storage area of 126 acres.

BULK HANDLING FACILITIES: *Shipyard River Coal Terminal:* Operator: Massey Coal Terminal Corp. Max. size: 50,000 d.w.t. Max. draft 38 ft.

Accommodation includes a single ship berth at the confluence of the Shipyard and Cooper Rivers. The pier is served by a travelling and shuttling shiploader with telescopic chute, which has a maximum capacity of 2,500 t.p.h. and loads at an average of 1,650 t.p.h.

CRANES: 1×40 ton, 1×90 ton, and 2×140 ton mobile cranes are available to work any Port Authority Terminal.
BRIDGES: *Cooper River Bridges Specifications:* Main Channel Span: 150 ft. above MHW at Centre Line, 750 ft. horizontal.

Town Creek Span: 135 ft. above MHW at Centre Line, 750 ft. horizontal.

STEVEDORES: *Working Hours:* Labour may be ordered for work to start at the following times: 0800, 1000, 1200 and 1900 hrs. Labour will usually work as long as necessary; shift system not used in this port.
MEDICAL: Advance notice when possible.
TANKERS: *Private Facilities:* Discharge lines all 8 in. dia. and 1 solvent line 8 in. Adapter to conform to ship's discharge lines supplied. Draft not to exceed 35 ft. low tide. Tanker berths operated by Humble Oil, Shell Oil, Hess Oil, BPT, and Phillips Petroleum, all suitable for 35 ft. draft. Gulf Oil Berth, max. draft 30 ft. Texaco Berth, max. draft 32 ft.
Report: *Exxon Terminal:* The berth, located 14.5 miles from the Sea Buoy, is of marginal type construction, and traffic passes in close proximity to the facility. Passing traffic combined with tidal conditions experienced on ebb tide require that a vessel be moored as follows:

Vessels arriving at the Port of Charleston with a draft in excess of 33 ft. (salt) are scheduled to commence channel transit 2 hours after LW slack at the channel entrance. This schedule allows the vessel to berth and be fully secured prior to the start of the strong ebb current out of Shipyard Creek. (See Chart: U.S. 11524).

On arrival, the vessel is breasted into the berth port side to, and 1 forward spring run to assist in spotting and maintaining vessel's position.

With vessel positioned, attending tug will work bow of vessel in. Once an angle of 5° is attained, vessel will then run 5 head lines and 3 forward breast lines. Efficient stoppers shall be available to "stop off" mooring lines during transfer from winch to bitts without loss of tension. With aforementioned lines all fast, attending tug will then work stern of vessel in; any required adjustment of head and/or breast lines to attain equal tension on all leads shall be undertaken during this period. With vessel in position, an additional forward spring line will be used. Recommended stern leads are as follows:

(a) 2 spring lines. (b) 2 breast lines. (c) 3 stern lines.

Mooring lines are to be kept taut during cargo transfer. Any required slacking of head lines shall only be attempted during flood tide. Vessel to consult tide tables for times of HW and LW. Also see "Plan" for mooring arrangements.

Vessels arriving with a draft of less than 33 ft. begin transit approximately 1 hour after LW slack at the channel entrance and follow the same procedures when mooring.

The U.S. Coast Guard has recommended that moored vessels maintain a listening watch on VHF Channel 13 and to pay close attention to moorings while deep draft vessels are transiting the North Charleston and Filbin Creek Reaches. Since maintaining a bridge watch to monitor VHF during the entire discharge is not practicable, nor is it permissible to operate radio equipment at any time during cargo transfer, it is suggested that vessels consult with the Agent to obtain advice on expected times of transit of passing vessels. Prior to vessels passing, crews should exercise particular care in maintaining a close watch on mooring lines to make certain vessel is alongside and mooring lines are in taut condition.

Failure of vessels to moor in a safe and proper manner will result in terminal's refusal to connect cargo hoses. Tidal conditions experienced at the berth require a full deck and engine room watch be kept; failure to comply will result in suspension of cargo transfer.

FRESH WATER: Available via 2.5 in. hose at a rate of 500 bbls.
FUEL: Bunker "C" at API of 14.4 to 16.6 (approx.) and blended Bo Intermediate grades from 1 to 30.
FIRE PRECAUTIONS: Normal precautions.

SHORE LEAVE: Subject to Shipmaster's permission and Immigration Regulations.
DELAYS: Normally, no delays beyond normal time required to disconnect hoses.
DEVELOPMENTS: The main navigation channel has been to 40 ft.

Floating Ro/Ro ramp in operation.

SHIPMASTER'S REPORT: April 1989.
Chart: B.A. Chart No. 2806.
Approaches: Found to be as charted and described in the Pil
Depths: Controlling depth in Charleston Harbour is given by (See "Developments" above).
Pilotage: Pilots require a minimum of 2 hours notice of ar departure. Radio signals show 2 days notice required.

Pilot Office monitors VHF Channels 16 and 18A and capable Channel 14.

Pilot vessels guard VHF Channels 16, 13 and 18A.
Pilot station is at the Sea Buoy with Racon 'K'.
Pilot ladder to be rigged 8 ft. above the water.

Pilots board from a large launch and request a speed of about 7 knots, instructions will be given for any special requirements due to weather conditions.

Pilots leave either in the buoyed channel or at the Sea Buoy depending on weather conditions and entering traffic.

The dock Pilot boards from a tug.

Sea Pilot will leave by launch and will request a pilot ladder to be rigged.

Tugs: When going to Shipyard River Coal Terminal, tugs will join the vessel just above the fixed bridges.

Berth: The Shipyard River Coal Terminal is on the South side of the entrance to Shipyard Creek, and is marked on the chart as dolphins (Dns).

The face of the berth is well fendered and long enough for this vessel to be loaded without shifting.

Accommodation ladder can be used at high water when light, but due to the dockside saveall and discharging conveyor belt, it is difficult to land on the dockside, so a short brow is required for access at most times.

Ship's cranes will reach over the conveyor belt for storing, and access for trucks is good.

Mean tidal range is given as 5.2 ft. (1.6 m.), but it is as much as 2.0 m. at Springs.

The dockside fenders are above the maindeck level when loaded at low water and for this reason every effort should be made to complete on high water or considerable damage could be done to shipside rails, tank vents and timber stanchions. Possibly this could be considered not a safe berth according to the Charter party, at low water.

The foreman advised that vessels had been loaded to 38 ft. on the Coal Berth and that dredging was expected to increase this to 40 ft. at high water. There is therefore adequate water at all states of the tide for this vessel.

Berthing: Vessel berthed starboard side to, turning with tug's assistance inside the Shipyard Creek.

One line boat is in attendance, taking lines first to the forward dolphins and then coming aft for the stern lines.

Similar procedure for departure, letting go the head lines first then the stern lines.

Loading: Loading is by chute on a movable gantry and as mentioned before, all hatches can be loaded without shifting. Loading capability is about 600 tonnes per hour.

Cargo: All available cargo was loaded.

Stoker coal stowing at 52/53 cu.ft./ton (1.4498/1.4776 cu.m./tonne).

Total cargo loaded by shore weights 6755.556 tonnes.
by draft survey 6761.71 tonnes (Ship's figure).
6760.28 tonnes (Surveyor's figure).

The Surveyor's figure was used for the Mate's Receipt and Bill of Lading.

Hold distribution:

	Pre-stow Estimate	Actual	Slack	Possible Max.
No. 1	1531	1624.28	Nil	1624.28
No. 2	1800	1639.94	181	1820
No. 3	1800	1778.43	43	1820
No. 4	1697	1717.63	Nil	1717.63
Totals	6828	6760.28		6981.91

Pre-stow estimates were calculated using the untrimmed grain capacities of the holds, charter party calling for spout trimmed stowage.

Hold No. 4 was filled giving a stowage factor of 1.46 cu.m./tonne (52.37 cu.ft./ton). Foreman's estimate of space remaining in Hold No. 3 was 40 tonnes and in No. 2 170 tonnes, working on the stowage factor from Hold No. 4, these holds would take 1820 tonnes, being close to the Foreman's estimate.

Estimating Hold No. 1 with the same stowage factor, it would take 1550 tonnes, however this hold was filled and shore weights of 1624.28 tonnes were given, a stowage factor of 1.393 cu.m./tonne (49.86 cu.ft./ton). Either the shore weights are incorrect or there is an overestimation of the void space left in Hold No. 1. This is likely as the distance to the fore and after ends of the hold are shorter than in Holds No. 2 and 3 and the fore end has less width, but the same percentage loss is used as for the larger hatches although Hold No. 4 also with shorter ends but less taper has a smaller percentage loss. Therefore estimate that in future 6,982 tonnes of this coal could be loaded and the arrival draft of 21 ft. maintained with full bunkers at Charleston.

Fresh Water: Available from the berth, but delivery is reported to be slow.

Services: All services expected in a United States port are available.

AUTHORITY: South Carolina State Ports Authority, Port of Charleston, 176 Concord Street, P.O.Box 817, Charleston, South Carolina 29402. *Tel:* (800) 845-7106. *FAX:* (803) 577-8616. *Cables:* SC Portsauth. *Contact:* W. CHICAGO, Illinois: 41.50 N. 87.45 W. **(See Plan)**

DOCUMENTS:

For Agent in Montreal:

3 unfreighted copies of Complete Manifest for Seaway Toll purposes, covering all cargo to be discharged in the Great Lakes.

In first U.S. port: a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
- 1 set Manifest of Cargo for first U.S. port.
- 4 Stores Lists.
- 4 Personal Effects Lists.
- 4 Firearms and Ammunition Lists.
- 4 Crew Lists, Form I-418.
- 4 Narcotics Lists.
- 4 Vessel's Itinerary Lists.
- Vessel's Registry and copies of Paid Tonnage Tax Certificates.
- Health Pratique.
- Clearance from previous port.
- 2 sets Bills of Lading.
- 3 copies Stowage Plan.

In subsequent U.S. ports the following are required:
- 5 sets Manifest of Cargo for that port.
- The "Traveller" and Permit to Proceed issued in previous port.
- 2 Stores Lists.
- 2 Personal Effects Lists.
- 2 Firearms and Ammunition Lists.
- 2 Crew Lists.
- 2 Narcotics Lists.
- 2 sets Bills of Lading.
- 3 copies Stowage Plan.

PILOTAGE: Compulsory unless Master holds Exemption "B" Licence. 24 hours' notice of arrival required by Agents who arrange Pilot.

ANCHORAGES: In Chicago Harbour, Anchorages A and B designated for merchant ships and marked on charts. In Calumet Harbour vessels should not anchor within 1,000 ft. of the breakwaters.

RESTRICTIONS: St. Lawrence Seaway navigation season approx. from April 1st to December 15th. Controlling depth 27 ft.

Inland waterways to New Orleans open 12 months.

MAX. SIZE: Limited at Seaway Locks. 740 ft. length, 26 ft. 03 in. draft and beam 78 ft. Depth alongside terminals 27 ft.

Inland waterway handles barges with draft 9.0 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port can be contacted by Illinois telephone station WAY. Vessels are required to give notice on radio upon entering Calumet River.

Notice of Arrival: Master must give at least 24 hours' notice to Commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S.A. discharge port is required.

TUGS: Available, not compulsory and not required at Iroquois Landing Terminals, but recommended for downriver transit to Lake Calumet berths.

BERTHING: *Calumet River Terminals:* Iroquois Landing Lakefront Terminals. Operator: Ceres Marine Terminals. Facilities at the mouth of the Calumet River. Handles general cargoes, steel products and containers. The terminal has 3,000 ft. of berthing space. Heavy lift cranes run from 75 tons to 140 tons in capacity. Also numerous lift trucks, with capacities to 46,000 lb.

2×100,000 sq. ft. terminal warehouse facilities. 90 acres of the 194 acre site has been paved and set aside for maritime operations adjacent to the 3,000 ft. of berthing space on the South side of the Calumet River entrance at Lake Michigan.

Federal Marine Terminals Inc. handles general cargo, steel products and containers. This facility has 730 ft. of berthing space, 34,000 sq. ft. of covered storage space and 11 acres of open storage space. Heavy lift cranes at Federal Marine range from 20 tons to 150 tons. Lift truck capacities range up to 52,000 lb.

KCBX Terminals Co. on the Calumet River specialises in handling, storing and distributing raw materials or dry bulk commodities. KCBX's twin bulk loading facilities offer 2 deep-water berths, each more than 700 ft. long. The facility has railroad yards that accommodate 2,200 rail cars adjacent to the dock. The twin loading towers provide fast handling at up to 2,500 t.p.h.

Lake Calumet Terminals: Stolt Terminals (Chicago) Inc. in Lake Calumet transfers liquid bulk cargoes – animal fats, vegetable oils and chemicals. Stolt Terminals has 600 ft. of berthing space, with storage capacity of more than 750,000 barrels and 16,000 sq. ft. of drumming warehouse space. This facility has a transfer capacity of approximately 200 t.p.h. Stolt also has 5 miles of internal railroad trackage and a switch engine.

Ceres Terminals (North), Inc. at Lake Calumet handles steel, ores, pig iron, scrap and containers. The terminal was designed for easy interchange of cargoes to and from deep sea vessels. Mississippi River barges, Great Lakes vessels, railroads and trucks – both local and interstate. Truck and railcar weighing services are available also. Ceres has 1,500 ft. of berthing space; 45,000 sq. ft. of covered storage and 27 acres of open storage. Heavy lift equipment includes 5 cranes ranging from 125 tons to 150 tons. Lift truck capacities range up to 50,000 lb. per unit.

Reserve Warehousing, Inc. in Terminal sheds 2 and 3 on Lake Calumet has 100,000 sq.ft. of general covered storage with access to additional 68,000 sq.ft. Equipment includes lift trucks to 52,000 lbs. capacity, cranes 100 tons – 150 tons; 1,000 ft. of berthing for deep-draft vessels and inland barges. Speciality in steel, non-ferrous metals, lumber, pulp and general cargoes.

Emesco (Dockside) Terminals warehousing and marine terminal facilities on Lake Calumet are designed for efficient handling of steel, machinery, containers, scrap, pig iron, ferro-alloys and other metallic bulk commodities. Emesco's 800 ft. of heavy duty bulkhead and

2×75 ton gantry mounted cranes operating over 3,700 ft. of tracks provide more than 1,000,000 sq. ft. of open storage under cranes. Emesco has 100,000 sq. ft. of heated warehouse. Other features are 25 acres of open storage, miscellaneous auxiliary cranes, an electronic truck and rail scale, 25,000 ft. of railroad track, ship to barge transfer.

Port District operates Foreign Trade Zone No. 22 for warehousing, storage and distribution. 526,000 sq.ft. covered warehouse and 36 acres of open storage area have FTZ designation.

BULK HANDLING FACILITIES: Continental Grain Company's Elevator "B" on the Calumet River has a storage capacity of 6,800,000 bushels. Elevator "B" has 5 loading spouts with a shipping capacity of 40,000 bushels per hour. Unloading capacity from barges is 15,000 bushels per hour. Receiving capacity from rail cars is 10,000 bushels per hour and from trucks 15,000 bushels per hour. The berthing space at Elevator "B" is 1,025 ft.

The Cargill Inc. grain elevator on the Calumet River has a capacity of 23 million bushels. In addition to grain, this facility handles salt, molasses, and grain by-products. Cargill has 3,600 ft. of berthing space – 1,200 ft. of this for elevator use, and 20 acres of open storage. Loading capacity is 60,000 bushels per hour, while unloading is 12,500 bushels per hour. Cargill has 3 marine legs, and 5 loading spouts.

The Gateway Elevator of the Countrymark Co-Operative at Lake Calumet offers storage capacity of 7,500,000 bushels for bulk grains. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading speed is 10,000 bushels per hour. Berthing space is 1,000 ft.

Elevator "C" at Lake Calumet has a capacity of 6,500,000 bushels of bulk grain and grain products. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading capacity is 10,000 bushels per hour. This facility has 1,000 ft. of berthing space.

DENSITY: Fresh water.

MEDICAL: Doctors, hospital and all facilities available.

FRESH WATER: Available at most berths.

FUEL: All grades available, ex-wharf, or delivered by barge.

SEAMAN'S CLUBS: Chicago Seaman's Mission, 12800 S. Butler Dr., Chicago, IL 60633. Tel: (708) 758-5460.

COOS BAY, Oregon: 43.22 N. 124.13 W. (See Plan)

DOCUMENTS: Local Port Authority does not require any documents from merchant vessels entering this harbour. This does not preclude United States Customs requirements for documents.

PILOTAGE: No specified amount of advance notice of ETA required. Radio contact may be made on frequency 8182 kHz, also on frequency 2182 kHz. Most used frequency is VHF Channel 16. Pilot will be taken on board at entrance to Coos Bay Channel. No designated anchorages for vessels awaiting a Pilot.

ANCHORAGES: North of Entrance Buoy.

MAX. SIZE: Max. permissible length is 725 ft., breadth 110 ft. A 2 ft. clearance under keel is considered necessary for safe navigation. Vessels entering Coos Bay from sea draw down about 0.166 in. per foot of draft because of difference in density.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

RADIO: Pilots, Agents and stevedores monitor VHF Channel 16.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Pilot vessel acts as Tug. Emergency small harbour tugs available and ship's lines generally used.

BERTHING: *Note:* All berths with the exception of oil berths dredged to 35 ft. in 1979.

'T' Dock: Distance from entrance 6 miles.

Barge Facility: Distance from entrance 6.5 miles.

Roseburg Lumber Co. Dock: Length 1,000 ft. Depth alongside at MLW 38 ft. No fresh water available. Distance from entrance 8 miles.

Ocean Terminals Dock: Length 400 ft. Depth alongside at MLW 39 ft. No dock cranes available. Fresh water available. Distance from entrance 11 miles.

Export Services: Length: (Lumber Dock) 1,433 ft. (Wood Chip Dock) 694 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 12 miles.

Bayshore Dock: Length 504 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13 miles.

Dolphin Terminals: Vessels moor to dolphins adjacent to apron 60 ft. long and 26 ft. wide which is joined to the shore by a causeway length 190 ft. and width 12 ft. Depth alongside at MLW 36 ft. Fresh water available. Distance from entrance 13 miles.

Central Dock: Length 1,380 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13.5 miles.

Portland Dock: Length 576 ft. Depth alongside at MLW 36 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

Coos Bay Dock: Length 1,326 ft. Depth alongside at MLW 37 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

BRIDGES: 2 bridges cross the main ship channel. The Southern R railway drawbridge 9 miles from the entrance and the Coast Hig Bridge 9.6 miles from the entrance. Clearance height of the Hig Bridge is 149 ft. in the centre of the span at MLW. Clearance w swinging railway bridge 197 ft.

STEVEDORES: Should have minimum of 48 hours to arrange Also see "Radio".

MEDICAL: Advance notice of required medical attention is desira order to expedite use of ambulance, if necessary.

TANKERS: 2 tanker berths, Standard Oil and Union Oil Co., dra Tankers discharge into tank farms. Union Oil Co. is the bunkering

FRESH WATER: Available. Cost per ton is negotiable.

FUEL: 24 hours advance notice desirable, both bunker and dies available.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs possible.

DRY DOCKS: Largest dry dock handles vessels not exceeding

GANGWAY/DECK WATCHMEN: Service of watchman at discre ship's Master.

OPENING/CLOSING HATCHES: Normally by stevedores.

REPATRIATION: Repatriation through local Customs and Imm Office.

AIRPORT: All docks within 5 miles of airport. Airport served by airlines.

TIME: GMT minus 8 hours, clocks advanced 1 hour on first Su April, clocks retarded 1 hour last Sunday in October.

HOLIDAYS: All legal holidays observed, plus state-wide elections work through negotiations with stevedore contractors.

POLICE/AMBULANCE/FIRE: Police: Coos Bay 269-1181, Nor 756-3161; Ambulance 756-3234; Fire: Coos Bay 267-4123, Nor 756-6111. Emergencies: Dial 911.

SHORE LEAVE: Crew members allowed ashore except when Directives may be applied to a specific vessel.

IDENTIFICATION CARDS: Not required by local authorities.

SHIP SUPPLY SERVICE: For general ship stores: Day Ship 602 W. Hemlock St., Coos Bay, Oregon 97420. Tel: (503) 267

For transportation of personnel: The Coos Bay Pilots' Ass P.O.Box 254, Coos Bay, Oregon 97420. Tel: (503) 267-4186 the initial contact.

For emergency services the U.S. Coast Guard maintains a squadron in port. They bring sick crew members directly to the Their information phone number is (503) 756-4142, and their e number is 756-4141.

GARBAGE DISPOSAL: See "Agriculture" before first U.S. (Albany). Service available through local contractors. Contact

Coos Bay Sanitary Service. Tel: (503) 267-6675.
Les's Sanitary Service. Tel: (503) 267-2848.
North Bend Sanitation, Inc. Tel: (503) 756-5211.

WASTE OIL DISPOSAL: Service available through local contractor. Contact: Environmental Services, Tel: (503) 269-5050. Services for emergency spills, oil, gas, diesel, bilge cleaning, sewage disposal.

SEAMAN'S CLUBS: The Seamen's Centre of the Port of Coos Bay is a non-profit organisation and is sponsored by thirteen area churches, Local No.12 of the International Longshoremen's and Warehousemen's Union, United Way of Coos County and other donations. The Centre is open every night, including holidays, from 1800 hrs. to 2300 hrs. Each church serves for one week and supplies hosts/hostesses and free refreshments, and transportation between ships and the centre in a fifteen passenger van. Information sheets have been printed in the languages of seamen who call in the port and these are posted on board the ships.

Telephone, postage, local maps, and church services are among the facilities provided, also a games room which includes two pool tables, two table tennis tables, a football table, a table shuffleboard, a bumper pool table and darts. There are also two coin operated video games. A television set, snack bar, table games, magazines, telephones, souvenirs, post cards and foreign language bibles are all available in the "front room".

The Seamen's Center is located at 171 N.Broadway, Coos Bay, Oregon 97420. The mailing address is: P.O.Box 628, Coos Bay, OR 97420.

DELAYS: No delays in berthing, loading or discharging, or bunkering can normally be expected.

GENERAL: New enterprise zone and foreign trade zone within port district.

DEVELOPMENTS: Depth of channel at entrance 45 ft. MLLW. Inner channel, to head of channel 35 ft. MLLW. An additional anchorage (Turning Basin) will be installed, directly East of Beacon 17.

AUTHORITY: Oregon International Port of Coos Bay, Port Building, 326 N. Front Street, Coos Bay, Oregon 97420. *Tel:* (503) 267-7678. *FAX:* (503) 269-1475. *Contact:* Paul W.Vogel, General Manager. Don Yost, Harbour Master.

CORDOVA, Alaska: 60.33 N. 145.46 W. (See Plan)

Located at S.E. side of Prince William Sound at the head of Orca Inlet. Open harbour year round.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: Via Prince William Sound.

PILOTAGE: Compulsory. Pick-up point is Sheep's Point. Prior arrangements required.

ANCHORAGES: Good holding ground. Mud bottom between Spike Island and Municipal dock.

MAX. SIZE: Recommend max. draft 25 ft. Tidal variation: 18 ft. – 19 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Contact port on VHF Channels 16 and 68; Citizens Band, Channel 5 or SSB 2509 kHz.

TUGS: Limited availability. Prior arrangements need to be made.

BERTHING: Berthing Permit required. Advance notice of 48 hours requested.

Municipal Dock: 25 ft. deep, 408 ft. long, 72 ft. wide. Open storage of 10 acres. 1×45 ton crane.

Container and Ro/Ro Facilities: Movable ramp, 4.57 m. wide, available for Ro/Ro operations. 4 ha. container staging area.

STEVEDORES: ILWU No. 66, Box 335, Cordova, Alaska, 99574. Tel: (907) 424-5447.

Working hours – 24 hours.

MEDICAL: 23 bed hospital and a medical clinic, with 3 doctors, 1 dentist also public health nurse.

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

FRESH WATER: Available at docks.

FUEL: No bunker "C" available. Fuel oil available.

CUSTOMS: Quarantine – local. Immigration and Customs from Anchorage, Alaska.

AIRPORT: 13 miles from city centre. Daily scheduled flights to Anchorage and Juneau.

TIME: Alaska Standard time.

HOLIDAYS: None.

POLICE/FIRE/AMBULANCE: All available. Tel: (907) 424–6100.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Dumpsters are provided at the dock. Charges for this service are paid by the port. Collection daily.

WASTE OIL DISPOSAL: Tanker truck available upon request, contact Tel: (907) 424-6400. For quantities under 100 galls. there is no charge. For quantities over 100 galls. which meet standards for oil to be burned for energy recovery, the charges are $40.00 /man hour. If oil is unsuited for energy recovery, then the charges are $30.00/galls. plus $40.00/man hour plus cost of shipping and handling.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: City of Cordova, Box 1210, Cordova, Alaska 99574. Tel: (907) 424-6400. *FAX:* (907) 424-6000. *Contact:* Dale Muma, Harbour Master/Port Director.

CORPUS CHRISTI, Texas: 27.48 N. 97.23 W. (See Plan)

PORT LIMITS: Corpus Christi's port limits include all of Nueces County, which has been officially designated as Port of Corpus Christi Authority of Nueces County, Texas. The Corpus Christi Turning Basin, Avery Point Turning Basin, Chemical Turning Basin, Tule Lake Turning Basin and the Viola Turning Basin are interconnected by the Industrial Canal; the Tule Lake Channel and the Viola Channel constitute the Corpus Christi Inner Harbour. Other Bay points included in the Port of Corpus Christi area are: Harbor Island, the North end of Mustang Island, near the inner end of the Aransas Pass Entrance, and Port Ingleside and La Quinta along the route of dredged deepwater channels on North side of Corpus Christi Bay; and the Rincon Barge Canal System. All of the ship channel has now been deepened to 45 ft.

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Form 1304).
2 copies Stores List (Form 1303).
2 copies Passenger List (Form I–418).
2 copies Crew List (Form I–418).

Customs Boarding Officer will also examine Ship's Register, Load-Line Certificate, Safety Equipment Certificate and Certificate of Financial Responsibility. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's Oath (Customs, 2 copies Form 1300).
General Declaration (2 copies Form 1301).
All Foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilot boards off Port Aransas.

RESTRICTIONS: No restrictions, 24 hour service. The Port of Corpus Christi is situated on the West side of Corpus Christi Bay, in South-Western Texas. Port facilities at Inner Harbour lie along a 9.5 miles stretch of dredged channels and basins about 18 miles from Aransas Pass entrance at the Gulf of Mexico. Channel depth 45 ft., minimum width 400 ft.

Turning Basins: 5 turning basins in the Inner Harbour range from 800 ft. to 1,200 ft. wide and more than 1,000 ft. in length.

MAX. SIZE: Cargo vessels: 45 ft. draft. Tankers: 45 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: KLC ITT-Radio-Arcadia, Texas. KLC RCA-Radio-Galveston, Texas.

VHF: KKQ 769 – Harbour Master – Channels 12 and 16. WR 8879 – Pilot Boat. KQU – Pilot Office – Aransas-Corpus-Christi Pilots Channels 12 and 16. KBP 384 – Harbour Tugs – Channel 12. U.S. Coast Guard – Channels 16 and 22. Pilot Office KQU 371.

TUGS: Tug assistance available. Tugs join vessels berthing at Harbor Island in Jetty channel. Tugs accompany vessels entering Inner Harbour outside Corpus Christi Harbour Bridge.

BERTHING: The Corpus Christi Main Turning Basin is over a mile long and 800 ft. wide. There are 4 additional basins in the Inner Harbour, which extends Westward from Corpus Christi Harbour Bridge for 7.5 miles. The water in all basins, channels and canals is 45 ft. deep.

Draft for public docks will be furnished upon request to the Harbour Master or steamship Agent. Draft for private docks will be furnished upon request to the dock owners or steamship Agents.

Also see "Port Limits".

Inner Harbour – Public Docks: The length limit indicator is not of necessity the max. length for a vessel as larger vessels can berth if adjacent berth is not occupied.

Cargo Docks No.	*Length Limit* (ft.)	*Cargo Docks* No.	*Length Limit* (ft.)
2	700	14 – 15	1,000
8	1,060	Bulk Materials Dock 1	835
9	750	Bulk Materials Dock 2	1,300
10	700	Public Grain Elevator Dock	900
12	700		

Inner Harbour – Private Docks: (Other than oil docks).

Citgo Cargo Dock: Length of pier 450 ft. Length of Head 100 ft. Producers Grain Port Terminal Elevator Dock; Gulf Coast Portland Cement Co. Dock; Berry Contracting Company; Centex Cement Company.

Open Storage Areas: Over 15 acres available on the South side area and over 125 acres located near the North side general cargo facilities.

Ro-Ro Ramp: A Ro-Ro ramp for stern or bow ramped vessels is available between Cargo Dock 9 and 10 on the North side of the channel.

CONTAINER FACILITY: Container facility in operation located on 15.5 acres behind Cargo Dock 14. Terminal provides full service for receiving, delivering and handling of marine containers. Containers are handled with a M 250 Manitowac 275 ton crawler crane, a Taylor top lift machine and a Kalmar lift machine with capacity of 90,000 lb. The Kalmar and Taylor have spreaders for handling 20 ft. or 40 ft. units. U.S. Customs maintain on site inspection facilities.

BULK CARGO FACILITIES: *Ore, Minerals, Coal, Petroleum Coke:* Bulk Materials Dock with travelling unloading tower capable of direct discharge from vessels to railcars or trucks at rate of 1,000 t.p.h.

A Bulk Loading Terminal to load vessels directly from trucks, railcars or stockpiles at rate of 1,500 t.p.h. is also available. The dock has a 45 ft. draft alongside, 63 ft. airdraft and 1,300 ft. slip length.

Grain: 2 export grain elevators are located in the Inner Harbour. The Corpus Christi Public Elevator has a 5,000,000 bushel capacity. Rated truck unloading capability is 1,000 t.p.h.; railcars can be unloaded simultaneously at 2,000 t.p.h. The Interstate Grain Port Terminal Elevator is privately owned and has a 6,400,000 bushel capacity.

MEDICAL: Ample hospital and dental facilities available.

TANKERS: Between Corpus Christi Turning Basin and Viola Basin are 11 public and 10 private Oil Docks, some capable of berthing tankers of 150,000 d.w.t. capacity. Also see "Berthing".

Inner Harbour – Public Docks:

Oil Dock	No. 1	Length Limit 1,000 ft. Max. Draft 45 ft. (SW)
	No. 2*	Length Limit 260 ft.
	No. 3*	Length Limit 246 ft.
	No. 4†	Length Limit 850 ft. Max. Draft 45 ft. (SW)
	No. 6*	—

  Reynolds Metals Co. Bauxite Unloading Pier. (Also see "Shipmaster's Report" – dated April 1988.)
  Reynolds Metals Co. Alumina Loading Dock. (Also see "Shipmaster's Report" – dated April 1988.)

Report: *Cautionary Advice:* Special precautions and procedures are required for all vessels calling at Harbor Island (our of service in 1994) because of tidal current, wind conditions and passing traffic. Masters must ensure that their vessels are properly moored at all times to minimise the effect of these conditions and prevent the vessel from breaking out of the berth.

The special precautions and procedures, for deep-loaded vessels (34 ft. draft or deeper) are:

Deep-loaded vessels experience maximum effect from tidal current during the flood tide which forces the vessel away from the dock, particularly when clearance between the keel and bottom is 5 ft. or less.

Accordingly, deep draft vessels are docked at the end of the flood tide to allow ample pumping time so that maximum underkeel clearance be attained before the next flood tide reaches full strength.

(Vessels should anchor off the sea buoy to await the suitable stage of the tide.)

Vessels equipped with segregated ballast capability should not commence ballasting these systems until draft is 30 ft. or less.

If during the flood tide the vessel's draft is in excess of 34 ft. (mean), a tug should be in attendance to assist the vessel in staying alongside the dock. To ensure tug availability, the Master should advise the Agent 3 hours in advance if planned pumping does not proceed to permit a lesser draft than 34 ft. at the full strength of the next flood tide.

Vessels with drafts that exceed 34 ft. (mean) should be equipped with 12 mooring wires. If they are not so equipped, the Dockmaster will require the vessel to use additional mooring ropes.

Wind Conditions: Winds from the Northern quadrants, which occur particularly during the Winter months, place heavy loads on mooring lines when a vessel is in a fully light condition.

A contract weather service provides an alert to Masters (via the Agent and/or Dockmaster) and to the Dockmaster when abnormal weather conditions are predicted. The Dockmaster will require cargo transfer shutdown when wind velocity exceeds established limits.

In order to minimise wind effect, the vessel's segregated ballast tanks should be filled before completion of cargo discharge.

Combined Wind and Tide Conditions: Particular attention should be paid to unfavourable combinations of wind, tide and current which will place high loads on mooring lines.

Passing Traffic: The close proximity of the Harbour Island Berths to the Corpus Christi Channel results in interaction from passing traffic. This can be severe, depending on the speed and displacement of the passing vessel.

Propeller wash from vessels (mooring/unmooring) at the Petrofina Berth and the wash from assisting tugs also have an unfavourable effect. Special attention must be given to spring lines to ensure they are kept taut at all times.

Harbor Island has established wind and current limitations at which cargo operations should be stopped. Cargo operations are also stopped if a vessel moves off the berth. Hoses are disconnected by the terminal when required due to wind, current, etc.

Port Approaches: Vessels should approach Aransas Pass throug prescribed Safety Fairways, exercising due caution at all times a lanes are unmarked. Numerous fishing vessels may be encoun The low shore lines will start to show on radar at a range of bet 15 and 20 miles. A large number of shore lights in the background it difficult to distinguish the navigational aids. The entrance cha through Aransas Pass is protected by jetties. The outer bar channe Jetty channel and the inner harbour basin have project depth of 4 *Tugs:* Tugs will come alongside at Buoys No. 9 and 10. A minimu 3 tugs are usually required for a loaded vessel and 2 for a vess ballast under good conditions. Tugs up to 3,200 h.p are available

CARGO GEAR: Heavy lift facilities: Mobile crane located at Dock with a capacity of 275 tons; can handle containers and heavy otherwise ship's gear used. Heavy lift facility also available at Bay

Facilities are available for all types of liquid cargo, dry bulk and ge cargo, but cannot handle restricted cargo such as ammunition explosives.

BRIDGES: Corpus Christi Harbour Bridge: Vertical clearance at is 138 ft.

Upper Harbour Lift Bridge: Vertical clearance at MHW when rais 138 ft.

FRESH WATER: Water available at all public docks for $2.50 1,000 gallons; minimum charge of $25.00 for each connection.

FUEL: 24 hours notice required.

Bunker C, Marine diesel, Light diesel – Pipe-line or Barge, Truc

FIRE PRECAUTIONS: No working barges alongside (except bunk barges) and normal precautions such as shut down cargo opera during lightning, storm, etc.

CONSULS: Danish Consul, 4517 Baldwin. Tel: (512) 884-6344.
German Consul, 5440 Old Brownsville Rd. Tel: (512) 289-2416.
Mexican Consul, 1740 First City Tower I. Tel: (512) 882-3375.
Spanish Consul, 19833 Melissa Lane. Tel: (512) 887-7246.

REPAIRS: See "Services".

SURVEYORS: American Bureau of Shipping; J. E. Orrell, Lloyd's Agency and National Cargo Bureau.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Hatches may be opened by crew before entering har after the ship has entered harbour it is carried out by stevedores.

CUSTOMS ALLOWANCES: 300 cigarettes per man. 1 quart liqu man.

AIRPORT: Approximately 7.75 miles from Port. Serviced by 3 re airlines.

TIME: Daylight Saving Time from first Sunday in April till last Sund October (minus 5 hours GMT). Central time remainder of year (6 hours GMT).

HOLIDAYS: New Year's Day (January 1st); Martin Luther Birthday (January 15th); Lincoln's Birthday (February Washington's Birthday (3rd Monday of February); Texas Indepen Day (March 2nd); Good Friday (varies); Memorial Day (last Mond May); June 20th; July 4th; Labour Day (First Monday of Septe Columbus Day (2nd Monday of October); Veterans' Day (4th Mo of October); Thomas W. Gleason's Birthday (November Thanksgiving (4th Thursday of November); Christmas Day (Dece 25th).

Possible to work on any holiday, except Labour Day or Chris only in case of fire or danger to property. If holiday falls on Su Monday is observed.

POLICE/AMBULANCE/FIRE: Police 882-1911, Ambulance 882 City Fire 884-5563 or 911, Refinery Terminal Fire Co. 882-7801.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard Emergency (512) 937-1898.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Standard Immigration Forms I-9 made up for each crew member on arrival. Not necessary for cr already holding Form I-95, issued for same vessel.

GARBAGE DISPOSAL: Shipboard garbage service is available vessel's Agent.

WASTE OIL DISPOSAL: Collection service is available throu Services, 7330 Greenwood, Corpus Christi, Texas. Tel: (512) 8 Fax: (512) 855-5419. Ability to handle ballast water, environmen (oil rags, etc.); vacuum truck service.

Alamo Petroleum Exchange. Mr. Pierre Kuypers. Tel: (512) 8

SEAMAN'S CLUBS: Corpus Christi International Seamen's 1501 Mesquite Street, Corpus Christi, Texas 78401. Te 883-5011, 883-8405. Services: Shop, international telephone church services, mini-bus collection, postage facilities, games

CURRENCY: U.S. Dollar.

SHIPMASTER'S REPORT: September 1987.
Vessel: Tanker, 95,000 d.w.t.
Coastguard: For U.S.C.G. annual tank inspection, the authorities need to inspect the Cargo Gear Book, in addition to all other documents. Additionally U.S.C.G. require that for tankers, stores, gas cylinders, etc., must not be on cargo tanks.
Pilot: The Pilot requires the ladder 8 ft. above the water.
Berthing: Berthing carried out 24 hours a day.

At the Petrofina Berth at Harbour Island, fresh water and telephone are not available. Due to strong currents and passing vessels, the moorings consisted of 4 head/stern lines, 2 breast lines and 4 springs at each end. Three tugs assisted in berthing. Bunkers may be taken whilst alongside but this will usually depend on the Charterers or Receivers permission.

Just off the Petrofina Berth there is a shallow patch where deep draft vessels usually touch the bottom, but it appears to be soft mud.

The pilots, tugs and linesmen all require 2 hours notice.

At Oil Dock No. 8, 2 tugs are required and if vessel turns before berthing then only 1 tug will be required when unberthing. Moorings consisted of 3 head/stern lines, 2 breast lines and 2 springs at each end.

The ship's gangway was required at both berths.

If vessel is cleared for a foreign port and diverted to another U.S. port, the Agent at the sailing port should be informed, in order that he may advise the authorities accordingly. If the authorities are not advised the vessel is liable to a fine of U.S.$1000.00. Vessels have to pay a user fee to U.S. Customs of U.S.$397.00 regardless of size. Also if vessel is diverted to another U.S. port after being cleared for a foreign port, advise the Agent of any slops on board for Customs purposes.

SHIPMASTER'S REPORT: April 1988.
Berth: Gregory.
Location: 27° 52' 43" N., 97° 15' 38" W.

The private docks of Reynolds Metals Co. are located on the North side of Corpus Christi Bay, Texas, on Chart No. 11309. The facility is known as Gregory Reynolds Sherwin Plant Dock.
Weather: Humid sub-tropical climate with prevailing winds onshore from East and Southeast at 10 – 15 knots. "Northers" may be expected from November to March with winds over 20 knots. These may be severe from December to February and up to 50 knots. Generally lasting from 1.5 – 3 days. Tropical storms/hurricanes may occur from June to October, reaching a peak in September, infrequently in May and November.
Communications: Reynolds Metal Co., Richmond, Va. Telex No. 827448 AAB REMETCOGO RCH, or via Agent.
Pilot: Aransas Corpus Christi Pilots are on VHF Channel 12, call sign "KQU 371".
Time: GMT minus 6 hours. Summer time of GMT minus 5 hours is applied from first Sunday of April to last Sunday of October each year.
Channel: Navigation to Sherwin Dock is via Main Corpus Christi Channel from Aransas Pass inlet, thence via La Quinta Channel to the Dock. Total distance 22 miles. Several commercial marine installations and private homes border the channel. These are susceptible to wash damage from vessels' wakes. Vessels are cautioned to reduce speed on approaching such installations and enter the reduction in the ship's log book.
Draft: Channel controlling depths are published in Notice to Mariners. Draft is presently restricted to 45 ft. Bauxite Pier Facility No. 5 – depth of water 45 ft. Alumina Pier Facility No. 90 – depth available 38 ft. at MLW (subject to shoaling).
Density: Generally 1022.
Tidal Range: 1.4 ft. Strong winds also affect water levels in Corpus Christi Bay as much as the tides.
Bauxite Pier Facility No. 5:
Max. LOA: 800 ft.
Max. beam: 106 ft. (larger vessels by arrangement).
Air draft: Max. of 50 ft. from top of hatch cover in open position to water line.
Hold depth: Max. of 66 ft. from top of hatch cover in open position to bottom of hold.
Min. hatch size 39 ft. × 39 ft.
Max. overhang into wings: 36 ft.
Min. distance after end last hatch to front of accommodation: 10 ft.

Washing of holds at the berth is permitted but the wash water cannot be pumped overboard or a fine will result. Free surface in the holds is also detrimental to the clean up process, as the vessel must be kept as level as possible because of the rotary motion on the tank top by unloader as it makes its final pass. Gantry travel of the Sumitomo Continuous Unloader is 606 ft. Max. unloading rate 2,000 tonnes per hour. Overall average rate 1,000 – 1,200 tonnes per hour. Plant personnel used exclusively. Plant labour make a good job of residue removal, but at the same time 2 or 3 crew may work in hold during final clean-up.

Vessel design: Deck should be clear of obstructions such as cranes, raised deck houses, light stands at side, log racks, etc.
Alumina Pier Facility No. 90:
Max. LOA: 680 ft. but this depends on distance from forward hatch to stern, which should not exceed 550 ft.
Loading chute outreach from fender line: 67 ft.
Air draft: Max. of 31 ft. 06 in. at ship's rail/bulwark.

The chute travels out on an incline so can usually accept 33 ft. 06 in. at hatch coaming, depending on distance in from side of vessel. If necessary list the vessel to meet this requirement. A list of 5° – 7° is considered the maximum allowable by plant personnel for working safely and ballasting cannot be started until boarding party is off the vessel and a draft survey complete. Most large vessels find it necessary to fill one cargo hold with water ballast to meet this restriction and caution must be taken when deballasting not to exceed loading rate. Loading rate about 500 tons per hour. Cargo stows at 55 lb./cu.ft. or 41 cu.ft. – 43 cu.ft./ton. Cargo is very dusty and abrasive. Wheelhouse should be sealed and accommodation ventilation "air washers" should be used if fitted. It is also helpful if a positive pressure of about 1 p.s.i. can be maintained in the accommodation by adjusting the supply/exhaust fans. There is no shore scale and although Plant may use a Surveyor to determine Bill of Lading quantity, vessel is responsible to advise terminal when loading is complete.

Hatches must be clean, fresh water washed and dry, with no residue in hold or underside of covers. A Surveyor will carry out a "Cleanliness" inspection before the vessel will be accepted. Crew must open/close hatches and haul ship alongside berth during loading operation. Gangway of the vessel used and safety net is recommended. Vessels normally turn and berth head out, port side to, using 2 tugs.

Fuel oil and Diesel oil are available by barge and small amounts of diesel oil available by tank truck, but some vendors do not like to deliver during cargo operations due to dust. U.S.C.G. also prohibits tank truck hose from loading over water so coordination with loading sequence is essential at Alumina Berth. Barging cost from Corpus Christi is about U.S.$3,600.

Fresh water may be taken in quantities up to 300 – 400 tons at no cost, but ship's crew must connect/disconnect and use own hose. Connection must be tight with no water leaking to dock.

AUTHORITY: Port of Corpus Christi Authority, P.O.Box 1541, Corpus Christi, Texas 78403. *Tel:* (512) 882-5633. *FAX:* (512) 882-7110. *Contact:* John La Rue, Executive Director. Frank C. Brogan, Director of Engineering Services. Ed Altemus, Director of Trade Developoment. Jim Burns, Harbour Master.

DETROIT, Michigan: 42.19 N. 83.05 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Compulsory unless Master holds Exemption "B" Licence. 24 hours' notice of arrival required by Agents who arrange Pilot.
ANCHORAGES: In depths from 29 ft. – 51 ft. in the Detroit River off the marine terminals and away from main channel.
RESTRICTIONS: St. Lawrence Seaway navigation season approx. from April 15th to December 15th. Controlling depth 27 ft. Minimum depth of 25 ft. in the Detroit River. The Amherstburg Channel has a depth of 27 ft. 6 in. for upbound traffic.
MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, not compulsory but recommended for some terminals.
BERTHING: *Detroit Marine Terminals:*
2,100 ft. dock with 27 ft. LW depth.
2 berths.
3×250 ton diesel crawler cranes.
1×200 ton diesel crawler crane.
1×50 ton diesel electric travelling gantry crane.
1×25 ton diesel electric travelling gantry crane.
1×15 ton diesel electric travelling gantry crane.
Lift trucks up to 65,000 lb. capacity.
Harridon Terminal, Inc:
790 ft. dock.
1 berth.
3×5800 link belt hydraulic crawler cranes.
Michigan Marine Terminal:
650 ft. dock.
Liquid bulk products (from No. 2 Oils to heavy residual fuels).
Liquid bulk products (asphalt).
17 storage tanks.
Can ship and receive by water, truck and rail. Can receive by Buckeye and Wolverine pipelines.
Hickman, Williams and Co.:
1 berth.
Load bulk materials with conveyor. Unloading by self-unloaders.
Nicholson Terminal & Dock Company:
3,400 ft. dock with 27 ft. LW depth.
4 berths.
195,000 sq.ft. covered storage.
Total 50 acres.
2 cranes, 70 ton capacity at 40 ft. radius.
2×4100 Manitowac crawler cranes.
2×12 ton gantry cranes.
3×30 ton diesel locomotive cranes.
1×85 ton Lima truck crane.
1×72 ft. combination rail/truck scale.
2×Diesel electric locomotive engines.
2×87 in. magnets.
11×65 in. magnets.
5×55 in. magnets.
12 buckets: 1.5 yds. to 30 yds. capacity.
4 front end loaders 8 yds. to 12 yds. capacity.
1×Trojan 1500 loader 1.5 yds. bucket.
25×forklifts 5000 lb. to 80,000 lb. capacity.
2×25 ton overhead cranes for cargo.
1×6 yds. scrap grapple.
Motor City Internmodal Distribution, Inc.:
500 ft. dock with 28 ft. LW depth.
1 berth.
140,000 sq.ft. covered storage.
Total 18 acres.
6 forklift trucks.
1×60 ft. truck scale 300,000 lb. capacity.
DENSITY: Fresh water.
MEDICAL: Doctors, hospital and all facilities available.

FRESH WATER: Available at most berths.
FUEL: All grades available, ex-wharf, or delivered by barge.

DONALDSONVILLE, Louisiana: 30.05 N. 91.00 W.

(See Plan)

Also see "South Louisiana".

SHIPMASTER'S REPORT: September 1980 (Updated 1994).

The report was compiled over 4 visits between August 1979 and August 1980.

APPROACHES: The coastline is low at the mouth of the river and consequently does not give a good radar return. The Racon on East jetty shows up between 12 to 17 miles. Fog and mist is a complication as it is very prevalent with the added problem of the oil rigs. These are located mainly on the East side of the safety fairway but in August 1980 construction was proceeding on a structure right on the Western boundary of the safety fairway about 4 miles S.W. of the East pier.

The Sea Buoy is difficult to locate, vessel should approach as per the leading line indicated.

A strong West flowing current across the entrance can be encountered.

Draft restriction varies throughout the year and should be ascertained in good time. August 1980 at 40 ft.(FW) but patches of 39 ft. 6 in. in places. (Mud, so no difficulty.)

Officially the Bar at the S.W. Pass is the limiting factor but in practice other areas of the river up to New Orleans are as much of draft restriction factor.

Above New Orleans to Baton Rouge a battle is being fought against silting up and a large dredging programme will have to be commenced soon, otherwise the draft will be severely limited – still at 40 ft. officially.

A new road bridge about 15 miles above New Orleans is under construction called 'Ascension', clearance is likely to be 150 ft., the lowest on the river, at zero gauge or about 130 ft. at High River.

PILOTAGE: Pilot boards at Sea Buoy from a fast cutter. Ladder/gangway arrangements 6 ft. from water, normal port gangway at S.W. Pass.

Change at Pilot Town about 1 hour 45 minutes above S.W. Pass and New Orleans about 6 hours above Pilot Town.

If at anchor and requiring a Pilot a minimum of 3 hours' notice is required. Normally order Pilot through Agent. The Baton Rouge-New Orleans Pilots may only berth ships at Donaldsonville about 3 times per month.

ANCHORAGES:

Belle Chase	Mile post 75	1 hour below New Orleans
12 Mile Pt.	Mile post 81	30 minutes below New Orlea
Bonte Carre	Mile post 128	2 hours above New Orleans
Burnside	Mile post 169	4 hours above New Orleans

All anchorages are standing moor operations, if proceeding down 2 tugs will be required to swing vessel into current, this is *essent* High River season.

The bank is steep and muddy and as long as vessel lies quietly bank little damage can result. In fact this is preferable to hanging midstream and getting hit by passing barge strings and shipping.

VHF: Public correspondence as per ALRS. Moving upriver-Venice, Orleans, Convent (Channel 25) and Baton Rouge. Just about in cove all the way up from Pilot Town to berthing, all stations very bu working hours.

Pilot ordered through Agent and on Channel 16.

USCG: Follow VTS booklet.

Boat service: At 12 Mile Point anchorage a launch service operate Channel 20. Pilots and Agent board by this service.

MAX. SIZE: *C.F.I.:* Max. draft 40 ft.

TUGS: 'Crescent' tugs of around 2,000 h.p. are stationed at Burn which are available if not handling larger vessels.

BERTHING: *Berth approach and depths:* This is the cause of concern at Donaldsonville. The channel is at its narrowest off Triad (the downstream berth 0.5 miles below C.F. Industries at Mile 173.5), having a minimum depth of 30 ft. (Zero Gauge at Donaldson over a width of 140 ft. and is steep to, falling to 20 ft. over 180 width.

Gauge reading can vary from about +5 ft. after a dry Summe +26 ft. or more at the end of the Winter season when the snows North are melting.

There is a set onto the Triad Berth varying with the main current. as the river height increases, the current varies from 0.5 knots in Summer to upwards of 5 knots or more in late Winter. Effect is incre by a Northerly wind.

Berth Approach: Head upriver on berthing, unberth stern first until of shoal, approximately when bow is 50 ft. downriver of lower Do on Triad Berth, then swing with aid of tugs. Actual depth alongside Gauge) C.F.I. Berth = 44 ft. (minimum) Triad Berth = 41 ft. (minim

Guidelines for berthing as follows:

C.F.I. Berth: Berthing or unberthing in daylight only. No vessels on Triad, berthing or unberthing.

Triad Berth: Night movements dependent on wind, tug power, etc.

The question of taking bunkers thereby increasing the draft a If berthing at Triad only, can take before berthing. If also berthi C.F.I. it is best left until clear of C.F.I. Berth.

Berths: C.F.I. Berth: Reasonable condition. Short steel jetty 2 dolphins plus mooring buoy at either end, the nearest dolphins side of the jetty are interconnected by a catwalk.

At 26 ft. the maindeck is level with dolphins so gangway mu turned in. B.O.T. type gangway by pilot ladder position to after do Port side alongside.

Berth also used for loading bulk fertiliser. Watch the bulk boom is left unsecured and can be fouled.

Triad: 0.5 miles downstream from C.F.I. (plants back onto each

Basically the same as C.F.I. but dolphins not connected to je mooring buoys, all dolphins, not as good condition as C.F.I. Bulk fe also loaded. Port side alongside, B.O.T. type gangway amidships

Moorings: Basically 3, 2, 2, crossed after springs each berth. M boat which moors forward first then aft. Lets go aft first – very han propeller is clear quickly. (See "Plan") – have moorings ready arrival.

CARGO: Ammonia only at both berths plus bulk fertiliser. Labo both berths assists in connecting up.

C.F.I.: Ship's 12 in. to 8 in. reducer plus shore 150 – 300 ASA piece.

No vapour return line, no venting. Loading at 450 t.p.h. but de on pumps available, normally two. Emergency stop for ship ope

Triad: Ship's 12 in. to 8 in. reducer. No VRL, no venting. Load 350 t.p.h. but again depends on available pumps. Shore tanks back further than C.F. Industries and line heating is apparent.

FRESH WATER: Not available at Triad Berth or C.F.I. Berth. Barg New Orleans costs about $1,500.

TELEPHONE: On Triad berth through the terminal operator. Loc free, long distance calls collect. Pay telephone on deck at C.F.I.

GENERAL: Donaldsonville Town nearby, about $5.00 in Baton Rouge about 45 minutes away. The International Air New Orleans is about 1.5 hours away.

Stores: Lorries can back down jetty roadway to within a few manifold area. A permit has to be obtained at both berths.

USCG: Usual pre-arrival hazardous ship reports to Coast Guard New Orleans.

Necessary to have a Coast Guard escort through New Orleans must be made that the Pilot is advising the USCG of the vessel's and that she requires an escort. Escort with blue flashing light (fa launch) joins off Algies Point and goes through to Huey P. Long and vice versa.

THE FOLLOWING REPORT (Dated November 1980) IS TO BE IN CONJUNCTION WITH THE REPORT ABOVE.

SW Pass: The West flowing current is very strong, about 5 knots entrance and in region of Fairway Buoy. Steer well to the East

9 Mile Anchorage: Boat charges $35.00 per boat, any number 24 hour basis. Runs on hour every hour for shore leave pur arrangement. Call 'Port Ship Services Poydras' on Channel 20. to New Orleans at $5.00 per person can be arranged.

Tugs/Pilot: Minimum 2 hours' notice, order through Agent.

VHF: Agent: On Channel 16 and 73, Tricon (Trammo A Channel 16 and 73. Chandler: Sarussen Marine, on Channel

Films: Sea View Films: Best to cable direct as per Walport Ins Also change Vidpack. Change from launch if required whe New Orleans.

Burnside Anchorage: Boat Charges: $20 per boat plus $5 per person. Call "Webber Marine" Burnside on Channel 16 and 18A.

Agents: Call Tricon Burnside on Channel 16 and 73 (Trammo Agents).

Donaldsonville: Depths – See latest chart, shoaling alongside CF Industries and off Triad.

Berthing/Leaving scraped alongside Triad berth, maximum 30 ft. off.

Turn when one ship's length below "Triad", lower dolphin.

Three "Parish" tugs used in and out.

To line up manifold at C.F.I., pilot ladder gate should be in line with gangway on lower dolphin.

Water rate is 5 t.p.h. from fire hydrant stand pipe, not hose.

Water by barge from Baton Rouge at $4.00 per tonne. Minimum 100 tonnes plus $85.00 per hour for tug. Minimum 4 hours =$740.00.

No bunkers officially allowed alongside, but can probably take diesel at night.

Agents: Tricon in Burnside are now Trammo Agents.

AUTHORITY: *Operator:* C. F. Industries Inc., Donaldsonville Nitrogen Complex, P.O.Box 468, Donaldsonville, Lousiana 70346, U.S.A. *Tel:* (504) 473-8291. *FAX:* (504) 473-0202. *Contact:* Vance Barry, Port Captain.

DULUTH-SUPERIOR, Minnesota: 46.49 N. 92.09 W.

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: U.S. or Canadian Pilot compulsory except when Master or officer specially qualified to navigate waters concerned. Pilots obtained from Western Great Lakes Pilots Association, 2231 Catlin Avenue, Superior, WI 54880. Duluth entry – Pilots picked up at point 2 miles due East of pierhead lights. Superior entry – pick up Pilot 2 miles N.N.E. of lighthouse. Advise Agents 24 hours in advance of ETA for scheduling Pilot, Customs, Immigration, and Agricultural Inspection. Masters should hold to the South of convergence of shipping lanes at the Duluth Entry and to North of this convergence at Superior Entry when approaching to embark a Pilot.

ANCHORAGES: Anchorage areas near Duluth and Superior entries are South and Eastward and North and Eastward respectively of main channel through harbour. Marked by anchorage buoys. Vessels must only anchor clear of channels at all times.

RESTRICTIONS: Because of varying conditions of wind and current, no restriction placed on speed passing through entry piers at either Duluth or Superior entry. Speed throughout harbour limited to 7 knots. Speed through bridges other than the Aerial Bridge at Duluth entry limited under normal conditions to 6 miles per hour. Because of current conditions at inner end of Duluth entry, both inbound and outbound vessels must leave vertical black/white striped mid-channel or traffic buoy on starboard hand. This gives outbound ships maximum straight run.

MAX. SIZE: Draft 26 ft. Duluth Harbour Entry: Duluth ship's canal, minimum width 300 ft. Superior Entry: Minimum width 500 ft. minimum depth at inner end of 27 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Prior to entering harbour vessels must make "Security Call" on Channel 51 from 10 to 20 minutes in advance advising intended movement. All vessels should monitor Channel 51 at all times when under way to determine position and intent of other vessels moving in constricted areas within harbour and approaches.

BRIDGES: Aerial Bridge spanning Duluth entry vertical clearance of 138 ft. Signal for opening bridge shall be given by vessels approaching from lakes, in all circumstances, when not less than 1 mile from bridge. A flashing amber light on harbour side of Aerial Bridge warns outbound vessel of approach of inbound vessel in lake.

TUGS: Available, not compulsory.

BERTHING: *Clure Public Marine Terminal.*

Length of dock: 6,600 lineal ft., 7 ship berths, 4 for unloading/loading, 3 for fitting, cleaning, standby, etc. Water depth: 27 ft. 2×90-ton Clyde gantry cranes. 12 grain loading berths.

MEDICAL: All medical assistance available.

DENSITY: Fresh water.

FRESH WATER: Available at most docks in both ports.

FUEL: Available from dock or by barge.

FIRE PRECAUTIONS: No open fire permitted on deck of any vessel while in harbour. This restriction does not apply to a vessel at a shipyard which will be governed by the shipyard's local rules, nor to vessels in lay-up or fit-out status at ore docks.

Ocean vessels, upon docking, shall put on off-shore side of vessel, wire rope lines fore and aft as tow lines for use in pulling ship off dock face in case of fire. Such tow line shall be securely made fast to bitts with eye about 1 ft. above the water.

REPAIRS: All ship repairs can be effected.

DRY DOCKS: At Superior: Fraser Shipyards: one 831 ft. by 95 ft. and one 628 ft. by 76 ft.

CERTIFICATES: Masters are required to present Safety Inspection Certificate of cargo handling equipment and gangways to stevedoring companies and other employers of harbour labour upon request.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required by Immigration.

GARBAGE DISPOSAL: North Star Marine Operators, 365 S. 7th Avenue W., Duluth, MN. 55802. Tel: 218-727-6969.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Twin Ports Ministry to Seafarers Inc., 2024 W. Third Street, Duluth, MN. 55806. Tel: 218-727-5897.

AUTHORITY: Seaway Port Authority of Duluth, P.O.Box 16877, Duluth, Minnesota 55816-0877, U.S.A. *Tel:* (218) 727-8525. *FAX:* (218) 727-6888. *Contact:* Davis Helberg, Executive Director.

EASTPORT, Maine: 44.54 N. 66.59 W.

DOCUMENTS: Basic Customs documents required for entry.

Information Required: Vessel's Particulars: Vessel's name, Flag, Port of Registry (Date and official No.), Call Sign, Place built and date; deadweight, Gross/Nett registered tons, LOA, Breadth, type/No. of cranes/capacity; No. of holds and hatches; Max. arrival draft; Horsepower of any bow/stern thrusters.

Certificate Expiry Dates: Safety Construction, Safety Equipment, Safety Radio, International Load Line, IOPP, Certificate of Financial Responsibility (Certificate No., Owner as appears on Certificate and expiration date).

Voyage Information: Last foreign port other than Canada port prior to USA arrival; Previous U.S. or Canadian ports prior to arrival Eastport; Voyage rotation after sailing from Eastport.

Crew/Passenger Information: Name of Master, number of crew (including Master), number of passengers. Visaed Crew List or individual visas if arriving from foreign port. Crewmen should all possess Crewman's Landing Permit (Form I-95A).

Vessel's ETA: 96, 72, 48, 24 hours prior to arrival.

Communications: Radio station vessel using, type of communication equipment and pertinent information (i.e. call letters, Inmarsat No. and answerback, etc.).

Generally radio communications to Eastport are via WCC (Chatham Radio) or CGRS VCS HFX (Canadian Coast Guard Radio, Halifax NS) or Inmarsat.

Vessel Requirements: Any husbandry requirements should be supplied well in advance so far as practicable.

PILOTAGE: Compulsory.

Quoddy Pilots Association and Eastport Pilots. Tel: (207) 259-7770 or (207) 853-6027.

Pilots board at West Quoddy Head (Lat. 44° 49' N., Long. 66° 54' W.) or alternative pilot station at East Quoddy Head (Lat. 44° 58' N., Long. 66° 52' 48" W.). East Quoddy most likely used, Pilot will advise.

Pilots monitor VHF Channels 16, 10 and 14.

ANCHORAGES: Pilots usually board on arrival, but if berth not available, vessels anchor in Friar Road (Lat. 44° 53' N., Long. 66° 58' W.).

RESTRICTIONS: Depth alongside 12.2 m. MLW.

MAX. SIZE: 50,300 d.w.t., LOA 215 m. and max. draft 12.0 m.

HEALTH: See "Health – All Ports" before first U.S.A. port (Albany).

RADIO: See "Documents".

Vessels should advise Federal Marine Terminals (Telex: 705229 Fedmarud. Fax: (207) 853-4111. Tel: (207) 853-6096) of ETA, 72 hours, 48 hours and 24 hours prior to arrival.

VHF: Vessels must advise "Fundy Traffic" on VHF Channel 14 prior to entering Bay of Fundy (Ecareg).

Pilot and Federal Marine Terminals on Channel 16.

RADAR: Fundy Traffic.

TUGS: 3 tugs (1×1,400 h.p., 1×600 h.p. and 1×300 h.p.) operated by Passamaquoddy Towing Service (Tel: (207) 853-4483).

BERTHING: *Wharf:* Length 420 ft. (distance between dolphins 700 ft.). Depth 12.2 m. at MLW.

Truck and crawler cranes up to 100 tons capacity (Ship's gear can be used). 10 forklift trucks up to 17.5 tons capacity. Bale and roll clamps available. 15 woodpulp spreaders. 24 flatbed tractors/trailers.

Cargoes handled: Woodpulp, paper rolls, granite, logs and lumber.

CRANES: See "Berthing".

STEVEDORES: Federal Marine Terminals. See "Radio".

Northeast Longshoremen's Association.

Working hours are continuous.

MEDICAL: Hospital at Calais and medical centre at Eastport.

TANKERS: No facilities.

DENSITY: 1021.

FRESH WATER: Available on request to ship's Agent.

FUEL: Available by truck, on request to ship's Agent.

CONSULS: None locally.

REPAIRS: Contact Moose Island Repairs (Tel: (207) 853-6058) for minor repairs.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Available from Port Authority, but only during cargo operations.

OPENIG/CLOSING HATCHES: Normally by crew.

REPATRIATION: Can be arranged.

AIRPORT: Eastport Municipal Airport has a 4,000 ft. runway. Distance to airport 3 km.

Bangor International Airport, 190 km.

HOLIDAYS: Work is carried out on all holidays with the exception of 4th July and 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: (207) 853-4221. Ambulance, Tel: (207) 853-4828. Fire, Tel: (207) 853-2544.

EMERGENCY CO-ORDINATION CENTRE: Contact U.S. Coast Guard.

BANKS: First National Bank, Fleet Bank, Bangor Savings Bank.

STORING: See "Prelims".

(1) By truck.
(2) No.
(3) Yes.
(4) No jetty forklifts on pier.
(5) As per U.S. Customs.
(6) —

SHORE LEAVE: Allowed. U.S. Customs and Immigration must have a visaed Crew List. Tel: (207) 853-4313. Notify ship's Agent.

IDENTIFICATION CARDS: Seamen's Book sufficient.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

DEVELOPMENTS: New pier with 1,100 ft. berthing space (Outside berth 20.0 m. draft. Inside berth 13.0 m. draft) (Dolphin to dolphin 900 ft.).

AUTHORITY: Eastport Port Authority, P.O. Box 278, 3 Madison Street, Eastport, Maine 04631, U.S.A. *Tel:* (207) 853-4614. *FAX:* (207) 853-9584. *Contact:* Jonathan T. Daniels, Port Director. Thomas D. Armentano, Operations Director.

EL SEGUNDO, California: 33.54 N. 118.27 W.

OPERATOR: El Segundo is a Chevron U.S.A. offshore multi-buoy marine terminal and refinery.

LOCATION: The terminal Sea Buoy is located approximately 1,750 ft. due West of Berth No. 3 in 78 ft. of water at Lat. 33° 54' 42" N., Long. 118° 27' 30" W. This lighted bell buoy is painted red with 6 in. high white letters reading, "2 ES". It exhibits a white flashing light every 4 seconds (flash 0.4 secs., eclipse 3.6 secs.). The lantern is 13.5 ft. above water. A current meter and Racon beacon have been installed. The Racon transmitter will be transmitting Morse code "C".

In addition to the many tanks of the El Segundo Refinery, the chimneys of power plants adjacent to the Marine Terminal form prominent landmarks. 2×334 ft. chimneys painted with alternating red and white horizontal stripes mark the Los Angeles Department of Water and Power Scattergood Steam Plant located just North of the Terminal. Directly South of the Terminal is a set of 4 shorter chimneys at the Southern California Edison Co. Power Plant.

DOCUMENTS: Four copies each of the following documents required for entry and clearance:

Crew List (I-418).
Master's Oath (1300).
General Declaration (1301).
Ship's Stores Declaration (1303).
Crew Effects Declaration (1304).
Application for Entry (3171).
Inward Foreign Manifest (1302).

If vessel is to discharge at more than one port, each port, wi cargo, must be listed on a separate manifest.

MAX. SIZE:

Berth No.	*Maximum Draft* (ft.)	*Maximum Length* (ft.)	*Vessel Tonnage* (d.w.t.)	*Water D at ML* (ft.)
1	Removed 1984			
2	Removed 1993			
3	51	1,000	Up to 150,000	65
4	56	1,000	Up to 150,000	70

RADIO: *Pre-arrival radio message to ship:*

The vessel's Agent will normally advise the vessel by radio following general information when the vessel is approximately out:

Mooring Master boards 2 miles S.W. of sea buoy (Approxima Lat. 33° 53.5' N., Long. 118° 29' W.).

Have starboard hose boom derrick rigged (if so equipped) and strong mooring lines ready – 3 main deck forward, 3 main dec 4 poop deck (polyester lines only).

Sumatran Crude average cargo temperature must be 125°F on a

Long term anchorage is generally in Long Beach. Anchorage "A" or "B" have been established in the vicinity of the Sea Buoy. Fe regulations require a Pilot.

Have pilot ladder rigged on starboard side.

Assure 125 p.s.i. pressure on riser during discharge.

Any Customs, quarantine, etc., special information.

Advise if all cargo pumps are in good operating condition, and average discharge rate.

Radio Communication Prior to Arrival:

Estimated time of arrival (ETA) and requirements for services be directed to the ship's Agent. ETAs should be sent 7 days repeated 3 days and 24 hours, prior to arrival.

Within 2 hours of arrival, communications may be established wi El Segundo Marine Terminal or mooring launch on VHF Channel

Radio and Telephone Ship to Shore Communications:

UHF Radio. The Mooring Master is equipped with a UHF rad direct communications with the Terminal Control room at all times the start of mooring until the vessel has cleared the moorin departure.

BERTHING: Vessel will provide berthing and messing facilities 3 man launch crew as well as for the Mooring Master and Environm Cargo Officer.

Mooring Gear: Each anchor shall be equipped with no less 10 shackles of chain. Vessels over 50,000 d.w.t. shall have at 12 shackles on each anchor. Wires on mooring winches should least 1,000 ft. (preferably 1,200 ft.) and should have 110,000 220,000 lb. breaking strength, depending upon the size of the v Constant tension winches must be braked by means of manual

Synthetic lines on fixed winch drums should also be 1,000 should have 130,000 – 270,000 lb. breaking strength. Doub synthetic lines should be 720 ft. long with a breaking streng 165,000 lb.

No synthetic line with elongation over 15% at full breaking st will be accepted. Aramid fibre ropes (Kevlan, Spectra) are perm they meet wire breaking strength requirements. Ropes are availa a rental basis from the Terminal.

Mooring lines should be located as follows:

1. At least 3 lines on the main deck forward
2. At least 3 lines on the main deck aft
3. At least 4 lines on the poop deck.

If vessel over 100,000 d.w.t. fittings must permit doubling of a Each synthetic line requires a separate bitt.

Mooring Facilities: Berth No. 3 is a 7-point mooring used for the of fuel, crude and refined products. It is located approx 2,400 yards offshore. There are 2×12 in. hoses available.

Berth is equipped with 1 unlit spar buoy and 2 can buoys. The s spar buoy marks the location of the offshore end of the submarin when the hose is on the bottom. A can buoy, or hose marker b connected to the end of the submarine hose by a chain. The sub hose string in Berth No. 3 is connected to the seaward end of submarine pipeline and a 12 in. line for circulation, by seve diameter × 25 ft. lengths of hose followed by one 12 in.×25 ft hose and one 12 in. diameter × 30 ft. long over-the-rail hose.

Berth No. 4 is equipped with 1 unlit spar buoy and 1 unlit ca The inshore spar buoy marks the end of the 36 in. submarine 14 in. circulation line. One hose string comes off the mai submarine line. The hose string consists of 5×35 ft. long lengths hose, followed by a reducer and then 2×25 ft. long lengths and long over-the-rail length of 16 in. hose. The end of the hose connected to a can buoy by a chain.

NOTE: VHF marine operator is also available, marine oper located at Redondo Beach and San Pedro.

Hose Handling: The vessel will be expected to have suitable e on deck and ready for making the connection to the submarin

Berth No. 3 requires a lifting capacity of at least 7 long tons fo up to 30,000 d.w.t. and at least 10 long tons for vessels over 30,0

Berth No. 4 requires a lifting capacity (calculated load) of 10

Procedure for Discharging: At the completion of most cargo d the vessel will be required to receive a 150 bbl. hose wash disp of cutter stock or gas oil. This is to prevent the hose from plug not in use.

Product Transfer Rates, Pressure and Temperature: Gasoline and jet fuel loaded at Berth No. 3 are usually transferred at 7,000 – 12,000 bbls.p.h. with a pressure at the ship's rail not to exceed 50 p.s.i. Gasoline and jet fuel are discharged at Berth No. 3 with a pressure not to exceed 125 p.s.i. at the ship's rail. Hoses are rated to 150 p.s.i.

Fuels and crude are loaded at Berth No. 3 at rates to 20,000 bbls.p.h. No. 3 Berth hoses are heavy duty 275 p.s.i. rated. Vessels are expected to maintain discharge pressure of at least 125 p.s.i. at the ship's rail and/or a flow rate of 20,000 – 25,000 bbls.p.h.

No. 4 Berth hoses are heavy duty 275 p.s.i. rated, and the system has a normal working pressure of 180 p.s.i. On this one hose system, vessels are expected to maintain flow rates of up to 50,000 bbls.p.h.

Sumatran Crude cargo will not be accepted by the facility unless the ship's average tank temperature is at least 125°F. However, the average temperature for Sumatran Crude should not exceed 130°F. in order to avoid excessive vaporization of the light fractions in the crude. Heavy viscous residue fuel cargo will not be accepted from a ship unless the ship's average tank temperature is at least 130°F.

MEDICAL: Several hospitals are available in the area. U.S. Coast Guard or local ambulance service may be expected to know what hospital is best suited to handle a particular emergency.

FRESH WATER: Potable water is not available at this mooring. Water barge service is not available in the area. Closest supply is the harbour at San Pedro.

FUEL: Bunker fuel for ship's use is not available in the moorings of the El Segundo Marine Terminal.

BALLAST: No ballast can be accommodated at the Terminal.

CONSULS: Consulates of most of the maritime Nations are maintained in both the cities of Los Angeles and Long Beach.

AIRPORT: The Terminal is located approximately 2 miles South of Los Angeles International Airport.

TIME: Standard Time along the entire West Coast of the United States is GMT minus 8 hours. Daylight Saving Time is from first Sunday in April till last Sunday in October. Clocks are advanced 1 hour in Summer.

WINDS/TIDES/CURRENTS: *Winds:* Westerly, onshore winds usually prevail. Gales are very rare in Santa Monica Bay, but the local thermal winds blowing from a Northerly direction sometimes necessitate interruption of transfer operations and require moving a ship from the mooring to anchor.

Northerly winds occur during the period from October through May. In the Autumn and Spring, duration averages 4 to 6 hours

In November, December and January, duration averages 10 hours. Velocities up to 52 knots have been recorded.

Tides and Currents: Normal tides of approximately 6 ft. pose no significant problems in this open roadstead.

Currents run unpredictably North or South along the coast in the vicinity of the Terminal. The current is most commonly from North to South and is stronger in Summer than in Winter.

GENERAL: *Supplies:* Modest quantities of supplies may be taken aboard while at the moorings if absolutely necessary, provided the Mooring Master gives prior approval. This practice is discouraged in view of the sea swell and wind conditions that can develop in the open roadstead of the moorings, as well as the long distances to normal marine supply facilities.

Launch service: A company operated launch may be chartered for vessel's use through the vessel's Agent at the option of the Owner's representative. This launch operates between the moorings and the Port-O-Fino Dock in King Harbour, Redondo Beach, on a published 4 hours' schedule which may be obtained from the Mooring Master. A one-way trip takes approximately 40 minutes.

Pilot Ladder: The vessel shall rig a safe and secure pilot ladder or pilot hoist (not accommodation ladder) for the Mooring Master and Government Officials to use in boarding and leaving the vessel.

Air Pollution: Any vessel showing visible smoke in excess of 3 minutes is in violation and may expect to be cited and required to pay substantial fines.

Dumping of Garbage: Dumping of rubbish or garbage overboard within 50 miles of the coastline is prohibited.

AUTHORITY: *Operator:* Chevron Shipping Co., 1006 Pier "F" Avenue, Long Beach, CA 90802, U.S.A. *Tel:* (310) 983-3660. *Telex:* TWX 910-345-6396. *FAX:* (310) 983-3666. *Contact:* Steve A. Swinburn, Port Superintendent.

U.S.C.G., Captain of the Port, Los Angeles/Long Beach, 165 N. Pico Avenue, Long Beach, CA 90802. Tel: (213) 590-2315.

El Segundo is an open roadstead marine terminal with no official Port Authority other than U.S.C.G.

ERIE, Pennsylvania: 42.10 N. 80.05 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Not compulsory. Seaway Pilots will assist if required.

RESTRICTIONS: Navigation season from 14th April to 26th December approx. The port is connected to Lake Erie by an entrance channel, depth 28 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Quarantine procedure undertaken at Quebec City for incoming vessels from foreign ports.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours' notice to Commander, 9th Coastguard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours' notice of ETA at first U.S. discharge port is required.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING:

Erie Marine Enterprises, Inc.: New ship assembly yard with graving dock (largest on Great Lakes), available for dry dock repairs.

Ore Dock: 1,000 ft. long, 26 ft. – 27 ft. of water alongside. The ore dock has 400,000 ton storage pad available for lease.

Port Authority East Bay Industrial Site: 75 acres available for sale or lease.

Erie International Marine Terminal: Leased to Mountfort Terminals Ltd., stevedores for the Port of Erie; 1,400 ft. long, with 28 ft. of water. Terminal used for bulk and general cargo; 23 acres; 750,000 sq. ft. of warehousing and transit sheds with truck and rail loading facilities; 2×200 ton and 1×230 ton mobile cranes equipped with magnets, buckets and gear for heavy lifts, also 300 ton stiff leg crane. Terminal served by ConRail with reciprocal switching for N&W and B&LE railroads. A total of more than 100 acres of waterfront property is available where an industrial complex may be constructed.

DENSITY: Fresh water.

MEDICAL: All facilities available.

FRESH WATER: Obtainable by pipeline at all docks.

FUEL: All grades available by pipeline at all docks.

REPAIRS: Local shipbuilding company can handle most repairs. Dry dock available.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: None.

AUTHORITY: Erie-Western Pennsylvania Port Authority, 17 West Dobbins Landing, Erie, PA 16507-1424, U.S.A. *Tel:* (814) 455-7557. *FAX:* (814) 455-8070. *Contact:* Larry Morosky, Executive Director.

EUREKA, California: 40.48 N. 124.10 W. (See Plan)

DOCUMENTS: In addition to the documents detailed below, Agent will present to Master normal Customs forms to be signed, such as Master's Oath, Permit to Lade, Inward & Outward Manifest, etc. These forms will be filled out by local Agent and Customs Broker and presented to local Customs house when entering and clearing vessel:

Foreign Flag Vessels:

I. Entering from another U.S. port:
  3 Crew Lists.
  3 Passenger Lists (only if passengers on board).
  3 Curio Lists.
  3 Stores Lists.
  Permit to Proceed (issued at last U.S. port).
  Travelling Manifest (only if there is foreign cargo on board).
  Ship's Register.
  International Tonnage Certificate.
  U.S. Tonnage Certificates.

II. Entering from a foreign port:
  3 Crew Lists.
  3 Passenger Lists (only if passengers are on board).
  3 Curio Lists.
  3 Stores Lists.
  Travelling Manifest.
  Permit to Proceed.
  Ship's Register.
  International Tonnage Certificate.
  Ship's Tonnage Tax Certificate (U.S.).
  Clearance from a foreign port.

PILOTAGE: Telegraphic address of Pilot station "Humbar". 24 hours advance notice of ETA; in case of change in ETA give minimum 4 hour notice. Contact pilot boat on VHF 156.8 MHz (Channel 16). Radio watch is maintained 2 hours prior to arrival at sea buoy on Channel 16. Working Channels are 13, 10 and 77.

No Pilot boat on station. Local Pilots use tug "Avenger" length 97 ft. Tug colours: red funnel, buff and white superstructure and black hull. As no Pilot boat on station, sound signals not required. Visual international flag and light signals observed. Pilot will board vessel within 1 mile radius North, South and West of sea buoy. Sea-buoy located 1.4 miles from end of North jetty lined up with range lights bearing 105° true.

Specific requirements: *(a)* Pilot ladder with spreaders in accordance with Solas Regulations, and 3.0 m. above water. *(b)* At night – brilliant light to illuminate ladder. *(c)* Recommended anchorage outside Humboldt Bay located 1 mile South of sea-buoy in 15 fathoms of water.

ANCHORAGES: Inside harbour, weather permitting. Light draft vessel (22 ft. or less) South of Fairhaven Dock (Simpson) and West of Standard Oil Dock, if not over LOA 535 ft.

RESTRICTIONS: Humboldt Bay is a 24 hour port; restrictions if any would depend upon manoeuvrability and horsepower of vessel during peak tide. Range of tide normally 6 ft., extreme cases 10 ft.

MAX. SIZE: Max. LOA 740 ft., max. beam 115 ft. Max. draft 35 ft.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Send cables through one of the following stations:

ITT World Communications, Inc. – San Francisco Marine Radio Station KFS.

RCA Global Communications – San Francisco Marine Radio Station KPH.

TUGS: 2 tugs available, 1 tug acts as pilot boat, other tug joins vessel when in harbour. Tug's lines are normally used, occasionally a ship's line is used. No extra charge assessed for use of tug's line. Two tugs minimum are used.

BERTHING: No specific requirements relating to berthing; normal procedures prevail. Vessel normally docks stemming the tide.

Berths presently available at Eureka as follows:
Pacific Affiliates Dock "A".
Simpson Pulp Co.
Sierra Pacific Industries.
Louisiana-Pacific Corporation.
Humboldt Bay Forest Products.
Chevron USA.
Unocal.
Louisiana Pacific Chip Export Dock.

Harbour channels maintained to 35 ft. zero tide except for South Bay Channel to Humboldt Bay Forest Products which is maintained at 26 ft. Most of berths at above-mentioned docks also maintained at 35 ft. zero tide; however, some occasionally fill in and recommended check with Agent as to depth available at specific dock where vessel intends moor and load.

STEVEDORES: 4 local gangs available. Groups ordered at 0630 hrs. in the morning for both day and night gangs. Therefore essential that local Agent or stevedore company receives accurate ETA by 0600 hrs. in the morning. Normally, vessel will advise arrival sea-buoy with a 24–hour ETA and correct ETA at a later time if necessary. The basic commodities exported from Eureka are woodpulp, woodchips, logs and lumber.

Westfall Stevedore Co. Cable Address: Westfall, Eureka. Tel. (707) 443-5688.

MEDICAL: Not necessary for Agent to receive advance notice of required medical attention unless ambulance and doctor are required on arrival. 3 hospitals in immediate area. Inoculation and vaccination certificates should be up-dated.

TANKERS: 2 tanker berths available: Chevron USA – Barges only. Unocal – deepest draft 30 ft. at zero tide. Normally only Company tankers use own facilities. Facilities privately owned and are not available for bunkering other vessels.

DENSITY: 1024-1027 (depending on time of year).

FRESH WATER: Available all berths. Delivery by hose. Rate of delivery: 10 t.p.h.

FUEL: If bunkers required, Agent must go through major contractors, who in turn will inform their local supplier of requirements. The bunkers usually diesel grade and delivered by truck on a prearranged schedule.

CONSULS: None. Nearest consuls at San Francisco.

REPAIRS: Small welding jobs, and minor machine work only. Major repairs normally carried out in San Francisco.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Services of gangway guards available if required by ship.

OPENING/CLOSING HATCHES: Normally stevedores' work unless done prior to docking. Vessel's crew may assist in opening and closing hatches, if hatches require special attention.

CERTIFICATES: Ship's Register, Load Line Certificate, Derat Certificate, Cargo Gear Certificate, Tonnage Tax Certificate and all other usual certificates required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes and 1 lb. of tobacco. Wine and/or Spirit, 1 bottle (approx. 1 quart).

CARGO GEAR: Must be in good order and safe operating condition and all cargo gear certificates must be valid.

REPATRIATION: Normally done in conjunction with San Francisco, Portland, Los Angeles or Seattle Agent (Prior notification recommended).

AIRPORT: Airport located approximately 20 miles North of Eureka. Limousine service available. Major airline, United Express. At present 3 flights per day to San Francisco.

TIME: Local time is Pacific Standard Time and is GMT minus 8 hours. However, from first Sunday in April till last Sunday in October, Eureka is on Daylight Saving Time.

HOLIDAYS: No work performed by longshoremen on following holidays: New Year's Day (January 1st); July 5th; Labour Day (1st Monday in September); Thanksgiving Day; Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Eureka City Police 442-4545; Eureka City Ambulance 442-4551; Eureka Fire Department 443-5656; Humboldt County Sheriff Department 443-5671; Arcata Fire District 822-2424; Humboldt Fire District No. 1 442-1212.

TELEPHONES: No arrangements for placing telephones on board; however, there are pay phones nearby at each dock as well as phones in nearby offices.

SERVICES: Specific services such as tank cleaning, compass adjusting, tank washing,etc., are not normally performed in the port of Eureka and are usually performed in one of the close major ports such as San Francisco; however, there are facilities available for minor repairs and metal fabrication.

SHORE LEAVE: Crew members allowed ashore unless restricted for Customs or Immigration reasons.

IDENTIFICATION CARDS: Alien seamen require Crewman Landing Pass (U.S. Form I-95).

DELAYS: Berthing delays seldom incurred primarily due to the fact that the prime Agents are always in contact with the local Agent at Eureka informing them of vessel's ETA and prime Agent is always advised with regard to all arrivals and possible berth conflicts at this port.

AUTHORITY: Humboldt Bay Harbor, P.O.Box 1030, Eureka, CA 95502-1030, U.S.A. *Tel:* (707) 443-0801. *FAX:* (707) 443-0800. *Contact:* David Hull, Chief Executive Officer.

4 tug boats – 24 hour dispatching service. 2×3,000 h.p. boa

BERTHING: *State Pier:* Principal maritime cargo terminal at Sta Berth 600 ft. long with depth of 35 ft. MLW alongside.

Ro-Ro facility 80 ft. wide by 42 ft. inboard depth. (8° incline a edge – concrete deck on wood piling).

All utility services available. Further information telephone 5707 or ship Agents.

BRIDGES: All bridges have 135 ft. clearance with exce Brightman Steel Bridge at approach to Montaup Electric Co. Oil docks. This bridge has a draw clearance of 97.5 ft. and allowed for vessels with less than 75 ft. beam. No unusual requ Practice is to depart on flood tide. (See "Developments").

TANKERS: Berth at Shell Oil Docks. Depth alongside 35 ft.

FRESH WATER: Available at most berths. State Pier deli 125 pounds pressure.

OPENING/CLOSING HATCHES: Usually performed by steve

CERTIFICATES: All certification of vessel, safety conditions facilities should be available for U.S. Coast Guard.

CARGO GEAR: No additional safety requirements.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylig Time GMT minus 4 hours from first Sunday in April till last October.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriots' Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th); or any day celebrated in lieu thereof.
TELEPHONES: Available at most berths. Contact Agents.
SHORE LEAVE: Permitted, but consult Agents.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95 issued for the same vessel.
DEVELOPMENTS: Plans for construction of a new 150 ft. wide draw bridge to replace the existing Brightman Street Bridge. This will mean unobstructed use of the entire port area.

SHIPMASTER'S REPORT: October 1991.
Charts: B.A. Charts No. 2730, 2731 and 2732.
Pilotage: The pilot boards 2.5 miles S.E. of Brenton Reef Light Tower from a fast cutter. On departure the pilot officially leaves in the same position but in practice he normally disembarks just North of the tower. The boarding position is an official position required by State law due to environmental requirements.

The pilot boards and disembarks in all types of weather and a good lee is always required. The pilot is ordered through the agent.

"N.E. Marine Pilot" can be called on VHF Channels 16, 18A, 14 and 10. The pilot office is located at Newport, Rhode Island and is manned between 0800 hrs. and 1600 hrs. (local time) from Monday to Friday. At nighttime, weekends and public holidays the Despatcher can be called at home (Tel: (401) 331-4824). He can also be obtained through local radio station. The pilot office is located at 243 Spring Street, Newport, Rhode Island. (Tel: (401) 847-9050), Cables "Rispilot Providence".

The pilot boat is manned 2 hours before the latest ETA. The pilot takes the vessel through Narragansett Bay and berths and unberths the vessel.

The Pilot Association covers all Long Island Sound from New York Harbour Eastern limits, East to the Cape Cod Canal and all ports in between, including all Narrangansett Bay.
Anchorages: If vessel is waiting for pilot or orders the anchorage is 1.5 miles – 2.5 miles S.E. of Brenton Reef Light Tower. The anchorage can experience large Southeasterly swells so additional anchor chain is recommended. There is little shelter from Southerly winds and the holding ground is only fair.

There are a number of anchorages in Narragansett Bay and all require a pilot when anchoring.

A popular anchorage when waiting for a berth is Prudence Island Anchorage which is located in position Lat. 41° 36.5' N., Long. 71° 17.2' W. (see B.A. Chart No. 2730).
Channel: The maximum draft for vessels proceeding to Providence is 39 ft. The channel in the bay is wide.

From Brenton Reef Light Tower it is about 20 miles to Fall River State Pier and 24 miles to Providence.
Restrictions: LPG vessels only berth during daylight hours and are subject to U.S.C.G. Inspection at the anchorage before berthing (inner or outer anchorage, depending on weather).
Tugs: Tugs up to 3,000 h.p. are available.
Berths: Borden and Livingstone Wharf: The berth is about 500 m. South of the State Pier (see B.A. Chart No. 2732). The minimum depth alongside was 23 ft. 09 in. at MLW on the S.W. end of the berth (See "Plan"). The tidal range is about 4 ft.

Vessels can berth either side alongside and generally use 2 tugs for berthing and unberthing. Vessels berth against 3 or 4 breasting dolphins, depending on length. The latex and caustic soda manifolds are on the centre breasting dolphin. The dock is a private facility and has its own linesmen. Vessels are berthed and unberthed throughout 24 hours.
Cargo Operations: Discharge is through shore pumps and lines into 36 underground tanks and 30 above ground tanks of various capacities. The total capacity is 350,000 U.S. gallons (12,500 tonnes).

Caustic soda is also discharged into the underground storage.
Density: Density at H.W. was 1020.
Fresh Water: Fresh water is available at no charge. Ship's hoses are used and the rate is moderate.

Also see "Providence" – "Shipmaster's Report dated October 1991".

AUTHORITY: Fall River Port Authority, State Pier, Water Street, Fall River, Massachusetts 02721. *Tel:* (508) 674-5707. *Contact:* William J. Torpey, General Manager.

FERNDALE, Washington: 48.49 N. 122.43 W. (See Plan)

DOCUMENTS/HEALTH/etc.: Refer to "Seattle".
PILOTAGE: Compulsory. Pilot boards at Port Angeles.
TUGS: Tug escort required if vessel is loaded and is larger than 40,000 d.w.t. Tug horsepower must be 5% of d.w.t. Available up to 3,000 h.p. Additional tugs ordered from Seattle if required.
RESTRICTIONS: Vessels enter any hour day or night.

Regulations prohibit tankers larger than 125,000 d.w.t. in U.S. waters East of a line from Discovery Island Light to New Dungeness Light.
MAX. SIZE: Length 1,000 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: Terminal used for crude and product discharging. Vessels berth alongside finger pier, lines to quick release hooks. Inner berth for barges only. Outer berth 900 ft. long, depth alongside 60 ft. at MLW. Dirty ballast water 3,000 long tons with prior notification.
OPERATOR: Tosco Refining Company, Ferndale Refinery, P.O. Box 8, Ferndale, WA 98248-0008, U.S.A. *Tel:* (360) 384-8349. *Telex:* 910-449-2412. *FAX:* (360) 384-8360. *Contact:* Marine Terminal Supervisor.

FORT PIERCE, Florida: 27.27 N. 80.19 W.

PILOTAGE: Compulsory. Pilot boards at sea buoy. Send vessel's ETA to Agent 72 hours, 48 hours and 24 hours prior to arrival.
ANCHORAGE: Vessel anchors and awaits Pilot 0.5 miles seaward of sea buoy.
RESTRICTIONS: Vessels are able to berth and unberth during hours of darkness if the weather is clear. The leading lights are good but the channel is narrow and a number of buoys are unlit. Diameter of turning basin 1,100 ft. Least depth of water in the channel from sea to berth 28 ft.
MAX. SIZE: Max. draft 28 ft. Range of tide averages 2 ft.
RADIO: Tampa Radio.
VHF: Channels 16 and 13. Watch only maintained when vessel expected.
TUGS: One 500 h.p. tug and one 1,000 h.p. tug available. Large vessels should use tugs when berthing.
BERTHING: Berthing at Fort Pierce is at Indian River Terminal. This privately owned facility has berths of 454 ft., 330 ft., 150 ft. and 200 ft. There is an adjacent facility with mooring for small vessels including a Ro-Ro ramp used by a landing craft trading with the Bahamas.

Vessels up to 600 ft. have safely berthed at the terminal facility which is well maintained and fendered. Vessels can arrive or depart at any stage of the tide, however, the port's Pilot has temporarily restricted vessels over 24 ft. 6 in. draft to high water movements only.
CARGO HANDLING FACILITIES: Indian River Terminal provides excellent facilities for general cargo. The pierside refrigerated warehouse serves the citrus industry. Shore side cranes are available on request but most cargoes are discharged and loaded at this facility with ship's gear. The terminal and local stevedores are fully equipped with forklifts, hand trucks, slings and pans for handling palletised or breakbulk products, most particularly fruits and vegetables. Containers and heavy lift cargoes have also been loaded at this facility which is serviced by a rail spur directly from the FEC railroad main line. The adjacent city facility provides berthing for several small craft and presently accommodates a cross state waterway inland cruise vessel and a small island trader.

A tug/barge bulk facility that handles argonite occupies an area North of the Indian River Terminal. This facility has a 3-dolphin mooring system for vessels up to 28 ft. draft.
MEDICAL: Doctor and hospital available.
FRESH WATER: Available.
FUEL: Light diesel is available by truck from nearby facilities. Heavier fuel must be barged or trucked from Port Canaveral or Port Everglades.
REPAIRS: No facilities available.
AIRPORT: Local airport 5 miles from port with U.S. Customs on site. Commercial flights available from Palm Beach and Melbourne, both 1.5 hours by car.
SERVICES: Fresh provisions, laundry services, groceries and meats available.
GENERAL: The Port of Fort Pierce is on the threshold of development. The present level of activity at Indian River Terminal indicates a need for additional facilities to accommodate the expanding export citrus trade and other business. The United States Corps of Engineers has recently completed a harbour deepening and expansion project to allow vessels up to 28 ft. draft to berth. This project was completed late 1995. Local community leaders are working to acquire port side undeveloped land that is presently privately held. The Port Authority at the present time does not own or operate any port property.

Stevedores at Indian River Terminal excel in handling breakbulk and palletised citrus fruit. Production and quality of stow are excellent.

Agency and stevedoring personnel are keen, helpful and anxious to co-operate fully.

For more information contact: Morris Adger, Port Director, 2300 Virginia Avenue, Fort Pierce, FL 34982-5652. Tel: (407) 462-1732. Fax: (407) 462-1718.
AUTHORITY: St. Lucie Port and Airport Authority, 2300 Virginia Avenue, Fort Pierce, FL 33482-5652, U.S.A. *Tel:* (407) 462-1732. *FAX:* (407) 462-1718. *Email:* FPPort@AOL.Com *Contact:* Morris Adger, Port Director.

FREEPORT, Texas: 28.57 N. 95.21 W. (See Plan)

DOCUMENTS: See "Houston".
PILOTAGE: VHF Channels 6, 8, 12, 13, 14, 16 at sea buoy. Pilot Office (tel. 233-1120), 200 West 2nd, Freeport, Texas; Pilot boards 0.25 mile North of sea buoy. Anchor 1 mile from sea buoy if awaiting Pilot.
ANCHORAGES: 1 to 2 miles from sea buoy.
RESTRICTIONS: Depth 45 ft. at bar.
MAX. SIZE: Length 670 ft., draft 43 ft. for ships from bar to within upper turning basin, 36 ft. from upper turning basin to Public Facilities. Tide governing these dimensions – plus or minus 3 ft.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
RADIO: Galveston Marine Operator.
TUGS: Join vessel at shore line. Tug's lines to be used, and no charge for use of lines.
BERTHING: 1 hour to reach berth. Deep water terminals at Public Facilities consist of 1,250 linear ft. of deep water bulkhead wharf with 3 modern transit sheds consisting of 200,000 sq.ft. 1 berth of 250 linear feet of deep water bulkhead wharf with transit shed of 36,000 sq.ft. In addition a back-up warehouse is available consisting of 60,000 sq.ft. The large transit sheds and back-up warehouse have railroad tracks under cover, permitting all-weather work and preventing cargo damage.

Ro-Ro facility in operation.

A new public liquid barge dock and tank farm in operation (in connection with the Old River Co.).

The Navigation District owns a total of 9,700 acres of land for future Port and industrial development, 6,500 ft. of this land is situated on the Brazos River.

CRANES: Vessel is required to use own gear, shore cranes are available in area for hire.

STEVEDORES: Obtained through Agent.

MEDICAL: Obtained through Agent and advance notice required. Doctors, hospital available.

TANKERS: Facilities operated by Phillips Petroleum, Dow Chemical and Seaway Pipeline Inc.

Report: Entering and Berthing: Vessels inbound over 630 ft. LOA are to enter harbour only during daylight hours from sunrise to:

1. 30 minutes before sunset going to berths below Phillips Terminal.
2. 1.5 hours before sunset going to berths at Phillips Terminal and above when loaded.
3. Vessels under 630 ft. judged unsafe for handling after dark will be limited to daylight hours.
4. Inbound operations will be suspended during times when weather conditions do not permit safe navigation.

DENSITY: 1020.

FRESH WATER: Available ex-wharf at Brazos Harbor.

FUEL: All grades available by barge from Houston.

CONSULS: None. Nearest at Port Arthur or Houston.

REPAIRS: Available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: None required but available through Agent.

OPENING/CLOSING HATCHES: Stevedore contract.

CUSTOMS ALLOWANCES: Local Customs Agent control.

REPATRIATION: Possible, through Agent.

AIRPORT: Houston Intercontinental Airport – Houston, Texas (80 road miles to Brazos Harbor); Metro Airlines – Shuttle to Angleton, Texas (15 miles from Brazos Harbor).

TIME: GMT minus 6 hours. Daylight saving time starts last Sunday in April and ends the last Sunday in October – GMT minus 5 hours.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (Third Monday in February); Good Friday; Texas Independence Day (March 2nd); St. Patrick's Day (March 17th); Decoration Day (Last Monday in May); Emancipation Day (June 19th); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (Second Monday in October); Veteran's Day (November 11th); Thomas W. Gleason's Birthday (November 8th); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th). No work on Christmas Day or Labour Day.

If any of the above holidays fall on Saturday or Sunday the following Monday will be recognised as the holiday.

POLICE/AMBULANCE/FIRE: Police 239-1211; Fire 233-2651; Ambulance Service 233-2651.

TELEPHONES: No arrangements exist for placing telephones on board.

BANKS: First Freeport National. Tel: (409) 233-4401.

SERVICES: Tank-cleaning facilities available locally. Compass adjusting available from Houston.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE DISPOSAL: Garbage collection service according to Marpol Annex V Regulations, arranged by the Port Authority. Rates for services charged according to Port Tariff. Collection times set by Port Authority.

WASTE OIL DISPOSAL: Collection service available by commercial tank trucks. No special berths available for this service. Service provider will quote rates at time of service.

IDENTIFICATION CARDS: None needed.

SEAMAN'S CLUBS: Seaman's Service Center, 230 East Fifth Street, Freeport, TX 77541. Tel: (409) 233-5641. Contact: Rev. Joe Jones.

DEVELOPMENTS: The port has commenced a dredging and widening project, which will on completion give a channel depth of 45 ft. and an alongside depth of 36 ft. The main channel will be widened to 400 ft.

Berths No. 1 and 2 to be extended Eastward to provide a new berth (Berth No. 3) with a length of 640 ft. Berth will be dedicated to rice export.

Berth 'A' is to be extended by 400 ft.

AUTHORITY: Port of Freeport, Brazos River Harbor Navigation District of Brazoria County, 1001 Pine Street, P.O.Box 615, Freeport, Texas 77541. *Tel:* (409) 233-2667. *FAX:* (409) 233-5625. *Contact:* A. J. Reixach, Port Director.

GALVESTON, Texas: 29.17 N. 94.50 W. (See Plan)

DOCUMENTS:

- 1 visaed Crew List.
- 3 Passenger Lists.
- 3 or more copies of complete Manifests of Cargo for discharge at all United States ports.
- 2 or more copies of Manifest of Cargo for each United States port.
- 2 Souvenir Lists.
- 2 Stores Lists.
- Ship's Register.
- Tonnage Tax.
- Load Line Certificate.
- Nationality Certificate.
- Certificate of Financial Responsibility.
- I.O.P.P. Certificate.
- No health document required.

APPROACHES: Mariners are advised that ship-to-ship lightering ac is regularly conducted in the following general vicinities which 50 – 60 miles from the Galveston Sea-Buoy.

Lat. 28° 35' N., Long. 94° 15' W.
Lat. 28° 25' N., Long. 94° 34' W.

Mariners are urged to use caution when transitting these area they make their way to the Port of Galveston.

ANCHORAGES: In Bolivar Roads, 6.7 miles inwards from sea No. 1. Depths 32 ft. – 34 ft.

PILOTAGE: Radio to local Agent who arranges Pilot and spe boarding time. United States Coast Guard require 24 hours' noti arrival at Galveston Bar. Contact pilot boats and Pilot Station on Channel 14. Pilot boats can be signalled by light in international Pilot taken on board at sea buoy No. 1 located 6.7 miles from Galve

RESTRICTIONS: Prolonged North winds can reduce water leve much as 4 ft. in Winter. Channel depth 40 ft. F.W.

MAX. SIZE: No length or height restrictions. Draft according to depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban

RADIO: International Telephone and Telegraph station Galve call sign KLC.

TUGS: Available if required.

BERTHING: See "Table".

STEVEDORES: Order before 1800 for 0700 or 0800 hrs. following During day can be ordered at 2 hours' notice. Gangs must be ord before 1800 hrs. on Saturday for Sunday or holiday.

MEDICAL: All medical assistance available.

FRESH WATER: Available at all wharves.

FUEL: All grades available from Galveston Terminals Inc. Tel: (409) 6351

CONSULS: Italy and Norway.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Required only if crewmen deta by Immigration.

OPENING/CLOSING HATCHES: By stevedores only.

CUSTOMS ALLOWANCES: Each man 300 cigarettes, or 100 ciga 1 lb. tobacco; 1 quart wine/spirits.

TIME: Central Standard Time. Daylight Saving Time effective from to October.

HOLIDAYS: *ILA Holiday:* January 1st; Martin Luther King President's Day; Texas Independence Day; Good Friday; Memorial Emancipation Day; July 4th; Labour Day; Veterans Day; Thanks Day; Christmas Day.

POLICE/AMBULANCE/FIRE: All services provided. Tel: (409) 2100.

SHORE LEAVE: No restrictions unless detained by Immigration.

IDENTIFICATION CARDS: Immigration Form I-95 required.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A (Albany).

The following information was received from the Port of Galves "To arrange for garbage and trash pickup, contact the Harbour M

Any vessel whose previous port of call was outside the cont limits of the United States, or who has residue of food stuffs purc outside the continental limits of the U.S. on board, must have their arrange for garbage pickup by an authorised transporter prev approved by the Department of Agriculture. All such garbage mu inspected by the Dept. of Agriculture prior to being discharged as

Trash and garbage from coastwise vessels, outer continental supply and seismograph boats, and other nondescript water cra normally be picked up by the Galveston Wharves mainte department. 150 cu.ft. trash trucks and garbage containers provided alongside on the dock upon request, availability permit

All trash and garbage must be retained onboard until s containers are available. Under no circumstances shall trash or ga be deposited directly onto the pier aprons. All garbage must be w or packaged in leak-proof containers or plastic bags. All empty ca boxes shall be broken down flat to conserve space.

No lead-acid batteries containing liquid will be discharged. No oil, chemicals, or other hazardous material shall be dumped or in with trash and garbage. Trucks shall not be loaded within 6 below the top of the sideboards.

The tariff for hauling away trash and garbage will be $125.00 first truck load and $75.00 for each truck load thereafter.

In the event no Galveston Wharves equipment is available to trash and garbage at the time requested, the Harbour Mast authorise vessels to contract directly with commercial transporters who are properly franchised with the City of Galve accordance with Section 15-61 of the Galveston City Code. A co list of those authorised contractors will be provided by the Master upon request.

The Harbour Master will also authorise an outside contractor to containers at any time for large amounts of scrap metal, used any other material which because of size or weight makes it bey capability of wharves equipment to properly handle.

Any vessel not in compliance with the above procedure will be to vacate its berth."

The following is a list of authorised contractors:

Affordable Disposable Company, 1624 Avenue M., Galvesto
Tel: 762-5842.

Best Waste Systems, 1555 F.M. 517 West, Dickinson
Tel: (713) 337-3903.

Browning-Ferris Industries, P.O.Box 1379, La Porte
Tel: (713) 471-9142.

William Blue, 6806 Woodrow, Texas City, Texas. Tel: 938-
Freddie Swanson, 1109 46th Street, Galveston, Texas. Tel: 7
Trashmasters, Galveston, Texas. Tel: 762-5392.

GEISMAR (Including Sunshine), Louisiana:
30.13 N. 91.01 W. **(See Plan)**

East bank of Mississippi River, about 187 miles from sea.

DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required; normally not used (See "Tankers").

BERTHING: BASF Corporation: Berth 620 ft. long, 32 ft. depth. BASF Corporation Chemical Division, P.O.Box 457, River Road, Geismar, Louisiana 70734. Tel: (504) 473-9871. Telex: 510-600-7967. Contact: Plant Security.

TANKERS: *BASF Corporation: – Geismar:* General: The BASF Chemical Dock is located on the North side of the river, approximately 180.4 miles above Head of Passes (AHP). A series of mooring dolphins interconnected by rubber faced steel pile fenders form a 615 ft. berthing face. Electric driven warping winches on the dock and mooring dolphins handle vessel's mooring lines.

Cargo Handled and Shore Installations: Various chemicals are handled at this dock, e.g., methanol, ethylene dichloride, perchloroethylene, caustic soda, etc. All chemicals are generally loaded through 6 in. hoses connected to shore lines which are generally 6 in. diameter and vary in length from 0.5 miles to 4 miles.

An emergency loading stop control is located on the dock.

Docking: All vessels are required to use a 600 h.p. tug for assistance in docking and undocking. Vessels should approach the dock stemming the current with a tug on the port bow. The vessel is then manoeuvred alongside for a starboard side to docking.

Docking and undocking are generally performed by the River Pilot.

Nordix/No. 1 – Sunshine: General: The Nordix Dock is located on the left descending bank of the Mississippi River, approximately 170 miles AHP. The dock consists of a hose platform attached by catwalk and fender system to several mooring dolphins for a total dock length of 960 ft.

River current at the dock varies from 1 knot to 4 knots, depending on the height of the river.

Cargo Handled and Shore Installations: Crude is transferred through 2×8 in. hoses at a maximum discharge pressure of 100 p.s.i. on the dock.

Docking: Docking is strictly starboard side to and is performed by the River Pilot. 2×1,200 h.p. tugs are required for all docking/undocking operations.

The normal mooring arrangement calls for 2/3 head lines, 2 stern lines, 1 spring line forward and 1 spring line aft. The leads for breast lines are poor.

Willow Glen/No. 1 – Sunshine: General: The Willow Glen Terminal, approximately 180 miles AHP is on the left descending bank of the Mississippi River. The dock consists of a 150 ft. hose handling platform, 2 breasting dolphins and 4 mooring buoys. All mooring points are equipped with electric capstans for line handling. The dock is normally served by barge but is capable also of handling tankers.

Current at this dock varies between 1 knot and 4 knots, depending on river height.

Cargo Handled and Shore Installations: No. 2 and No. 6 fuel oil are the only products handled. These are transferred to the dock through 4×8 in. Chicksan arms at a maximum discharge pressure of 100 p.s.i. Portable jacks are provided by the terminal to support the cargo arms on the ship.

Docking: Docking is performed by the River Pilot and is strictly starboard side to, vessels of 30,000 d.w.t. or greater are required to use 2 tugs for docking and undocking; smaller vessels are required to use a single tug for these operations.

The normal mooring arrangement calls for 2 head lines, 1 breast line forward and 1 aft, 1 spring line forward and 1 aft and 2 stern lines. Wire or synthetic mooring lines may be used.

Petro United – Sunshine: General: The Petro United Dock is located approximately 170 miles AHP on the left descending bank of the Mississippi River. The dock consists of a 65 ft. hose handling platform and 6 mooring dolphins interconnected by 2 catwalk and fender systems.

At high river the current often causes swirling eddies off the dock which should be accounted for when approaching, docking and undocking.

Shore Installations: 4×10 in. and 2×12 in. hoses are available for the transfer of cargo.

Docking: 2 tugs are normally required for docking and undocking operations. All tugs must come from St. James or Baton Rouge so that a minimum of 2 hours advance notice must be given to the terminal and Agent prior to docking or undocking. Extensive delays have been known to occur due to tug unavailability and insufficient advance notice of docking/undocking requirements.

Docking is performed by the River Pilot and is strictly starboard side to. The terminal generally requires the use of 3 head lines, 2 stern lines, 2 breast lines forward, 2 breast lines aft, 3 spring lines forward and 2 spring lines aft.

DENSITY: Fresh water (1000).
FRESH WATER: Available ex-wharf.
FUEL: Not available.

SHIPMASTER'S REPORT: December 1990.
Berth: Arcadian (formerly Allied Chemical) located at Mile Statute 187 above Head of Passes.

The private wharf is said to be 1,175 ft. long. It is equipped with one travelling gantry crane and grab. Conveyor belt to yard storage within chemical plant. Phosphate rate is about 12,000 tonnes per day. Vessel guaranteed 39 ft. fresh water and berthed against 5 "Bridgestone" type inflated fenders. Vessel was 12 ft. from wharf and 12 ft. – 15 ft. below safety rails on arrival in low river. Ship's MOT type gangway and ship's bulwark steps are required on shore. Fenders were removed when ship's draft less than 32 ft. Gangway required frequent adjustment, and was changed to short size, then changed again to long size when aftermost hatch finished. Vessel moored with 4 headlines, 1 breast rope, 2 forward back springs, 2 after back springs and 4 stern/breast ropes aft. Stern nearly level with end of berth.

No fresh water available from quay, but a water barge can be hired from Burnside. Cost was U.S.$140 per hour for towage and $3.50/4.00 per ton for the water.

Only limited provisions allowed across dock, no chemicals or hazardous materials.

Visitors require prior authorisation, insurance, safety helmet, goggles and lifejacket.

No bunkering allowed.

Density ranges from 0.994 in Summer to 0.999 in Winter.

GEORGETOWN, South Carolina: 33.22 N. 79.17 W.

(See Plan)

PILOTAGE: Available. Make contact on VHF Channel 16. Pilot boards at Sea Buoy "2WB" in position 33° 11.6' N., 79° 05.4' W. for the 14 mile passage to Georgetown.
ANCHORAGE: Vessels wait for berth at Buoy "2WB".
RESTRICTIONS: Vessels over 600 ft. LOA dock during daytime only.
MAX. SIZE: Max. LOA 700 ft. Max. beam 100 ft. Depth at all terminals 27 ft. MLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
VHF: Pilot and tug on Channel 16. Port Authority have no facilities.
TUGS: Tugs assist vessels from Buoy 28 to the dock. Georgetown Towing operate 2 tugs, and McAllister Towing operate 3 tugs.

2. Clearance from last Port will consist of a copy of a General Declaration, CF 1301, endorsed by Customs at previous U.S. port.

PILOTAGE: Pilotage is compulsory. Great Lakes Masters are licensed Pilots for Great Lakes waters and ports in general.

Shipping Agents of foreign vessels should contact Great Lakes Pilots Association, Cape Vincent, New York. Tel: (315) 654-2900.

Pilots board 0.5 miles outside Grand Haven pier entrance.

ANCHORAGES: In Lake Michigan.

APPROACHES: A dredged entrance channel leads East from deep water in the lake between parallel piers at the mouth of the river.

The channel has an official depth of 7.0 m. (23 ft.), and the pierheads are marked by lights.

RESTRICTIONS: Max. speed in port is 7 knots.

Navigation season from mid-March until early January.

MAX. SIZE: Max. draft 19 ft.

RADIO: Advise local Agent of ETA.

VHF: Harbour Master on Channels 16 and 9.

U.S. Coast Guard monitors Channel 16, working on Channels 21 and 23.

TUGS: Available by special arrangement.

BERTHING: Deep water facilities are located along the banks of the river which has a channel of 6.4 m. (21 ft.) official depth extending 2.2 miles upstream from the river mouth.

Municipal Dock with 133 m. berthing space and 4.0 m. (13 ft.) depth alongside, for receipt of coal from self-unloading vessels.

Bulk Cargo Dock has 305 m. face with 6.4 (21 ft.) of water, for receipt of coal, limestone, and other bulk materials.

Sand Dock is 107 m. long and has 6.1 m. (20 ft.) depth alongside, for shipment of sand and gravel.

BULK CARGO FACILITIES: The bulk dock is rail-connected. Open storage for 70,000 tons of coal and 200,000 tons of dry bulk materials. Sand shiploader with trimmer has loading rate of 4,500 t.p.h.

MEDICAL: Hospital and medical services available.

TANKERS: No facilities.

FRESH WATER: Available.

FUEL: Available by truck.

REPAIRS: Minor hull and engine repairs possible.

AIRPORT: Grand Haven Airport. Tel: (616) 842-4430.

Muskegon County Airport. Tel: (616) 798-4596.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard S.A.R. monitor VHF Channel 16, working on Channels 21 and 23.

AUTHORITY: City of Grand Haven, 519 Washington Street, Grand Haven, Michigan 49417, U.S.A. *Tel:* (616) 842-3210. *FAX:* (616) 842-0085. *Contact:* Harbour Master.

U.S. Coast Guard, Group Grand Haven, 650 South Harbour Drive, Grand Haven, Michigan 49417, U.S.A. *Contact:* Commander James Bjostad.

GRAYS HARBOR, Washington: 46.55 N. 124.08 W.

(See Plan)

DOCUMENTS, etc.: Refer to "Tacoma".

PILOTAGE: *Boarding Area:* Near Grays Harbor Buoy.

Pilot Ladder: Near midships, 3.0 m. – 4.0 m. above water. No manropes. Automatic ladders are acceptable for boarding. Use only Jacob's ladder for disembarking.

Pilot Boats: "Chehalis": 20 m. orange and green steel boat, pilot house aft. "Grays Harbor": 18 m. orange and green steel boat, pilot house amidships.

Notification: To be sure of service give maximum advance notice, at least 24 hours via the Marine Exchange, Seattle, WA., VHF Channel 20. Pilot boat does not cruise on station. Keep pilots advised of changes in arrival time. Four hour minimum notice required on pilot orders. Orders for pilots on weekends should be received by 1700 hrs. Friday.

Communications: Pilot radio station (call WRD 709 or Grays Harbor Pilots (360) 532-2761). Guards Channels 12 and 16. If contact is made on Channel 16, be prepared to switch promptly to another channel, preferably Channel 12. Same procedure applies to pilot boats when manned. In emergency, a message may be relayed through U.S. Coast Guard Station, Westport, using above procedure.

Maximum Draft: Loaded vessels are limited to 11.0 m. visible draft for departure at flood tide. In case of severe silting in channel this figure may be reduced. The allowable draft for incoming vessels is substantially less because of difficulty in turning around. The safe handling of loaded ships outbound through the bridge requires a little trim by the stern.

Maximum Width and Length: Vessels passing through the bridges over the Chehalis River are restricted to 26 m. beam and 183 m. length.

Vessel Condition: All vessels arriving or departing Grays Harbor are asked to have all hatches covered. Deck cargo must be properly stowed and secured. A safe walk-way must be provided to the pilot boarding area.

ARRIVED VESSEL: Vessels must be inside Grays Harbor Bar to be considered an "arrived vessel".

ANCHORAGES: No specific areas in Grays Harbor have been designated as anchorage grounds. The best area is Southward of Sand Island Shoal in depths of 35 ft. to 40 ft.; the holding ground is good.

RESTRICTIONS: Bar Channel depth 48 ft. MLLW, and Approach Channel depth 36 ft. MLLW. Turning Basin width of 900 ft. Mean tidal range of approximately 10 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available.

BERTHING: Three deep-draft berths with depths of 41 ft. MLLW and one shallow draft berth with depth of 34 ft. MLLW. The channel is maintained at a depth of 36 ft. MLLW.

Terminal No. 4: (Wharf-Dolphin).

2 berths: Each 700 ft. in length.

Deck height: 18 ft., berth depth 41 ft. MLLW, depth continuously maintained with water-jet system.

Alignment of pier: 274°.

Fender spacing: Continuous.

Bollard/cleat spacing: Variable.

Two × 60 ton cargo cranes.

New on-dock rail system with 4 parallel spurs, 50 railcar capacity, serviced by 2 main line railroads and connected to transit sheds.

Two new 30,000 sq.ft. transit sheds adjacent to on-dock rail system.

Services: Water, lights, taxi.

Use: Bulk, breakbulk, neobulk, Ro-Ro, general cargo, cruise ships.

Terminal No. 2: (Wharf-Dolphin).
1 berth: Length 600 ft.
Deck height: 18 ft., berth depth 41 ft. MLLW.
Alignment of pier: 274°.
Fender spacing: Continuous.
Bollard/cleat spacing: Variable.
50,000 sq.ft. and 40,000 sq.ft. warehouses behind Terminals 2 and 1.
Services: Water, lights, taxi.
Use: Bulk, breakbulk, neobulk, Ro-Ro, general cargo, cruise ships.

Terminal No. 1: (Dolphin).
1 berth: Width 50 ft., length 480 ft. with dolphins.
Deck height: 18 ft., berth depth 34 ft. MLLW.
Alignment of pier: 302°.
Fender spacing: None, 3 dolphins parallel to face.
Bollard/cleat spacing: Variable.
Services: Water, lights, taxi.
Use: Barge services, small cruise ships and others.

All 3 Port Terminals are backed up by 175 acres of lighted, partially paved cargo yard. In addition, a total of 150,000 sq.ft. of covered storage is available on-dock or adjacent to the terminal areas. The federal navigation channel up to the Port docks is federally maintained at a depth of 36 ft. MLLW. Major commodities handled through the Port of Grays Harbor are forest products, metals, equipment, liquid products, and other bulk, breakbulk and neobulk commodities.

Private:

Name	*Length*(ft.)	*Use*
ITT-Rayonier Sawmill Dock	600	Pulp and logs.
Citifor Dock	500	Logs.
Weyerhaeuser Bay City Dock	800	Logs.
Weyerhaeuser Sawmill Dock	900	Lumber.

BULK CARGO FACILITIES: All berths (See "Berthing") are available for bulk, Ro-Ro, and general cargo activity, and are backed up by 150,000 sq.ft. of warehouse space as well as 175 acres of lighted, partially paved cargo yard. Two × 60 ton cargo cranes are also available at Terminal No. 4, as well as an on-dock rail system.

STEVEDORES: Jones Washington Stevedoring, Tel. Steve Bouch (360) 533-2561; and Stevedoring Services of America, Tel. Will Sheahon, (360) 532-4650. 20 local gangs available. Additional gangs brought in if needed.

MEDICAL: All medical facilities available. Local hospital.

DENSITY: Salt water.

FRESH WATER: Available at all wharves.

FUEL: Available at berth or anchorage. Capacity of barge 15,000 bbls.

GANGWAY/DECK WATCHMEN: Required only if detainees aboard.

CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

HOLIDAYS: See "Tacoma".

POLICE/AMBULANCE/FIRE: Dial 911 for emergencies.

Ambulances:

GARBAGE DISPOSAL: The vessel/Agent is responsible for ordering garbage service through Harbor Disposal Company Inc., 4201 Olympic Highway, Aberdeen, WA. 98520. Tel: (360) 532-3240. Containers, drop boxes and compactors are available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: Seamen's Service of Grays Harbor, 313 South "I" Street, Aberdeen, WA. 98520. A wide variety of services are available.

AUTHORITY: Port of Grays Harbor, P.O.Box 660, Aberdeen, Washington, WA. 98520-0141, USA. *Tel:* (360) 533-9528. *FAX:* (360) 533-9505. *Contact:* Jack Thompson, Commission President. Don Fleming, Executive Director. Ron Popham, Director of Business Services.

GREEN BAY, Wisconsin: 44.32 N. 88.02 W. **(See Plan)**

For important general information refer to St. Lawrence Seaway.

DOCUMENTS: No special documents required. All necessary Customs and St. Lawrence Seaway documentation should be accomplished prior arrival.

PILOTAGE: Pilot not compulsory although some Masters prefer Pilot aboard. Pilot boards prior to arrival.

CHANNEL: From Grassy Island, outside mouth of Fox River, to FV&W Railway bridge, channel is maintained 24 ft. below low-water-datum (576.8 ft. above Father Point, Quebec) and 300 ft. width except through bridges. Above Railway bridge channel and turning basin is maintained at 20 ft. below low-water-datum. From Grassy Island lakeward channel maintained at 26 ft. below low-water-datum varying in width from 300 ft. to 500 ft. for approximately 8 miles. 24 ft. deep turning basin maintained at confluence of Fox River and East River opposite Leicht's North Dock. Currents will flow up and down river and will influence channel depths at times. Present high-water will add1 ft. – 2 ft. to channel depths.

RESTRICTIONS: Entry may be made at any time of day or night subject to Master's discretion.

MAX. SIZE: Subject water depths and width of bridge openings.

HEALTH: See "Health: all Ports" before first U.S.A. port (Albany
Pratique may be obtained prior to entry of St. Lawrence Se
Suspected disease should be reported locally.
Rat guards required on all lines.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alba

RADIO: Ships' Agents located at Milwaukee and Chicago, ETA s
be directed accordingly.

TUGS: Join vessel at any designated point. Charges should be ob
from tug operators. Use ship's lines.

BERTHING: General cargo at Leicht's North Dock, 1,500 ft. leng
channel depth. Discharge by ship's gear and shore based equip
Bulk cargo handled at several docks.

CRANES: Shore based lifting devices to 20 tons. 100 ton stiff-l
derrick available for heavy cargo.

BULK CARGO FACILITIES: Available at several places for coa
fertiliser, chemicals, liquid cargo, stone, pig-iron, etc.

BRIDGES: No bridge opening restrictions for railroad bridges. Hi
bridges permit vessels of 300 tons or over to transit at any time. How
heavy land traffic occurs about 0730 – 0830 hrs., 1145 – 1315 hrs
1630 – 1730 hrs., and co-operation of Masters is urged during
times so that city bridges may remain closed.

STEVEDORES: Services performed by Leicht Transfer and Stora
and arrangements should be handled by ship's Agent or direct
Leicht's.

MEDICAL: Subject to regulations of U.S. Customs and Immigratio
St. Lawrence Seaway Authorities. 3 excellent hospitals.

TANKERS: The major oil companies have facilities. Limited o
harbour dimensions.

DENSITY: Fresh water.

FRESH WATER: Available through ship's Agent and water comp

FUEL: Fuel oil available in any quantity. Normal fire precautions

CONSULS: No consuls. Nearest are at Milwaukee, Chicago
Minneapolis.

REPAIRS: Topside and engine repairs available. Complete
service available at Sturgeon Bay, 45 miles North.

DRY DOCKS: No local facilities. Available at Sturgeon Bay, Wisco

SURVEYORS: Available through ship's Agent.

GANGWAY/DECK WATCHMEN: Available at ship's option.

OPENING/CLOSING HATCHES: By stevedores.

REPATRIATION: Available through local Immigration officials.

AIRPORT: 8 miles from port. Served by regular airlines with
30 flights daily.

TIME: Central Standard Time. Central Daylight Saving Time in
from the first Sunday in April to the last Sunday in October.

HOLIDAYS: January 1st (New Year's Day), May 31st (Memorial
July 4th (Independence Day), 1st Monday in September (Labor
Last Thursday in November (Thanksgiving Day), December
(Christmas).

GULFPORT, Mississippi: 30.21 N. 89.05 W. **(See**

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory from Outer Sea Buoy to docks, prov
Gulfport Pilots Association, arranged through Agent. Pilot boards
Buoy.

Pilot boat has red hull, white superstructure with "Pilot"
lettering. When pilot boat is underway, contact can be made
Channel 16.

RESTRICTIONS: The Gulfport Channel is 12 miles long running
Ship Island and Cat Island. Channel is 225 ft. wide and has a
depth throughout of 36 ft. at MLW. Harbour is dredged rectangu
about a 0.25 mile wide and 0.5 mile long, this area being pro
piers. Depth in harbour and along wharves is 36 ft. with a 2
variation. No entry restrictions as to time.

MAX. SIZE: Length of vessel is restricted to approximately
turning basin, no breadth restrictions.

HEALTH: See "Health: All Ports" before first U.S.A. port (Alb

AGRICULTURE: See "Agriculture" before first U.S.A. port (A

RADIO: Gulfport Radio KJC 768 – VHF Channel 16. Continuous

TUGS: 2 tugs (1,200 h.p. and 2,000 h.p.) available but not
unless requested to assist in berthing.

BERTHING: 5,850 linear ft. of berthing space (See "Plan").

CARGO HANDLING: 50,000 sq.ft. transit shed refrigerated
2 container cranes, 1×30 ton and 1×35 ton, in operation. S
usually used but mobile cranes available with 48 hours' notice

STEVEDORES: Must have 12 hours' notice to arrange longshore gangs. Normal work day 0800 – 1200 hrs., and then 1300 – 1700 hrs. Monday to Friday.
MEDICAL: No advance notice required for medical attention, doctor and hospital care readily available.
DENSITY: Brackish.
FRESH WATER: Fresh water is available. Rate 10 t.p.h.
FUEL: Suppliers of marine fuel at the port provide direct barge to ship service. A 185,000 gallon fuel barge is moved from its mooring and placed alongside the vessel for refuelling. The barge is manoeuvred by an 800 h.p. twin screw push boat. Once alongside, pumps on the barge deliver fuel at a rate of 32,000 gallons per hour. Shallow draft coastal traffic can be fuelled at the port or 6 miles South in the Intra-coastal Waterway.
CONSULS: Many countries have consuls within a 100 mile radius of Gulfport.
REPAIRS: Most deck and engine repairs could be arranged within port facilities.
SURVEYORS: Available from Mobile or New Orleans.
GANGWAY/DECK WATCHMEN: Port guards.
REPATRIATION: Can be arranged.
AIRPORT: Gulfport Municipal Airport is approximately 4 miles from the port and served by regularly scheduled airlines.
TIME: The Port of Gulfport is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months.
HOLIDAYS: United States national holidays are observed, cargo work can be arranged on these days at a penalty time.
POLICE/FIRE/AMBULANCE: Telephone number for all emergency services is 911.
TELEPHONE: Can be placed aboard only by special arrangement; not normally available.
GARBAGE DISPOSAL: Waste Management of Mississippi, Inc., P.O.Box 3869, Gulfport, Ms. 39505. Tel: 601-832-3144. Service available 0800 hrs. – 1700 hrs.

Browning-Ferris Industries, P.O.Box 550, Ocean Springs, Ms. 39564. Tel: 1-800-443-6562, 601-392-5108. Service available 0800 hrs. – 1700 hrs.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: The International Seamen and Truckers Center on West Pier (Tel: (601) 868-2525).
CURRENCY: U.S.Dollar.
AUTHORITY: Mississippi State Port Authority at Gulfport, P.O.Box 40, Gulfport, Mississippi 39502. Street Address: One Hancock Plaza. *Tel:* (601) 865-4300. *Telex:* 785197 Gulfp Port Gup. *FAX:* (601) 865-4335. *Contact:* Anthony J. Taormina, Executive Port Director.

HAINES, Alaska: 59.15 N. 135.25 W. (See Plan)

In Lutak Inlet. Located 5 miles N.W. of Haines. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
APPROACHES: Lynn Canal to Lutak Inlet.
PILOTAGE: Pilot pick-up point located in vicinity of Point Retreat.
ANCHORAGE: Lutak Inlet.
MAX. SIZE: Harbour depth 36 ft. at zero tide. Tides: Diurnal range 16 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING:

1. Haines Dry Cargo Dock can be secured by request through City of Haines (Telephone: Area code 907 number 766-2231). Berthing length – 967 ft. and an open surface of over 300 ft. in width. Depth at face of dock – 36 ft. MLLW. No covered sheds, 6 acre open staging area. Crane may be available. Continuous to 300 ft. Alaska State Ferry facility.

Ro/Ro cargo facility at N.W. end of Dry Cargo Dock.

2. Schnabel Lumber Co. Dock: Berthing length – 640 ft. long and 80 ft. wide. Depth at face of dock – 45 ft. No covered storage. Open storage. 35,000-ton capacity for bulk cargo storage. Chip loader with 350 t.p.h. capacity. Crane available.

TUGS: 3 available.
STEVEDORES: 4 gangs.
MEDICAL: Doctor/dentist available.
FRESH WATER: Available in small quantities in temperate seasons only.
FUEL: Not available.
REPAIRS: None.
CUSTOMS: Quarantine, Immigration and Customs locally.
TRANSPORTATION: Air, ferry. Haines Highway principal route connecting Southeast Alaska with the Alcan Highway leading to the interior of Alaska and Canada.
AUTHORITY: City of Haines, P.O.Box 1049, Haines, Alaska 99827. *Tel:* (907) 766-2448. *FAX:* (907) 766-3179. *Contact:* Robert Stokley, Harbour Master.

HAMPTON ROADS DISTRICT, Virginia: (See Plan)

NORFOLK: 36.51 N. 76.19 W.
NEWPORT NEWS: 36.59 N. 76.26 W.
PORTSMOUTH: 36.50 N. 76.17 W.

DOCUMENTS:

3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List.

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
F.M.C. Certificate of Financial Responsibility.

PILOTAGE: Compulsory; is generally arranged through port Agent. Vessels approaching port may use VHF telephone, Channel 16, radio telephone 2738 kHz. Advance notice of 24 hours is required of ETA. Pilot Lookout Tower located at Cape Henry, Virginia, the entrance to Chesapeake Bay.

The Virginia Pilot Association can be contacted by telephone at (804) 496-0995. Pilot monitors tower VHF-FM Channel 11 and VHF-FM Channel 16.

ANCHORAGES: 4 deep draft anchorages have been dredged at Hampton Roads. Two of the anchorages at Sewell's Point, one of which was dredged to 45 ft. and the other to 40 ft. The other 2 anchorages at Newport News are each 40 ft. deep.

Additional deep draft anchorages exist in the protected waters of the Chesapeake Bay at Cape Charles and Lynnhaven. These 2 anchorages, located near the entrance to the Hampton Roads harbour, have a water depth ranging to 47 ft. and can accommodate approximately 120 vessels. In addition, the inner harbour anchorage areas of lesser depth can accommodate up to 40 vessels.

Anchorage Regulations: A change in U.S. Coast Guard Regulations permits colliers and other bulk carriers, such as grain ships, to use the Big Stone Anchorage in Delaware Bay. Previously, the anchorage was open only to oil tankers. The new rules are advantageous to super colliers that are able to carry up to 150,000 tons, taking advantage of the anchorage's minimum natural depth of 55 ft. The super colliers then can be partly loaded up to about 90,000 tons, at Hampton Roads, Virginia, and topped off at the Stone Anchorage by two 30,000 ton barges.

RESTRICTIONS: Ships entering Hampton Roads from the sea follow a course between the Virginia Capes, across the lower end of Chesapeake Bay via Thimble Shoal Channel into the deep waters of Hampton Roads.

Thimble Shoal Channel: Extends from the Virginia Capes across the lower end of Chesapeake Bay into the deep waters of Hampton Roads. Thimble Shoal Channel is presently 1,000 ft. wide and approximately 13 miles long. The channel is 50 ft. deep within the 650 ft. wide outbound lane and 45 ft. deep within the remaining 350 ft. wide inbound lane.

Two channels extend through Hampton Roads, one southward into Norfolk, Portsmouth and Chesapeake, and one Westward to Newport News and up the James River.

Norfolk Harbour Channel: Extends from Hampton Roads into Southside cities via the Elizabeth River into Norfolk, Portsmouth and Chesapeake. Beginning at the Hampton Roads Bridge Tunnel, the Norfolk Channel is 19.6 miles long. Between deep water in Hampton Roads and Sewell's Point the Channel is 1,000 ft. wide and 50 ft. deep. Between Sewell's Point and a point just South of the Norfolk Southern Railway coal piers at Lambert's Point the channel is 50 ft. deep within the 650 ft. to 800 ft. wide outbound lane. Opposite the Naval Base at Sewell's Point and extending upstream to Norfolk International Terminals, the channel is 45 ft. deep within the 600 ft. wide inbound lane. Authorised improvements provide for deepening the Norfolk Channel to 55 ft. between Hampton Roads Bridge Tunnel and Lambert's Point. A 40 ft. channel extends from the coal piers to the N&W Railway Bridge on the Southern Branch. Beyond this point a 35 ft. channel extends 4.6 miles to a point 0.8 miles above the Interstate 64 Bridge, where the channel connects with the Atlantic Intracoastal Waterway route through the sounds of North Carolina to the South Atlantic Coastal States. Funding is available for the engineering and design study of deepening this portion of the Norfolk Harbour Channel to 45 ft., deepening a portion of the Southern Branch to 40 ft. and enlarging the turning basin at the Southern end of the channel.

The width of the Norfolk Harbour Channel is 1,000 ft. from its outer end to a point opposite Norfolk International Terminals; thence 1,250 ft. to the N&W Railway Coal Piers; thence 750 ft. to the junction of the Eastern and Southern Branches; thence up the Southern Branch 450 ft. wide to the Belt Line Railroad Bridge; thence 375 ft. wide for one mile to the N&W Railway Bridge; thence 250 ft. wide to its junction with the Atlantic Intracoastal Waterway route.

Newport News Channel: Extends 6.0 miles Westward from Hampton Roads to Newport News and thence up the James River, 68 miles and 90 miles respectively to the ports of Hopewell and Richmond. The Channel to Newport News has a depth of 50 ft. over a width of 800 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio-telephone communications in the Hampton Roads area are furnished by the Chesapeake and Potomac Telephone Company of Virginia. A regular ship-to-shore channel transmits to ship on 2538 kHz and the ship returns the call on 2142 kHz. A "day-time" ship-to-shore channel transmits to ship on 2450 kHz and the ship returns the call on 2366 kHz. In the very high frequency band, "XY" ship-to-shore is available which transmits to the ship on 161.9 MHz and the ship returns the call on 157.3 MHz. A second "day-time" ship to shore channel transmits on Channel 20 and monitors Channel 16.

TUGS: Tugs are arranged for by the vessel's Agent according to ETA information. The required number of tugs and the horsepower are determined by the assigned tonnage, handling characteristics and final berth destination. Should vessel be unable to manoeuvre normally, Master to advise the Agent and request additional tug power. There are 17 tugs with horsepower up to 4,300 available in the port.

Safe working height of arm 67 ft. 1×4 in. vapour return hose. Controlling air draft at MHW is 135 ft. (3 bridges). Max. draft in channel at MLW is 35 ft. Storage capacity 20 million gallons. Also see "Shipmaster's Report dated June 1992.

Amoco: The terminal of the Amoco Company is located on the Southern Branch of the Elizabeth River, in Chesapeake, about one mile South of the Norfolk Naval Shipyard. This company has a site comprising 80 acres, with a splendid waterfront, on which are erected a ship and barge pier, pipelines, storage tanks, boiler house, tank-car and truck loading racks, and other facililties requisite to a modern petroleum storage terminal.

The terminal has storage capacity of 655,000 barrels for handling gasoline, light fuel oil, bunker C and asphalt.

Vessels carry petroleum products to its terminal from various refineries located in the U.S.A. and from abroad. Petroleum products are also received through the Colonial Pipeline system.

Fuel oil deliveries may be made to vessels at the company's wharf. Deliveries are also made by water to any section of Hampton Roads, Richmond, various other points in the Chesapeake Bay area and its tributaries. Loading equipment for making such delivery consists of barges with the necessary pumps, hose, flanges and other equipment for making up connections. Also see "Shipmaster's Report" dated November 1992.

Mobil: The Mobil Oil Corporation's terminal is located on the Southern branch of the Elizabeth River. Terminal facilities include bulk storage for 10 million gallons of gasoline, 6.7 million gallons of kerosene, 9 million gallons of fuel oil, 2 million gallons of diesel, and 11 million gallons of bonded bunker and marine diesel fuel.

The Mobil Oil terminal can accommodate vessels up to 32,000 d.w.t. Maximum length allowed is 660 ft. with maximum beam up to 90 ft. Maximum draft allowed is 35 ft. Water at this berth is brackish.

MTT: The oil terminal complex is located on the Southern branch of the Elizabeth River. This is a deep water port that can accommodate vessel drafts of 35 ft. and lengths up to 630 ft. with beams to 90 ft.

The Company's facility has a storage capacity of more than 850,000 barrels and handles a complete range of industrial fuel oils including No. 2 fuel oil, No. 4 fuel oil, No.6 fuel oil and bunker oils. The terminal operates around-the-clock and is connected with the Colonial Pipeline system.

Koch: The Koch Terminal is situated adjacent to the C&O Railroad yards in Newport News. It has a storage capacity in excess of 520,000 barrels for handling diesel fuel, No. 2 fuel oil, No.4 fuel oil, No.5 fuel oil, No. 6 fuel oil, bunker fuels and asphalt.

Products are received into the terminal by tanker and barge. This is a deep water port that is located 24 miles from the sea buoy. Maximum draft allowed is 34 ft. Max. length of vessel allowed is 630 ft. with a beam up to 90 ft.

Limitations from environmental factors on berth operations do not exist. The tidal current sets across the approach. Vessels generally sail at any stage of the tide. Controlling depths in the navigation channel are 45 ft. and at the berth the controlling depth is 33 ft. Flood tide is in a N.W. direction, ebb tide is in a S.E. direction. Current velocities are between 1.1 knots and 1.4 knots.

Equipment available at the terminal to contain oil spills include: 200 ft. of boom, launch, oil snares, and absorbent material. Firefighting equipment on the pier is limited, but includes: 2×150 lb. dry powder extinguishers, and 2×20 lb. dry powder extinguishers. There is no water under pressure on the pier. A public telephone is the only means on the pier used for fire emergencies.

Norfolk Oil Terminal Inc.: The terminal is located at Lambert's Point Docks in Norfolk. At Pier L, commodities are handled via 3×4 in. and 2×6 in. lines. At Pier N, commodities are handled through 1×6 in. line. 16 storage tanks with capacities 8,000 – 768,000 gallons. Total storage 3,205,000 gallons (73,331 barrels). Commodities handled include animal fats and oils, vegetable oils, chemicals, latex and fatty acids.

Shipmaster's Report: November 1992.

Vessel (87,000 d.w.t.) berthed at Amoco Jetty.

Max. draft is 34 ft. (F.W.) for any tide, and 35 ft. (F.W.) for high tide only.

Vessels have to return to Hampton Roads to take bunkers.

Stores may be loaded from barge whilst alongside.

Pilot and tugs require 6 hours notice, but Virginia Pilots require 2 hours notice.

Vessels over 100,000 d.w.t. can only transit during daylight hours.

Shore gangway available and adjustable.

Amoco provide transport from the head of the "T" Jetty to the gate (distance 2.5 miles).

DENSITY: Average 40% fresh.

FRESH WATER: Available at all berths. Barge service available if required.

FUEL: All grades available at oil company berths. Delivery by barge to all other locations.

CONSULS: The following countries are represented at Norfolk:

Belgium	Germany	Netherlands
Brazil	Iceland	Norway
Denmark	Italy	Panama
Finland	Mexico	Sweden
France		

GANGWAY/DECK WATCHMEN: Not required unless crew members detained by Immigration.

CERTIFICATES: Cargo Gear Certificate, Derat, Radio, Safety Equipment, and Ship's Register.

REPAIRS: Newport News Ship Building and Dry Dock Company in James River; 5 outfitting piers up to 1,160 ft. length. Floating cranes up to 67 tons capacity. Gantry crane to 900 tons capacity. Other repair facilities and cranes also available.

Norfolk Ship Building and Dry Dock Corporation, situated on East Branch of Elizabeth River. Channel depth 25 ft.; 7 piers equipped for ship's repairs. 4×30 ton diesel locomotive cranes.

Other repair companies in addition.

DRY DOCKS: Norfolk: 1 dry dock 450 ft. long, 57 ft. beam. Berkley plant features the Titan Steel floating dock 950 ft. long, with lifting capacity of 54,250 long tons and second floating dock 670 ft. long, 126 ft. wide lifting capacity 20,000 tons.

Newport News: Dry docks:

	Length inside gate	*Width of entrance*	*Depth of water over sill MHW*
No. 1	650 ft.	92 ft.	33 ft.
No. 2	862 ft.	118 ft.	31 ft.

Williams, Rolf (Surveyor for Scandinavian Marine Claims Office, Inc. and Det Norske (Veritas)), 201 E. City Hall Ave. (10).

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1qt. wine/spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

AIRPORT: Norfolk International Airport, and Patrick Henry International Airport at Newport News, over 100 flights daily to 50 cities.

TIME: Eastern standard time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lee's Birthday; Washington's Birthday (3rd Monday in February); Good Friday; Memorial Day (Last Monday in May); Jefferson Davis Day; Independence Day (July 4th); Labour Day; Election Day (1st Tuesday after 1st Monday in November); Veterans Day (November 11th); Thanksgiving Day; Christmas Day. No work can be arranged on New Year's Day, Labour Day or Christmas Day.

TELEPHONES: Onboard telephones only available at shipyards.

IDENTIFICATION CARDS: Identification required by Immigration for shore passes.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Service available from Incendere Inc., 508 E.Indian River Road, Norfolk, VA 23523. Contact Paul A.Underdown, Jr. Tel: (804) 454-8960. Fax: (804) 543-7661. Service includes dockside pickups at $100.00 each, 44 galls. corrugated containers for packaging of waste at $12.50 each, transporting waste to incinerator, incinerate and deposit ash in an approved landfill, destruction of garbage at $0.30 per pound, provide signed manifest certifying that the waste has been properly disposed of.

WASTE OIL DISPOSAL: Services available from the following private contractors:

Industrial Marine Service, Inc., 1301 Marsh Street, P.O.Box 1779, Norfolk, VA 23501. Tel: (804) 543-5718. Fax: (804) 543-4561. Estimated daily capacity, 6,394 tonnes. Tank trucks. No special berth for this service. Charges are available through the ship's agent.

Marpol, Inc., 1125 East Water Street, P.O.Box 569, Norfolk, VA 23501. Tel: (804) 622-9915. Fax: (804) 626-1806. Estimated daily capacity, 11,017 tonnes. Trucks and tank barges (3,714,000 galls., 378,000 galls., 96,600 galls.). 700 ft. berth at facility. Charges are available through the ship's agent.

PetroChem Recovery Services, Inc., P.O.Box 1458, Norfolk, VA 23501. Tel: (804) 627-8791. Fax: (804) 640-1261. Estimated daily capacity, 7,000 tonnes. Tank trucks. No special berth for this service. Charges are available through the ship's agent.

SEAMAN'S CLUBS: International Seamen's Friend House, 2901 West Avenue, Newport News, Virginia. Tel: (804) 247-6112. Centre of ministry shared between Catholic and non-Catholic sister organisations. Facilities include snacks, currency exchange, international telephone, transport to town/centre.

Lighthouse Baptist Seamen's Mission, 1455 West 38th Street, Norfolk, VA 23508. Tel: (804) 626-3935. Fax: (804) 627-8199. Baptist Seamen's mission – dealing with seamen of any religion. Facilities include telephone, transportation to town, postal services, church services, free bibles and christian literature, currency exchanges, special purchases.

International Seamen's House, 1222 W.Olney Road, Norfolk, Virginia. Tel: (804) 623-4222. Fax: (804) 627-7872. Centre of ministry shared between Catholic and non-Catholic sister organisations. Facilities include snacks, football, shop, currency exchange, international telephone, transport to town.

DEVELOPMENTS: *Authorised Channel Improvement:* Major improvements to the channels serving Hampton Roads were authorised in August 1985 and construction began in March 1987 on the first element of these improvements, consisting of a 50 ft. outbound channel. The authorised improvements provide for deepening the Norfolk Harbour Channel to 55 ft., deepening the Newport News Channel to 55 ft, and constructing a new channel in the Atlantic Ocean to a depth of 60 ft. The authorised improvements also provide for deepening the Norfolk Harbour 40 ft. channel to 45 ft., and a portion of the Southern Branch 35 ft. channel to 40 ft. A deep draft anchorage opposite the City of Hampton will also be constructed in connection with the 55 ft. channel improvements.

Port Expansion: Newport New Marine Terminal: Plans include extension of Pier B on the North side to allow for the berthing of large import automobile Ro-Ro vessels and large cruise passenger vessels; dredging to a depth of 34 ft. at MLW; and modification of Pier B transit warehouse for cruise terminal facilities.

NIT: North expansion Phase I is underway. Project includes dredging new access channel and vessel berthing areas to a depth of 40 ft. at MLW; constructing a new 1,500 ft. long marginal container pier; developing 61 acres of open containerised cargo storage area and new access road with associated landside/waterside facilities. Project is scheduled for completion early 1999.

Expansion is also being undertaken at the coal piers. Dominion Terminal Associates announced plans to expand its facility area by nearly 50%, from it's current 68 acres to 101 acres, in order to accommodate demand for coal. The additional space will serve a wider variety of coal qualities and will accommodate more transhippers interested in moving coals to export and domestic markets.

SHIPMASTER'S REPORT: June 1992.

Berth: Atlantic Energy – Norfolk.

Charts: B.A. Charts No. 2919, 2814 and 2813.

Approach: From the South, the new IMO approved buoyed channel is very well marked and shows up well.

Chesapeake Lt. Tower and Racon is conspicuous from South or East.

Pilots: As per ALRS. Call "Virginia Pilot" on VHF Channel 16, generally works on Channel 11. Pilot control is in Radar Tower, which controls all pilotage movements at the Chesapeake Bay Entrance. It is manned by both Virginia and Maryland Pilots. Position: Lat. 37° 55.6' N., Long. 76° 00' W., close by Cape Henry Lighthouse.

Virginia Pilots operate four fast modern cutters of 23 knots speed (although Pilots report that they have been downrated to 19 knots to assist maintenance). The Cutter Base is in Lynnhaven Inlet (37° 54.4' N., 76° 05.6' W.).

Pilots generally board in the vicinity of "CB" Buoy.

One Pilot takes vessel near the berth, where Berthing Pilot boards from a tug.

Anchorage: Numerous anchorages available, all at the entrance to Chesapeake Bay, which is very exposed to Easterly and North Easterly winds.

All Gas Carriers under Gas Vapours and Liquids are required by U.S.C.G. to anchor in Lynnhaven Roads for inspection. This is mandatory, before proceeding to the berth.

The numerous old wrecks and obstructions in Lynnhaven Roads are "off-putting", but Pilots report all sunk and no hindrance to anchoring.

Pilot is required both Inwards and Outwards, to and from Lynnhaven Anchorage.

Gas Carriers under Vapours and Liquids cannot anchor in Hampton Roads.

All stores, etc., and engine maintenance has to be done in Lynnhaven Roads.

Another acceptable anchorage, with U.S.C.G. approval for laden Gas Carriers, is off Cape Charles Township to the North. At present (1992), U.S. Navy Rapid Deployment Ammunition ships are taking the most suitable anchorages, and the U.S.C.G. does not permit Gas Carriers to presently use the area.

As mentioned, Lynnhaven is very exposed, and there is always a swell running, even in calm conditions.

We used 5 shackles whilst our engine was undergoing a survey.

Tugs: Many tug companies available. We used Moran, taking 2 Tugs joining and leaving at Town Point, Norfolk City. Tugs lines forward and aft.

If a loaded Gas Carrier has to immobilise, a stand-by tug is req under U.S.C.G. Rules. We had to engage a stand-by tug (Mora Lynnhaven Anchorage for 9 hours whilst doing a main engine be inspection.

Channel: From Cape Henry to Atlantic Energy Berth (Chesapea 30 miles, or about 3.5 hours pilotage.

Maximum draft in Channel is 35 ft. from Jones Creek South North of Jones Creek, 40 ft. can be accommodated to the Grain in Jones Creek. For the first stage in Thimble Channel, maximum is called for.

Stand-by forward is required from and to Old Point Comfort.

For Gas Carriers under Vapours or Liquids, the U.S.C.G. only pe daylight navigation. Such ships can anchor at Lynnhaven Ancho during darkness.

Ocean navigation is available in Elizabeth River as far as Mains Turning Basin (36° 46.2' N., 76° 17.9' W.).

To Atlantic Energy Berth, 3 lift-bridges have to be passed thr The Southern most bridge (Norfolk and Western Rail Road) is the restrictive. Vertical clearance (air draft) is 134 ft. H.W. (not 135 charted). Horizontal (breadth) clearance is 218 ft. (not 220 ft. as cha This bridge is about 1.5 miles North of Berth. Therefore, restrictio far as the berth are 35 ft. draft, 134 ft. air draft and 218 ft. breadth breadth calculations, there is a tug strapped alongside.

In general, Panamax size vessels are a maximum normal for Gas Carriers of 52,000 cu.m. partly loaded, regularly use the ber

U.S.C.G.: Very restrictive. As previously mentioned, the U.S.C.G. re Gas Carriers transiting Hampton Roads to load or discharge LPG to undergo Arrival Inspection at Lynnhaven Roads. This is mand even if the vessel has just had an inspection the day before at an U.S. port.

Daylight transit inwards and outwards for all Gas Carriers Vapours or Liquids.

U.S.C.G. conducts inspections from 0700 hrs. to 1600 hrs. Gen inspections take about 3 – 4 hours, with all safety items checked a standard U.S.C.G. Check List, but with particular emphasis on the Analyser and Emergency Shut Downs.

U.S.C.G. escort is provided inwards and outwards from Old Comfort.

U.S.C.G. will not allow fuel deliveries by either tanker truck or whilst on the berth and vessel connected. No boats alongside connected.

With special permission, U.S.C.G. allowed fresh water from a truck to be pumped aboard and provisions to be loaded with ship's from jetty whilst loading in progress.

U.S.C.G. in attendance whilst connecting and disconnecting, and a "rule" about the use of non-sparking tools.

Berth: A trestle (concrete and steel structure) which has been upg over the years. Minimum depth alongside quoted as 31 ft. We density to be 1005 with 3 ft. tidal range.

Vessels up to 750 ft. LOA would have head and stern lines as breasts, otherwise moorings good.

Port side alongside.

Ships midship accommodation ladder/gangway can be landed

Cargo: 1×12 in. Chicksan with auto-disconnect commissioned 1992, with 4 in. VRL attached, but not at present in use.

Shore connect/disconnect.

One Loading Master in hut on jetty at all times whilst connec

Terminal personnel generally helpful and cooperative.

A storage facility only, comprising of 2×1,000,000 U.S. refrigerated tanks (about 4,000 tonnes each) with road and rail discharge/loading facilities. As a general rule, Propane is impor Butane exported. We loaded Butane at −5°C at 85 tonnes/hr., w the maximum loading rate with terminal's 2 pumps. Going down pump barely gets product up the arm and into the ship.

The ship after us was going to discharge Propane, dischar about 400 tonnes/hr.

When road tankers are discharging into the facility, this decrea loading time by 15 minutes a tanker truck. Product from Amoco near by.

Saybolt Surveyor very strict and knows his job.

Terminal Official Title: Atlantic Energy Inc., 2901 South Highway, P.O.Box 1156, Chesapeake, VA.23320-1156. Tel: 8 1018. Fax: 804-487-5084.

Facilities: Generally poor.

No public telephone at Terminal. Nearest public telephone is gate to the right and about 1.5 miles away.

Officers can use Terminal Office telephone for local calls international calls, if they have a credit card.

Fresh Water: Not available on berth. Barge available, 20 minimum, no matter how little taken. Cost U.S.$ 2,900 for 20 including barge. We arranged road tanker delivery and U.S.C.G. permission to pump whilst loading cargo. Truck can to about 75 m. from ship's side. Ship's hoses used. We took 4 23 tonnes nominal capacity each, actually delivered about 80 all. First load very expensive with connecting time and truck pr (U.S.$ 243.00), then next 3 loads at U.S.$ 160.00 each. We 5% discount for cash. Overall charge was U.S.$ 7.50 per 80 tonnes.

Stores: Trucks cannot get within 75 m. of ship's side. U.S not give permission for stores derrick/crane to be used for lif objects (pipes, steel, bottles, drums) whilst Chicksan connecte barge also not allowed alongside.

We obtained permission to use derrick to load provisions an whilst connected. Fortunately our derrick was well aft of Otherwise stores have to be taken when Chicksan disconne Lynnhaven Anchorage.

Fuel: Not available by barge or truck whilst connected. This applies to lub oil. Another restriction for lub oil is that barge will not deliver to Lynnhaven Anchorage, due to swell.

Chandler: With experience over 2 visits, the best chandler is a local firm, Virginia Marine (Telex: 212356. Tel: 804-623-1036). Excellent service and cooperation, good prices.

Out of town chandlers are generally from Baltimore.

Repairs: Phillyship provide good service for commercial shipping in Chesapeake Bay area. Local machine shop at Portsmouth, VA. (Tel: 804-397-7400. Telex: 901086).

Norshipco, near Norfolk City, with extensive engineering and large docking facilities tend to be more orientated to U.S. Navy work, and put too many restrictions in way of commercial repair work.

Charts: There is a local firm, W.T.Brownley & Co., who can supply local U.S. Publications, but are not comprehensive.

The nearest Admiralty "A" Class Agent is Maryland Nautical. Found to be very good. Despatch to Norfolk by UPS or Federal overnight.

Mall: Greenbrier Mall about 4 miles away, is the nearest good shopping. Cost U.S.$ 12.00 in taxi. Loading Master will arrange taxi.

Surveyors: The National Cargo Bureau can provide an independent survey service (they also do Liberian and Panamanian Annuals) (Tel: (804) 622-2393. Fax: (804) 622-8193).

Lloyd's have an exclusive Surveyor at Norfolk. DNV use a freelance or an exclusive from Baltimore.

Airport: Norfolk Airport to North of city, near the Bay coast. About 45 minutes in taxi, outside rush hour.

Boat Service: At Lynnhaven Anchorage, a stores and personnel launch service operates out of Lynnhaven Inlet. Very expensive, especially in overtime hours.

Authorities: Officials will board at Lynnhaven Anchorage if weather fair. Customs and Immigration board with Agent and U.S.C.G.

We found Immigration quick and no difficulties encountered. We had Visaed Crew List done by U.S. Consul in Recife and couriered to U.S.

U.S. Public Health Inspector boards on berthing and each day. Very particular. Vessel is fined U.S.$ 250.00 for any fresh food garbage not in sealed drums, and checks disposal of plastics.

Liberian Inspector: Home of Liberian Inspection Division nearby at Reston, Va. We had Liberian Annual Safety by National Cargo Bureau, very particular over documentation, particularly Officers Licences and Discharge Books. Required Safety/Boat muster and boat lowered. Also required emergency forward fire pump run with water jets and emergency generator run on load.

Notices: Notice from Agent to Master (dated May 1992).

Below is a copy of a letter from the U.S. Immigration and Naturalisation Service dated November 30th 1990, which outlines higher fines and penalties for violations of INS Laws.

Quote:

Please note, if you are going to more than one (1) U.S. port, it is the responsibility of the Agent at the last U.S. port to file with the Immigration Service a "Departure Crew List". This Crew List will show all crew changes made during this voyage. Furthermore, it is your responsibility to advise your Agent at your last U.S. port of all crew changes made at the previous U.S. ports. He should collect the Shore Passes for joining crew members only and pick up a copy of Immigration Form 1-408 (Applicaton to pay-off or discharge alien crewmen). Failure of the above taking place will result in an Immigration fine against the vessel.

Unquote.

This letter is meant to assist you and bring your attention to laws that may not have been enforced in the past, but are *definitely* being enforced presently.

Letter from Atlantic Energy, Inc., to ship's Agent (dated June 1992):

Quote:

Prior to the arrival of the vessel (under your Agency), which is scheduled to arrive in Norfolk on or about 1st June 1992, would you please contact the ship's Master and advise him of Atlantic Energy's cargo connections as follows:

Liquid connection: 12 in. ASTM A150.
Vapour connection: 4 in. ASTM A150.

We request that the vessel advise Atlantic Energy of their cargo manifold sizes, should they be unable to adapt to our flanges. If the vessel has the correct adaptors onboard, would you please ask that they be in place upon arrival at our berth.

Please advise all interested parties that the vessel shall be docked "port-side-to" at our berth.

We request that you arrange for line handlers for both the ship's arrival and departure.

Enclosed is information that should be of interest to the Master of the vessel. Would you please see that this information is given to the Master upon the vessel's arrival at anchorage or before, if at all possible (See "Plan Section").

AUTHORITY: Virginia Port Authority, 600 World Trade Centre, Norfolk, Virginia 23510-1696, U.S.A. *Tel:* (804) 683-8000. *FAX:* (804) 683-8500. *Cables:* Vastports. *Contact:* J. Robert Bray, Executive Director.

HILO, Hawaii: 19.46 N. 155.06 W. (including Kawaihae 20.02 N. 155.50 W.) **(See Plan)**

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load Line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Stores Lists.

PILOTAGE: Pilots boats have VHF. Contact is made on VHF Channel 16, then switch to Channel 12. Pilot service is provided on a 24-hour basis upon suitable advance notice.

At Hilo, Pilot boards on starboard side in position 0.75 mile due East of Paukaa Light. In picking up Pilot, vessels should be on Southerly course with enough speed for steerageway. Special instructions will be given by radio telephone.

At Kawaihae, Pilot station in position 1 mile 287° true from Buoy No. 2. Pilot usually boards on port side with vessel on course for the entrance at dead slow speed.

ANCHORAGES: No safe anchorages either Hilo or Kawaihae for vessels awaiting Pilot. In this situation, a vessel should heave to or steam. Under good weather conditions, safe anchorage can be had in Hilo Bay. Anchorage is inside pilotage waters and requires local knowledge for safety; vessels should not anchor without Pilot.

RESTRICTIONS: At Hilo, under good weather conditions, vessels with draft up to 32 ft. 6 in. can be handled at any time.

At Kawaihae, vessels with draft up to 33 ft. handled anytime.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu.

TUGS: Tugs join vessels at entrance at Kawaihae and at Coconut Island at Hilo. Tug's lines are usually used at no extra charge.

BERTHING: There are many factors which affect berthing at Hawaii Island ports, the most important of which are surge and wind. Vessels should be well equipped with long mooring lines and sufficient additional line to make up 2×900 ft. buoy lines. In all instances, berthing instructions will be given after details concerning vessel and her cargo are received.

Pier No. 1 in Hilo handles bulk sugar vessels and container vessels, 1,220 ft. of berthing space.

Pier No. 3 in Hilo handles tankers, 575 ft. of berthing space.

Kawaihae has one overseas berth which handles tankers, 1,150 ft. of berthing space.

CRANES: Shore cranes available, max. capacity 90 tons.

STEVEDORES: Hilo Transportation and Terminals Co. (Hilo) and Kawaihae Terminals Inc. (Kawaihae).

MEDICAL: All facilities available.

DENSITY: Variable in Hawaii area due to fresh water run-off.

FRESH WATER: Available from county of Hawaii by pipeline.

FUEL: Can be supplied subject advance notice.

REPAIRS: Limited repair service available; almost any type of machine work, welding and ordinary electrical repairs can be handled.

GANGWAY/DECK WATCHMEN: Required for tankers. Other ships as may be necessary due to special circumstances.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one U.S. quart bottle, wine or spirit.

REPATRIATION: Direct air service to Continental United States and to Honolulu International Airport.

AIRPORT: About 1 mile from Port of Hilo and 26 miles from Kawaihae, and is served by regular airlines.

POLICE/AMBULANCE/FIRE: *Hilo:* Police 9353311; Ambulance and Fire 961-6022.

Kawaihae: Police 8857334; Ambulance 885-7334; Fire 961-6022.

TIME: GMT minus 10 hours all year round.

TELEPHONES: Special arrangements may be made with Hawaiian Telephone Co.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Seamen's Passports only required.

AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Port of Hilo, Hilo, Hawaii 96720. *Tel:* (808) 933-4778. *FAX:* (808) 933-4781. *Contact:* Ian Birnie, District Manager/Harbour Master.

HOMER, Alaska: 59.36 N. 151.25 W. **(See Plan)**

DOCUMENTS: See "Port of Anchorage, Alaska".

APPROACHES: Via Cook Inlet. Port located at mouth of Kachemak Bay on Kenai Peninsula.

PILOTAGE:

(1) Southwest Alaska Pilots' Association. Tel: (907) 235-8783. Fax: (907) 235-6119.

Pilot boards 1 mile South of Lands End Lt. (59° 35′ N., 151° 25′ W.).

(2) The Southwest Alaska Pilots' Association serves all ports in Cook Inlet, Prince William Sound, Resurrection Bay, Kodiak Island, the Aleutian Islands, Bristol Bay and Bering Sea. The Pilot Station cable address is "Homerpilot". The Pilot Station stands by on VHF Channels 10 and 16, 24 hours a day; call sign "KCE-203 Southwest Pilots".

ANCHORAGES: Kachemak Bay is excellent anchorage for vessels of any size. Foreign vessels may enter bay to anchor, but must have a Pilot aboard to come to dock.

MAX. SIZE: Harbour depth 40 ft. MLLW. Tidal range 28 ft. (−6 ft. to +22 ft.) Max. draft for berthing 30 ft. at MLLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: Homer Port Radio monitor Channel 16. Call sign "WHG-651".

TUGS: 2 tugs available.

BERTHING: Homer City Main Dock, 410 ft. long and 50 ft. wide. Limited to draft of 30 ft. at MLLW. 3 privately owned mobile cranes available. Capacity 15, 35 and 70 tons.

410 ft. face with sloping bottom suitable for vessels with 20 ft. draft or less at chine. Inside and outside storage is available for holding and staging. Water, gasoline and diesel are available on dock.

Deep Water Dock: Length 344 ft. Depth 40 ft.

MEDICAL: Homer Hospital is a 38 bed hospital with 5 full-time doctors.

FRESH WATER: Available from the berth at both docks.

FUEL: Available at Main Dock.

REPAIRS: Minor repairs possible.

EMERGENCIES: Police department and a volunteer fire department are available plus a rescue truck.

AIRPORT: Daily air service.

GARBAGE DISPOSAL: Skips are provided. Port Authority requests prior notification for large quantities of rubbish.

WASTE OIL DISPOSAL: Available with advance notice.

SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: February 1993.

Berths: Two berths at Homer capable of taking average size merchant vessels.

The old wood pile construction City Dock, used by the Alaskan Ferry and U.S.C.G. cutter and the new Ocean or Deep Water Dock, North of the fishing/boat harbour constructed in 1990 for wood chip exports.

At the City Dock, 30 ft. MLW is available, and at Deep Water Dock, 35 ft. MLW is available.

Berthing can be difficult to impossible on either dock, if a strong N.E. wind is blowing. Berthing is not undertaken on the ebb. Best berthing conditions are on the last of the flood which runs N.W. to S.E. Berthing at either dock is always port side alongside.

Departure can be undertaken on the ebb, but best at near slack water.

The Deep Water Dock is used by cruise liners in Summer and is available for diesel bunkers by tank truck. The Dock has a flat face length of 105 m., plus a further 70 m. to the North (forward) mooring dolphin. Fenders are wood flats on sprung rubber and are very good. New mooring dolphins are to be constructed at the South (aft) end during 1994.

The export of wood chips to Japan from the pier is to be commenced in April 1993, when a conveyor belt will be built down to the connecting roadway.

Ship's gangway required at both berths. Use of normal accommodation ladder not possible due to tidal range (about 25 ft. at Springs).

Also see "Nikiski" – "Shipmaster's Report" dated February 1993.

AUTHORITY: Port of Homer, 4350 Homer Spit Road, Homer, Alaska, AK 99603-8005, U.S.A. *Tel:* (907) 235-3160. *FAX:* (907) 235-3152. *Contact:* Richard David, Harbour Master. Dennis Erlandson, Port Director.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health.
Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registry.
Annual Inspection Certificate.
Load Line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Stores Lists.

Vessels scheduled to call at Pearl Harbour are required to 6 copies of Crew Lists and Passenger Lists, if applicable, a 1 working day prior to arrival, for Naval security requirement.

The United States Immigration Service requires that the Ma vessels manned by alien crew members arriving from a forei present the United States Immigration and Naturalisation Se Officer with a current Crew List (Form I-418) properly visaed i possession. An I-94 should be prepared for each passenger p vessel's arrival.

U.S. Immigration Department representatives are not stationed Hawaiian outports. Customs Officials, however, are stationed at a ports and accomplish both Customs examination and Immigratio

The United States Agriculture Service examines and seals stores from restricted ports. Special arrangements for garbage d may also be required by this Agency, if for example meat abo been purchased in a port where there is a high incidence of "ho mouth" disease. All garbage should be disposed of prior to ar port.

All regulatory bodies assess overtime charges for services o personnel if rendered on Saturdays, Sundays, holidays or after on week-days.

PILOTAGE: Pilot requested by Agent. Channels 16, 12 and 9, call 456". Pilot boat, 37 ft. cabin cruiser, yellow with black striping. On flag necessary for vessel requiring Pilot. Pilot station, Lat. 21° 16' Long. 157° 53' 24" W., no alternative.

ANCHORAGE: Except during strong Kona (Southerly) anchorages for deep-draft vessels exist outside the harbour in M Bay off Sand Island and West of the Main, or Fort Armstrong Ch The anchorage is located within 600 yards on either side underwater sewer outfall line. Anchorage is not permitted ins harbour due to the limited swinging room. An explosives anchorag lies 1.3 miles West of Sand Island's Kalihi Channel, directly of Lagoon.

RESTRICTIONS: Entry at any time subject to harbour control s 24 hours' notice of arrival is obligatory.

MAX. SIZE: *Entrance Channel:* Depth 45 ft. *Harbour:* Depth 40 f

HEALTH: See "Health: All Ports" before first U.S.A. port (Alban

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alba Illness Reports made to Honolulu Quarantine Station.

RADIO: VHF Channel 16, call WHX 528, Aloha Tower Harbour Station.

BERTHING: Berthing given on a "first-come-first-served according to type of vessel and particular requirements as to bunkering, etc. Must be arranged through a local shipping Agen

Pier No.	*Length* (ft.)	*Depth* (ft.)	*Use*

38	62	12	LPG.
39	2,139	13-33	Autos, steel, general and b cargoes.
40	2,260	26-34	Autos, lumber, cement, gra general and bulk cargoes.
51A	556	38	Containers and jet fuel.
51B	800	38	Containers.
52-53	1,746	41	Containers, general cargo molasses, autos and Roll- off.

TUGS: 30 tugs. Tugs normally join vessel within harbour limits. Both ship's lines and tug's lines used depending on conditions.
STEVEDORES: Gangs must be ordered 24 hours in advance. General cargo, average load per hour: 15 long tons; average discharge per hour: 15 long tons.
MEDICAL: Agents would like as much advance notice as possible. Complete medical facilities available. Vaccinations in accordance with U.S. Public Health requirements.
TANKERS: 4 tanker berths, max. draft 36 ft. No slop discharge facilities. *Pearl Harbour:* U.S. Navy Terminal. Max. LOA 800 ft. Max. draft 38 ft. 6 in.
Also see Sections "B" and "C".
DENSITY: Pure salt water, no fresh water allowance.
FRESH WATER: Delivered via 2.5 in. fire hose with meter on pier. Rate of delivery between 30 t.p.h. and 60 t.p.h., depending on the berth.
FUEL: All U.S. grades available, no advance notice other than establishment of credit.
FIRE PRECAUTIONS: Fire wires required by tankers berthed alongside. Permit required for hot work whilst in port.
CONSULS: The following countries are represented in Honolulu:

American Samoa
Australia
Austria
Denmark
Finland
France
Germany
Great Britain
Guatemala
India
Indonesia
Italy
Japan
Korea
Mexico
Monaco
Nauru
Netherlands
New Zealand
Norway
Panama
Philippines
Portugal
Sweden
Switzerland
Thailand
Western Samoa

REPAIRS: All types of deck and engine repairs possible. Hull repairs below water-line in accordance with dry dock capacities.
DRY DOCKS: Commercial within Honolulu Harbour. Dry dock: 2,800 long ton lifting capacity, 385 ft. long, 56 ft. wide. Floating Dock: Lifting capacity 2,620 tons. Length 200 ft. Width 100 ft. Marine railway: 1,400 long ton lifting capacity, 223 ft. long, 65 ft. wide.
Commercial within Barber's Point Harbour. Dry dock: 7,875 long tons lifting capacity, 516 ft. long, 110.5 ft. wide.
GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and 1 bottle, U.S. quart, wine or spirits.
REPATRIATION: All facilities, crews generally leave State within 24 hour period.
AIRPORT: International airport, served by all major airlines, 5 miles from harbour.
TIME: GMT minus 10 hours all year round.
HOLIDAYS:

New Year's Day	January 1st or following Monday
Dr.Martin Luther King, Jr. Day	Third Monday in January
President's Day	Third Monday in February
Kuhio Day	March 26th or nearest Monday or Friday
Good Friday	Friday before Easter

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Available through ship's agent.
WASTE OIL DISPOSAL: Available through ship's agent.

SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar (U.S.$).
AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Oahu District, P.O.Box 397, Honolulu, Hawaii 96809. *Tel:* (808) 587-2050. *FAX:* (808) 587-2075. *Contact:* B. Kim, Oahu District Manager. P.E. Torres, Harbour Master.

(B) BHP PETROLEUM AMERICAS REFINERING INC. (BHPPAR) – BARBER'S POINT

LOCATION: The BHPPAR CALM – Type Single Buoy Mooring (SBM) is approximately 2 miles bearing 146° True from Barber's Point Light on the Island of Oahu, Hawaiian Islands. Position: Lat. 21° 16.2' N., Long. 158° 05.3' W.
DOCUMENTS: *Arrival and Departure Requirements:* All arrival and departure requirements are handled through the ship's Agent. All matters related to arrival or departure should be referred to that Agent.
VESSEL ACCEPTANCE: In order to maintain safe control, all vessels must be nominated to and accepted by BHPPAR prior to arrival. BHPPAR reserves the right to refuse any nomination due to vessel's specifications or previous experience with vessel or similar vessels. As a guide, vessels calling at the BHPPAR SBM should be in compliance with the "OCIMF" publications "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings", and "Standards for Oil Tanker Manifolds and Associated Equipment".

The minimum SWL for the vessel's port hose handling boom or crane should be 10 tons for all vessels. The bow windlass must be capable of pulling 15 tons.

Tankers should have sufficient clean ballast for safe manoeuvring.

Officer accommodation should be available for 2 Pilot/Mooring Masters and one Inspector, meals are to be provided for all three.
PILOTAGE: The area of the BHPPAR and Chevron moorings at Barbers Point were designated as a Federal Pilotage Area, effective 1st May 1991. Tankers will be boarded by a team of 2 BHPPAR Pilots/Mooring Masters approximately 3 miles South of Barbers Point light, or at anchorage if the vessel is proceeding to the SBM from waiting at anchor. The pilot ladder should be rigged to provide an adequate lee for safe boarding. The vessel, if underway should maintain minimum headway. The end of the ladder should be 1.0 m. above the water and crew should be standing-by on deck with a heaving line, in order to take aboard the Pilots' equipment and gear. The Pilot/Mooring Masters will usually board from a small assist mooring tug.

The Pilot/Mooring Masters will initially meet with the Master and advise on approaches to the SBM berth, mooring and unmooring and all cargo operations to be undertaken by the vessel. Manoeuvring of ships within the limits of the terminal shall be done with the advice of the pilot, subject to the understanding that in all cases the Master of the vessel being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of the vessel. The Master or a qualified Deck Officer must be on the bridge at all times when the vessel is manoeuvring.
ANCHORAGE: Vessels have anchored in the vicinity of 21° 16.6' N. and 158° 03.5' W. while waiting for their berthing opportunity. In doing so they are cautioned to remain clear of the approaches to both the BHPPAR and Chevron offshore terminals. Vessels are also cautioned not to anchor within the charted restricted anchorage to the East of the mooring area.

The Honolulu Harbour Master has directed that all tankers awaiting their turn at the Barber's Point moorings shall anchor in the vicinity of the moorings in lieu of the anchorages off-port Honolulu.

As this is a Federal Pilotage Area, the vessel should contact its Agent regarding pilotage requirements and a proper anchorage location so as not to interfere with ongoing tanker operations at the two petroleum berths in the area.
TUGS: Two assist boats and a tug are used during the mooring operation. One boat will assist with lifting the mooring hawser/chain to the vessel, one will attend the floating hose string, and the tug will be made fast astern to assist in manoeuvring. The tug astern will use its own hawser and the ship's crew should be prepared to have it on board shortly after the Pilot/Mooring Masters board. Following mooring, the tug will remain made fast to the tanker's stern to prevent the tanker from over-riding the SPM. One of the assist boats will help in lifting and connecting the floating hoses. One assist boat will then stand-by as an emergency/oil spill response boat.

By order of the U.S. Coast Guard Captain of the Port, all laden or partially laden tankers, mooring or unmooring at the BHPPAR SBM must have adequate tug assistance standing by until safely moored or unmoored and well clear of the terminal.

Tug and assist boat will be arranged through the Agent and approved by BHPPAR Pilot/Mooring Master prior to the tanker's arrival.
RESTRICTIONS: Berth and terminal operate 24 hours a day. Mooring and unmooring during hours of darkness is customary. At times weather and sea conditions can deteriorate to the extent that mooring operations are suspended and/or vessel must be unmoored.
MAX. SIZE: In general, tankers having these maximum particulars are acceptable:

LOA	945 ft.
Summer d.w.t.	150,000 tons
Bow to centre manifold	470 ft.
Draft	65 ft.

RADIO: 72 hours, 48 hours and 24 hours prior to arrival, tankers should advise BHPPAR Hawaii Marine Operations (Telex 7430292) of their ETA.

VHF: During loading/discharging operations, the Pilot/Mooring Master will have 2 portable VHF transmitter/receiver radios for communications between the tanker and BHPPAR Pumphouse Control Station.

BHPPAR use the following Simplex VHF frequencies:

Channel 6	Emergency	156.30 MHz
Channel 9*	Ship to Shore (primary)	156.45 MHz
Channel 16	Calling/Emergency	156.80 MHz
Channel 19A*	Ship to Shore (Secondary)	156.95 MHz

(*Either 9 or 19A may be used as working Channel).

BHPPAR Pumphouse	Call Channel 16, Communicate Channel 9/19A, Call sign: "KTD 466".
BHPPAR Hawaii Marine Operations	Call Channel 16, Communicate Channel 9, Call sign: "KZG 757" (Not guarded).

TERMINAL FACILITIES: BHP Petroleum Americas Refinery (BHPPAR) is located onshore to the East of Barber's Point Light about 2 miles from the offshore marine terminal.

The offshore terminal consists of a CALM type single point mooring buoy. A 30 in. crude pipeline, a 20 in. clean product pipeline and a 16 in. bunker pipeline connect the SBM to the shore. 3×840 ft. long 16 in. floating hoses reduced to 12 in. over the rail, connect the tanker to the SBM for cargo operations. The bunkering over-the-rail hose is 8 in. Flanges are standard 150 lb. ANSI-B lap ring type.

Crude oil is normally discharged through 2 hoses with a max. operating pressure of 150 p.s.i. and a max. flow rate of 33,000 bbl./hr. per hose. Loading rates vary between 6,000 bbl./hr. and 12,000 bbl./hr., depending on the product.

BALLAST: Normally, no dirty ballast is accepted. However, with prior notification, facilities can be made available to receive limited quantities. The vessel will be charged for use of the refinery ballast facilities.

Tankers must arrive with sufficient clean ballast for safe handling, having due regard to existing weather and sea conditions. It is the responsibility of the Master to ensure that no oil or contaminated ballast of any kind is pumped overboard. Inspection of ballast is strict. Any trace of oil on the surface of the ballast will preclude overboard discharges.

Tankers equipped with a segregate ballast system are permitted to discharge cargo and load ballast simultaneously with prior approval of the Pilot/Mooring Master.

MOORING/UNMOORING: Prior to mooring, the Pilot/Mooring Master will deliver a copy of the "Terminal Conditions" letter to the ship's Master for his signature (See "Appendix"). By his signature he agrees, on behalf of his owners, to comply with all relevant terminal conditions.

The ship will moor to a single hawser through the forward centreline Panama fairlead. The hawser is 180 ft. long, connected to a 26 ft. long chafe chain. A 500 ft. long 10 in. poly pick-up line is attached to the chain for heaving it on board. The chafe chain will be secured using either a bow chain stopper or vessel's bitts with a terminal supplied nylon snotter, depending on the type of mooring equipment installed on the vessel.

The size of the chafe chain is 76 mm. (3 in.). A 54 mm. (2.15 in.) piece of chain can be installed only if absolutely necessary for smaller vessels.

The ship's crew is responsible for securing the mooring chafe chain with advice from the Pilot/Mooring Master. A suitable messenger line should be available on the fo'castle to retrieve the mooring hawser pick-up line. A ship's deck officer shall be on the bow during mooring and unmooring operations. The Pilot/Mooring Master will be stationed on the bridge to advise the Master and crew during approach and mooring operations. A second Mooring Master will be stationed on the bow.

HOSES/CARGO OPERATIONS: The ship's crew is responsible for connecting and disconnecting hoses. A ship's deck officer shall be in the area of the cargo manifolds during hose handling operations. A Pilot/Mooring Master will be available to advise the crew during hose operations. The ship's crew is responsible for all cargo operations. The Pilot/Mooring Master will advise with respect to operating conditions and hazards, but will not direct the loading or unloading.

It is dangerous to close ship's valves against the oil stream. Such a procedure creates excessive pressure which may damage terminal facilities. Tankers will be held liable for damages resulting from to observe this precaution.

The Pilot/Mooring Master reserves the right to suspend oil tr operations, if necessary, to protect the terminal facilities o environment.

All rules and regulations concerning safety, local conditions, te operations and oil transfer will be carried aboard the tanker by the Mooring Master.

The following are specific requirements for all vessels while m at the BHPPAR SBM:

1. The vessel's main engines, steering gear and all nec equipment shall be maintained in a condition to allow imm manoeuvring of the vessel.
2. The Master or his qualified deputy must be available to re immediately on the bridge to take control in the event of an eme or upon request of the Pilot/Mooring Master.
3. A qualified bow/SBM lookout shall be maintained to report if th begins to encroach upon the buoy. This lookout shall be in contact with the deck watch officer.
4. Sufficient crew shall be available to disconnect hoses, unmo get underway at all times.
5. An officer fluent in English shall be on duty at all times.
6. Oil transfer shall cease if radio communication with the term lost.
7. Oil transfer shall cease and the U.S. Coast Guard notified i spilled.

All tankers are expected to unmoor as soon as practicable completion of cargo operations. The ship's crew will disconnect and unmoor. During unmooring a Pilot/Mooring Master will be sta on the bridge to advise the Master. A second Mooring Master a assist from the bow.

FRESH WATER: Not available at SBM. Available at limited locat Honolulu Harbour.

FUEL: Subject to availability, bunker and diesel fuel can be supp the SBM. Prior arrangements with BHPPAR are required. Fuel delivered by barge in Honolulu or off port.

Bunker orders: Telex 7430292 or Telephone 808-547-3269, 3

MEDICAL: Honolulu has many excellent medical facilities and ho Services can be arranged by local agent.

REPAIRS: Limited ship repair facilities are located in Honolulu.

STORES: Stores are available in Honolulu. Stores cannot be while the tanker is in the mooring, except with express permis the Pilot/Mooring Master.

AIRPORT: Honolulu International Airport has regularly schedule to all parts of the world.

TIME: The Hawaiian Islands observe "Hawaiian Standard Time round which is GMT minus 10 hours. Daylight Savings Time observed.

SAFETY: Tankers are to comply with the OCIMF/ICS pub "International Safety Guide for Tankers and Terminals", current

The tanker's Master, Officers and crew are responsible for al aspects regarding their vessel.

WEATHER/TIDES: The Master is referred to published instructions for this area for information on tides, currents, w weather.

The Hawaiian Islands are dominated in all seasons by trad from the N.E. These tradewinds are present about 75% of the ti their average velocity is 12.5 m.p.h. They exceed 2 approximately 2% of the time; however, gusts approaching 10 are possible.

Hawaii's average temperature ranges from about 74°F in M 79°F in September. Almost everywhere in Hawaii, the warm coolest months differ, on the average, by only 9° or less.

"Kona" weather refers to the Southerly winds which occ frequently during the months of October through April. Durin storms, heavy rainfall and cloudiness can be expected. M scheduled during these months may be subject to delay.

The predicted times and heights of the high and low tides are pu for Honolulu. The periodic tides around Barber's Point average to 2 ft. and are normally mixed. The effect of strong winds a normal tidal action may cause water levels to fall considerab chart datum and/or rise considerably above MHHW. At Barbe where the trades usually blow directly off the land, a shift to Ko or to a calm has been observed to raise the tide level a few a foot.

Currents at the mooring normally run parallel to shore in an and Westerly direction. The maximum velocity varies from 3 second on the surface to 1.3 ft. per second 3 ft. above the sea

Tsunamis or tidal waves are possible in this area althou infrequent. On receipt of a tsunami warning, tankers will be u and will proceed to safe locations until the warning is lifted or th is passed.

APPENDIX: TO: Master
SUBJECT: TERMINAL CONDITIONS – BHP PETROLEUM A
REFINING, MARINE TERMINAL

Welcome to BHP Petroleum Americas Refining (BHPPAR Terminal, Barbers Point, Oahu, Hawaii. You are advised that at our Terminal, your vessel is subject to all applicable regulations of the United States and the State of Hawaii, regulations issued by the U.S. Coast Guard and other federal executive agencies. The following instructions and guide provided to promote safe operations while your vessel is moo BHPPAR Marine Terminal.

The following definitions are used herein:

"Terminal" means the oil transfer facility operated by the BH Barbers Point, Oahu, Hawaii, and all associated buoys, hos valves and other appendages in or beneath the sea at the T

"Terminal Operator" means BHPPAR and its parent a companies, and their directors, officers, employees, contractors and agents.

"Terminal Services" means any and all services of any description (whether compulsory, voluntary or otherwise) provided or performed (whether for consideration or otherwise) by or on behalf of the Terminal Operator at or on or about the Terminal and/or the tanker within 3 nautical miles of the Terminal and rendered directly or indirectly in connection with the mooring and/or transfer of crude oil or petroleum product at the Terminal, including without limit to the foregoing, pilotage, navigation, berthing, mooring, unmooring, transfer procedures, communications, watch, divers, tug or workboat assistance or other services, assistance, direction, advice, instruction or conduct whatsoever.

"Tanker" means the vessel requiring Terminal Services to be provided or performed.

"Tanker Owners" means, jointly or severally, the Tanker, her Owners, Charterers, Owners of cargo and/or bunkers aboard the Tanker, and their respective directors, officers, employees (including Master and crew), agents and contractors.

"Information Manual" means the BHPPAR SPM Marine Terminal Information Manual, latest issue.

"Operations Manual" means the United States Coast Guard approved Marine Oil Transfer Facility Operations Manual for the BHPPAR SPM Terminal, latest issue.

The provision or performance of any Terminal Services are rendered in consideration of, and accepted by the Tanker and Tanker Owners and expressly subject to agreement with the following conditions:

1. At all times and under all circumstances, the Master of the Tanker will remain solely responsible for the proper navigation, operation, manoeuvring, mooring and unmooring of the Tanker, connecting and disconnecting hoses, discharging and loading cargo and bunker fuel, ballasting and deballasting, safe loading of the Tanker, pollution prevention and compliance with all laws, regulations and orders issued by the competent authority, as well as the instructions herein the Information Manual and the Operations Manual.
2. The Terminal Operator shall not be responsible for or liable to the Tanker or Tanker Owner or any other person in respect to any death, personal injury, illness, loss or damage to property or delay arising directly or indirectly from the performance or non-performance of any Terminal Service.
3. It is agreed that all persons employed or contracted by the Terminal Operator in connection with performance of Terminal Services are supplied on the condition that in so providing or performing each is a servant of the Tanker in every respect and not the servant of Terminal Operator. The presence of such persons in or about the Tanker and performance or non-performance of Terminal Services in no way relieves the Tanker, her Master or crew of any obligation, responsibility or liability in connection with the safety, condition, operation or proper navigation of the Tanker or its property and cargo. It is further agreed that the Tanker and Tanker Owner shall indemnify and hold harmless Terminal Operator from any liability, loss, claims or damages arising out of the rendering of any Terminal Services to the Tanker, including but not limited to services performed by Pilots/Mooring Master(s), operators, crews and boats, whether or not arising out of the fault of said Pilots/Mooring Master(s), operators, crew or Terminal Operator.
4. That while the Terminal Operator will endeavour to insure that Terminal Services are safe and suitable, no warranty, guarantee or representation (express or implied) as to the safety or suitability or otherwise is given.
5. That the Tanker Owners shall be solely responsible for all liability for pollution or contamination by oil or any other substance, and for the direct and indirect consequences of same, if such pollution or contamination is caused directly or indirectly by the Tanker, whether negligently or otherwise, or if the pollution or contamination occurs as a result of escape of oil or other substance from any point on the Tanker. Should a spill occur at the Terminal, Tanker and Tanker Owners shall immediately take the action necessary to clean up the spill and mitigate its effects. Terminal Operator is authorised, at its option with or without notice to Tanker and Tanker Owners to take the action and incur the expenses necessary in its judgement to clean up any spill and to mitigate its effects, and Terminal Operator shall be entitled to reimbursement by them for any expenses which it may incur.
6. That if the Tanker or any part of it sinks, or becomes a wreck or an obstruction in any part of the Terminal or its approaches, the Terminal Operator shall be empowered and have the right to remove the obstruction or wreck with or without notice to the Tanker and Tanker Owners. All expenses of such removal shall be borne by the Tanker and the Tanker Owners at the time of the incident which caused the wreck or obstruction, and Terminal Operator shall be entitled to reimbursement by them for any expenses which it may incur in surveying and removing the wreck or obstruction.
7. That the Tanker Master acknowledges receipt of a copy of the Information Manual, and agrees to comply with the provisions therein.
8. That the Pilot/Mooring Master, as representative of the Terminal Operator, is entitled to suspend Terminal Services and the transfer of cargo or bunkers in the event of any of the following:

The Tanker fails to comply with any applicable federal or state law, regulations or orders issued by competent authority, the provisions of the Information Manual, or the Operations Manual.

The Tanker is not in all respects ready or fit to berth at the Terminal and conduct transfer operations.

Weather or other environmental conditions exceed or are expected to exceed safe operational limits.

9. These conditions shall be governed and construed according to the laws of the State of Hawaii.

By his or her signature below, the Tanker Master acknowledges receipt, understanding and agreement to the provisions of these Terminal Conditions, on behalf of the Tanker and Tanker Owners.

Pilot/Mooring Master –
On behalf of the Terminal Operator

Tanker Master –
On behalf of the Tanker and Tanker Owners

Date and Time

GENERAL: All tankers calling at United States ports must undergo inspection by the United States Coast Guard. Upon successful completion they will be issued a "Tank Vessel Examination Letter" that is valid for one year. No tanker is permitted to transfer oil without a valid "TVEL".

"Notice of Readiness" will not be accepted at time of arrival unless the tanker is in all respects ready to load or discharge.

Laws of the United States govern this terminal and all personnel are required to abide by them. Regarding any matter in question, it is the responsibility of the Master to obtain the necessary clarifications from his local agents.

OPERATOR: BHP Petroleum Americas Refining Inc., 733 Bishop Street, P.O.Box 3379, Honolulu, Hawaii 96842. *Tel:* (808) 547-3395/3715/3769. *Telex:* ITT 7430292. *FAX:* (808) 547-3807, 3080. *Contact:* Peter Latham, Superintendent – Marine Maintenance/Operations.

(C) CHEVRON U.S.A. INC. – BARBER'S POINT:

LOCATION: Chevron U.S.A. Inc. has been granted the use of the following anchorage for its Barber's Point Offshore Tanker Terminal:

> The waters of the Pacific Ocean within an area beginning at a point in Latitude 21° 16' 58" N. and Longitude 158° 04' 39" W., thence on a bearing of 090° true, 850 yards, thence on a bearing of 180° true, 450 yards, thence on a bearing of 270° true, 850 yards, thence on a bearing of 000° true, 450 yards to the point of commencement.

The centre of the above described area is on an "approximate" bearing of 119° true, 2.3 miles from the Barber's Point Light. The four corners of the mooring are marked by buoys. The two Southerly corners of the area are marked by lighted buoys which are painted yellow and red and are in 84 ft. of water. The Northerly corners of the area are marked by white spar buoys and are in 66 ft. of water. The area is designated as Area "C" – See "Plan".

The offshore terminal facilities in the above described area are owned and operated by the Chevron U.S.A. Inc., Hawaiian Refinery, and serve to handle cargo between the refinery at Barber's Point and tankers calling at the terminal.

The offshore tanker terminal is the responsibility of the Blending and Shipping Area Supervisor, Chevron U.S.A. Inc., Barber's Point, Oahu, Hawaii. The marine representative in Hawaii is the Chevron Shipping Company Port Captain. He is responsible for all ship operations.

DOCUMENTS:

A. *For Immediate Entry for Customs* (for Preliminary Entry Certificate Issuance):
   - Original and 3 copies of I–418, Crew List and Passenger List.
   - Original and 3 copies of CF–1304, Customs Crew Effects Declaration.
   - Original and 3 copies of CF–1303, Customs Ship's Stores Declaration.
   - Original and 3 copies of CF–1301, Customs General Declaration.
   - Original and 3 copies of CF–1302, Customs Inward Foreign Manifest.
   - Original and 3 copies of CF–1300, Customs Master's Oath of Entry.

   For Immigration Inspector:
   - Visaed Crew List (Form I–418) or Waiver prepared in lieu – fee U.S.$15.00.
   - Form I–95, completed for each crew member for issuance of D–1.

   For USDA Inspector (when entering Honolulu Harbour):
   - Shipmaster's Declaration (AIQ–43) – (Inspector will bring on board).

B. *Required for Formal Entry and Clearance at U.S. Customs House:*

   Entry:
   - Original set of Preliminary Entry Manifest as prepared dockside (see above).
   - Port Clearance (last port).
   - Vessel's Certificate of Registry.
   - U.S. Tonnage Tax Receipts (CF–1002), prior voyages.
   - SOLAS Certificate (Safety Equipment Certificate).
   - Load Line Certificate.
   - Certificate of Financial Responsibility (CFR).

   Clearance:
   - Master's Oath of Clearance, original and 2 copies, CF–1300.
   - General Declaration, original and 2 copies, CF–1301, signed by Master.

PILOTAGE: Pilotage is compulsory for all vessels using the berth. This service is performed by the Chevron Shipping Company Mooring Master who remains aboard the vessel the entire time the vessel is in the berth. The Mooring Master will advise the vessel's Master on approaching and departing the berth, mooring, and unmooring. With the concurrence of the vessel's Master, this advice may take the form of directions to members of the vessel's crew. All manoeuvring within the mooring area should be done in accordance with the advice of the Mooring Master. Nevertheless in all cases the Master of the vessel shall remain solely responsible on behalf of the vessel's owner, for the safety and proper manoeuvring of the vessel. The vessel's Master and a qualified deck officer must be on the bridge at all times while the vessel is manoeuvring.

Pilot Station: When not anchoring on arrival, a Chevron Shipping Company Mooring Master will board arriving vessels. For vessels arriving, the Mooring Master boards about 2 miles South of the anchorage area.

ANCHORAGE: Pilotage is not required for anchoring in the Barber's Point Terminal area. Foreign flag vessels, however, should not enter inland waters North of a line connecting Barber's Point Light to Diamond Head Light and all vessels must remain clear of several prohibited anchorage areas. Masters should be aware that this is a very limited area for anchorage with deep water and poor holding ground. Vessels awaiting berth may anchor, however, in such a position so that the approach to and departure from the berths is not impeded. Chevron recommends (but does not warrant the safety of) anchoring within a 500 yard radius circle centred on position: Latitude 21° 16.2' North, Longitude 158° 03.7' West (approximately 3.2 miles East–Southeast of Barber's Point Light). Vessels should not anchor directly South of the Chevron U.S.A. Berth unless next scheduled for berthing as notified by Chevron Shipping Company, Honolulu.

RESTRICTIONS: Mooring operations are conducted in daylight only. Unmooring operations can be conducted at any time, day or night, weather permitting.

MAX. SIZE: *Berth Capacity:*

A. Maximum length overall 1,000 ft.

B. Maximum distance stern to centre manifold 500 ft.

C. Maximum deadweight tonnage 150,000. Chevron may allow vessels of a larger size under special circumstances to be determined on a case–by–case basis by Chevron Shipping Company.

D. Maximum draft 50 ft. (salt water) in the Summer. Max. draft is 52 ft. in the Winter. Vessels with a draft greater than 50 ft. (salt water) may be accepted on a case–by–case basis.

HEALTH: Vessels arriving from a foreign port must clear with U.S. Customs and Immigration before handling cargo. This is normally done with the assistance of a local agent. Either the vessel or the agent is required to furnish the U.S. Coast Guard at least 24 hours' advance notice of the ship's arrival time.

The agent brings the port authorities to the mooring area in a launch where they board.

Should a vessel arrive from a foreign port with sickness on board, the U.S. Public Health Service must be notified. This is usually done through the agent.

TUGS: It is a U.S.C.G. requirement that all laden tankers are required to use tugs for mooring and unmooring. A mooring launch is used to attach the vessel's lines to the mooring buoys and assist in picking up the submarine hoses. A mooring launch stands by continuously to assist in unmooring and in any emergency which may arise while the vessel is in the berth.

BERTHING: Within the mooring area there are 7 mooring buoys. Vessels should moor by using both of the ship's bow anchors and by running lines to the mooring buoys.

Mooring Equipment: Chevron U.S.A. Inc. reasonably believes, but does not warrant, that vessels meeting the following criteria may safely moor at the berth.

A. All ground tackle must be in good working condition. Vessels up to 50,000 d.w.t. must have at least 10 shackles of chain on each anchor. Vessels over 50,000 d.w.t. must have at least 12 shackles of chain on each anchor.

B. Mooring wire and rope requirements are shown on the "Summary of Minimum Wire and Rope Requirements" – See "Appendix".

C. To accommodate wires and/or ropes, winches, fairleads, bitts and chocks must be so placed that mooring lines (wires or ropes) may be handled as follows:

1. Vessels smaller than 80,000 d.w.t.:
   (a) 3 lines on the forecastlehead or main deck forward (2 to weather side, 1 to lee side).
   (b) 3 lines on the main deck aft (2 to weather side, 1 to lee side). It is desirable that winch or warping head arrangement be capable of working one line or wire out of each side simultaneously.
   (c) 4 lines on the poop deck (2 to weather side, 1 aft and 1 to lee side).
2. Each synthetic line must be secured to a separate bitt.
3. For vessels larger than 80,000 d.w.t., fittings must permit doubling of all lines for a total of 14 mooring lines.

D. Each mooring winch must be capable of heaving the first layer of wire or rope on the drum at a no-load speed of at least 150 ft./min. and a loaded speed of at least 75 ft./minute. The respective winch speed must be maintained during simultaneous operation of one winch on the main deck forward, one winch on the main deck aft, 2 winches on the stern and one anchor windlass operating.

E. Mooring winches must be capable of warping the vessel in position without tug assistance. On a case-by-case basis the Mooring Master may waive this requirement and utilise tug assistance instead. Tugs will be for vessel's account.

Berthing Procedures: The procedure is modified to fit conditions of the berth, wind, current, sea state, vessel size/loading, limitations of vessel's mooring gear, and other factors as recognised with the advice of the Mooring Master.

In general, the following procedure is followed for typical berthing.

Vessel approaches the mooring on a due North heading, passing approximately 200 yards East of No. 6 mooring buoy.

Starboard anchor is let go at Point A and 9 – 9.5 shackles of chain are paid out on the run, starboard chain is then held.

When starboard chain fetches up leading aft, port anchor is dropped at Point B and stern is worked into berth as the starboard chain is held and the port chain is paid out to approximately 8 shackles and the lines are run to the mooring buoys. Then both chains are adjusted as necessary to position the vessel properly in the berth.

Wind and current will largely govern usage of tug assistance and which mooring lines are run out first.

Miscellaneous Vessel Requirements:

A. Vessels should be equipped with a searchlight on each bridge at to assist in illuminating buoys during mooring and unmooring at

B. The ship's crew is required to perform all hose handling (including raising, connecting, adjusting, disconnecting, and lo the hoses), and adjusting of mooring wires and anchor chai addition, the crew will be required to take aboard a gear baske to return it to the mooring launch before departure. All of this will be done with the advice of the Mooring Master.

C. All vessels are required (at their expense) to provide food accommodation for the Mooring Master and up to 3 mooring la personnel for the duration of the visit.

D. All vessels shall comply with regulations and procedures set fo the Operations Manual for the Chevron Barber's Point Of Tanker Terminal in addition to U.S. Coast Guard Regulatio forth in Title 33 of the Code of Federal Regulations (33 CFR). event of conflicts between the Operations Manual and the Regulations, the provisions of the USCG Regulations shall p except when provisions set forth in the Operations Manual are stringent than USCG's and other government regulations.

E. All vessels are subject to inspection to confirm their suitability Barber's Point berth. Vessels not meeting any one o requirements may be refused berthing.

F. Vessels may be required to unberth and/or otherwise incur during adverse weather conditions.

Departure from Berth: The procedure for leaving the berth is conve for such moorings and includes the following steps:

Hose is disconnected, blinded and lowered to the sea botto

Lines to buoys are slacked by the vessel's crew then releas the buoy by the mooring launch crew.

Anchors are either heaved in simultaneously or the port and heaved in first, while No. 5 line is held until the vessel's stern clear of the spar buoys.

Mooring Master leaves the vessel after it is underway and of the moorings.

MEDICAL: Arrangements must be made with the ship's Age medical services. Medical services are normally obtained by taki patients to Honolulu by launch. This is a distance of 12 miles (one Ambulance service is provided by the City & County of Honolulu th the island–wide emergency telephone No: 911.

HOSES: Two pipelines serve to transfer products between the te and the refinery, 1×20 in. diameter and 1×30 in. diameter. Hose attached to the ends of each of these pipelines are raised by lift free end of the hoses by their attached buoys and chains. Whe free end of the hose string is above the vessel's deck, the hose is secured to the vessel by an attached chain bridle between th and second lengths of the hose string. The end of the hose is lowered in a smooth curve to the deck, the cap removed and the connected to the vessel's manifold. Both pipelines and hose s terminate on the port side of the vessel.

The hose string description is as follows:

Pipeline	*Hose Order from Shore*	*No. of Sections*	*Hose Diameter* (in.)	*Hose Length* (ft.)
20 in.	1	1	16	25
	2	5	16	30
	3	2	12	30
	Total	8		Total
30 in.	1	1	16	25
	2	10	16	30
	3	2	12	30
	Total	13		Total

Each hose string is terminated on the free end of the last diameter section by a lever–operated, blanked butterfly valve standard 12 in. 150 ANSI flange. The 20 in. system is normally u transferring gasoline products. The 30 in. system is normally u transferring crude oil and fuel oil.

The submarine pipelines extend nearly 2 miles to the shore a approximately one additional mile across flat land to the C Refinery. Both submarine pipelines contain internal gut water line can be used to provide heat when hot water is circulated throug Water is pumped out one gut line from the refinery and returns the other. The two gut lines are connected at the seaward end by submarine hose.

Hose Handling/Cargo Transfer Equipment Requirements:

A. Port hose boom and related equipment shall have minim working load capacity of 10 long tons except that vesse 30,000 d.w.t. may have 7 long ton minimum safe work capacity.

B. Bitts for hanging-off the hose chain should be provided in fro port side manifold. If the vessel is to load bunkers while cargo, separate bitts shall be provided for the bunker hose the port side.

C. Rail to manifold distance should not be less than 15 ft. T bar should not be higher than the lower lip of the manifold

D. All fittings, piping and valves outside of and including the on the ship's cargo and bunker systems must be of steel co and properly supported by a permanent installation (i.e., ve meet the Arco Cast Iron Clause). No more than one reduc the vessel's permanent installation will be allowed and in all connections must be made inside the oil drip pan.

E. All vessels must have the capability of loading segregated ballast during discharge equal to at least 30% of vessel deadweight. Those with the capability of handling segregated ballast quantity above 30% will be less subject to delay during adverse weather conditions. Vessels may load segregated ballast during discharge of cargo. Ballast may be loaded into unsegregated systems either during cargo discharge or when discharge is interrupted, but only if piping used for ballast is segregated from cargo piping by at least two valves. Single valve separation is acceptable if it can be shown that no leakage will occur through the valve except that in this case ballast cannot be loaded concurrently with transfer of cargo. Vessels not capable of meeting these requirements may be forced to vacate the berth prior to completion of discharge.

BALLAST: There are no shore facilities for handling either dirty or clean ballast at the terminal.

Pollution: It is imperative that no oil or pollutants of any type escape into the water. All regulations regarding pollution of the sea or air must be complied with.

Reporting Oil Discharges or Spill: Any oil spill into the water from a vessel in the moorings, at anchor, or underway in the vicinity of the Terminal shall be immediately reported to United States Coast Guard and the Terminal facility. If a Mooring Master is onboard, he shall notify the shore facility by radio as appropriate. In addition, the ship's Master shall in all cases notify the vessel's agents of the occurrence of the spill, no matter how small nor from what cause. If no Mooring Master is aboard, the vessel shall inform the Terminal facility by the most expeditious means available. Any other notifications required of the vessel by law shall also remain the responsibility of the vessel to carry out.

FRESH WATER: Not available.

FUEL: Bunkering is not permitted or available at the mooring.

REPAIRS: Repairs which render the vessel incapable of getting underway are prohibited while the vessel is in the berth.

TIME: All islands in the State of Hawaii are on Zone plus 10 (10 hours slow of Greenwich Mean Time) throughout the year. All communications should be in local time.

WEATHER: *Normal/Storm Conditions:* The local weather is usually moderate with temperatures between 75°F. to 85°F. and N.E. trade winds between 10 to 15 miles per hour. Tropical storms and hurricanes occasionally affect the islands between June and November. They cause high surfs and wind conditions at the mooring. In Winter months, storms with strong southerly winds called "Kona" winds may render the berth unusable for several days at a time. All vessels must be especially alert to the dangers caused by this type of weather condition.

Other violent winds may occur with the passing of a frontal system or a trough. These are more localised and occur from either the North or the South with violence and little warning.

A complete discussion of local weather is contained in the U.S. Coast Pilot No. 7. Up-to-date weather information is broadcasted by the National Weather Service on 162.55 MHz.

Any changes in the weather should be immediately brought to the attention of the Mooring Master so he may take appropriate action.

Tides and Currents: The maximum tidal range at the Mooring Area is approximately 3 ft. Mean higher high water is 2.0 ft., mean tide level is 0.8 ft. and mean lower low water is 0.0 ft. The extreme low water is −1.0 ft.

Currents normally set from East to West and are unpredictable. However, they do sometimes reverse.

Visibility: The visibility in the mooring area is usually excellent with only rare occasions of limited visibility.

SAFETY: *Fireboats:* A fireboat is available only from Honolulu harbour. Because of the distance to the harbour, this fireboat would be called upon only in the event that the ship's equipment cannot control a fire.

Crude Washing: Crude washing should be undertaken only with approval of Mooring Master. The Shore Control Operator shall also be notified.

Inert Gas Systems: Normally a vessel fitted with an inert gas system (IGS) will not be permitted to carry on cargo operations unless the inert gas system is in good order and in operation. When an IGS equipped vessel arrives with the system inoperative, the vessel will not be berthed until the IGS is repaired and/or put in operation. If after a reasonable time the system is not operative and/or cannot be repaired, the terminal may elect to berth the vessel and carry on the cargo operation under strictly controlled conditions and in compliance with existing governmental regulations. If the IGS breaks down after the vessel has berthed, all cargo operations will be stopped and the terminal may elect to take the vessel off the berth unless the IGS is repaired in a reasonable time. If the IGS cannot be repaired, the terminal may elect to carry on cargo operations under strictly controlled conditions and in compliance with existing governmental regulations.

All time lost because of the IGS being inoperative and/or out of order will be for the vessel's account.

Containment Equipment: The area of the refinery where the marine pipelines emerge above ground is protected by dykes which are designed to adequately impound any oil leakage from valve packings, flange leaks or pipeline leaks.

The Refinery is a member of Clean Islands Council Oil Spill Cooperative (CIC). Should an onshore or offshore oil spill occur, the Refinery has access to all the CIC equipment.

A 650 ft. Rotopak oil boom is placed aboard the ship prior to mooring. This equipment is to provide immediate first response capability in case of an offshore oil spill.

Onshore response time is within one hour. Offshore deployment time is dependent on the availability of tugs. A mooring tug is available to assist in the event of an offshore oil spill, under the operational control of the Mooring Master. Depending on the reason for the spill, ocean conditions, and the vessel's situation, the Mooring Master may or may not allow the tug to return to port to obtain the spill containment equipment.

GENERAL: *Charts and Publications:*

The anchorage area is shown on the following charts:

National Oceanic and Atmospheric Administration
19362 – Oahu, Ahua Point to Barber's Point.
19357 – Island of Oahu.

Publications of value and interest are:

Current edition of United States Coast Pilot No. 7 (Pacific Coast).
Hawaiian Refinery Emergency Plans and Procedures Manual.
U.S. Coast Guard Regulations 33CFR153, 154, 155 and 156.

Rules of the Road: All vessels should be aware that inland rules apply inshore of a line connecting the Diamond Head Light and Barber's Point Light.

Provisions: Arrangements for provisions are made with the ship's Agent. Provisions are brought from Honolulu to the ship by launch. Weather conditions usually allow loading only on the vessel's port side. Terminal Regulations prohibit lifting stores with the hose boom while the submarine hose is connected.

Launch Service: If shore leave is allowed, the vessel's Master must make arrangements with the Agent to provide personnel launch service. A mooring launch is provided for line handling. The mooring launch does not leave the terminal area while the ship is in the berth.

Check List: A Marine Terminal Check List has been prepared for vessels using the berth. It must be signed by the vessel's Master and Chief Engineer and the Mooring Master before cargo can be handled. Its purpose is to ensure that important safety and anti-pollution procedures are followed by all personnel aboard the vessel.

AUTHORITY: See Section (A).

Operator: Chevron U.S.A. Inc., P.O.Box 1299, Honolulu, HI 96807.

APPENDIX: SUMMARY OF MINIMUM WIRE AND ROPE REQUIREMENTS.

Vessel Size d.w.t.	*Wires* Number	*Wires* Diameter (in.)	*Wires* Length (Note 2) (ft.)	*Wires* Breaking Strength (lb.)		*Synthetic Lines* Number	*Synthetic Lines* Circumference (in.)	*Synthetic Lines* Length (ft.)	*Synthetic Lines* Material	*Synthetic Lines* Breaking Strength (lb.)	
Up to 50,000	7	1.25	1,000	130,000	OR	4	8 (minimum) 10 (maximum)	720	Note 3	130,000	
	any combination of wires and ropes (per above)				OR						
						11	9 (minimum) 10 (maximum)	720	Note 3	175,000	Note 1
50,000 to 80,000	7	1.5	1,000	165,000	OR	4	8 (minimum) 10 (maximum)	720	Note 3	175,000	
	any combination of wires and ropes (per above)				OR						
						11	9 (minimum) 10 (maximum)	720	Note 3	175,000	Note 1
Over 80,000	7	1.5	1,000	165,000		7	8 (minimum) 10 (maximum)	720	Note 3	175,000	

Notes:
(1) Vessels equipped with fewer than 7 wires may be required to unberth and/or otherwise incur delay during adverse weather conditions.
(2) Synthetic rope pendants may be used to achieve the necessary length if the breaking strength of the pendant is at least 1.25 times that required for the wire.
(3) Polyester required. Nylon or polypropylene not acceptable.

HOUSTON, Texas: 29.45 N. 95.20 W. (See Plan)

DOCUMENTS:

1 Visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all U.S. ports.
2 or more copies of Manifest of Cargo for each individual U.S. port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load Line Certificate and Nationality Certificate.
No health document required.
Also see "Shipmaster's Report" dated June 1995.

Tankers: Customs required copy of Bill of Lading, ship ullage on loading and shore ullage on loading.

PILOTAGE: Compulsory. Radio to local Agent who arranges Pilot and specifies boarding time. U.S. Coast Guard requires 24 hours' notice in advance of arrival Galveston Bar. Pilot boats and station on VHF Channel 66, Bridge to Bridge is Channel 13 and tugs for docking and off-docking on Channel 14. 3 Pilot boats marked "HP No. 1" – 53 ft., "HP No. 2" – 61 ft. and "HP No. 3" – 106 ft. in length. Pilot boats contacted by light in International Morse code; no sound signal. Pilot taken on board at Sea Buoy No. 1, located 6.7 miles from Galveston. Seldom, if ever, is water too rough for boarding at above location. Anchorage located in Bolivar Roads, 6.7 miles inward from Sea Buoy No. 1.

Report: 1993.

Sabine Bank Pilot to Houston uses VHF Channels 16, 14 and 12.

ANCHORAGES: Vessels are prohibited from anchoring in the Houston Ship Channel or Turning Basin, except in cases of emergency, in which circumstances they shall anchor as near as possible to the channel edge or Turning Basin so as not to interfere with free navigation or obstruct the approach to any pier.

Vessels may anchor in the Gulf of Mexico in the Galveston Entrance Anchorage Areas, just inshore of the intersection of the Galveston Safety Fairway with the Coastwise Fairway. Inside Galveston Harbour, a federally designated anchorage area has been established along the North side of the Inner Bar Channel, this area is described as follows: bounded by the North edge of the channel, extending West from Buoy 10 (Lat. 20° 20' 48.5" N., Long. 94° 42' 52.5" W.); thence to Buoy 12 (Lat. 29° 20' 43" N., Long. 94° 44' 46.5" W.) thence 029° to Buoy B (Lat. 29° 21' 15" N., Long. 94° 44' 47" W.) thence 096° to Buoy A, (Lat. 29° 21' 05.3" N., Long. 94° 42' 51.4" W.); thence 183.5° to the point of origin. This anchorage area is for temporary use of vessels of all types, but especially for naval and merchant vessels awaiting favourable weather and travel conditions. Except when stress of weather makes sailing hazardous, vessels are not permitted to anchor in this area for periods exceeding 48 hours, unless longer periods are expressly authorised by the Captain of the Port.

In Galveston Bay, small craft can anchor anywhere outside the dredged channels where the depth is sufficient. The water in the bay may be lowered as much as 2 ft., by a "Norther" and vessels should anticipate this when selecting an anchorage during the Winter.

RESTRICTIONS: None with respect to time of day or night, or with state of tide.

Authorised Project Dimensions
Houston Ship Channel and Ancillary Channels

Section of Waterway	*Depth** *(MLT)* (ft.)	*Bottom Width* (ft.)	*Length of Section* (ft.)
Galveston Harbour:

Mile 1.65 to Mile 2.73	12	100	Inactive

Notes: (1) Includes 400 ft. channel width.
(2) Includes 300 ft. channel width.
(3) 40 ft. to Brady Island. Authorised.

*All depths refer to the plane of mean low tide.

Tidal Range and Currents of Galveston Bay:
Under ordinary conditions, mean tidal range is 0.6 ft. to 1.3 ft. in lower and upper parts of Galveston Bay and 0.5 ft. to 1 ft. in the Jacinto River and Buffalo Bayou. Extreme ranges, under ordi conditions, are about 2 ft. in the lower part of Galveston Bay, 1.2 f the upper part of the bay and 1 ft. in San Jacinto River and Bu Bayou. Freshets cause rises of over 12 ft. in Buffalo Bayou, howe this condition has not occurred since completion of Addicks and Ba Dams for flood control on the upper watershed of Buffalo Bayou. He of tides is dependent largely on the wind, and during strong "Northe in Winter season the water surface of Galveston Bay may be depres 2 ft. below mean low tide.

Report: Mariners are advised that ship-to-ship lightering activi regularly conducted in the following general vicinities which 50 miles – 60 miles from the Galveston Sea-Buoy.
(1) Lat. 28° 35' N., Long. 94° 15' W. (2) Lat. 28° 25' N., Long. 94° 34

Mariners are urged to use caution when transitting these areas they make their way to the Port of Houston.

MAX. SIZE: Navigation safety guidelines on the Houston Ship Char between Galveston Bar and the Turning Basin, Houston, Texas – Bo Roads to Barbours Cut: Maximum vessel size 950 ft. LOA beam 135 ft.

Barbours Cut to Baytown: Maximum vessel size 900 ft. LOA beam 135 ft.

Baytown to Boggy Bayou (Shell): Maximum vessel size 860 ft. beam 120 ft. Vessels exceeding 800 ft. LOA or 39 ft. draft wil restricted to daylight passage only above Baytown.

Boggy Bayou to Sims Bayou (Arco): Maximum vessel size 750 ft. beam 116 ft. Vessels exceeding 105 ft. beam, but not exceeding 11 shall not be allowed to meet any ship traffic above Boggy Bayou.

Sims Bayou to Houston Turning Basin: Maximum vessel size 75 LOA with beam 106 ft. Vessels exceeding 700 ft. LOA or 37 ft. draf be restricted to daylight passage only between Sims Bayou and Houston Turning Basin.

Note: The permitted draft may be less than 37 ft. because of condi of the channel or tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany

RADIO: International Telephone and Telegraph – ITT – Galveston letters KLC.

TUGS: Tugs come alongside just off dock or immediately prior to ente turning basin if vessel is to turn, or at Pilot's discretion.

** Used for grain elevator operations at Houston Public Elevator No. 2.

Care Terminal: Acquired by Port Authority in 1996. Located 12 miles East of Houston. Deep-water terminal on Jacintoport Slip. Length 500 ft. by 70 ft. Wharf can accommodate loads up to 1,000 lbs. per sq.ft. 45,900 sq.ft. of covered storage and 9.6 acres of paved marshalling area. Work will begin on a second 500 ft. long berth in 1996. Depth alongside 38 ft.

Turning Basin Terminal: Multi-purpose complex of wharves and storage facilities. Accommodates containers, breakbulk and project cargo. Alternate arrangement of open wharves and docks backed by transit sheds. More than 2 million sq.ft. of covered storage; 3.4 million sq.ft. of paved area. A second 40 ton gantry crane is being added to handle containers. Max. LOA 750 ft.

Manchester Terminal Company: 3 ship berths – 1,650 ft. in length (including 1 piling cluster). Depth 32 ft.

Served by 1 marginal track and 2 outside tracks behind docks plus loading tracks to all other facilities. Special loading-unloading docks for motor trucks available.

Equipment: 62 lift machines; 7 tractors; 1 towmotor, 30,000 lbs. capacity; 4 sweepers, 3 scrubbing machines.

Manchester Terminal Company also has 18,000 cargo pallets.

New Terminal Warehouse Corporation: Capacity 3 ship berths. Wharf 1,400 ft. long. Open storage areas of 50,000 sq.ft. Covered storage areas of 200,000 sq.ft.

Other Wharf Facilities: In addition to the for-hire terminals Port of Houston has some 43 ship berths plus various barge facilities on the Ship Channel maintained and used exclusively by industries. Most of these facilities are tanker ship berths at the refineries. There are also 4 liquid-bulk terminals for hire: Amerada Hess Terminal and General American Tank Storage Terminals, the latter having 2 separate locations; South Coast Terminals; Robertson Terminals, Inc.

Fentress Bracewell – Barbours Cut Terminal: The Port of Houston Authority continues development of its massive intermodal facility. Barbours Cut is located 2.5 hours from open sea where the Houston Ship Channel enters Galveston Bay. The facility is equipped to handle container, Ro/Ro and LASH services. There are 6 container berths each 1,000 ft. in length, representing 6,000 ft. of continuous quay. The channel is dredged to a depth of 40 ft. Additionally, 12 Paceco Portainers service the 6 container berths. The 6 container berths are backed up by approximately 203 acres of container marshalling are suitable for both grounded and wheeled operations. 20 rubber tyred yard cranes handle the stacking of containers in the container yard.

A Ro/Ro platform is provided for vessels equipped with ramps. There are two 100,000 sq.ft. Ro/Ro transit sheds with rail service available as well as 44 acres of concrete paved open storage for heavy equipment and automobiles. A "U" head pier and mooring dolphins provide for berthing of LASH ships. Additionally, a barge fleeting area and barge mooring dolphins are provided.

There is a container freight station with 55,000 sq.ft. of covered storage and rail service available. A railroad yard or ramp point with 1 lead track, 1 storage track and 2 working tracks provides a facility to unload containers and trailers to and from flat cars. The car capacity on the working and storage tracks is approximately 121 ft.×89 ft. long cars. Rail improvements planned for completion in 1997.

Container and chassis repair services are available on and off terminal. Container storage areas are available adjacent to the terminal as are automobile storage and preparation facilities.

Ned S. Holmes Bayport Terminal Complex: A 300 ft. wide by 38 ft. deep Bayport Ship Channel and its 1,600 ft. diameter turning basin connects with the Houston Ship Channel in Galveston Bay and extends approximately 3 nautical miles inland to provide berths for deep-draft tankers and bulk freighters. Petro United Inc., Celanese Corporation, American-Hoechst Corporation and Hudson Oil Company have docks and facilities on the Bayport Ship Channel.

BULK HANDLING FACILITIES:

Public Bulk Materials Handling Plant: At Greens Bayou. Loading capacity at 67 lb./cu.ft. material, unloading capacity at 94 lb./cu.ft. material free digging rate. Fully automatic plant handles dry bulk commodities rapidly to and from ships and barges through the loading and unloading towers, conveyor systems, hoppers, pits, surge bins and scales; with rail and truck facilities and ample ground storage. Rail cars are rapidly moved with large rubber-tyre tractors. Boom of unloading tower reaches 60 ft. from face of dock, bucket capacity is 12 tons; loading tower boom reaches out 66 ft. from dock face and is equipped with automatic trimmer. Both towers can travel the full length of the dock. Mooring facilities for a waiting vessel have been installed next to existing dock. Also available: 2 heavy-duty front-end loaders and 4 heavy-duty car shakers. Max. LOA 750 ft. (larger if cleared with Houston Pilots prior to chartering). Max. beam 116 ft. Max. draft 39 ft. Air draft 40 ft. Depth of water 40 ft. Minimum hatch size 25 ft.×25 ft. Travel of loader 500 ft.

Elco Shipside Elevator Company: 2,000,000 bushel capacity elevator which loads up to 25,000 bushels per hour to vessels berthing at Dock No. 2 of the Port Authority's Manchester Wharves. Length of berth 500 ft. Depth 32 ft.

Woodhouse Terminal/Houston Public Elevator: Grain elevator with 12,000,000 bushel capacity – 4 ship berths. Also general cargo handling. Max. draft 40 ft. Loading rate 1,000 t.p.h.

Adams Terminal: Phillips Terminal Company. 2,700 linear ft., capacity 5 vessels. Bulk cargo loading conveyor system rated at 400 t.p.h.; horizontal boom, hammerhead-type clamshell unloader equipped with five-yard ore bucket, rated at 150 to 250 t.p.h.; 2 gantry cranes, capacity 40 tons at 30 ft. radius; Robbins heavy-duty car shakeout; 20-ton truck mounted crane. One D & H gantry crane modified to handle five-yard bucket for bulk ore discharge. 100 t.p.h. Specialists in import and export bulk cargo. Covered storage – 73,000 sq.ft.

Jacintoport Terminal: Deep-water shipside terminal located on the North side of the Ship Channel some 15 miles downstream from the Turning Basin.

Three ship berths (length 1,835 ft.) with water depth alongside the wharf at 36 ft. 82,500 sq.ft. of transit sheds. Transcontinental or Houston Deepwater, the present Jacintoport Operators, have preferential berthing at Wharves No. 2 and No. 3 for vessels that have at least 500 short tons of boxed or bagged cargo. Harbourside Refrigerated Services operate the cold storage facility located adjacent to Jacintoport and has preferential berthing at Wharf No. 1 for vessels that have at least 500 short tons of refrigerated or frozen cargo. Rail service by the PTRA. Slip is 4,200 ft. long and 400 ft. wide, owned by Port of Houston Authority.

Cargill, Inc.: Grain elevator with a capacity of 5,700,000 bushels. 2 ship berths. Max. draft 40 ft. Loading rate 70,000 bushels per hour to 140,000 bushels per hour.

CRANES: (Capacities 1 ton = 2,000 lbs.)

Mobile Crane – Diesel: Capacity 80 tons.

Gantry, American Revolver R-25 Electric: Capacity at 65 ft. radius – 50 tons.

Gantry, Clyde Whirley, Diesel Electric: Capacity at 45 ft. radius – 30 tons.

Gantry, Portainer, Electric: Capacity at 81 ft. reach – 27.5 tons.

Gantry, Portainer, Diesel Electric: Capacity at 113 ft. reach – 44 tons.

Gantry, Portainer, Electric: Capacity at 140 ft. reach – 30 tons.

Stiff Leg Derrick, Electric: Capacity at 50 ft. reach – 75 tons.

Floating derrick barge crane 500 ton capacity, Owner Joe D. Hughes, Halliburton Co.

Gantry, Portainer, Electric: Capacity at 127 ft., outreach 50 long tons.

Rubber tyred mobile crane, diesel with 300 short ton capacity operated by Ryan Walsh Stevedoring and Shippers Stevedoring.

BRIDGES: Three bridges cross the channel at this time, the I-610 Bridge, immediately East of Wharf No. 32, has a clearance of 135 ft., the Beltway 8 Toll Bridge, immediately West of the Shell Terminal, has a clearance of 175 ft. and the Baytown Bridge has a minimum clearance of 175 ft.

STEVEDORES: Stevedore, on advice from representative of local Agent, must order labour prior to 1700 for 0700 or 0800 hrs. start the following day. Can order at 0800 for 1000, 1100 for 1300 and 1700 for 1900 hrs. start. Gangs must be ordered prior to 1700 hrs. on Saturday for Sunday or holiday.

MEDICAL: Give sufficient notice to order doctor or ambulance. Numerous hospitals available. Seaman's health certificate required.

TANKERS: No specific requirements for oil carriers with respect to load/discharge lines. 12 tanker berths available

Restrictions: The Houston Ship Channel has vessel size limitations as set forth by the Houston Pilots Association (See "Max. Size").

Deadweight tonnage is restricted by zone as follows:

Bolivar Roads to Baytown – 95,000 d.w.t.
Barbours Cut to Boggy Bayou (Shell Terminal) – 80,000 d.w.t.
Boggy Bayou to Sims Bayou (Arco Terminal) – 55,000 d.w.t.
Sims Bayou to Turning Basin – 45,000 d.w.t.

All dead ships and LPG/LNG vessels greater than 550 ft. LOA daylight transit only through the entire Houston Ship Channel.

Arco/Sims Bayou: General: The Arco Refinery Terminal consists of berths "B" and "C". This terminal is located in the vicinity of Sims Bayou, approximately 48 miles from Sea Buoy.

Mooring and Berth: At both berths 2 or 3 tugs are used for docking, while only 1 is necessary for undocking. The tugs and Docking Master meet the vessel 1 mile below the berths and turn the ship at the Arco Turning Basin for a starboard side berthing. The terminal does not provide a gangway.

Cargoes handled at both berths include crude, gasoline, distillate, lube oil, av. gas, jet fuel, and petro-chemicals. Sizes of cargo hoses are 4 in., 6 in. and 8 in. All cargoes are pumped at 100 p.s.i. Both berths can receive ballast and slops. Only av. gas and jet fuel are handled by a common pipeline.

Charter International Oil – Traweek: General: The Charter International Oil Company Berth is the Traweek Dock located 49 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: Tug requirements are determined by the vessel's Master. Vessels are generally turned, if light, in the vicinity of the berth and moored starboard side to. Breasting units keep the vessels directly off the side of the dock. All lines are doubled-up. Long bow/stern leads allow considerable fore and aft movement of the vessel. To counter the movement good spring lines are required. Hooks on shore are secured to 2×1.625 in. wires to a "deadman" on the upper bank. All lines are handled by a workboat. The terminal does not provide a gangway.

Passing ships in the Ship Channel affect vessels at this berth. Strict attendance to mooring lines is essential.

Cargoes handled at this terminal include gasoline, fuel oils, jet fuel, No. 6 fuel oil, and kerosene. All cargoes are transferred through 8 in. lines and hoses at a maximum pressure of 100 p.s.i. Connections at the manifold are made with bolted flanges. Both ballast and slops can be received at this berth.

Crown Central Petroleum Co.: General: The Crown Central Petroleum Co. Berth is located 50 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: 2 or 3 tugs are used for docking and 1 or 2 tugs are used for undocking. Tugs meet the vessel below the berth depending on existing conditions and turn the vessel prior to docking. No gangway is provided at this terminal.

Cargoes handled at this terminal include distilliate, gasoline, petro-chemicals, heavy fuel oil and crude oil. Petro-chemicals are handled through 6 in. lines at 40 p.s.i. All other products and crude are handled through 8 in. lines with pressures varying between 30 p.s.i. and 100 p.s.i. All cargo hose connections are ASA-type connections. Ballast and slops are received at this terminal.

GATX No. 1 and No. 2 – Galena Park: General: The Galena Park Terminal of GATX consists of 2 berths, No. 1 and No. 2. Storage capacity: 5 million barrels.

Mooring and Berth: 2 tugs are used for both docking and undocking. Vessels are usually turned when in the light condition. The terminal does not provide a gangway.

Cargoes handles at both berths include heavy fuel oil, special petroleum products, solvents, and other clean products. Heavy fuel oils are handled through 8 in. lines only. All other products are handled through 4 in., 6 in. and 8 in. lines. Maximum pumping pressure for all products is 100 p.s.i. All connections are ASA flange connections.

GATX – Pasadena: Mooring and Berth: Tug requirements are determined by the vessel's Master. Vessels are normally turned in the light condition. The berth is close to the Houston Ship Channel and vessels can be affected by passing traffic. Vessels moored at this berth should be well moored and all lines kept taut. The terminal does not provide a gangway.

This terminal handles a variety of products. Crude oil or products requiring heating are not handled by this terminal. All products are handled through 4 in., 6 in. and 8 in. lines at 100 p.s.i. Hose handling may be expected to be slow on account of the limited equipment on the pier.

Hess No. 1: General: The No. 1 Ship Dock of the Amerada Hess Corp. is located 48 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: Vessel's Master determines tug requirements for docking and undocking. The vessel proceeds past the berth when docking and backs into the berth for a port side berthing. The stern will be approximately 100 ft. from the North bulkhead of the berth. The terminal does not provide a gangway. Gangway placement is critical.

Cargoes handled at this terminal include crude oil, fuel oil, light oil and gasoline. Fuel oil is handled through a 10 in. line at 150 p.s.i. All other cargoes are handled through 12 in. lines at 150 p.s.i. Connections are all "quick connections". There are no ballast or slops storage space at this terminal.

Hess No. 2: General: The Amerada-Hess Corp. No. 2 Ship Dock is located 45 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: A minimum of 2 tugs are used for docking and undocking. Loaded vessels approach from the channel, normally starboard side to. After discharging the vessel is than turned to seaward. A loaded vessel can be turned should a port side mooring be required. All lines are carried to mooring dolphins by a small boat. A gangway is not provided by the terminal.

Intercontinental No. 1: Mooring and Berth: 2 tugs are required for docking and undocking. The vessel is met by the tugs and Docking Master near Lynchburg Crossing. As the vessel approaches Slough, tugs assist in turning the vessel broadside to the channel and in line with the berth. The vessel is then manoeuvred into the berth. Most vessels are moored starboard side to. A gangway is not provided by the terminal.

Various clean products are handled by this terminal. There are no facilities for receiving ballast or slops.

Oil Tanking No. 1, No. 2 and No. 3: General: These berths are located at the Oil Tanking of Texas Terminal which is 42 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: 2 or 3 tugs are used for docking and 2 tugs are used for undocking. Vessels docking at Berth No. 1 are turned to starboard for a port side mooring. Vessels are moored head-in, starboard side to in Berth No. 2 and port side to, head-in at Berth No. 3. At Berth No. 2 and No. 3 mooring lines are handled by a launch. Bollards on the outer breasting/mooring platform are fitted with hooks on steel wire pennants so as to be accessible to the boat crew. The terminal can provide a gangway at all 3 berths.

Vessels should use extra spring lines leading aft as there are no stern line leads available. The terminal plans to install a mooring buoy between the platform and the nearer channel line.

Crude oil and clean products are handled at Berth No. 1. Crude oil is the only product handled at Berth No. 2 and No. 3. All cargo transfer lines are 16 in. Connections are made with ASA flanges, reducers are furnished by the terminal. There are no facilities for ballast or slops.

Paktank No. 1 – Deer Park: Cautionary Advice: There is a considerable chance that passing traffic and/or wind could cause a ship exceeding 630 ft. LOA to break away from the berth, which could lead to disastrous consequences with regard to oil pollution.

General: The Paktank Terminal is located at Deer Park which is 36 miles from the Sea Buoy on the Houston Ship Channel.

Mooring and Berth: A mooring buoy has been installed by the terminal to secure stern lines. This mooring buoy is apparently inadequate both from a standpoint of proper location and strength.

2 tugs are normally used for docking and undocking. The vessel is turned into the berth directly off the channel, upbound. A complement of mooring wires and leads are used at this terminal.

Crude oil, petro-chemicals, and various refined petroleum products are handled by this terminal. All transfer hose and lines are 6 in. or 8 in. Connections to the manifold are bolted. Maximum pumping pressure is 100 p.s.i. There are no facilities for receiving ballast or slops.

Shell No. 1, No. 2, No. 3 and No. 4 – Deer Park: General: The S Oil Company Refinery is located 42 miles from the Sea Buoy on Houston Ship Channel.

Mooring and Berthing: When docking at any of the 4 berths at terminal, 1 or 2 tugs are used. 1 tug is normally used for undock Vessels are turned prior to docking for a starboard mooring. The u complement of mooring lines and/or wires are used at these be Constant attention must be paid in keeping proper tension on all l due to the surging effect caused by passing ships in the chan Gangways are provided by the terminal at all 4 berths.

Crude oil, No. 6 fuel oil, gasoline, diesel fuel, jet fuel, aviation fu and other refined petroleum products are handled at this terminal cargoes are transferred through 8 in. lines with bolted connection the ship's manifold. Maximum pumping pressure for all product 100 p.s.i. The terminal has facilities for handling ballast and slops.

Warren Gas No. 2 and No. 5: General: The Warren Gas Terminal B No. 2 and No. 5 are located 46 miles from the Sea Buoy on the Hou Ship Channel.

Mooring and Berthing: Tug requirements for undocking and dock are determined by the Master. Vessels proceed directly into Berth N for a port side mooring. A motor launch is used to run wires or lines the mooring points. Gangways are only provided when requested p to arrival.

Propane and butane are handled at Berth No. 2 and No. 5. All tran lines are 12 in. at Berth No. 2 and 16 in. at Berth No. 5. Connection ship's manifold are bolted. Maximum pumping pressure is 100 p.s Berth No. 2 and 150 p.s.i. at Berth No. 5.

Shipmaster's Report: September 1992.

Deer Park is a good place to take stores, as there are shore cra available.

DENSITY: Classed as full fresh but varies with rainfall and tide, usu 4 in. to 5 in. allowance on full draft.

FRESH WATER: Available at all terminals through pipe and hose.

FUEL: All grades and viscosities available.

FIRE PRECAUTIONS: All standard precautions per code of Fed Regulations plus local ordinances. Tankers, unless gas free, permitted at wharves in the immediate turning basin area.

CONSULS: Albania, Argentina, Australia, Austria, Belgium, Be Bolivia, Brazil, Cameroon, Chile, China, Colombia, Costa Rica, Cyp Czech Republic, Denmark, Dominican Republic, Ecuador, Egyp Salvador, Finland, France, Germany , Greece, Guatemala, H Honduras, Hungary, Iceland, Indonesia, Ireland, Israel, Italy, Ja Jordan, Korea, Liberia, Malta, Mexico, Morocco, Netherlands, N Zealand, Nicaragua, Norway, Panama, Paraguay, Peru, Philipp Portugal, Saudi Arabia, Senegal, Spain, Sweden, Switzerland, S Tunisia, Turkey, United Kingdom, Venezuela.

REPAIRS: All types available.

DRY DOCKS: Todd Shipyard, 12,000 ton dry dock at Greens Ba and 14,000 ton capacity (length 400 ft.) dry dock in the Houston S Canal.

GANGWAY/DECK WATCHMEN: Not required, but are available can be arranged by local Agent at Master's request.

OPENING/CLOSING HATCHES: By stevedores only – vessel wi charged for this work if done by crew.

CARGO GEAR: Cargo gear safety certificate required.

CUSTOMS ALLOWANCES: Tobacco, 300 cigarettes, 100 cigars, of tobacco or combination for each man. Wine and/or Spirit, 1 bottle for each crew member.

SURVEYORS: District Headquarters for the following Societies:

Panama Bureau of Shipping, Inc. Tel: (713) 944-5026.

Saybolt Inc. Tel: 477-8171.
Caleb Brett. Tel: 946-2420.

REPATRIATION: Danner Guard Service or Central Dispatch can h all phases.

AIRPORT: Approximately 0.5 hours by car; served by regular ai

TIME: Central Standard with daylight saving time effective from A October.

HOLIDAYS: January 1st; January 15th; February 12th; 3rd Mon February; March 2nd; March 17th; Good Friday; last Monday i June 19th; July 4th; First Monday in September; 2nd Monday in Oc November 8th; November 11th; 4th Thursday in November; Dec 25th. When holiday falls on Saturday or Sunday the following M will be holiday.

POLICE/FIRE/AMBULANCE: All services provided or available

TELEPHONES: Currently no arrangements for placing tele aboard but easily accessible on wharves.

SERVICES: All services available.

SHORE LEAVE: Shore leave granted except when individu qualified.

IDENTIFICATION CARDS: Immigration Form I-95 card requir

GARBAGE DISPOSAL: Browning-Ferris Ind. (solid waste sy Tel: 713-635-7777.

WASTE OIL DISPOSAL: Waste Management of Houston. T 695-4055.

SEAMAN'S CLUBS:

Barbours Cut Seafarers' Center, P.O.Box 1434, Laporte, TX 77571. Tel: (713) 470-8332.

At the Turning Basin, Houston International Seafarers' Center, (H.I.S.C.), P.O.Box 9506, Houston, TX 77261-9506. Tel: (713) 672-0511. Facilities include chapel, library, gift shop, cafe, T.V., table tennis, pool tables, outdoor track and canopied basketball court.

Volunteers from both centres will pick up seafarers at the dock. Please call as early in the day as possible to make arrangements.

DEVELOPMENTS: Channel depths to be maintained at 40 ft.

Ned S. Holmes Bayport Terminal Complex has 2 privately owned Terminals (Baytank Inc. and Petro-United Terminals Inc.) operating the facility which is also open for public use.

The Barbours Cut Container Terminal has plans to build Berth No. 6 and expansion of the rail ramp adjacent to the facility is underway.

The multi-user Wharf Manchester No. 3 will start renovation in 1996, improving access to all.

SHIPMASTER'S REPORT:

Customs:

Bond remained sealed.

2 copies of Curio Lists.

2 copies Stores Lists.

1 copy Crew List.

Immigration:

No visit. 1 copy Crew List.

Agents:

Given Travelling copies of Clearance last port, Tax Tonnage receipt last port plus cargo manifests.

Agricultural Dept: Re-sealed meat and vegetable rooms. Inspected Galley Messrooms, etc. Garbage cans to be covered.

Provisions and Stores: Satisfactory. Select own ship chandler.

Laundry: Facilities available but not used.

Coast Guard: No visit.

National Cargo Bureau: Same as New Orleans.

Watchmen: None placed on board. Security at gate strict.

Telephone: None placed on board. Use dock office.

Fresh Water: Available.

Fuel: Available by barge if required. Do not over stem.

Engineering and Repairs: Efficient and satisfactory. Price high compared to N.Z.

Radio Messages: Send ETA after departure New Orleans to Agents and Houston Pilots with draft. Notify Agents of any explosives.

Stevedores: Hours of work. 0800 to 1200 hrs., 1300 to 1800 hrs., 1900 to 2300 hrs. Weekday gangs will work through meal hours to finish. At weekend, day labour works right through to midnight if necessary on time and a half then double time for meal hours.

Crew must not clean hatches. Labour has claim on cleaning and has to be paid in addition to crew. Crew open and close hatches, but not until hatch foreman present. Not before labour working hours.

Working heavy lifts with ship's gear loading rate very slow, especially at end of shift. Due to nature of deck cargo; 11 ton lifts 52 ft. long.

Constant supervision needed for deck cargo.

Head stevedore checks Factory Act Book before starting.

If detailed plan is required for break bulk (general cargo) additional clerk must be ordered.

General: Pilot boards from large grey metal cutter off Fairway Buoy. Flash every 2.5 seconds. Give good lee and have ladder 8/10 ft. above water with usual manropes, heaving line, etc.

If you have to anchor, most vessels use the Eastern anchorage about 1.5 miles East of fairway buoy and clear of fairway marked channel. Soft mud bottom. Use plenty of cable.

Berth: Ships spaced very close to each other. Rise and fall of tide about 1 ft.

Moorings: At least 4 head lines and stern lines plus 2 springs each end. Ships frequently passing and channel narrow consequently a good deal of surge. Lines to be frequently looked at and kept tight. Parted 3 springs in as many days!!! Gangway also to be watched. General rule is to use ship's gangway. Wide apron in front of sheds with rail lines but fork-lifts used most.

Agents have office on wharf with direct line to city office and outside lines.

Wooden piling which acts as fenders. Bollards of the large cleat type. Sufficient but not plentiful. Two linesmen each end when arriving and departing. No permanent cranes but mobile ones can be hired. Quay about 25 ft. above water.

Recommended not to walk about or up to bus especially at night. Better for 2 or more to get a taxi. Fairly good, 3–4 dollars to Houston.

Seaman's Mission near by. Very good, new and modern.

Tugs: Used for berthing and unberthing. Had 2 on arrival due to strong wind and close proximity of mast top to bridge.

Sailing had 1 tug lashed up alongside forward shoulder.

Tugs use own lines.

Bridge: There is a bridge above Upper Clinton Bend from Manchester on the South to Clinton Park on the North. This is a relatively new bridge to be passed under with a clearance of only 135 ft. Check the rise of tide on way up.

SHIPMASTER'S REPORT: August 1980.

Tenneco Terminal – Vessel discharged ammonia.

Approaches: B.A. Chart 975.

The safety fairway is usually very busy and it is advisable to ensure that you are in fact keeping to the starboard side.

At the entrance to the fairways there are many oil rigs. With the predominately low lying coast, radar positions are extremely difficult. Satellite navigator is highly useful in this respect. The first good check is off the buoys in the final safety fairway. These showed on radar at about 7 miles.

Some radar echoes are received from Galveston itself.

The charted rigs in Anchorage 'A' are in fact in those positions.

Pilotage: If anchored, the pilot boat will call vessel into the "Whistle Buoy" for boarding.

The cutter is a large, fast launch and usually lies inside until working a vessel.

Pilot ladder about 8 ft. from the water to clear the boarding platform.

Contact can be made via Galveston Pilots initially on Channel 16 who will relay the messages. Houston Pilots themselves work on Channel 14.

One Pilot, the length of pilotage is about four hours to the first line ashore. Two tugs used.

No night time pilotage for a vessel of this size (32,000 g.r.t.) and type. There is a TV video surveillance system operating throughout the length of the channel.

Berth: About 4 miles below Warren Terminal.

Plant and terminal now owned by Occidental (Oxy) but Tenneco rent the berth.

Berth is far too small for this vessel, at least as far as the moorings are concerned. Typical American 'T' barge jetty, the head of which is only about 25 m. long, with walkways leading to 3 dolphins at each end. The bow and stern overlap these mooring dolphins and head and stern lines are taken to posts on the river bank. These are only breast lines and it is advisable to make advance preparations to put out as many as 4 springs at each end. There is a great deal of traffic passing continuously.

Gangway: The gangway should remain stowed until in position. Whether vessel can use the accommodation ladder will depend on draft. If vessel deeper than 26 ft. there will not be sufficient clearance from the fender so a "B.O.T." type gangway resting on accommodation turntable will have to be used.

When the accommodation ladder is used it has to be turned through 120° and landed on the aft dolphin immediately adjacent to the jetty head.

Discharge: 12 in. flexible hose 150 ASA used. 'T' piece, two shore hoses.

Max. back pressure allowed is 50 p.s.i. Vapour return line is 4 in.

The plant ashore is only equipped to export cargo and its re-liquefaction plant is small.

A shore walkie-talkie is placed with the officer of the deck.

Discharge rate can vary (October 1979 – 260 t.p.h., August 1980 – 550 t.p.h.).

Shore surveyors figure taken for bill of lading. Density 1001.

USCG: No inspection prior to commencement, apparently this is normal. The port is far too busy for them to visit every ship. But be prepared, they are very particular on navigation equipment and Officers' Certificates and experience.

General: It is possible to load bunkers by barge alongside the terminal if prior arrangements and permission are obtained but it depends on Agent and Authorities.

Fresh water is available from the jetty, at a very low rate.

Storing can present difficulties as the after crane does not plumb the dolphin. By arrangement, vessel can use shore crane when the operation is not too difficult.

Public telephone on dock – minimum charge 25c.

Liferaft service available, 24 hours' service.

A considerable distance from the city, which rather complicates services and communications.

Agents leave a radio onboard for contact with Agent and office, but often outside range, office on maximum range.

No private transport (taxis) allowed into refinery area. Transport to the gate by their own minibus and then telephone for taxi. Crew transport service allowed into berth area with pass from Agent.

SHIPMASTER'S REPORT: October 1991.

Approaches: Galveston Light is visible at over 25 miles. There are Racons on the oil rigs in the approach safety fairways which are conspicuous. The "G.B." Buoy is equipped with a Racon and is also conspicuous.

Anchorage: The Fairway Anchorage is to the East of the "G.B." Buoy and the traffic separation area. It is often very crowded and has poor holding and there is no shelter.

Bolivar Roads Anchorage off the Inner Bar Channel near Galveston is the only inner anchorage for vessels awaiting berths that have been cleared inward. This anchorage is often used by vessels changing berths or awaiting berths.

Pilotage: The pilot boards and leaves near the "G.B." Buoy from a large cutter which is nearly always on station outside the Galveston breakwaters. The cutters have accommodation for 5 pilots and maintain watch on VHF Channel 14.

The pilot requires 6 hours notice of ETA when arriving from sea, with updates every 2 hours. The pilot for sailing from the berth requires an initial notice of 4 hours and if a vessel is delayed, the pilot can be re-ordered within 2 hours.

The distance from the "G.B." Buoy to Deer Park Basin is 41 miles and time from pilot boarding to first line ashore is about 4 hours.

There is no dock pilot. The sea pilot docks vessels and also boards for shifting in the berth.

The channel depth is maintained at 40 ft.

Tugs: Tugs are supplied by Bay Houston Towing Co., who have about 10 tugs up to 4,500 h.p. stationed at Houston. They usually secure "American Style".

Services: Laundry: Ship's Laundry of Houston were very good and prompt and provide a 24 hour service. Tel: 713-661-5315.

Supplies: We used Cross & Co. (Tel: 713-673-3100. Telex: 775602) who we found to be very good. The quality of provisions was also good.

Telephones: The agent provides a mobile telephone and pager unit for the Master. Only U.S. calls are possible.

At Paktank 1 there is a telephone in the dock office adjacent to the dock.

At Paktank 2 there is a telephone adjacent to the dock.

At Paktank 3 no telephone is available.

At ITC 1, 2 and 3 there are telephones about 100 m. West of ITC 1.

Airport: It takes about 1 hour to get to Houston International Airport, which is North of the ship canal.

Berthing:
Paktank 1: The berth is an 'L' shaped pier with a length of 50 m. and depth alongside 35 ft. Vessels can berth either side alongside. Ship's gangway required. Fresh water not available. Stores cannot be taken at the berth. Flexi-hoses are required for handling of products. Crane available. We loaded Exxon additives at 140 tonnes/hr. per line.
Paktank 2: The berth is located in the N.E. corner of the basin and vessels can berth either side alongside. The length of the berth is 80 m. and depth alongside 35 ft. This is the best berth for storing of all the berths as trucks are allowed within 25 m. of the ship's side. A crane is available for hire at U.S.$100.00 per hour. No fresh water available at the berth. Ship's brow gangway required.

Products are handled through flexi-hoses or Chicksans. Additives are loaded either from Paktank storage tanks at 150 tonnes/hr. or from manufacturing facility which is about 5 miles away but the rate is only 30 tonnes/hr. Shore cranes are available for hose handling.
Paktank 3: The berth was completed in 1990 and is in the main ship canal. The location of the flat faced concrete pier is Lat. 29° 44.89' N., Long. 95° 05.88' W. The length of the berthing face is 100 m. and the depth alongside is 40 ft. The fendering system is good and is made up of flat shock spring timber and rubber. When berthed alongside, the vessel heads up channel with port side alongside. Ship's brow gangway required. Products are handled through flexi-hoses and there are cranes available for hose handling. We loaded additives at 120 tonnes/hr. per line. No fresh water available. Store trucks may not proceed closer than 100 m. from the vessel. Good moorings are required, they should be kept tight at all times due to passing traffic.
ITC 1: The berth is a flat faced concrete jetty on the S.W. side of the basin. Vessels berth head in only, starboard side to. Fresh water available at a very slow rate. Good berth for handling of stores. Ship's accommodation ladder can be used. Flexi-hoses required for handling of products.
ITC 2: This flat faced pier is an extension of ITC 1. Vessels can berth either side alongside. Depth at berth 33 ft. Fresh water available at a very slow rate but storing is not possible. A brow gangway is required at the berth. Flexi-hoses and Chicksans are available for cargo handling. We loaded additives at 180 tonnes/hr. per line.
ITC 3: The berth is opposite ITC 2 and has recently been dredged to 35 ft. Length of berth 150 m. Fresh water is available at a slow rate but storing is difficult. Vessels berth head in only, port side alongside. Brow gangway required. Chicksans and flexi-hoses are available for handling products.
Fuel: Bunkers are not usually taken at ITC Berths as a surcharge is imposed on the barges. No bunker surcharge at Paktank Berths.
SHIPMASTER'S REPORT: June 1995.
Documents:
1 Visaed Crew List (Only required if personnel do not have U.S. C1/D Visa).
3 copies Crew List (Crew only).
3 copies Passenger List.
3 copies List of Passengers and Crew.
AUTHORITY: Port of Houston Authority, P.O.Box 2562, Houston, Texas 77252-2562. (111 East Loop North, Houston, Texas 77002) *Tel:* (713) 670-2400. *FAX:* (713) 670-2564. *Contact:* H. Thomas Kornegay, Executive Director. John Horan, Director of Operations.

HUENEME, California: 34.09 N. 119.12 W. (See Plan)

PORT LIMITS: No laytime boundary. "Arrived Ship" status commences at berth dockside.
DOCUMENTS: See "San Francisco".
PILOTAGE: It is requested that ships entering port stand-by 1 mile off harbour entrance just seaward of the Port Hueneme seabuoy designated "PH" (Fl. R. 4 secs. Bell) and await port Pilot who will board from a tug. The U.S. Coast Guard Station at the Channel Islands Marina maintains a radio beacon. Contact Pilot or "Port Hueneme" on VHF Channel 16, shifting to Channel 14 for Administration; VHF Channel 65A for tug/pilot/bridge.

All vessels 300 g.r.t. and over or carrying a foreign flag entering, leaving and shifting within the Port of Hueneme, including area of the Oxnard Harbour District, must be piloted by a port Pilot duly licensed to perform the services of piloting vessels within the Port of Hueneme. The Oxnard Harbour District does not maintain Pilots; licensed Pilots are available on a 24-hour-a-day basis from Port Hueneme Pilots' Association (Captain Carl Dingler at (805) 984-4933).
ANCHORAGES: If there is a wait for Pilot caused by weather, visibility, congestion in harbour, or any other reason, the anchorage area is 1.7 miles South of Port Hueneme Lighthouse on the 13 fathom curve.
RESTRICTIONS: The length of entrance channel is 2,300 ft. The narrowest width of harbour entrance channel is 330 ft. However, because of prevailing fresh winds, this is a one-way channel; thus, deep-draft ships not able to manoeuvre easily in a restricted channel have precedence over smaller craft. Vessels may enter/leave at any time day or night.
MAX. SIZE: Due to the 1,400 ft. × 1,200 ft. turning basin, vessels with greater length than 700 ft. requires U.S. Navy permission to enter. Longest vessel berthed in harbour was 826 ft. Vessels draft normally to be 2 ft. – 3 ft. less than water depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

Ships required to pass quarantine may enter port and moor. "Q" Flag is to be flown. Upon mooring, ship must post gangway watch until ship has passed quarantine. When Port of Hueneme is its port of first arrival in the United States from foreign ports or from States other than California, a ship must be inspected by the Department of Agriculture. There is a local representative in Oxnard. The Oxnard Harbour District will order officials if requested by ship or Agent.

RADIO: The "Port Hueneme Wharfinger" guards Channel 16 and normally shift to Channel 14 for administrative purposes. The har tugs guard Channel 16 continuously. The harbour Pilots, when expec a commercial merchant vessel guard Channel 16 voice circuit and vo call "Port Hueneme Commercial Pilot".

Tugboat working frequency is VHF Channel 65A (156.275 MHz).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 3×2,000 h.p. twin screw tugs. Tug services for Port of Huene are furnished by the Oxnard Harbour District, Port Hueneme, Califor Requests for tug services may be made to the Executive Directo Director of Operations of the Oxnard Harbour District, who will ac Agent for ship in forwarding them. 3 tugs are available on a 24 h basis. The number of tugs to be used on any movement is determi by port Pilot in charge of the movement. Tugs are not available for de sea towing, except in case of emergency to save life or property. A screw 500 h.p. pusher/pilot boat is also available for small tows assistance work. As a service to all vessels, the Oxnard Harbour Dist acting as Agent for vessel, will pay all tug fees to United Sta Government when necessary, subject to reimbursement conditions arranged between the vessel, her Owners, or Agents, and the Execu Director, Oxnard Harbour District. Seldom are tug charges more the minimum due to the short transit time to berths.
BERTHING: Berthing arrangements should be made with the Direc of Operations by Agent as far in advance of arrival date as possi specifying dates of arrival and sailing, and nature and quantity of ca to be handled. Agent is requested to submit Berthing Application in tim manner. The Oxnard Harbour District also has a licence agreement the U.S. Naval Construction Battalion Center, Port Hueneme, for the of additional berths and terminal facilities on an "as available" ba Prior arrangements must be made, should use of these additio facilities be desired or necessary. The Port of Hueneme has 5×60 berths with depth 35 ft. MLW and appropriate terminal facilities. At present time there are 11 deep-draft berths within the entire port a

Bottom is sand and mud. Mean low water is + 1.5 ft. Height of w above the MLLW is 13 ft. 6 in. – 14 ft.
CRANES: Many land cranes available which can handle loads u over 100 tonnes in most cases.
STEVEDORES: Stevedore work is presently performed by resid stevedores, the Marine Terminals Corporation, Stevedore Services America and Metropolitan Stevedoring Co., who also have offices in Francisco, Long Beach, etc. MTC maintain an office at 111 Pond Street, Port Hueneme; SSA at P.O.Box 549, Port Hueneme, CA 93 and MSC at P.O.Box 547, Wilmington, CA 90748. They provide mod handling equipment to suit cargo's need. There is no special fixed handling equipment available as yet. Longshoremen are members the International Longshoremen's and Warehousemen's Union conform to the Pacific Coast Longshore Agreement. Hours of work as outlined in this agreement. Longshoremen at this port do all cove and uncovering of hatches and rig the gear. There are 8 gangs availa in the port. Day and night gangs for Tuesday through Saturday (exc Monday through Saturday, 1900 hrs. initial start) must be ordered 1500 hrs. the previous day. Night gangs required Monday for a 1900 initial start, and Sunday and Monday gangs must be ordered by 1100 Saturday. Cancellation time is same as ordering time, if gangs w have been ordered are cancelled after the aforementioned deadli the agreement's 4 hour minimum applies. Normal day shifts beg 0800 hrs. and normal night shifts at 1800 hrs. Each shift consist 8 hours and on sailing day 10 hours may be worked by the final There are no obstructions on the wharf to keep all hatches from b worked concurrently.
MEDICAL: Patients are provided with medical attention at the Med Center, Port Hueneme, or St. John's Hospital, Oxnard Califor Temporary visa must be obtained from Department of Immigration Transportation if a crew man or passenger must remain after the sails.
FRESH WATER: Fresh water is available. There are hydrants alon wharves and delivery to ship is effected by hose. Water is good to but is hard. It is not suitable for boilers. Contact wharfinger on du delivery of water. Boiler feed water is available by truck upon requ
FUEL: Diesel oil and bunker fuel is available by pipeline at all whar
REPAIRS: Minor repairs may be made in port. Machine shops in Ve and Oxnard are qualified for normal voyage repair work.
GANGWAY/DECK WATCHMEN: Gangway or special wharf watch are available upon request.
HOLIDAYS: U.S. Federal and State holidays are observed by the and Terminal management. If stevedoring is required on holiday performed in accordance with the International Longshoremen's Warehousemen's Union-Pacific Coast Longshore Agreement.
TELEPHONES: Pay telephone booths are located at the centre of W 2 and 12 pay telephone booths on Wharf No. 1. The wharfinger's has a telephone which may be used by people calling in to conta ship. This telephone is manned 24 hours a day for convenienc number is (805) 488-4615. The Port of Hueneme office telephone available to ship's officers and Agents for local calls or collec distance calls.
SHIP SUPPLY SERVICE: Port Hueneme Marine Supply, Hueneme Road, Port Hueneme, CA 93041. Tel: (805) 488- Fax: (805) 488-3141. Total ship chandlery, except food.
AUTHORITY: The U.S. Navy (Commanding Officer, U.S. Construction Battalion Center) exercises overall Port Control Au the Oxnard Harbour District is solely responsible for its comm operations.

Port of Hueneme, Oxnard Harbour District, P.O.Box 608 Hueneme, California 93041-0608. *Tel:* (805) 488-3677. *Contact* K. Harmuth, Director of Marine Operations. William Buenger, Ex Director.

HUNTINGTON BEACH, California: 33.38 N. 118.00 W. (See Plan)

LOCATION: Approximately 1.3 miles off Huntington Beach as shown on United States West Coast California San Pedro Channel Chart 18746, published by the U.S. Department of Commerce National Oceanic and Atmospheric Administration.

A lighted Bell Buoy "HB" is located 2,242 ft. from the spar buoy at the Western approach to the Seaberth. It is a private aid to navigation and is shown on the above chart.

PILOTAGE: Mooring Master will board the vessel in the Los Angeles area for an inspection and acceptance of the ship's mooring facilities. He may accompany this vessel, after agreement, to the Seaberth. On repeat visits, he may join vessel at Seaberth area.

RESTRICTIONS: In addition to max. size, wind force, wave height and direction in conjunction with mooring lines, sizes, place limits on conditions for remaining in the mooring. When these conditions are approached or predicted the vessel will return the submarine hose to the seabed after flushing, as necessary, to avoid damage to the crude unloading facilities. The determination of these limitation conditions is made by the Mooring Master and vessel's Master.

MAX. SIZE: Length 930 ft., beam 145 ft., draft varies depending on sea state.

TUGS: A mooring vessel will run the ship's lines to the buoys and serves also as a first response Pollution Control Vessel. It has aboard, for immediate deployment, 1,000 ft. of Model 3000 Expandi Boom.

BERTHING: *Multi Point Mooring:* Consists of 8 buoys. Water depth 50 ft. Tidal range 5 ft. to 6 ft. Bottom sand. Current max. 1.7 knots, excluding storm conditions.

Normal Mooring: Bow anchors and 7 buoys are used.

Mooring Equipment: Require 14 lines, either 9 in. synthetic or 1.25 in. wire rope minimum. Minimum length for 9 in. synthetic rope 720 ft. Minimum length of 1.25 in. wire rope on drum 720 ft. Both bow anchors serviceable with an appropriate length of chain for vessel's size according to Lloyd's or ABS requirement. Usual mooring conditions require 8 to 10 shackles of chain in the water.

A tug, charged to the vessel's account, is required to assist the vessel's approach, mooring, unmooring and exit from the berth.

If mooring wires are used, the synthetic tail or eye, if so fitted, must be in good condition and of 125 per cent breaking strength of the wire. The tail or eye, if so fitted, shall be connected to the wire with a Mandell Shackle or equal. A minimum pennant length of 30 ft. is requested for ease of handling by the mooring vessel.

General: The moorings at seaberth have been modified to allow handling of vessels up to 150,000 d.w.t. under certain wind, wave and sea conditions. This modification includes the repositioning of all buoys, increasing the size of the dip and riser chain to 3.125 in. and the installing of additional 5 ton anchors to supplement the 10 ton existing anchors.

No. 4 or D Buoy, which is at the stern of the vessel, has 2×3.125 in. dip and riser sections and 4 shackles of 3.125 in. chain. Mooring lines to this buoy are doubled during each mooring operation. Weight has been added to each buoy to decrease the buoyancy. An additional buoy, No. 8 or H, was added to allow the moorings to be used by barges.

DISCHARGING: *Lifting Equipment Requirements:* Derrick that can be utilised to lift the 12 in. hose from the seabed and swing the hose to the ship's manifold. Minimum lifting capacity, 5 tons.

Products Received: Crude, Naphtha and other refinery requirements.

Discharge Rate: Maximum 22,000 bbls./p.h. through 8 or 9 lengths (200 ft. – 225 ft.) of hose, 12 in. diameter into 22 in. I.D. sealine. Emergency flush possible from cross connected 10 in. line from shore. Pumping distance to shore tanks 9,479 ft. Height to shore tank 3 ft. – 4 ft. Tank height max. 39 ft. 6 in.

Temperature Limitation at Rail: Maximum product, Crude or Fuel Oil temperature of 150°F.

General: Refinery will furnish the Mooring Master with pertinent information on crude pours and vessel charter conditions, e.g. pump rates or lay time, in order that the Mooring Master can be fully appraised of the Charter Party Terms and conditions. Deviations from the Charter Party Terms furnished, if not correctable in discussions with the vessel's Master, will be discussed via radio with the Supervisor of Pipe-lines and Terminals to determine if a protest should be filed.

FRESH WATER: Not available.

FUEL: Not available.

BALLAST: No facilities.

GARBAGE DISPOSAL: Not available. See "Agriculture" before first U.S.A. port (Albany).

WASTE OIL DISPOSAL: Only as per 33 CFR 158.

SEAMAN'S CLUBS: None.

AUTHORITY: Berth within Los Angeles Customs District.

Operator: Golden West Refining Co., 13539 E. Foster Road, Santa Fe Springs, CA 90670. Postal address: P.O.Box 2128, Santa Fe Springs, CA 90670, U.S.A. *Tel:* (310) 921-3581. *FAX:* (310) 921-7510. *Contact:* F.N. Sampieri, Director – Shipping and Receiving.

HURON, Ohio: 41.24 N. 82.35 W.

Refer to St. Lawrence Seaway for important general information.

PILOTAGE: None required other than what is required for Great Lakes.

ANCHORAGES: Depth 3 to 10 fathoms.

MAX. SIZE: Length 716 ft., breadth 75 ft., draft 26 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: WMI Lorain.

TUGS: Meet vessel at the pier head. Use ship's lines.

BERTHING: Norfolk and Western Ore Dock, operated by the Lake Erie Dock Co., can handle 15,000 tons of ore in 8 hours. Ore slip is 1,400 ft. long with 26 ft. of water.

Limestone Dock, 700 ft. length with 26 ft. of water.

Grain loading facilities operated by the Pillsbury Company. Load speed, 20,000 bushels; unload speed, 15,000 bushels; berthing space, 832 ft.; max. length 610 ft.

STEVEDORES: None available.

FRESH WATER: Available.

FUEL: None available.

CONSULS: Nearest at Cleveland.

REPAIRS: No facilities.

REPATRIATION: No facilities.

AIRPORT: 50 miles from port (Cleveland International Airport).

POLICE/AMBULANCE/FIRE: 433-4114.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required by Immigration.

AUTHORITY: The Huron Joint Port Authority, P.O.Box 468, Huron,Erie County, Ohio 44839. *Tel:* (419) 433-5240. *Contact:* F.James, Chairman.

JACKSONVILLE, Florida: 30.20 N. 81.40 W.(See Plan)

DOCUMENTS:

Public Health:

Maritime Quarantine Declaration Form HSM 13.19.

Customs:

3 U.S. Customs Manifests for cargo to be discharged at first port of entry.
2 U.S. Customs Manifests covering all other cargo on board vessel for discharge at other than first port of entry.
3 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
3 Curio and Crew Personal Items Lists.
Vessel's Clearance from last port.
Vessel's Register and Load Line Certificate.
Vessel Utilisation and Performance Report.
Form MA.578 for dry cargo vessels.

Immigration:

1 Certified Crew List and Landing Permit form I-95 for each crew member.
Valid Passport for each crew member.

PILOTAGE: Vessels approach Pilot Entrance Buoy STJ No. 2 (Red) approximately 6 miles at sea off jetty entrance to St. John's River. Pilot station located just inside jetty on river channel at Mayport Naval Station. Pilot station operates both VHF and HF frequencies, VHF Channels 16 and 18 A. HF Frequencies 2738 and 2182 kHz. Pilot cable address "Jaxpilot". Pilot boards from pilot boat "Jaxpilot" just East of Entrance Buoy STJ No. 2. Pilot boat does not maintain station at sea but answers call or is dispatched on information by vessels' Agents. Vessels anchoring awaiting Pilot should anchor as near Entrance Buoy as safely possible.

ANCHORAGES: 2 anchorages located inside harbour near dock sites with depth of about 31 ft.

RESTRICTIONS: For vessel drawing not more than 38 ft. water no restrictions and vessel can enter and clear harbour on 24 hour basis. Pilots and tug assistance available all hours day or night. Vessels drawing more than 38 ft. required to await tide.

MAX. SIZE: Draft should not exceed 38 ft. for dry cargo vessels and tankers.

Note: St. John's Bar Pilot Association advises max. draft 37 ft. (20th April, 1982).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tropical Radio, Miami, Fla. Call letters WAX. Lantana Radio, Boynton Beach, Fla. Call letters WOE.

TUGS: Under normal conditions with vessels able to proceed under own power, tugs approach vessel in vicinity of pier at which vessel is to dock. Tugs use own lines but no charge made.

BERTHING: Vessels can dock day or night. Transit time from Pilot Station to berths about 2 hours.

Blount Island Terminal: Operator: Jacksonville Port Authority. Length of berth, 6,300 ft. Depth alongside at MLW 38 ft. (11.6 m.). Containers, autos, paper and general cargo are handled.

Blount Island has 3 on-terminal transit sheds with a total cargo floor area of 372,000 sq. ft. There are also 357 acres of paved open storage area. For cargo handling, Blount Island offers 3×40 ton capacity Paceco container cranes, 2×40 ton capacity IHI container cranes, 3×70,000 lb. container stackers; a 100 ton capacity gantry crane; a 40 ton Le Tourneau straddle hoist; a 50 ton capacity gantry crane; 2 self-propelled multi-level rail car automobile loading ramps; and 390 reefer outlets. 2 Ro/Ro berths. Berth No. 1, depth 38 ft. Berth No. 2, depth 30 ft.

Tallyrand Docks and Terminals: Operator: Jacksonville Port Authority. Length of berth 4,660 ft. Depth alongside at MLW 38 ft. Cargo handled – general, cars, lumber, containers, steel, coffee and petroleum.

There is over 275,000 sq. ft. of warehouse space available, with 40,000 cu. ft. being refrigerated. Talleyrand's cargo handling equipment includes 4×40 ton capacity container cranes; 1×100 ton multi-purpose, level luffing gantry Whirley crane; 1×50 ton gantry Whirley crane; 1×35 ton container stacker; 1×40 ton container stacker; 3×10,000 lb. capacity forklift trucks; 3×10,000 lb. capacity clamp trucks; 2×30,000 lb. capacity forklift trucks; 1×46,000 lb. capacity forklift truck; 310 refrigeration outlets; and tanker discharge facilities.

Talleyrand and Blount Island are served by railroad and truck service. 2 surface tracks on the pier apron and 2 platform-level tracks serve both facilities.

Commodore Point Terminal: Length of wharf 2,750 ft. Depth alongside 34 ft. Cargo handled: Oil, cement and liquid chemicals. Terminal also occupied by North Florida Shipyards. Storage facilities: Charter Oil; 340,000 barrels. Glidden – Durkee: 60,171 barrels for chemical storage. Atlantic Cement; 6 silos capacity 40,000 tons. Universal Atlas Cement; 6 silos capacity 32,000 tons.

Jacksonville Bulk Terminals: A subsidiary of Occidental Petroleum. Length of loading berth 1,000 ft. Depth MLW maintained at 36 ft. – 38 ft. 2 fixed loading towers capable of loading vessel at a rate of 2,850 long tons of phosphate per hour. Maximum outreach 81 ft., clearance above MLW of 40 ft. Terminal also capable of loading superphosphoric acid, phosphate rock, zircon sand (of sufficiently low moisture), granular fertilisers, tachonite, ilmenitite and mullite. Storage facilities: 6 concrete silos, each with a designed capacity of 5,000 tons of phosphate rock. Six tanks with capacities of 15,000 tonnes of superphosphoric acid each.

Dunns Terminal: Length of wharf 1,000 ft. Depth 38 ft. Leased for exclusive use by Military Sea Transportation Services.

Celotex Corp: Tel: (904) 751-4800. Berth: 635 ft. (205 m.) with dolphins. Depth: 32 ft. (9.8 m.). Terminal for receipt of gypsum rock by self-unloading vessels.

BRIDGES: Only 1 bridge that vessel would have to negotiate and that only if docking at Commodore Point terminal.

STEVEDORES: Master should keep Agents closely advised by radio of ETA and any amendments to first ETA given. Recommended that Master give ETA 72, 48 and 24 hours in advance of arrival. Enables ordering gangs or cancelling gangs ordered in event of delayed ETA.

MEDICAL: Hospital facilities available. International Vaccination Certificates required by all crew members.

TANKERS: All petroleum terminals provide own hose ranging from 8 in. to 12 in. Prior to arrival, Master should request information from Terminal Company size of connection required.

Private Terminals:

Amerada Hess: Tel: (904) 765-4427. Berth: 200 ft. (60.1 m.) with dolphins. Depth: 30 ft. (9.2 m.). Tank storage capacity: 460,000 barrels. Receipt of petroleum products.

Alton Box Board Company: Tel: (904) 353-3611. Berth: 750 ft. (230 m.) with dolphins. Depth: 24 ft. (7.2 m.). Receipt of residual fuel oil.

Eastern Seaboard Petroleum Company: Tel: (904) 355-9676. Berths 250 ft. (80 m.) with dolphins (1); 160 ft. (48 m.) with dolphins (2). Depth: 18 ft. (5.5 m.). Tank storage capacity: 1,266,000 barrels.

Shipping of petroleum products by barge; loading of barges for bunkering vessels at berth in the harbour; fueling of tugs and small vessels.

Gulf Oil & American Oil: Berth: 200 ft. (60.1 m.) with dolphins. Depth: 33 ft. (11.5 m.). Tank storage capacity: 900,000 barrels.

Gulf: Tel: (904) 765-5541.
American: Tel: (904) 768-2583.

Receipt of petroleum products and loading of barges.

Phillips Petroleum Company: Tel: (904) 353-6740. Berth: 205 ft. (60.2 m.) with breasting dolphins. Depth: 34 ft. (10.5 m.). Tank storage capacity: 243,000 barrels. Receipt of petroleum products.

Shell Oil Company Wharf: Tel: (904) 355-5521. Berth: 230 ft. (98 m.) with dolphins. Depth: 33 ft. (10 m.). Tank storage capacity: 448,500 barrels. Receipt of petroleum products; occasionally fuels towboats and loads barges for bunkering vessels at berth in the harbour. Light marine diesel fuel only.

Standard Oil Company Terminal: Tel: (904) 353-1094. Berths: Barge – 300 ft. (92 m.) with dolphins; Tanker – 760 ft. (230 m.) with dolphins. Depth: Barge – 10 ft. (3.1 m.); Tanker – 32 ft. (9.8 m.). Tank storage capacity: 595,000 barrels. Receipt and shipment of petroleum products. No bunkering of vessels.

Texaco Pier: Tel: (904) 356-6344. Berth: 550 ft. (167 m.) with dolphins. Depth: 32 ft. (9.8 m.). Tank storage capacity: 320,000 barrels. Receipt and shipment of petroleum products; fuels towboats.

Report: *Approaches:* The Jacksonville Sea Buoy lies outside the entrance of the St. Johns River on the edge of the Gulf Stream where a strong Northerly current is usually experienced. The Sea Buoy ("2STJ") is a red/white, lighted and whistle (Morse (A)) buoy. A counter current setting to the South is usually found close along the coast just inshore of the Sea Buoy. Both the direction and velocity of currents and counter currents vary depending on past and prevailing weather conditions.

Broken ground with least depths of 4 to 5 fathoms lies from 4 to 6 miles from the coast for a considerable distance Northward and Southward of the St. Johns River entrance.

Numerous fish havens are Eastward of the entrance to St. Johns River; the outermost, marked by a private unlighted buoy, is about 27 miles Eastward of St. Johns Light.

All vessels should approach Jacksonville Sea Buoy from between S.E. and N.E. to avoid shallow water along the coast. There are many bright lights ashore at night which would cause confusion or mistaken identity with navigation lights. Refer to current N.O.S. charts regarding danger and cautionary areas.

Sea traffic, especially Southbound ships steaming inshore near the Sea Buoy to avoid the force of the Gulf Stream and take advantage of the counter current, may be encountered.

Naval vessels may be encountered entering and departing Mayport and may also be encountered on exercises outside the Sea Buoy area.

Entrance Channel: A Federal project provides for a channel depth of 42 ft. from the ocean to St. Johns Point. A lighted whistle buoy is about 2 miles off the entrance to the river. The 800 ft. wide entrance channel between 2 converging rubblestone jetties is marked by lighted buoys. Two-way traffic is normal.

The echo sounder should be monitored continuously for any silting that may occur and findings reported.

Anchorages: Vessels waiting outside the entrance to St. Johns River can anchor in depths of 36 ft. – 50 ft. N.N.E. of the jetties if wind and sea permit. Anchorage South of the jetty is not recommended because of heavy shrimp boat activity in that area.

Pilots sometimes anchor vessels in the channel opposite Mayport Basin or at St. Johns Bluff in emergencies or while waiting for weather to clear upstream; however, these anchorages are not recommen due to strong currents. A tug should be stationed alongside to a turning during change of tide.

St. Johns River Designated Permanent Anchorages:

General (Upper) Anchorage: Located on the South shore off Commo Point between Miller Creek and Empire Point. Vessels remaining in anchorage more than 24 hours require a permit from the USCG Cap of the Port.

Quarantine (Lower) Anchorage: Located in the area off the Tallyr Docks and Terminal. Use requires permit from the USCG Captain o Port.

The holding ground in both anchorages is only fair and both somewhat constricted. It is not recommended that vessels with d over 34 ft. use these anchorages.

DENSITY: Varies from fresh water 1000 density to mixed salt w 1007.5 density. St. John's River is fed from fresh water sources and most practical purposes may be considered fresh.

FRESH WATER: Potable water is available through hose connecti at all berths operated by the Port Authority. No water barges.

FUEL: Most grades marine fuels available ranging from bunker "C light marine diesels with intermediate blends in between. Most majo companies have bunkering facilities.

FIRE PRECAUTIONS: No smoking except in officers' lounge and cre lounge. No open flames. No sparking from funnel.

OPENING/CLOSING HATCHES: Crew may open hatches prior vessel's arrival at dock. After arrival at dockside this work reserved longshoremen. Vessels equipped with MacGregor type or o automatic opening devices, crew may open hatches at any ti Longshoremen do not open and close these type hatches.

CERTIFICATES: Vessel Register, Load Line, Gear Certificate, Der

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man. If ves remains in port over extended period of time, sea stores can be ope under Customs supervision and additional allowances made. W Spirits: No specific limits as to quantity allowed per man; Customs acc Masters' recommendations for allowances so long as they reasonable. This applies to beers, wines and spirits.

GANGWAY/DECK WATCHMEN: Watchmen services available but necessary.

CONSULS: Costa Rica, Denmark, Dominican Republic, Finland, Fra Germany, Guatemala, Italy, Netherlands, Norway, Spain and Swed

REPAIRS: All types engine and deck repairs possible. 2 well-equip shipyards.

DRY DOCKS: 3 large dry docks of 18,000 to 33,000 tons capacity 6 smaller with capacity of 1,000 to 12,000 tons.

STORING: See "Prelims".
1. Vessel can be stored by barge or truck.
2. No regulations concerning barge storing except when vessel is loading or discharging dangerous cargo.
3. Trucks can proceed alongside at the berth.
4. Yes, fork lift trucks can be used on the jetty to handle stores.
5. Customs regulations in force regarding storing – ship's stores usually supplied free of U.S. excise taxes and supplies (such as alcoholic beverages and tobacco products) must be loaded under the supervision of the U.S. Customs Service for tax exemption to apply.
6. If possible, local Riggers can be employed to assist with storing but usually deliveries are made directly by the supplier.

SHORE LEAVE: No restriction on shore leave if not detained by Immigration.
IDENTIFICATION CARDS: Form I-95A only.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).
Various local companies can provide these services. Contact agent for details.
WASTE OIL DISPOSAL: Environmental Recovery Group, 251 Levy Road, (P.O.Box 548), Atlantic Beach, Florida 32233. Tel: (904) 241-2200. Fax: (904) 241-4732. This company has the necessary licences and permits to carry out this type of work and offers a large range of services and equipment. Charges vary with type and quantity of oil.
SEAMAN'S CLUBS: Seafarers Fellowship has two local facilities, one at Blount Island and the other at Talleyrand Avenue. Contact Charles Lawhon, Director. Tel: 751-3785 (Blount Island), 633-9971 (Talleyrand), 744-9685 (Home). Usual facilities provided including indoor games, postal and telephone, TV, newspapers, books, bibles and church services.
CURRENCY: U.S.Dollar (U.S.$).
REGULATIONS: No garbage to be disposed overside, no pumping of dirty ballast into river. Smoke emissions must be controlled to minimum.
AUTHORITY: Jacksonville Port Authority, P.O.Box 3005 (2831 Talleyrand Avenue), Jacksonville, Florida 32206-3496. *Tel:* (904) 630-3070. *Telex:* (510) 600-2478. *FAX:* (904) 630-3010. *Contact:* C. Mendoza, Managing Director.

JUNEAU, Alaska: 58.18 N. 134.24 W.

Located at N.E. side of Gastineau Channel, 8 miles from Stephens Passage. Juneau is the capital of Alaska. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
APPROACHES: Via Chatham Straits, Lynn Canal and Stephens Passage.
PILOTAGE: Pilot provided by Southeast Alaska Pilots Association. Pick–up point is Guard Island.
Also see "General" – "Pilotage" before first U.S.A. port.
ANCHORAGE: 16 fathoms in centre of Juneau Harbour.
Restrictions: A Safety Zone has been established, comprising the area between the shore and a line extending 9 cables N.W. from No. 2A light-buoy. Within this zone, which is effective from June 1st to September 30th annually, no vessel other than passenger carrying vessels of 500 gross tons and over (including cruise ships and ferries) may anchor without the express consent of the Captain of the Port. There is no restriction on vessels navigating within the area.
MAX. SIZE: Harbour depth 15/19 fathoms. Tides: diurnal range 16.4 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, locally.
BERTHING:
1. Foss Alaska Line Dock: berthing length 550 ft. 36 ft. LW. No cranes.
2. Juneau Cold storage: berthing length 250 ft., 36 ft. LW. Cranes, 2 electric hoists, 3 lift trucks, 40,000 sq. ft. covered shed space. Fresh water.
3. Juneau Ferry Terminal: berthing length 400 ft. 32 ft. LW. No cranes. This is a Ro/Ro facility for wheeled vehicles and self-propelled or towed. 35 tons capacity. No covered shed space. Fresh water.
4. Coast Guard Dock: 750 ft. long, 31 ft. deep at face. No storage. Restricted use.
5. Trucano Construction Co. Dock: Length 500 ft. Crane with 90 ft. boom available, capacity 50 tons.

STEVEDORES: 1 gang.
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Engine repairs possible.
TRANSPORTATION: Air and ferry.
AUTHORITY: The City and Borough of Juneau, Harbor Department, 155 South Seward Street, Juneau, Alaska 99801. *Tel:* (907) 586-5255, 9425. *FAX:* (907) 586-5367. *Contact:* Joseph L. Graham, Harbour Master.

KAHULUI, Hawaii: 20.53 N. 156.28 W. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Certificate of Registry.

4 Stores Lists.
PILOTAGE: Request for Pilot normally made through Agent. Contact Pilot on VHF Channel 12. Pilot boards 0.25 mile East of Waihee Reef lighted Buoy No. 2. Anchorage 0.5 mile East of Buoy.
ANCHORAGES: No anchorage inside breakwaters. Only anchorage 0.5 miles East of Waihee Reef lighted Buoy No. 2 in 9 to 12 fathoms.
RESTRICTIONS: 24 hours' notice of arrival is obligatory. No tide restrictions.
MAX. SIZE: Max. length 900 ft. Max. draft 34 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany). (Agriculture: Domestic Overseas Arrivals Tel: 877-7801. Foreign Arrivals Tel. 244-3882.)
RADIO: Communicate through RCA or ITT stations in Honolulu.
TUGS: 1 × 1,500 h.p. tug stationed at Kahului. Additional tugs dispatched from Honolulu if necessary. Tug joins vessel between breakwater and Waihee Reef Lighted Buoy No. 2. Tug's lines normally used. No extra charge.
CARGO HANDLING: Kahului has 1 berth specially equipped to load bulk sugar.
Young Brothers Ltd. operate a forklift to move containers.
Dock Load Limits: 500 lb./sq.ft. over the area supported by piles, cylinders or seawall. 1,000 lb./sq.ft. over the area supported by land or fill.
STEVEDORES: To be ordered by 1500 hrs. of day prior to operations.
MEDICAL: Hospital facilities available. Tel: 244–9056.
TANKERS: Discharge only. 12 in. line for molasses, 12 in. line for heavy fuel oil, 6 in. lines for light fuel oils. No slop discharge facilities. One berth available for tankers, max. draft 34 ft. Two berths available for barges.
FRESH WATER: Available from 2 in. water line at each berth. Rate of delivery about 200 gallons per minute.
FUEL: Available by tank truck only.
REPAIRS: Minor deck and engine repairs only.
GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and 1 bottle wine or spirits. (Customs Port Director Tel: 877-6013).
AIRPORT: Distance to airport 1.5 miles. Served by Inter Island Airlines.
TIME: GMT minus 10 hours all year round.
POLICE/FIRE/AMBULANCE: Police 911; Ambulance 911; Fire 911.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard: Tel. Honolulu 536-4336 or Locally Tel. 244-5256.
TELEPHONES: Arrangements made with Hawaiian Telephone Co. (Tel: 242-5211), to install on board.
STORING: 48 hours' free time for domestic cargo. 120 hours' free time for foreign cargo. Trucks allowed alongside to handle special cargoes; bulk and heavy lifts.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Rubbish bins are available on the pier. Bins are provided by contractor providing services. User must contact contractor directly for services. Contact:
BFI Waste Systems. Tel: (808) 871-9727,
Best Disposal Inc. Tel: (808) 871-8431, or
Maui Disposal Co. Inc. Tel: (808) 871-4917.
WASTE OIL DISPOSAL: Available through Agent.
SEAMAN'S CLUBS: None.
DELAYS: Occasional delays due to limited berthing space and shortage of stevedore gangs.
AUTHORITY: State of Hawaii, Dept. of Transportation, Harbors Division, 103 Ala Luina Street, Kahului, Maui, Hawaii 96732-0216. *Tel:* (808) 877-5713. *FAX:* (808) 877-0554. *Contact:* James R. Costello, District Manager and Harbour Master.

KETCHIKAN, Alaska: 55.20 N. 131.38 W. (See Plan)

DOCUMENTS: See "Anchorage, Alaska".
APPROACHES: Port located on Revillagigedo Island. Open all year round. Ships coming from Hecate Straits or outside Graham Island proceed into Dixon Entrance to vicinity of Guard Island where the Pilot will meet them.

Vessels coming up the inside passage from Vancouver, B.C., are met at Lucy Island Pilot Station.
PILOTAGE: South Eastern Alaska Pilots' Association, Box 6100, Ketchikan, Alaska 99901. Telegraphic address; Alaska Pilots Ketchikan.

The Alaska Pilot Service requires 5 days, 48 hours, and 12 hours advance notice of ETA and can be contacted on Channel 16 VHF or 2182 kHz.

The pilot boat "Jenny B" (RG 2437) normally rendezvous with the vessel 0.75 miles from Guard Island.

Pilotage is compulsory for Cross Sound and Icy Strait. Vessels proceeding to the Point Retreat Pilot Station are excluded from compulsory use of a pilot if travelling via Cape Ommaney and Chatham Strait.
ANCHORAGE: Safe anchorage can be obtained in the area for deep draft vessels; however there are no specified anchorage areas.
MAX. SIZE: The largest vessel to be berthed to date is a 26,000 ton freighter; however larger vessels could be accommodated.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Cables to Agent, Receivers, and Pilots can best be routed through AKM Juneau.
TUGS: Tugs can be arranged through the ship's Agent. Lines from tug are normally used with no additional charge.
BERTHING: City Berth I: Length 1,450 ft., depth 45 ft. LW.

City Berth II: Length 575 ft., depth 33 ft. with 2 mooring dolphins, combined length 780 ft.

Ketchikan Pulp Company (at Wards Cove, 6 miles North of Ketchikan): Private dock, berthing length 800 ft., depth 33 ft. at low water. 50 ton crane on rails, also mobile units and forklifts.
STEVEDORES: Stevedores obtained through shipping Agent. 24 hours' notice normally required.

4 or possibly 5 gangs available dependent on obtaining casual labour.
MEDICAL: Medical matters may be referred to shipping Agent. Excellent hospital and out-patient treatment facilities are available.
TANKERS: Tow lines (fire wires) required fore and aft.
FRESH WATER: Water available at City Berths. Contact Harbour Master for service charge.
FUEL: Fuel available for deep draft vessels: No. 2 Diesel and gasoline.
CONSULS: The nearest Consul is in Anchorage, Alaska.
REPAIRS: Excellent welding and machine-shop services are available.
DRY DOCKS: Ketchikan Shipyard, 600 ft., depth 30 ft.; 434 ft. floating dry dock. Facility in first stage of shipyard development.
GANGWAY/DECK WATCHMEN: Recommend security watch for passenger vessels. Watchmen can be arranged through the shipping Agent.
OPENING/CLOSING HATCHES: Done by longshoremen.
REPATRIATION: Repatriation matters can be handled through the shipping Agent and Immigration Officials.
AIRPORT: Daily flights to and from Seattle as well as points North may be obtained.
TIME: Ketchikan is on GMT minus 8 hours during the Winter and GMT minus 7 during the Summer. Time changes from first Sunday in April till last Sunday in October.
IDENTIFICATION CARDS: Crew identification cards are required by Immigration Officials.
GARBAGE DISPOSAL: Service can be arranged by ship's Agent with the City of Ketchikan, Solid Waste Department.
WASTE OIL DISPOSAL: Can be arranged with Ketchikan Shipyard Inc.
SEAMAN'S CLUBS: None.
AUTHORITY: City of Ketchikan, Port and Harbours Department, 334 Front Street, Ketchikan, Alaska 99901, USA. *Tel:* (907) 225-3610. *FAX:* (907) 247-3610. *Contact:* A.D. Ensley, Director. M. Nickich, Harbour Master.

Supervisor, U.S. Coast Guard, Marine Safety Detachment, c/o U.S. Coast Guard Base, Ketchikan, Alaska.

KODIAK, Alaska: 57.47 N. 152.24 W. (See Plan)

Located near the N.E. tip of Kodiak Island in the Gulf of Alaska, South of Anchorage and East of the Alaska Peninsula.
DOCUMENTS: See "Port of Anchorage".
APPROACHES: North Entrance: Buoy No. 4 off Spruce Cape.

Pick-up Point: Hutchinson Reef Buoy.

East Channel Entrance: Humpback Rock off Cape Chiniak. Steer 280°T until reaching St. Paul Buoy.
PILOTAGE: Pilot can be contacted through Southwest Pilots' Association in Homer, Alaska, Tel: (907) 235-8783, Fax: (907) 235-6119. 24 hours' notice should be given when requesting a Pilot. Pilot Station: Lat. 57° 42' 24" N., Long. 152° 14' 12" W. (St. Paul's Rock Morris Alpha Buoy).

Pilot boat is tug "Kodiak King". Tel: (907) 486-5503. VHF Channels 10, 12 and 16 and Single Side Band 4125 kHz.
ANCHORAGES: Safe anchorage between Puffin and Gull Islands East of shipping channel.
Prohibited Anchorage: The City of Kodiak has declared that vessels are prohibited from anchoring within the Inner Boat Harbour Light 1 (LLNR 3536.10) to a point at position 57° 46' 56" N., 152° 25' 09" W., thence to the North Pacific Fuel Pier (formerly the old Union Oil Pier at po 57° 47' 05" N., 152° 25' 18" W.) due to possible fouling and dama waste water discharge from the canneries in that vicinity (St. Harbour anchor zone).
Note: Mooring buoys available in St. Paul inner anchorage an St. Herman Harbour.
MAX. SIZE: Harbour depth in excess of 30 ft. Tides: Range app imately 10 ft.
HEALTH: See "Health": All Ports before first U.S.A. ports (Albany

BERTHING: Pier 1/Ferry Dock: 204 ft.×28 ft., 26.6 ft. at ML Use: Mooring, loading and unloading and bunkering.

Pier 2/City Dock: 925 ft.×64 ft., 38 ft. at MLLW. Use: Loading unloading commercial freight vessels, moorage for fishing ves Covered warehouse space available. 20 ton and 90 ton cranes avail Various size forklifts.

Pier 3/Container Terminal: 490 ft.×64 ft. (880 ft. bollard to boll 38 ft. at MLLW, container services/general cargo, 30 ton gantry c available.
CRANES: See "Berthing" and "Stevedores".
STEVEDORES: Sea-Land Services, Inc., Operations Department, Shelikof Street, Kodiak, AK 99615. Tel: (907) 486-5795 or 486-413

Mobile cranes 20 tons, 40 tons and 90 tons available.
MEDICAL: Ample hospital facilities available. Also paramedics, doc dentists and optometrists.
FRESH WATER: Available through Harbour Master or stevedo company.
FUEL: Light fuels only. 2 fuel companies. 24 hour service availab
REPAIRS/SERVICES: Most deck, hull, engine, R/T, radar, hydraulic, electrical, refrigeration and most types of marine elect repairs. Divers available for underwater surveys and repairs.
SURVEYORS: Alaska Marine. Tel: (907) 486-6001.

Lamont. Tel: (907) 486-3733.
DRY DOCKS: None available for large vessels.
AIRPORT: 5 miles from city centre. Various flights available depen on time of year. Ferry service available March to December.
POLICE/FIRE/AMBULANCE: Emergency 911, Police (907) 486-8 Fire and Ambulance 911.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard, Search Rescue (Kodiak Island) 1-800-478-5555 anywhere in Alaska. Channel 16.
DEVELOPMENTS: The Port of Kodiak is responding to the incre activity by planning an ambitious 15 year program of developm Included is a proposal to build a 1,000 ft. deep draft pier to accommo commercial and military vessels, some 2,000 ft. of loading docks i the harbour, plus dredging and development of additional staging a
AUTHORITY: Port of Kodiak, Harbour Department, 403 Marine Kodiak, Alaska 99615, U.S.A. *Tel:* (907) 486-8080 or 486-8 *FAX:* (907) 486-8090. *Contact:* Martin H. Owen, Harbour Master Administrator.

LAKE CHARLES, Louisiana: 30.13 N. 93.15 W. (See P

PORT LIMITS: Buoy No. 26, In Calcasieu Ship Channel, 3 mile Cameron, Louisiana.
DOCUMENTS:
U.S. Customs: If foreign cargo on board for discharge at any port

3 copies of Cargo Manifest of all Cargo.
3 copies of Crew List.
3 copies of Stores List.
3 copies of Curio List (crew personal effects).
3 copies of Passenger List if carrying passengers.

If vessel in ballast, only 2 copies of above documents required

If vessel in ballast and carrying passengers, 3 copies of a documents required.

1 copy of Clearance from last port.
2 copies of Customs Form 1300 (Master's Oath).
2 copies of Customs Form 1301 (General Declaration).

U.S. Customs Boarding Officer must examine Load Line Cert Safety Equipment Certificate, Tonnage Tax Receipt, Certific Financial Responsibility (Oil Pollution), Ship's Register and Certificate of Nationality (if any).

1 copy of Certified Crew List (If American Ship).

Bonded lockers may be sealed by Customs.
U.S. Immigration:

1 copy of Visaed Crew List from American Consul at foreign clearance (if any).
1 I-95 (Identification Card) for each crew member on board.
All Passports must be validated for each crew member.

U.S. Bureau of Etomolgy:

All meat lockers and freezers with restricted meat will be All fruit from prohibited countries will be confiscated. All animals from foreign countries must remain on board.
PILOTAGE: Radio Agent ETA, who will arrange Pilot board at Ca Bar. Vessel to stand-by on VHF Channel 66A.
ANCHORAGE: At Calcasieu Bar only.
RESTRICTIONS: Entrance channel 40 ft. depth. Distance 40 m

During LNG/LPG movements, special restrictions may be pl the waterway by the local Coast Guard Captain of the Port.
MAX. SIZE: 1,000 ft. length, 38 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first USA port (Albany).
RADIO: Tropical – New Orleans, WNU.
VHF: Pilots may be contacted on Channel 12, 13, 65 and 66.
TUGS: Meet vessel 30 minutes away from berth. Use tugs' own lines. 2 for berthing, 2 for unberthing.
BERTHING: General Cargo Berths: 10 with total length: 5,675 ft. All have draft of 36 ft. (fresh water).
CRANES: Mobile pneumatic and track cranes available with lifts up to 50 tons.
BULK HANDLING FACILITIES: 3 bulk-loading berths: No. 1, West bank of Calcasieu River, 8 miles below main port facilities, 1,200 ft. length, 40 ft. depth, loading rate 1,600 t.p.h. Clam bucket type ship unloading crate, unloading rate of 600/800 short tons per hour.

No. 2, Contraband Bayou Section, main port, 920 ft. length, 35 ft. depth, loading 480 t.p.h. 16,000 long tons storage facilities.
SPECIALISED CARGO HANDLING FACILITIES: 1 berth suitable for Ro/Ro traffic. 2 berths at main port for liquid chemicals, No. 5 for heavy liquid import and No. 6 for import/export. Private berth for private company for receiving LNG.
BRIDGES: One bridge with vertical clearance of 135 ft.
STEVEDORES: Notice of firm ETA and request for gangs must be received prior to 1600 hrs. CST for work following day.
MEDICAL: Hospital facilities available.
TANKERS: Citgo Petroleum Corp. B-Dock, 673 ft. length, 36 ft. depth; C-Dock, 660 ft. length, 34 ft. depth; D-Dock 665 ft. length, 36 ft. depth. Also see "Shipmasters Report No. 1".

Continental Oil Co. Berth 1, 1,000 ft. length, 40 ft. depth; Berth 3, 1,000 ft. length, 40 ft. depth. (Also see "Report" dated April 1994).

PPG, 700 ft. length, 40 ft. depth.

Olin Corp. Dock: 400 ft. length, 28 ft. depth. Also see "Shipmaster's Report No. 2".
DENSITY: Salt water in Summer, fresh water in Winter. Allow density 1000 for drafts.
FRESH WATER: Available at all berths.
FUEL: Bunker "C" and diesel available at Cities Service berths; other berths served with bunkers by barge.
FIRE PRECAUTIONS: Usual precautions.
REPAIRS: Small repairs carried out only; very limited facilities.
DRY DOCKS: None.
SURVEYORS:
1. Cargo inspectors are available.
2. Surveyors are available.

GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Rigging performed by stevedores. MacGregor-type hatches opened by crew, others by stevedores.
CARGO GEAR: Shore cranes available at ship's request.
CUSTOMS ALLOWANCES: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 litre wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
REPATRIATION: Facilities exist. Arrange through Agent.
AIRPORT: 7 miles from port. 26 flights per day.
TIME: CST, that is GMT minus 6 hours.
HOLIDAYS: Only 2 days affected on which no work carried out – Labour Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police or Fire, 911. Fire only 491–1350. Police only 491–1311. Ambulance 433–1677, 433–4411 and 433–1668.
EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard, Sabine, Texas. Tel: (713) 971–2361.
TELEPHONES: None on board ship.
BANKS: Calcasieu Marine National Bank, 844 Ryan Street, Lake Charles, Louisiana 70601.

Premier Bank of Lake Charles, 3401 Ryan Street, Lake Charles, Louisiana 70605.

Gulf National Bank, 825 Ryan Street, Lake Charles, Louisiana 70601.

Lakeside National Bank, One Lakeside Plaza, Lake Charles, Louisiana 70601.

National Bank of Commerce, 535 Kirby Street, Lake Charles, Louisiana 70601.
STORING: See "Prelims".
1. Vessel can be stored by barge or truck.
2. Vessel can be stored during loading/discharging as long as it does not interfere.
3. Trucks can proceed alongside berth.
4. Forklifts can be used on docks.
5. No customs regulations for United States stores.
6. Longshoremen must be employed to assist in storing.

SHIP SUPPLY SERVICE: *Offshore Waters Personnel Transfer:*

Air: ERA Helicopters, Inc., P.O.Box 6566, Lake Charles, La. 70606. Tel: (318) 478-6131.

Petroleum Helicopters Inc., P.O.Box 16490, Lake Charles, Louisiana 70616. Tel: (318) 433-6658, 433-1749.

Boat: McCall Boat Service, P.O.Box 186, Cameron, La. 70631. Tel: (318) 775-5685.

Inland Waters Personnel Transfer:

Land and Water: Port Shuttle, Inc., P.O.Box 1772, Lake Charles, La. 70601. Tel: (318) 433-1613.
SHORE LEAVE: Allowed if not detained by Immigration.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
GARBAGE DISPOSAL: Service available from Browning Ferris Industries and Cities Service Highway.
WASTE OIL DISPOSAL: Service available from Ali Marine Inc., Lake Charles. Tel: (318) 436-8656.
SEAMAN'S CLUBS: Lake Charles Seafarers Center, 150 Marine Street, Lake Charles. Tel: (318) 436-1315.
DELAYS: Very few delays encountered at any berth.

SHIPMASTER'S REPORT No. 1: 1977.

Cities Services Oil Co., Clifton Ridge:
Location: Lat. 30° 09' 32" N., Long. 93° 19' 30" W.
Max. Size: Length 805 ft., beam 115 ft., draft 39 ft. (FW).
Density: 1005.
Restrictions: Vessels may berth and unberth at any stage of the tide day or night.
Anchorage: At Bar: 2 miles East of seabuoy in depth of 42 ft. For Bunkering: South of Clooney Island in Old Calcasieu River Channel in midstream.
Distance to Berth: Sea buoy to berth 45 miles.
Terminal Information: 2 × 10 in. Chicksan arms. Max. discharge pressure 150 p.s.i. Derricks not required. Accommodation ladder not required.
Services: Fresh water, provisions, fuel oil, diesel and lube, doctor, hospital, airport and laundry.

The following services are not available: Repairs, drydocks, Lloyd's Surveyor and slop tanks.
Telephone Numbers: Dock 318-583-2432. Terminal Supervisor 318–491–6121, 318–491–6437.

SHIPMASTER'S REPORT No. 2: 1979. Olin Chemical Berth.
Approach: If without Loran "C" or satellite navigator the approach at night can be awkward, best made in daylight.

Due to flat coastline, lack of European navigation aids (Decca and Racon) plus numerous oil rigs the entrance to Calcasieu River (like Sabine) is difficult to make.

Calcasieu and Sabine D/F good.

Numerous oil rigs South of buoyed channel which are either side of safety fairway. This corridor can be clearly seen on radar and provides a good longitude.

The soundings, in particular the 100 fathom line, give a good latitude.

The wreck buoy on chart 975 – (Approach to Calcasieu River) at Lat. 29° 19.5' N., Long. 93° 12' W. has been removed.

'CC' Buoy was picked up at 6 miles.
Pilot/Channel: (B.A. Chart 975). The channel is easy to follow as long as U.S. system of buoyage is remembered. Vessels under 30 ft. can go out of the channel on their starboard side leaving starboard hand buoys to port. This is quite in order up to Pilot Area No. 1. Do not go on port side or West as this is spoil ground.

A Westerly current sets across channel 90% of the time and up to 1 knot. The boarding area is as Vol. No. 6 ALRS. If vessel takes a Pilot at Area No. 3 it costs $300 more than No. 1 (not necessary unless vessel restricted by draft – 24 hour service).

Pilot boat is an ex-fishing cutter. White, very fast and strong. Minimum notice for Pilots: Boarding at Area No. 1 four hours, Area No. 3 six hours. For sailing from Lake Charles 2 hours. From Area No. 1, one Pilot to Lake Charles, from Area No. 3, two Pilots. Pilot will *not* use hoist.
VHF: Calcasieu Pilots Channels 12, 13 and 16. Difficult to contact Pilot Station until well into channel North of 'CC' Buoy.
Public Correspondence: Several stations in area – Port Arthur, Cameron, Erath, Lake Charles, a number, notably Erath and Lake Charles have the "80" Channels which they use in preference to "20" Channels. Very busy, but if you search around you can get through fairly quickly. As with all U.S. Marine Operators, overseas ships have difficulty if not calling 'Collect'.
Calcasieu Channel: About 35 miles to Lake Charles from breakwaters. 5 hours from Pilot Area No. 1 to 'Olin' Chemical Dock.

With Northerly wind and heavy rain on ebb, a current of up to 5 knots at Cameron at entrance just North of breakwater.

Bridge: Highway 102 gives 135 ft. clearance HW. 3.75 hours North of breakwater.
Draft: Max. transit draft of 38 ft. 6 in. (FW) from No. 30 buoy to Lake Charles Docks. We consistently had 39 ft. on echo sounder.
Tugs: 2 tugs of 2,500 h.p. and 3,200 h.p. secure in American style, port side, at bridge 102 and leave in same area.
Berthing: Olin Chemical.
Dock: At head of seagoing navigation at bridge interstate 10. In cut, so no traffic passing. New concrete pier upgraded from barge dock. Min. depth 30 ft. Head in, starboard side to. Vessel left at 0200 hrs. without difficulty.
Moorings: 3 headlines, 2 breast lines and 2 springs each end. Springs go on to bollards on the jetty and breast lines and stern lines on to hooks on the bank.
Cargo Hoses: 8 in. × 300 ASA and spool piece to 12 in. × 150 ASA. 3 lengths, ship connects. Takes about 1 hour to connect and disconnect.
VRL: No.
Venting: No, on shore there are detectors on the tanks for ammonia. Generally the wind is onto the works which makes the detection of venting immediate. Vessel has to wait for a change of wind from the North.
Samples: Taken by chemist of tank atmosphere before loading. Must have min. 97% NH_3 by volume before loading.
Rate: Max. 330 t.p.h. (15 minutes of notice if possible, to stop).
Nitrogen: Available but not for hose purge.
Fresh Water: Water on berth very acid. Difficult to get hold of fresh water barge.
Stores: Ship's crane can reach end of jetty. Also small crane on hose platform on jetty which can be used for stores. Lorry cannot get to ship's side.
Gangway: No difficulties. Some ships have to use pilot ladder.
Developments: LPG dock at Beacon 85/86 about half way up the canal owned by Citgo Petroleum Corp. Good mooring facilities. 1 Chicksan. Dredged area 1,000 ft. long, 45 ft. deep.

SHIPMASTER'S REPORT No. 3: June 1988.

Louisiana pilot's office works on Channel 66. Passage in and out varies between 2 hours and 5 hours, depending on tide and where vessel leaves pilot on way out.

The Customs District for this port is New Orleans.

At Conoco Berth (Clifton Ridge), their regulations prohibit the loading of any flammable goods while vessel discharging cargo. (I pointed out that we were discharging 66,000 tonnes of flammable goods, i.e. crude oil and on our return we were able to load flammable goods during discharge). However, vessels unable to take bunkers alongside and have to go further up river and then anchor, 1 shackle in water and lie against the bank. This means that vessels require 2 tugs when departing from anchorage.

REPORT: April 1994.
Berth: Conoco Refinery Dock – Dock No. 1 Facility.

Transit time from Pilot Station Buoy "CC" to dock is approximately 6 hours (No daylight restrictions in ballast or loaded condition).

Cargo/Commodities handled: Diesel, gasoline, naphtha, heavy oils, gasoil and kerosene.

Size and number of cargo hoses/arms: 1×12 in. arm.
Cargo arms connected by dock crew only.
Number of products handled simultaneously: Normally one.
Permanent line for nitrogen supply: Yes.
Fresh water available alongside: Yes.
Vapour recovery installation: Yes.

Average load rate:	
Diesel	6,000 bbls./hr.
Gasoline	4,000 bbls./hr.
Naphtha	4,000 bbls./hr.
Gasoil	2,800 bbls./hr.
Heavy oil	800 to 3,000 bbls./hr.

Size of pipeline from dock to shore tank: 4 in. to 16 in.
Distance of pipeline from dock to shore tank: 1.5 miles to 2 miles.
Store/provision deliveries permitted via truck only.
Dock No. 1 Restrictions:
Air draft restriction: 135 ft. mean low water (I-210 Bridge).
Maximum permissible height from waterline to manifolds: 50 ft.
Maximum permissible length alongside: 800 ft. (Can be 825 ft. – 850 ft. max.).
Maximum safety draft permissible alongside: 37 ft. fresh water (36 ft.).
No bunkers available at berth.
No bunker barge permitted alongside vessel.
No lube oil transfers permitted in bulk via barge or truck.
No stores/provision deliveries permitted via barge.
No dangerous goods delivery permitted via barge (Truck delivery permitted with permission from dock).
No cargo transfers permissible via barge.
No shore gangway available.
No shore ballast facility available.
No pumping overboard while alongside of any ballast from cargo tanks (only S.B.T. ballast permitted to be pumped overboard).
Request vessel to be inerted on arrival alongside.
Request vessel to always sail at even-keel.
Minimum mooring lines requested: 12 lines.
3 bow lines, 2 forward springs, 1 breast.
3 stern lines, 2 aft springs, 1 breast.
Prefer to use synthetic ropes for spring lines, bow and stern.
No engine or other repairs permitted alongside (require vessel's main engine power to be available at all times).

LONG BEACH, California: 33.45 N. 118.13 W.

(See Plan)

DOCUMENTS:

Certificate of Registry.
International Load Line Certificate – Tonnage Certificate (Admeasurement).
Inspection Certificate.
Derat Certificate.
Safety Radio Certificate.

Inbound cargo for discharge – United States must have a Travellers' Manifest (Form 7527), original manifest, and dock inspection copy covering cargo to be discharged at first U.S. port of entry, Custom's Utilisation Form 1302 (Inbound), Form 1302A (Outbound) must be filed within 10 working days after vessel's entry at first U.S. port. Landing permits must be made out prior to arrival (Form I-95) for each crewman of alien origin for the U.S. Department of Immigration (and Form I-418 for each passenger of alien origin). 3 sets of Crew Lists (Form I-418) must be presented to U.S. Customs, plus 2 sets to the Immigration Inspector, and 1 for the U.S. Public Health Service (Quarantine), and 3 sets Stores Lists plus 3 sets Curio Purchases List for U.S. Customs.

American Ships from Foreign Ports:
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.
Customs Form CF 226 Affidavit of Repairs Abroad.
Certified Crew List.

Foreign Ships:
1 copy of Visaed Crew List for Immigration (Form I-418 & 5 copies). Other forms may be necessary under certain circumstances, but normally can be taken care of after the vessel's arrival.

If a foreign vessel from a foreign port departs for a foreign port, 2 copies of (Form I-418) covering crew changes in the United States must be submitted to the Department of Immigration upon sailing of the vessel.

(*a*) Number of copies required: all single except as noted.
(*b*) The reports mentioned above are all government laws, reque by U.S. Customs, U.S. Immigration, Department of Agricu Public Health Service, and B.I.A.
(*c*) Purpose of documents: to record all vessel movements suc cargo, crew changes, health standards, etc.
(*d*) Procedure of presenting documents: documents must presented to Quarantine Boarding Officer and Customs Br and/or Agent, during or immediately after Quarantine.

PILOTAGE: Pilots ordered by local Agents. Order placed by teleph to 435-6354/5. Pilots require 2 hours notice prior to arrival. Pilot sta contacted on VHF radio Channel 12 (156.6 MHz) or Channel 16 (15 MHz). Call sign KMA – 372 Long Beach Pilots. Pilot boats motor cruis light grey, fly International Flag "H". Local whistle signal for a Pil ship's whistle, 1 short and 1 long blast. Pilot boat normally meets vess in vicinity Long Beach Sea Buoy or approximately 1 mile Sout breakwater entrance. Vessels should have a Pilot ladder on starbo side, weather permitting. In bad weather vessels may be require proceed inside breakwater entrance prior to Pilot boarding. Pilot boa VHF Channel 13.

Shipmaster's Report: March 1994.

Vessels en route to Long Beach must contact "Long Beach Pilot VHF Channel 74.

APPROACHES: VTIS: See "Los Angeles".

ANCHORAGE: Preferably outside anchorage approximately 0.5 m S.E. of Long Beach Sea Buoy in 66 ft. of water. Inside ancho available N.E of channel in outer harbour at approximately 8 fathom water depth. Special explosive anchorages available by request, on sides of entrance channel in 48 ft. of water.

U.S. Coast Guard Anchorage Regulations:

1. The Master of every vessel upon anchoring shall notify the C Guard Captain of the Port giving vessel name, anchorage number time anchored.
2. The Master of every vessel upon departing anchorage shall n the Coast Guard Captain of the Port giving vessel name, ancho number, time underway and destination; i.e., bound for sea or for b number.
3. For the above reports, the call to the Coast Guard Captain o Port should be made on VHF Channel 16.

RESTRICTIONS: Vessels with dangerous cargoes aboard or loadi discharging such cargo within port district shall obtain permit from Coast Guard, countersigned by Long Beach Fire Prevention Bureau Long Beach Port Authority, subject to safety inspection prior ent assigned anchorage or berth. (Application for entry or han dangerous cargoes must be requested by Steamship Compan authorised Agent and approved prior entry.)

Also see "Tankers" last paragraph.

MAX. SIZE: (1) Designed depth of water at general cargo bert 30 ft. – 42 ft. at MLLW.

The Entrance Channel is maintained at 65 ft. MLLW.

(2) No length or breadth restrictions at general cargo berths.

(3) Dry bulk facility berths designed depth at MLLW is 36 ft. to No restriction on length. However, ships with over 130 ft. beam experience some difficulty in loading without turning ship.

There are 10 bulk oil facilities, 2 with 76 ft. of water at MLLW with 37 ft. to 52 ft. of water at MLLW alongside berths. It is feasible vessels over 1,000 ft. in length could use the deep-water oil fac There are no restrictions as to beam.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany

QUARANTINE: Quarantine Station, U.S. Public Health Se 380 World Way, L.A. International Airport, Los Angeles, CA 9 Tel: (310) 215-2365. Hours: 0600 – 1800 hrs. regular boarding h 1800 – 0600 hrs. overtime boarding hours.

STANDARD PROCEDURE FOR MARITIME BOARDING

Dockside Boarding: Vessels subject to Quarantine Inspectio normally boarded upon arrival in berth.

A vessel crewman should be stationed at the gangway to preve crew member from going ashore and shore personnel from co aboard until the vessel has been passed by the Quarantine Bo Officer.

Vessels are boarded at anchor.

Boarding in the Stream: Vessels are boarded at anchor:

Only if ship is to be at anchor for some time, such as waiting etc.

Or upon special request by the ship's Agent.

Effective July 1st, 1973, Radio Pratique as a method of qua clearance was discontinued at all ports under control of the States. Changes in regulations, policies, and procedures con Maritime Public Health Clearance has been promulgated.

Vessels Subject to Routine Inspection: Only vessels in the fo categories will be subject to on board Public Health Inspectio arrival at ports under control of the United States:

A. Vessels which, during the 15 days prior to arrival in the States, or since the last U.S. port (whichever period is s have or have had on board among passengers or crew the following conditions or illness signs or symptoms:
   1. Temperature of 100°F (38°C) or greater (a) which p for 2 days or more; or (b) which was accompanied or b by any one or all of the following: rash, jaundice, g swelling; *or*
   2. Diarrhoea severe enough to interfere with work o activity; *or*
   3. On board occurrence of death, regardless of the s symptoms above.

B. Vessels which have been in plague infected country in the prior to arrival in the United States.

Procedures: Vessels in any of the categories A or B above will be granted Provisional Pratique and boarded upon arrival for inspection. In addition, vessels boarded for quality control may be boarded upon or subsequent to arrival. IN ACCORDANCE WITH REGULATIONS YOU MUST INFORM THE QUARANTINE STATION, THROUGH YOUR VESSEL AGENT, AT OR NEAREST THE INTENDED PORT OF YOUR VESSEL'S FIRST ARRIVAL IN THE UNITED STATES OF THE OCCURRENCE OF ILLNESS AS SPECIFIED IN A ABOVE. Based on information you provide your Agent, or information your Agent already possesses regarding your vessel's itinerary, your Agent will notify the Quarantine Station if your itinerary included a plague infected country.

ARRIVING VESSELS NO LONGER NEED TO COMPLETE A MARITIME PUBLIC HEALTH DECLARATION UNLESS BOARDED FOR INSPECTION AS DESCRIBED ABOVE. THE BOARDING INSPECTOR WILL PROVIDE THE DECLARATION.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Station KOU Marine Operator, San Pedro.

Channel 1 — ship transmit on 2009 kHz
ship receive on 2566 kHz
Channel 4 — ship transmit on 2126 kHz
ship receive on 2522 kHz

Station KOU also monitors Channel 16 (156.8 MHz) and Channel 26 (157.3 MHz) for distress, safety and calling.

Hours of report 0805, 2005 PST. Operator gives notice 5 minutes prior to each report. No ship traffic is handled during report period.

TUGS: Tugs will meet vessel inside breakwater prior reaching inner harbour area. Pilot and tugs are in communication.

RADAR/VHF: Radar service provided to vessels only if Pilot aboard, in which case radar advisory information will be fed from shore-based radar at Pilot Station and Pier J.

Use	*Channel*	*Frequency* (MHz)
Distress, Safety and Calling	16	156.80
Safety, S.A.R.	6	156.30
Bridge to Bridge	13	156.65
Marine Exchange VTIS	14	156.70
Marine Exchange Non-VTIS	12	156.60
Long Beach Pilots, KMA 372	12	156.60
Los Angeles Pilots, KEB 260	73	156.675
U.S. Navy, Control No. 2	12	156.60
Harbour tugs, primary	77	156.875
Harbour tugs, secondary	65A	156.275
San Pedro Marine Operator	24	157.20
San Pedro Marine Operator	26	157.30

Note: The Marine Operator does not guard Channel 16.

Channel 77 – Pilot/Tug channel: This channel is restricted to communications by a harbour pilot and support personnel in the movement and docking of ships. The use by commercial and recreational boat users is *in strict violation* of FCC rules. The loss of communications between a pilot and his assisting tugs due to interference by unauthorised users could result in a serious catastrophe within a harbour.

Channels 12, 14, 65A – Port Operations channels: Messages are restricted by FCC Rules to "the operational handling, movement and safety of ships and, in emergency, to the safety of persons." Other use is a violation of FCC rules.

Channel 13 – Navigational Bridge to Bridge channel: Use of this channel is restricted by FCC rules to navigational communications, such as meeting and passing arrangements, and vessel traffic services. No shore-based of this channel is permitted in this harbour area except Marine Exchange VTIS and the Cerritos Channel lift bridges.

Vessel Traffic Information Service: Upon entering the precautionary area, vessels are encouraged to contact the Marine Exchange on VHF Channel 13 (Call Sign KGW-299) to ascertain what vessel traffic may be expected.

BERTHING: No requirements as to time of entry providing berthing arrangements have been made with Port Authority. Assignments classified as follows:

Preferential Assignments. Secondary Assignments, Subordinate Right granted for use of Preferential Assigned Berth. Temporary Assignment – temporary permission granted to use certain berth.

Note: All berth assignments shall be held by Assignee subject provisions of Port of Long Beach Tariff as to charges, rates, rules and regulations applicable thereto, and to all of terms, conditions and provisions contained in such assignment.

Depths/Elevations: Average elevation of wharf decks above mean lower low water datum and design depth of water alongside berths below mean lower low water datum. (Design Depths are subject to change. Consult Pilot Station for latest information).

GENERAL CARGO FACILITIES:

Berth F201:
Terminal Operator: Port of Long Beach.
Cargoes Handled: Standby berth.
Length of Berth: 600 ft. (183 m.)
Wharf Height: 16 ft. (4.9 m.)
Wharf Area: 18,000 sq.ft. (1,673 sq.m.)
Apron Width: 30 ft. (8.1 m.)
Open Storage Area: 12,000 sq.ft. (1,115 sq.m.)
Design Depth of Water: 32 ft. (9.8 m.)
Special Equipment/Facilities: None.

Berth F208:
Terminal Operator: MCC – Lucky Cement.
Cargoes Handled: Cement.
Total Terminal Area: 5.7 acres (2.3 ha.)
Length of Berth: 600 ft. (183 m.)
Wharf Height: 19.1 ft. (5.8 m.)
Wharf Area: 24,000 sq.ft. (2,044 sq.m.)
Apron Width: 40 ft. (12.2 m.)
Loading Platform Area: 14,000 sq.ft. (1,300 sq.m.)
Design Depth of Water: 40 ft. (12.2 m.)
Special Equipment/Facilities: Cement storage facility. Kovako-B.V. vacuum discharge system. Unloading capacity 800 t.p.h. Covered storage 50,000 sq.ft., 58,000 tons capacity.

Berths E12, E13:

Terminal Operator:	Chiquita Brands, Inc.
Cargoes Handled:	Bananas.
Total Terminal Area:	20.4 acres (8.3 ha.)
Length of Berths:	2,696 ft. (821 m.)
Wharf Height:	18.7 ft. – 22.2 ft. (5.7 m. – 6.8 m.)
Wharf Area:	108,462 sq.ft. (10,076 sq.m.)
Apron Width:	45 ft. – 200 ft. (13.7 m. – 61 m.)
Open Storage Area:	186,325 sq.ft. (17,310 sq.m.)
Loading Platform Area:	12,000 sq.ft. (1,115 sq.m.)
Design Depth of Water:	32 ft. – 36 ft. (9.7 m. – 11 m.)
Transit Shed Area:	180,000 sq.ft. (16,722 sq.m.)
Special Equipment/Facilities:	Mobile cranes, forklifts, Ro/Ro ramp. Heavy lift capability. 3 chilled storage refrigeration chambers.

Berths E17, E18, D28, D29:

Terminal Operator:	California United Terminals.
Cargoes Handled:	Breakbulk general.
Total Terminal Area:	30 acres (12.1 ha.)
Length of Berths:	2,190 ft. (688 m.)
Wharf Height:	10.5 ft. – 18.5 ft. (3.2 m. – 5.6 m.)
Wharf Area:	126,000 sq.ft. (11,705 sq.m.)
Apron Width:	45 ft. – 130 ft. (13.7 m. – 39.6 m.)
Open Storage Area:	288,600 sq.ft. (26,811 sq.m.)
Loading Platform Area:	9,000 sq.ft. (836 sq.m.)
Design Depth of Water:	36 ft. – 43 ft. (11 m. – 13.1 m.)
Transit Shed Area:	96,000 sq.ft. (8,922 sq.m.)
Special Equipment/Facilities:	Stevedoring equipment. Access for rail to heavy lift berths. Ro/Ro ramp.

Berth T122:

Terminal Operator:	Weyerhaeuser Company† Fremont Forest Products‡
Cargoes Handled:	Lumber and lumber products.
Total Terminal Area:	22.2 acres (9 ha.)†
Length of Berth:	600 ft. (183 m.)
Wharf Height:	22.9 ft. (7.0 m.)
Apron Width:	40 ft. (12.2 m.)
Open Storage Area:	210,000 sq.ft. (1,951 sq.m.)‡
Design Depth of Water:	40 ft. (12.2 m.)
Transit Shed Area:	3 dry storage sheds total 15,000 sq. ft. (1,394 sq.m.)‡
Special Equipment/Facilities:	150 ft. notched wharf to accommodate barges and lumber handling equipment. Notch height – 12.7 ft. (3.9 m.) Weyerhaeuser storage located at Berths No. T115 – T116.

Berths F204, F205:

Terminal Operator:	Cooper/T. Smith.
Cargoes Handled:	Steel products, plywood and lumber.
Total Terminal Area:	19.7 acres (8 ha.)
Length of Berths:	1,265 ft. (386 m.)
Wharf Height:	18.5 ft. (5.6 m.)
Wharf Area:	130,000 sq.ft. (12,077 sq.m.)
Apron Width:	50 ft. – 150 ft. (15.2 m. – 45.7 m.)
Open Storage Area:	673,847 sq.ft. (62,600 sq.m.)
Loading Platform Area:	9,000 sq.ft. (836 sq.m.)
Design Depth of Water:	36 ft. (11 m.)
Transit Shed Area:	180,000 sq.ft. (16,722 sq.m.)
Special Equipment/Facilities:	Recyclable steel facility. Terminal services.

Berths F206, F207:

Terminal Operator:	Crescent Terminal, Inc. (SSA).
Cargoes Handled:	Steel products, plywood and lumber.
Total Terminal Area:	22 acres (8.9 ha.)
Length of Berths:	1,200 ft. (366 m.)
Wharf Height:	18.5 ft. (5.6 m.)
Wharf Area:	57,500 sq.ft. (5,341 sq.m.)
Apron Width:	48 ft. (14.6 m.)
Open Storage Area:	530,000 sq.ft. (49,237 sq.m.)
Loading Platform Area:	13,800 sq.ft. (1,288 sq.m.)
Design Depth of Water:	32 ft. (9.8 m.)
Transit Shed Area:	190,000 sq.ft. (17,651 sq.m.)
Special Equipment/Facilities:	Stevedoring equipment.

Berths D50, D52, D53, D54:

Terminal Operator:	Forest Terminals Corp.
Cargoes Handled:	Newsprint.
Total Terminal Area:	13.8 acres
Length of Berths:	4 wharfs, 2,220 ft. (677 m.)
Wharf Height:	10.2 ft. – 17.1 ft. (3.1 m. – 5.2 m.)
Wharf Area:	63,645 sq.ft. (5,912 sq.m.)
Apron Width:	30 ft. – 38 ft. (9.1 m. – 11.6 m.)
Open Storage Area:	6.9 acres lumber storage
Loading Platform Area:	9,750 sq.ft. (906 sq.m.)
Design Depth of Water:	36 ft. (11.0 m.)
Transit Shed Area:	494,800 sq.ft. (45,968 sq.m.)
Special Equipment/Facilities:	Specialised ships and barges designed for newsprint vacuum handling, loading and unloading. Vacuum lift truck on dock. Easy access to L.B. Frwy. Minimum time truck loading.

Berths B82, B83:

Terminal Operator:	Toyota Motor Sales, U.S.A.
Cargoes Handled:	Automobiles.
Total Terminal Area:	177 acres.
Length of Berths:	1,300 ft. (396 m.)
Wharf Height:	14.6 ft. (4.5 m.)
Wharf Area:	61,750 sq.ft. (5,737 sq.m.)
Apron Width:	95 ft. (30 m.)
Open Storage Area:	2,730,000 sq.ft. (253,617 sq.m.) 2,100,000 sq.ft. (195,090 sq.m.)
Design Depth of Water:	38 ft. (11.6 m.)
Special Equipment/Facilities:	Toyota Motor Sales, U.S.A. – off and processing buildings, body shop, car wash, truck bed installation building.

Berth T117 – T118:

Terminal Operator:	To be named.
Cargoes Handled:	Recyclable steel for export.
Total Terminal Area:	18.9 acres (7.6 ha.)
Length of Berth:	750 ft. (229 m.)
Wharf Height:	22 ft. (6.7 m.)
Apron Width:	65 ft. (19.8 m.)
Open Storage Area:	590,000 sq.ft. (54,813 sq.m.)
Loading Platform Area:	65 ft. (19.8 m.)
Design Depth of Water:	36 ft. (11 m.)
Transit Sheds:	None
Special Equipment:	None.

CONTAINER FACILITIES:

Berths F6, F8, F10:

Terminal Operator:	Long Beach Container Terminal
Total Terminal Area:	95 acres (38.4 ha.)
Length of Berths:	2,700 ft. (823 m.)
Wharf Height:	15 ft. (4.6 m.)
Crane Truck Gauge:	100 ft. (30.4 m.)
Clear Lift/Above Water:	105 ft. (32 m.)
Boom Outreach:	137 ft. (41.8 m.)
Backreach:	50 ft. (15.2 m.)
Open Storage Area:	3,216,000 sq.ft. (298,766 sq.m.)
Design Depth of Water:	50 ft. (15.2 m.)
Cargoes Handled:	General cargo in containers.
Special Equipment/Facilities:	Ground and chassis operation. 5 travelling container cranes of 40 long ton capacity; 45 tons wit spreader. 7 transtainers, 4 high stacking. 10,000 TEU ground capacity, incl. 340 reefer outlets 2,700 FEU chassis slots, 504 FE chassis stacked vertically.

Berths E24 – E26:

Terminal Operator:	California United Terminals.
Total Terminal Area:	75 acres (38.8 ha.)
Length of Berths:	1,950 ft. (594 m.)
Wharf Height:	11.3 ft. – 18.4 ft. (3.4 m. – 5.6 m
Crane Truck Gauge:	50 ft. (15.2 m.)
Clear Lift/Above Water:	98 ft. (29.9 m.)
Boom Outreach:	141 ft. (43 m.)
Backreach:	50 ft. (15.2 m.)
Open Storage Area:	2,520,000 sq.ft. (234,108 sq.m
Design Depth of Water:	41 ft. (12.5 m.)
Cargoes Handled:	General cargo in containers.
Special Equipment/Facilities:	2 Ro/Ro ramps, one stern ram 5×40 ton travelling container c transtainers, top handlers, side handlers. Container storage sp for 14,400 TEU ground capaci 2,500 FEU chassis slots, 360 outlets. 11-lane main gate and 6 scales. Rail spurs.

Berths G227, G228, G229, G230:

Terminal Operator:	Sea-Land Service, Inc.
Total Terminal Area:	95 acres (40.4 ha.)
Length of Berths:	2,550 ft. (778 m.)
Wharf Height:	15.6 ft. (4.8 m.)
Crane Truck Gauge:	100 ft. (30.4 m.)
Clear Lift/Above Water:	106 ft. (32.3 m.)
Boom Outreach:	115 ft. – 127 ft. (35 m. – 38.7
Backreach:	60 ft. (18.3 m.)
Open Storage Area:	5,317,200 sq.ft. (493,619 sq.
Design Depth of Water:	42 ft. – 44 ft. (12.8 m. – 13.4
Cargoes Handled:	General cargo in containers
Special Equipment/Facilities:	Ground and chassis operatio 6×30 ton travelling container cranes. Space for 10,230 TEU conta 2,550 grounded, 5,900 chass including 482 reefer chassis Container freight station sep from terminal with 71,150 sq (6,610 sq.m.). 4 transtainers

Berths J232, J233, J234:

Terminal Operator: International Transportation Services, Inc.
Total Terminal Area: 123 acres (49.8 ha.)
Length of Berths: 2,300 ft. (701 m.)
Wharf Height: 16 ft. (4.9 m.)
Crane Track Gauge: 50 ft. – 100 ft. (15.2 m. – 30.4 m.)
Clear Lift/Above Water: 92 ft. – 115 ft. (29.3 m. – 35.1 m.)
Boom Outreach: 115 ft. – 145 ft. (35 m. – 44.2 m.)
Backreach: 35 ft. – 45 ft. (10.7 m. – 13.7 m.)
Open Storage Area: 2,980,460 sq.ft. (276,885 sq.m.)
Design Depth of Water: 36 ft. – 42 ft. (11 m. – 12.8 m.)
Cargoes Handled: General cargo in containers.
Special Equipment/Facilities: Ground and chassis operation. 3×30 and 4×40 long ton container cranes. 7×40 long ton and 6×30 long ton capacity transtainers. Space for storing 12,800 TEU containers on ground, including 384 reefer outlets. 4,000 TEU chassis slots. Container Freight Station with 70,000 sq.ft. (6,505 sq.m.).

Berths J245 – J247:

Terminal Operator: Pacific Container Terminal.
Total Terminal Area: 110 acres (44.5 ha.)
Length of Berths: 3,300 ft. (1,006 m.)
Wharf Height: 15.9 ft. (4.8 m.)
Crane Track Gauge: 50 ft. (15.2 m.)
Clear Lift/Above Water: 91 ft. – 106 ft. (27.7 m. - 32.3 m.)
Boom Outreach: 115 ft. – 125 ft. (35 m. – 38 m.)
Backreach: 50 ft. (15.2 m.)
Open Storage Area: 2,500,000 sq.ft. (232,250 sq.m.)
Design Depth of Water: 36.4 ft. – 42 ft. (11 m. – 12.8 m.)
Cargoes Handled: General cargo in containers.
Special Equipment/Facilities: Grounded and chassis operation. 6 travelling container cranes with 40 ton capacity, 40 ton transtainers. Athwartship and overweight capabilities. Space for storing 12,000 TEU containers. Complete reefer container services and storage with 222 reefer outlets.

Berths J266 – J270:

Terminal Operator: Maersk Pacific, Ltd.
Total Terminal Area: 107 acres (43.3 ha.)
Length of Berths: 2,711 ft. (826 m.)
Wharf Height: 15 ft. (4.6 m.)
Crane Track Gauge: 50 ft. & 100 ft. (15.2 m. & 30.4 m.)
Clear Lift/Above Water: 106 ft. (32.3 m.)
Boom Outreach: 115 ft. – 125 ft. (35 m. – 38 m.)
Backreach: 50 ft. (15.2 m.)
Open Storage Area: 2,787,840 sq.ft. (259,005 sq.m.)
Design Depth of Water: 43 ft. (13.7 m.)
Cargoes Handled: General cargo in containers.
Special Equipment/Facilities: Grounded and chassis operation. 2×50 ton and 4×40 ton ship to shore cranes. 3×40 ton rubber tyred gantry cranes. 4,147 TEU wheeled slots for containers, 388 of which are dual voltage 220/440 V. On-dock double-stacked rail yard.

Berths C60 – C62:

Terminal Operator: Hanjin Shipping Company.
Total Terminal Area: 58.9 acres (23.8 ha.)
Length of Berths: 1,804 ft. (550 m.)
Wharf Height: 15.0 ft. (4.5 m.)
Crane Track Gauge: 100 ft. (30.4 m.)
Clear Lift/Above Water: 115 ft. (35 m.)
Boom Outreach: 155 ft. (47.2 m.)
Backreach: 50 ft. (15.2 m.)
Open Storage Area: 2,477,689 sq.ft. (231,560 sq.m.)
Design Depth of Water: 45 ft. (13.7 m.)
Cargo Handled: General cargo in containers.
Special Equipment/Facilities: 3×40 long ton container gantry cranes, 50 tons with cargo beam. 4,000 TEU grounded capacity. 1,384×40 ft. chassis slots, 2,014 TEU stacked and 200 spaces for reefer boxes. Additional 3.2 acres of off-dock container yard.

DRY BULK FACILITIES:

Berths D32, D33:

Terminal Operator: Pacific Coast Cement Corp.
Cargoes Handled: Bulk cement.
Total Terminal Area: 2 acres (0.8 ha.)
Length of Berths: 1,100 ft. (335 m.)
Wharf Height: 13.8 ft. (4.2 m.)
Open Storage Area: 87,525 sq.ft. (8,131 sq.m.)
Design Depth of Water: 36 ft. (11 m.)
Special Facilities/Equipment: Silo capacity 50,000 tons. Screw-type unloader capacity 600-800 t.p.h., unloads to conveyor system direct to silos. Highest elevation vertical screw 70 ft., lowest elevation vertical screw 38 ft. Max. reach 94 ft. from face of wharf (concrete), 91.5 ft. from pierhead line. Vertical clearance under boom at MHW 89 ft., under vertical screw at MHW 20 ft. Truck loading spouts.

Berth D46:

Terminal Operator: Domtar Gypsum.
Cargoes Handled: Gypsum.
Total Terminal Area: 10 acres (4 ha.)
Length of Berth: 640 ft. (195 m.)
Wharf Height: 17.2 ft. (5.2 m.)
Design Depth of Water: 40 ft. (12.2 m.)

Berth B82:

Terminal Operator: National Gypsum Co.
Cargoes Handled: Bulk gypsum.
Total Terminal Area: 19.9 acres (8 ha.)
Length of Berth: 650 ft. (198 m.)
Wharf Height: 14.6 ft. (4.5 m.)
Open Storage Area: 65,340 sq.ft. (6,076 sq.m.)
Design Depth of Water: 38 ft. (11.6 m.)
Special Facilities/Equipment: Adjustable, elevated receiving hopper served by an elevated electric belt conveyor system extending to a 40,000 ton capacity storage building. 800-900 t.p.h. capacity.

Berth F208:

Terminal Operator: MCC-Lucky Cement Co.
Cargoes Handled: Bulk cement.
Total Terminal Area: 4.2 acres (1.7 ha.)
Length of Berth: 520 ft. (158 m.)
Wharf Height: 18.9 ft. (5.8 m.)
Open Storage Area: None.
Design Depth of Water: 40 ft. (12.2 m.)
Special Facilities/Equipment: Kovako BV. Vacuum discharge system. Maximum outreach 45 m. Unloading capacity 800 t.p.h. Covered storage 50,000 sq.ft.; 58,000 ton capacity.

Berth F210:

Terminal Operator: Morton Salt
Cargoes Handled: Bulk salt.
Total Terminal Area: 5.1 acres (2.1 ha.)
Length of Berth: 1,100 ft. (335 m.)
Wharf Height: 19.0 ft. (5.8 m.)
Open Storage Area: 117,740 sq.ft. (10,938 sq.m.)
Design Depth of Water: 40 ft. (12.2 m.)
Special Facilities/Equipment: Movable inclined elevated electric belt conveyor system with receiving hopper extending from wharf to stock pile area. Packaging plant adjacent.

Berth 211:

Terminal Operator: Koch Carbon Co.
Cargoes Handled: Petroleum coke.
Total Terminal Area: 12.8 acres (5.2 ha.)
Length of Berth: 1,100 ft. (335 m.)
Wharf Height: 19.3 ft. (5.9 m.)
Open Storage Area: 291,000 sq.ft. (27,000 sq.m.)
Design Depth of Water: 40 ft. (12.2 m.)
Special Facilities/Equipment: Receipt, storage, blending and vessel loading of petroleum coke.

Berths G212, G213, G214, G215:

Terminal Operator: Metropolitan Stevedore Co.
Cargoes Handled: Bulk petroleum coke, coal, potash, borax, soda ash and prilled sulphur.
Total Terminal Area: 22.9 acres (9.3 ha.)
Length of Berths: 2,110 ft. (643 m.)
Wharf Height: 18.5 ft. – 18.8 ft. (5.6 m. – 5.7 m.)
Open Storage Area: 782,000 sq.ft. (6,691 sq.m.)
Design Depth of Water: 50 ft. (15.2 m.)
Special Facilities/Equipment: Two electric, travelling bulk shiploaders.

Loader No. 1:
Outreach: 56 ft. (17.7 m.)
Clear Height: 47.7 ft. (14.5 m.)
Travelling Distance: 1,800 ft. (548.6 m.)
Designed Capacity: 3,500 t.p.h.
Actual: 1,500-2,000 t.p.h.
Working hours: 16 hrs./day.

Loader No. 2:
Outreach: 79 ft. (24.1 m.)
Clear Height: 64 ft. (19.5 m.)
Travelling Distance: 700 ft. (213.4 m.)
Designed Capacity: 5,000 t.p.h.
Actual: 2,500-3,000 t.p.h.
Working hours: 16 hrs./day.

Rail Facilities: 100 car unit trains can be accommodated while waiting movement to dump sites. One rotary and 3 bottom-dump systems. Bulk materials are handled by 48 in. (1.2 m.) and 72 in. (1.9 m.) belt conveyor systems extended to shiploader through tunnel from storage facilities.

Storage Capacities: Covered storage: 575,000 tons. Silo storage (Prilled sulphur): 30,000 tons (2×15,000 ton silos).

TANKERS:

Berths D30, D31, D32:

Terminal Operator:	Baker Commodities Inc.
Cargoes Handled:	Tallow, vegetable oils (coconut oil, palm oil, cotton seed oil).
Total Terminal Area:	1.2 acres (0.5 ha.)
Length of Berths:	1,480 ft. (451 m.)
Wharf Height:	19.5 ft. (5.9 m.)
Design Depth of Water:	43 ft. (13 m.)
Special Facilities/Equipment:	2×6 in. pipelines from Wharf D-30 to storage tanks. Storage capacity 6.7 million gallons. Also 3×10 in. pipelines from Berth D-32 to storage tanks.

Berths C73, C74:

Terminal Operator:	Powerline Oil Company.
Cargoes Handled:	Crude oil and fuel oil.
Total Terminal Area:	2.8 acres (1.2 ha.)
Length of Berths:	830 ft. (253 m.)
Wharf Height:	11.7 ft. (3.6 m.)
Design Depth of Water:	37 ft. (11.3 m.)
Special Facilities/Equipment:	Storage capacity: 570,000 bbls.

Berths B76 – B80:

Terminal Operator:	ARCO Terminal Services.
Cargoes Handled:	Petroleum products: Gasoline, blending stocks, MTBE, diesel, naphtha jet fuel, nonenes tetramers, fuel oils, carbon black, crude oil.
Total Terminal Area:	19.9 acres (8.1 ha.)
Length of Berths:	2,192 ft. (668 m.)
Wharf Height:	14.4 ft. (4.4 m.)
Design Depth of Water:	46 ft. (14 m.)
Special Facilities/Equipment:	Capacity for storage: 1,800,000 bbls. Terminal has several pipeline connections to other companies. Loading arms on dock are 8 in. Chicksan and are capable of loading rates of 10,000 – 15,000 bbls./hr. Three vessels can be loaded or discharged simultaneously.

Berths B82, B83:	Petro-Diamond.
Terminal Operator:	Gasoline, gasoline blend stocks,
Cargoes Handled:	diesel, toluene, MTBE and lube oil.
Total Terminal Area:	5.7 acres (2.3 ha.)
Length of Berths:	1,060 ft. (323 m.)
Wharf Height:	14.4 ft. (4.4 m.)
Design Depth of Water:	38 ft. (11.6 m.)
Special Facilities/Equipment:	Terminal has pipeline connections which allow petroleum products to be shipped to most L.A. Basin Refiners and common carrier pipelines. 1×8 in. dock hose connecting into one of 2×500 ft., 12 in. dock lines capable of receiving up to 7,500 bbls./hr. Truck rack at the Terminal is capable of loading 100 trucks per 24 hour period. Permits are available for DSP and bonded storage. Capacity for petroleum products: 410,000 bbls.

Berths B84, B85, B86, B87:

Terminal Operator:	Texaco Refining and Marketing.
Cargoes Handled:	Crude oil, petroleum products, bunker fuel.
Total Terminal Area:	10.7 acres (4.3 ha.)
Length of Berths:	1,980 ft. (604 m.)
Wharf Height:	16.8 ft. (5.1 m.)
Design Depth of Water:	52 ft. (15.8 m.)
Special Facilities/Equipment:	Discharge capacity 32,000 bbls./hr.; 24 in. pipeline to storage and tank farm. Storage capacity: 245,000 bbls.

Berth S101:

Terminal Operator:	Dow Chemical Co.
Cargoes Handled:	Miscellaneous bulk liquid chemicals.
Total Terminal Area:	10 acres (4 ha.)
Length of Berth:	700 ft. (213.4 m.)
Wharf Height:	15.5 ft. (4.7 m.)
Design Depth of Water:	36 ft. (11 m.)
Special Facilities/Equipment:	Dedicated pump and piping systems to transfer products to and from ships, barges, railcars and tank trucks. Storage capacity: 15 million gallons.

Berth T121:

Terminal Operator:	ARCO Western Pipeline.
Cargoes Handled:	Crude oil and petroleum produc
Total Terminal Area:	11.7 acres (4.7 ha.)
Length of Berth:	1,250 ft. (381 m.)
Wharf Height:	20 ft. (6.1 m.)
Design Depth of Water:	76 ft. (22.4 m.)
Special Facilities/Equipment:	4×16 in. diameter articulated cru unloading arms and 1×8 in. diameter articulated bunker/dies loading arm; 275 p.s.i. max. wor pressure; designed to accommo tankers from 50,000 to 265,000 d.w.t. tankers; arms are FMC Chicksan with hydraulic coupling Storage tanks available at ARCO facilities in Carson and the inner harbour via 42 in. and 24 in. pipelines.

Berths G211A:

Terminal Operator:	Chemoil Terminal.
Cargoes Handled:	Petroleum products and bunker
Total Terminal Area:	6.2 acres (2.5 ha.)
Length of Berth:	1,630 ft. (496 m.)
Wharf Height:	19.1 ft. (5.8 m.)
Design Depth of Water:	40 ft. (12.2 m.)
Special Facilities/Equipment:	Storage capacity: 425,000 bbls. Pipeline system to handle ships, barges, trucks and railcars to Pie F, J, G, E and D. Pipeline connection to Carson Tank Farm which supplies petroleum produc to most L.A. Basin refiners and terminals.

Berth J242:	Westway Trading Corp.
Terminal Operator:	Miscellaneous bulk liquid chemic
Cargoes Handled:	Vegetable oils and tallow.
	4.5 acres (2.2 ha.)
Total Terminal Area:	700 ft. (213.4 m.)
Length of Berth:	15.0 ft. (4.6 m.)
Wharf Height:	36 ft. (11.0 m.)
Design Depth of Water:	Pumping and pipeline system
Special Facilities/Equipment:	designed to handle product from barges, ships rail cars and truck Heavy duty pumps to handle a variety of bulk liquids. Storage capacity: 5.2 million gallons.

The following is part of a letter sent by the Captain of the Port to a operator:

The safety of the port and the VLCC tankers using the harbo bunkering and provisioning is of paramount concern to the Coast G Consequently the following guidelines have been established for al vessels 200,000 d.w.t. and larger when utilising the Outer Harbour (i of the breakwater) of the ports of Los Angeles/Long Beach:

(a) Vessels may enter or depart the harbour areas insid breakwater only during daylight if over 56 ft. draft.
(b) Minimum visibility of 1 mile is established for vessel move
(c) Adequate tugboat assistance shall be provided when pa through the breakwater entrances upon entering or departur when navigating inside the breakwater to and from ancho
(d) A qualified Pilot must be onboard when entering or depart harbour. One way traffic is to be maintained during the V transit through the breakwater entrance.
(e) Vessel must have a 10% draft clearance under the keel crossing either the Los Angeles or Long Beach entrance.
(f) No "dead ship" status will be permitted without prior appr the Captain of the Port.
(g) No vessel with a beam in excess of 200 ft. shall enter harbour without the permission of the Captain of the Port.

CRANES: Barge cranes available capacity 45 tons – 275 tons. Navy floating crane capacity 385 tons available for hire.

BRIDGES: No restrictions into Port of Long Beach. The Gerald De Bridge over Back Channel has vertical clearance of 155 ft. (Channel which connects Long Beach through Back Channel to Los Angeles has 2 bridges which must be opened for passage of v *Signal for Opening:* 3 long blasts on horn or whistle. During in weather, call through a megaphone or make a loud and distinct on a bell.

MEDICAL: Advance notice preferable. Adequate hospital and facilities available for providing necessary or emergency car information available, Public Health Department may, if required certain information prior to granting Free Pratique for inoc Vaccination/Fever Certificates.

DENSITY: Local water density 1.025 grams per millilitre or water at all stages of tide.

FRESH WATER: Potable fresh water available all Municipa through 2 in. lines. Rental charge for use of each 50 ft. length wa when furnished.

FUEL: All grades (viscosities) of bunker fuels available in any through pipelines at most Municipal berths, and by barge at a at berths if desired. Notify quantity and type desired to local S Company or Agent.

FIRE PRECAUTIONS: 2 fire boats and 1 fire station; in addition City fire service available.

Special fire precautions required at all berths handling petroleum products or dangerous cargoes. In addition to all applicable provisions of Long Beach Municipal Code, flammable and combustible liquids and flammable gases shall be handled and stored at Marine Petroleum Terminals in accordance with minimum fire safety requirements promulgated by Chief, Department of Fire, City of Long Beach.

REPAIRS: Within greater port area facilities to accomplish all types of deck and engine repairs.

DRY DOCKS: Within greater port area one large private commercial dockyard, National Steel with large floating dry docks and repair facilities. Also, 3 large capacity graving docks located at Naval Shipyard available for emergency use by merchant vessels when not occupied by naval vessels.

SURVEYORS:

1. Lloyd's Register (local office), 1328 N. Avalon Blvd., Wilmington, CA 90744, (P.O.Box 575) 90748. Tel: (310) 834 2334.

American Bureau of Shipping, 200 Pine Ave., Suite 503, Long Beach, CA 90802. Tel: (310) 437-6488. Fax: (310) 491-1840.

2. Pacific Cargo Inspection Bureau, Pier A, Berth 4, Long Beach, CA 90802. Tel: 435-7861.

Jacobsen and Associates, Inc., 1324 N. Avalon Blvd., P.O.Box 248, Wilmington, CA 90748. Tel: 834-4553. Fax: 834-3586.

GANGWAY/DECK WATCHMEN: Normally used, but only compulsory when detainees aboard.

OPENING/CLOSING HATCHES: Crew can open or close hatches at sea or at anchor. If closed or opened at dockside, the use of longshoremen compulsory.

CUSTOMS ALLOWANCES: Tobacco, each crew member entitled to 300 cigarettes, 50 cigars and 3 lb. of tobacco or combination of above. If the stay in port is such that additional tobacco is required, Customs will so issue. Wine and/or Spirit, not to exceed 1 quart of alcoholic beverage each adult non-resident. This exemption for alcoholic beverages may be applied to more than one kind but not to an aggregate volume of more than 1 quart for each adult crew member.

Note: Upon arrival of vessel from foreign port, or vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use or consumption on board while vessel in port, and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action.

CARGO GEAR: Employer shall not use ship's cargo handling gear until he has ascertained that vessel has a current and valid Cargo Gear Register and Certificate indicating that cargo gear has been tested, examined and annealed in accordance with requirements of International Labour Organization Convention No. 32.

REPATRIATION: Through U.S. Department of Justice, Immigration and Naturalisation Service, and clearance of personal effects by U.S. Customs.

AIRPORT: Los Angeles International Airport approximately 18 miles from port, and provides regular scheduled and international airline service.

TIME: GMT minus 8 hours. United States observes Daylight Saving Time, from first Sunday in April till last Sunday in October.

POLICE/AMBULANCE/FIRE: Port of Long Beach – Police 435-6711 (routine), 911 (emergency); Fire Department and Paramedics 911; Harbour Security Officers 590-4195.

In an emergency dial 911.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard, Captain of the Port, 165 N. Pico Ave., Long Beach, CA 90802. Tel: (310) 980-4444. Fax: (310) 980-4413.

HOLIDAYS: The subject Legal holidays are defined as follows: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (3rd Monday February); Memorial Day (Last Monday May); Independence Day (4th July); Labour Day (1st Monday September); Admission Day (9th September); Columbus Day (2nd Monday October); Veterans' Day (11th November); Thanksgiving Day (4th Thursday November); Christmas Day (25th December).

Notes: (1) Also, every Statewide Election is a holiday.
(2) Also, any other legal holiday that may be proclaimed by State or National authority is a holiday.
(3) When one of the above days falls on Sunday, the following Monday shall be observed as a holiday.

TELEPHONE: Installation of telephone aboard ship at Municipal berths.

SERVICES: All services from tank cleaning to compass and instrument repair available at various locations within greater port area.

STORING: See "Prelims".

1. Vessel can be stored by barge or truck by prior arrangement.
2. No restriction on storing from barge while vessel is discharging or loading except when the vessel is handling hazardous cargo, petroleum products or bunkering.
3. Truck can proceed alongside the berth for the purpose of delivering or receiving stores and chandlery supplies.
4. Forklift trucks may be used on the berth to handle stores with approval of the stevedoring company.
5. Customs Regulation regarding storing: Stores *not in bond* may be taken on board the vessel on an export declaration certified by the Customs' Inspector on duty. Stores *in bond* must be signed off by the bonded warehouse on a vessel supply export document and received on board the vessel by the Customs' Inspector on duty.
6. Riggers employed to assist with storing, stevedores or longshoremen assist with the stores on the wharf but the storing on board vessel is done by the ship's crew.

SHIP SUPPLY SERVICE: See "Los Angeles".

SHORE LEAVE: Crewmen allowed shore leave providing necessary application presented to U.S. Immigration Officer is approved and crewmen's Landing Permit issued (Form 5129). Customs declaration required for articles to be landed by crew members (1 quart of alcoholic beverage with seal broken is allowed).

IDENTIFICATION CARDS: U.S. Department of Justice, Immigration and Naturalization Service Form I-95-A (Form I-94 for passengers) must be completed.

GARBAGE DISPOSAL: Not available. See "Agriculture" before first U.S.A. port (Albany).

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: International Seafarer's Centre, 120 So. Pico Avenue, Long Beach, CA 90802-6247. Tel: (310) 432-7560. Facilities include telephone, postage, shop, pool tables and basketball.

CURRENCY: U.S.Dollar (U.S.$).

DELAYS: Arrival at berths are normally on time as scheduled. However, there are times of inclement weather or lack of cargo at a berth which create a short delay. Shortage of longshoremen can also cause a delay in discharging or loading cargo. No delay experienced in bunkering.

GENERAL: For information regarding various social organisations, call 436-9041. Long Beach Recreation Department, for information.

AUTHORITY: Board of Harbor Commissioners, Port of Long Beach, P.O.Box 570, (925 Harbor Plaza), Long Beach, California 90801-0570. *Tel:* (310) 437-0041, (310) 775-3469 (Los Angeles). *Telex:* 656452. *FAX:* (310) 437-3231. *Cables:* Portobeach. *Contact:* Steven R. Dillenbeck, Executive Director. Don Wylie, Director of Trade and Maritime Services. Hal Hilliard, Marketing Manager.

LONGVIEW, Washington: 46.10 N. 122.55 W.

(See Plan)

DOCUMENTS:

3 Complete Cargo Manifests.
3 Stores Lists.
3 Possessions Lists.
3 Crew Lists on Immigration forms.
Vessel's Documents.
Tonnage Tax Statement.
Quarantine Form completed.

At first port of arrival, ship is boarded and inspected by Customs, Immigration, Public Health and Agriculture officials. At each subsequent port only Customs Agent will board prior to docking.

PILOTAGE: See "General – Pilotage" before first U.S.A. port.

ANCHORAGE: Safe anchorages indicated by Columbia River Pilots.

RESTRICTIONS: None in regard to arrival time or state of tide. Channel depth 40 ft. at mean low water and tidal range varies between 2.5 ft. and 4 ft.

MAX. SIZE: No limitation on length or breadth. Depth alongside 40 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Columbia River Pilots have knowledge of tug positions and other knowledge pertaining to tugs aiding a vessel.

BERTHING: 7 berthing facilities are available at Port Longview, starting adjacent to the Lewis & Clark Bridge and extending upstream for a distance of nearly a mile.

Berths 1 through 4 are located on one continuous wharf 2,155 ft. long. Berths 1, 2 and 3 are equipped to handle general cargo, pelletised feed grains, bulk ores and chemicals. One gantry crane serves Berths 1 and 2 and a 600-ton capacity heavy lift is located at Berth 3. A paved 2.8 acre assembly area fronting Berth 2 is suitable for handling lumber or multi-commodity project shipments. 3 transit sheds and 1 gear locker are located near the three berths.

Berth 4 is used for receiving and shipping grain and is served by a 5 million bushel grain elevator operated by the Port.

Berth 5 is a 515 ft. wharf and is an exporting facility for the shipment of bulk chemicals. It is also available for the loading of logs using ship's gear from the water side of the vessel, and handling barges.

Berths 6 and 7 form a continuous wharf 1,500 ft. long. The ship-side container crane is located at Berth 7. An open cargo handling area of 54 acres is located adjacent to the 2 berths. On the dock is one large transit shed (100,666 sq.ft.). 3 rail tracks are located along the length of the apron. There is a rail spur on the inland side of the transit shed.

Port Longview operates its own facilities and performs all terminal services between ship's tackle and consignees or inland carriers.

In addition to these facilities operated by the Port, there are 9 other berths operated privately in the Longview Port District. Weyerhaeuser Company owns 6 berths and Reynolds Metals Company, International Paper Company and Longview Fibre Company each operate 1 berth apiece. 6 of the 9 berths are used primarily for export while the other 3 are used mainly for receiving raw materials used by the mills.

BULK HANDLING FACILITIES:

Containers: Port Longview's container facility centres around a 30 long ton, electrically operated, rail mounted crane.

The crane has a rated lifting capacity of 30 long tons below the spreader and 37 long tons below the cargo beam. The telescopic spreader can be adjusted to handle 20 ft., 27 ft., 35 ft. and 40 ft. containers. It is designed to handle 20 load/discharge containers per hour.

The boom can be raised and lowered to provide clearance of ship superstructure and is designed for through-leg rapid load-handling.

With an outreach of 124 ft. from the waterside rail and a vertical reach of 110 ft., the crane can service Panamax size vessels.

Utilising a unique "trailer-train" system, a continuous flow of containers can be maintained between storage and staging areas to sustain loading/unloading operations.

A 40-acre area located behind Berth 6 – 7 is for use as a container storage yard.

Containers received from the vessel can be immediately inspected and rerouted either to warehouses for devanning or to rail or truck for ongoing movement. Export containers are staged to the vessel in loading sequence in the adjacent cargo assembly area.

Grain: The Port operates the 5,165,000 bushel capacity grain elevator at the Port of Longview Terminal.

Pellets/Soda Ash/Coke/Fertiliser: Port Longview has three dry bulk shipping facilities. Sugar beet pulp pellets are loaded at Berth No. 1 through a 600 t.p.h. loader.

At Berth 2, a new state-of-the-art loader went into operation in the Summer of 1990 to handle bulk chemicals and minerals at 1,800 t.p.h.

Atlantic Richfield Co. uses a calcined coke storage/loading facility at Berth No. 5 that loads at 900 t.p.h.

Two portable hoppers with belt conveyors are available to handle inbound free flowing dry bulks unloaded by ship's gear or dock Whirley cranes equipped with clams.

Roll-on/Roll-off: A 240 ft. extension to the upstream end of Berth 7 to accommodate Ro/Ro vessels is available at the Port of Longview. 96 ft. of the extension is constructed at a level 8 ft. lower than the remainder of the dock and serves as the loading/unloading area to accommodate a Ro/Ro vessel's stern ramp.

BRIDGES: One bridge crossing Columbia River at Longview has sufficient clearance so as not to present a problem. Clearance 169 ft. – 185 ft. depending on season.

CRANES: 1 electric-powered gantry crane serves Berths 1 and 2 on 550 ft. of track. It is equipped with a 130 ft. boom and has a capacity of 60 tons at a 45 ft. radius.

The 'Columbia Giant', a 600-ton capacity shore-based crane loc at the port, is one of the largest capacity lifting facilities on the Coast. The twin booms of the derrick reach 130 ft. above the dock have a tested lifting capacity of 660 tons. The blocks can be ho separately or in tandem. The lifting system is certified by Federal State agencies and has passed safety requirements for heavy lift AEC controlled projects. The 'Columbia Giant' is available for single ranging from 65 short tons up to its rated capacity of 600 short to

Also see "Berthing" – Berths No. 6 and 7.

STEVEDORES: At least 24 hours notice necessary to arrange ga before ETA. Arrange through Port Office via Ship's Agent.

MEDICAL: Hospital facilities available.

TANKERS: No facilities.

DENSITY: Columbia River is fresh water at Longview.

FRESH WATER: Available through 8 in. line with 2.5 in. connect Rate of delivery approx. 14.5 t.p.h.

FUEL: Available by tanker trucks only.

CONSULS: At Portland, Oregon.

REPAIRS: Some deck and minor engine repairs are possib Longview.

GANGWAY/DECK WATCHMEN: Arrangements for security guards be made.

OPENING/CLOSING HATCHES: Work carried out normally stevedores.

CUSTOMS ALLOWANCES: See "Portland, Oregon".

REPATRIATION: No facilities for effecting crew changes repatriations.

AIRPORT: Nearest airport served by regular airlines is in Port Charter flights may be arranged from a small local airport.

TIME: GMT minus 8 hours. In addition, clocks are moved ahead 1 on the first Sunday in April and returned back 1 hour on the last Su in October, at 0200 hrs. local time on those 2 days.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King Birthday (3rd Monday in January); President's Day (3rd Mond February); Memorial Day (last Monday in May); Independence Day 4th); Special Longshore Holiday (July 5th); Labour Day (first Mond September); Veteran's Day (November 11th); Thanksgiving Day Thursday in November); Christmas Day (December 25th). Cargo can be arranged on most of these holidays.

POLICE/FIRE/AMBULANCE: Police 911; Fire 911; Ambulance

TELEPHONES: Available at dockside.

BANKS: Security Pacific Bank and Seattle First National Bank.

STORING: See "Prelims".

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. —
6. Yes.

SHIP SUPPLY SERVICE: The only firm currently engaged in the of personnel from ship to shore in the Columbia River in the Longview area is Brix Maritime Co. Their address is: Brix Maritime 611 East "A" Street, Rainier, Oregon 97048, U.S.A. Tel: (206) 577-

SHORE LEAVE: Crews allowed ashore if papers are in order.

IDENTIFICATION CARDS: Advisable but not necessary.

GARBAGE DISPOSAL: Collection receptacles can be placed on alongside ship by a private firm, Waste Control Ltd. Tel: 425- Charges will be quoted by the firm.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: Seaman's Information Service, 455 Orego (about 1 km. from the dock). Tel: 636-0450.

AUTHORITY: Port Longview, P.O.Box 1258, 10 Port Way, Long Washington 98632. *Tel:* (206) 425-3305. *FAX:* (206) 425-
Contact: Ken O'Hollaren, Executive Director.

LOOP Personnel involved in Tanker Discharge:

(1) Port Superintendent: Resident at Marine Terminal who has overall authority over the Marine Terminal and port.

(2) Vessel Traffic Controller: Resident at marine terminal. Responsible for traffic control at the port.

(3) Mooring Master/Assistant Mooring Master: Assists the Master in mooring and unmooring the vessel. Remains on board to coordinate the discharge.

(4) Deck Watch: Maintains a watch of tanker's manifold and bow while vessel is moored.

(5) Oil Movement Controller: Resident of Galliano Operations Centre. Supervisor of cargo discharge. In constant radio contact with the Mooring Master.

Time Zone: Local-Central Standard Time (CST). Greenwich Mean Time (GMT) minus 6 hours or Zone plus 6.

Note: From the first Sunday in April to the last Sunday in October, this is modified by use of Daylight Saving Time to minus 5 hours GMT or Zone plus 5.

Official Language: English.

U.S. Coast Guard: Telex: 701801 (USCG NLN-UD).

The LOOP Inc. deepwater port and associated facilities are designed for unloading crude oil cargoes from deep draft tankers. The marine terminal is located in open waters of the Gulf of Mexico approximately 29 km. (18 statute miles) offshore from the State of Louisiana.

The port is owned and operated by LOOP Inc. under licenses granted by the Government of the United States of America and the State of Louisiana. The port is governed by the laws of the United States in the same manner as if the port were an area of exclusive federal jurisdiction located within a state.

LOOP shall not permit a tanker registered in a foreign state or flying the flag of a foreign state to utilise its facilities unless the foreign state involved does not object to the jurisdiction of the United States over the tanker and its personnel while the tanker is located within the safety zone of the port, and unless the tanker owner or operator has designated an agent in the United States for receipt of service of process in the event of any claim or legal proceeding resulting from activities of the tanker or its personnel while located within the port safety zone, and unless the tanker owner or operator carries insurance or demonstrates financial responsibility as required by Title 33, United States Code Annotated, Section 1517 and any amendment.

At the time of nomination of a tanker, LOOP shall require the person nominating the tanker, or his authorised agent nominating the tanker, to provide LOOP with the name and address of the tanker's designated agent in the United States.

The United States Coast Guard's Marine Safety Office, whose office is in Morgan City, La., has governmental authority over LOOP.

LOOP's Port Superintendent has overall authority over the marine terminal and port. This encompasses all personnel at the port, including contract personnel, and all vessel and aircraft operations at the port. During emergency conditions, all response activities at the port are directed by the Port Superintendent. This includes the shutdown of tanker cargo discharge. Emergency conditions are those that, in the Port Superintendent's judgment, involve or could involve safety, environmental protection, personnel injury or property damage. Examples of these emergencies include, but are not limited to, the following, if they occur at the marine terminal, or on a tanker, or other vessel or aircraft, or at any other location anywhere in that portion of the deepwater port that lies within the safety zone:

(a) Oil spill.
(b) Fire or explosion.
(c) Tanker collision, actual or potential, with another vessel or with the pumping platform complex.
(d) Tanker grounding.
(e) Electrical power failure on the platform.
(f) Disruption of communications between shore and the port.
(g) Aircraft disaster.
(h) Serious illness, injury or death.
(i) Presence of poisonous gas.
(j) Evacuation operation of the platform (usually due to impending hurricane).

The Port Superintendent is present at the port at all times.

VHF – Very High Frequency

PLATFORMS: *Pumping Platform Complex:*

The Marine Terminal pumping platform complex consists of the pumping platform and the control platform. The two platforms are connected by a walkway bridge between the lower decks. The top of the lower deck of each platform is 21.3 m. (70 ft.) above MHW.

The pumping platform measures 61 m.×65.5 m. (200 ft.×215 ft.) and contains equipment for receiving, measuring, sampling, controlling and pumping oil to assist in cargo unloading.

The control platform contains a control room manned 24 hours a day for communications, traffic control, monitoring and surveillance purposes. Also, a supervisory control and monitoring system provides the capability for the control room personnel, when so directed, to assume control of all marine terminal processes otherwise normally initiated from the Operations Centre located near Galliano, Louisiana.

The control platform is a two-deck structure measuring approximately 21.3 m.×21.3 m. (70 ft.×70 ft.). The lower deck contains platform utility equipment and supporting facilities. The upper deck supports a two-level control building.

DOCUMENTS: See "New Orleans".

PILOTAGE: *Boarding Considerations:* Actual sea conditions for small craft are not always appreciated when viewed from the bridge of a large vessel. Boarding of personnel is a potentially hazardous operation requiring complete cooperation. Although specific rules for this transfer cannot be made, the following points should be used as a guide:

(a) Agree when and how the transfer of personnel will take place.
(b) Allow sufficient time and sea room.
(c) Tanker should always advise delivering vessel of any change in heading.

Pilot and Accommodation Ladders: Size, draft and manoeuvring requirements of vessels calling at LOOP may not always allow the ship to create a lee side for boarding by alteration of heading alone. Therefore, *LOOP requires that all tankers using the Port be equipped with accommodation ladders on the port and starboard sides, leading aft.* The requirements are as follows:

(a) All pilot and accommodation ladders must be clean, in good condition, and comply with all existing IMO/SOLAS requirements.
(b) The rigging of pilot and accommodation ladders and the embarkation and disembarkation of personnel shall be supervised by a responsible deck officer of the ship.
(c) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(d) If the freeboard exceeds 10 m. at any time, an accommodation ladder shall be rigged in conjunction with the pilot ladder.
(e) *All vessels shall have an accommodation ladder on the port and starboard side.*
(f) The lower end of the accommodation ladder must rest firmly against the side of the ship within the parallel body midlength and as far as practical within the midship half section.
(g) The accommodation ladder must lead aft.
(h) Adequate lighting shall be provided so that the pilot and accommodation ladders and the position where personnel board the ship will be properly illuminated.

Also see "Tanker Arrival".

MAX. SIZE: See "Berthing".

TANKER ARRIVAL: *Arriving from Seaward:* Tankers will normally approach LOOP via the 63 mile Safety Fairway. Communications with LOOP shall be established when the tanker is 20 miles from the entrance of the Safety Zone on the International Calling Frequency 156.800 MHz (Channel 16). The Vessel Traffic Controller will assign a working frequency, usually 156.725 MHz (Channel 74) and will pass instructions to the vessel. The arrival time for a tanker is recorded as the time and date the inbound tanker enters the Safety Zone, either enroute to LOOP's anchorage or to moor or anchor outside of the Safety Zone in the vicinity of the port. Tankers must enter and depart the port via the Safety Zone between Buoys 1 and 2.

1. *Berthing Order:* When a buoy becomes available, the tanker with the earliest Firm Arrival Window will be berthed, provided that tanker has issued its Notice of Readiness to Discharge. LOOP may adjust a tanker's position in the queue, a maximum of one position, when such adjustment is necessary for optimum operations of the LOOP system.

2. *Navigational Assistance:* During the mooring operation, including transit of the approach and terminal sections, the Mooring Master and the Assistant Mooring Master perform the following functions:
   (a) The Mooring Master advises the tanker's Master on operational and ship control matters and regulations that are peculiar to the port, such as navigational aids, depth of water and current characteristic of the manoeuvring area during existing conditions, mooring equipment and procedures, emergency towing procedures, and the port's vessel control procedures. The Mooring Master will maintain communications with the Vessel Traffic Controller, mooring launches and the Assistant Mooring Master until the mooring operation has been completed.
   (b) The Assistant Mooring Master is stationed on the forecastle of the tanker during mooring operations to assist the Mooring Master by reporting position approach data relative to the SPM and to advise the tanker's personnel in the handling of mooring equipment peculiar to the port.
3. *Transiting the Approach, Terminal and Anchorage Sections:* The Master of the tanker, a licensed deck watch officer, and a competent helmsman must be on the bridge, and machinery spaces must be manned by a licensed engineer, at all times while the tanker is manoeuvring in the approach and anchorage sections or transiting the terminal section of the Safety Zone and approaching a SPM to moor. A competent deck officer is to be on the bow along with one seaman as lookout, who is capable on command of letting go the anchor, if necessary.
4. *Manoeuvring Capabilities:* LOOP SPM buoys are located on a radius of 2,438 m. (8,000 ft.) from the Marine Terminal pumping platform complex with spacing between buoys of 1,981.2 m. (6,500 ft.). Tanker must have the capability to perform the manoeuvring required to approach and depart from a SPM within an area not greater than 1,524 m. (5,000 ft.) radius from the buoy. LOOP may require evidence of a tanker's capability to approach and enter the Safety Zone. The Mooring Master may determine this by pre-berthing checks of a tanker's manoeuvring characteristics. It is recommended that vessels endeavour to arrive on an even-keel whenever possible.
5. *Securing Anchor: Prior to approach and while at the SPM, anchors are to be positively secured with locking pawls and/or securing wires/turnbuckles. No work on windlass or anchoring gear which requires releasing the brake or removal of securing gear/pawls is allowed while at the SPM.*

Tankers Proceeding Directly to a Mooring:
(a) The Mooring Master, Assistant Mooring Master, deck watch and oil inspectors will board the tanker, and the port furnished equipment is picked up by the tanker prior to entering the Safety Zone. The boarding area is usually at the North end of the Safety Fairway where it turns and joins the approach section at the Safety Zone. The entrance to the Safety Zone is marked at the lateral boundaries by Buoys No. 1 and 2. (Note: Also see "General" – "Helicopter Transfer of Personnel and Supplies" – Section (B) for times when Mooring Master boarding is done by helicopter).
(b) Weather permitting, a pilot ladder shall be rigged port and starboard 5.0 m. above the water. An accommodation ladder in conjunction with a pilot ladder shall be rigged prior to arrival if the freeboard exceeds 10 m. and prior to completion of discharge if the sailing freeboard exceeds 10 m. The tanker will be advised of what side the mooring and connecting equipment will be handled, so that the appropriate derrick can be topped and rigged in preparation for lifting the equipment aboard and for handling the hoses after mooring. The derrick block should be plumbed midway between the rail and the manifold at the manifold centreline. Tankers are asked to provide a lee in order to allow for a safer boarding and an easier equipment handling operations. *The tanker must have operative and ready for immediate use, bow and stern emergency towing equipment, as recommended by IMO.*
(c) Equipment brought aboard the tanker for use in the mooring arrangement shall be transported to the bow by ship's personnel and returned to the manifold in the way of the derrick at completion of port operations. Ship's personnel, supervised by a deck officer and advised by the Assistant Mooring Master, shall prepare and arrange the tanker's mooring equipment to the satisfaction of the Assistant Mooring Master and the tanker's Master.
(d) After the Mooring Master is aboard, the tanker may proceed under his guidance into the Safety Zone to the assigned berth for mooring. The shipper and tanker owner shall be responsible and liable to LOOP for any damage or injury done by his tanker to any LOOP facility, equipment or personnel. Services of the Mooring Master, Assistant Mooring Master, deck watch, mooring launches and their crews, and such other LOOP personnel as may be required aboard the tanker are provided with the express understanding that the Master of the tanker has and accepts the ultimate responsibility for the tanker and crew. If it becomes necessary for the Master of a tanker to disregard a Mooring Master's advice in order to ensure the safety of his ship, it is requested that a written report from the Master be submitted promptly to LOOP.
(e) Specific tanker speed will be recommended by the Mooring Master to the vessel, consistent with the International Rules for Navigation, Rule 6 – Safe Speed.

Tankers Proceeding Directly to LOOP's Anchorage (in Safety Zon
(a) Tankers proceeding directly to LOOP's anchorage may pro into the Safety Zone without a Mooring Master on board w the following conditions are met:
   (1) The tanker is proceeding directly to the designated ancho section.
   (2) Entry is via the designated Safety Fairway through B No. 1 and 2.
   (3) Clearance is obtained from the Vessel Traffic Controlle
   (4) No other tankers are underway in that portion of the S Zone that is South and East of Buoys No. 3 and 4.
   (5) No more than 4 tankers are anchored in the desig anchorage.
(b) Specific tanker speeds are to be consistent with the Internat Rules for Navigation, Rule 6 – Safety Speed.
(c) The shipper and tanker owner shall be responsible and liab LOOP for any damage or injury done by his tanker to any L facility, equipment or personnel.

Anchoring at LOOP: LOOP has a designated 2.0 nautical mile 4.0 nautical miles anchorage area inside the Safety Zone to provid safety and continuity of operations. All vessels are expected to u this anchorage unless such vessels are proceeding directly to moor arrival. While the tanker is at anchor in the anchorage section o safety zone, a competent deck officer shall be stationed at all time the bridge to watch for any dragging of the anchor which can be dete by taking radar ranges or rounds of bearings as necessary on pumping platform or on any other fixed objects and to mo Channel 16 (156.800 MHz.) and Channel 74 (156.725 MHz.). Ves *at anchor must maintain engines and propulsion machinery in read to clear the marine terminal area under full power on short notice repairs are permitted which would interfere with this requirement anchorage is in the open sea and is not in a harbour. A 10 minu less ready stand-by requirement for engines and anchors will be inv in the event of rough weather. The Port Superintendent will invok rough weather advisory.*

Tankers Proceeding to Mooring from Anchor (in Safety Zone):
(a) The Vessel Traffic Controller advises the tanker of the arriva of the Mooring Master, Assistant Mooring Master, deck watc oil inspectors, and of the equipment to be made ready. (Note: See "General" – "Helicopter Transfer of Personne Supplies" – Section (B) for times when Mooring Master boa is done by helicopter).
(b) Upon receiving clearance from Vessel Traffic Controller, t may get underway without a Mooring Master on board fo purpose of making a lee only. The Mooring Master will then b the vessel and proceed to the bridge to pilot the vessel to b
(c) Equipment brought aboard the tanker for use in the mo arrangement shall be transported to the bow by ship's pers and returned to the manifold in the way of the derrick at comp of port operations. Ship's personnel, supervised by a deck o and advised by the Assistant Mooring Master, shall prepar arrange the tanker's mooring equipment to the satisfaction Assistant Mooring Master and the tanker's Master.
(d) Specific tanker speed will be recommended by the Mo Master to the vessel, consistent with the International Rul Navigation, Rule 6 – Speed.

Tanker Proceeding to Mooring from Anchor (Outside of S Zone):
(a) The Vessel Traffic Controller advises the tanker of the arriva of the Mooring Master, Assistant Mooring Master, deck watc oil inspectors, and of equipment to be made ready. Include instructions for preparation of an accommodation ladder a pilot ladder, equipment hoist and operative emergency t equipment. (Note: See "General" – "Helicopter Trans Personnel and Supplies" – Section (B) for times when M Master boarding is done by helicopter). Tanker may raise a and get underway prior to Mooring Master's arrival, but un circumstances shall the tanker enter the Safety Zone u Mooring Master is on board.
(b) Equipment brought aboard the tanker for use in the m arrangement shall be transported to the bow by ship's pe and returned to the manifold in the way of the derrick at com of port operations. Ship's personnel, supervised by a deck and advised by the Assistant Mooring Master, shall prepa arrange the tanker's mooring equipment to the satisfactio Assistant Mooring Master and the tanker's Master.
(c) Specific tanker speeds will be recommended by the M Master to the vessel consistent with the International R Navigation, Rule 6 – Safe Speed.

Navigational Assistance: During the mooring operation the M Master and the Assistant Mooring Master perform the following fu
(a) The Mooring Master advises the tanker's Master on ope and ship control matters and regulations that are pecul port, such as navigational aids, depth and current chara of the manoeuvring area during existing conditions, equipment and procedures, and the port's vessel procedures. The Mooring Master will maintain commu with the Vessel Traffic Controller, mooring launches Assistant Mooring Master until the mooring operation h completed.
(b) The Assistant Mooring Master is stationed on the fore the tanker during mooring operations to assist the Moori by reporting position approach data relative to the SP advise the tanker's personnel in the handling of equipment peculiar to the port.

Manoeuvring Capabilities: LOOP SPM buoys are located on a 2,438 m. (8,000 ft.) from the Marine Terminal Pumping Complex, with spacing between buoys of 1,981.2 m. (6,500 ft.) must have the capability to perform the manoeuvring re approach and depart from an SPM within an area not gre

1,524 m. (5,000 ft.) radius from the buoy at speeds not exceeding 5.5 km./hr. (3 knots). LOOP may require evidence of a tanker's capability to approach and enter the safety zone. The Mooring Master may determine this by pre-berthing checks of a tanker's manoeuvring characteristics.

Berthing Order: When a buoy becomes available, the tanker with the earliest Firm Arrival Window will be berthed, provided that tanker has issued its Notice of Readiness to discharge. LOOP may adjust a tanker's position in the queue a maximum of one position when such adjustment is necessary for optimum operations of the LOOP system.

VESSEL REQUIREMENTS: *General Condition of Vessels:* Each tanker calling at LOOP shall be seaworthy, have a fit crew, and not be leaking oil and not be in a condition which presents a risk or threat of a prohibited oil discharge.

CAUTION: *Prior to arrival, the Master shall ensure that the vessel does not have stern seal leakage. Stern seal pressure shall be monitored throughout the cargo discharge to ensure that changes in draft or trim do not cause a stern seal leak.*

Navigation Equipment: Any vessel calling at LOOP must meet the U.S. Coast Guard navigational equipment requirements for a vessel entering U.S. waters (i.e. 33 CFR 164.35). Coast Guard personnel will board selected arriving vessels to ensure compliance with Federal Regulations.

Pre-arrival, Connection and Transfer:

Preparations, procedures, tests and inspections to be followed both by the tanker and by the LOOP platform during the pre-arrival time, connection and transfer must meet the requirements of 33 CFR 150(D), and the recommendations of the OCIMF Safety Guide.

The Mooring Master will have a LOOP Check List, which includes a Declaration of Inspection, that shows all the items to be tested or inspected in order to comply with the Federal Regulations and with current OCIMF recommendations. The inspection is to be made and the Check List is to be signed both by the tanker's Master and by the Mooring Master before the start of oil transfer operations.

Oil Transfer Equipment:

All tankers must meet the requirements of 33 CFR 155 and 46 CFR, sub-chapter (d) (Tank vessels), with regard to oil transfer equipment. Cargo hoses must be connected by the tanker's personnel, under the guidance of the Mooring Master or the Assistant Mooring Master.

The Mooring Master will provide a remotely operated Emergency Shutdown Signalling Device to be kept in the Cargo Control Room. Activation of this alarm requires an immediate, rapid stopping of the pumping operation. The Mooring Master will explain the use of the Emergency Shutdown Signalling Device.

Physical Parameters of Vessel:

Tankers to be accepted by LOOP must:

(a) Have oil transfer equipment that conforms to the technical recommendations of the Oil Companies' International Marine Forum (OCIMF).
(b) Be equipped with shipboard mooring fittings installed and located for safe and effective mooring to an SPM and in compliance with current OCIMF recommendations and LOOP requirements.
(c) Be equipped with a derrick, located near the cargo manifold for hose handling, capable of lifting and sustaining a safe working load of 10 tons to a height of 13.7 m. (45 ft.) above deck level. (ULCCs should have a 15 ton crane because of the extra hose weight due to their greater freeboard).
(d) Be equipped with emergency towing equipment that is in place and in compliance with IMO Assembly Resolution A535(13) and LOOP requirements.
(e) Not exceed maximum mooring load limitations of SPMs. See "Berthing".
(f) Have serviceable pumping equipment.
(g) Be capable of delivering a cargo size or quantity that is in accordance with LOOP's Terms and Conditions of Service.

Hull Condition: Hulls of tankers calling at LOOP shall be free of obstructions, (e.g. barnacles) which could cause damage to marine hoses, pollution, or injury to personnel.

Deck Floodlighting:

Illuminated Locations: In addition to the light usually displayed, tankers are required to furnish adequate additional lighting for night operations including:

(a) Proper safety lighting of the accommodation ladder for personnel embarkation and disembarkation. This is particularly essential for arriving and departing tankers when the Mooring Master and Assistant Mooring Master board or depart the tanker. A deck officer is required to supervise these procedures.
(b) Lighting of the forecastle area.
(c) Lighting of areas encompassing the derricks, deck and water during equipment and hose handling operations.
(d) Lighting to illuminate the cargo manifold.
(e) Portable or hand-held safety lanterns for inspections and other deck activities that may require particular attention.

Type of Equipment: Only explosion-proof lighting equipment and electrical apparatus certified intrinsically safe for use in a hazardous area is permitted to be used on deck while a tanker is at an SPM. Portable electric lamps or other apparatus with flexible cable shall not be used without permission from the ship's officer-in-charge and from the Mooring Master/Assistant Mooring Master aboard the tanker. In this regard, the recommendations of ISGOTT should be followed.

Accommodation: Tankers discharging at LOOP must provide meals and accommodation for the Mooring Master, the Assistant Mooring Master and deck watch, during their time on board and for an independent Petroleum Inspector during his required time on board.

Vessel Readiness:

Equipment/Personnel: Vessels at moorings or anchorage must maintain engines, propulsion machinery and emergency towing equipment in readiness to clear the Marine Terminal area under full power on short notice. *No repairs are permitted which would interfere with this requirement.* Vessel trim and draft should also be considered in determining vessel manoeuvring capability. Masters of tankers are advised to have sufficient personnel aboard and on watch to enable them to depart upon advice from the Vessel Traffic Controller. The Master of a tanker may, in an emergency, for the protection of life or property, depart without clearance from the Vessel Traffic Controller, if the Master advises the Vessel Traffic Controller of the circumstances by radio at the earliest moment.

Minimum Ballast: The Master is to maintain his vessel in a seaworthy condition and be ready to sail and manoeuvre at all times. This port is in the open sea and *is not in a Harbour.* Weather can change rapidly as mentioned in section on weather. The Master is to maintain his vessel with sufficient ballast to obtain full immersion of the propeller at all times while maintaining a reasonable stern trim. These additional factors must be considered by the Master in maintaining the seaworthy condition and readiness to sail and manoeuvre.

A 10 minute or less ready standby requirement for engines and anchors will be invoked in the event of rough weather. The Port Superintendent will invoke the rough weather advisory.

Emergency Towing Equipment: LOOP employs an Emergency Response Vessel (ERV) at the Port for the designed purpose of providing escort and, if required, emergency towing response to disabled tankers. For emergency towing response to be effective, LOOP requires all tankships calling at the Port to be fitted in accordance with IMO Assembly Resolution A535(13) "Recommendations on Emergency Towing Requirements for Tankers".

NAVIGATION AIDS: *SPM Buoys:* In addition to the port name "LOOP" and an SPM number, each SPM buoy is painted white on top with yellow sides and is equipped with the following navigational aids:

(a) A quick flashing (0.3 seconds "on", 0.7 seconds "off") white light installed on the buoy at a height of 5.5 m. (18 ft.). The light can normally be seen through 360° of arc at a range of 7.4 km. (4 nautical miles). It is actuated by a solar photo-electric switch.
(b) A 406.4 mm. (16 in.) diameter all-directional radar reflector mounted on the highest point of the buoy.
(c) Buoy number daymarks at 90° intervals around the buoy hull.

Platform Complex Beacon Light: A rotating beacon which shows a flashing white light (6 flashes per minute) is mounted above the pumping platform atop the communications tower at an elevation of 64 m. (210 ft.) above MHW and it is visible all around the horizon. It is actuated from the control platform. The light is 47,000 candela and is visible for at least 18 miles.

Platform Complex Obstruction Lights: Obstruction lights are installed at each corner of both platforms and one on the bridge connecting the structures. The lights on the pumping platform are 25 m. (81 ft.) above MHW and on the control platform are 23 m. (76 ft.) above MHW. They are quick flashing white (0.3 seconds "on", 0.7 seconds "off") (60 flashes per minute). They flash in unison and are placed so that at least one light can be seen for a minimum of 5 nautical miles from any approach angle to the platform complex. They are actuated from the Control Platform at night and in periods of low visibility.

Platform Complex Fog Signals: 2 fog horns are installed at the platform complex. One is hung below the lower deck near the middle of the Northwest edge of the pumping platform about 21.3 m. (70 ft.) above MHW, and the other is hung below the lower deck on the Southern edge of the control platform. The signals are synchronized to sound a 650-800 Hz 2 second blast every 20 seconds and can be heard for at least 3.7 km. (2.0 nautical miles). They are actuated from the control platform.

Buoys: The following table lists the characteristics of the buoys marking the approach section of the safety zone:

Buoy Daymark	*Buoy Colour*	*Water Depth Metres*	*Water Depth Feet*	*Lantern Colour*	*Radar Reflector*	*Fog Signal*
No. 1	Green	47.5	156	Green	X	X
No. 2	Red	46.3	152	Red	X	None
No. 3 No. 4	See "Plan" for new locations.					

From seaward, Buoys No. 1 and 3 define the port (left) lateral limits of the approach section and Buoys No. 2 and 4 the starboard (right) lateral boundary. Buoys No. 1 and 2 are located at the entry to the approach section when proceeding from seaward.

Safety Zone Navigation Buoys: The Safety Zone is shown in "Plan Section" together with the location of floating aids to navigation and marine terminal components. International "Rules of the Road" apply in the safety zone. The purpose of a deepwater port safety zone is to define an area in which any activity that may directly or indirectly increase the environmental and safety risks associated with port operation may be minimised or prohibited. The IMO vessel routing measure known as a precautionary area; i.e. a routing measure comprising an area within definite limits where ships must navigate with particular caution and within which the direction of traffic flow may be recommended, has been adopted as the concept for U.S. deepwater port safety zones. The safety zone is made up of 3 parts; the approach section, the anchorage section, and the terminal section. Inside the terminal section there are 4 "areas to be avoided"; one is 600 m. in radius around the pumping platform complex and 3 are 500 m. in radius around each of the SPMs. "Areas to be avoided" conform to IMO measures to keep ships or certain classes of ships outside a delineated area. 4 navigational marker buoys define the boundaries of the approach section of the safety zone. Proceeding from seaward, the 2.0 nautical miles wide approach section extends 5 nautical miles from the Safety Fairway to the terminal section.

The buoys have the following characteristics:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2 nautical miles) minimum.
Lights:	Installed at 4.6 m. (15 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"); light intensity 75 candela, actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable from at least 15 km. (8.0 nautical miles) by typical shipboard radar systems.
Fog Signal:	(Buoy No. 1 only) minimum audible range approximately 1 km. (0.5 nautical miles); programmed to send Morse code "L" at 20 second intervals. This buoy's fog signal operates continuously.

Safety Fairway: The LOOP Safety Fairway, shown in NAV 3A, "Plan Section", has no marker buoys. To lessen the chance of accidents, ships enter and leave U.S. Gulf Coast ports via safety fairways. The fairways are 2 miles wide. No offshore drilling rigs or structures are permitted in them. LOOP recommends that tankers enter or leave the LOOP Safety Fairway at its Southernmost point or at least South of 28° 18' N. NOAA Chart 11359 has details of the LOOP Deepwater Port including pipelines within the safety fairway and safety zone.

Service Vessel Mooring Buoys: The buoys provided for mooring port service vessels at the marine terminal are white with a horizontal blue band between the top of each buoy and the waterline. The buoy identification is reflective. Battery powered, slow flashing (0.4 seconds "on", 3.6 seconds "off") white lights are installed 2.4 m. (8 ft.) above the water, and are actuated by solar photoelectric switches.

Also see "Anchorage".

ANCHORAGE: *Anchorage Section Buoys:*

The designated anchorage section of the safety zone is a 3.7 km.(2.0 nautical miles) wide area beginning at safety zone Buoy No. 2 and extending 7.4 km. (4.0 nautical miles) along and next to the Eastward boundary of the safety zone. Buoys "L-B" and "L-A" mark the corners and define the outer boundaries of the anchorage section. The anchorage section buoys have characteristics as follows:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2.0 nautical miles) minimum.
Lights:	Installed at 4 m. (13 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"), actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable at 15 km. (8.0 nautical miles) by typical shipboard radar systems.

Buoy	*Buoy*	*Water Depth*		*Lantern*	*Radar*	*Fog*
Daymark	*Colour*	*Metres*	*Feet*	*Colour*	*Reflector*	*Signal*
L-B	Yellow	45.7	150	Yellow	X	None
L-A	Yellow	37.1	122	Yellow	X	None

Also see "Tanker Arrival".

RADIO/VHF: *Notices of Arrival:*

The Master of a tanker bound for LOOP should send his first arrival advice message as nearly as possible to 7 days before his expected date of arrival, even if he is in port at the time. If his trip to LOOP is less than 7 days he should also send another arrival advice as soon as possible after leaving his loading port. His next arrival advice should be sent 72 hours before the estimated time of arrival. The arrival advice should be transmitted and updated again at 48 hours and again not later than 24 hours before the estimated time of arrival. An arrival advice message can and should be sent at any time when there is a significant change in a previously estimated arrival time. These arrival advice messages should be sent to LOOP INC. The first message should contain, at a minimum, the following:

1. Tanker's name and call sign.
2. Estimated time of arrival at LOOP.
3. (a) Arrival draft, fore and aft.
   (b) Fore and aft draft at completion of discharge.
   (c) Departure draft, fore and aft.
4. Type(s) and amount(s) of cargo on board.
5. Basic discharge plan, times and pumping rates.
6. Cargo manifold size and type, if 16 in. not available.
7. Type of mooring equipment installed.
8. Expected discharge rate.
9. Expected number of ballast hours upon completion.
10. Type of Emergency Towing Equipment.
11. Any special requirements which need early actions.

These messages can be sent by Western Union International TWX (810) 950-5875, LOOP MARTERM or by radio to coast stations WNU Slidell, WLO Mobile or WPA Port Arthur. It is suggested that ETA advice also be sent to tanker's Agents, with logistics requirements.

Pre-Arrival Instructions: A message will be sent to LOOP-bound tankers approximately 72 hours prior to their arrival, outlining arrival procedures and discharge planning recommendations. See "Pre-Arrival Instructions" below.

LOOP's Pre-Arrival Instructions:

To Master:

(a) Mooring Master Station is 28° 47' N., 89° 53' W. Recommend approach via existing safety fairways. If anchoring on arrival, you may enter the LOOP Safety Zone Anchorage. Anchoring in LOOP Anchorage will facilitate berthing. You do not need a Mooring Master to anchor in LOOP Anchorage, but must have permission from LOOP Radar. You may also anchor outside.
(b) LOOP Terminal call sign is "LOOP Radar" and guards Channel 16, VHF-FM.
(c) Advise "LOOP Radar" when 20 nautical miles from Mooring Master Boarding Area. Have officer accommodation for 2 Mooring Masters and accommodation for 2 deck watch personnel.
(d) Advise unloading plan and arrival draft. Include any shut-downs for stripping and COW. Advise usable slop tank capacity.
(e) For efficient discharge, it is important during bulk discharge that the vessel pumps at a constant maximum rate.
(f) Rate, reductions for COW, ballast or stripping should be handled during arranged shut-down periods.
(g) The vessel shall maintain sufficient ballast to obtain full immersion of the propeller at all times while maintaining reasonable stern trim.
(h) Plan your discharge accordingly, subject to safety considerations prevailing at all times.
(i) Upon arrival, the Master shall submit detailed discharge plans for review.
(j) Advise ETA.

24 Hour Message: By regulation, the 24 hour arrival message sha addressed both to the Coast Guard Captain of the Port, Morgan (Telex 701801 USCG NLN-UD) and to LOOP INC. This message sh contain the following:

1. Name, gross tonnage, and draft of the tanker.
2. Type and amounts of cargo on board.
3. Any condition on the tanker that may impair its navigation, s as fire, malfunctioning propulsion machinery or steering equipmen limitations on navigational or radiotelephone capabilities becaus equipment or material malfunctions. (No vessel will be allowed t underway in the Safety Zone with any steering or propulsion equipm deficiency or with inoperative emergency towing equipment recommended by IMO).
4. Any leaks, structural damage, or machinery malfunctions that impair cargo transfer operations or cause a discharge of oil.
5. ETA at the Safety Zone: If the information reported changes at time before entering the Safety Zone, or while the tanker is in the Sa Zone, the Master of the tanker shall report the changes to the C Guard Captain of the Port and to LOOP INC. as soon as possible cable and single side band.

Radio Frequencies for Berthing: In addition to the above notices, r communication on the International VHF Maritime Band (Channel 156.725 MHz.) should be started at a distance of 20 nautical miles the safety zone, or more, if possible. This Channel should be use a "twenty-mile", final arrival notice, and for communications with terminal and with the Mooring Master, until he boards the tanker.

Radio Communications at the Port: The LOOP platform always gu the international calling frequency 156.800 MHz. (Channel 16). LOO working frequencies are VHF Maritime Channel 74 (Primary), Channel 10 (Secondary). Use of shipboard radar and HF rad forbidden while moored to an SPM. While in port, LOOP communic with the tankers via the Mooring Master's UHF portable radio.

LOOP's Communications Facilities: LOOP has the ability to use following communications for vessels trying to contact the Port:

Type of Communications	*Frequencies*	*Call S*
VHF-FM Maritime Mobile	(Carrier assigned in MHz)	KR-78
	156.500, Channel 10, Commercial Working.	
	156.800, Channel 16, Distress, Safety and Calling.	"LOO Rada
	156.725, Channel 74, Port Operations.	

Transit Traffic: LOOP maintains a VHF Maritime radio system cap of communicating with vessels other than tankers or LOOP su vessels if such vessels are equipped with comparable equipment. W necessary to communicate with vessels of unknown communic capabilities, the Vessel Traffic Controller will attempt to contact vessel on VHF Channel 16. If such efforts at radio communicatio unsuccessful, a LOOP mooring launch or personnel boat wi dispatched to advise the vessel of any potential danger to the vess observed by the Vessel Traffic Controller's surveillance and al advise the vessel operator of the port's precautionary areas and to be avoided.

When requested by a Master of a vessel other than a LOOP s vessel or tanker, the Vessel Traffic Controller shall furnish inform concerning tankers, support vessels, and other vessels underw moored in the safety zone.

Weather Advisory System: Coast Guard radio stations make two of marine information broadcasts: radiotelephone (voice) for all sea users, and radiotelegraph (CW) for vessels carrying trained operators. Scheduled radiotelephone broadcasts include routine we reports, small craft warnings, storm warnings, navigational inform and other advisories on working frequencies, following a prelimina on the voice international distress and calling frequencies. Urgen safety broadcasts are made upon receipt of the information, u information is repeated 15 minutes later, and both are included next scheduled broadcast unless cancelled before that time. Add broadcasts may be made at the discretion of the originator. U broadcasts are preceded by the signal: "PAN" for radiotelepho "XXX" for radiotelegraph. Both the urgency signal and messa transmitted on 2182 kHz and 156.80 MHz (Channel 16). broadcasts are preceded by the signal: "SECURITE" for radiotele and "TTT" for radiotelegraph. After a preliminary call on 2182 k 156.80 MHz, the station shifts to its assigned working frequency broadcast.

The following Coast Guard Radio stations make urgency, saf scheduled marine information broadcasts preceded by a prelimin on 2182 kHz or 156.8 MHz, at the times and on the working frequ indicated:

Station	*Working Frequency*	*Time(s)*
NCF, Miami Beach, Florida	2670 kHz.	0400, 0600, 0800, 1300, 1900 and 22
	157.10 MHz (Channel 22)	0630, 1200 and 17
NOK, Key West, Florida	157.10 MHz (Channel 22)	0600, 1200 and 17
NMA-21, St. Petersburg, Florida	2670 kHz	0920 and 2320 ES
	157.10 MHz (Channel 22)	0650, 1250 and 17
NMG, New Orleans, Louisiana	2670 kHz	0435, 0635, 1035, 1635 and 2350 CS
	157.10 MHz (Channel 22)	0450, 1050 and 16
NMG-15, Grand Isle, Louisiana	157.10 MHz (Channel 22)	0435, 1035 and 16

Station	Working Frequency	Time(s)
NOY, Galveston, Texas	2670 kHz	0450, 0650, 1050 and 1650 CST
NOY-3, Port Aransas, Texas	157.10 MHz (Channel 22)	0440, 0640, 1040 and 1640 CST
NCH, Port Isabel, Texas	2670 kHz	0440, 0640, 1040 and 1640 CST
	157.10 MHz (Channel 22)	0435, 1035 and 1635 CST
NMR, San Juan, Puerto Rico	2670 kHz	1100 and 2300 AST
	157.10 MHz (Channel 22)	0710, 1310 and 1810 AST

Scheduled radiotelegraph broadcasts include routine weather reports, small craft warnings, storm warnings, navigational information and other advisories on working frequencies following a preliminary call on the radiotelegraph international distress and calling frequency 500 kHz. Urgent and safety broadcasts are made as follows:

(a) Safety broadcasts are made upon receipt of the information; urgent broadcasts are also made upon receipt of the information except within 10 minutes of the next silent period.

(b) Safety and urgent messages are made during the last 15 seconds of the first silent period after receipt, and are repeated at the end of the first silent period which occurs during the working hours of one-operator ships, unless the warning has been cancelled or superseded by a later warning message. Urgent broadcasts are preceded by the signal "XXX". Both the urgent signal and the message are transmitted on 500 kHz. Safety broadcasts are preceded by the signal "TTT". After the preliminary call on 500 kHz, the station shifts to its assigned working frequency to transmit the broadcast. The following Coast Guard radio stations in the Gulf of Mexico area and its approaches make urgent, safety and scheduled marine information broadcasts preceded by a preliminary call on 500 kHz, at the times and on the working frequencies indicated:

Station	Working Frequency	Time(s)
NMA, Miami, Florida	440 kHz	1100 and 2000 EST
NMG, New Orleans, Louisiana	428 kHz	1120 and 1830 CST
NMR, San Juan, Puerto Rico	466 kHz	1220 and 2120 AST

LOOP also has weather and sea monitoring equipment installed at the Marine Terminal and receives NOAA weather advisories. Upon request, weather information will be transmitted to tankers in the vicinity.

In addition, NOAA gives continuous weather information, forecasts and warnings on the following frequencies:

WX1 162.500 MHz WX2 162.400 MHz.

Weather facsimile information is available via WLO, Mobile on the following frequencies:

6852.0 kHz.
9157.5 kHz.

RADAR: *Navigation Advisory System (Surveillance Radar):* 2 radar surveillance systems, X-band and S-band frequencies, are installed at the marine terminal. The systems provide coverage from the platform complex to a range of about 50 km. (27 nautical miles) for tankers, and include, among other things, a collision avoidance system. After an incoming tanker makes radio contact on the VHF system about 20 miles from the safety zone, the Vessel Traffic Controller will advise of the location of navigational hazards as well as relative positions and estimated courses and speeds of other vessels within radar range of the platform.

Radar Beacon: The LOOP radar beacon (RACON) operates 24 hours daily on the X-band frequency from 9300 to 9500 MHz. The transponder is mounted on top of the communications tower 64 m. (210 ft.) above MHW. The RACON will respond to incoming signals by transmitting Morse coded letter "O" as the identifying signal for the marine terminal platform complex. The RACON has a range of about 40 km. to 48 km. (22 nautical miles to 26 nautical miles), depending on the height of shipboard radar antennas.

TUGS: Support Vessels: *List of Characteristics by Vessel Name:* The following 2 launches are operated by LOOP for the primary purpose of assisting in mooring operations:

Names: "Loop Line" and Loop Loader".
Length overall: 26 m. (85 ft.).
Beam: 7.9 m. (26 ft.).
Draft: 2.1 m. (7 ft.).
Propulsion: 2 model 16V-92 GM diesel engines, twin screw, 1,200 h.p. total.
Maximum speed: 10 knots.
Bollard pull: 3,629 Kg. (8,000 lb.) line pull.
Navigation and Communications: Sitex 48 mile radar, digital fathometer, Loran C, SSB and VHF radios (Channel 10, 16 and 74) plus an 8 Channel LOOP UHF radio.
Construction material: Steel.
Fuel Capacity: 75,708 litres (20,000 gallons).

The LOOP maintenance vessel functions primarily for inspection, servicing, and maintenance of marine terminal components.

Name: "Loop Lifter".
Length overall: 61 m. (200 ft.).Beam: 15.2 m. (50 ft.).
Draft: 3.7 m. (12 ft.).
Propulsion: 2 D-399 Caterpillar engines, twin screw, 3,000 h.p. total.
Maximum speed: 11 knots.
Navigation and communication: Auto pilot, Sitex 48 mile radar, fathometer, Loran C, SSB and VHF radios (Channels 10, 16, and 74), plus an 8-Channel LOOP UHF radio.
Construction material: Steel.
Fuel Capacity: 80,000 gallons.
Fire pump: 9,475 litres per minute (2,500 GPM).

The following vessel is operated by LOOP for the primary purpose of escorting and emergency response to tankers calling at the port:

Name:	LOOP Responder
Length:	47.2 m. (155 ft.)
Beam:	15.7 m. (51.5 ft.)
Draft:	4.9 m. (16 ft.)
Main Engines:	2 Model 3608 Caterpillar 7,300 BHP
Propulsion:	2-Voith Schneider 36 IIG
Maximum Speed:	13 knots
Tow Winch:	Single drum line handling 150 ft./min. line recovery rate
Hawser:	1,000 ft. 3.75 in. diameter spectra
Fuel Capacity:	60,000 gallons
Portable Water:	15,000 gallons
Fire Pumps:	2×1,000 h.p.
Fire Monitors:	2×7,000 GPM each
Foam Capacity:	5,000 gallons
Construction:	Steel
Fendering:	Full

BERTHING: LOOP single point moorings (SPM) are the single anchor leg mooring (SALM) type, designed for tankers up to 700,000 d.w.t. The SPMs are numbered clockwise and are described as follows:

SPM 102:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Diameter	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

SPM 103:

Water Depth	35.7 m. (117 ft.)
Maximum Tanker Draft*	29.4 m. (96.3 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Size	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

SPM 104:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Diameter	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

*The maximum drafts shown here allow for a gross underkeel clearance of 6 m. (19.7 ft.) during Gulf coast LW and calm seas. The maximum drafts result in a clearance of 2.9 m. (9.4 ft.) above the SPM base U-joints, since the U-joints are 3.4 m. (11.3 ft.) above the ocean bottom. Gross underkeel clearance means the distance between the keel of a tanker and the ocean bottom when the tanker is moored in calm seas. Net underkeel clearance means the distance between the ocean bottom and the keel of a tanker that is anchored, considering ship motion in response to wind, wave, tide and current conditions. It is required that there be a net underkeel clearance of 4.7 m. (15.3 ft.) during bad weather.

The limiting drafts at various significant wave heights that will result in a 4.7 m. (15.3 ft.) underkeel clearance during bad weather, when a tanker may be pitching or rolling, are shown on graphs in the "Plan Section".

Note: Significant wave height is the average height of the highest one-third of all waves passing a point in a given period of time.

MOORING:

Mooring Equipment and Hawser System: Before a tanker is accepted for offloading and *prior to arrival, the ship should notify LOOP of the type of SPM mooring equipment installed* to determine if the equipment is capable of sustaining the safe working load that will be imposed on it and if fitted in accordance with the 1992 OCIMF recommendations for mooring of tankers at SPM's. *All tankers are required to utilise the two hawser system to moor at the SPM.* LOOP requires that all ships be fitted as follows:

Requirements effective 1st April 1993:

(a) All vessels will be fitted with 2×76 mm (3 in.) bow stoppers and two, one each side of the centreline, bow chock openings, capable of allowing free passage of 76 mm. (3 in.) chafe chain.

(b) Pedestal roller fairlead and winch drums or capstans to provide proper leads and clearances (drum end of anchor windlass is acceptable).

The exact arrangement will be determined by the Assistant Mooring Master after inspection of the ship's fittings and equipment. *Mooring and unmooring is to be done by the crew of the tanker with the advice of the Assistant Mooring Master.*

Two launches will normally assist in mooring. One launch will tend the hawser systems. Successively for each of the two hawser systems, the launch personnel will secure the tanker's messenger line to a pick-up line in order for the hawser system chafe chains to be winched aboard the tanker and secured to the shipboard mooring fittings. The second launch tends the floating hose strings during the tanker mooring, drawing the hose strings aside from the tanker's track during the approach and mooring. LOOP has no tugs to routinely assist in mooring.

HOSES: *Floating Hoses:* The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of 2×24 in. crude oil discharge hoses with 16 in. inside-diameter tails, each with 150 ANSI flanges for connection to the tanker's manifold. Each hose-string has a one Candela yellow light on a pick-up buoy at its end. In order to avoid delays in connecting hoses, tankers should have an adequate number of reducing spools to fit 16 in. standard ANSI flanges. Tankers are requested to remove the blank flanges from their discharge manifolds before mooring so as to expedite the connecting of the floating hoses. *Connecting and disconnecting of the cargo hoses is to be performed by the tanker crew under the advice of the Assistant Mooring Master.*

Hose Handling: Mooring launches tow each floating hose into position beneath the tanker's lifting derrick. The derrick runner is lowered to the launch and secured to the hose pick-up sling. After the hose is lifted above the level of the tanker's rail, it is swung inboard. A snubber chain connected between the first and second hose-lengths is then used to control its angle (i.e., to guide it towards its proper place on the cargo manifold). When the hose has been raised enough to span the distance between the tanker's rail and the cargo manifold, the snubbers can be made fast. The hose end is then lowered to the manifold and connected to it. Upon completion of discharge, each hose is disconnected from the manifold after its weight is borne up by the derrick runner. It is then swung outboard, lowered to the water, and released.

Care in Raising and Lowering the Hose: Care is necessary in raising the hoses before discharge and particularly in lowering them after discharge. At these times they are especially vulnerable to kinking.

Damaging Configurations for the Hose: While the cargo transfer hose is connected to the tanker, certain positions that the tanker might take relative to the SPM could cause the hose to bend excessively and thus could damage it.

For example, if a tanker overrides the buoy, it could damage both the hose and the buoy. This condition can be corrected by the tanker going astern or being pulled astern.

Another damaging position could happen if the SPM seabed swivel does not turn as the tanker swings around it. In such a case the Mooring Master will seek LOOP's assistance. If this situation is not immediately resolved, the Port Superintendent or the Mooring Master should issue the order to stop pumping cargo.

Also see "Tanker Arrival".

CARGO OPERATIONS: *Tanker Discharge Planning:* Ship's officers should be aware of LOOP's requirements prior to preparing their pre-arrival discharge sequence planning. Consistent with maintaining vessel seaworthiness and readiness to sail and manoeuvre, LOOP encourages the highest possible bulk discharge rate followed by a stoppage for consolidation of strippings and Crude Oil Washing (COW). This runs counter to conventional tanker practice of always keeping some flow going ashore but is necessary at LOOP in order to maximise pipeline utilisation. While stopped for stripping and/or COW, another ship will normally be pumping at a high rate.

Discharge Operation: The discharge operation will be controlled and personally supervised by a ship's officer, to the satisfaction of the Mooring Master or the Assistant Mooring Master. Upon being informed by the ship's officer on watch that the tanker is ready to begin discharging, the Mooring Master will request the discharge operation to proceed according to a previously agreed upon plan regarding start-up rates and maximum discharge rates. *In the event of any emergency, either on board the tanker or on the operating platform, or anywhere in the LOOP system, all oil transfer must be stopped and all oil transfer valves closed.*

These emergencies are:

(a) Fire or explosion of a tanker, on the platform, or anywhere on the LOOP system.
(b) Loss of power or steering on a tanker underway in the safety zone.
(c) Breakage of a hawser.
(d) Rupture of a floating hose.
(e) Any confirmed pipeline rupture in the LOOP system.
(f) Power failure at any LOOP pipeline facility.
(g) Severe electrical storm in the area of the port. (Ballast receipt must also be stopped during such electrical storms.)
(h) Failure of the UHF radio communication system.

In the event of failure of the UHF radio communication system, the tanker will sound 5 long blasts on her whistle. Cargo discharge is then stopped until communications are re-established.

Oil Transfer Watch: One crew member will be stationed at the bow and an additional crew member stationed at the cargo manifold area. A licensed officer and pumpman will be based in the cargo control room, with the pumpman moving onto the deck as necessary. During the cargo transfer, the watch organisation must provide the capability to shut down pumping on short notice and to stay in constant communication with the Mooring Master and LOOP personnel at the Marine Terminal and the Galliano Operations Centre. Communications for cargo handling will be directly with the Mooring Master through the LOOP UHF portable radio system. (NOTE: Each Tanker shall have an officer who is fluent in English on duty at all times.).

Crude Oil Washing (COW): Crude Oil Washing of cargo tanks is allowed after LOOP is assured that the operation will be done safely. In order for Crude Oil Washing to be undertaken, the tanker and the tanker's personnel must satisfy the following requirements:

(a) Strict compliance with USCG Regulations 33 CFR 157. A copy of this regulation must be aboard the tanker and readily available to key shipboard personnel.
(b) Strict adherence to ISGOTT Recommendations for Crude Oil Washing are required. A copy must be aboard the tanker and readily available to key shipboard personnel.
(c) Notwithstanding the above regulations and guidelines, no COW will be permitted until the Mooring Master is satisfied that:
    1. All cargo tanks have discharged at least 1 m. of cargo depth in order to eliminate any water that may have accumulated on the bottoms of cargo tanks.
    2. The Chief Officer or the person in charge of the COW operation has participated at least twice in Crude Oil Wash operations aboard a tanker similarly equipped.
    3. There is a sufficient number of adequately trained personnel onboard to assist in the dual operations of transferring cargo and crude oil washing, in order to ensure that:
        (i) Gun nozzles are rotating in proper sequence.
        (ii) Enough source product remains in the tank supplying the cleaning oil.
        (iii) The on-deck piping system carrying the cleaning oil is continuously watched.

Note: Consideration should be given to washing dirty ballast tanks as soon as is practical to allow for ballasting, should the weather condition deteriorate.

Inert Gas Systems (IGS): The Masters of tankships calling at LOO required by 46 CFR 32.53 to have IGS operational and capab maintaining an inert atmosphere in the cargo tanks at the req positive gas pressure of 100 mm. (4 in.) of water on filled cargo and during loading and unloading, except when the cargo tanks ar free. Additionally, all tankships calling at LOOP will be in strict compl with 46 CFR 32.51-1 through 46 CFR 32.53-85 to ensure tha approval, operation (including instructions), control and instrumen of IGS are valid and functional in all respects.

DEPARTURE: *Normal Departure Procedure:* Upon completion o cargo discharge, the tanker's Master or Chief Officer and the Mo Master together estimate the time needed to prepare the tanke departure. This time will be given to the Vessel Traffic Controller o control platform, so that clearance for departure can be planned an that a mooring launch can be summoned to assist the tanker i operations of unmooring.

When the tanker is ready to leave the SPM, the Assistant Mo Master on the bow recommends the use of the tanker's engines in to ease the load on the mooring lines. When the load is eased en the tanker's crew can then disengage the mooring hawser and the mooring lines to the water.

Departure time is the time when the last mooring line is cast off. the tanker is unmoored, she manoeuvres to go clear of the SPM and to take a course for departure through the safety fairway.

Departure from the SPM to the disembarking point of the Mo Master is done under the Mooring Master's guidance and the Ve Traffic Controller's surveillance.

Emergency Departure Procedures: An emergency departure ca initiated either from the control platform or from the tanker. If ini from the platform, the Mooring Master is so notified. The tanker's eng must then be made ready for immediate service, and if cargo is discharged, the tanker's pumps must be shutdown in accordance the seriousness of the emergency. *If an abrupt shutdown of the platfo booster pumps is necessary, it is essential that the tanker's pumps be immediately shutdown or else immediately shifted to a recircu mode.* In accordance with the nature of the emergency, cargo may be lowered by line-slipping to the water. All other procedure the same as those initiated from the ship. The Master of a tanker in an emergency, for the protection of life or property, depart fro SPM without clearance from the control platform.

Emergency Shutdown: Following are the procedures to be follow case the offload pumping must be quickly stopped because of emergency.

(a) LOOP's Cargo Transfer Supervisor notifies the tanker's officer and the Mooring Master of the emergency shutdown activates the Emergency Shutdown Signalling Device.
(b) The LOOP system automatically goes into a pumping reduction, and shuts down the pumps and meters as the flo dictates.
(c) The tanker's manifold valves and the hose end butterfly are closed as soon as LOOP's pumps and the tanker's are shut off.
(d) The Pumping Platform Supervisor shuts LOOP's PLEM va
(e) If the emergency is one that makes a quick departure of the necessary, the emergency departure procedures of the pre paragraph will then be followed.

MEDICAL: Agents can arrange medical and dental treatment as consultation and hospitalisation at short notice.

FRESH WATER: Not available.

FUEL: LOOP does not provide any bunkering services or faci tankers operating in the LOOP deepwater port area. Such bunker be conducted by private concerns under arrangements made w owners or operators of tankers.

Bunkering will not be allowed to interfere with the safe and expe unloading of crude oil from tankers. All companies, craft, equipme personnel involved in bunkering inside LOOP's deepwater port are have LOOP's prior approval and must also follow LOOP's Bu Guidelines and Regulations, copies of which are available upon from LOOP.

FIRE PRECAUTIONS: As per the "International Safety Gu Tankers and Terminals".

REPAIRS: Skilled craftsmen are available for all on-board through Agent.

SURVEYORS: *Petroleum Inspectors:* A contracted "Insp Record" is available at the port to make shipboard inspection cargo. Use of this service is at the option of the shipper and is at sh expense. Shipper shall have the right to have representatives the inspection. Shipper should contact LOOP or the "Insp Record" regarding the prevailing fees and to make known in regarding use of the service.

AIRPORT: New Orleans International Airport is serviced b airlines with world wide connections. The airport is located 90 mi LOOP.

WEATHER: *Waves and Currents:* At the port, significant wave less than 1.8 m. (6 ft.) for 72% of the time, and greater than 3 m for 5.4% of the time. Currents take a generally Westerly direc of the time. Average current speed is 0.72 knots, but 3% of the current can reach a speed of 2 knots or more.

Weather at the Port: LOOP's Marine Terminal is located in a sem zone. Average Summer temperature is 29°C (84°F), and averag temperature is 14°C (57°F). Lowest temperature recorded (10°F) and highest is 38°C (100°F).

Thunderstorms in Summer and cold fronts in Winter develo and can be quite severe, with storm winds (up to Force 10) de for short periods. The Terminal is in a hurricane zone, and altho storms are an infrequent occurrence at the port, the area is ofte adversely between the months of June and November by h passing East or West of the port. Poor visibility occurs mos January when visibility of 2 nautical miles or less occurs 2% o

Weather Operating Rules: Mooring operations, hose hook-up and the operation of LOOP support vessels are weather determinant, which includes, but is not limited to, consideration of state of sea and swell, wind direction and velocity, visibility and current strength and direction. In general, the LOOP Port Superintendent may use the following guidelines in determining whether to intitate, continue or terminate any activities in the port.

(a) Generally, tanker mooring and hose hook-up can be conducted in significant seas of up to 2.0 m. Significant seas in excess of 2.0 m. will cause the activity to be reviewed by the Port Superintendent in order to consider the benefit of a lee side.

(b) Operation of LOOP support vessels and cargo discharge can generally be conducted in significant seas up to 4 m. In the event that seas increase beyond, or are predicted to increase beyond 4 m. significant wave height, especially as a result of a building storm, cargo operations may be discontinued and cargo hoses disconnected.

(c) Tankers may be required to depart the SPM when the conditions below exist, or are predicted:
  (1) if seas become greater than 5 m.
  (2) if winds become greater than 44 knots.
  (3) if current becomes greater than 1.8 knots and is aligned with winds of 40 knots or more.
  (4) if current becomes greater than 1.2 knots and is perpendicular to 40 knots winds.

(d) The complete shut-down of all systems and the evacuation of the port will be ordered when it is predicted that the centre of a hurricane will pass within 160 nautical miles of the port. Normally evacuation orders will be issued 36 hours before the storm's expected arrival.

(e) A hurricane alert is issued 72 hours ahead of an approaching hurricane. Incoming tankers will not normally be berthed after a hurricane alert, and berthed tankers will complete discharging as soon as possible and depart the port.

Also see "Radio".

REPATRIATION: Crew changes and repatriation of crew members can be arranged through Agent.

GENERAL:

List of United States Federal Regulations referenced in this Port:

Title 33 USCA 1517	– Deepwater Ports – Liability.
Title 33 CFR 150(D)	– Oil Transfer Operations.
Title 33 CFR 150.345	– Regulated Vessel Activities.
Title 33 CFR 155	– Oil Pollution Prevention Regulations for Vessels.
Title 33 CFR 157	– Rules for the Protection of the Marine Environment Relating to Tank Vessel Carrying Oil in Bulk.
Title 33 CFR 157.25 – 157.49	– Vessel Operations.
Title 33 CFR 159.7	– Marine Sanitation Devices – Requirements for Vessel Operators.
Title 33 CFR 164	– Navigation Safety Regulations.
Title 33 CFR 164.35	– Equipment: All Vessels.
Title 46 CFR 32.53	– Inert Gas System.
Title 46 CFR 34.05	– Fire Fighting Equipment.
Title 46 CFR 35.01	– Special Operating Requirements.
Title 46 CFR 35.30	– General Safety Rules.
Title 46 CFR 35.35	– Cargo Handling.

Annex V of MARPOL 73/78.

Charts: The following official charts of the National Oceanographic and Atmospheric Administration (NOAA) are recommended for use when approaching LOOP's Marine Terminal:

11340 (U.S. Gulf Coast – Mississippi River to Galveston).
11358 (U.S. Gulf Coast – Barataria Bay and Approaches).
11359 (U.S. Gulf Coast – Louisiana, LOOP Deepwater Port).

The latest editions of NOAA charts are listed in NOAA's publication "Dates of Latest Editions", which is issued quarterly and available free from National Ocean Survey, Division C44, Riverdale, Maryland 20840, U.S.A.

Support Vessel Base: National Oceanographic and Atmospheric (NOAA) Administration Chart No. 11358 shows the navigable route from the Marine Terminal to the Small Boat Harbour located on the East shore of Bayou Lafourche near Belle Pass where the support vessels are based.

Onshore Components: Major onshore components are: the Clovelly Dome Storage Terminal for receiving and storing the oil coming from the Marine Terminal and for delivering it to connecting facilities; the Operations Centre for controlling and monitoring system operations; and the Fourchon Booster Station for helping to pump the crude oil from the Marine Terminal to Clovelly Dome Storage Terminal.

Services: LOOP does not provide facilities for logistic services to tankers using the port. The company is not an "Agent", but does render to all tankers calling at its terminal the services necessary to effect a prompt, efficient turnaround. LOOP provides those services and facilities necessary for scheduling, receiving, mooring, unloading of cargo and departure of tankers calling at the port. Arrangements for logistic services must be made through each tanker's agent. Lists of logistic services can be obtained from the Agents. Messages concerning such requirements, except in an emergency, will not be accepted by LOOP.

Vessel used to deliver bunkers and tanker supplies must be approved by LOOP. Such vessels must apply for approval in accordance with the LOOP Guidelines and Regulations covering logistical service. Lists of currently approved vessels are available from LOOP on request. No telephone service is available to the ships.

Included in tanker services that need to be arranged through tankers' agents are mail services, medical services and garbage pick-up. Garbage collection shall be in compliance with Annex V of MARPOL 73/78. There are no facilities for handling mail. *It is important that mail for tankers not be addressed to LOOP Inc.* There is no medical service on LOOP's offshore platforms. Medical service ashore, as well as helicopter service for medical evacuation, is available through the Agents.

Helicopter Transfer of Personnel and Supplies: Helicopter operations are sanctioned on tankers, subject to the Master's and the Port Superintendent's approval, for the following situations:

(a) Medical evacuation, personnel transfer and replenishment of supplies by helicopter is permitted on an individual basis. The Port Superintendent has authority to determine when conditions are not safe for such helicopter operations. Shoreside treatment for medically evacuated patients must be arranged by the tanker through the tankers' agent. LOOP will assist with communication relays for emergency medical purposes but will not act as agent.

(b) In order to facilitate decisions about the safety or feasibility of helicopter operations on tankers, LOOP advises Masters of the characteristics of any helicopters that LOOP itself dispatches.

Personnel Transportation: LOOP provides no boats for transportation of tankers' personnel to shore. When transportation is required, it must be arranged through tanker's agents. There is almost no public transportation on land from towns near the LOOP platform. Any such land transportation should also be arranged in advance through tanker's agents.

Small Boats and Visitors: No boats are permitted or authorised to come alongside tankers calling at the port except those required by LOOP or by the ship to furnish services or carry out official business, and then only after clearance from the Vessel Traffic Controller and Mooring Master.

It is strongly recommended to Masters of tankers that visitors to the ship be restricted to a minimum, because of the hazards involved. Visitors to the ship and crew are not allowed to embark or disembark by the way of LOOP's platforms or launches.

Masters of vessels are advised that decks and the ship's ladders should be well lighted and ladders should be kept well clear of the water during unloading to prohibit unauthorised persons from boarding the ship.

Cargo Documentation: The Cargo Quantity and Quality Report, which is a LOOP document, will be completed as much as possible by LOOP personnel before each tanker's arrival. After the tanker finishes discharging, the Mooring Master receives the necessary figures by radio from the Control Transfer Supervisor, so that the document can be completed before sailing. Cargo quantity is measured by representatives of LOOP by using turbine meters and provers on the pumping platform. Cargo quality is monitored by automatic sampling devices on the platform, and for accounting purposes manual tests are done on samples taken from the automatic sampler on the platform. LOOP furnishes United States Customs authorities with the necessary documentation.

Pollution: Discharge of oil or oily slops into the sea is strictly forbidden. LOOP has no facilities for receiving any oil residues or oily ballast water. Tankers wishing to offload such substances must do so elsewhere. Tankers that release oil or oily ballast water either at the SPM or in the anchorage area will be held responsible for all clean-up costs. The U.S. Coast Guard Regulations concerning water discharges at sea are contained in 33 CFR 157.25 to 157.49. Regulations in 33 CFR 159.7 require an operable marine sanitation device aboard all vessels in United States waters. For purposes of these regulations the LOOP safety zone is considered U.S. waters.

Note: All ballast and bilge overboard discharge valves are to be shut and sealed and all deck scuppers plugged while at a LOOP SPM or anchorage, although scuppers can be temporarily opened to drain off rainwater.

Safety: LOOP maintains a vigorous safety programme. The Mooring Master will discuss and review LOOP's safety requirements and procedures with tanker's Master and Chief Officer before cargo discharge begins. Coast Guard Inspectors will board all foreign vessels, at least annually, to ensure compliance with federal regulations, including Part 164, Title 33 of the United States Code of Federal Regulations, Navigation Safety.

Drug and Alcohol Policies: It is the company's belief that the use of drugs or alcohol impairs employee performance and creates unsafe working conditions, thereby posing dangers to employees, contractors, vessel personnel and to the environment. LOOP is committed to maintaining a productive and safe working environment. To that end, all LOOP employees and employees of contractors performing services for LOOP, are not permitted to consume or have in their possession any alcohol or drugs, while on Company premises. For this policy's purpose, the Safety Zone is considered to be Company premises.

Masters, whose ships are in the Safety Zone, are strongly encouraged to voluntarily follow LOOP's policy concerning consumption of alcohol and drugs by crew members, thus contributing to a safer discharge.

Customs: LOOP furnishes customs authorities with documentation of volumes and evidence of quality of cargoes received into the system based on measurements at the Marine Terminal pumping platform. Arrangement for the posting of such sureties and payment of fees or duties, and for other documentation that may be required, is the responsibility of the importer and/or operator of the tanker. The importer's customs broker, or his other authorised representative, will advise the importer regarding procedures and the amount of duty or fees levied on oil shipped through the port complex.

Storage: Procedures and charges for storage of crude oil by shippers in excess of normal residence time are covered in the Terms and Conditions of Service.

State Fees: There are presently no usage fees directly assessed by Louisiana to shippers and tankers at the deepwater port. If Louisiana imposes any fees in the future, tankers will be responsible to pay them.

Provisions: All deck and engine room stores are available in quantity. High quality fresh and frozen provisions available through Agent.

Regulated Vessels Activities: Vessel activities permitted and prohibited at the port, controls on those activities, and the specific safety zone areas in which the controls apply are set forth in 33 CFR 150.345.

	Safety Zone		
Regulated Vessel Activities	*Areas to be avoided around each PPC and SPM*[1]	*Anchorage Area*	*Remaining Portion of Safety Zone*
Tanker calling at port.	C	C	C
Support vessel movement.	C	C	C
Transit by vessels other than tankers or support vessels.	N	P	P
Mooring to SPM by vessel other than tankers or support vessels.	F		
Anchoring by vessels other than tankers or support vessels.	N	F or P	N
Fishing, including bottom trawl (shrimping).	N	P	N
Mobile drill operations or erection of structures[2].	N	N	N
Lightening/transshipment[3].	N	N	N

[1] The radius of areas to be avoided around each PPC is 600 m. and around each SPM is 500 m.

[2] Not part of Port Installation.

[3] Exception, 33 CFR 150.423(e).

Note: The person in charge of any vessel planning to enter a Safety Zone should contact the port's Vessel Traffic Supervisor on Channel 10 or 74 VHF-FM before entry and comply with that person's instructions.

Key to regulated activities:

- F – Force Majeure.
- N – Not permitted.
- C – Tanker calling at port and support vessel movements: Permitted when cleared by Vessel Traffic Supervisor.
- P – Vessels other than tankers or support vessels: Permitted when not in immediate area of tanker, clearance by Vessel Traffic Supervisor required.

Communications with Vessel Traffic Supervisor required.

For transitting foreign flag vessels, the requirement for clearance to enter the Safety Zone is advisory in nature.

AUTHORITY: LOOP Inc. (See "Operator").

LOS ANGELES, California: 33.43 N. 118.16 W.

(See Plan)

PORT LIMITS: The seaward boundary of the Port of Los Angeles is, for most purposes, the breakwater through which arriving vessels pass at Angels Gate Lighthouse.

DOCUMENTS: *First Port of Arrival (Not handled directly by Port):*

1 Complete Manifest deposited with Customs, original and traveller.
1 Complete Manifest returned to vessel (Traveller).
1 Manifest of first port cargo deposited with Customs broker.
2 Quarantine Declarations (Form PHS 43).
2 Agriculture Declarations (Form AIQ 43).
1 Visaed Crew List (Form I-418) 5 additional copies.
1 Crewman's Landing Permit (Form I-95A) for each crew member and (Form I-94) for each passenger.
1 Dangerous Cargo Manifest deposited with Captain of the Port. 1 copy in hands of Chief Officer for review by the Fire Department.

The Coast Guard Captain of the Port must be informed of vessel's ETA 24 hours prior to vessel's arrival.

Second and each subsequent Port of call in U.S:

2 Manifests of Cargo for second U.S. port left with Customs.
1 Travelling Manifest returned to Master.

(Note: Travelling Manifest is carried and deposited with Customs at final port of discharge in U.S. – in addition to above required documents 4 additional copies should be available.)

U.S. Coast Guard: The U.S. Coast Guard periodically boards foreign-flagged commercial vessels to conduct safety inspections under our Port State Control program. The goal of these safety inspections is to ensure compliance with both applicable U.S. regulations and international treaties and conventions (SOLAS, MARPOL, ICLL, ILO 147, STCW 78, etc.). Vessel documentation is checked as well as structural, propulsion, electical, steering, firefighting, navigation, pollution prevention and lifesaving requirements. In addition, the crew will be assessed based on operational tests of some of the vessel's equipment. All foreign vessels will be boarded at least annually.

Documents (to be checked by the Coast Guard):

Crew List.
Officer's Licenses (Issued by flag state).
Safe Manning Document.
Shipboard Oil Pollution Emergency Plan (SOPEP).
Ship's Particulars.

Radio Officer's Report: April 1991.

Immigration: Hand over form issued by Immigration at previous U.S. port.

Customs Broker:

1 copy Travelling Manifest.
2 copies Master's Oath (Form 1300).
2 copies Crew List (Form 1-418).
2 copies Ship's Stores List (Form 1303).
2 copies General Declaration (Form 1301).

Agriculture: Officials will board the vessel and inspect and seal stores.

Crew Signing-off: Fill in Crew Declaration (Form 5129), state only nu of suitcases and bags. Hand over 1-95A to Agent to prepare Immigr matters (together with Passport).

Crew Signing-on: Crew member to hand over Form 1-94 to Age Immigration.

PILOTAGE: Request made through Agent. Contact can be m through VHF Channel 73 (156.675 MHz). Call: KEB 260 Los Ang Pilots. Tel: (310) 732-3805. Fax: (310) 832-3811. Not less than 2 h notice of arrival or departure. 1 long and 1 short blast on ship's wh or siren, or international signal. Pilot will board in vicinity of sea-b ("LA" entrance buoy, lighted bell buoy "L.A." red and white ve stripes. Radar reflector).

Under normal weather conditions, the pilot ladder should be on starboard side 1 m. above water.

Arriving vessels should keep to Eastward of Los Angeles Sea-B

Departing vessels should keep to Westward of Los Angeles Sea-B

Masters or Agents are requested to advise the Pilot Station when there is a change in the arrival or sailing time.

Note: Ships arriving can usually make good VHF radio contact ex between Point Vicente and Point Fermin.

Shipmaster's Report: March 1994.

Vessels enroute to Los Angeles must contact "Los Angeles Pilot VHF Channel 73.

ANCHORAGES: Anchorages will be redesignated by the Coast G in June 1996 due to significant port expansion/improvement proje

Tank vessels, chemical carriers, and all ships 600 ft. LOA and are not to anchor in Anchorages F-1 to F-4 or G-1 to G-4 adjace the Federal Breakwater.

The Vessel Traffic Information Service (VTIS) controls the designa of anchorages outside the breakwater; the Long Beach Pilots contro inside anchorages.

No permit required to anchor less than 10 days. Permit for ove days obtained from Captain of the Port, USCG and Harbour Depart Port Warden. Permit is required for Explosives anchorage.

Anchorage Regulations: Reports required per U.S. Coast Guard:

(1) The Master of every vessel upon anchoring shall notify the C Guard Captain of the Port, giving vessel name, anchorage nu and time anchored.
(2) The Master of every vessel, upon departing anchorage, shall n the Coast Guard Captain of the Port, giving vessel name, ancho number, time underway and destinaton, i.e. bound for sea or b for Berth No....
(3) For the above reports, the call to the Coast Guard Captain o Port should be made on VHF Channel 16.

APPROACHES: Vessels approaching the ports of Long Beac Angeles should use the prescribed traffic separation scheme. Be ad that the traffic separation scheme has been temporarily mod pending adoption of permanent changes by the Maritime S Committee. The modification reconfigures the Western approach t Los Angeles/Long Beach precautionary area in the following man portion of the TSS separation is reduced from 2 miles to 1 mile in and merges with the existing separation zone at a slightly adjuste point; the outbound lane has been shifted 1 mile South of its pr charted location; and the precautionary area is reduced in size Eastern side. Vessel charts should be corrected as per most r Notice to Mariners for geographical positions of these changes (C required by Captain of the Port (COTP) – NOAA: 18720, 18740, 1 18749 and 18751; or British Admiralty: 899, 1063, 1081 and 10 other foreign equivalent). Large tankers should pick up the Pilo 2 miles South of the sea buoy and Pilots should have the oppo to board without excessive way on the vessel so as to have her control before entering the breakwater area. All vessels entering th should pass Eastward of the respective sea buoy and vessels out shall pass Westward of the sea buoy. The Master should use ex caution in the Precautionary Area due to proximity of outbound and numerous small craft, when at night, their lights are not distinguishable in and around breakwaters or against the backgro harbour lights. Outbound vessels should avoid setting course clearing South of the sea buoys and adjoining anchorages and b for crossing traffic.

Also see "VTS".

MAX. SIZE: Restrictions on draft only. Supertanker terminal in harbour has fairway of 51 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Alban

Foreign Quarantine: U.S. Public Health Service Quarantine S 380 World Way, Box N-19, Los Angeles International A Los Angeles, California 90045. Tel: (213) 215-2365.

Standard Procedures: Radio Free Pratique clears a vessel to ent harbour without inspection. Inspection Officer will board a vessel on the following criteria:

A. 15 days prior to entering a U.S. port, if any crew mem passenger exhibits these symptoms:
   (1) Temperature of 100° or higher for 2 days, or is accom by:
      (a) rash
      (b) jaundice or
      (c) glandular swelling
   (2) Diarrhoea severe enough to prevent performing norma
   (3) Death aboard ship.
B. Any ship visiting a plague-infested country within 60 days entering a U.S. port.
C. Any ship that has requested a Deratting Inspection/Ex Certificate.

If subject to inspection, vessel boarding hours are 060 1800 hrs., Monday – Saturday regular time. 1800 hrs. – 060 overtime, including Sundays and holidays.

Reporting or request for boarding must be relayed and rec the office 24 hours prior to a ship's arrival. Under Conditions above, the quarantine flag may be ordered flown.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph, call letters "KOK" Los Angeles Radio.

RADAR/VHF: The Los Angeles Harbour Pilot's station equipped with radar for use of Pilot and is manned 24 hours a day. The Pilots also monitor VHF Channels 14 (156.7 MHz) and 16 (156.8 MHz). Also see "Long Beach" and "Services".

VTS: *Vessel Traffic Information Service – VTIS:* A Vessel Traffic Information Service is in operation on the approaches to Los Angeles and Long Beach Harbours. Operated jointly by the U.S. Coast Guard and civilian specialists from the Marine Exchange, the VTIS provides round-the-clock information about commercial and military vessel traffic. Covered vessels are required to participate in the VTIS. The following are considered covered vessels:

1. Vessels of 300 or more gross tons that are propelled by machinery.
2. Vessels of 100 or more gross tons carrying one or more passengers for hire.
3. Vessels certified for 150 passengers or more for hire.
4. Commercial vessels 26 ft. or more in length that are towing other vessels alongside, astern or by pushing ahead.
5. Dredge and floating plants.

Key Points:

1. The 20 mile outer limit is defined by a 20 mile arc from Point Fermin (Lat. 33° 42.3' N., Long. 118° 17.6' W.).
2. There is no speed limit between the 20 mile limit and the Precautionary Area. However, ships are required to be at 12 knots or less upon entering the Precautionary Area.
3. A minimum vessel separation of 0.25 nautical miles is required in the Precautionary Area.
4. Code of Federal Regulations, CFR 33, Part 165, Sub-section 165.1109, identifies the Precautionary Area as a Regulated Navigation Area.

Upon Entering 20 Mile Outer Limit: Call the Vessel Traffic Centre (VTC, VHF Channel 14, call sign "LA Long Beach Traffic"). Provide the following information:

1. Vessel name/call sign.
2. Position, course and speed.
3. Vessel destination.
4. State whether or not taking a Pilot.
5. Estimated time of arrival to breakwater.

Decrease speed to 12 knots or less upon entry to Precautionary Area.

Upon Entering Precautionary Area: Call Vessel Traffic Centre. Provide the following information:

1. Confirm vessel speed is 12 knots or less.
2. Confirm Master is on the bridge.
3. Confirm vessel is in hand steering.
4. Contact Pilots (Channel 73 for Los Angeles or Channel 12 for Long Beach).

TUGS: On stand-by 24 hours a day. However, should be ordered prior to arrival. Tugs join vessel in main channel, tug lines used, except when towing astern.

BERTHING: Generally arranged through Agent. Berthing under control of Port of Los Angeles' Chief Wharfinger.

Whenever a vessel is scheduled, which would approach the design depth of a particular berth, the Pilot Station Management should be contacted, so that an individual judgment can be made.

SPECIALISED CARGO HANDLING FACILITIES:

Automobile Terminals:

Pasha/Honda: Berth 87 – 89.
Operated by: Pasha Properties Inc.
Contact: Bruce Peyton, Vice President of Operations, Automobile Division, The Pasha Group. Tel: (310) 832-9803.
Total land area: 25 acres (10 ha.).
Total berth length: 800 ft. (244 m.)
Vehicle manufacturerers served: American Honda Motor Co. Inc. and Acura Division.
Services offered: Complete automobile processing.

Distribution and Auto Service Inc. (DAS): Berths 195 – 199.
Operated by: DAS (at the Port of Los Angeles since 1969).
Contact: Robert L. Miller, Director of Marketing, DAS. Tel: (310) 835-6000.
Total land area: 83 acres (34 ha.).
Building size: 120,000 sq.ft. (11,148 sq.m.).
Total berth length: 2,267 ft. (691 m.).
Vehicle manufacturers served: Nissan Motor Corp. in USA, Infiniti Division, Mercedes-Benz of North America Inc., Kia Motors America Inc., Hino Diesel Trucks (USA) inc. and Mitsubishi Fuso Truck of America Inc.
Services offered: Complete automobile processing.

Auto Warehousing Co.: Berths 200A.
Operated by: Auto Warehousing Co.
Contact: Steve Rodriguez, Terminal Manager, Auto Warehousing Co. Tel: (310) 522-9555.
Total land area: 14 acres (6 ha.).
Total berth length: 736 ft. (224 m.).
Vehicle manufacturers served: Hyundai Motor America and American Suzuki Motor Corp.
Services offered: Complete automobile processing.

Breakbulk/Neobulk Terminals: Berths 54 – 55.
Operated by: Stevedoring Services of America (SSA).
Contact: John Di Bernardo, Regional Vice President, SSA. Tel: (310) 432-8100.
Total land area: 11 acres (5 ha.).
Total berth length: 1,340 ft. (408 m.).
Stevedores: SSA.
Transit shed capacity: 211,290 sq.ft. (19,629 sq.m.).
Other features: Rail access.
Shipping lines served: Lauritzen Reefers A/S and CSAV-Chilean Line.

Worldport LA: Berths 153 – 155.
Operated by: Worldport LA.
Contact: Property Management Division. Tel: (310) 732-3860.
Total land area: 13 acres (5 ha.).
Total berth length: 1,720 ft. (524 m.).
Stevedores: Optional.
Transit shed capacity: 232,525 sq.ft. (21,602 sq.m.).
Other features: Rail access.
Shipping lines served: Facility available upon request and approval.

OMNI Terminals:
Rio Doce Pasha Terminal L.P. (RDP, a limited partnership): Berth 143 – 146.
Operated by: RDP Terminal L.P.
Contact: Fred Van Deventer, Contract Administration Manager, RDP Terminal L.P. Tel: (310) 233-2000.
Total land area: 15 acres (6 ha.).
Total berth length: 2,100 ft. (640 m.).
Mode of Operation: Grounded, wheeled, palletised and chassis.
Number of cranes: Three, each with 40 long ton (41 metric ton) capacity.
Stevedore: RDP Terminal L.P.
Transit shed capacity: 200,000 sq.ft. (18,581 sq.m.).
Other features: Rail access.
Shipping lines served: Docenave and Wilhelmsen Lines (SSA).

Rio Doce Pasha Terminal L.P. (RDP, a limited partnership): Berths 174 – 181.
Operated by: RDP Terminal L.P.
Contact: Fred Van Deventer, Contract Administration Manager, RDP Terminal L.P. Tel: (310) 233-2000.
Total land area: 40 acres (16 ha.).
Total berth length: 3,300 ft. (1,006 m.).
Mode of operation: Wheeled and grounded.
Number of cranes: Two, each with 40 long ton (41 metric ton) capacity.
Stevedore: RDP Terminal L.P.
Transit shed capacity: 255,000 sq.ft. (23,690 sq.m.).
Other features: Ondock rail access.
Shipping lines served: Hyundai Merchant Marine (America) Inc., Intermarine Inc., Maruba s.c.a., Pan Ocean Shipping Co., Star Shipping (USWC) Inc. and Yukong Line Ltd.

CONTAINER HANDLING FACILITIES:
American President Lines Ltd. (APL): Berths 121 – 126.
Operated by: Eagle Marine Services Ltd.
Contact: Charles Savre, Port Manager. Tel: (310) 548-8777.
Total land area: 129 acres (52 ha.).
Total berth length: 2,000 ft. (610 m.).
Mode of operation: Wheeled and grounded.
Number of cranes: Five, each with 40 long ton (41 metric ton) capacity.
Stevedore: Eagle Marine Services Ltd.
Other features: Container freight station and maintenance and repair station.
Shipping lines served: APL, Australia-New Zealand Direct Line (ANZDL), Mitsui O.S.K.Lines Ltd. (MOL), Orient Overseas Container Line (OOCL), Philippines, Micronesia & Orient Line (PM&O Line) and Transportacion Maritima Mexicana (TMM).

Yang Ming Line (YML): Berths 127 – 131.
Operated by: Marine Terminals Corp.
Contact: Captain Derek Luo, Assistant Regional General Manager, Solar International Shipping Agency Inc. Tel: (310) 548-4629.
Total land area: 63 acres (26 ha.).
Total berth length: 1,800 ft. (549 m.).
Mode of operation: Grounded and chassis.
Number of cranes: Three, each with 40 long ton (41 metric ton) capacity.
Stevedore: Marine Terminals Corp.
Other features: Maintenance and repair facility.
Shipping lines served: YML.

Trans Pacific Container Service Corp. (TraPac): Berths 136 – 139 and 142.
Operated by: TraPac (a subsidiary of Mitsui O.S.K. Lines Ltd.).
Contact: Frank N. Pisano, Regional Vice President/General Manager, Los Angeles. Tel: (310) 830-2000.
Total land area: 88 acres (36 ha.).
Total berth length: 2,050 ft. (625 m.), with preferential assignment for an additional 1,300 ft. (396 m.).
Mode of operation: Wheeled and grounded.
Number of cranes: Four, 100 ft. (31 m.) gauge, each with 40 long ton (41 metric ton) capacity, with preferential assignment for 3 additional cranes, each also having 40 long ton capacity.
Stevedore: TraPac.
Other features: 450 reefer plugs (wheels), 48 grounded plugs, 2 portable generators that maintain an additional 64 plugs, a 28,000 sq.ft. (2,601 sq.m.) maintenance shop, a wash system for the exterior of containers, a wash system for the interior of containers, 3 transtainers, 4 side-handlers and one toplift.
Shipping lines served: Mitsui O.S.K. Lines Ltd. (MOL), Dole Ocean Liner Express, American President Lines Ltd., Orient Overseas Container Line, d'Amico Line, Italia Line and Nedlloyd Lines.

Matson Navigation Co.: Berths 206 – 209.
Operated by: Matson Terminals Inc.
Contact: Bal Dreyfus, Vice President/Area Manager, Matson. Tel: (310) 519-6501.
Total land area: 91 acres (37 ha.).
Total berth length: 2,180 ft. (665 m.).
Mode of operation: Grounded and chassis.
Number of cranes: Four, each with 40 long ton (41 metric ton) capacity.
Stevedore: Matson Terminals Inc.
Other features: Container freight station, rail-mounted Morgan cranes, maintenance and repair facility, refrigerated container wash rack, empty container handlers and tophandlers.
Shipping lines served: Matson Navigation Co., Blue Star Line, Columbus Line, CSAV, Grancolombiana Line, Navicana Line and SERPAC.

Yusen Terminals Inc. (YTI): Berths 212 – 215.
Operated by: YTI (a subsidiary of Nippon Yusen Kaisha).
Contact: Kazuo Kobayashi, President/Chief Executive Officer, YTI. Tel: (310) 548-8000.
Total land area: 104 acres (42 ha.).
Total berth length: 2,000 ft. (610 m.).
Mode of operation: Wheeled and grounded.
Number of cranes: Four post-Panamax, 100 ft. (30.5 m.) gauge, each with 40 long ton (41 metric ton) capacity, and two 50 ft. (15 m.) gauge, each with 40 long ton capacity.
Stevedore: Centennial Stevedoring Services.
Other features: 21,937 sq.ft. (2,038 sq.m.) administration/in-gate building, 23,386 sq.ft. (2,173 sq.m.) maintenance and repair building with 10 bays, 4,798 sq.ft. (446 sq.m.) marine building, 3,355 wheeled slots (including 400 reefer plugs), 20 container capacity wash rack system, 10 entry lanes with 6 scales, 4 exit lanes, vertical chassis stacking capacity (1,008), 46 hustlers, 2 top picks, 6 side handlers and 2 chassis stackers.
Shipping lines served: NYK Line, Hapag-Lloyd (America) Inc., Neptune Orient Lines Ltd. (NOL) and Pacific Shipping Ltd.

Evergreen America Corp.: Berths 229 – 236.
Operated by: Marine Terminals Corp.
Contact: Captain James Chien, Senior Vice President, Evergreen. Tel: (310) 519-6800.
Total land area: 118 acres (48 ha.).
Total berth length: 3,900 ft. (1,189 m.).
Mode of operation: Grounded and chassis.
Number of cranes: Eight, each with 40 long ton (41 metric ton) capacity.
Other features: Container freight station, maintenance and repair facility, refrigerated container wash rack, transtainers and top/side handlers.
Shipping lines served: Evergreen.

BULK HANDLING FACILITIES:
Berths 49 – 53:
Operated by: Kaiser International Corp., 411 North Harbor Boulevard, Suite 300, San Pedro, CA 90731. Tel: (310) 514-2880.
Contact: Richard E. Holdaway or James E. Holland.

Depth alongside of 51 ft. (16 m.) enables bulk carriers exceeding 100,000 d.w.t. tons to call at this dry bulk terminal. The facility can stockpile more than 170,000 metric tons of commodities, including coal and petroleum coke. Unit trains carrying coal, copper concentrates and other dry bulk products are unloaded by rotary car dumping. Petroleum coke is delivered by railcars and bottom dump trucks. Export commodities are transferred from hoppers by conveyor belt either directly to ships for export or to a rail-mounted stacker for storage. The shiploader handles 1,400 tons (1,270 tonnes) of coal an hour, moving between hatches for a spread of up to 600 ft. (183 m.). An 800 ft. (242 m.) concrete wharf supports the shiploader. Import commodities are discharged using a dock rail-mounted Whirley gantry crane and clamshell bucket. Imports are stockpiled or directly loaded to railcars or trucks.

Berth 191:
Operated by: Wilmington Liquid Bulk Terminals Inc., 401 Canal Avenue, Wilmington, CA 90744. Tel: (310) 549-0961.
Contact: Jay Johnston.

Wilmington Liquid Bulk and CPC Terminals operate a bulk cement distribution facility at this site. Built to handle up to 1,000,000 tons of cement annually in an 86,000 sq.ft. (7,989 sq.m.) warehouse, the Terminal features state-of-the-art computerisation, dust control and pneumatic conveying. Two 250 t.p.h. pneumatic Kovako units discharge up to 38,000 tons of cement from bulk carriers to either the warehouse or silo storage areas. The cement is then distributed by truck throughout Southern California. Wilmington Liquid Bulk also operates Berths 187-190.

Berths 210-211:
Operated by: Hugo Neu-Proler Co., P.O.Box 3100, Terminal Is
CA 90731. Tel: (213)775-6626 or (310) 831-0281.
Contact: Jeffrey P. Neu.

This 22 acres (9 hectares) dry bulk facility handles all grades of fer and non-ferrous scrap metal, which is transported in by truck throughout Southern California. A bulkloader is used to load cut shredded grades of scrap metal into 25,000 ton to 33,000 ton ves The onsite shredder processes approximately 900 tons of automo and light-gauge scrap metal and non-ferrous metals daily. A 2,00 onsite shear processes an additional 300 tons of unprepared h melting steel scrap. The berth has an alongside depth of 38 ft. (12

BRIDGES: *Horizontal and Vertical Clearances:* Vertical clearance given above Mean High Water (4.7 ft.).
Vincent Thomas Bridge:
Horizontal usable width (of channel): 1,150 ft.
Vertical clearance: 165 ft.
Middle 500 ft. width: Vertical clearance 185 ft.
Badger Avenue (Henry Ford) Bridge:
Replacement of the existing bridge will result in restricted or prohi use of the Cerritos Channel through January 1997. Consult the Coast Guard Aids to Navigation and Notice to Mariners.
Commodore Heim Bridge:
Horizontal clearance: 180 ft.
Vertical clearance: Bridge down – 37 ft.
Bridge up – 162 ft.
Cerritos Channel Drawbridges – Consolidated Requirements:
(The U.S. Coast Guard has consolidated the requirements for drawb operations, including Cerritos Channel, as contained in Code 3 Federal Regulations, Part 117).
(a) The draw of the Commodore Schuyler F. Heim Highway Br Mile 4.5 at Long Beach, shall open on signal, except that 0630 hrs. – 0800 hrs. and 1530 hrs. – 1800 hrs., Monday thr Friday, except federal holidays, the draws need not open fo passage of vessels.
(b) The draw of the Henry Ford Avenue Railroad Bridge sha maintained in the open to navigation position, except when a is crossing or when maintenance work is being performed.
(c) The opening signal for the Commodore Schuyler Heim Brid 3 prolonged blasts. The acknowledging signal is 2 prolonged b followed by 1 short blast when the draw will open immediately 5 short blasts when the draw cannot open immediately.
(d) If the draw of the Henry Ford Avenue Railroad Bridge is in the c position, the opening signal is 2 short blasts, followed by 1 prolo blast. The acknowledging signal is 2 prolonged blasts, followe 1 short blast when the draw will open immediately, and 5 short b when the draw cannot open immediately.
(e) Radiotelephones are installed to enable the drawtender a Commodore Schuyler Heim Bridge and the Henry Ford Av Railroad Bridge to communicate with vessels on radiotelep frequency 156.65 MHz (Channel 13), or such other frequen may be assigned by the Federal Communications Commissio

Gerald Desmond Bridge:
Horizontal usable width (of channel): 260 ft.
Vertical clearance: 155 ft.
Southern California Edison Co. – Overhead Power Cables:
Vertical clearance: 153 ft.

TANKERS: Load and discharge lines have 6 in. and 8 in. sta flanges (super-tanker terminal has 12 in. lines with standard flang not so equipped ship must furnish its own "C" clamps. Recommen have reducers on board to handle 6 in. and 8 in. flanges. Re discharge facilities available for limited quantities. All types and g of petroleum available. Also see Long Beach – "Tankers".

Berth 45 – 47:
Operated by: GATX Tank Storage Terminals Corp., 2000 Sepulveda Boulevard, Carson, California 90810. Tel: (310) 518-7
Contact: Jack Szallai.

GATX Terminals operates this facility, which is designed to h larger sized crude vessels carrying in excess of one million bar ANS and/or imported crude. The facility is located in the out Angeles Harbour, allowing vessels easier and quicker access berths. The dock features 12 in. (31 cm.) and 16 in. (41 cm.) lo unloading arms, and is capable of flow rates in excess of 35,000 per hour. The maximum draft is 512 ft. (16 m.) and the length o 898 ft. (274 m.). Pipelines from the facility connect to GATX Angeles Marine Terminal at Berth 172 and Mobil's Sou Terminal 1. GATX also operates port facilities at Berths 70 – 71 119, 120, and 171 – 173.

Berths 118 – 119:
Operated by: GATX Tank Storage Terminals Corp., 200 Sepulveda Boulevard, Carson, California 90810.
Contact: Jack Szallai.

GTX operates this public liquid bulk terminal for receiv exporting petroleum products. Featuring usable berthing length o (250 m.) and depth alongside of 36 ft. (11 m.), the fac accommodate either one large tanker or 2 smaller vessels o simultaneously. GATX uses 5 pipelines running from the 14 storage tanks, which have a total product storage capacity of barrels. Most petroleum products can be accommodated at the including oxygenates, gasolines, distillates, jet fuels, blendsto refinery feedstocks. In addition, the Terminal is directly connected to an additional 4,600,000 barrels of tankage lo GATX's Carson Terminal. GATX also operates port facilities a 45 – 47, 70 – 71, 120 and 171 – 173.

Berth 120:
Operated by: GATX Tank Storage Terminals Corp., 2000 East Sepulveda Boulevard, Carson, California 90810.
Contact: Jack Szallai.

GATX and Petrolane both utilise this berth. GATX uses Berth 120 to accommodate tankers and barges unloading/loading fuel oils, cutter stocks and bunker fuels. In addition to being pipeline-connected to Berths 118 – 119 for bunkering operations, Berth 120 is also directly pipeline-connected to GATX's 410,000 barrel Gaffey Street Terminal. Petrolane utilises Berth 120 for transporting petroleum, LNG and LPG to their 600,000 barrel tank farm adjacent to Gaffey Street. The facility features usable berthing length of 418 ft. (122 m.) and depth alongside of 35 ft. (11 m.). An LPG swivel boom, petroleum products flex hose and valve connections are used to handle cargo. GATX also operates port facilities at Berths 45 – 47, 70 – 71, 118 – 119 and 171 – 173.

Berths 148 – 151:
Operated by: Unocal, Berth 150, Pier A Place, Wilmington, California 90744. Tel: (310) 834-4691.
Contact: Frank Lopez.

Unocal operates this liquid bulk terminal primarily for vessel loading of partly or fully refined petroleum products from onsite storage tanks. Usable berthing length totals 1,344 ft. (410 m.) and depth alongside measures 35 ft. (11 m.). A pneumatically operated mast and boom derrick are used to unload cargo.

Berth 164:
Operated by: Ultramar Inc., 961 La Paloma Street, Wilmington, California 90744. Tel: (310) 834-7254.
Contact: Jim Leary. Tel: (310) 522-8828.

Operated by Ultramar Inc., this liquid bulk facility imports intermediate refining feedstocks to support the Ultramar Refinery operation nearby. Exporting of distillates and gas oils is another aspect of the operation. The berth, which has total length of 1,000 ft. (305 m.), includes frontage on Berth 163. The draft is 33 ft. (10 m.) alongside Berth 164. The facility operates round-the-clock, 365 days a year.

Berths 165 – 166:
Operated by: U.S. Borax Inc., 300 Falcon Street, Wilmington, California 90744. Tel: (310) 522-5300.
Contact: Duke D. Vetor.

U.S. Borax Inc., a wholly-owned subsidiary of the RTZ Corp., operates this bulk loading terminal to ship refined borates. The facility has a product storage capacity of 35,000 tons (31,752 metric tons), and can transfer cargo to vessels at a rate of up to 1,000 tons (907 metric tons) hourly. Maximal berthing length totals 679 ft. (207 m.). Providing an international service, U.S. Borax Inc. exports principally to Western Europe.

Berths 167 – 169:
Operated by: Shell Oil Products Co., P.O. Box 6249, Carson, California 90749. Tel: (310) 834-2638.
Contact: David M. Felger.

Shell receives petroleum products at this liquid bulk terminal, which has a wharf of 1,249 ft. (380 m.), usable berthing length of 1,310 ft. (400 m.), depth alongside of 38 ft. (12 m.) and a dolphin. Five derricks, equipped with nine 35 ft. (11 m.) booms, are used to handle petroleum. In addition, the facility features 11 storage tanks with a total product storage capacity 530,000 barrels on a 10 acres (4 hectares) site adjacent to the berths.

Berths 171 – 173:
Operated by: GATX Tank Storage Terminals Corp., 2000 East Sepulveda Boulevard, Carson, California 90810. Tel: (310) 518-7700.
Contact: Jack Szallai.

GATX operates this public liquid bulk terminal to receive and export crude, refinery feedstocks, black oils, and bunker fuels. The facility has 18 storage tanks with a total product storage capacity of 980,000 barrels, as well as 1,412 ft. (430 m.) of usable berthing length and 35 ft. (11 m.) of depth alongside. In addition to handling full-size vessels, the terminal can also accommodate barges that are loaded for bunkering. The terminal is also directly pipeline-connected to an additional 4,600 barrels of tankage located at GATX's Carson Terminal. GATX also operates port facilities at Berths 45-47, 70-71, 118-119 and 120.

Berths 187 – 190:
Operated by: Wilmington Liquid Bulk Terminals Inc., 401 Canal Avenue, Wilmington, California 90744. Tel: (310) 549-0961.
Contact: Jay Johnston.

Wilmington Liquid Bulk stores and ships cargo at this public terminal, which features a draft alongside of 45 ft. (14 m.), pipeline access, truck receiving facilities and a rail link. In addition, the liquid bulk terminal has 83 storage tanks with a total product storage capacity of 2,500,000 barrels, including lube oil, diesel fuel, caustic soda and vegetable oils. The company also operates a cement handling facility at Berth 191.

Berths 238 – 240C:
Operated by: Mobil Oil Corp., 3700 190th Street, Torrance, California 90509. Tel: (310) 212-1743.
Contact: John Sisk.

Mobil operates this 17 acre (7 hectare) liquid bulk terminal, which is connected by pipeline to a 21 acre (9 hectare) tank farm. With 2,621 ft. (799 m.) of water frontage, the facility handles tankers and barges transporting crude oil, as well as finished and semi-finished petroleum products. The berths serving tankers have an alongside depth of 35 ft. (11 m.), and the berths handling barges have an alongside depth of 35 ft. (11 m.).

CRANES: *Barge Cranes:* 1×350 tons capacity (Manson Construction).
STEVEDORES: Agents make necessary arrangements.
MEDICAL: Necessary to notify Agents of required medical attention: this can be done when final ETA is determined. Hospital facilities available (private).

Vaccinations/fever certificates, etc., shall conform with rules and models prescribed by the International Sanitary Regulations.

DENSITY: Average density 1026 (exception during or after heavy rain).
FRESH WATER: Availability unlimited, delivery universal, rate of delivery 100 t.p.h.
FUEL: Unlimited fuel, all grades at attractive rates. 48 hours' advance notice generally required.
FIRE PRECAUTIONS: Whenever vessel bunkering, sufficient serviceable fire hose with suitable nozzles attached to reach all parts of vessel shall be connected to fire main on vessel and made ready for instant use at all times during bunkering operations. If no adequate water pressure available on board, connections shall be made to shore lines to obtain adequate pressure. All tankers shall be moored bow seaward and have wire towing pendants rigged fore and aft readily available for emergency use, fire hoses shall be connected as above at all times while vessel in port.

International fire signals will be used in case of fire (5 prolonged blasts of ship's whistle or siren of 4 to 6 seconds duration).
CONSULS: See "Long Beach".
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock 559 ft. by 110 ft., 22,000 displacement tons.
SURVEYORS: ABS, Det Norske Veritas, Lloyd's Register and NKK. SGS, Toplis and Harding Inc., and many other marine surveyors available.
GANGWAY/DECK WATCHMEN: Gangway watch recommended. Tankers and vessels handling dangerous cargo required to have gangway and deck watch.
OPENING/CLOSING HATCHES: Automatic hatches may be opened and closed by crew, manual hatches opened and closed by stevedores.
CERTIFICATES: *All Vessels:*

Certificate of Financial Responsibility (COFR) required. May be obtained from the National Pollution Funds Centre (Arlington, Virginia).

International Oil Pollution Prevention Certificate.

Cargo Vessels:

Safety Construction Certificate.

Passenger Vessels:

May have a Passenger Ship Safety Certificate vice Safety Construction, Safety Equipment and Safety Radio Certificates.

Tank Vessels:

Tank Vessel Exam Letter for Oil Carriers.

Letter of Compliance with Sub-chapter "O" Endorsement for chemical carriers.

Must have a Coast Guard Headquarters approved Tank Vessel Response Plan geographic-specific appendix for Los Angeles-Long Beach.

CUSTOMS ALLOWANCES: Tobacco, either 300 cigarettes, 50 cigars, or 3 lb. of smoking tobacco, for the personal use of crew member. Wine and/or spirit, 1 quart for personal use of crew member.
CARGO GEAR: Gangway net attached between ship and dock; extending 5 ft. beyond turntable in one direction and 5 ft. beyond point of intersection of gangway and stringpiece in the other direction. Preventer guy must be rigged separately to head of boom from working guy. Exception if cast head of boom is capable of withstanding the stress of all the lines attached thereto. (This is a West-Coast requirement.)
REPATRIATION: Arrangements can be made through Immigration on request of Agent to have crewman change ship or return to home port.
AIRPORT: Approximately 20 miles to International Airport which serves all major airlines.
TIME: Standard Time, GMT minus 8 hours. Daylight saving time GMT minus 7 hours (April through October).
HOLIDAYS: Cargo may be worked on holidays with holiday pay scale.
POLICE/AMBULANCE/FIRE: The telephone numbers are Fire (213) 832-4241, Police (213) 832-7211, Ambulance (213) 832-4243. Fire Alarm boxes adjacent to all cargo sheds. Emergency number is 911.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Rescue Co-ordination Centre. Tel: (310) 980-4444, 1-800-221-USCG.
TELEPHONES: For passenger vessels at passenger terminals only.
SERVICES: A ship-reporting service "The Marine Exchange" located at Angels Gate Park near Los Angeles Harbour.They monitor Channels 14 (156.7 MHz) and 16 (156.8 MHz) VHF and have Channel 9 (156.45 MHz) VHF as their own. Primary duties are reporting arrivals, departures and locations of vessels.
BANKS: Over 50 international banks.
SHIP SUPPLY SERVICE: The port is served by numerous ship suppliers offering a wide range of services.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: 1 crewman's landing permit (Form I-95A) or Immigration card (Form D-1).
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

This service is provided by the terminal operators, who should be able to provide details on request.
WASTE OIL DISPOSAL: This service is provided by the terminal operators, who should be able to provide details on request.
SEAMAN'S CLUBS: Worldport LA, The Port of Los Angeles, produce a small booklet – Mariners Guide – detailing the facilities available to seafarers, including seafarers centres, public transportation, and a port map amongst others.

There follows a list of the seafarers centres from whom further information can be obtained:

Seafarers' Communications Center, World Cruise Center, Berth 93A-Cargo Mezzanine. Tel: (310) 832-2964.

Seamen's Church Institute, 101 West 11th Street, San Pedro, CA 90731. Tel: (310) 832-2563.

Norwegian Seamen's Church, 1035 South Beacon Street, San Pedro, CA 90731. Tel: (310) 832-6800.

Swedish Seamen's Church, 1035 South Beacon Street, San Pedro, CA 90731. Tel: (310) 832-6800.

International Seafarers Center, 120 South Pico Avenue, Long Beach, CA 90802. Tel: (310) 432-7560.

REGULATIONS: Permits required for hot work (welding, cutting, etc.). Permit required for any dangerous cargo. Permit to discharge ballast (clean water) required. Restrictions on bunkering operations (scuppers plugged, valves closed). No bunkering or lightering outside the Federal Breakwater.
DELAYS: No delays in berthing, load or discharge or bunkering can be expected.
DEVELOPMENTS: Pier 300/400 Dredging and Landfill Project: Much of the Los Angeles side of San Pedro Bay will be filled in to create 220 new acres of container, tank farm and dry bulk facilities.

The Los Angeles Main Channel has been altered within the breakwater due to this project. The Coast Guard has designated a safety zone around this area which is marked with platforms and buoys. No vessel may enter this safety zone (see Title 33, Code of Federal Regulations, Part 165.1110 for specific boundaries) without the permission of the U.S. Coast Guard Captain of the Port.
AUTHORITY: Port of Los Angeles, P.O.Box 151, (425 S. Palos Verdes Street), San Pedro, California 90733-0151. *Tel:* (310) 732-3840. *FAX:* (310) 831-0439. *Contact:* Ezunial Burts, Executive Director.

MANITOWOC, Wisconsin: 44.06 N. 87.38 W.

LOCATION: Situated on the Western shore of Lake Michigan, 70 miles North of Milwaukee. Port open all year round.
DOCUMENTS: Vessels cleared by Quarantine Officials at Quebec. Customs Officer stationed at Green Bay.
PILOTAGE: Not locally required or available. Pilots should be taken on board prior to entering harbour.
MAX. SIZE: Max. draft 21 ft., vessels up to 600 ft. LOA can berth.
HEALTH: See "Documents".
TUGS: Not available.
BERTHING: 2 breakwaters protect the harbour. Entrance dredged to 25 ft. Outer harbour from pier heads to inner red light dredged to 23 ft. Inner harbour up to Medusa Cement Company dredged to 21 ft. Maximum depth alongside docks, 19 ft. Turning basin, 600 ft. radius.

All berths owned by private industry and located as follows from harbour entrance:

1. Manitowoc Public Utilities: 2 slips capable of handling 400 ft. car-ferries which handle railroad freight cars or Ro/Ro vehicles. Located port side at a right angle to river channel South side of harbour.
2. C. Reiss Coal Company, 509 Jay Street: A 900 ft. slip just inside car-ferry docks, at a right angle to river channel, South side of river.
3. Manitowoc Company Inc., 500 South 16th Street: 800 ft. long. South side of channel, parallel docking.
4. Busch Agricultural Resources Inc., 605 Washington Street: 490 ft., South side, has marine leg for unloading grain.
5. McMullen & Pitz Construction Company, 901 Commercial Street: 300 ft. North side of river between 8th and 10th Street bridges.
6. Soo Line Railroad Company, 923 Commercial Street: 300 ft. North side of river just above 10th Street bridge. This includes an unused car-ferry slip capable of handling a 400 ft. car-ferry. Also, 600 ft. North side just above car-ferry dock but is unimproved.
7. Manitowoc Company Inc., 500 South 16th Street: Approximately 8 berths varying in length from 180 ft. to 850 ft., port side bordering the peninsula.
8. Medusa Cement Company, 1801 Spring Street: Final large dock upriver, 1,200 ft. starboard side.
9. Consumers Steel & Dock, 1311 Spring Street: 330 ft. starboard side just prior to Medusa dock.

CRANES: Manitowoc Company Inc.: One fixed crane max. 80 tons lift. Travelling crane max. 70 tons lift.
BRIDGES: Operating regulations in effect. Contact City Police or the Harbour Master in advance.
DENSITY: 1000.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Can be undertaken by Bay Shipbuilding Co.
DRY DOCKS: Floating dock available. Length 604 ft., width 70 ft., depth over blocks 13 ft., max. LOA 640 ft. – Bay Shipbuilding Co., Sturgeon Bay, Wis.

Bay Shipbuilding Co. have a drydock which will accept vessels of 1,000 ft. LOA and 35,500 gross tons. Depth over sill 17 ft.
SURVEYORS: Lloyd's Surveyor available from Cleveland.
AIRPORT: Manitowoc County. N.W. side of City off Monasha Avenue. Simmons Airlines, commercial feeder line, passenger and freight.
TIME: GMT minus 6 hours.
GARBAGE DISPOSAL: Daily operation with 2 containers. Contact: Manitowoc Disposal. Tel: (414) 682-7758.
WASTE OIL DISPOSAL: Contact Manitowoc Fire Department. Tel: (414) 683-5421.
SEAMAN'S CLUBS: None.
AUTHORITY: City of Manitowoc, Harbour Commission, 817 Franklin Street, Manitowoc, Wisconsin 54220, U.S.A. *Tel:* (414) 683-4550. *Contact:* E. Steckmesser, Harbour Master. Tel: (414) 682-8349.

METLAKATLA, Alaska: 55.08 N. 131.35 W.

LOCATION: Located on Annette Island. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Ships coming up from the Hecate Straits or outsi Graham Island proceed into Dixon Entrance to the vicinity of McCartey where the Pilot will meet them. Vessels coming up the passage from Vancouver, B.C. are met at Lucy Island Pilot Statio
ANCHORAGES: Good anchorage in gravel and mud.
RESTRICTIONS: Usually daylight berthing only.
MAX. SIZE: Depths in harbour 120 ft. Tides: diurnal range – 14 Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany
AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban
CUSTOMS: Quarantine, Immigration and Customs, from Ketchika
VHF: Harbour Master monitors Channel 16.
TUGS: Available in Ketchikan. A minimum of 2 tugs required for be and unberthing. Arrangements made with Pilot from Ketchican.
BERTHING: 2 berths:

1. City Dock: 400 ft. long and 60 ft. wide. More than 35 ft. deep to shallow water at East end, a starboard landing is usually made covered storage, temporary open sto 4 fork lifts, 2 of 20,000 lb. capacity.
2. Annette Island Canning Co.; 200 ft. long and 23 ft. deep. crane and 2 forklifts. 1×25 ton forklift.

CRANES: No Port Authority cranes.
STEVEDORES: 4 gangs available.
MEDICAL: Hospital available in Ketchikan; small clinic in Metlaka
SUPPLIES: Bonded and unbonded stores from Ketchikan.
FRESH WATER: Available.
FUEL: Not available.
REPAIRS: Facilities at Ketchikan.
SURVEYORS: Cargo Inspectors and Surveyors available in Ketch
AIRPORT: Small charter plane only. Jet to Juneau and Seatt Ketchikan Airport only.
EMERGENCY CO-ORDINATION CENTRE: At Ketchikan.
BANKS: National Bank of Alaska.
STORING: See "Prelims".

1. By truck.
2. Yes.
3. Yes.
4. Yes.
5. None.
6. Yes.

DEVELOPMENTS: New state ferry pier under construction.
AUTHORITY: Port of Metlakatla, P.O.Box 434, Metlakatla, 99926. *Tel:* 886-4646. *FAX:* (907) 886-3124. *Contact:* Bruce G Harbour Master. *Tel:* 886-3531 (Residence).

MIAMI, Florida: 25.46 N. 80.10 W. (See

PORT LIMITS: The Miami Harbour embraces the artificial basins and channels that have been dredged along the bay front of Miam in the bay and through the shoal water of Biscayne Bay to the and is located generally at Lat. 25° 46' N., Long. 80° 10' W.
Administration: The Port of Miami is a "non-operating" port, tax owned and administered by the Seaport Department, a func Metropolitan Dade County Government. Permanent facilities are to port users and operators. All equipment (except the gantry is owned and operated by private companies. The gantries are operated under Seaport Control. Berth space is authorised by Director, and scheduled by Seaport Operations. The U.S. Coast serves as Captain of the Harbour.
Physical:
Total port land area: 650 acres (263.07 hectares).
Total lineal dimension: 30,000 ft. (9.144 km.).
Bulkhead berth space: 16,440 ft. (3.1 miles) (4.98 km.)
Dodge and Lummus Islands connected by two-lane partial, tem connecting causeway.
DOCUMENTS:
Customs: All foreign and "in bond" goods entering the Port/Cou subject to Customs examination and duty. Manifest of foreig inbound must be presented to the Customs Boarding Officer commencing discharge.

Ship's Agent must notify Customs 2 hours prior to the ship's Regular working hours, Monday through Saturday 0800 - telephone 536-5261. Outside normal working hours, telephone 526-2305; overtime is charged.
Forms required:
2 Master's Oath on Entry of Vessel in Foreign Trade Form
2 General Declaration Form
2 Ships Manifests Form
2 Ship's Stores Declaration Form
2 Crews' Effects Declaration Form
Crew Members' Declaration Form
(1 Declaration for each Crew member)
1 Application -- Permit – Special Licence Form
(Unloading, loading, overtime services)
2 Passenger Lists Form
2 Crew Lists Form
Customs Declaration (Passengers) Form 6
(1 Declaration for each family)
2 Declarations of foreign repair to vessels Fo
(U.S. flag vessels only)

Immigration: An Immigration Inspector will meet all ships entering port. Valid travel documents/passport/visa/entry permit are required in some cases.

Ship's Agent must notify Immigration at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone 350 – 5739. Outside normal working hours, telephone contact 526 – 2626; overtime is charged.

Forms required:

Crewmen's Landing Permit	Form I – 95
Alien Passengers' Landing Permit	Form I – 94
Passenger List	I – 418
Crew List	I – 418

PILOTAGE: All vessels with a draft of 7 ft. or more are required to take a Pilot who boards near the Outer Sea Buoy, 2.5 miles offshore.

Request Pilot through Biscayne Bay Pilots Association, 24 hours in advance, call sign KGW 303, VHF Channel 16, direct from ship or through vessel's steamship Agent accompanied by particulars of draft and berthing assignment. Ship to confirm on VHF Channel 16 one hour prior to arrival. Channel 16 is monitored 24 hours and station can monitor VHF Channels 10, 12 and 14. Ship may cable Pilot Station direct through RCA Radio Lantana, Florida, call sign, Miami Pilots. Estimated time of departure should be made when ship docks and must be confirmed by phone (375-9453) 1 hour prior to the Pilot boarding.

ANCHORAGES: The prescribed anchorage area for vessels anchoring outside the harbour is located Eastward of a line about 1.5 nautical miles offshore and Northward of a line about 0.2 miles nautical miles North of the sea buoy at the entrance to the ship channel. The entire anchorage area lies North of the entrance channel to Miami. The Northern and Southern extremities of this area are marked by spar buoys. Vessels desiring to anchor off the entrance to the Harbour of Miami are required to do so within this area, to avoid possible damage to cables laid on the ocean bottom in the vicinity. Refer to anchorage area 202.188 on Coast and Geodetic Survey Chart No. 547.

RESTRICTIONS: *Locations:* Main Turning Basin: Lat. 25° 47' N., Long. 80° 11' W. Sea Buoy and Channel Entrance: Lat. 25° 46' N., Long. 80° 06' W. (approx.).

Channels, Turning Basins: The main channel is marked by 2 sea buoys about 2 miles (3.38 km.) East of the port, at the Western fringe of Gulf Stream shipping lanes. From that point, at which the depth is 44 ft. (13.41 m.), the channel runs 1.02 miles (1.65 km.) at 256° magnetic to a bend, changing to a control depth of 42 ft. (12.80 m.) and turning to 296° for 3.64 miles (5.82 km.), terminating in a 1,700 ft. (518.16 m.) (along North-South axis) by 1,650 ft. (502.92 m.) (East-West) turning basin. MLW depth in the main channel, at Northside berths and in the turning basin, is 36 ft. (10.96 m.). At a distance of 1.3 miles (2.08 km.) from the entrance channel bend at the outer bar cut, the Fisherman's Channel (South Channel) branches off due West for 1.01 miles (2.69 km.), then turns parallel to the main channel for another 1.01 miles, then turns to 247° for 1,500 ft. (467 m.) to intersect the Intracoastal Waterway. Depth along the entire Fisherman's Channel is 25 ft. (7.62 m.), except for the Easternmost 3,300 ft. (975.36 m.), where it is 42 ft. deep. Width of the main channel is 400 ft. (121.92 m.) from the sea buoys, for 3.65 miles (5.84 km.), and 900 ft. (247.32 m.) wide along Dodge Island and into the main turning basin. Width of Fisherman's Channel is 500 ft. (152.4 m.) along its entire length.

MAX. SIZE: No limit to length at port complex. Dodge Island has 4,300 ft. (1,310.64 m.) of lineal berthing space for general cargo, quarter ramp and side ramp vessels plus 4,740 ft. (1,444.75 m.) for 10 Ro-Ro berths at MLW depths from 25 ft. (7.62 m.) to 36 ft. (10.97 m.). Lummus Island container berth has 4,500 ft. (1,371.5 m.) of berthing with a MLW depth of 42 ft. (12.80 m.).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

Ship's Agent must request quick clearance, "Pratique", from United States Public Health Department.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

An Agriculture inspector will board all foreign, coastwise and domestic ships on arrival.

Ship's Agent must notify Agriculture at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone contact 536-4758. Outside normal working hours, telephone contact 526 – 2821; overtime is charged.

Forms required:

1 copy of Cargo Manifest.
1 Report of Ship's Stores and Port of Origin.

Forms provided by and filled out by the inspector:

Cargo Form 212
Boarding Report 288

RADIO/VHF: The Coast Guard and Pilot Station can be raised on VHF Channel 16. Telephone contact to Agents, receivers, etc., can be made via Miami Marine Operator.

Port of Miami maintains a guard on VHF Channel 16, call letters "KCE 254".

TUGS: Large tugs up to 3,000 h.p. available 24 hours per day. Request tug service via Pilot Station.

Captain Dan's Marine Towing & Salvage, 3177 N.W. 26th St., Miami, FL 33155. Tel: 305-532-5844.

Coastal Tug & Barge, Inc., P.O.Box 025500, Miami, FL 33102-5500. Tel: 305-551-5380. Fax: 305-220-0224.

Florida Marine Towing Co.Inc., 1201 N.W. South River Drive, Miami, FL 33125. Tel: 305-324-4242. Fax: 305-324-8451.

Moran Towing of Miami Inc., 1001 N. America Way, Suite 105, Miami, FL 33132. Tel: 305-375-0455. Fax: 305-375-0161.

BERTHING: Berths are all marginal berths, no piers or slips. 16,440 ft. at MLW depths of 25 ft. (7.62 m.) and 42 ft. (12.8 m.). Large ships are able to turn at berthside in the 900 ft. (274.32 m.) wide main (North side) channel or may continue into the 1,700 ft. (518.16 m.) × 1,650 ft. (502.89 m.) turning basin. The new (Fisherman's Channel) South Channel is 500 ft. (152.40 m.) wide and 42 ft. (12.80m.) depth at the Eastern end for a distance of 3,500 ft. (1,066.8 m.) and continues Westerly at a depth of 25 ft. (7.62 m.) for its remaining 10,000 ft. (3,048 m.) with 3 turning basins: one at the confluence with the main channel, one midway and one (under construction) at the Western junction with the Intracoastal Waterway. There are 10 Ro-Ro berths for bow and stern loading vessels. Lummus Island container berth at port's Eastern end is 4,500 ft. (1,371.5 m.) long with a MLW depth of 42 ft. (12.80 m.). (Note: 42 ft. plus 1 ft. overdredge from Government Cut to West of Container Berth No. 3; 44 ft. plus 1 ft. overdredge from Government Cut out to Sea Buoy. 1,200 ft. diameter turning basin East of Lummis Island).

Notes:

1. Ship's berths are noted with bay numbers that begin at the N.W. corner of Dodge Island. Bay numbers increase in a clockwise direction around the port in increments of approx. 125 ft./bay.
2. Bulkheads are concrete capped, steel sheet pile with 7.5 ft. minimum height above MLW. Apron areas are asphalt paving over compact fill or re-inforced concrete decking on piling.

Cold Storage Cargo: Current port facilities provide in excess of 50,000 sq.ft. of refrigerated space. In addition, there are approximately 600 reefer outlets throughout the port.

Commercial Warehouses: Ample on the mainland. On Port, 81,754 sq.m. in 7 modern transit cargo buildings.

CRANES/EQUIPMENT: *Container Cranes:* 7×50 long tons (50 MT) with spreader, 70 long tons (71.12 MT) with hook and beam; 3×40 long tons (30.64 MT) with spreader, 45 long tons (45.72 MT) with hook and beam.

Mobile Truck Cranes: 1×225 ton American; 2×200 ton American; 1×150 ton Lorain; 1×110 long ton Gottwald mobile container crane; 1×200 ton linkbelt portable crane.

Handling Equipment:

1×170,000 lb. (77,112 kg.) Hyster port packer.
2×90,000 lb. (40,824 kg.) Rago-Wagner port packers.
12×85,000 lb. (38,556 kg.) Taylor port packers.
1×80,000 lb. (36,288 kg.) reach stacker P&H.
1×80,000 lb. (36,288 kg.) reach stacker Kalmar.
2×80,000 lb. (36,288 kg.) Mitsubishi.
3×80,000 lb. (36,288 kg.) Kalmar.
3×70,000 lb. (31,752 kg.) Rago-Wagner port packers.
7 Fantuzzi empty container stackers.
1×70,000 lb. (31,752 kg.) Hyster forklift.
1×70,000 lb. (31,752 kg.) silent hoist forklift.
2×62,000 lb. (28,123 kg.) Taylor forklifts.
1×60,000 lb. (27,216 kg.) Apache forklift.
1×52,000 lb. (23,587 kg.) Taylor forklift.
1×45,000 lb. (20,412 kg.) Taylor forklift.
1×30,000 lb. (13,608 kg.) Taylor forklift.
1×30,000 lb. (13,608 kg.) Clark forklift.

Plus approximately 125 smaller forklifts, 3,000 lb. to 30,000 lb. capacity.

BRIDGES: There are no bridges between the open sea and the port, or the Miami River. The new South Channel provides direct access from shipping lanes and the river, as well as all berthing on the seaport's South side. A highway and rail bridge spans the Intracoastal Waterway between the island seaport and the mainland. Only smaller ships enter the Miami River, which is dredged to 15 ft. at HW and is 150 ft. wide for a distance of 3 miles above entrance. A bridge about 0.5 miles from entrance is closed from 0700 hrs. to 0900 hrs. and 1600 hrs. to 1800 hrs. local time.

STEVEDORES: All receiving, recording, moving, loading and discharge of cargo is performed by the stevedoring companies. They employ longshoremen members of the International Longshoremen's Association (I.L.A.). Normal working hours 0800 – 1700. Overtime is charged for Saturdays, Sundays, and holidays. Port open 24 hours per day.

Contract Stevedores at the Port:

Continental Stevedoring & Terminals Inc., 655 Asia Way, P.O.Box 015269, Miami, Florida 33101. Tel: (305) 379-3700. Fax: (305) 371-9969. Telex: 514901. Contact: Carlos Arocha.

Florida Stevedoring Inc., 125 N.E. 9th Street, P.O.Box 01-1254, Miami, Florida 33132. Tel: (305) 373-4765. Fax: (305) 374-7231. Telex: 519154. Contact: Jorge Rovirosa, Frank Rovirosa III.

Oceanic Stevedoring Co., 1007 North America Way, Miami, Florida 33132. Tel: (305) 374-6400. Fax: (305) 381-6512. Telex: 807063. Contact: Don Quinn, Dan Quinn.

I.T.O. Corp. of Florida, 1007 North America Way, Suite 310, Miami, FL 33132. Tel: (305) 381-9624. Fax: (305) 381-9741. Contact: Christopher C. Morton.

Universal Maritime Service Co., 1007 North America Way, 4th Floor, Miami, Florida 33132. Tel: (305) 371-5308. Fax: (305) 358-5106. Telex: 3767556. Contact: Mark Baker.

MEDICAL: Clinics available.

TANKERS: No slop (residue) discharge facilities in the Port.

Private facility: Coastal Fuels, Fisher Island – No slop (residue) discharge facilities. One tanker berth available, 760 ft. Max. draft of 34 ft. at MLW. No special fittings required. Telephone contact 672-1065.

Report: Cautionary Advice – Approaches: All approaches to the Sea Buoy should be made from the East to avoid shoal areas to the North and South of the Entrance Channel. The Gulf Stream current running to the North may be felt just outside the Sea Buoy. A counter current usually sets to the South in the vicinity of the Sea Buoy and Southbound traffic is usually encountered 1 mile off the Sea Buoy.

Miami has numerous passenger ships calling at this port. Most movements between Sea Buoy and berths take place between 0500 to 0700 hrs. and again at about 1700 hrs.

Care must be taken to carefully identify each navigation light to avoid mistaken identity with bright lights along the coast.

Vessels may anchor to the Northward of the Sea Buoy outside the 50 ft. depth line.

Entering and Berthing: Vessel should have full manoeuvring power available and competent helmsman at the wheel. The currents around Fisher Island are strong (3 to 4 knots reported), and the ebb tide runs from a direction of 270° at the berth to approximately 300° in the Main Channel. Ranges and buoys are used to identify channel limits. The Outer Channel is 500 ft. wide and the Main Channel starting between the jetties narrows to 400 ft. The distance between Sea Buoy and Fisher Island is 4.5 miles.

The draft of a tanker berthing at Fisher Island is limited due to depth limitation at the berth and just offshore of the bow and stern areas of a vessel in the berth. (See "Plan").

Berthing is limited to beginning of ebb tide period in order to take advantage of higher water level as well as to stem the outgoing tide. The ship is difficult to control in the Turning Basin off the berth with a strong current running. Unberthing is carried out during flood tide when current is weak.

The berth at Coastal Oil Terminal has a total berthing face of 700 ft. with a total of 8 pier bollards spaced 100 ft. apart. The ship berths port side to the pier.

Gangway: There is no pier gangway available. There is ample room on the pier deck for the ship's gangway.

FRESH WATER: Available every 240 ft. at Port of Miami, Dodge Island and at Container Berth, Lummis Island. Delivered via hose.

FUEL: All grades; bunker, intermediate and marine gas oil, Diesel, bunker C. Ships fuelled at dockside from Coastal Fuels barges.

All deliveries in both ports are made by barge.

FIRE PRECAUTIONS: Usual safety precautions on smoking, flying "B", mooring pendant available, ample persons aboard to fight fires, fire hose led out, etc.

Coastal Fuels tugs equipped with fire fighting equipment.

CONSULS: (Area Code 305).

CURRENCY: U.S. Dollar. No restrictions placed on seafarers.

AUTHORITY: Port of Miami, 1015 North America Way, Miam 33132, U.S.A. *Tel:* (305) 371-7678. *FAX:* (305)

Contact: Mr. Carmen J. Lunetta, Port Director.

MILWAUKEE, Wisconsin: 43.01 N. 87.53 W. (See Plan)

PORT LIMITS: The Port of Milwaukee limits are generally considered to be the harbour breakwall housing the harbour entrance lighthouse. However, unless specifically declared to the contrary in the covering charter party, a vessel will be considered an "arrived ship" upon anchoring outside the harbour breakwall, in the event that a proper berth and/or anchoring space inside the harbour breakwall is not available.

DOCUMENTS:

Vessels from Canadian ports:

Dominion clearance and Public Health Pratique (both issued at Montreal).

Vessels from all other nations:

Inward Foreign Manifest(s)
Stores Lists, over Master's oath.
Curio Lists, over Master's oath.
Permit to Lade and Unlade.
Discharge Manifest.
Inspection by U.S. Dept. of Immigration (Crew List).
Inspection by U.S. Dept of Agriculture.
Receipt of Entrance fee.
Receipt of Tonnage Tax.

Additional documents may be required, dependent on commodity involved in the carriage, point of origin, flag or any unusual circumstances existing.

PILOTAGE: Pilot boards at Montreal and at several other stations along St. Lawrence Seaway route.

ANCHORAGES: The chart does delineate anchorage area for large vessels and shows the 27 ft. depth just East of South Piers 1, 2, and Liquid Cargo Pier. This deep area, about 2,400 ft.×5,400 ft., used by large vessels for anchorage.

MAX. SIZE: 730 ft. × 78 ft. with 26 ft. F.W. draft. No tidal effect, although lake levels vary seasonally. Minimum depth above low water level 27 ft.

HEALTH: See "Health: All Ports" before first U.S. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station at Port Administration Building. Harbour Master and Dock Superintendent can be reached at this facility Monday through Friday between 0800 and 1630 hrs.; 156.8, 156.6 and 156.5 MHz.

TUGS: Normally pick up vessel inside breakwater. Tugs optional at discretion of ship's Master. Fee for use of tug's lines.

BERTHING: The time of passing harbour entrance lighthouse establishes order of berthing, provided vessel is ready to work.

BRIDGES: No bridges are transited, except to smaller, shallow draft (22 ft.) private docks up river. This portion of the harbour generally reached only by small Laker vessels and barges. Bridges closed between 0730 hrs. and 0830 hrs. and 1630 hrs. and 1730 hrs. except on Sundays and 8 legal holidays. In addition, 2 hours' notice required for opening bridges across Milwaukee River North of and including Buffalo Street.

SPECIALISED CARGO HANDLING FACILITIES: In addition to the 3 general cargo terminals of approx. 340,000 sq. ft. covered area (9 berths), and dry bulk terminal, the port is served by a refrigerated warehouse of 10,000 sq. ft.; 1 open dock area (2 berths) for handling bulk commodities such as pig iron; 1 open dock (3 berths) for heavy lifts and equipped with a 220-ton stiff leg crane and 2 gantry cranes of 70 and 50 tons; 1 liquid cargo pier for edible and inedible fats, greases and allow; 2 grain elevators of 3.5 million and 2.5 million bushel capacity and 2 scrap iron loading facilities. The port is also equipped with a mobile heavy lift/container crane, of 200 tons capacity, capable of serving all berths.

STEVEDORES: Vessel should provide a stowage plan, manifest of nbound cargo and exceptions list (unusual vessel or cargo characteristics affecting facilitation of cargoes). Vessel should comply with the U.S. Dept. of Labor's safety regulations.

MEDICAL: Advance notice desirable. Hospitalisation available.

TANKERS: Diameter of load lines and discharge lines 8 in. and 10 in. Slop residue facilities. 4 berths available, with draft to seaway depth.

FRESH WATER: Potable water available at most berthing areas.

FUEL: All grades of fuel oil available by truck delivery at shipside, also 24 hour refueling berths available for bunkering.

CONSULS: The following countries are represented:

Belgium	Dominican Republic	Norway
Costa Rica	France	Sweden
Denmark	Nicaragua	Yugoslavia

REPAIRS: Full service repairs, except large vessel dry docking.

GANGWAY/DECK WATCHMEN: Not necessary, but available on request.

OPENING/CLOSING HATCHES: At the option of ship.

CERTIFICATES:

Registry of Ship.
Master's Licence.
1st, 2nd and 3rd Officer's Licences.
Radio Licence.
Wireless Operator's Licence.
Derat Certificate (done each year).

(Additional certificates may be required, dependent upon Registry, cargo, trade route engaged in, nationality of crew, etc.).

CUSTOMS ALLOWANCES: Tobacco, 10 packages or 200 cigarettes in possession at any time. Wine and/or Spirits, 1 bottle per officer.

REPATRIATION: Local Agents effect repatriation.

AIRPORT: 5 miles distant.

TIME: U.S.A. Central Time. Central Daylight Time from early April to late October – 5 hours behind GMT. Central Standard Time from late October to early April – 6 hours behind GMT.

HOLIDAYS: Memorial Day, Columbus Day, Veterans Day, July 4th (if on a Sunday, Monday is a holiday); First Monday in September; Fourth Thursday in November; Christmas Day; New Year's Day. Cargo can be worked on these days at holiday pay.

POLICE/AMBULANCE/FIRE: Police – non-emergencies Tel: 273-8660; Emergency, including emergency ambulance service Tel: 765-2323; Fire, including rescue squad service Tel: 347-2323.

TELEPHONES: Can be arranged, but unnecessary because sufficient phones available in dockside offices.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: U.S. Immigration rules.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Two companies, both certified by U.S. Coast Guard, can provide mobile reception facilities. Containers up to 30 cu.yd. can be made available alongside vessel with 24 hours prior notice.

BFI Waste Removal, Inc., Town & Country Division, College Ct., Muskego, WI 53150. Tel: (414) 679-0860.

Waste Management, Inc., Best Disposal Division, 10627 S. 27th Street, Franklin, WI 53132. Tel: (414) 761-2100.

WASTE OIL DISPOSAL: Collection of waste oil provided by mobile reception facility. Contractors are certified by U.S.C.G. 24 hours notice required. Contact AAA Environmental Industries, Inc., 6510 W. Forest Home Avenue, Milwaukee, WI 53220. Tel: (414) 541-1462.

DELAYS: No delay.

GENERAL: Chandlery services for foodstuffs, ship complements and laundry services available. Garbage and waste disposal are available through private operators, chandler usually making the arrangements.

The Liquid Cargo Pier is also available for non-petroleum liquid cargoes and vessel bunkering.

DEVELOPMENTS: Milwaukee inner harbour berth for maximum size bulk vessels under-going comprehensive site enhancement.

AUTHORITY: Port of Milwaukee, 2323 S. Lincoln Memorial Drive, Milwaukee, Wisconsin 53208, U.S.A. *Tel:* (414) 286-3500. *Telex:* TWX 910-262-3042. *Cables:* Milharcomil. *FAX:* (414) 286-8506. *Contact:* Kenneth J. Szallai, Municipal Port Director. Eric C. Reinelt, Marketing Manager.

MOBILE, Alabama: 30.40 N. 88.02 W. (See Plan)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilotage is compulsory.

ANCHORAGES: If berth is congested, vessel may anchor at the bar (35 miles from harbour).

RESTRICTIONS: Controlling depth: 40 ft. for entrance, channel and anchorages. Mean tidal range 1.5 ft. Nature of bottom: soft mud. Vessel can dock and sail at any hour at any stage of the tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: There are 7 tugs, available 24 hours, with max. 2,600 h.p.

BERTHING: There are 34 berths at most of which, direct loading or unloading can be effected from quayside tracks. Ro/Ro berth available.

Public Grain Elevator: Depth alongside 40 ft. Loading rate 115,000 bushels/hour for grain. Grain received by rail, truck and barge.

McDuffie Terminals: 3 berths. No. 2 with dolphins, total length 320 m., No. 1, length 315 m. Bulk coal handling plant, depth alongside the berth is 45 ft. Berth No. 3, length 315 m. will be ready late 1996. Shiploaders can load over 4,000 t.p.h. or 7,000 t.p.h. combined. 3 stacker/reclaimers can handle 4,000 t.p.h., one tipple for rail cars which can dump 30 cars per hour and one tipple that can dump 60 cars per hour, rated at 4,000 t.p.h. and 3 barge unloaders that work 3,500 t.p.h. each. A conveyor belt system connects the entire complex.

Bulk Handling Plant: 2 berths, depth alongside 40 ft. Total quay length 1,500 ft. 2 unloading towers which can unload 3,000 t.p.h. and 2 loading conveyors, rate 2,000 t.p.h.

Depth alongside other public berths as follows:

Pier 2	38 ft. MLW	Pier River End B	38 ft. MLW
Pier 3	38 ft. MLW	North Pier B 1	40 ft. MLW
Pier 4	38 ft. MLW	Pier North B 2	40 ft. MLW
Pier 5	38 ft. MLW	Pier North B 3	40 ft. MLW
Pier 6	38 ft. MLW	Pier South C1	41 ft. MLW
Pier 7	38 ft. MLW	Pier South C 2	41 ft. MLW
Pier 8	38 ft. MLW	Pier South C 3	41 ft. MLW
Pier South A	37 ft. MLW	Pier River End C	38 ft. MLW
Pier River End A	30 ft. MLW	Pier North C 1	39 ft. MLW
Pier North A 1	38 ft. MLW	Pier North C 2	37 ft. MLW
Pier North A 2	38 ft. MLW	Pier D	37 ft. MLW
		Berth E	40 ft. MLW
Pier North A 33	38 ft. MLW	Berth 1 tipple	Under repair
Pier South B 1	41 ft. MLW		
Pier South B 2	41 ft. MLW	Berth 2 tipple	44 ft. MLW
Pier South B 3	41 ft. MLW	Berth 3 tipple	40 ft. MLW

CRANES: 1,600 ton capacity (1,200 tons at 208 ft.) crane, 75 ton stationary crane, 50 ton mobile crane and 80 ton floating crane.

SPECIALISED CARGO-HANDLING FACILITIES: Container berth, length 894 ft., equipped with 1×45 ton lift capacity crane.

1 Ro/Ro berth at Pier A (Berth E Ro-Ro berth will be ready mid-1996).

STEVEDORES: Normal working hours for the port are 0800/1700 hrs. Monday through Friday.

TANKERS: Max. length 950 ft. restricted by turning basin. American Bituminals & Asphalt Co. – Jetty berth dredged to 38 ft.

Magazine Point: Hess Terminal: Jetty berth dredged to 43 ft.

FRESH WATER: Available ex-wharf at all berths.

FUEL: Most grades fuel/diesel available via pipeline, barge or truck.

DENSITY: 1000 (Fresh Water).

REPAIRS: *Atlantic Marine, Inc.* – Dry Docks ranging from 5,000 to 18,000 tons displacement all serviced by 51 ton gantries. Dock length range from 380 ft. to 620 ft. Also available is a 70 ton floating crane. Any type of repair can be effected.

Bender Ship Repair. Dry docks ranging from 4,000 – 18,000 tons displacement. Majority of repair work is dry docking, but also makes topside repairs. 100 ton floating crane available.

CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

HOLIDAYS: Normally no work is performed on New Year's Day, Easter, July 4th, Labour Day, Christmas Eve (1200 hrs.–2400 hrs.), Christmas Day and New Year's Eve (1200 hrs.–2400 hrs.). Working holidays are New Year's Eve (0001 hrs.–1200 hrs.), Martin Luther King's Birthday Holiday, Mardi Gras Day, Monday after Easter, Veteran's Day, Thanksgiving Day and Christmas Eve (0001 hrs.–1200 hrs.).

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Under the provisions of Annex V of MARPOL 73/78, port reception facilities for ships garbage and separation on board vessel of various waste are required. Garbage is defined as "all kinds of victual, domestic and operational waste excluding fresh fish and parts thereof, generated during the normal operation of the ship and liable to be disposed of continuously or periodically". In order to accommodate the needs of shipping through facilities of the Alabama State Docks, the Department has filed an Application for a Certificate of Adequacy with the Captain of the Port, United States Coast Guard, for garbage reception facilities. Applicants for berth at any facility of the Alabama State Docks shall provide, upon request, the reception facilities which meet the requirements contained in 33 CFR, Parts 151, 158. Berth applicants shall require a 24 hour notice of vessel's intent to discharge garbage and reception facilities for food, plant, meat, and other potentially infectious waste shall be provided by the berth applicant or his designated contractor when requested by the vessel in accordance with the above and with the requirements set forth in 7 CFR 330 and 9 CFR 94. Regluated food waste must be handled at a facility approved by the Animal and Plant Health Inspection Service (APHIS). Berth applicants or their designees shall provide the necessary reception facilities when requested to do so for other than APHIS regulated garbage from any commercial, full-service solid waste firm. The firm listed below has indicated to the Captain of the Port of Mobile that they are interested in contracting their services in this regard and are approved by the Department of Agriculture, Animal and Plant Health Inspection Service.

Waste Management, 4770 Hamilton Boulevard, Theodore, Alabama, 36582.

WASTE OIL DISPOSAL: If desiring to discharge oily waste, a vessel, her owners and agents are responsible for selecting an inspected and approved company that meets United States Coast Guard requirements for receipt of oily waste and further are responsible for making the necessary arrangements for discharging the oily waste. Such discharge operations are to be reported to the Superintendent or Terminal Manager in charge of the particular facility prior to the actual discharge.

The firms listed below have indicated to the Captain of the Port of Mobile that they are interested in contracting their services in this regard. Their listing herein does not indicate a preferential recommendation on the part of the Alabama State Docks Department but merely reflects the company's desire to function in the above capacity and the Captain of the Port's recognition of the firm with respect to the Alabama State Docks Department's application. All enquiries should be directed to the Captain of the Port, United States Coast Guard. Any contractor is subject to the applicable regulations for the transfer of oil (33 CFR 154-156).

Aaron Oil Company, Inc., P.O.Box 2304, Mobile, Alabama, 36652.

Midstream Fuel Service, Inc., P.O.Box 2626, Mobile, Alabama, 36652.

SEAMAN'S CLUBS: Catholic Maritime Club, 273 Dauphin Street, Mobile. Tel: 432-7339.

International Seaman's Center, 605 Texas Place, Mobile. Tel: 432-7953.

CURRENCY: U.S.Dollar (U.S.$).

DEVELOPMENTS: The 400 ft. wide ship channel was recently dredged to 45 ft. and to be dredged at a later stage to 55 ft. with a width of 550 ft.

The Alabama State Docks is currently involved in a $55 million capital improvement program, which will add 2 warehouses and a pier to the general cargo warehousing and docking facilities and add a 864 ft. pier, ship unloader and new conveyor system at McDuffie Terminal. A 365,000 sq.ft. forest products warehouse and steel and heavy lift berth has been built to better serve dock customers. A 14 acre waterfront site was recently purchased and renovated providing a 1,400 ft. pier system, open storage area and a 175,000 sq.ft. warehouse.

Ravan, Port Director/CEO. E.G. Browning, General Manager/Head of Operations. Captain D. Carey, Harbour Master.

MOREHEAD CITY, N. Carolina: 34.43 N. 76.42 W.

(See P

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all
on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Line Certificate. In addition, the following documents will be require formal entry to be made within 48 hours of arrival from abroa 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Form 1300).
All Foreign Clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1
Certified Crew List.

PILOTAGE: Pilots obtained from Morehead City Pilots' Associa Morehead City, North Carolina 28557. Tel: 919-726-4068.

The Port Terminal at Morehead City is 3.5 miles from the Sea B The port is located on the Intracoastal Waterway and is situated 75 S.W. of Cape Hatteras and 14 miles West of Cape Lookout.

Pilots should be given 24 hours notice and then contacted by Channel 16 about 2 hours before arrival at Sea Buoy R "2BI".

Pilot boat is about 40 ft. long, with white hull and superstructure hull is marked with "Pilot" in black letters on both sides.

RESTRICTIONS: Ocean Bar is 47 ft. at MLW.

The channel at Morehead City is maintained at a controlled dep 45 ft. at MLW.

The East Turning Basin has a depth of 45 ft. and the West Tu Basin has a depth of 35 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban

TUGS: Available. Service provided by (1) Morehead Towboat, Island, Morehead City, North Carolina 28557. Tel: 919-726- (2) Delta Marine Inc., P.O.Box 3546, Morehead City. Tel: 726- Fax: 763-7119.

BERTHING: The wharf is 5,500 ft. long. This length enables the provide berths for 10 × 500 ft. general cargo ships and 1 petro tanker at any given time.

Adjacent to the general cargo dock area is a 1,000 ft. deep water for out-loading through the bulk handling facility.

The wharf is constructed of concrete and steel and has marginal and crossovers for full length. Truck ramps are located at various for easy Roll-on/Roll-off access.

Morehead City also provides a barge terminal with 1,487 ft. of m berths. This terminal was developed as a part of the bulk han facilities, but is also used for the loading or off-loading of a vari cargoes.

Bulk Handling Facilities: 6,000,000 ton annual capacity bulk faci receipt, conveyance, storage and shipment of bulk cargoes. Lo capacity 3,000 t.p.h. Storage capacity 225,000 tons (used mai phosphate).

Woodchip handling facility which can outload 1,000 s/tons per annual capacity two million tons.

CRANES: 2×115 ton capacity gantry cranes with container ha capability.

FUEL: Available from Colonial Oil and Texaco Inc.

SURVEYORS: Saybolt, Lloyd's, S.G.S. and National Cargo Bure

REPATRIATION: This is possible but should be avoided as there Immigration Office. Closest airport is about 1 hour's drive from the

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Time, GMT minus 4 hours from first Sunday in April till last Sun October.

SERVICES: There are no shipyards in the port. Service on any electronic equipment is not available.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I- made up for each crew member on arrival. Not necessary for cre already holding Form I-95, issued for the same vessel.

GARBAGE DISPOSAL: See "Agriculture" before first U.S. (Albany).

Garbage disposal is available though it must be pre-arranged port before vessel's arrival. Drums and skips are normally alongside ship. Charges and collection times will be given wh arrangements are made. Contact James Lawrence, Superintendent, Morehead City Port, Morehead City, North Tel: (919) 726-3158.

WASTE OIL DISPOSAL: Waste oil disposal is availab pre-arrangement must be made. All docks are serviced by tanker Contact James Lawrence, Dock Superintendent, Morehead Morehead City, North Carolina. Tel: (919) 726-3158.

SEAMAN'S CLUBS: There is a Seaman's Center at the port sponsored by the local churches. This facility is located near water tank and provides telephones to call home and general as

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: North Carolina State Ports Authority, P.O.Dra 113 Arendell Street, Morehead City, North Carolina 28557. 726-3158. *FAX:* (919) 726-1190. *Contact:* Robert D. McMah Director.

NAWILIWILI, Hawaii (including Port Allen): 21.57 N. 159.21 W. (See Plan)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load Line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Stores Lists.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 4 hours final notice if a last minute change occurs. Pilot boat "Anini" from Hawaii Pilots Association serves Nawiliwili and Port Allen. Tel: (808) 521-2780. Pilot boards 1 mile East of Nawiliwili and 0.5 miles South of Port Allen. Signals in accordance with International Code.

ANCHORAGES: *Nawiliwili:* Between Nawiliwili Light and Carters Point in 5 – 9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: 0.5 miles South of Port Allen Breakwater Light in 5 – 10 fathoms. Fair holding ground. Untenable in Kona or S.W. storms which occur from November to March.

RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili: Arrivals sunrise, departures sunset time. From October 21 to March 21 Pilot boards at 0630 hrs. Balance of year 0600 hrs. Port Allen: No time restrictions.

MAX. SIZE: *Nawiliwili:* Length 800 ft., draft 32 ft. 6 in.

Port Allen: Length 687 ft., draft 32 ft. on North side and 28 ft. on South side. Pier is 600 ft. long, so larger vessels overhang.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.

TUGS: One 2,000 h.p. tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. Has radio telephone, "WTT 3602" and Channel 12 is usually used. Extra tugs available from Honolulu.

BERTHING: Limited to one large vessel at Nawiliwili and one at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with Marine Cargo Specialist. Berth conflicts usually solved in Honolulu by rerouting of Island ports.

Ro/Ro barge facility at Piers 2 and 3.

Pier 1 renovation presently underway. Scheduled completion is September 1996.

CARGO HANDLING FACILITIES: Nawiliwili has one sugar loading gantry on Pier 2; no equipment or storage to handle grain, ore, coal, sulphur. Fertiliser is discharged by self-unloading barge, and the bulk hauled away via truck. There is a container yard but no facilities to off-load containers. Weekly service is by a self-unloader. Roll-on/Roll-off cargo is moved on ramps furnished by barges. LPG and petroleum product lines are privately owned.

STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs Clearance.

MEDICAL: 2 hospitals on Kauai with 2 doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.

TANKERS: All piers have pipeline connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 5 tanker berths available.

DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.

FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute. No water available at Port Allen Harbour.

FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.

CONSULS: All in Honolulu.

REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.

GANGWAY/DECK WATCHMEN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman. All ships provide own gangway and deck watch.

OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.

REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.

AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.

TIME: GMT minus 10 hours, all year round.

HOLIDAYS: National: New Year's Day (January 1st); President's Day (February 22nd); Memorial Day (May 25th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veteran's Day (November 11th); Thanksgiving Day (November 26th) and Christmas Day (December 25th). Cargo can be worked but at penalty rates.

POLICE/AMBULANCE/FIRE: Emergency calls – Dial 911 for all services, or dial "O" for operator.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Search/Rescue Centre, Tel: (808) 246-0390.

TELEPHONES: Arrangements by Agent.

SHORE LEAVE: Permitted after Immigration check. Eastern Bloc visitors may be restricted.

IDENTIFICATION CARDS: Desirable but not required by law.

DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft. Also see "Berthing".

AUTHORITY: State of Hawaii, Department of Transport, Harbours Division, 3242 Waapa Road, Lihue, Kauai, Hawaii 96766, U.S.A. *Tel:* (808) 246-6996. *FAX:* (808) 246-9344. *Contact:* Robert B. Crowell, Harbour District Manager.

NEW BEDFORD, Massachusetts: 41.38 N. 70.55 W. (See Plan)

DOCUMENTS: See "Boston".

PILOTAGE: Compulsory. 3 Massachusetts State Pilots available, ordered through Agent. VHF Channel 16 monitored. Pilot on station only after 12 hours notice. Small pilot vessel with basic communication equipment. Pilots board all vessels at Buzzards Bay Buoy at the entrance to New Bedford Outer Harbour situated at Lat. 41° 30' 42" N., Long. 70° 50' 07" W.

ANCHORAGE: It is recommended that vessels delayed due to weather, etc., anchor 0.5 miles South of Buzzard's Bay Bell Buoy.

RESTRICTIONS: A modern harbour approach begins at Buzzard's Bay Buoy and runs a straight course of 7.5 miles direct to the pier facilities. The channel is 350 ft. wide and has a depth of 30 ft. MLW. The channel leads into a moderate size (1,000 yd.) turning basin.

Hurricane dyke barrier gate 150 ft. wide with depth of 30 ft. MLW.

MAX. SIZE: 700 ft. length. Vessels over 30 ft. draft restricted by tides.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S. port (Albany).

RADIO: RCA Chatham Radio, New Bedford Marine Operator for VHF, and Boston Marine Operator for ship to shore frequencies.

VHF: Pilot vessel on Channels 16 and 13. Pilot office on Channels 16 and 18A.

TUGS: Tugs join vessel in inner harbour. Tug lines used. 2 tugs available. Tugs are not normally used at the State Pier in docking and undocking of deep-water vessels. The large turning harbour basin, the wind-sheltered position of the pier and lack of tidal current minimise use of tugs. In extreme weather conditions tugs are used.

BERTHING: At State Pier, berthing space for 3 ships:
North side 600 ft. length, South side 775 ft. length, East side 450 ft. length.

Depth of water at all berths is 30 ft. MLW.

Maritime Terminal, depth 27 ft.

BRIDGES: Passage to upper reaches of harbour to Maritime Terminal requires navigation through the New Bedford and Fairhaven Bridge only in daylight for larger vessels over 250 ft. length.

STEVEDORES: 24 hour notice required for New Bedford Stevedoring Corporation to prepare gear. 25 tons discharged or loaded per hour as average production per gang. Nearly all cargoes handled.

MEDICAL: 24 hours notice required. Excellent hospital facilities available.

DENSITY: Static, since tidal variations light. Density same as ocean water.

FRESH WATER: Fresh water available.

FUEL: All types available, to be ordered in advance.

CONSULS: Most Consuls available in Boston, 50 miles or 1 hour away.

REPAIRS: All types of minor ship repairs available.

GANGWAY/DECK WATCHMEN: Watchmen available. Non police or police.

OPENING/CLOSING HATCHES: Depends on negotiated contract and cargo handled.

CUSTOMS ALLOWANCES: Designated by U.S. Customs with regard to particular circumstances.

REPATRIATION: Agent can handle formalities.

AIRPORT: 3 airports within 1 hour's drive. All international services.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriot's Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th).

TELEPHONES: No telephones on board, but exist adjacent to pier.

SERVICES: All services can be obtained if required.

SHORE LEAVE: If U.S. Immigration has cleared crew member, he is allowed ashore.

GARBAGE DISPOSAL: Garbage containers are available on most piers and wharves. Contact: A.B.C. Disposal. Tel: (508) 995-0544 and Frades Disposal. Tel: (508) 995-9121.

WASTE OIL DISPOSAL: Contact Franklin Recycling Co. Tel: (508) 995-1179.

SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: December 1982.

Documents: See "Boston"

Pilotage: Compulsory. Pilot boards at "BB" in Buzzards Bay. Advise Agent 6 hours prior to arrival.

Restrictions: Vessels enter and leave on rising tide during daylight hours. The approach is hazardous as vessel has to pass through hurricane barrier (width 150 ft.) and swing bridge (width 94 ft.).

Max. Size: LOA. 600 ft. Beam 85 ft. Draft 25 ft. Underkeel clearance of 5 ft. required in channel. Mean tidal range 3 ft.

Radio: Chatham Radio.

Tugs: 3 tugs available (2,000 h.p.). 2 tugs are normally sufficient for berthing/unberthing.

VHF: Pilot on VHF Channel 16.

Berthing: Maritime Terminal Wharf: Distance from "BB" Buoy to Berth is 9 miles. U.S. and U.K. Pilot Books indicate 30 ft. to 31 ft. at berth. Least depth in Channel from sea to berth 30 ft. Nature of bottom at berth – very soft mud. Density 1025. Good security. Palletised cargo and 20 ft. and 40 ft. containers handled. Ample storage space for containers.

Services: Fresh water, fresh provisions, limited repair facilities, Lloyd's Surveyors (at Boston), Salvage Surveyor (New York), laundry service, (Boston). Bunker fuel oil, diesel oil, lubricating oil, doctor, hospital, groceries and meats (Boston).

AUTHORITY: City of New Bedford, Harbor Development Commission, Wharfinger Building, Fisherman's Wharf, New Bedford, Massachusetts 02740. *Tel:* (508) 993-1770. *FAX:* (508) 991-6181. *Contact:* Martin Manley, Director.

NEW HAVEN, Connecticut: 41.14 N. 72.55 W.

(See Plan)

DOCUMENTS: Refer to "New York".

APPROACHES: *From New York:*

Charts: 12339, 12366, 12367, 12363, 12354, 12371.

Vessels leaving New York bound for New Haven will be transiting New York's East River and Western Long Island Sound. All shoals and rocks are well marked and the close proximity to the shore line provides an excellent radar target for position checking. During Summer months, thick fog will present a hazard on this route. Long Island Sound is also a major yachting centre, so extreme care must be exercised while transiting this area.

There are numerous dangers to be wary of when making the passage from New York to New Haven. In order of approach they are:

1. East River and Hell Gate are areas of strong tidal currents averaging 4.6 knots for the ebb current which sets in a Southwesterly direction. Vessels drawing up to 35 ft. may transit Hell Gate at HWS only. Sluggish handling vessels should arrange for towboat assistance up the East River and through Hell Gate.
2. 26 ft. Buoy "32A" usually passed well clear to the South.
3. Cable and Anchor Reef usually passed to the South.
4. Stratford Shoals deep draft vessels pass at least 1 mile off the South of the shoal then alter course to New Haven Sea Buoy.

From Block Island:

Charts: 13205, 13215, 13209, 12354, 12371.

On approaching Block Island from the Southerly direction, Block Island's Southern shore is mainly high rock cliffs, and a good radar target is obtained along with bearings taken from the RDF station at Southeast Light.

Care should be exercised by vessels deeper than 30 ft. to always approach Block Island to the East due to the numerous shoals found on the Western side of the island.

It is also advisable to remain at least 1 mile to the East of Block Island due to the numerous shoals close in shore.

There are numerous dangers to be wary of when making the passage from the Pilot Station to New Haven. In order of approach they are:

1. Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.
2. The Race is a narrow channel into Long Island Sound. Strong East to West currents exist during maximum ebb or flood and knowledge of position should be maintained in view of the possibility of unusual set. Valiant Rock, with a least depth of 19 ft., nearly in the middle of the Race, is surrounded by shoal area. A lighted bell buoy is Northward of the rock.
3. Great caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound due to the heavy small boat traffic, especially in the area in proximity to The Race.
4. Fog is prevalent during the Summer months and is heavy. Good judgement should be used before transiting the area during fog.

Good water is found in Long Island Sound from The Race to New Haven as long as the Mid-Channel Buoys "P1" and "CF" are passed close to and care is taken so as not to pass North of "Twenty-Eight Foot Shoal" lighted bell buoy. When a vessel is within 4 or 5 miles of New Haven, the depth of the water is reduced, so caution is again needed. Radar is the best navigational aid in this area. There are numerous RDF stations that can be used to ascertain positions. Also fathometer readings will be helpful.

PILOTAGE: Compulsory. State Pilots are available on a 24 hour b and are usually arranged through the ship's Agent or directly by ship companies. Pilot will board vessel in vicinity of New Haven Sea B marked "N.H." – short and long flash; black and white vertical str Boarding will be from a 44 ft. steel launch named *New Haven P* blue hull with "Pilot" marked on both sides in white letters, or fro tug-boat. Contact can be made via VHF telephone, Channel 13 (15 MHz), Channel 16 (156.80 MHz), or Channel 19A (156.95 MHz).

Dock Masters provided by Constitution State Pilots.

Pilotage Association Report: The New Haven – Bridgeport P maintain a tide gauge, from where they depart to meet vessels. normal tidal range is 6 ft. They believe that 4 ft. of water in exces the ship's deep draft is necessary for a safe transit. A rule of thu used by them, is 31 ft. on LW, and 37 ft. on HW. (For any variatio this, a Pilot should be consulted.) A normal transit time from the entra buoy to any of the berths in the inner harbour is 45 minutes to 1 h Docking time of 30 minutes to 1 hour should be added to this aver dependent on where the ship is berthing, as well as possible wea conditions.

There was a maintenance dredging of New Haven Harbour, comp in 1994. The after-dredging survey submitted to them by the U.S. A Corps of Engineers shows a controlling depth, with rock bottom of 3 at MLW. This rock is located at South West Ledge Light at a point w a 35° turn is executed by the ship.

Prevailing winds are Westerly, and have a decided effect on the of tide. The tide gauge is the determining factor as to the time of e when wind conditions do exist.

Advice from State of Connecticut, Department of Transportation:

Pilotage is compulsory for vessels transitting the waters of Long Is Sound via Block Island Sound bound to or from ports and harbour Long Island Sound. Vessels bound for New Haven via Block Island/L Island Sound usually board a Pilot at either the Point Judith Pilot St (41° 17.2' N., 71° 28.5' W.; 2 miles South of the Point Judith R "2" wh buoy), or the Montauk Pilot Station (41° 02' N., 71° 42' W.; 3 miles East of Montauk whistle buoy Mo (A) "MP"). Some Block Island/L Island Sound Pilots also serve as Pilots for New Haven. If a local har Pilot is to be boarded, he will usually board vessel in vicinity of Haven Sea Buoy, marked "N H" – short and long flash; red and w vertical stripes.

ANCHORAGES: Vessels awaiting berth, and or tides, will find anchorage up to 40 ft. draft within 1 mile S. – S.E. of the "N.H." B

RESTRICTIONS: Vessels can proceed to and from berths in New Ha Harbour at any hour during the day or night, weather and tide permit Entrance channel dredged to 35 ft. MLW and width 400 ft.

MAX. SIZE: Draft up to 38 ft. subject weather and tides. Vesse 50,000 d.w.t. with part cargo, do call occasionally, but should co with the Pilot and terminal concerned.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban

HEALTH: See "Health: All Ports", before first U.S.A. port (Albany

RADIO: Vessels arriving from North use Chatham Radio. Vessels South use Amagansett Radio on Long Island.

Bridgeport Marine Operator on VHF Channels 24 and 27.

TUGS: Gateway Towing operates tugs based in New Haven and s Long Island Sound ports. The office is on VHF Channel 13, 24 ho day. The 24 hour telephone number is (203) 469-7288. The 4 stationed in New Haven have 2,400 h.p. with twin screws. There ar other New York based tug companies serving this area, Spenton Red Star Co., Tel: (800) 223-5470.

BERTHING:

Wyatt Inc.: Pink Tanks:

In the Winter of 1994, this terminal, on the West side of the har was dredged to 36 ft. The dock on the East side has been close ships of 715 ft. LOA can be docked portside to on the West dock

Wyatt Inc.: T Dock:

In the Winter of 1994, this terminal, on the East side of the ha was dredged to 36 ft. The dock is parallel to the main channe manifold area and dolphins connected by walkways. Ships are d portside to.

Gulf Terminal: The Gulf Dock is located parallel to the channel o East side of the inner harbour, and ships of 35,000 d.w.t. with d 35 ft. and LOA of 675 ft. are considered to be maximum size. (from bow to manifold.)

The dock parallels the channel and consists of 2 main caiss centre platform and dolphins connected by a catwalk. Ships cons for Gateway Terminal use this facility.

Gateway Terminal: Gateway Terminal is an independent deep marine terminal owner and operator, handling various types of d liquid bulk cargoes. It features its own petroleum transfer and oil s tank farm (4 tanks), with an aggregate capacity of approx 500,000 barrels. The fuel transfer facility is connected to the Bu Jet line Pipeline System servicing central Massachusetts, and working arrangement with Gulf Oil to utilise a number of their imme adjacent facility components, including their T – dock.

Gateway Terminal has a newly constructed concrete pier, length by 60 ft. width, which is at a 90° angle to the main chann pier provides up to 3 berths and can accommodate on the Sou 40,000 d.w.t. tankers and dry cargo vessels up to 68,000 d.w.t. LOA, 106 ft. beam and 36 ft. draft at MLW. Smaller vessels and with up to 35 ft. draft at MLW use the North side. Also avail 3×9,000 ton elevators for cement storage. The pier provides a rubber cushion 50 ft. on centre fendering system. Two high spee cranes with capacity 40 tons are on the pier and additional mobi with capacity 25 tons are available. Advanced truck loading an stations are immediately adjacent to the pier. Ships can bert starboard side to.

Bunkers, petroleum products and fresh water are available at a

New Haven Terminal, Inc.: This facility has 3 ship berths on a 90° heading from the channel, dredged in 1994. The Scrap Dock, as it is called, is a continuous pier, with a wearing strip cushioned by a rubber backing. The pier is 650 ft. long, with 35 ft. at MLW. Scrap is loaded from here and all types of dry cargo handled. Two gantry cranes are on the dock and additional mobile cranes are available. Railroad cars can be brought on to the dock. Ships berth port side to.

The Finger Pier on the North side is a continuous pier, 650 ft. long, and is mainly used as a tanker berth. Bow to manifold is 350 ft. (additional hoses can be added to increase this distance.) The slip is 196 ft. in width, and 2 ships may be accommodated at the same time, as long as 30 ft. is allowed for a tug boat between the ships. Depth 35 ft. at MLW.

The South side is a tanker or general cargo berth, with 38 ft. at MLW. Bow to manifold is 350 ft. and additional hoses may be used. Ships of 700 ft. may be secured at all 3 of these berths.

Bunkers can be trucked in, and fresh water is available at all berths. New Haven Terminal Inc., 100 Waterfront Street, New Haven. Tel: (203) 469-1391. Telex: 710-465-2994. Fax: (203) 469-1318.

Exxon Terminal: Exxon Dock parallels the main channel. The dock is 750 ft. long with 2 main caissons, dolphins, and platform connected by a catwalk.

Ships of 50,000 d.w.t. call at this dock, with a draft of 36 ft., docking on the rising tide. Ships are docked starboard side to. Bunkers are not available, though fresh water is.

MEDICAL: All facilities available.

TANKERS: See "Berthing".

BALLAST: There are no slop lines available.

FRESH WATER: Available at all terminals.

FUEL: Available from oil terminals or delivered by barge.

CONSULS: All countries represented in New York.

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine/spirits per man. Additional allowances may be given if considered necessary, due length of vessel's stay in port.

AIRPORT: New Haven Airport 1 mile distant. New York International Airport 70 miles distant.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Memorial Day (30th May); Independence Day (4th July); Labor Day (first Monday in September); Columbus Day (12th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).

SERVICES: Professional Sea Services (monitor Channels 16 and 19A) of New Haven offers launch service to ships at anchor, movement of stores, and skin divers. Tel: (203) 932-2159.

Sea Support, 500 Waterfront Street, New Haven, CT. 06512. (P.O.Box 9166, New Haven, CT. 06532). Tel: (203) 467-1590 (24 hours). Fax: (203) 468-2670. Telex: 413474 Conn Marine. Contact: Ralph Gogliettino. Services: Complete ship chandlery and repair services. Boom deployment, oil containment and recovery, air, sea and shore terminal services.

GARBAGE DISPOSAL: Agent must make arrangements with Department of Agriculture.

Charges: U.S.$ 250.00 per container; haulage U.S.$ 10.00 per container; disposal U.S.$ 80.00 per net ton.

WASTE OIL DISPOSAL: Service available and must be arranged through ship's Agent.

See "Services".

SEAMAN'S CLUBS: None.

GENERAL: Through a co-operative agreement, all the terminals have a slick boom, skimmers and absorbent available at all times.

There are no slop tanks available in this port for pumping ballast.

None of the terminals supply gangways; ships must use their own.

AUTHORITY: U.S. Coast Guard, Captain of the Port, Long Island Sound.

Contact: Captain D.V. Monks, New Haven – Bridgeport Pilots' Association, 45 Alison Avenue, Wallingford, Connecticut 06492. *Tel:* (203) 230-0778, (203) 265-3673 (Residence).

NEW LONDON (Including Groton), Connecticut:

41.21 N. 72.06 W. **(See Plan)**

DOCUMENTS: Refer to "New York".

PILOTAGE: Pilotage is compulsory for vessels transiting the waters of Long Island Sound via Block Island Sound bound to or from ports and harbours on Long Island Sound. Vessels bound for New London harbour via Block Island/Long Island Sound usually board a pilot at either the Point Judith Pilot Station (41° 17.2' N., 71° 28.5' W., 2 miles South of the Point Judith R "2" whistle buoy,) or the Montauk Pilot Station (41° 02' N., 71° 42' W., 3 miles due East of Montauk whistle buoy Mo (A) "MP"). Some Block Island/Long Island Sound pilots also serve as pilots for New London. If a local harbour pilot is to be boarded, he will usually board the vessel at General Anchorage "E" or if under way inbound, approximately one mile South of New London entrance buoys "1" and "2". Vessel's agent will arrange pilotage and advise vessel of pilot boarding area.

Dock Masters provided by Constitution State Pilots.

ANCHORAGES: General Anchorage "E": In the waters off the mouth of New London Harbour, approximately 1.5 miles S.S.E. of New London Ledge Light (See "Plan").

RESTRICTIONS: Vessels can proceed to or from berths in New London or Groton at any hour during the day or night, weather and tide permitting. Transits of the Thames River to or from Dow Chemical's Terminal at Allyn Point are limited to daylight hours.

The U.S. Navy has dredged New London Harbour to provide a main ship channel with depths of 36 ft. and 40 ft. at MLW, 500 ft. wide from Long Island Sound to the Route I-95 bridge.

MAX. SIZE: Dry cargo vessels of approximately 600 ft. – 650 ft. and tankers of approximately 800 ft. have been using the harbour.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio on Cape Cod. Vessels from South use Amagansett Radio on Long Island. However, either one may serve the purpose.

VHF: New London Marine Operator monitors Channels 25, 26 and 86.

TUGS: Usually join vessel at Ledge Light if a dry cargo vessel and near entrance buoys "1" and "2" if a tanker. Tugs use their own lines. Three tugs of about 1,000 h.p. – 3,000 h.p. are usually available with advance notice. Tel. (203) 443-9433.

BERTHING: Advance ETA must be made for berthing.

State Pier No. 1: Depth-pending completion of hydrographic survey, pilot and terminal should be consulted (Vessel's draft normally not to exceed 31 ft. – 32 ft.).

Long Wharf: Consult Pilot and Terminal Operator regarding draft limitation/availability of Long Wharf for berthing.

Dow Chemical Co. Wharf: Depth 22 ft. MLW (docking on rising tide), daylight docking and undocking.

Hess Groton: Depth 36 ft. MLW.

City Pier (South side): Depth approximately 18 ft. MLW (not used as a cargo terminal). Contact New London Marine Commerce and Development Office. Tel: (203) 443-8331.

BRIDGES: There are no bridges across Main Ship Channel. However, at New London, at the head of the Main Harbour, the Thames River is crossed by 1 drawbridge and a twin fixed bridge: the Amtrak Railroad bascule bridge with a horizontal clearance of 151.5 ft. and a vertical clearance of 30.9 ft. at high water and a fixed highway bridge with a vertical clearance of 135 ft. for a middle width of 200 ft.

STEVEDORES: Gangs must be requested on weekdays no later than 1630 hrs. preceding the scheduled work day.

MEDICAL: All facilities available.

TANKERS: Amerada Hess Oil Dock: Max. draft 36 ft. (Lines 10 in. and 12 in.).

Pfizer Wharf: Barge berth, currently not handling tankers.

Report: Port Approaches – Cautionary Advice: When approaching Block Island from the South or East, prior to picking up the Pilot, all mariners should be aware of the precautionary zone to the S.E. of Block Island. Usually ships bound for Point Judith Pilot Station will make for 1 mile East of Block Island S.E. lighted whistle buoy then, traffic permitting, head due North, to pick up the Pilot. All traffic in this area should be monitoring VHF Channels 13 and 16. Principal navigational aids used in making landfall are RDF stations at Montauk Point, S.E. Point, Point Judith, Brenton Reef Light and Buzzards Bay Light Tower. The high bluffs on the South side of Block Island also provide excellent radar targets for position fixing. Ships bound for Point Judith Pilot Station are advised to approach the Pilot Station from the East side of Block Island due to the shoals found on the island's Western side. Ships bound for the Montauk or Point Judith Pilot Station should be cautioned against proceeding past the pilot boarding area without a pilot on board. Vessel agents arranging boarding at Montauk Pilot Station should consult pilots regarding draft restrictions for vessels transitting the Montauk-Block Island Channel, S.W. of Block Island. Among the dangerous shoals in that area is Southwest Ledge, marked by a lighted buoy. There are numerous dangers to be wary of when making the passage from the Pilot Station to Groton. In order of approach they are:

Block Island North Reef Buoy "1BI" marking a dangerous shoal which should be given a wide berth.

"The Race" which is a narrow channel leading into Long Island Sound. Strong Easterly and Westerly currents exist during maximum flood and ebb tides (flood set to the West) and an accurate position should be maintained at all times so that any unusual set may be observed.

It should also be noted that sport fishing boats frequent the area in great numbers practically all year round. Tugs with large barges on long hawsers can also be expected. Valiant Rock, with a least depth of 19 ft., nearly in the middle of The Race is surrounded by shoal area. A lighted bell buoy is northward of the rock. Security broadcasts should be made on VHF Channels 16 and 13 when approaching the area and passing situations discussed before entering "The Race".

Cautionary Advice: Extreme caution should be exercised during the Summer months when transiting through Block and Long Island Sounds due to heavy small boat traffic, especially in the area around "The Race".

Submarine operating areas are in the approaches to New London Harbour and off the Northern end of Long Island. Submarines may be operating either surfaced or submerged in these areas.

Fog is prevalent during the Summer months and can be very dense. Prudent judgement should be used before transitting the area during fog because of the aforementioned hazards.

Berthing: (Hess Oil – Groton): The harbour provides excellent room for manoeuvring. Currents of up to 0.5 knots exist but set fair with the channel. The tidal range averages 2.6 ft. with a spring range of 3.1 ft. Vessels approach the berth at a small angle. Usually vessels dock starboard side to. Once alongside the platform, the bow will be secured first, followed by the stern. The Platform is well protected by rubber fenders. Lines are run to offshore piles and a mooring buoy by a small boat. 12 mooring lines are used under normal weather conditions. (See "Plan").

FRESH WATER: Available at pier side through 2.5 in. and 1.5 in. hoses.
FUEL: Bunker or marine diesel not normally available (arrangements are possible, if ship's Agent is given sufficient advance notice).
CONSULS: Nearest at New York.
REPAIRS/DRY DOCKS: Drydocks of sufficient size/capacity to handle cargo ships currently unavailable to the public. Towing and minor repairs are available through Thames Shipyard, Inc. in New London. Tel: (203) 442-5349.
GANGWAY/DECK WATCHMEN: Not required and not recommended.
OPENING/CLOSING HATCHES: May be performed by stevedores or ship's personnel.
REPATRIATION: Facilities exist.
AIRPORT: Nearest airport is Groton - New London Airport, situated in the Southeast part of Town of Groton, Connecticut. USAir provide scheduled commercial service to this field.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours, from first Sunday in April till last Sunday in October.
HOLIDAYS: Eleven holidays may affect stevedore services at State Pier. With the exception of Labor Day, cargo work can be arranged on holidays. The Terminal Operator should be contacted at Tel: (203) 442-3939 for information concerning observed holidays.
POLICE/AMBULANCE/FIRE: Dial 911.
TELEPHONES: Available if required.
GARBAGE DISPOSAL: For specific information regarding garbage disposal contractors, the State Pier Terminal Operator should be consulted at Tel: (203) 442-3939. Necessary arrangements might also be made through the vessel's Agent.
WASTE OIL DISPOSAL: Upon request, information concerning Waste Oil Contractors will be available through the Terminal Operators, vessel's Agent or the Office of Waterways, located at State Pier. Tel: (203) 443-3856.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar.
AUTHORITY: State of Connecticut, Dept. of Transportation, Bureau of Aviation and Ports (Office of Waterways), State Pier, New London, Connecticut 06320, U.S.A. *Tel:* (203) 443-3856. *FAX:* (203) 437-7251. *Contact:* D. Douglas Brown, Director of Port Operations.

NEW ORLEANS, Louisiana: 29.56 N. 90.04 W.

(See Plan)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
2 copies previous Tax Certificates (Form 1002).
2 copies Certificate of Financial Responsibility.
2 copies General Declaration (Form 1301).
2 copies Vessel Repairs (Form 226) (Required only for American Flag vessels arriving from foreign ports).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:
Master's Oath (Customs Form 1300).
All foreign clearances.
Certified Crew List.

The Bureau of Customs at New Orleans, Louisiana, will not, regardless of the circumstances, accept Customs Entry Papers from vessels unless they are on the proper U.S. Customs Forms and properly prepared.

Specially referred to are Customs Forms 1303 (Ship's Stores Declaration), 1304 (Crew Effects Declaration) and 1302 (Inward Foreign Manifest).

U.S. Customs at New Orleans require that the 1303 be completed, that is all stores (deck, engine, etc.) be listed on the form; it must also include firearms and medicines. They will not accept "as per attached list".

Form 1304, Crew Effects List, must likewise be properly completed. All effects and curios will have to be listed on the form. The term "souvenirs" is not sufficient and may not be used. All values have to be listed. Attachments to the 1304 are not permitted. (This does not apply to American Flag vessels using the Form I-418 Crew List with Crew Declaration numbers listed for their souvenir list.)

Also see "Berthing – Ama (Shipmaster's Report) – General" regarding Customs' areas of jurisdiction.

APPROACHES: *Operator's Report:* 1984 (Corrected to 1988 conditions).

The coastline of the Mississippi River delta is low lying and generally swampy, having no easily distinguished geographic characteristics. The oil rigs and drilling platforms off Southwest Pass are usually sighted well before any navigational aids or landmarks. The first navigational aid to be seen is normally the Southwest Pass Entrance Light near the end of the East Jetty, a red tower on a white dwelling, 85 ft. above the water. The Entrance Light is also equipped with a Racon displaying Morse K (– · –) and Radio Beacon "OT" (307 kHz). The East End Jetty is also a conspicuous navigational aid consisting of a red triangular daymark on a red skeleton tower, 50 ft. above the water.

The sea buoy ("SW") is a red/white light (Morse (A)) buoy located approximately 1.6 miles South of the jetties and may be difficult to distinguish at long range due to the numerous oil wells and other lights in the vicinity.

Entry and transit should not be attempted during dense fog or any other unfavourable conditions.

River Transit: *General:* The Army Corps of Engineers has responsibility for maintaining a project depth of 45 ft. in the entran and along the navigable channel in the Mississippi River u Mile 150 AHP and 40 ft. from Mile 150 AHP to Baton Rouge. How even with regular dredging, there will be occasions when the p depth cannot be maintained, resulting in a reduction of the transit A decrease in water depth is most likely to occur when:
(a) the river stage is at its highest usually between January and and
(b) the river current velocity decreases causing siltation primaril major Winter and Spring run-offs of rain and melted snow.

The influence of the above factors on water depth cannot be accu predicted, neither for the day nor the location in the river. While t not of concern for many miles of the river where deep water is al available, it is of particular concern within the 9 crossings between Orleans and Baton Rouge.

Within these crossings it is, therefore, necessary for the Corp Engineers to take frequent soundings not only to keep track of w the least water depth is, but also to determine the priority crossin dredging.

Soundings taken for this purpose are very comprehensive, i.e., of soundings within each crossing are along the centre line range well as along parallel lines 125 ft. to 250 ft. on either side of the c line; soundings are recorded on these lines at about 150 ft. inter The maximum allowable transit drafts within the river are determine the available water depth in the deepest 250 ft. wide channel in the 5 wide crossings. As a result, Pilots in selecting such a navigable may not always proceed on the centre line ranges of a crossing maximum draft will never exceed 45 ft. to Mile 150 AHP and 40 ft. Mile 150 AHP to Baton Rouge.

Currents in the river vary according to the stage of the river (cu due to tides are a negligible factor) being of greater strength and ve during high river flood stages and of lesser velocity during low stages. High river stages normally occur in April and the low stag October. Vessels transiting the river during flood stages should precautions to avoid wash damage to the banks.

Extra caution is required in navigating the river in the vicinity of A Point, particularly when the river is high. When the Carollton G reaches 10 ft. on a falling stage, all vessels in the vicinity of Algiers shall be governed by the Governor Nichols and Gretna traffic Furthermore, low powered vessels should not navigate the area u they can clear Algiers Point during daylight.

When transiting the river it should be noted that the VTS is operation. Thus, the mariner may be confronted at any time unreported hazards. It is important, therefore, that all Pilot rules other applicable rules and regulations be strictly adhered to.

Six bridges cross the Mississippi River between Head of the P and Baton Rouge, with the following clerances:

Mile (AHP)	*Bridge*	*Horizontal Clearance* (ft.)	*Vertical Clearance* (ft.)
94.0	Hale Boggs	1,400	170.0
95.7	Greater New Orleans	1,400	170.0
106.1	Huey P. Long	725	153.0
121.7	Luling & Destrehan	1,200	154.9
167.4	Sunshine	750	168.0
229.3	Baton Rouge I-10	500	172.5

Note: The vertical distance is measured at zero elevation of th at the nearest gauge on the river. For example: the Rouge I-10 bridge shows a clearance of 172.5 ft. at z the gauge. When the gauge shows 10 ft., the cleara 172.5 ft. – 10 ft. = 162.5 ft.

Ferries transport passengers and cars across the river at Point Hache, Belle Chase, Chalmette, New Orleans, Gretna, Dest Reserve, Lutcher, Donaldsonville, White Castle and Plaquemine

When fog is predicted for the lower Mississippi River and/o outbound vessels above New Orleans should anchor around N above. Vessels below New Orleans should anchor well above Pi unless the weather can be expected to remain clear up to the en of the pass.

Draft/Speed Relationship: It is important to take account of the e "squat" when navigating within the crossings of the Mississipp For your guidance, the increase of draft due to "squat ef approximately 1 ft. for each 5 knots of speed.

River Crossings: The 9 crossings are critical areas, therefo desirable to obtain either from the Pilot or local Agent the mos information on locations where soundings indicate water depth l the project depth 40 ft. or 45 ft. You should discuss with the Pi the intended track within a crossing should be in order to remai the deepest water. In order to further reduce the risk of bottom t a reduction in speed is considered necessary in these circums Reduction of speed should be discussed with the Pilot to ens the effect of "squat" is compensated for while in a crossing. S important to ensure the desired ship response to rudder mo while in a crossing, speed reduction has to be carried out before a crossing.

The manoeuvres required at the crossings are rather unique cases the channel is not parallel to the river current, and the therefore, utilise the set of the current to negotiate the crossin has to be sufficient to compensate for the effect of the current the same time maintaining a balance with increased draft due to Full sea speed is to be avoided.

When entering or leaving a crossing, the Pilot may manoeu to the bank and on occasions take advantage of bank reject the manoeuvre.

Experienced helmsmen are required during the entire riv between New Orleans and Baton Rouge.

River Traffic: Surging caused by passing channel traffic is a common problem. To avoid damage to Chicksan/hose connections and the parting of wires or lines, special attention should at all times be given to the condition and tautness of moorings. It is recommended that one or several qualified crew members be assigned exclusively to the tending of mooring lines and winches.

PILOTAGE: Advise Agents ETA at sea buoy 48 hours in advance. Agent will arrange for Pilot. Pilot boat 46 ft. long, red hull, white cabin, flying blue and white Pilot flag. Pilot boards at sea buoy, requires Pilot ladder 6 ft. above water level, and in compliance with Chapter V, Regulation 17 of the International Convention for the Safety of Life at Sea, 1974. Pilot boats can be contacted by VHF, Channel 9 or 16 when 30 to 40 miles off. Bar Pilot is exchanged for River Pilot at Pilottown, Head of Passes.

Following Advice Received from Crescent River Port Pilots' Association:

Cable: Crespilots, New Orleans.

Vessels bound to any destination on the Mississippi River and Mississippi River Gulf Outlet (MRGO) are requested to supply the following information via Coastal Radio Telegraph addressed to Crespilots, New Orleans:

(1) ETA – 24 hours before expected arrival at Pilot Station (Sea Buoys), and any change of ETA in excess of 6 hours.

(2) Indicate if vessel is arriving Mississippi River or Mississippi River Gulf Outlet.

(3) Deepest fresh water draft and speed of vessel.

(4) Please contact Pilot Station at entrances via VHF Radio Phone on Channel 16 (156.80 MHz), Channel 9 (156.45 MHz), or, Channel 13 (156.65 MHz) at least 2 hours prior to arrival for boarding instructions. (This is normally done by the Bar Pilot).

Your co-operation will greatly assist in expediting the dispatching of Pilots and avoid costly delays to your vessels.

Report: S.W. Pass Pilot uses VHF Channel 9.

ANCHORAGES: Safe anchorage within 2 miles of South Pass or S.W. Pass entrance. Vessels may anchor at the Point below New Orleans. depending on ship size, weather, etc., tug assistance may be required.

MISSISSIPPI RIVER DESIGNATED PERMANENT ANCHORAGES:

Pilottown Anchorage: An area extending from Mile 1.5 to Mile 6.7 AHP along the right descending bank and having a width of 1,600 ft. at its upper and lower limits.

Boothville Anchorage: An area extending from Mile 12.2 to Mile 18.5 AHP along the right descending bank and having a width of 1,000 ft. at its upper and lower limits.

Ostrica Anchorage: An area extending from Mile 23.5 to Mile 24.4 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits.

Port Sulphur Anchorage: An area extending from Mile 37.5 to Mile 39.7 AHP along the left descending bank and having a width of 800 ft. at its upper and lower limits.

Magnolia Anchorage: An area extending from Mile 45.5 to Mile 46.9 AHP on the right descending bank, having a width of 1,100 ft. measured from the Low Water Reference Plane from Mile 45.5 to 46.3, and 600 ft. measured from 500 ft. riverward of the Low Water Reference Plane from Mile 46.3 to 46.9.

Davant Anchorage: An area extending from Mile 53.5 to Mile 54.5 AHP along the left descending bank and having a width of 800 ft. at its upper and lower limits.

Alliance Anchorage: An area extending from Mile 63.6 to Mile 65.8 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits.

Wills Point Anchorage: An area extending from Mile 66.5 to Mile 67.6 AHP along the left descending bank and having a width of 800 ft. at its upper and lower limits.

Cedar Grove Anchorage: An area extending from Mile 69.9 to Mile 70.6 AHP on the right descending bank, 700 ft. wide with a Western limit 400 ft. from the Low Water Reference Plane on the right descending bank.

Belle Chase Anchorage: An area extending from Mile 73.1 to Mile 75.2 AHP along the right descending bank and having a width of 1,000 ft. at its upper and lower limits.

Lower 12 Mile Point Anchorage: An area extending from Mile 78.5 to Mile 80.8 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits.

Lower 9 Mile Point Anchorage: An area extending from Mile 82.7 to Mile 85.0 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits.

New Orleans General Anchorage: An area extending from Mile 89.3 to Mile 90.5 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits. (See Appendix, paragraph 8).

Quarantine Anchorage: An area extending from Mile 90.9 to Mile 91.6 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits (See Appendix, paragraphs 6, 8 and 9).

Kenner Band Anchorage: An area extending from Mile 115.1 to Mile 115.6 AHP along the right descending bank and having a width of 700 ft. at its upper and lower limits.

Ama Anchorage: An area extending from Mile 115.7 to Mile 117.2 AHP along the left descending bank and having a width of 700 ft. at its upper and lower limits.

Bonnet Carre Anchorage: An area extending from Mile 127.3 to Mile 128.8 AHP along the left descending bank and having a width of 600 ft. at its upper and lower limits. (See Appendix, paragraph 10).

La Place Anchorage: An area extending from Mile 134.7 to Mile 135 AHP along the left descending bank and having a width of 600 ft. at its upper and lower limits.

Reserve Anchorage: An area extending from Mile 137.0 to Mile 137.5 AHP along the right descending bank and having a width of 800 ft. at its upper and lower limits.

Lower Grandview Reach Anchorage: An area extending from Mile 146.5 to Mile 147.1 AHP along the left descending bank and having a width of 700 ft. at its upper and lower limits.

Upper Grandview Reach Anchorage: An area extending from Mile 147.7 to Mile 148.8 AHP along the left descending bank and having a width of 700 ft. at its upper and lower limits.

Lower Sunshine Anchorage: An area extending from Mile 165.0 to Mile 165.9 AHP along the left descending bank and having a width of 800 ft. at its upper and lower limits.

Upper Sunshine Anchorage: An area extending from Mile 166.3 to Mile 167.0 AHP along the left descending bank and having a width of 800 ft. at its upper and lower limits.

Baton Rouge General Anchorage: An area extending from Mile 225.8 to Mile 227.3 AHP along the right descending bank and having a width of 1,400 ft. at its upper and lower limits. Less than 27 ft. draft.

Lower Baton Rouge Anchorage: An area extending from Mile 228.5 to Mile 229.0 AHP along the left descending bank and having a width of 700 ft. at its upper and lower limits. Light draft.

Middle Baton Rouge Anchorage: An area extending from Mile 229.6 to Mile 229.8 AHP along the left descending bank and having a width of 700 ft. at its upper and lower limits. Light draft.

Upper Baton Rouge Anchorage: An area extending from Mile 230.6 to Mile 231.0 AHP along the left descending bank and having a width of 1,075 ft. at its upper limit and 1,200 ft. at its lower limit. Light draft.

Note 1: Loaded vessels are not allowed to use Middle and Upper Baton Rouge Anchorages.

Note 2: An explosives anchorage, approximately 1,000 ft. wide, is located on the West side of the river 1.4 miles upstream of Oak Point Light (63.0 miles AHP) and cannot be used by any vessel without previous approval from the Commander, Eighth Coast Guard District.

All anchorages have mud bottoms and are protected by the Mississippi River banks on each side. Vessel's position should be monitored continuously for dragging while anchored. No specific distances are required between anchored vessels. Caution is advised if required to anchor off Baton Rouge Docks, due to proximity of submerged pipeline crossing just South of docks.

The Coast Guard advises that during high water conditions, Mariners should give anchored vessels a particularly wide berth. Fast river currents may cause anchored vessels to swing in wide arcs. Under these conditions, it is important that the Mariner beware of anchor chains.

APPENDIX:

Regulations Concerning Designated Anchorages have been extracted from 33 CFR 110.195.

(1) Anchoring is prohibited outside of established anchorages except in cases of emergency. In an emergency, if it becomes necessary to anchor a vessel outside an established anchorage, the vessel shall be anchored so that it does not interfere with or endanger any facility or other vessel. The Master or person-in-charge of the vessel shall notify the Captain of the Port of the location of the emergency anchoring by the most expeditious means and shall move the vessel as soon as the emergency is over.

(2) In an emergency, if it becomes necessary to anchor a vessel in Southwest Pass, the vessel shall be positioned as close to the left descending bank as possible.

(3) No vessel may be anchored unless it maintains a bridge watch, guard and answer VHF Channel 16, maintains an accurate position plot and can take appropriate action to ensure the safety of the vessel, structure, and other vessels.

(4) When anchoring individually or in fleets, vessels shall be anchored with sufficient anchors or secured with sufficient lines, to ensure their remaining in place and withstanding the action of winds, currents and the suction of passing vessels.

(5) No vessels may be anchored over revetted banks of the river or within any cable or pipeline area. The locations of revetted areas and cable and pipeline areas may be obtained from the District Engineer, Corps of Engineers, New Orleans.

(6) The intentions to transfer any cargo while in an anchorage shall be reported to the Captain of the Port, giving particulars as to name of ships involved, quantity and type of cargo, and expected duration of the operation. The Captain of the Port shall be notified upon completion of operations. Cargo transfer operations are not permitted in the New Orleans General or Quarantine Anchorages. Bunkering and similar operations related to ship's stores are exempt from reporting requirements.

Note: Activities conducted within a designated anchorage (e.g. cargo transfer, tank cleaning, stack blowing, etc.), may be restricted by other Federal, State or local Regulations. Owners, or persons in charge of any vessel should consider all safety and/or environmental regulations prior to engaging in any activity within designated anchorges.

(7) Nothing in this section relieves the owner or person-in-charge of any vessel from the penalties for obstructing or interfering with navigation or navigational aids or for failing to comply with the navigation laws for lights, day shapes, or fog signals and any other applicable laws and regulations.

(8) Vessels carrying cargoes of particular hazard as defined in 33 CFR 126.10 or cargoes of petroleum products in bulk may not be anchored in the New Orleans General Anchorage or Quarantine Anchorage without permission from the Captain of the Port.

(9) Except when required by the United States Public Health Service for quarantine inspection, the Quarantine Anchorage may be used as a general anchorage.

(10) When the Bonnet Carre Spillway is open, no vessel may be anchored in the Bonnet Carre Anchorage.

RESTRICTIONS: Draft governed by Southwest Pass, project depth 45 ft. Entrance day and night. New Orleans is 115 miles upriver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, and join vessel off berth if required. One tug normally used for berthing/unberthing at New Orleans.

BERTHING: *Public Grain Elevator:* No. 2 Berth, 670 ft. long, 40 ft. depth; No. 3 Berth, 650 ft. long, 40 ft. depth; No. 4 Berth, 635 ft. long, 40 ft. depth.

Loading Rates 20,000 bushels per hour per belt, in Berths No. 2 and 3; up to 40,000 bushels per hour per belt, in Berth No. 4. Each berth has 2 loading belts.

Southern Scrap Material Co.: Berth 550 ft. long, 32 ft. depth. Loading 200 t.p.h. with cranes.

Kaiser: Chalmette Wharf: Aluminium discharge facilities, max. draft 38 ft.

Westwego: Continental Grain Elevator: 2 Berths, 600 ft. long and 500 ft. long, 40 ft. depth; loading 2 booms upstream, 3 "Buhler" arms and 1 boom downstream. Loading rate 2,000 t.p.h. – 3,000 t.p.h.

Louisiana Dock: 28 ft. alongside, bulk oil products loaded 200 t.p.h.

Pacific Molasses Co.: Berth 35 ft. alongside.

Ama: Shipmaster's Report: February 1985 (Corrected to 1991 conditions).

Berth: ADM – Growmark.

Location: Lat. 29° 56.4' N.,Long. 90° 18.5' W. On the S.W. bank of the Mississippi about 122 miles from the Southwest Pass (New Orleans Customs Zone).

Health/Agriculture: See "U.S.A. – General" before first Port.

Tugs: Tugs normally used.

Berth: Length of berthing face about 550 ft.

Port side to, head up. Head, stern, breast lines to dolphins. Springs to wharf or dolphins according to size (Moorings: 4 head lines, 2 breast lines, 2 forward backsprings, 2 after backsprings, 2 breast lines and 3 stern lines). Strong current along berth. River traffic passes close by. Substantial moorings required, with regular adjustment. Poop gangways generally do not reach wharf. A contractor's gangway normally on wharf but is charged for delivery, collection in addition to rental. Access road very narrow, no vehicles allowed on wharf. Road deliveries must be collected manually from levee 300 yards away. Otherwise delivery by boat from Fairview Wharf. All provisions, laundry, etc., from New Orleans. Public telephones on wharf.

Loading: Loading rate about 1,500 t.p.h. – 2,000 t.p.h. Using 4 "Buhler" arms simultaneously. Sometimes there is a delay in back weighing cargo for preparation of documents.

Fresh Water: Available from wharf via 2 in. line, at a low rate.

Fuel: By barge at anchorage only.

Density: 1000.

General: Now only one Customs Zone for entry and departure. Three copies of following documents required – Crew Manifest, Stores List, Crew List, and one Visaed Crew List.

It is a common practice for ships to anchor below New Orleans for clearance by Customs, N.C.B. and U.S.D.A. before going on towards a bulk or grain loading terminal. Bunkers are generally taken during this period as the grain elevators normally refuse permission to do this alongside.

Also see "South Louisiana".

CONTAINER HANDLING FACILITIES: Handled at most docks. Full container facilities at France Road Berth No. 1 with 830 ft. leased to Sea-Land. Napoleon Avenue Wharf 1,520 ft. Nashville/Henry Clay Wharf 2,820 ft.

France Road Berth No. 4, wharf 700 ft. France Road Berth No. 5, wharf 900 ft. Berth No. 6, 800 ft. Berth No. 4 leased to Navieras de Puerto Rico and Berths No. 5 and 6 leased to New Orleans Marine Contractors, Inc.

France Road Berth No. 6, with Ro/Ro pier.

BRIDGES: 6 bridges. 3 bridges cross river at New Orleans, 1 at Baton Rouge, 1 at Destrehan and 1 at Donaldsonville. Sufficient clearance at all times.

STEVEDORES: Working hours 0800 – 1200 and 1300 – 1700, Monday to Friday.

MEDICAL: All facilities available.

TANKERS:

Chalmette: Humble Oil Terminal: Tanker berth 30 ft. depth; Tenneco Oil Terminal: Tanker berth 35 ft. depth.

Amesville: Texaco Tanker Loading Berth, 34 ft. alongside. 2×8 in. hoses loading up to 12,000 bbls.p.h. No ballast facilities.

Avondale: American Liberty Tank Terminals Berth, 60 ft. alongside. 4×6 in. hoses loading up to 18,000 bbls.p.h. No ballast facilities. International Tank Terminals Berth, 45 ft. alongside. 12 in. hoses loading 150 t.p.h.

Gretna: Publicker Chemical Corp.: Berth 30 ft. alongside. Southern Pacific Company: Berth 600 ft. long, 35 ft. depth; dry cargo discharging only. Industrial Molasses Corp: Berth 27 ft. depth; 2×10 in. pipelines, loading 200 t.p.h.

Marrero: Hess Terminal Corp: Tanker berth 38 ft. depth; 6×12 in. hoses loading 500 t.p.h. Texaco: Tanker berth 35 ft. depth; 6×16 in. lines loading 250 t.p.h. No ballast facilities.

St. Rose: Cities Service: Tanker berth 35 ft. depth; International Tank Terminals: Berth 35 ft. depth; no fresh water available.

Operator's Report:

Pilottown: General: The Texaco Terminal is located on the East side of the river, 1.7 miles AHP and is a crude oil terminal consisting of a single berth. The dock, mooring dolphins and walkway are constucted of steel and concrete. The dock itself is a 'T' head dock 60 ft. in length; the total cluster of mooring dolphins, however, spans 1,000 ft.

Water at the berth is brackish with an approximate tidal range of 1 ft.

The berth is isolated and far from any commercial centre or district. Launch service to Venice, a small fishing village 8 miles upriver from Pilottown, may be available on request.

Cargo Handled and Shore Installations: Crude oil is loaded to vessels from an 820,000 bbls. capacity storage tank through a 22 in. shoreline leading into 3×8 in. hoses; maximum loading rate is 24,000 bbls.p.h. The hoses are supported by a steel boom at the top of the hose handling structure on the dock.

The berth is equipped with an emergency shutdown system lo on the dock; the vessel is provided with a similar piece of equipme emergency use.

Docking: The River Pilot berths the vessel. No tugs are requir docking or undocking; docking is strictly starboard side to.

Vessels should approach the dock stemming the current, dro the port (offshore) anchor when off the dock. The anchor is then to help manoeuvre the vessel alongside the dock. When undockin anchor is hove up as the vessel manoeuvres away from the doc

Mooring bollards on the main dock structure are rated at 100 mooring hooks on the dolphins are rated at 60 tons or more.

Gangway: The ship's gangway must be used and should be pr illuminated and rigged.

Bunkers and Fresh Water: No bunkers or fresh water are availa the dock.

Ballast/Slop Facilities: No ballast or slop facilities are availab Pilottown; vessels arriving with dirty ballast should plan for this.

Venice: General: Getty No. 1 Dock is a crude oil loading dock lo on the West bank of the river approximately 11.8 miles AHP.

The 3 arms provided for loading cargo have a designed maximu to manifold distance of 12.5 ft. Vessels with a manifold inset greate 12.5 ft. must use a 10 ft. long spool, provided by the dock, to co the loading arms.

Cargo Handled and Shore Installations: Crude, the only cargo han is loaded through 3×12 in. Chicksan loading arms fitted with manifold connections. Maximum loading rate is 40,000 bbls.p.h. terminal requires that a minimum rate of 10,000 bbls.p.h. be maint throughout the loading.

Emergency shutdown systems are located in the dock office a the approach to the dock. The vessel is provided with a po emergency stop.

Docking: Port side to docking is required and is normally perfo by the River Pilot. No tugs are required for docking or undockin vessel's starboard anchor is usually used to control the ve movement during these manoeuvres. Approach should always be with the vessel stemming the current.

Gangway: The ship's gangway must be used and should be pr rigged and illuminated.

Connecting Hoses: Chicksan arms are connected to the manifold by ship's personnel.

Communications: A public telephone located at the terminal site the dock, is available for use by ship personnel.

Repairs: Only emergency repairs which do not involve hot wo allowed.

Bunkers and Fresh Water: No fuel or fresh water are available berth.

Ballast/Slop Facilities: A single 64,000 bbls. capacity tank is ava for ballast storage/treatment. The maximum permissible disc pressure is 150 p.s.i.

The terminal specifies that ballast shall not be loaded or disch while handling bulk cargo and requests that vessels arrive w minimum possible amount of ballast under the prevailing weathe conditions.

Empire: General: The Chevron Terminal is a crude oil loading doc is located at Mile 26.7 AHP on the East bank of the river. The consists of a 'T' head hose handling platform, 2 breasting dolphi 5 mooring buoys (3 upsteam of the platform and 2 downstrea dock is connected to shore by a 12 ft. wide pier capable of supp 2-ton loads.

Cargo Handled and Shore Installations: Crude is loaded t 3×12 in. hoses attached to a loading arm assembly on the hose pl The maximum delivery rate is 40,000 bbls.p.h.

An emergency shutdown system is located on the hose ha platform with a portable remote control unit aboard the ship.

Docking: Docking is generally performed by the River Pilot a starboard side to dockings are allowed. No tugs are required fo or undocking as the vessel uses its offshore anchor to ma alongside the dock.

Approaches should be made stemming the river current and t anchor should be dropped when the vessel is above the dock to manoeuvring into position. The anchor is hove up as the vesse the dock.

Repairs: Only emergency repairs which do not involve hot w allowed.

Communications: A public telephone located on the hose platform is available for use by ship's personnel.

Gangway: The vessel's gangway must be used and should be rigged and illuminated.

Bunkers and Fresh Water: No bunkers or fresh water are ava this dock.

Ballast/Slop Facilities: All dirty ballast and slops must be pu the shore ballast tank, (capacity 80,000 bbls.) connected to platform by a 16 in. pipeline. Ballast and cargo operations ca handled simultaneously.

Maximum discharge rate for ballast is 20,000 bbls.p.h. at a m rail pressure of 125 p.s.i.

Bellechase: General: The Gulf/Alliance dock is a multiple prod located on the right descending bank of the river, appro 65.6 miles AHP.

Transfer of cargo is made through a set of 10 in. hoses a a loading arm assembly on the dock. Shore lines vary in size for toluene and benzene to 20 in. for crude oils.

Tank washing while alongside the dock is strictly prohibited

Cargo Handled and Shore Installations: Products common by the dock include xylene, LPG, crude, naphtha, carbon blac benzene, gasolines, jet fuel and heating oil.

Maximum allowable rail pressure for discharging vessels is

An emergency loading stop is located on the dock; another, portable, unit is placed aboard the ship.

Docking: The River Pilot normally handles docking and undocking operations. Docking is port side to only and generally requires the aid of a 1,200 h.p. tug. Small tankers are occasionally allowed to dock without the aid of a tug, using their starboard anchor instead. However, since dock regulations prohibit the use of an anchor while alongside, it is recommended that a tug be used by all vessels calling at the berth.

Approach to the dock should be made stemming the current with a tug on the vessel's starboard bow. The vessel is then manoeuvred into position alongside the dock.

Repairs: Minor repairs, excluding hot work, may be undertaken with written consent from the dock's Chief Operator countersigned by the offsite Shift Supervisor.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunkers are not available at Gulf/Alliance. Fresh water, however, is available and can be delivered at a maximum rate of 7 t.p.h.

Ballast/Slop Facilities: All slops and ballast must be discharged ashore. The shore storage tank has a 100,000 bbls. capacity; ships discharge ballast/slops into this tank through an 18 in. line at a maximum rate of 12,000 bbls.p.h.

Meraux: General: Murphy Oil Refinery is located on the North side of the Mississippi River, approximately 75 miles AHP. The tall stacks and cracking towers of the refinery are prominent features of the shoreline.

The berth serves as a primary receiving dock for crude oils which are refined into various petroleum products for transfer by ship and barge to other ports.

Cargoes Handled and Shore Installations: Crude is received at a maximum rate of 20,000 bbls.p.h. or a maximum 125 p.s.i. rail pressure. Refined products (gasolines, jet fuel, etc.) are loaded on to vessels at an average rate of 5,000 bbls.p.h. All cargo transfer is made through 8 in. hoses.

Docking: Docking is normally performed by the River Pilot and is strictly starboard side to. All vessels are required to use a minimum of 1 tug for docking and undocking; more tugs may be used at the Master's discretion. Vessels approach the refinery dock stemming the current with a tug on the port bow. The tug assists vessels manoeuvring into position alongside.

Communications: A public telephone located at the head of the dock is available for use by ship's personnel.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunker-C, diesel fuel and fresh water are available upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at this dock.

Chalmette: General: The Exxon dock is a small dock with 310 ft. of dock face consisting of a concrete deck on steel pilings. Mooring bollards on the dock and mooring dolphins are serviced by air driven capstans for hauling ship's mooring lines.

Cargo Handled and Shore Installations: Marine diesel and Bunker-C are handled at this dock. The dock is equipped with a loading arm assembly to which 3×8 in., hoses are attached for the transfer of cargo. Maximum allowable discharge pressure at the rail is 125 p.s.i.

An emergency loading stop control is located on the dock.

Docking: Docking and undocking are performed by the River Pilot and require the aid of an 800 h.p. tug. Vessels approach the dock stemming the current with a tug on the port bow and are then manoeuvred into position, starboard side to, alongside the dock.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunker-C, inter-fuel, diesel fuel and fresh water are available upon request.

Ballast/Slop Facilities: There are no ballast or slop facilities available at the berth.

Harvey: General: The Commercial Solvents Wharf is located on the South side of the river near Harvey Canal; and consists of an 'L' shaped dock with 370 ft. of dock face and 6 mooring dolphins.

Cargo Handled and Shore Installations: Various clean speciality products are handled. The product most frequently handled is methanol. Cargo is transferred through a single 6 in. hose with a 6 in flanged connection at the vessel's manifold. Maximum rail pressure for vessel's discharging is 100 p.s.i., maximum loading rate is 2,500 bbls.p.h.

Docking: Docking is performed by the River Pilot and is strictly port side to. 2 tugs are required for docking operations and a single tug for undocking. The general mooring arrangement calls for 2 head lines, 2 stern lines, 1 breast line forward, 2 breast lines aft, 2 forward spring lines and 2 after spring lines for a total of 11 mooring lines.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: No fuel or fresh water are available at the dock.

Ballast/Slop Facilities: There are no ballast or slop facilities at the terminal.

St. Rose: General: The International Matex Tank Terminal berths are located on the North side of the river, approximately 103 miles AHP. The terminal consists of two individual tanker berths (No. 1 and No. 5) and a barge dock.

No. 1 Dock, upstream of No. 5 Dock, consists of a small 'T' head dock with 5 mooring buoys to accommodate head, stern and breast lines. No. 5 Dock has a longer dock face which can accommodate all but the head and stern lines. Both docks are connected to shore by catwalks.

The velocity of the river current at both berths varies between 1 knot and 4 knots, depending on river conditions.

Cargo Handled and Shore Installations: No. 1 Dock handles mainly the receipt of crude oils and the shipment of Bunker-C, No. 2 fuel and naphtha. The cargoes most frequently handled at No. 5 Dock are No. 6 fuel oil and No. 2 diesel oil.

No. 1 Dock is fitted with a set of 12 in. Chicksan arms. Cargo at No. 5 Dock is transferred through a maximum of 3×8 in. hoses. Maximum discharge pressures are 100 p.s.i. at No. 1 Dock and 90 p.s.i. at No. 5 Dock.

Docking: Docking is performed by the River Pilot and is strictly starboard side to at both berths. All vessels are required to use at least 5 tugs for docking and undocking; 3 tugs are required when the river is above 15 ft. on the St. Rose gauge.

The general mooring arrangement at No. 1 Dock call for 4 head lines, 2 breast and 2 spring lines forward, 2 spring lines aft and 2 stern/breast lines. The lead for stern lines is poor. Wires may be used on all bollards and hooks except those on the loading platform. The terminal prefers polypropylene lines to wires for docking at No. 5 Dock. This dock requires 2 head lines, 2 stern lines, and one breast and one spring line both forward and aft.

Communications: Public telephones located on each dock and at the shoreside end of each catwalk are available for use by ship's personnel.

Gangway: The vessel's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Fuel (Bunker-C, inter-fuel and diesel) and fresh water are available at each dock upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at either dock.

Marrero – Texaco: General: The Texaco Tanker Berth is located on the South side of the river some 86.5 miles AHP. The berth consists of a 'T' head dock with pontoons and mooring buoys alongside forming a 750 ft. berthing space.

Cargo Handled and Shore Installations: Various products are shipped and received by barge; the only product handled by tanker is bonded heavy fuel oil. This product is received through a single 10 in. hose at a maximum pressure of 100 p.s.i. on the dock.

Docking: Docking is normally performed by the River Pilot and is strictly port side to. Tugs are recommended, but are not compulsory, for docking and undocking operations.

Approach is made stemming the current and parallel to the dock. When no tugs are used for docking, the vessel's starboard anchor must be used to manoeuvre the vessel alongside.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Fresh water is available upon request; fuel, however, cannot be obtained at this berth.

Ballast/Slop Facilities: There are no ballast or slop facilities at the terminal.

Marrero – Hess: General: The Hess Tanker Dock is a concrete structure with steel pilings and 320 ft. of dock face. Mooring dolphins provide a location for head, breast and stern lines.

Current at this dock varies from 2 knots to 4 knots, depending on river conditions.

The dock is located on the South or left descending bank of the river approximately 86 miles AHP.

Cargo Handled and Shore Installations: Crude oils, Bunker-C and heating oil are commonly handled at this berth. All cargo transfer is made through 8 in. or 10 in. Chicksan arms.

Maximum loading rate for crude oil is 25,000 bbls.p.h. and for other products approximately 6,000 bbls.p.h. Maximum rail pressure for discharging vessels is 100 p.s.i.

An emergency loading stop control is located near the dock manifold.

Docking: Docking is strictly port side to and performed by the River Pilot. Vessels under 35,000 d.w.t. are required to use 2 tugs for docking and undocking; vessels greater than 35,000 d.w.t. are required to use 3 tugs. During extremely high river stages all vessels are required to use 4 tugs for docking and undocking operations.

Berth mooring requirements specify that 4 head lines, 4 spring lines forward, 2 after spring lines, 2 after breast lines, and 4 stern lines be used by all vessels (a total of 16 mooring lines.)

Gangway: The ship's gangway, properly rigged and illuminated, must be used.

Bunkers and Fresh Water: Bunker-C, diesel oil, inter-fuel and fresh water are all available upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at the terminal.

DENSITY: Fresh water (1000).

FRESH WATER: Available ex-wharf.

FUEL: Only available by barge. Oil companies can supply Bunker "C" ex-terminals at Amesville and Marrero. Chemoil can also supply fuel.

Pilotage: They are equipped with Loran "C".

Anchorages: Very deep. Vessel drifted 7 nautical miles N.N 11 hours (February) with wind N.E. – 3. Checked with satellite navi

Health: No formalities.

Radio: Initial contact on W/T via "WLO" Mobile then by 12427.5 kHz A3J. When close enough Channel 16 VHF; then Ch 11 for all operations. If vessel fitted with bridge wing VHF extensio best to give all engine room orders over Channel 11 so that ligh vessel can also hear.

Berthing: As per OCIMF/ICS SSTG (P). Require 2 headlines and 1 line from STBL after putting aboard their lines which are all polyprop except springs which are wires with nylon tails. Steamed at 3.5 knots. They throw across heaving lines and carry all nece equipment. Do not require derrick, they have gangway and 4 'Yoko fenders.

Tankers: STBL can load at up to 10,000 t.p.h. They prefer to use 2 manifolds with reducers down to 16 in.

Identification Cards: Required.

SHIPMASTER'S REPORT: December 1990.

Restrictions: Though project depth is listed at 40 ft., currently drafts are available in the lower reaches of the river. Some loaded vessels have sailed with 45 ft. – 47 ft., and current information be obtained from Agents (topping-off may be required).

Fresh Water: Supply from shore is refused at certain berths as not potable. A number of fresh water barges are available alo river. Typical charges are $ 140 per hour away from berth $ 3.50/4.00 per ton. Pumping rates can range from 30 t.p.h. – 9 Minimum charge is for 200 tons of water.

SHIPMASTER'S REPORT: October 1991.

Pilotage: Pilot boards from a fast cutter off the S.W. Buoy, 1.5 South of the S.W. Pass Lighthouse. Prior to arrival call "Bar Pil VHF Channel 9 (Channel 67 mentioned in ALRS is only used for B to-Bridge Communications).

Bar Pilot Station is situated on the West bank of the S.W. Pass 1.0 miles North of the S.W. Pass Lighthouse. There are approx 60 Bar Pilots, of which 25 may be on station at any one time.

Vessels change Pilots at Pilottown, which is 21 nautical miles the S.W. Pass.

Crescent River Pilots take vessels from Pilottown to Algiers, o Orleans, and about 94 nautical miles above S.W. Pass.

With a nominal sea speed of 13 knots, passage to Pilottown half knot current is 2 hours and a further 6 hours up to New O There are about 80 Crescent River Pilots of which half are on sta any one time.

Bar Pilots will attempt to board a vessel in any weather, but go is required.

Baton Rouge Pilots take vessels above New Orleans and b Algiers.

Entrance: The Racon on S.W. Pass Lighthouse is very conspicu oil rig to the West of the safety fairway entrance channel is also eq with a Racon.

A strong Westerly setting current and strong Westerly winds a encountered near the S.W. Buoy, so great care has to be take in the vicinity of towing vessels when entering and leaving S.W due to their lack of manoeuvrability.

River: A depth of 40 ft. is maintained up to Baton Rouge. In O 1991 48 ft. fresh water was allowed to Baton Rouge.

The river current is slack between September and December a at approximately 0.5 knots. During the Spring months the curre run as high as 7 knots. During this time, passage for low powered can take a long time and it is potentially dangerous due to th strings of barges which have little directional control.

Anchoring: Anchorage is possible off the S.W. Buoy but this considered a good anchorage due to poor holding ground and in the vicinity.

There are numerous river anchorages which are safe when the is running at a low rate, but when the river is running at a vessels should be on full stand-by at all times.

Tugs: There are many powerful tugs available, they generally wa in the anchorages. When the river is running at a high rate the are called upon continuously.

Airport: New Orleans International Airport is just West of the c

Charts: B.A. Chart No. 3382 and U.S. Chart No. 11370.

It should be noted that no B.A. Charts are published for between New Orleans and Baton Rouge. U.S. Chart No. 113 this area. The U.S. Army Corps of Engineers "Plans of the M River" are published annually in book form and are very usefu berth positions, limits of deep channels and other useful infor published on charts.

Berthing:

International Matex Terminal (IMTT), Avondale:

Location: The berth is located on the South Bank of the river at Mile Post 108.2 (113 miles above S.W. Pass Lighthouse) and 3 miles above Huey P. Long Bridge, just upstream from Avondale Shipyard.

Facility: The facility has a tank farm dealing exclusively with vegetable oils. The intake is by rail and road tanker trucks.

Berth: The berth is a typical Mississippi River berth and was originally built for handling of barge traffic but was strengthened at a later date for handling ocean-going vessels. The berth can accept vessels up to 30,000 d.w.t., depth alongside is 50 ft.

The berth consists of 2 pile dolphins 150 m. apart with an old decked over barge moored between the dolphins forming a flat front. The barge is set back 2.0 m. from the dolphin line.

We berthed with the bow resting on the upstream end of the barge and the stern alongside the downstream dolphin (the stern is not allowed to touch the end of the dolphin). There are fenders on the dolphins and large truck tyres on the upstream end of the barge, there are no fenders on the downstream end of the barge.

Moorings consisted of 3 headlines/sternlines and 2 springs at each end. The headlines and sternlines are sent to the shore and secured to hooks. The forward springs are sent to the barge and the after springs are sent to the aft dolphin. When the river is running at a high rate (up to 7 knots) additional moorings are required.

One tug is used for berthing and there is also a mooring boat but it is unreliable.

Fresh water was not available at the time we called as the line was broken. Storing is not possible at the berth.

No shore gangway available and we could not use a short brow gangway, so pilot ladder was used for surveyor and the offshore gangway and a hired launch was used for boarding of officials.

Cargo: 1×6 in. flexi-hose connection from tanks to the vessel. We loaded peanut oil at a rate of 150 t.p.h. A careful preloading survey is carried out when loading vegetable oils. Flexi-hoses are used for all the different grades and occasionally the ship's hoses are used as the shore hoses are of insufficient length when the vessel is in a ballasted condition.

Chevron at Oak Point:

Location: The berth is one mile below Belle Chase and 91 miles above S.W. Pass Lighthouse, on the West bank of the river.

Berth: The berth is a well constructed steel pile structure with about 0 m. of flat faced side, with breasting dolphins at either end and mooring dolphins to the North and South of the breasting dolphins. All dolphins are connected by a catwalk.

The jetty has recently been rebuilt after nearly being destroyed by a passing tanker whose steering failed. One tug used for berthing.

The berth is generally used by barges but ocean-going vessels up to 0,000 d.w.t. can berth at the facility.

Storing trucks are allowed alongside if they are diesel driven. Fresh water available at a rate of 20 t.p.h., ship's hoses used. A shore gangway is provided. A public telephone is available on the shore.

Cargo: Polymers are imported and only lube oil additives are exported. There are dedicated Chicksans with 6 in. connections.

The ship has to shift when changing grades, unless the ship's cargo lines can be changed over. Flexi-hoses are not allowed.

We loaded grade "858C" from a tank about 1 mile away and rate was very slow, 26 tonnes/hr. Other grades were loaded at a rate of 00 tonnes/hr. – 150 tonnes/hr. Heavy "pigging" required on completion of grades, be careful if tank is full.

SHIPMASTER'S REPORT: July 1996.

Vessel entering Mississippi River to load grain:

Information required by ship's Agent from Master prior to arrival:

1. Any stowaways aboard?
2. Last port and date/time of sailing.
3. Last 3 ports outside U.S.A. and dates of sailing.
4. Last 2 cargoes.
5.* If cargo holds fumigated in last 30 days and if so, name of fumigant used.
6. Total estimated lift and holdwise tonnes stowage, including which holds full and slack, basis loading cargo as described above.
7. If you have U.S. forms aboard and prepare 3 sets of Stores, Effects, Crew Lists and 2 sets NCB Stability Calculations basis 100% main hold capacity with untrimmed ends applied.
8.* If vessel will have all holds clean, dry, load to ready as per NCB/USDA grain standards, being free of rust/paint scale, previous cargo, water and infestation.
9.* Airdraft of hatch coamings at Holds No. 1 and 2, basis having all centre holds free of ballast.
0. Will vessel receive bunker delivery at this port?
1. Will vessel receive lube delivery at this port?
2. If all electronic/navigational equipment per U.S.C.G. requirements are fully operational and if in compliance with U.S.C.G. rules.
13. Do you have SOPEP aboard?
14. Total number of crew and nationality (breakdown).
15. Airdraft of mast from waterline, basis having all centre holds free of ballast.
6. Name of P&I Club and name of local representative.

* Special questions for vessels loading grain.

Pilot: Compulsory. Vessel must contact Pilot when 30 – 40 minutes from entrance. Call sign "South West Pass Pilot Station". Call Pilot again when 3 – 4 miles from South West Sea Buoy (distance according to instructions of pilot station). This time advise pilot station which side the ladder is on (usually from lee side). Pilot comes on board abeam of South West Sea Buoy. This Pilot is a Sea Pilot and takes the vessel to Pilottown, about 2 hours at full speed. If vessel has full speed of about 12 knots, Pilot asks for no speed reduction during changing Pilot and coming on board.

Abeam of Pilottown, River Pilot comes on board. This Pilot takes the ship to the berth or Quarantine Anchorage, according to information received from ship's Agent.

Anchorage: Very many different anchorages on river, but only ships in Quarantine Anchorage visited by Port Authorities and Surveyor's Commission. If vessel will be loading grain, party consists of 2 or 3 members.

Vessel usually drops 3 shackles of chain on deck, but if vessel stays a long time, recommend dropping 2 anchors.

Authorities: Party consists of 5/6 officials with ship's Agent. Immigration officer checks all passports and cabins of every member of crew. If vessel has called at another U.S. port previously, all passes are checked. They are only valid for 29 days.

Master has to complete forms for passes indicating: Family name, first name, home address, date and place of birth and nationality.

If Master does not ask for pass for any crew member, he must advise reason.

If crew member without pass goes ashore, a fine of U.S.$ 3,000 is imposed.

Crew List required 15 days prior to arrival at first port for Agent to obtain visas.

NEW YORK, New York and New Jersey: 40.43 N. 74.00 W. **(See**

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing al on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (Curio List).
3 copies Stores List.
3 copies Passenger List (Form I – 418).
3 copies Crew List (Form I – 418).

Customs Boarding Officer will also examine Ship's Register an Line Certificate.

In addition the following documents will be required for forma to be made within 48 hours of arrival from abroad:

Health Pratique.
Master's Oath (Form 1300).
All Foreign Clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form
Certified Crew List.
Vessel's certificates may be inspected by a Coast Guard B Officer during the vessel's Port call. Some of the certifica may be required by the Coast Guard Boarding Officer inclu
Certificate of Financial Responsibility (Mandatory).
National Cargo Bureau Certificate (Optional).
Load Line Certificate (Mandatory).
Oil Record Book (Mandatory).
International Oil Pollution Prevention Certificate (IOPP Mand
SOLAS Safety Equipment Certificate (Mandatory).
SOLAS Safety Construction Certificate (Mandatory).
Radiotelephone Certificate (Optional).
Radiotelegraphy Certificate (Mandatory).
Vessel's Deck Log (Mandatory).

Note: The vessel's navigational charts are also subject to Coa inspection. Mariners should have onboard and corrected up to largest scale (greatest detail) charts for the intended route through the port. Certain foreign charts have been approved Contact Captain of the Port, New York for details.

Shipmaster's Report: March 1987 (Updated 1996).

3 copies of all necessary documents (CF-1300, CF-1301, CF-1303, CF-1304, CF-5129 and I-418). All are given to Ag distributes them to Immigration, Customs, etc.

For all U.S. ports, the name of vessel's operator must be on Form 1300 as that shown on the U.S.C.G. Certificate of Responsibility (Water Pollution).

For tankers, the cargo figures shown on Form 1302 shou gallons and barrels.

APPROACHES: Ambrose Channel, 2,000 ft. wide, is the entrance from the Sea to the Lower Bay and onward to The between Staten Island and Brooklyn, which is 15 miles from Tower. The project depth of this channel is 45 ft. MLW proceeding up Sandy Hook Channel are limited by a project 35 ft. MLW and an 800 ft. wide channel.

Vessels arriving at the Port of New York normally utilise Anchorages No. 23 and No. 24 which are North of the Verraza and adjacent to the Stapleton Quarantine Station or Anchora off Bay Ridge. However, at times it may be necessary to direc tonnage to the Gravesend Anchorage, No. 25, South of the Bridge. Occasionally, due to congested conditions at the above vessels may be directed to anchor at the newly established adjacent and N.W. of Ambrose Tower. Vessels instructed anchorage off Ambrose Tower must pick up a Pilot for prope of an anchorage location.

For limits of anchorages generally used in the Port of Ne "Plan". Use of Charts 12349 and 12334 is strongly recomm

Specific operating and safety procedures have been agreed upon with the Pilot's Association, as follows:

1. Flood Tide Procedure:

Vessels with an LOA in excess of 800 ft. or a draft of more than 40 ft. (salt water) will not be brought in from sea to the General Anchorages off Stapleton, Staten Island (Southern part of No. 23 and entire area of No. 24) on the flood tide. This will avoid the need to turn around in order to anchor at a location which may be congested with traffic and ships at anchor.

2. Transit Restrictions:

Ambrose Channel: Guideline for starting in from Ambrose Tower during normal weather conditions.

Vessels with Drafts of 46 ft. 06 in.:

Thirty minutes after high water Sandy Hook.

Vessel with Drafts of 46 ft:

Thirty minutes to one hour after high water Sandy Hook.

Vessel with Drafts of 45 ft. 06 in.:

From thirty mintues after high water Sandy Hook to one hour and thirty minutes after high water Sandy Hook.

Vessels with Drafts of 44 ft. 06 in.:

From thirty minutes after high water Sandy Hook to two hours and thirty minutes after high water Sandy Hook.

Vessels with Drafts of 43 ft. 06 in.:

From thirty minutes after high water Sandy Hook to three hours and thirty minutes after high water Sandy Hook.

Vessels with Drafts of 42 ft. 06 in.:

From thirty minutes after high water Sandy Hook to five hours after high water Sandy Hook.

Vessels with Drafts over 40 ft. 00 in.:

From 30 minutes after high water Sandy Hook to 5 hours after high water Sandy Hook. All vessels in the above categories should pass through the Narrows before low water slack at the Narrows.

The procedures outlined above are guidelines only. Weather conditions, tides, currents and ship capabilities should, of course, be taken into consideration.

3. Anchoring Procedures:

The Pilot Association has notified the Pilots to stay aboard all arriving ships at anchorage until the following procedures are carried out:

(a) The anchor chain is to be brought up and ship is to be stationary.
(b) The Pilot will point out landmarks so proper bearings may be obtained and plotted on the charts.
(c) Pilots will inform the Master of conditions that he may encounter at the anchorage.
(d) The Master will be briefed on currents and time of tide change.
(e) All Pilots must record the ship's bearings on the back of their Pilot Orders.

In order to assist the attending Pilot, the Master should inform him on boarding of any special characteristics of his vessel, such as port manoeuvring speeds, turning circle, compass error and exact draft.

4. Anchor Watch:

Due to usually congested anchorages, strong tidal current, occasional fresh winds and traffic, all Masters are cautioned to maintain a continuous bridge anchor watch by a deck officer with engine on standby. Anchor bearings should be taken frequently and plotted to ensure proper anchor holding. During change of tides, the anchor windlass should be in readiness with a deck officer standing by.

If an anchorage becomes dangerously congested after a ship has been anchored, the ship's Master may request Agent to (a) send a Pilot to relocate vessel to a safer anchorage, or (b) send a tug to assist vessel in turning during a change in tide, or to stand by during fresh wind conditions.

PILOTAGE: Compulsory for foreign flag ships, and U.S. ships bound to and from foreign ports.

24 hours notice of ETA required. N.Y. N.J. Sandy Hook Pilot boat should be contacted on VHF Channel 16, call "Ambrose Pilot", pilot vessel also on Channels 13, 8 and 73 or ship-to-ship Channel 2638 or 2738. Vessels requiring Pilot should hoist signal letter "G" in daytime. In foggy weather the letter "X" should be sounded on whistle.

Pilot boat is generally found about 1.5 miles West of Ambrose Light Tower. In bad weather Pilot tries to stay windward of normal Pilot Station.

In poor visibility an inbound ship should make Ambrose Tower and then proceed at slow speed to the Ambrose Channel Sea Buoy while blowing the letter "X" on her whistle. If no Pilot is obtained by the time she is in the vicinity of the sea buoy she should then anchor about 0.5 mile to 1 mile North of the line from Ambrose Tower to thesea buoy and await Pilot.

ANCHORAGES: For ships entering from Sandy Hook there are anchorages in Lower New York Bay, Gravesend Bay, Raritan Bay, and Arthur Kill off Perth Amboy. In the Upper Bay, anchorages available off Bay Ridge for 30 days and off Stapleton for 48 hours. For vessels entering via Long Island Sound there are anchorages in the Western end of the Sound and in the East River.

Vessels must notify the Captain of the Port when it anchors, of the vessel's name, length and draft and its position in the anchorage.

Regulations for anchorages may be found in the 33 Code of Federal Regulations, Part 110.155.

Vessels entering New York Harbour are required to have 2 working anchors, by U.S.C.G. regulations.

Also see "Approaches".

RESTRICTIONS: Ambrose Channel, 10 miles long, maintained to a width of 2,000 ft. and a depth of 45 ft. MLW. The Northern approach to the harbour is through Long Island Sound into the East River. Main channels in the port are maintained to a depth of 45 ft. MLW.

MAX. SIZE: Restricted only by berth depth and location.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: All vessels over 100 tons gross are required to keep continuous watch on VHF Channel 13 when in areas where U.S. Inland Water Regulations apply.

V.T.S. became operational in December 1990. Channels to be used are 16, 13, 11, 12 and 14. (Channel 14 for vessels calling).

TUGS: Over 50 private towing and transportation companies registered in the port.

McAllister Brothers. Tel: (212) 269-3200.
Moran Towing. Tel: (203) 625-7800.
Turecamo Towing. Tel: (718) 442-7400.

BERTHING:

Brooklyn: 8 berths at South Brooklyn Marine Terminal, including 2 container berths; 4 berths at 23rd Street Pier; 7 berths at Red Hook Marine Terminal.

Hudson River: Passenger Ship Terminal on Manhattan Shore between 48th and 52nd Streets provides 6 ship berths.

Hoboken Port Authority Marine Terminal: 2 piers, 4 general cargo berths.

Jersey City: 2 berth container facility at Port Jersey (Global Terminal) with 5 gantry cranes.

Newark, N.J.: Port Newark (22 general cargo, 5 specialised, and 4 container berths). Depth range alongside 30 ft. – 34 ft. Berths No. 10 and 12 handle coal with 3 floating cranes, rate 10,000 tonnes per day.

Elizabeth, N.J.: Elizabeth Port Authority Marine Terminal, 22 full container berths, channel depth 35 ft.

Department of Ports and Trade: The Department of Ports, International Trade and Commerce (PITC) of the City of New York is responsible for maintaining, leasing, and developing City-owned waterfront property. One of the principal maritime agencies in the nation's busiest port, the Department is actively involved in harbour affairs. As part of its commitment to the economic vitality of the Port, the Department plays a leading role in pressing for streamlined dredging operations, improved transportation connections, expansion of marine terminals, and the development of international trade and investment opportunities.

Pier 36 Terminal – Manhattan:

Operator: Vacant.

Situated on 10 acres off the East River, Pier 36 is the sole marine terminal in Manhattan capable of handling breakbulk, Ro/Ro and containerised cargo. In 1986, 82,000 long-tons were handled. The facility offers 1,300 ft. of berthing space with a dockside depth of 32 ft. and 175,000 sq.ft. of covered transit shed space. Its location offers direct access to the lucrative Manhattan market, as well as convenient access to major truck routes in the Metropolitan area.

Pier 42 Terminal – Manhattan:

Operator: Vacant.

Shipping Lines: —

More recently used for handling imported bananas, pineapples and coconuts, Pier 42 is located on the East side of Lower Manhattan. 4 specialised gantry cranes and a highly mechanised operation enable this terminal to move 150,000 boxes of fruit per day. The facility handled 200,000 long-tons of fruit over the course of calendar year 1986. The terminal contains over 120,000 sq.ft. of warehouse space including an air-conditioned storage area. Water depth at dockside is 32 ft. 48 truck loading bays ensure that goods move quickly from dockside to the road.

CONTAINER FACILITIES:

Bay Avenue Terminal:

Location: South side of Elizabeth Channel (Berths 68, 70, 72, 74 and 76).

Owner or Lessee: The Port Authority of NY and NJ.

Terminal Operator: –

Address and Telephone: 2170 North Fleet Street, Elizabeth, NJ 07201. Tel: (201) 289-3000 or (800) 526-6802.

Total Area of Terminal: 94 acres.

Length of Ship Berths: 2,825 ft.

Depth: 35 ft. MLW.

Container Cranes: 3×30 tons (Paceco), 1×40 tons (Star).

Equipment: 5 Clark straddle carriers (31.5 tons.) 15 Ottawa hustlers (25-ton capacity). 13 Ottawa hustlers (35-ton capacity). 1 Ottawa hustler (125-ton capacity). 1 P & H truck crane with 70 ft. boom (90-ton capacity). 2 Hyster cranes (5-ton capcity). 41 Hyster trucks (capacities ranging from 2.5 tons to 23 tons). 1 Kalmar truck (25-ton capacity). 212 reefer plug slots.

Stuffing and Stripping Facilities: 62,680 sq.ft. 88 truck bays. Served by rail siding.

Ro/Ro Accommodation: 2 ramps×60 tons.

Rail Service: Conrail.

Global Marine Terminal/Jersey City:

Location: West shore of Upper New York Bay at the Jersey City-Bayonne boundary (part of the Port Jersey industrial complex).

Owner or Lessee: Global Terminal and Container Services, Inc.

Terminal Operator: Global Terminal and Container Services, Inc.

Address and Telephone: P.O.Box 273, Jersey City, NJ 07303. Tel: (201) 451-5200 or (212) 344-7020.

Total Area of Terminal: 100 acres.

Length of Ship Berth: 1,800 ft.

Depth: 40 ft. MLW.

Container Cranes: 3 Star×40 tons. 1 Krupp×40 tons.

Toploader: 1 Taylor×30 tons.

Sideloader: 1 Taylor×8 tons.

Mobile Yard Gantry Cranes: 3 Drott×30 tons. 2 Krupp×40 tons EP.

Forklift Trucks: 1×26 tons, 1×30 tons, 2×15 tons.

Reefer Plug Slots: 86.

Stuffing and Stripping Facilities: 125,000 sq.ft. 150 truck bays. Served by rail siding.

Rail Service: Conrail and Port Jersey R.R.

Chassis Vertical Stacking: 18 racks with a total capacity of 324 chassis stored vertically.

Howland Hook Terminal/Staten Island:
Location: Staten Island on the Arthur Kill just North of Goethals Bridge.
Owner or Lessee: The Port Authority of NY & NJ.
Terminal Operator: Howland Hook Terminal Inc.
Address and Telephone: 300 Western Avenue, Staten Island, NY 10303. Tel: (718) 816-7748.
Total Area of Terminal: 187 acres.
Length of Ship Berth: 2,500 ft. Depth: 25 ft. – 30 ft.
Container Cranes: 4 IHI×40 tons, 1 Peiner×50 tons with rotating spreader, 2 Paceco×40 tons.
Forklift Trucks: 19×13.5 tons to 30 tons.
Toploaders: 1×45 tons.
Reefer Plug Slots: 36.
Stuffing and Stripping Facilities: 208,000 sq.ft., 150 truck bays, 22,000 sq.ft. refrigerated warehouse plus MID defrost and inspection facility, 21,000 sq.ft. Special cargo warehouse.
Rail Service: Delaware Otsego Corp. (SIRC).

Maher Terminal/Fleet Street, Elizabeth:
Location: South side of Elizabeth Channel (Berths 52-68).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maher Terminals, Inc.
Address and Telephone: 202 North Fleet Street, Elizabeth, NJ 07201. Tel: (201) 527-8200 or (212) 962-6322.
Total Area of Terminal: 200 acres.
Length of Ship Berth: 4,875 ft. Depth: 35 ft. MLW.
Container Cranes: 2 Star×30 tons, 5 Paceco × 50 tons.
Equipment: 20 straddle carriers, 30 yard hustlers, 14 forklifts × 15 tons, 15 forklifts × 4 tons, 30 forklifts × 2.5 tons. 200 reefer plug slots.
Stuffing and Stripping Facilities: 155,000 sq.ft. 120 truck bays. Served by rail siding.
Rail Service: Conrail.

Maher Terminal/Tripoli Street, Elizabeth:
Location: Newark Bay (Berths 78, 80, 82, 84 and 86).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maher Terminals, Inc.
Address and Telephone: 4010 Izmir Street, Elizabeth, NJ 07201. Tel: (201) 527-8400.
Total Area of Terminal: 243 acres.
Length of Ship Berth: 3,150 ft. Depth: 38 ft. MLW.
Container Cranes: 3 Paceco×40 tons (low profile), 1 Canron×40 tons, 3 Morris×30 tons.
Equipment: 80 yard hustlers, 12 stackers (15 ton capacity), 7 toploaders × 40 tons, 40 forklifts × 2.5 tons, 60 forklifts × 4 tons, 4 transtainers, 200 reefer plug slots.
Stuffing and Stripping Facilities: 371,000 sq.ft., 238 truck bays. Served by rail siding.
Rail Service: Conrail.

Maersk Line Terminal/Port Newark:
Location: North side of Elizabeth Channel (Berth 51).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maersk Container Service Co., Inc.
Address and Telephone: 231 Tyler Street, Port Newark, NJ 07114. Tel: (201) 465-1000.
Total Area of Terminal: 64 acres.
Length of Ship Berth: 764 ft. Depth: 37 ft. MLW.
Container Cranes: 1×50 ton (Paceco), 2×40 ton (Paceco) and 1×40 ton (Star).
Equipment: 1 toploader × 50 tons, 1 toploader × 35 tons, 1 toploader × 13 tons, 1 stacker × 15 tons, 70 hilos × 5 tons to 7 tons. 192 reefer plug slots.
Stuffing and Stripping Facilities: 175,000 sq.ft., 154 truck bays. Served by rail siding.
Rail Service: Conrail.

Red Hook Container Terminal/Brooklyn:
Location: Brooklyn Waterfront, near entrance to Brooklyn-Battery Tunnel.
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Universal Maritime Service Corp.
Address and Telephone: Building 115, foot of Hamilton Avenue, Red Hook, Brooklyn, NY 11231. Tel: (212) 875-0777.
Total Area of Terminal: 79 acres.
Length of Ship Berth: 3,030 ft. Depth: 35 ft. – 40 ft. MLW.
Container Cranes: 3 Paceco×40 tons. 1 Star × 40/70 tons.
Equipment: 11 top handlers, 2 forklifts×26 tons, 5 forklifts×15 tons, 33 yard hustlers, 16 flatbed trailer, 125 hilos×3 tons. 150 reefer slot plugs.
Stuffing and Stripping Facilities: Break-bulk consolidation shed, 345,000 sq.ft., 80 truck bays.
Ro/Ro Accommodation: 660 ft. berth.
Rail Service: New York Dock Railway.

Sea-Land Terminal/Elizabeth:
Location: Newark Bay (Berths 88, 90, 92, 94, 96 and 98).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Sea-Land Service, Inc.
Address and Telephone: P.O.Box 1050, Elizabeth, NJ 07207. Tel: (201) 558-6000.
Total Area of Terminal: 230 acres.
Length of Ship Berth: 4,519 ft. Depth: 40 ft. MLW.
Container Cranes: 6 Paceco×30 tons and 1 Mitsubishi × 40 tons.
Equipment: 3 top loaders×30 ton capacity, 45 forklifts×2.5 tons to 25 ton capacity, 60 yard hustlers, 1×40 ton transtainer.
Stuffing and Stripping Facilities: 306,000 sq.ft., 328 truck bays. Served by rail siding. 468 reefer plug slots.
Rail Service: Conrail.

South Brooklyn Marine Terminal/Brooklyn:
Location: Brooklyn shore of Upper New York Bay.
Owner or Lessee: The City of New York.
Terminal Operator: Continental Terminals, Inc.
Address and Telephone: Foot of 39th Street, Brooklyn, NY Tel: (718) 499-6300.
Length of Ship Berths: 1,535 ft. container berth plus general berths of 4,600 ft. Depth: 32 ft. MLW.
Container Cranes: 1 Star×50 tons, 1 Kone×50 tons
Equipment: 9 Valmet straddle carriers, 6 Clark straddle ca 10 Ro-Ro yard Tractors, 8 stackers, 65 forklift trucks (varying cap
Stuffing and Stripping Facilities: 600,000 sq.ft., 4 separate LTL 446,000 sq.ft. CFS and general cargo sheds.
Roll-On/Roll-Off Accommodations: 2
Rail Service: New York Cross Harbour Railroad Terminal Corp.

Universal Terminal/Port Newark:
Location: North side of Elizabeth Channel (Berths 53, 55, 57 and
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Universal Maritime Service Corp.
Address and Telephone: 221 Starboard St., Port Newark, NJ 0 Tel: (201) 589-6200.
Total Area of Terminal: 89 acres.
Length of Ship Berth: 3,058 ft. Depth: 35 ft. MLW.
Container Cranes: 3 Paceco×40 tons.
Equipment: 11 top handlers, (42 ton capacity), 2 forklifts (26 5 forklifts (15 tons), 33 yard hustlers, 16 flatbed trailers, 25 hilos (3 248 reefer plug slots.
Stuffing and Stripping Facilities: Break-bulk shed 250,000 sq.ft. S by rail sidings.
Rail Service: Conrail.
Also see "Berthing".

CRANES: Mobile floating cranes with capacity up to 500 tons ava

STEVEDORES: 13 stevedoring firms are active in the port, ma whom are also terminal operators. Normal working hours 0 1700 hrs. Bulk Cargo work usually continues through 24 hours.

TANKERS: There is a history of repeated breakouts in the New area due to sudden wind gusts of up to 60 knots, particularly asso with squalls. Moorings should, therefore, be kept tight and winch b tightened up after moorings have been adjusted.
Brooklyn: Paragon Oil Terminal, 2 berths, depth 37 ft.; Patchog Terminal, 2 berths, depth 29 ft. and 35 ft.; Whale Oil Terminal, 1 depth 36 ft.
Hudson River: Tappan Oil Co., 1 berth, 35 ft. depth.
Bayonne, New Jersey: Public Oil Terminal, 3 berths, 32 ft. depth; H Oil Terminal, Constable Hook, up to 38 ft. depth; Belcher Oil Co., 3 berths up to 38 ft. depth; Texas Oil Co., 4 tanker berths, up to depth; Texaco, 4 berths up to 32 ft. depth. Constable Terminal: 1 for handling caustic soda, chemicals, vegetable oil and mo 27 tanks (9 million gallons). Max. draft 31 ft. MLW.
Kill Van Kull: Lehigh Tanker Terminal, chemicals, 35 ft. depth; H Oil Co., 3 tanker berths, up to 38 ft. depth; Texas Oil Co., 4 tanker up to 32 ft. depth; Ross Oil Co., 1 berth up to 32 ft. depth.
Newark, New Jersey: 4 berths, 31 ft. and 32 ft. depth.
Elizabeth New Jersey: Chevron Oil Company, 1 tanker 26 ft. depth; Crown Central, 1 tanker berth, 30 ft. depth.
Arthur Kill: **Perth Amboy,** Chevron Oil Co. (tanker berth, 26 ft. Hess Oil Co. (tanker berth 30 ft. depth); Cities Service (tanker 34 ft. depth); **Stolt-Nielsen,** (tanker berth max. draft 38 ft.); Se Royal Petroleum Co. (tanker berth, 32 ft. depth); Public Serv (tanker berth, 35 ft. depth); Shell Oil Co. (tanker berth, 35 ft. dept **Socony,** Mobil Oil Co. (2 tanker berths, 27 ft. and 30 ft. **Carteret,** American Oil Co. (tanker berth M, 25 ft. depth); American (2 tanker berths, 25 ft. and 35 ft. depth). **Linden,** Cities (tanker berth, 32 ft. depth); Humble Oil Co. (tanker berth, 35 ft. Sinclair Oil Co. (tanker berth 31 ft. depth). **Gulfport,** Gulf Oil Co. berth, 32 ft. depth).

Lightering Operations: Most crude and black oil tankers occasional clean oil tanker entering the Port of New York lightered before proceeding to their assigned discharge berths. vessels are assigned an anchorage either off Stapleton, Bay R Gravesend Bay. (See "Anchorages" and "Approaches").

Lighters used in the New York area range from 1,000 – 12,0 capacity.

The U.S. Coast Guard has established regulations for oil operations in U.S. waters as a means to avoid oil pollution regulations are enforced. The principal items covered by regulations are as follows:

1. Designation of person(s) in charge.
2. Qualifications of person(s) in charge.
3. Oil transfer procedures.
4. Emergency shutdown.
5. Records.
6. Requirements for oil transfer.
7. Connections, drip pans.
8. Declaration of Inspection.
9. Supervision by person in charge.

In most instances, an oil Company employed Oil Pollution P Inspector will board vessel at anchorage to assist with requirements. In any case, the lighter officer must contact ve joint inspection and completion of a Declaration of Inspection transfer can be started.

Exxon Bayonne Terminal: The Exxon Bayonne Terminal at Bayonne, New Jersey, is located on the Northside of Kill Van Kull, 1.6 miles East of the Bayonne Bridge.

The terminals structure is a 700 ft. long concrete pier having a hose gantry and shore gangway. 2 teflon faced fenders breast the vessel out into the dredged basin.

Lube Dock – Pier 1: Docking/Mooring: Usually all vessel dock portside to at Bayonne with 2 tugs assisting. Vessels should arrive off the berth at slack water, turn, and head into the slip. Care should be taken not to have too much headway or to set down on the corner of the pier which is not fendered. Vessels should be taken completely into the slip before landing on the fenders. Fenders are teflon faced and will not slow the forward motion of the vessel. Once in position, 2 tugs will hold the ship while lines are run out. If the vessel extends past the end of the pier, then extra lines should be used aft as a precaution for the tidal current and passing traffic. Vessels having a bow thruster can undock with 1 tug, at the discretion of the Master. (See "Plan").

Hoses/Pumping: All shore connections are 6 in. A maximum pressure of 125 p.s.i. is enforced. There are no slop facilities ashore.

Bunkers/Water: Bunkers are not available at this facility. Bunkering can be arranged at anchor. For bunker requirements, the vessel's Agent should be contacted prior to taking arrival at Ambrose. Fresh water is not available at the dock.

Weather: There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the dock must insure that mooring lines are taut and properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if conditions warrant. The terminal closes the berth during sustained Westerly winds of 50 m.p.h. or during sustained winds over 73 m.p.h. from any direction. During these conditions, vessel must shut down and disconnect; a tug may be required to stand by.

Fuels and Specialty Dock – Pier 6: The Fuels and Specialty docks are located on the North side of Kill Van Kull, just off the Constable Hook Range. The terminal structure is a steel and concrete pier connected to a concrete capped turning dolphin and fender system on the offshore end.

Docking/Mooring: Prior to berthing the intended docking manoeuvres should be reviewed with the Pilot. Information on the velocity and direction of the current as well as water height should be obtained from the Pilot. Tidal data is recorded from stations at the Battery, New York and Bergen Pt., New Jersey every 6 minutes. Readings can be obtained through VHF Channel 9 KEH 567.

Generally, vessel is assisted by 2 tugs. One of the 2 tugs will make fast near the bow. The second tug stands by on the inboard berthing side forward without making fast. As the vessel approaches the berth the inboard tug moves aft along the ship's side. This tug then shifts to the outboard quarter of the vessel in order to assist in berthing the ship against the dock fenders.

If installed, bow thruster should be ready for immediate use.

Ships should arrive off the berth at slack water. Care should be taken approaching the berth with minimum headway. Vessel should be taken completely into the slip before landing on the dock fenders.

Occasionally, unexpected cross currents are experienced while approaching the berth. Immediate corrective action may be required to maintain the ship within the dredged area in the vicinity of the berth.

Vessels approaching Pier 6 for docking on the North berth will appear to be making an approach towards the South berth. When the vessel's bow is close to the dolphin a the end of Pier 6, the ship is moved laterally North and ahead a sufficient distance to clear the fender line of the North berth. This manoeuvre is necessary due to the shoal area North of the dredged basin. Once in position 2 tugs will hold the ship while lines are run out. If the vessel extends past the end of the pier, then extra lines should be used aft as a precaution for the tidal current and passing traffic. Vessels having a bow thruster can undock with 1 tug at the discretion of the Master. (See "Plan")

Hoses/Pumping: Presentation flange sizes are grade dependent and can be obtained from Agent prior to arrival. A maximum hose pressure of 125 p.s.i. is enforced. There are no slop facilities ashore.

Bunkers/Water: Bunker C is available at this facility. Other bunkers can be arranged at anchor. For bunker requirements, the vessel's Agent should be contacted prior to taking arrival at Ambrose. Fresh water is available in limited quantities at a rate of about 20 t.p.h.

Exxon Bayway Terminal: The Exxon Bayway Terminal, consisting of 2 marginal type berths, is owned and operated by Exxon Company, U.S.A.

It is situated on the West bank of the Arthur Kill just below the Goethals Bridge.

Proceeding from Anchorage to Bayway: The Pilot/Mooring Master and tugs join the vessel at the anchorage. One of the tugs will assist in holding the stern of the ship up against the tide if a turn is required in the anchorage. Departure from anchorage is timed so that the vessel will arrive off Bayway at HW slack.

Before leaving the anchorage, the Pilot will broadcast a message by VHF advising other ships and New York VTS of the position of the vessel and the route it will follow. Normally 2 tugs attend the vessel while proceeding from the anchorage through the Kill Van Kull and Arthur Kill (between Staten Island and New Jersey) to the berth.

Three bridges are passed:

Bayonne Bridge: Vertical clearance of 140 ft. over channel at MHW.

Lift Bridge: Vertical clearance of 135 ft. over channel at MHW.

Goethals Bridge: Vertical clearance of 137 ft. over channel at MHW.

Because of the heavy traffic situation in the Port of New York and the close proximity of berthed vessels, ships should proceed at a moderate speed during the entire passage to Bayway. Also, ship personnel should stand-by the anchors.

On entering the Kill Van Kull the tide will be setting Northwestward and attention is to be paid to stay well clear of the bank extending Southward from Robbins Reef.

As a rule, the Pilot will be aware in advance of seagoing vessels proceeding Eastward through the Kill Van Kull. Normally the vessel will not enter the Kill until such outbound vessels have cleared the entrance.

Extreme caution is to be exercised when approaching and passing Bergen Point (about 3 miles Westward of the entrance to the Kill Van Kull) where 3 channels converge. In this are the view is obstructed by the Bayonne Bridge and by oil storage tanks located on Bergen Point.

The Pilot will communicate (VHF Channel 13) with the Pilots on the other vessels approaching this point and make arrangements for the vessel to pass this area without encountering other seagoing ships. Traffic information is also obtained from the operators of the railroad drawbrige across Newark Bay.

At times, cargo ships with destination Port Elizabeth wait off Bergen Point for the drawbridge to open. Normally, the Pilot is aware of this situation well in advance and the speed is adjusted to ensure that such ships are not passed off Bergen Point.

Berthing: The dock is a substantial concrete marginal-type with bollards located on land and on the dock. Most breast lines are run to hooks located on the dock which are secured to the shore bollards by wires. Spring lines are generally passed to the dock first. Large vessels dock and undock with the assistance of 2 tugs.

Large ships are berthed starboard side to (See "Plan") heading Southward; LPG ships docking at Berth No. 2 may berth portside to. (See "Report" dated August 1984).

The dredged basin at Berth No. 1 requires that the vessel be stopped off the berth and breasted into position. During docking, when vessels are in position, tugs hold the vessel alongside until all mooring lines are passed.

Passing traffic could cause the ship to break away from the Berth if mooring lines are not maintained tight and if the ship is not kept snug alongside at all times.

The following minimum moorings are required at the Bayway Pier:

Forward	*Aft*
2 head lines	2 stern lines
2 breast lines	2 breast lines
2 spring lines	2 spring lines

Depending on circumstances, additional moorings may be run out.

Departure:

1. Ships under 660 ft. LOA and mast height up to 130 ft. are turned off the berth and proceed to sea along the route which was followed when entering. The same precautions have to be taken when approaching the area off Bergen Point outward.

2. Ships over 660 ft. LOA are not turned off the berth because of limited manoeuvring space. They proceed to sea via the Southern part of Arthur Kill and Raritan Bay. A tug will accompany the ship until it has cleared Tufts Point (about 4 miles South of Bayway). The depths in the channel Southward of Bayway limit the departure draft to 33 ft.

The bridge across the channel near the Southeastern tip of Staten Island has a clearance of 143 ft. over the channel at MHW. Rounding Tremley Point (about 2 miles South of Bayway) requires particular attention. The view in this area is obstructed, therefore, before reaching this point the Pilot should ensure that there is no traffic approaching from the South which could hamper safe passage. Off Tufts Point, a 70° course alteration to starboard has to be made. The manoeuvring space is limited, and if required, the attending tug will assist in making the turn.

Tidal Information: Off Bayway the HW levels vary between 2.5 ft. and 5.0 ft. above MLW. Extreme LW has been reported as low as 4.0 ft. below MLW level. Current velocities of up to 2.0 knots are experienced.

Loading Connections: Berth No. 1 has 3×10 in. Chicksan Arms for receipt of crude oil.

Berth No. 2 has 3×10 in. Chicksan Arms for LPG receipt.

Both berths can also handle many refined black and clean products with various hose sizes up to 10 in.

Bunkers and Fresh Water: No bunkers are available through the pier connections at Bayway. All grades of bunkers may be supplied by barge, either at anchorage or while alongside the pier, providing arrangements are made in advance.

Fresh water is available in unlimited quantities, at approximately 20 t.p.h. to 25 t.p.h.

Stores, Provisions, Lubricants: All kinds of stores and provisions can be made available and delivered by truck or lighter, if advance request of at least 24 hours is received. During normal working days, stores and provisions may be supplied on very short notice.

Weather: There is a history of repeated breakouts in the New York area due to a sudden wind shifts accompanied by strong gusty winds. Vessels alongside the dock must ensure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. During wind shifts and frontal passages, vessels have been blown off the dock with vessel and dock damage as well as pollution resulting. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant. Dock personnel will also advise vessels to shut down operations if an electrical storm is in the vicinity or if winds exceed 30 m.p.h. At 35 m.p.h. to 40 m.p.h., hoses and/or arms may be disconnected.

Belcher Bayonne Terminal: The Belcher Terminal in Bayonne, New Jersey is located 1.1 miles East of the Bayonne Bridge on the North bank of Kill Van Kull. The dock's facilities consist of 2 concrete mooring islands protecting a 600 ft. long wooden pier on which all pipelines and the hose gantry are supported.

Transit from Anchorage to Terminal: The Pilot/Mooring Master will board and heave anchor approximately 1.5 hours to HW (Battery). Then proceed into Kill Van Kull. 2 tugs will assist the vessel in docking. (See also Bayway Terminal).

Docking and Mooring: All vessels dock starboard-side-to with the assistance of 2 tugs. Vessels approach the terminal at time of HW slack with minimal headway. Due to the shape of the dredged basin all vessels are normally spotted off the berth and then moved broadside into position alongside the breasting islands. Tugs hold vessel in position while a small line boat runs head and stern lines to pile clusters. Note that the head line cluster is placed well inshore resulting in long (460 ft.) head lines leads. Head and stern lines cannot be wire due to the inadequacy of the small line boat. See "Plan".

Due to heavy passing vessel traffic, all mariners are advise to run extra lines to ensure that the vessel will remain safely in berth at all times.

The minimum suggested mooring arrangement is as follows:

4 head lines
3 forward springs
3 after springs
4 stern lines

Due to the poor mooring line leads from the bow, extra care should be given to the tending of all lines during the discharge. *There have been reports of vessels being pulled from the berth by passing traffic; exceptional care must be taken to properly tend mooring lines at all times.*

Hoses and Pumping: Cargo manifolds should be prepared prior to docking. The proper size and number of reducers should be in place and the blanks removed. Prior to berthing, ask the vessel's Agent what number and size of reducers are required. This will vary depending on the particular cargo being delivered. All shore hoses are equipped with 8 in. American standard flanges. Maximum working pressure allowed at the manifold is 125 p.s.i.

Bunkers and Water: Some grades of fuel oil are available from the dock in emergency situations, but most vessels bunker by barge. Fresh water is available in unlimited quantities at approximately 20 t.p.h.

Weather: There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the dock must ensure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant.

Shipmaster's Report: 1976.

Greater New York Terminal, Astoria, Long Island:

Location of Berth: Lat. 40° 47' N., Long. 73° 53.7' W.

Distance from Entrance to Berth: 28 miles.

Max. Size at Berth: LOA, 900 ft. Draft, Pilot stated 34 ft.

Restrictions: Vessel should be ballasted sufficiently to pass under Brooklyn Bridge, clearance 127 ft.

Vessels may berth and unberth day and night but only at certain stages of the tide.

Anchorage: At Stapleton as designated by USCG.

Terminal Information: Starboard side manifold to barge at Stapleton Anchorage, use 6 in. hoses. Port side manifold used at the berth, ship's hoses not required. The connection is 12 in. running into 18 in. Nearest shore tank 1,000 ft. from berth. Line fitted with steam jacket but not efficient. Max. pressure allowed 125 p.s.i. Shore gantry used at berth. Derrick used at anchorage for discharging into barge. Product handled: Fuel Oil (Heating Oil). No slop tanks available.

General: Pilotage compulsory. Ambrose Pilot requires 24 hours' notice of arrival. Radio station handling traffic is Chatham. Most services are available at the berth, however it is advisable to take stores and send laundry from Stapleton Anchorage as there is no means of delivery at the berth other than carrying by hand. Stapleton Launch Service, tel. 981-8333/8384. Fresh water may have to be taken by barge in very severe weather as shore lines become frozen.

Approaching: From a Line from Rockaway Inlet to Ambrose thence Highlands Light, vessel must remain on VHF Channel 13 for ship-to-ship communication. When Pilot on board he maintains this Channel and ship can use own VHF other Channels. Marine operator on VHF 26 (call). For the passage of East River (remember Brooklyn Bridge Clearance 127 ft.) one tug each bow alongside. After Hell's Gate and passing Port Morris to port, vessel cants to starboard to pass between North and South Brothers to starboard and Rikers Island to port through 500 ft. wide buoyed channel (some unlit) South to berth (inwards). It is preferable to come through Hell's Gate at HW or LW slack, thus avoiding cross currents between Brothers at other times.

Report: August 1984.

Exxon LPG Berth at Bayway:

United States Coastguard requires all vessels with cargo on board (other than heel) to both enter and depart via Southern Channel, regardless of length. If vessel discharges completely (only heel remaining), then vessel is considered non-dangerous by U.S.C.G., and may depart via North Channel (without turning). (If completely discharged, other gas carrier restrictions – daylight only, 2 mile visibility, etc. – also do not apply.)

There are obstructions to South of Exxon berth which limits distance between manifold and bow or stern to 330 ft. (May be stretched to 335 ft. by Exxon on case by case basis.)

Other limitations given by Exxon for berth:

Draft: 31 ft.
Beam: 100 ft. (may be stretched)
Manifold Position: 13 ft. to 68 ft. above water line, 6 ft. to 15 ft. from deck edge.

Therefore any vessel which sails with part cargo must be turned for departure to comply with U.S.C.G. although it is physically possible to turn vessels up to 725 ft. – 730 ft. LOA off Exxon Berth provided there is no vessel berthed opposite Exxon at Gulfport (it has been done). Exxon is afraid that vessel might damage sea water intake structure for refinery while turning, and therefore says vessels longer than 660 ft. (may be stretched to 680 ft.), cannot be turned.

Other possibilities for turning are:

Continue North about 1 mile to Elizabethport Container Terminal where channel is wider.

Back ship anywhere between a few ship lengths to 0.5 miles South of Exxon, and then turn. We were advised by East Coast Pilots that it is possible to turn ship up to 730 ft. LOA at that location, with draft limit 25 ft. forward, 30 ft. aft. However, others advise that although oil tankers customarily turn at that location, it involves touching bottom (mud) at bow, and is therefore inadvisable for gas tankers.

FRESH WATER: Available at most piers in the port district at a no rate. Water barge available to serve vessels at anchor in emergen this is expensive.

FUEL: All grades of fuel readily available. Except for tankers load discharging, bunkers are normally delivered by barge. It ma economical to shift vessel to refuelling berth.

CONSULS:

Argentina	Guatemala	Nicaragua
Bangladesh	Guyana	Nigeria
Belgium	Honduras	Pakistan
Bolivia	Hungary	Poland
Bulgaria	Iceland	Romania
Cameroons	Indonesia	Sierra Leon
Canada	Iran	Somalia
Chile	Liberia	South Afric
Costa Rica	Luxemburg	Suriname
Czech Rep.	Madagascar	Switzerland
Denmark	Malaysia	Thailand
Ecuador	Malta	Turkey
Finland	Morocco	United King
France	Myanmar (Burma)	Venezuela
Germany	Netherlands	Yugoslavia
Greece	New Zealand	

REPAIRS: All facilities available for any size vessels.

DRY DOCKS: 4 docks with lifting capacities up to 25,000 (Bethlehem) and 1 dry dock capable of handling vessels of up to 1,1 LOA, 140 ft. beam and 120,000 d.w.t.

GANGWAY/DECK WATCHMEN: Available and recommended crew detained by Immigration.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 lb. tobacco, 1 wine/spirits per man.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight S Time, GMT minus 4 hours from first Sunday in April till last Sund October.

AIRPORT: Kennedy International Airport, Newark International A La Guardia Airport.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King Birthday (January 15th); Lincoln's Birthday (February Washington's Birthday (February 22nd); Gleason's Birthday (17th); Good Friday; Memorial Day (May 30th); Independence Day 4th); Labour Day (first Monday in September); Columbus Day (O 12th); Armistice Day (November 11th); Thanksgiving (fourth Th in November); Christmas Day (December 25th). No work on New Day, Independence Day, Labour Day and Christmas Day.

SHORE LEAVE: Allowed except for crew members detain Immigration.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I- be made up for each crew member on arrival.

SEAMAN'S CLUBS: Seaman's Church Institute, 118 Export Port Newark, NJ 07114. Tel: 1-201-589-5828. Fax: 1-201-817-8

BERTHING:

1. Port Nikiski Dock: 3 sided, 550 ft. long, 200 ft. on each side, 1,000 ft. wide, 12 feet at MLLW. 400 ft. by 75 ft. covered storage.

2. Three finger piers for tankers and bulk carriers. All exceed 40 ft. depth at MLLW.

All 3 berths are dolphin berths ideal for rapid bulk loading.

Main products:

(a) Unocal Chemicals and Minerals Dock: Bulk urea and ammonia liquid. Vessels docking at Unocal require between 14 – 24 lines, depending on length and beam of vessel and season. Loading of urea is done through fixed spout, loading rate approximately 800 short tons per hr. Vessel must shift alongside from hold to hold. This is only done during slack tide which is about every 6 hours and lasts for about 1 hour.

Also see "Tankers" and "Shipmaster's Reports".

(b) Phillips Petroleum Dock: Petroleum products and liquid natural gas. See "Tankers".

(c) Kenai Pipeline Dock: Refined and crude petroleum products.

Vessels at Kenai Pipeline Dock must maintain 5 ft. under keel clearance at all times. Vessels require 8 wires in their mooring arrangement and must have 12 lines as a minimum and 18 – 20 lines in Winter.

TUGS: Not available.

STEVEDORES: Two gangs.

MEDICAL: Health Centre, 3 doctors, 3 dentists.

TANKERS: *Kenai LNG Marine Terminal:* The Kenai LNG Plant and Marine Terminal are located on the East side of Alaska's Cook Inlet (Lat. 60° 40' 43" N., Long. 151° 23' 38" W.). The facilities are jointly owned by Marathon Oil Company and Phillips Petroleum Company.

Operator: Phillips Petroleum Co. (See "Authority").

No. of Berths: One.

Max. Size: LOA 261 m., max. draft 10.1 m., max. beam 40 m.

Max. Berthing Displacement: 40,500 tonnes.

LNG Tank Capacity: 3 × 37,775 cu.m.

Depth Alongside at Zero Tide: 12.80 m.

Normal Side to when Berthing: Port.

Loading/Discharge Arms (from seaward):

Arm No.	*Use*	*Diameter*
1	Liquid	30.5 cm.
2	Vapour	30.5 cm.
3	Liquid	30.5 cm.
4	Fuel/Diesel	20.3 cm.

Clearances required on vessel to fit Loading/Discharging Arm:

Flanging distance from ship's side to flange face:	Max. 4.0 m.	Min. 2.1 m.
Allowable spacing between manifold centres:	Max. 3.5 m.	Min. 1.8 m.
Centre Line of Manifold above Water Line:	Max. 21.7 m.	Min. 15.4 m.

Working Range at Ship's Rail:

Height above Datum: Max. 26.8 m. Min. 9.4 m.

Fore and aft slew allowance: 4.6 m.

Ship/Shore Communications, Ship/Shore Links, etc.: Telephone connections to the plant control room and outside phone line are available. Mooring line tensions are available to vessels fitted with proper equipment. ESD system is pneumatic.

Minimum Mooring Requirements:

Moorings	Head Lines	For'd Breasts	For'd Springs	Aft Springs	Aft Breasts	Stern Lines
Numbers of Lines	3	2	2	2	3	3

Allowable Speed of Approach for Berthing: 17.3 cm./sec.

Ship's Pipeline Condition on Berthing: Warm.

Manifold Liquid Line Filters Fitted: None.

Type of Filter: N/A.

Bulk Loading/Discharging Rate Permitted: 5,000 cu.m./hr.

Min. Liquid Flow Rate available: 3,500 cu.m./hr.

Max. allowable Volume of Return Gas: 21,700 cu.m./hr.

Temperature of Return Gas: −100°C.

Max. allowable Cargo Pressure on Arrival: 0.25 Bar(g) A.

Fuel/Fresh Water/Stores:

Availability of Supplies	*YES/NO*	*Line Size* (m.)	*Normal Quantity available* (cu.m.)	*Delivery Rate* (cu.m./hr.)
Liquid Nitrogen	NO			
Drinking Water	YES			
Fuel Oil	YES	0.203	1,250	318
Diesel Oil	YES	0.203	636	318
Dirty Ballast or Slop Facilities	NO			

Tugs: Not available.

Tidal and Current Information: Semi-diurnal.

Range of tides: Highest Astronomical Tide (HAT): 7.9 m.
Lowest Astronomical Tide (LAT): −1.8 m.

Pilotage:

Harbour Pilot boarding position: Lat. 59° 35' 05" N., Long. 151° 26' 05" W. (Homer Pilot Station).

Distance – Sea Pilot to Berth: 83 miles.

Pilot Boarding Arrangements: By Boat.

VHF Communication Channels: 16 and 10.

Number of Pilots boarded: 1 normal, 2 if Training Pilot.

Traffic Surveillance/Monitoring Service available: No.

Charts: DMA 16645, 16661 and 16662.

Berthing/Unberthing: 24 hours.

Unocal Wharf: The Unocal Wharf is situated on the East side of Cook Inlet. The exact position of the Wharf is Lat. 60° 39' 30" N., Long. 151° 23' W.

There is one berth on the Inlet side approximately 1,135 ft. long from outer dolphin to outer dolphin. Water depth is 40 ft. at MLLW.

Tides and Currents: The maximum tidal range is approximately 33 ft., and the minimum range is 12 ft. Maximum tidal current is flood: 5.8 (m.p.h.) Northerly and Ebb 4.8 (m.p.h.) Southerly. Average tidal current is flood: 3.8 (m.p.h.) Northerly and Ebb 2.6 (m.p.h.) Southerly.

Winds: Winds of varying strength may come from any quarter. The prevailing wind however is from S.S.W. in the Summer, and N.N.E. in the Winter. Visibility in this area of Cook Inlet is generally excellent with occasional fog lasting until noon.

The local weather is seasonal with temperatures ranging from −40°F to 85°F. The U.S. Coast Guard radio stations make scheduled broadcasts, preceded by a preliminary call on 500 kHz and 2182 kHz at times.

Hours of Operation: There are ample anchorage and manoeuvring areas within Cook Inlet. The Terminal is available 24 hours a day, 7 days a week.

Time Belt: Local time (Yukon Standard Time – minus 9 hours on Greenwich time or Zone plus 9).

During the months of April through October, this may be modified by use of Daylight Savings Time to minus 8 hours GMT or Zone plus 8. All communications should be in local time.

Telephones: The Terminal telephone is operational 24 hours a day (907-776-8121, ext. 3833). There is a pay-phone for public use (907-776-9973).

MARINE VESSEL STANDARD FOR UNOCAL CHEMICALS DIVISION KENAI WHARF:

General: It is the intent of Unocal Chemicals Division to operate the Kenai Wharf in a safe and workable manner, and to comply with all pertinent OSHA Regulations. Unocal Chemicals Division will work within the Operations Guide prepared by the Nikiski Marine Safety Committee and the "International Rules of the Road" (Colregs 72), as well as the regulations and directives of the U.S.C.G.

The carriers and the ship's Agent must be notified that Unocal Chemicals is not capable of providing maintenance at the Kenai Wharf. All mechanical work must be done elsewhere and corrected before giving Unocal Chemicals Division Notice of Readiness.

Carriers should be notified that water and provisions will not (officially) be available at the Kenai Wharf.

The ship's Agent must be readily available while the ship is berthed at the Unocal Chemicals Division Wharf.

A. Communications: Before arriving within 10 miles of the Nikiski Terminal Complex, the incoming ship or barge and tug will establish its intention, and determine the intentions of vessels in the area by bridge-to-bridge communications.

While at berth, a means of two-way voice communication will be maintained at all times between ship and/or barge and tug and the wharf. When a vessel is at it's dock, Unocal Chemicals Division will maintain a watch on VHF Channels 7A or 10 intended for ship-to-wharf communication. Channel 7A will also be used to communicate emergency messages to other terminals.

B. Equipment:
1. If a tug becomes immobilised, a substitute equivalent tug is to be provided as soon as possible. Emergency tug repairs shall not be done at the Kenai Dock, unless first authorised by Unocal Chemicals Division.
2. Vessels and barges must be equipped with adequate winches, lines and personnel to handle them. This means a minimum of 2 forward and 2 aft winterised double drum winches or equivalent.
3. All vessels should be prepared to put out and properly tension the minimum number of good lines shown below. Soft lines should be 7.5 in. minimum circumference, and wire lines should be 1 in. minimum diameter. Lines should be a minimum of 400 ft. length.

Lines required for ship length:

	Less than 500 ft.	500 – 550 ft.	550 ft. and over
Summer Rules	14	18	20
Winter Rules	18	22	24

Barges: 8 × 1 in. wire lines and 2 × 7.5 in. soft lines.

C. Ship Configuration:
1. Ships exceeding 650 ft. in length or 35,000 d.w.t. tons should be considered only under special circumstances, and their use must be specifically approved by the Manager of Manufacturing.
2. Ships smaller than 650 ft. in length or less than 35,000 d.w.t. tons, which meet all other conditions specified herein, can be chartered without prior plant approval during periods of Summer conditions only.
3. Under Summer condition, ships 650 ft. or less must have a minimum distance of 70 ft. from the bow to the back edge of the most forward hold to be loaded, and also from the stern to the front edge of the furthest aft hold to be loaded. Ships larger than 650 ft. will need more than 70 ft. clearance.
4. Ships smaller than 600 ft., which meet all other conditions specified herein, can be chartered without prior plant approval during any season.
5. When Winter Rules are in effect, ships larger than 600 ft. length should have more than 70 ft. distance. All such ships must still be approved by the Kenai Plant prior to chartering.
6. No hatch should have dimensions smaller than 30 ft. long and 28 ft. wide, and shall not be more than 24 ft. from edge of ship to edge of hatch.
7. Superstructure must not overhang the hull.
8. "Tweendeckers" are undesirable and should be avoided. Also "Tumble home" ship sides must be avoided, as they could cause damage to fender systems.

D. Approach and Departure:
1. All movement within the Nikiski Terminal Complex priority area is governed by existing "International Rules of the Road" (Colregs 72).
2. All vessels and barges should arrive at the Wharf in trim, which allows for a proper light ship survey. All ballast tanks should be either completely full or empty, and any trim corrections are to fit into the correction for trim table envelopes.
3. The current should be carefully considered, so that the vessel or barge and tug are in good control, and have adequate clearance when passing nearby terminals.
4. The Wharf Supervisor or Shift Supervisor may refuse permission to dock, depending on wind and water conditions at the dock.
5. It is recommended that ships dock with the port side to the Wharf.
6. An anchor may be used to assist with approach, but once moored, the anchor should be weighed.
7. Departure shall be timed so as to utilise the tide for maximum safety. Reasonable effort should be made to depart into the current.

E. Personnel:
1. The agreement with the vessel or barge line must specify that the ship or tug retain enough crew on board at all times to safely cast-off and leave the dock. The agreement must also specify constant line tending. If lines are not tended to the satisfaction of the Wharf Supervisor, loading may be suspended.
2. It must also specify that the ship or tug must maintain the necessary watch in the engine room and bridge to permit immediate manoeuvring response.
3. During adverse wind, tidal or ice conditions (as determined by Unocal Chemicals Division), personnel and equipment must be kept ready for departure.

F. Cast-Off:
1. The vessel, barge and tug must be seaworthy and prepared to cast-off at any time during loading.
2. During seasons when ice, wind or tidal conditions would put the ship, barge, tug or wharf in jeopardy, they may be asked to cast-off.
3. A South/West wind aggravates any adverse conditions at the Unocal Chemicals Division Wharf. Therefore, at any time the wind velocity increases to 15 m.p.h. from that quarter, loading operations may be suspended, and vessel or barge and tug made ready for cast-off.
4. If the winds increase in velocity, or are forecast to increase, the vessel or barge and tug may be asked to cast-off.
5. The casting-off procedure shall at all times be at the direction of the Officer-in-charge of the vessel or tug.
6. Approximately 30 minutes prior to its departure, the ship shall announce its intentions on VHF Channels 7A and 16, so that other vessels and terminals in the area are alerted.

G. Winter Rules:
The starting and ending dates for Winter Rules will be establ
by the Nikiski Marine Terminal Safety Committee. During this pe
the following special rules shall apply:
1. The ship's and tug's engines, particularly cooling and
systems, should be winterised for operation in an ice filled
and −40°F air temperatures. Winches, ballast systems
auxiliary equipment must also be adequate for good oper
under these conditions.
2. Fresh water ballast must be pumped prior to arrival at the K
Dock (Lower temperatures in the Cook Inlet create the da
of freezing parts of the ballast system).
3. Tugs using sea water cooling are normally not suitable d
clogging of sea water inlet with ice.
4. Berth so as to stem the worst ice conditions to be expe
Since the ice is heavier on the flood, this means the vessel
dock with the port side to the Wharf.
5. Where applicable, manipulate ballast and cargo to keep
suction and propeller below the ice. Keep trim to a minimu
order to prevent ice from sliding beneath the vessel.
6. Unless directed otherwise by the Wharf Supervisor or
Supervisor, loading will be discontinued at no later than 2 h
into the flood tide. For urea ships, the boom will be raised
ammonia ships, the product line will be disconnected, an
barges, the power line will be disconnected.
7. Steam propulsion ships should take special precautions t
    - (a) Provide an emergency supply of water or steam to
condensers, so that any slush ice taken in can be ma
or flushed away immediately.
    - (b) Insure that fuel does not freeze, and that temperatu
sufficient to provide immediate flow of fuel to all burne
the event of an emergency. This precaution include
fuel supply for the emergency generators.
8. Vessels with internal combustion engines used as
propulsion units shall maintain such in immediate readines
use, and shall take these special precautions:
    - (a) Starting air is to be peaked in all tanks.
    - (b) Cooling water shall be heated and ready for circulat
the main engines.
    - (c) Lubricating oil for the main engine is to be in readines
service.
    - (d) Fuel system on the main engine should be purged
ready for instant use.
9. Ships must maintain the necessary watch in the engine
and bridge.

Report: February 1985.

Vessel to load ammonia at Kenai in position 60° 33' N., 151° 16
Regulations:

1. Vessel must have on board 20-24 mooring lines, each a mini
of 400 ft. in length, depending on weather on arrival.

2. Fresh water cannot be obtained or loaded at the wharf. Prov
to be obtained through ship chandler.

3. No preventative engine maintenance can be allowed at the
and vessel's engines must be maintained in such a way as to p
immediate manoeuvring power at all times while vessel is alongsi
berth.

4. Sufficient vessel personnel must remain on board during lo
to handle any emergency situation and adequate deck watch mu
maintained on a 24 hour basis.

5. For proper light ship survey vessel must arrive suitably tri
and sufficiently submerged both fore and aft.

6. Ballast tanks must be either full or empty and all cargo holds
be totally devoid of any ballast.

7. Please also ensure vessel has all certificates in order, includ
Pollution Certificate (Certificate of Financial Responsibility).

General: Please obtain Master's acknowledgment and confirma
all above. Advise Master that Pilot Station is located Lat. 59° 3
Long. 151° 24.5' W. Master should cable ETA Homer Pilot Sta
Agent.

Master to monitor ITT KFS (San Francisco) while in transit. If sh
telex on board, please provide number.

Rental mooring lines available at U.S.$300 each plus lo
unloading costs of U.S.$1800. Advise how many lines onboa
Agent will request funds based on how many rental lines necess

Berth Operator sometimes makes exceptions to restrictions on
by case basis.

IFO fuel is virtually unobtainable in Alaska. While there is one s
at Kenai (and none elsewhere in Alaska), they have a long stand
firm 5,000 bbl. minimum requirement with no exceptions.

Vessel will vacate berth during purging and will either purge at
off berth or at Homer.

Load rate 400 tonnes/p.h., except during purging, when rat
slower.

Confirm vessel has Letter of Compliance issued by Coast Gu
that vessel has been licensed to carry propane/ammonia simulta

REPAIRS: Repairs of a minor nature can be carried out in Hom

Small machine shop also available in Homer.

FRESH WATER: Available by barge from Homer at a cost of U.S
per ton (minimum supply 150 tons). For supply contact Cook Inle
(Tel: 235-8086).

FUEL: Only available if minimum 5,000 bbls. ordered from Tes

TELEPHONES: Saling Ship Services can arrange a cellular tel
for Master when acting as the vessel's Agent.

TRANSPORTATION: Highway to Anchorage and Homer. Air t
available.

SERVICES: Saling Ship Services (See "Agent") can supp
stores (fresh provisions, rice, flour, dry goods and soft drinks
bonded stores). Saling can also arrange liferaft inspection.

GARBAGE DISPOSAL: Drums are placed on board, and
plastic bags should be placed in the drums.

GENERAL: Port is open all year. Winters vary, some being mild and some being severe. The port has had ice in years past from November till March.

Currents are between 4.0 knots and 6.5 knots.

Kenai is a town of 5,000 people with several banks, supermarkets, a mall, dental and medical offices. The Central Peninsula Hospital is located in Soldotna, a small neighbouring town 12 miles away. Kenai also has several motels, a theatre, book store and post office. Excellent fishing during June, July and August. Fresh salmon available during this time.

OPERATIONS GUIDE – NIKISKI MARINE TERMINAL COMPLEX:
This guide (not producted in full) establishes voluntary procedures that are designed to optimise the safety of marine operations directly related to all marine terminals existing in the Nikiski area.

Berthing Priority:

(A) Priority of berthing at a specific wharf will be established by the Terminal Operator. This sequence will be established and conveyed to subject vessels well before they approach the Terminal area, e.g. before passing Anchor Point or before departing Drift River or Anchorage.

(B) Priority for ships proceeding to different wharves will be established by mutual agreement between the Masters and Pilots of ships proceeding to the Terminal Area. This agreement will be reached by the time either of the vessels is within 10 miles of the Terminal.

(C) Upon mutual consent, the Marine Terminal Operators may impose an operational priority to override the sequence established in (B) above. In this case, onshore plant operations would be dictating a sequence change that is necessary to prevent curtailment of operations. Instructions regarding changes will be conveyed to vessels concerned prior to their approach to Anchor Point or departure from other Cook Inlet berths.

Approaches and Departing Marine Terminals:

(A) All movements inside the priority area is governed by existing USCG Colregs 72.

(B) Before arriving within 10 miles of the Terminal Complex, the incoming vessel will establish its intentions, and determine the intentions of other vessels in the area by bridge-to-bridge communications.

(C) An anchor may be used to assist with approach, but once moored, the anchor should be weighed.

(D) Summer Rules shall apply during the ice-free periods. Each marine terminal will establish its own procedures that protect the safety of the vessel and other marine terminals.

(E) Upon mutual consent, the Committee will establish a date after which all vessels entering Cook Inlet shall be prepared to comply with "Winter Rules". This date shall be selected in advance of actual enforcement of the rules to give ship's Agents and Owners adequate time to prepare for these special conditions.

(F) "Winter Rules" will be declared in force when there is free ice floating in the Inlet, in sufficient amount to cause hazard to shipping under any circumstances of weather and tide. They will remain in force for the duration of the Winter, and will be cancelled upon a mutually agreed date. The starting date for this enforcement will be established by mutual agreement of the Committee, and all ship's Agents and Owners will be notified.

The special rules that will apply under "Winter Rules" are as follows:

1. Berth so as to stem the worst ice condition to be expected. Since the ice flow is heavier on the flood, this generally means the vessel should approach the Wharf port side to.
2. Where applicable, manipulate ballast and cargo to keep sea suction and propeller below the ice, and keep trim to a minimum to prevent ice from sliding beneath the vessel.
3. No vessel will be permitted to proceed to berth that is not equipped with sufficient mooring lines of good quality to provide a safe tie-up. In heavy ice conditions, it may be necessary to double or triple the normal mooring line requirements. It is the responsibility of each Terminal Operator to confirm this requirement in advance with shipping companies intending to use their facility. However, the Terminal Operators are responsible to advise on ice conditions only, and are not responsible for providing or causing to be provided adequate lines aboard ships.

(G) Each Terminal is equipped with VHF Channel 7A. The intent is that this channel be used for all communication with the individual terminals during arrival and departure manoeuvers.

(H) Each terminal is also equipped with VHF Channel 10. The intent is that this channel be used for communications involving ship-to-shore loading/discharge operations.

At Berth:

(A) Ships, tugs and marine terminals will maintain a means of two-way voice communication between the person in charge of the transfer operation on the vessel/tug, barge and the Marine Terminal Operator.

(B) Under "Winter Rules", the ships must maintain the necessary watch in engine room and bridge to permit immediate manoeuvring response and anchors will be ready for immediate use.

(C) Under "Winter Rules", the Terminal will be prepared for immediate suspension of cargo operations and to cast-off mooring lines. Under circumstances such as restricted visibility due to darkness or fog conditions, it may be necessary to proceed to a standby condition with cargo operations suspended and cargo systems disconnected in readiness for cast-off orders. The casting-off shall at all times be at the direction of the Officer-in-charge of the vessel.

(D) Under "Winter Rules", steam propulsion ships should take these special precautions:

1. Maintain sufficient ballast or cargo aboard, so that sea suctions and propeller are below the level of any ice.
2. Provide an emergency supply of water or steam to the condensers, so that any slush-ice taken in can be melted or flushed away immediately.
3. Establish precautions to insure that fuel does not freeze, and that temperature is sufficient to provide immediate flow of fuel to all burners in the event of an emergency. This precaution includes the fuel supply for the emergency generators.
4. Keep steam flowing through steam drive equipment on deck.

(E) Under "Winter Rules", vessels/tugs with internal combustion engines used as main propulsion units shall maintain such in immediate readiness for use:

1. Starting air to be peaked in all tanks.
2. Cooling water shall be heated and ready for circulation in main engine.
3. Lubrication oil for the main engine to be in readiness for service.
4. Fuel system on main engine to be purged and ready for instant use.

(F) Except in an emergency, repairs that immobilise the ship shall not be undertaken while moored to the dock. When emergency repairs are needed, they will first be authorised by the Manager of the shore facility and the Captain of the Port, U.S.C.G.

(G) While a ship is at its wharf, each terminal will maintain a portable VHF unit equipped with Channel 7A at the wharf. This will be used to communicate emergency messages to other terminals as regards ship movements.

Departure:

(A) Departure shall be timed so as to utilise the tide for maximum safety. Reasonable effort shall always be made to depart into the current.

(B) When moored port side to and leaving during the ebb tide (or conversely when moored starboard side to and leaving during the flood tide), the current should be carefully considered, so that the vessel is in good control, and has adequate clearance when passing the berth immediately to the South (or North).

(C) Approximately 30 minutes prior to its departure, and again at time of departure, the ship shall announce its intentions on VHF Channel 16, so that other ships and terminals in the area are alerted.

(D) Approximately 30 minutes prior to ship's departure, the Terminal Representative will announce to other terminals the ship's intentions. This announcement to be made on VHF Channel 7A.

(E) Care shall be taken in establishing estimated departure time (ETD). This is important, as these times will be used by incoming or passing vessels in determining their best course to minimise hazard in their approach to the Terminal area.

SHIPMASTER'S REPORT: July 1985 (Updated 1992).
Unocal Chemicals and Minerals Dock: (Formerly Collier Pier):
In addition to the comments on the "Plan", which see; the following notes are to be considered as a advice to those entering the Port of Nikiski:

Mooring without tugs. There is a 24 hour mooring service.

No mooring during slack tide.

Currents from up to 1.5 knots to 6.0 knots experienced.

Whilst mooring present bow first as near as possible to the pier at an angle of about 25° to the pier.

Firstly pass 2 spring lines and 2 head lines forward, engines running ahead for riding off the current.

It is most important during the entire mooring operation to hold both forward springs and both head lines tight.

Send out 2 breast lines forward; tighten; put both head lines on the bitts making sure not to allow any slack.

Send out 2 spring lines and two stern lines aft and tighten.

Send out 2 breast lines aft as soon as both stern lines are on the bitts and heave the stern along. Keep both aft springs tight at all times.

Note: Ships loading urea have to shift alongside when changing to another hatch, as the conveyor belt is a single point loading type.

Whilst shifting along the pier be aware of strong currents, or ice in Winter season getting caught between pier and ship's bow.

SHIPMASTER'S REPORT: October 1987 (Updated 1992).
Unocal Chemicals and Minerals Dock: This dock is the Southernmost dolphin berth and extends into the sea for approximately 800 m. It has a fixed loader for Urea. Ammonia gas is also loaded at this berth.
Anchorage: No anchoring allowed off Nikiski or Kenai. If the vessel has to vacate the berth for a priority vessel/barge, the vessel is taken back to Homer, a distance fo 84 nautical miles.
Berthing: Well handled by Pilots, making use of the tidal streams. No tugs available. The tidal stream runs at up to 6 knots and the range of the tides are up to 28 ft. For this reason a vessel is moored with a total of 14-24 ropes, depending on size of vessel and weather conditions. Extra ropes can be hired and put on board at Homer Pilot Station.

Shifting alongside: This is only possible shortly before the changing of the tide. At all times have engines ready. Shifting up to 50 m. (2 holds) is not too difficult. We shifted from Hold No. 1 to No. 5 (100 m.) which took us about 3 hours. This is a much bigger operation than mooring as all ropes have to be shifted and there are only 4 men available ashore to assist. Also, by the time we finished there was already a strong flood tide running. When shifting over such a distance, I advise vessels to make use of a pilot.
Ice/Winds: According to pilots, some ice in Winter which makes berthing even more difficult. Strong southern winds may cause swell alongside.
Bunkers: Apparently fuel is available at another dolphin berth when unoccupied, but probably expensive.
Provisions: Ship chandlery service is available (Saling Ship Services). No vehicular access to the vessel. Provisions transported on small car which runs through narrow 1 km. tunnel to the gate. This is also used by the crew.
Loading: Loading rate approximately 500 – 700 tonnes/hr. The figures of a draft survey are taken for the final cargo loaded.

SHIPMASTER'S REPORT: February 1993 (Updated 1994).
Cook Inlet: Homer/Kenai (Nikiski).
Charts: NOAA 16640, 16645 and 16660.

General: Homer, at the entrance to Katchemak Bay, where it joins Cook Inlet, is the entrance point for ports in Cook Inlet, including Anchorage.

Homer is the pilotage point for the Inlet and affords a good anchorage and essential services. Three tanker/urea berths are situated on the East Bank of the Inlet at Nikiski, about 8 miles above the town of Kenai, which is some 80 miles above Homer.

Cook Inlet is navigable all year round by normal trading merchant vessels, but during Winter "slush", first year ice builds up above Cape Ninilchik (60° N.), when extra precautions should be taken. There is no icebreaker assistance in the Inlet.

Pilots: Main Pilot Station in Cook Inlet is at Homer where a despatcher is on duty 24 hours, although Pilots are generally not on standby here as they operate from home. Two pilot cutters are stationed at Homer, "Mary Dele" and "Katmie". The former is a red hulled craft on the lines of a fishing smack with ice strengthened hull and is used during the Winter months. During period April through to December, the "Katmie" is used, constructed of aluminium and faster than "Mary Dele".

Channels 16 and 10 are monitored by the despatcher throughout 24 hours. Normally 24 hours is required to arrange a Pilot, although sometimes a Pilot can be obtained within 6 hours. Pilots normally fly into Homer from Anchorage. All Pilots were found to be very competent and helpful.

One Pilot is used for the passage and berthing at Homer up to Nikiski or Anchorage.

Pilot boards off Coal Point.

Pilotage is compulsory for anchoring inside Katchemak Bay at Homer.

Transit time Homer to Nikiski and vice versa is about 6 hours, depending on Winter ice which can extend time to 8 hours.

Anchorage: If waiting for a berth in Cook Inlet, the recognised anchorage is in Katchemak Bay under pilotage, about 2 miles East of Coal Bay in 30 fathoms.

Fairly well sheltered, except in N.E. winds, which come whistling down Kamchatka Bay. Holding ground is good.

Vessels generally do not anchor in the Upper Cook Inlet, unless in emergency.

Tugs: At Homer, one tug of 800 h.p. available. Generally no tugs are available at Nikiski. At anchorage, there are reported to be two tugs of moderate power, but of little use in ice conditions.

Currents: Strong in the Upper Cook Inlet. At Nikiski, tidal current of up to 5.8 knots on the flood.

Berths: Nikiski: Three berths for tankers and urea ships. All are at jetties in the Inlet. The most Northern is about 1.5 miles South of East Foreland and is owned by Kenai Pipeline Co. (supplies mainly to Chevron), and is suitable for tankers of up to 120,000 d.w.t.

Just South is the LNG dock owned by Phillips and used for LNG exports to Japan.

About 2.5 miles South of East Foreland is Unocal Dock, owned by Unocal (Union Oil Co. of California), for the export of liquid ammonia and urea, and import of caustic soda and sulphuric acid for plant use. Actual size is considered by the Terminal as a "one off" before charter accepted.

Unocal's comment:
Quote:

1. Ships exceeding 650 ft. in length or 35,000 deadweight long tons should be considered only under special circumstances and their use must be specifically approved by the Manager of Manufacturing.
2. Ships smaller than 650 ft. in length or less than 35,000 deadweight long tons, which meet all other conditions specified herein, can be chartered without prior plant approval during periods of Summer conditions only.

Unquote.

Berthing is port side alongside at all berths against the flood tide.

For Unocal Jetty, a portable shore gangway is provided, tended by Terminal personnel, generally pulled onshore at the height of the flood and at very low water.

Berthing: Always on the flood tide. Berthing window is 30 minutes into flood tide to 2 hours into flood in Winter and 3 hours in Summer. Departure is as soon as the flood commences until 4 hours into the flood.

Starboard anchor is let go on approaching the berth, and generally 2 shackles are used.

Tides: Flood is always the strongest, and can run at 6 knots in Springs with a range of 25 ft.

Density at Nikiski is brackish. Water changes density around Ninilchik (60° N.).

The water temperature at Nikiski was found to be about 10° colder than at Homer (February).

Ice: During Winter, slush and first year ice builds up to maximum during February and March. Generally it does not come South of a line from Cape Douglas to Cape Ninilchik, except in Homer Harbour. With the prevailing N.E. wind, the ice tends to concentrate on the Western shore of the Inlet.

Alongside Unocal Dock (Nikiski), the flood tide brought the heaviest concentrations, blocking sea suctions for up to 5 hours. As soon as the ebb commenced, the ice tended to clear and suctions became clear. In general, the ice is of no physical danger (apart from blocking suctions) to normal merchant vessels. It will slow the vessel down during transit of Cook Inlet, and put extra pressure on moorings of vessels moored at the 3 docks at Nikiski.

Pilots report that vessels have had their engines at full ahead at the height of the flood with a lot of ice, to relieve pressure on the moorings. We went to slow ahead for 4 hours on the flood tide.

Sometimes in February and March, when ice has formed from N.E. winds, then wind changes to S.W., which raises the temperature and brings heavy snow, which lays on top of the ice. The wind then again changes to N.E., which drastically lowers the temperature, freezing the snow and slush ice in the Inlet. In these conditions, the ice bec very hard and thick and navigation can become a hazard.

At Homer in Katchemak Bay, ice forms in Coal Bay in Winter. T no hazard to vessels calling for a Pilot or going to anchor, bu nuisance to the pilot cutter and any service craft getting in and the harbour.

Pilot boarding delays can occur.

Ice Precautions: Normal merchant vessels berthing at Nikis Anchorage during January through March are required to have, U.S.C.G. and Jetty Regulations, the following:

1. Main engine power available at all times.
2. Continuous officer manning of deck and engine room.
3. Extra moorings – Unocal require 22 lines out (each end 4×4
   Extra lines can be hired at Homer and returned when outb Hire cost is large and lines are difficult to handle, best for ves be equipped with its own lines.
4. Suctions must be kept continuously clear, or vessels must internal cooling water recirculation provided for generators and engine.

From experience and talking to other vessels, also found the follo precautions advisable:

5. Ballast should be completely salt and should be kept m continuously, pumping in and out.
6. Adequate steam heating for bunker tanks and fuel systems.
7. Adequate heating for fresh water systems and tanks.
8. Cargo compressors to run continuously or heating lamps p alongside.
9. Steering gear to be continuously run or heating lamps plac space.
10. Winches to be run continuously.
11. Tank level gauges that contain an oil bath to be drained.
12. Radar scanners to turn continuously.
13. Accommodation to be well heated (not only for personnel), t prevent fresh water systems freezing up.
14. Complete thermal protection clothing for personnel, no "Parkas" which are totally inadequate. (Editor's Note: Winter clo (hats, gloves, heavy overalls and insulated boots) can be sup by Agent at 4-5 days notice).

Weather: During the Winter months and especially January th March, extreme sub-zero temperatures can be encountered as v moves up Cook Inlet. We encountered −20°C with a biting N'ly but −40°C is not uncommon. In general −10°C is normal in W along with the N.E. wind which gives a low chill factor.

The approaches to Cook Inlet bring Northerly winds of up to 60 or more with freezing spray.

At Homer, we found the temperature to be some 10°C warme in Upper Cook Inlet.

Mooring: Vessel approaches Unocal and other Cook Inlet berths starboard anchor as a "dredge" against the flood tide. Spring lines first, then breasts, then head lines, all onto quick release hooks.

Pilot puts vessel alongside dock before lines are passed o heaving line.

The normal time for Winter mooring is a minimum of 4 hours and 1 hour to let go.

Mooring can be undertaken on a 24 hour basis, but if the vess any defects, U.S.C.G. will only allow daytime movements.

Loading: Nikiski: Ammonia loading is through 2 pumps, each cap around 270 tonnes p.h.

In actual fact, we found with one pump maximum rate was 300 tonnes p.h. and with 2 pumps around 450 tonnes p.h.

Terminal has difficulty controlling rate outside one or two pum

Terminal undertakes all connection and disconnection (12 in. Ch with hydraulic clamps).

In Winter ice conditions on flood tide, Chicksan is often discon for around 4 to 5 hours.

Communication is by VHF Channel 10. Terminal will loan porta

Urea ships have to shift backwards and forwards along jetty loading boom is fixed. Very tiresome and prolonged in Winter.

Terminal very cooperative and helpful.

All controls are from cabin on jetty. Normal shift ashore on some 5 men who handle all moorings, maintenance, gangway,

Sulphuric acid and caustic soda is discharged through separ Chicksans next to the NH_3 Chicksan.

Fresh Water: Carriers should be notified that water and provis be available at the Kenai Wharf.

At Homer, water is piped to City Dock, but not to Deep Wat (Harbour Master said pipe to be layed on in 1994).

At Homer, water is obtainable by barge by giving 36 hours n Winter, less in Summer. Cost is U.S.$ 15.0 per long ton, and minimum quantity is 150 tons, but can be negotiated down to 5

Stores: Provisions are obtainable both at Homer and Kenai f local supermarket. Both stores open 24 hours. The superma deliver alongside or to launch landing. At Unocal, access to th by small personnel/stores trucks operated by Wharf Terminal pe who will deliver alongside vessel. General merchandise available at both locations (Agent very helpful and will assist).

Repairs: No repairs allowed to main engine at Kenai/Nikiski. R be undertaken at anchor at Homer.

There are small machine shops at both Homer and Kenai, an motor rewinding possible at Kenai.

Fuel: MDO/Gas oil available by tank truck from local storage (an efficient operation). We took 180 tonnes in 6 hours from small trucks whilst alongside Ocean Dock.

Airport: Both Homer and Kenai have local airports with flig 2 hours to Anchorage, from where regular flights to Seattle Int can be obtained.

Since the "Opening up of Russia", very few trans-polar fl through Anchorage on their way to Europe and Far East.

General: Seattle is the gateway to Alaska from the U.S.A. for all spares, service not immediately obtainable in Anchorage.

Very scenic and tremendous fishing.

At Homer anchorage, the pilot boat can be hired as a shore leave boat for U.S.$ 170.0 per round trip.

Telephone: Public telephone in jetty control cabin at Unocal (Nikiski).

At Homer, telephone at City Dock and 2 telephones about 500 m. from base of Ocean Dock.

Extra telephones are connected at Homer in Summer.

Notice: To all Vessels Transiting Upper Cook Inlet, Alaska. Captain of the Port Order 16-92: "Special Vessel De-icing Procedures for Upper Cook Inlet".

Since 1st December 1992, 2 laden and one ballasted tank ship have suffered full or partial loss of power, due to power plant cooling system icing and subsequent power plant failure, while transiting Upper Cook Inlet.

These incidents appear to be caused by "slush" ice inducted into the vessel's intakes.

Action:

Effective immediately and until this order is rescinded, all vessels requiring a State of Alaska or federally licensed Pilot to Transit Cook Inlet, shall comply with the following requirements, as a minimum, while transiting Upper Cook Inlet, Alaska:

(1) Engine cooling water shall be supplied via "low sea suction", if available.

(2) A closed internal system of engine cooling water circulation, or a means of applying sufficient heat to the engine cooling water intake, to prevent ice from clogging the intake, shall be used.

If the vessel's physical dimensions permit:

(3) Maintain a minimum forward draft of 1.8 m. or 6 ft., and a minimum after draft of 1.8 m. or 6 ft. above the propeller blades.

For the purpose of this order, "Upper Cook Inlet" is defined as the waters of Cook Inlet North of Lat. 60° 20' N.

Signed: M.R.Miller, Captain, U.S. Coast Guard, Captain of the Port, Western Alaska.

AUTHORITY: *Operators:* Unocal Chemicals and Minerals Division, P.O.Box 575, Kenai, Alaska 99611. *Tel:* (907) 776-8121. *FAX:* (907) 776-5579. *Contact:* E.L. Burcham, Supervisor – Shipping. Lewis L. Rich, Operations Superintendent.

Phillips Petroleum Co., Drawer 66, Kenai, Alaska 99611. *Tel:* (907) 776-8166. *FAX:* (907) 766-6040. *Contact:* L. Porter, Supervisor – Vessel Operations.

Kenai Pipeline Company, P.O.Box 5555, Kenai, Alaska 99611. *Tel:* (907) 776-5555, 776-8711. *Contact:* O.E. Jackson, Operations Supervisor.

NORTHPORT, New York: 40.57 N. 73.20 W. **(See Plan)**

LOCATION: The Northport offshore oil discharge facility is operated by the Long Island Lighting Company. It is located in Lat. 40° 57' 15.4" N., Long. 73° 20' 29.6" W., approximately 10,000 ft. offshore from the power station, and approximately 2.6 miles East of Eatons Neck Point.

APPROACHES: *Approaches to Pilot Station and Transit to Northport:* On approaching Block Island from the South, Block Island's high Southern shore provides a good radar target. Also, bearings can be taken from the RDF station at Southeast Light.

It is advisable to remain at least 1 mile to the East of Block Island due to the numerous shoals close in shore.

There are several dangers to be wary of when making the passage from the Pilot Station to Northport.

Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.

The Race is a narrow channel into Long Island Sound. Strong East to West currents occur during maximum ebb or flood and knowledge of position should be maintained in view of the possibility of unusual set. Valiant Rock may be passed on either side.

Caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound in view of the heavy small boat traffic, especially in the area in proximity to The Race.

Dense fog is prevalent during the Summer months.

Good water is found in Long Island Sound from The Race to Northport as long as the mid-channel buoys "P1" and "CF" are passed close by and care is taken so as not to pass North of "Twenty-Eight Foot Shoal" Buoy. "Stratford Shoal" should be passed to the South.

In the event that adverse weather restricts berthing, vessels should anchor, if necessary, North and East of the facility to avoid electric cables on the bottom. The submarine cables lie West of the facility and are shown on Chart No. 12363.

PILOTAGE: Pilotage is arranged by the vessel's Agent. A Pilot will be required to standby aboard vessel throughout transfer.

Vessels approaching from Block Island embark Pilot about 2.5 miles South of Point Judith.

U.S. flag vessels under enrolment approaching from Block Island embark Pilot 1.4 miles East of Old Harbour – Block Island.

The pilot boat 'Rhode Island Pilot' or 'Northeast Pilot' should be called via VHF Channel 16 approximately 1 hour prior to arrival at the Pilot Station.

ANCHORAGES: All vessels are advised that 7 submarine electric cables lie West of the facility, as shown on USC & GS Chart No. 1213. To avoid any possibility of damage to these cables, vessels should anchor (if necessary) North and East of the facility.

RESTRICTIONS: Berthing of vessels shall be limited to 1.5 hours prior to and 30 minutes following high slack water, and shall be prohibited when winds exceed 20 knots.

MAX. SIZE: The maximum size vessel for which the Long Island Lighting Company can presently provide a safe berth, is a ship with a loaded displacement tonnage not to exceed 70,000 long tons and meeting all of the additional parameters as follows:

Hull Design:	Welded construction only.
Cargo Holds:	Compartmented.
Max. Length overall:	825 ft.
Max. Draft:	40 ft. at H.W.
Max. Beam:	144 ft.
Rail to Manifold:	15 ft. maximum.
Loaded Freeboard:	10 ft. minimum.
Light Freeboard:	40 ft. maximum.
Number of Mooring Lines:	20 independent lines.
Bow to Manifold:	50% of LOA.

RADIO: *ETA:* Vessels are required to send ETA message 72, 48 and 24 hours in advance of arrival at Block Island Pilot Station. These messages are to be sent to Agent in New York. Advise arrival draft (salt water) in initial message.

VHF: Pilots can be contacted on VHF Channels 16, 13 and 18A.

TUGS: A minimum of 2 tugs are required for mooring and a minimum of 1 tug for unmooring. Terminal requires 1 tug in attendance while vessel is alongside. A launch is provided by terminal to run vessel's lines to the mooring buoys. Launch will stand-by throughout operations.

BERTHING: *Precautionary Weather Information:* There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the platform must insure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant.

The terminal requires suspension of transfer operations and clearing of the berth whenever sustained winds of 45 m.p.h. or greater are anticipated. Southerly winds (off the platform) of 30 m.p.h. may require similar action. The terminal is equipped with an anemometer. Similarly, heavy swells may require the suspension of transfer operations.

Berth Facilities: The berth consists of 3 concrete platforms and 6 mooring buoys. The 2 outer platforms provide a breasting face of 310 ft. The centre platform is fitted with 2×12 in. Chicksan arms for fuel oil unloading, and is 19 ft. above Mean Low Water.

A quick flashing white light is located 26 ft. above the extreme outboard end of each breasting platform.

Each mooring buoy is fitted with a quick release hook.

Berthing Operation: Vessels approach Sea Berth stemming current and/or wind.

Berthing port side to is recommended, weather permitting.

Moorings: It is imperative that the vessel remains in position alongside the berth. LILCO considers the minimum safe mooring for this berth to be as follows:

1. Two lines to buoy "A" (synthetic or steel).
2. Two lines to buoy "B" (synthetic or steel).
3. Two lines to buoy "C" (steel preferred, synthetic acceptable).
4. Two lines to buoy "D" (steel preferred, synthetic acceptable).
5. Two lines to buoy "E" (synthetic or steel).
6. Two lines to buoy "F" (synthetic or steel).
7. Two bow springs to one breasting platform bollard (steel preferred, synthetic acceptable).
8. Two stern springs to the other breasting platform bollard (steel preferred, synthetic acceptable).
9. Two lines from well deck to East breasting platform bollard (synthetic).
10. Two lines from well deck to West breasting platform bollard (synthetic).

Note: There shall be no mixing of wire and synthetic lines on any one buoy.

A boat will be provided by LILCO to handle the vessel's lines to the mooring buoys. Personnel will be provided to handle the vessel's lines to the breasting platform bollards.

Warping winches must be adequate to handle mooring lines under heavy strain. Stoppers must be readily available to stop off mooring lines for transfer from winch to bitts without loss of tension. Mooring lines secured on surge or tension winches are prohibited; any line on a winch must be set tight using the brake only.

CARGO OPERATIONS: The Chicksan arms are designed to permit fore and aft drift and some lateral movement. However, vessel should maintain position at all times. Failure to observe this will result in suspension of operations and disconnection of unloading arms. Ship's crew connect and disconnect arms.

Ships equipped with inert gas systems shall have such systems in operation prior to berthing, throughout the transfer and until the ship is released from the facility and underway.

A responsible member of the ship's crew, *capable of speaking and understanding the English language,* must be available on the vessel's deck to take any remedial action necessary to maintain safe and efficient cargo transfer.

FRESH WATER/FUEL/STORES: Bunkers and fresh water are not available ex-berth. Stores cannot be loaded from dock.

Transfer of bunkers from barge is not permitted while alongside.

MEDICAL: There is a hospital in Huntington, New York, Tel. No. 516-351-2000. Medical attention must be arranged by the vessel's Agent. The nearest United States Public Health Service Marine Hospital facilities are in New York City, which is approximately 45 miles West of Northport.

GENERAL: *Fire Fighting Facilities:* The terminal has very limited fire fighting equipment. 4×100 lb. CO_2 extinguishers are provided; no fixed fire fighting gear is available. The standby tug is fitted with a low capacity fire pump hose.

Fire wires should be hung, one forward and one aft, on the offshore side for easy reach by a tug in case of fire.

The tanker should have all fire fighting equipment aboard in readiness to combat any fire that may arise.

Pollution: All U.S. harbours have stringent pollution regulations forbidding the discharge of oil into harbour waters or the emission of heavy smoke. Long Island Sound is a particularly sensitive area and all anti-pollution regulations are rigidly enforced. In the event of an emergency or pollution, the Agent should be contacted immediately.

Launch Service: LILCO does not provide launch service for ferrying of ship's personnel or stores. Vessels must make their own arrangements for such service. The LILCO standby boat is for the exclusive use of LILCO personnel, and will not be used for launch service. The LILCO standby boat will be used for initial boarding upon arrival.

Customs and Immigration: Northport is a Port of Entry whenever a vessel docks without first calling at another United States port. Entry and clearance must be arranged by the vessel's Agent. The appropriate authorities in New York City must be advised well in advance of the vessel's arrival; 24 hours advance notification is recommended as a minimum.

AUTHORITY: Long Island Lighting Co., Northport Power Station, Waterside Avenue, Northport, N.Y. 11768. *Tel:* (516) 262-2200. *FAX:* (516) 262-2282. *Contact:* Brian T. McCabe, Chief Engineer.

OAKLAND, California: 37.50 N. 122.18 W. (See Plan)

See "San Francisco" *for Documents, Pilotage, etc.*

RESTRICTIONS: Minimum depth in harbour 38 ft. Tidal range 5.6 ft.
HEALTH: See "Health: all Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 4,200 h.p. – 9,000 h.p.

American Navigation Co., Inc. – to 4,000 h.p. Tel: (510) 957-9005.
Bay Delta & Towing. Tel: (510) 441-4677.

Oscar Niemeth Towing, Inc. – to 4,300 h.p. Tel: (510) 893-0231.
Tweed Towing, Inc. – to 4,200 h.p. Tel: (510) 233-4213.
San Francisco Bar Pilots Association. Tel: (415) 393-0457.

BERTHING:

Outer Harbour:

Bay Bridge Terminal: Berths No. 8, 9 and 10 (General cargoes, steel, autos, containers). For information call Port of Oakland.

3 Berths:
Berth 8: Length 304 m.
Berth 9: Length 366 m.
Berth 10: Length 256 m.
Deck Height: 4.3 m.
Depth: 10.7 m.
Facilities: Accepts Ro/Ro barges, combination ships.
Services: Water, lights, fencing, taxi, telephone.

Multi-purpose cargo terminal designed to handle general cargoes, steel, autos and containers.

Temporarily inoperative due to 1989 earthquake damage.

Sea-Land Terminal: Berths No. 20, 21 and 22. (Containers; preferential assignment to Sea Land).

Operator: Sea Land Services, Inc., 1425 Maritime Street, Oakland, CA.94607. Tel: (510) 271-1000. Fax: (510) 271-1277. Terminal Manager: Karen Vaughn.

3 Berths: Total length 699.2 m.
Deck Height: 4.3 m.
Depth: 12.2. m.
Cranes: 4×30 ton container gantry cranes.
Storage System: Chassis.
Reefer Capacity: 250 outlets × 480V.
Total TEU Storage Capacity: Over 3,900.
Total Terminal Area: 26.5 hectares.
Services: Water, lights, fencing, taxi, telephone.

Yusen Terminal: Berth No. 23. (Containers; preferential assignment to NYK/NOL).

Operator: Yusen Terminals, Inc., 1195 Maritime Street, Oakland, CA. 94607. Tel: (510) 763-1080. Fax: (510) 763-5728. Terminal Manager: Edward Stellin.

1 Berth: Total length 274 m.
Deck Height: 4.3 m.
Depth: 12.2 m.
Cranes: 2×40 ton container gantry cranes.
Storage System: Port-packer, transtainer, chassis.
Reefer Capacity: 98 outlets (56×480V; 42×240V and 96 portable 240V).
Total TEU Storage Capacity: Over 3,200.
Total Terminal Area: 16.2 hectares.
Rail Spur for direct Transfer.
Services: Water, light, fencing, taxi, telephone.

Maersk Terminal: Berth No. 24. (Containers; preferential assignment to Maersk Line).

Operator: Maersk Pacific Ltd., 909 Ferry Street, Oakland, CA. 94607. Tel: (510) 835-7500. Fax: (510) 763-3545. Terminal Manager: Michael Bourgault.

1 Berth: Length 319 m.
Deck Height: 4.3 m.
Depth: 12.2 m.
Cranes: 3×50 ton container cranes.
Storage System: Chassis.
Reefer Capacity: 157 outlets × 480V.
Total TEU Storage Capacity: Over 2,700.
Total Terminal Area: 15.3 hectares.
Rail Spur for direct Transfer.
Services: Water, lights, fencing, taxi, telephone.

TransBay Container Terminal: Berths No. 25 and 26. (Conta preferential assignment to K-Line).

Operator: TransBay Container Co., 707 Ferry Street, Oak CA.94607. Tel: (510) 839-8228. Fax: (510) 444-6219. Ter Manager: Robert Bergman.

2 Berths: Total length 412.4 m.
Deck Height: 4.3 m.
Depth: 10.7 m.
Cranes: 2×40 ton container gantry cranes.
Storage System: Transtainer, chassis.
Reefer Capacity: 120 outlets × 240V. (capability for an 50 outlets).
Total TEU Storage Capacity: Over 2,400.
Total Terminal Area: 11.3 hectares.
Services: Water, lights, fencing, taxi, telephone.

7th Street Complex:

TraPac Terminal: Berth 30. (Container; preferential assignment to M OSK).

Operator: TransPacific Container Corp., 2800 Seventh Street, Ber Oakland, CA 94607. Tel: (510) 286-8600. Terminal Manager: Mi Porte.

Berth: Length 333 m.
Deck Height: 4.3 m.
Depth: 12.2 m.
Cranes: 2×50 ton container cranes.
Storage System: Chassis.
Reefer Capacity: 569 outlets × 480V.
Total TEU Storage Capacity: 2,500.
Total Terminal Area: 13.8 hectares.
Services: Water, lights, fencing, taxi, telephone.

Matson Terminal: Berths No. 32, 33 and 34. (Containers/break preferential assignment to Matson).

Operator: Matson Terminals, Inc., 3050 7th Street, Oakland, CA.94 Tel: (510) 271-9756. Fax: (510) 465-2803. Terminal Manager Dreyfus.

2 Container Berths: Total length 468 m.
1 Ro/Ro berth: 219 m. with concrete dolphins.
Deck Height: 4.3 m.
Depth: 10.7 m.
Cranes: 1×28 ton, 1×30 ton and 1×40 ton gantry container cra
Storage System: Straddle carrier, chassis.
Reefer Capacity: 460 outlets × 240V.
Total TEU Storage Capacity: Over 5,500.
Total Terminal Area: 26.5 hectares.
Services: Water, lights, fencing, taxi, telephone.

Marine Container Terminal: Berths No. 35, 37 and 38. (Container; user facility).

Operator: Marine Terminals Corp., 520 Third Street, Oakland, CA.9 Tel: (510) 891-0990. Fax: (510) 763-9086. Terminal Manager: Adam.

3 Berths: Total length 921 m.
Deck Height: 4.3 m.
Depth: 12.2 m.
Cranes: 3×50 ton and 1×40 ton container gantry cranes.
Storage System: Port-packer, transtainer, chassis.
Reefer Capacity: 192 (portable) × 480V.
Total TEU Storage Capacity: Over 3,700.
Total Terminal Area: 19.6 hectares.
Services: Water, lights, fencing, taxi, telephone.

Berth 40: General cargo, contact Port of Oakland.
1 berth: 188 m. in length.
Deck Height: 4.3 m.
Depth: 10.7 m.
Restricted capability due to earthquake 1989.

Middle Harbour:

American President Lines: Berths No. 60, 61, 62 and 63. (Con preferential assignment to APL).

Operator: Eagle Marine Stevedoring, 1395 Middle Harbour Oakland, CA. 94607. Tel: (510) 272-2010. Fax: (510) 272-7941. Te Manager: Robert Fairbanks.

4 Berths: Total length 836 m.
Deck Height: 4.3 m.
Depth: 11.6 m.
Cranes: 4×40 ton and 2×45 ton container gantry cranes.
Storage System: Chassis.
Reefer Capacity: 344 outlets, 151×240V, 193×480V.
Total TEU Storage Capacity: Over 4,500.
Total Terminal Area: 30.5 hectares.
Services: Water, lights, fencing, taxi, telephone.

Inner Harbour:

Howard Terminal: Berths No. 67, 68 and 69. (Containers; pu facility).

Operator: Stevedoring Services of America, 1 Market Street, CA.94607. Tel: (510) 271-1815. Fax: (510) 451-4779. Terminal M Scott Thomas.

3 Berths: Berths No. 67 and 68: Length 500.5 m., plus 21.3 m.
Berth No. 69: Length 173 m.
Deck Height: 4.3 m.
Depth: 12.2. m.
Cranes: 2×40 ton and 1×50 ton container gantry cranes.
Storage System: Port-packer, transtainer, chassis.
Reefer Capacity: 144 outlets×480V.
Total TEU Storage Capacity: Over 3,000.
Total Terminal Area: 19.8 hectares.
Services: Water, lights, fencing, taxi, telephone.

Ninth Avenue Terminal: Berths No. 82, 83 and 84. (General cargo, steel, lumber; public user facility).
Operator: Marine Terminals Corp., 520 Third Street, Oakland, CA.94607. *Tel:* (510) 891-0990. Fax: (510) 763-9086. Terminal Manager: Ed Hewlett.
3 Berths: Berths No. 83 and 84: Total length 348 m.
Berth No. 82: Length 282 m.
Deck Height: 4.3 m.
Depth: 10.7 m.
Cranes: 4×100 ton mobile cranes.
Storage System: As required.
Reefer Capacity: As required.
Total TEU Storage Capacity: Limited.
Total Terminal Area: 8.02 hectares.
Services: Water, lights, taxi, telephone.

Schnitzer Steel Products: Private Berth. (Scrap metals).
1 Berth: 240 ft. at each of 2 pier faces.
Deck Height: 14 ft.
Depth: 33 ft.
Services: Water, light, taxi.

CRANES: Heavy lift cranes available:
Bigge Crane & Rigging – to 250 tons (mobile). Tel: (510) 638-8100.
Sheedy Drayage – to 225 tons (mobile). Tel: (510) 638-8100.
Dutra Construction – to 400 tons (floating). Tel: (510) 523-5925.

WASTE OIL DISPOSAL: Normally not available. Limited tank truck service available in emergency situations. Contact Terminal Operator.
SEAMAN'S CLUBS: International Seamen's Club, 7th Street, Oakland.
DEVELOPMENTS: In the calendar 1995, the port of Oakland handled 1,527,500 TEU's, which is a 2.5% increase over 1994.

The Port of Oakland's 42 ft. dredging project began in April 1995 and is scheduled for completion in October 1996. The port is now exploring options to expedite the process of deepening the channels to 48 ft. MLLW.

The port has acquired 130 acres of Naval Supply Centre property and will sign a 50-year term lease for another 295 acres in early 1996. This property is currently being used for transportation related industry. Future plans for the area include the development of the Joint Intermodal Terminal and new marine terminals.

Additionally, the port plans to acquire and control the harbour roadway system, to study the optimal use of the Oakland Army Base which is scheduled for closure in 1998, and to improve existing facilities.

AUTHORITY: Port of Oakland., 530 Water Street (P.O. Box 2064), Oakland, California 94604-2064, U.S.A. *Tel:* (510) 272-1100. *FAX:* (510) 839-6899. *Contact:* Raymond A. Boyle, General Manager – Maritime.

OGDENSBURG, New York: 44.42 N. 75.30 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Seaway Pilot boards at Cape Vincent or Snell Lock and acts as docking Pilot.
ANCHORAGES: Anchorage area West of city at open roadstead area.
RESTRICTIONS: No tide. No restrictions other than Pilots' discretion as to wind and visibility.
MAX. SIZE: Largest vessel to enter 730 ft. long. Draft 27 ft.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
RADIO: Western Union to OCN Corp. VHF Seaway Channel via Maria Radio Cardinal.
TUGS: No tugs necessary.
BERTHING: By prior notice only. Port Authority Terminal, length 1,200 ft., depth 27 ft. One Grain Elevator capacity 500,000 bushels.
CRANES: Available, up to 82 tons capacity.
BRIDGES: Ogdensburg/Prescott International Bridge – 126 ft. clearance MWD.
STEVEDORES: Order by 1800 hrs. day preceding arrival. Advise any change of ETA.
MEDICAL: Excellent medical service and availability of doctors. No vaccination necessary.
DENSITY: Fresh water.
FRESH WATER: Available by pipeline at Port Authority Terminal.
FUEL: One day's notice, all grades. Diesel, Bunker "C", Kerosene.
REPAIRS: Limited dockside repairs available.
GANGWAY/DECK WATCHMEN: Normally not used.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine/spirits, normal Customs allowance U.S. Ports.

REPATRIATION: Can be arranged.
AIRPORT: (0.5 mile from city). Chautaugua Airline – 3 flights daily to Syracuse, New York, etc.
TIME: Eastern Standard Time GMT minus 5 hours. Daylight Saving time in Summer GMT minus 4 hours from first Sunday in April till last Sunday in October.
HOLIDAYS: New Year; Washington and Lincoln's Birthdays; Memorial Day; 4th July. Labour Day, Veteran's Day.
POLICE/AMBULANCE/FIRE: Police, Tel: 393-1551; Ambulance, Tel: 393-1221; Fire, Tel: 393-1010.
TELEPHONES: Available at Pierside (315) 393-7580.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Needed as per Immigration Department requirements.
AUTHORITY: Ogdensburg Bridge and Port Authority, Bridge Plaza, Ogdensburg, New York 13669. *Tel:* (315) 393-4080. *FAX:* (315) 393-7068. *Cables:* Ogdenport. *Contact:* Salvatore L. Pisani, Port Director.

OLYMPIA, Washington: 47.00 N. 122.53 W. (See Plan)

PORT LIMITS: Vessel is to be considered an "Arrived Ship" at the Port of Olympia, Washington, when anchor is dropped in Budd Inlet or when the vessel is all fast at the dockside.
DOCUMENTS: See "Tacoma".
PILOTAGE: The vessel picks up Puget Sound Pilot at the Port Angeles Pilot Station located at the entrance to Puget Sound on the Straits of Juan de Fuca, and it is normal for the vessel's Agent to provide the Pilot Station with a 48-hour, 24-hour, 12-hour and 8-hour ETA. The Pilot Station monitors VHF Channel 13.
ANCHORAGE: Safe anchorage is located North of Olympia Shoal in 30 ft. to 45 ft. of water. Bottom is sandy and area is a sheltered inlet.
RESTRICTIONS: Channel depth 30 ft. MLW with a high tidal range of 14.4 ft. Also restricted turning basin of 800 ft. Vessels max. size would be governed by the turning basin of 800 ft. and draft of 30 ft. at MLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: "KPH" San Francisco or Mackay Radio, Everett "KLB".
VHF: The port monitors Channel 24.
TUGS: 2 Crowley Maritime tugs are berthed at the port. They use ship's lines to assist the vessel in turning at the turning basin and to moor.
BERTHING:
Berth No. 1 is a concrete dock with depth of 40 ft. MLW.
Berth No. 2 is a concrete dock with 40 ft. depth MLW.
Berth No. 3, is a concrete dock with 40 ft. depth MLW.
BULK CARGO FACILITIES: Presently discharged with ship's gear. Primary back-up cargo yard of approximately 30 acres handling coke, coal, pig iron, lumber, steel, foodstuff and palletised cargoes.
SPECIALISED CARGO HANDLING FACILITIES: Olympia has approximately 100 acres of open cargo yard; 33 acres are paved, however, it can be adapted for Ro-Ro traffic and is presently engaged in handling bulk cargoes such as coal, coke, etc.
Warehousing: Olympia has a 76,000 sq.ft. warehouse between Berths Nos. 1 and 2. The site has a 150 ft. apron from the face of the pier and is served by rail. In addition, there is another 40,000 sq.ft. of off-dock warehousing available for cargo storage. There is a rail ramp available.
BRIDGES: None pertinent to this area.
STEVEDORES: 3 stevedoring companies available in the Olympia area. Unlimited manpower available to load/discharge cargoes.

MEDICAL: Medical and hospital facilities are available without prior notification for emergencies; otherwise all medical and dental requirements can be taken care of by appointment.
TANKERS: No shore facilities for loading or unloading of tankers.
DENSITY: Salinity is on an average 29 parts per thousand.
FRESH WATER: Delivered to vessel by shoreside hose.
FUEL: Most grades available by barge from Seattle for fueling at dockside.
FIRE PRECAUTIONS: Standard for U.S. ports.
CONSULS: Most located at Seattle 60 miles to the North.
REPAIRS: All types of repairs possible.
DRY DOCKS: None at Olympia. Nearest 60 miles to North at Seattle.
SURVEYORS: Lloyd's, A.B.S., N.V. available out of Seattle area.
GANGWAY/DECK WATCHMEN: Not required at Olympia under most circumstances unless crew members detained.
CUSTOMS ALLOWANCES: Sufficient quantities of tobacco, wine and spirits are permitted out of bond for each crew member sufficient to cover length of stay anticipated at the time of arrival. Actual quantities are at the discretion of the boarding customs officer.
CARGO GEAR: Generally vessels are loaded and/or discharged using ship's gear.
REPATRIATION: Facilities exist for repatriation of crew members.
AIRPORT: Local airport service by commuter airlines only. Major international airport (Seattle-Tacoma) located 40 miles to the North.
TIME: GMT minus 8 hours. Daylight saving time in effect during Summer months, from first Sunday in April to last Sunday in October.
HOLIDAYS: Work is available on all holidays on an overtime basis on all days except Christmas, December 25th; January 1st, New Year's Day; July 4th and 5th; 4th Thursday in November (Thanksgiving).
POLICE/AMBULANCE/FIRE: Telephone dispatch for emergency services, the numbers 911 dialled on any public telephone.
TELEPHONES: Public telephones are located within 100 ft. of any berth, and cellular telephones are available for onboard vessel use.
SERVICES: Tank-cleaning, tank-washings, compass adjusting, etc., are all available from the Seattle area, located 60 miles to the North, and most services provide travelling repairs.
SHORE LEAVE: Crew are allowed shore leave by U.S. Immigration, depending on individual case.
IDENTIFICATION CARDS: Not issued by the Port of Olympia, and Seaman's Book is generally sufficient to allow Immigration to determine whether shore leave should be granted.
GARBAGE DISPOSAL: Service available from Seattle Disposal Co., 54 South Dawson Street, Seattle. Tel: (360) 763-2800.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
REGULATIONS: Similar to all North American ports; no special rules or regulations applied to vessels by the Port of Olympia. Rules are set forth in Tariff No. 8.
DELAYS: Only delays that should be encountered at the Port of Olympia would be in the event of berth congestion.
GENERAL: Rail Service: The Port of Olympia is served directly by the Burlington Northern and Union Pacific railroads.

Highway Access: The Port of Olympia is 0.7 miles from Interstate Highway 5, the major North-South highway on the West coast. Access to and from the Port is unobstructed.
AUTHORITY: Port of Olympia, 915 Washington Street N.E., Olympia, Washington 98501. *Tel:* (360) 586-6150. *FAX:* (360) 586-4653. *Contact:* Bill McGregor, Director of Operations.

ORANGE, Texas: 30.06 N. 93.44 W. (See Plan)

DOCUMENTS: Crew Lists, Passenger List and Customs Documents.
PILOTAGE: Radio to Agent, 12 hours and Pilots 2.5 hours in advance of ETA. Pilots contacted by VHF Channels 12 and 13. Pilots board at Sabine Pass, Sea Buoy position 29° 36' N., 93° 48' W. or upon request board at 29° 25' N., 93° 40' W. Pilot boats FM (VHF) Channel 65 – 156.275 MHz.
ANCHORAGE: Off Sabine Bar – 40 ft.
RESTRICTIONS: Sabine River Channel: Project depth 30 ft.; bottom width 200 ft., including slip at port; marked and lighted for 24-hour navigation. Turning basin, 1,000 ft.×3,000 ft.
MAX. SIZE: Length – no limit, breadth – no limit, draft – 30 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: RCA – Global Communications.
TUGS: Join vessel in port turning basin. Tug's line used, no charge.
BERTHING: 2,308 ft. mooring space to accommodate 4 deep-sea vessels; all concrete docks; additional berthing space in slip for laying-up 4 vessels. Lay-berth facilities also available.
STEVEDORES: 5 stevedore companies – handled through Agent.
MEDICAL: Local facilities – complete.
TANKERS: Limited to 30 ft. draft.
DENSITY: Brackish.
FRESH WATER: Ample fresh water, through 2.5 in. connection, rate of delivery about 500 gallons per minute.
FUEL: All grades available; 8 hours advance notice required.
FIRE PRECAUTIONS: No welding or burning without U.S. Coast Guard welding permit; also special authority required for ships loading explosives.
CONSULS: None available locally.
REPAIRS: Facilities available.
DRY DOCKS: Texas Drydock:
388 ft.×142 ft. 10,000 tons, 10 ft. 6 in. draft over blocks.
SURVEYORS: National Cargo Bureau, Inc., 550 Fannin, Petro Building, Suite 821, Beaumont, Telex: 77701.

American Bureau of Shipping, 398 Pearl Street, Goodhue Bu Suite 806, Beaumont, Telex: 77701.
REPATRIATION: Can be arranged through area Immigration.
AIRPORT: Local, no scheduled airlines. Mid-County Airport scheduled airline service – 30 miles.
HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Independence Day; Good Friday; Memorial Day; Emancipation Independence Day; Labour Day; Veterans' Day; Thanksgiving Christmas Day; Any holiday which falls on Saturday or Sunday recognised on the following Monday. 2 copies Arrival Crew Lists, Form I-418.
2 copies Passenger List, Form I-418.
2 copies Stores Lists, Form CF-1303.
2 copies Crew's Effects Declaration, Form CF-1304.
1 copy Clearance from Last Foreign Port (if available).
1 copy Manifest of *All* Foreign Cargo onboard.
1 copy Manifest of Cargo for Discharge.
1 copy Dangerous Cargo Manifest.
1 copy Form CF-3171 for formal entrance at Customs House.
Valid original vessel documents.

All vessels shall, upon arrival, report to Port Director all cargo to be discharged. Such report shall be in form of copies of Ship's Manifest, or certified statements, and shall show number of units, commodity, weight, destination, consignee, and all other information which Port of Palm Beach deems necessary for compilation of commercial statistics, for reserving of necessary warehouse or wharf space, or other purposes. (Also see "Jacksonville").

PILOTAGE: Compulsory. Provided by Pilots' Association of the Port of Palm Beach, 200 13th Street E, Riviera Beach, Florida, 33404. Tel: (407) 845-2628. Telex: 529327.

Pilot's communicate with vessel on VHF Channel 16; if no answer contact Marine Operator to call Pilots on land line. Tel: (305) 845-2628.

Notice of ETA and request for Pilot must be made to the Pilots at least 24 hours in advance.

CHANNEL: Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning South-westerly to the terminals. The channel is 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin, 1,400 ft. by 1,310 ft. adjacent to the port terminals on the West shore, with an extension of 672 ft. at 25 ft. depth to the New North Wharf and Loading Ramps. Present depth of entrance channel is 33 ft. at MLW.

ANCHORAGES: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Port has two federally designated anchorages, one South of the entrance channel and one North of the entrance channel.

MAX. SIZE: Vessels up to 620 ft. in length with draft of 33 ft. have used facilities.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port has no communication equipment. U.S. Coast Guard Station, Peanut Island, Riviera Beach, Florida, can be reached on 2182 kHz – 2678 kHz or VHF Channel 16 (156.8 MHz). Pilots VHF Channel 16.

TUGS: Available to assist berthing. Service is provided by the Port Towing Corporation, P.O.Box 30369, Palm Beach Gardens, Florida 33410-0369. Office Tel: 622-6422 and 622-8688, nights and holidays 844-4244 and 622-7548.

Tugs normally join vessel at jetty entrance. Tug's lines normally used.

BERTHING: 2 slips and 4 marginal wharves with 6 Ro/Ro ramps including a 29 acre dedicated container yard.

Berth		*Length* (ft.)	*Depth* (ft.)
No. 1	South Marginal	210	25
No. 2	East Half, South Side of Slip 2	310	35
No. 3	West Half, South Side of Slip 2	310	35
No. 4	West End of Slip 2	220	25
No. 5	West Half, North Side of Slip 2	320	35
No. 6	East Half, North Side of Slip 2	320	35
No. 7	Middle Marginal	215	33
No. 8	East Half, South Side of Slip 1	350	33
No. 9	West Half, South Side of Slip 1	350	33
No. 10	South Ramp, West End of Slip 1	70	33
No. 11	Middle Ramp, West End of Slip 1	70	33
No. 12	North Ramp, West End of Slip 1	70	33
No. 13	West Half, North Side of Slip 1	350	33
No. 14	East Half, North Side of Slip 1	350	33
No. 15	South Section, North Marginal	204	27
No. 16	Mid-Section, North Marginal	203	27
No. 17	North Section, North Marginal	203	27
No. 18	East Section, South Side	150	25
No. 19	West Section, South Side	150	25
No. 20	South Ramp	67	25
No. 21	Middle Ramp	67	25
No. 22	North Ramp	67	25
No. 23	North Side Container Wharf	80	25
No. 24	South Half Container Wharf	225	25
No. 25	North Half Container Wharf	225	25

Supplementing the berths are 295,000 sq.ft. of transit shed storage space. Open storage areas consist of approximately 55 acres. 33 acres dedicated to container handling.

All vessels, their Owners or Agents, desiring a berth at wharves, shall, as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, and name of the vessel.

SPECIALISED CARGO HANDLING FACILITIES: Ramps for Roll-on/Roll-off cargo and wharfside accommodation for equipment to handle containerised cargo only.

Dry Bulk Storage: 55,000 short tons (Cement); 20,000 short tons (Sugar).

Liquid Bulk Storage: 12,500,000 gallons (Molasses).

Freezer/Chill Facility: U.S. Dept. of Agriculture and U.S. Customs approved facility. 17,600 sq.ft. off pier site with rail siding. 5 minute trucking time to port docks.

Also see "Developments".

CRANES: See "Cargo Gear".

STEVEDORES: The recognised working hours of port are from 0800 until 1200 hrs. and from 1300 until 1700 hrs., Monday through Friday, holidays excepted. During the recognised working hours services will be charged for on a straight time basis.

When vessels are loading or discharging cargo the port may furnish checker-foremen to supervise release of cargo being loaded and/or check cargo being discharged. The charge for each man furnished will be based on labour-furnished rates for foremen, with the Port reserving right to furnish as many men as they deem necessary to protect their interests. Charges for this service will be rendered against the vessels, their Owners, or Agents.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal work hours.

TANKERS: The port receives tankers each month in the 15,000 to 18,000 gross ton range. Petroleum tankers are handled in Slip 2, Berths 2/3 or 5/6. All petroleum tankers are boomed during pumping operations. Slop facilities at port by mobile tank trucks of private companies.

Report: Port Approaches – Cautionary: All approaches to the Sea Buoy must be made from the East to avoid shoal waters near the coast to the North and South of the Entrance Channel. The Gulf Stream current running to the North may be felt a short distance East of the Sea Buoy. A counter current usually sets to the South in the vicinity of the Sea Buoy. However, this may vary depending on weather conditions. Southbound vessels, avoiding the Gulf Stream, are encountered in close vicinity of the Sea Buoy.

Care must be taken to carefully identify navigation lights to avoid mistaken identity with strong lights along coast.

Vessels may anchor S.E. of the Sea Buoy in approximately 75 ft. – 100 ft. of water.

Entering and Berthing: Vessel should have full manoeuvring power available and competent helmsman at the wheel. Vessels leaving the Gulf Stream usually set sharply to the South and care must be exercised to keep vessel in channel. Ranges and buoys are used to identify channel limits. The turning basin is situated adjacent to Slip No. 2 where tankers berth. Tidal currents in Lake Worth Inlet set North on flood tide and South on ebb tide. Berthing of deep draft bulk carriers has been limited to High Water Slack period, due to the limitation of tug horsepower. If a current is against the tide, an anchor is usually dropped and dragged into the berth. Due to the limited depths of water and the possibility of holing the ship's bottom if the anchor is run over, the use of anchor should be limited to emergency use.

The slip is 700 ft. in length with a width of 225 ft. Pier bollards are situated 50 ft. apart. The last soundings survey indicated depths of 35 ft. or more throughout area of slip with exception of extreme inside section where depths decreased to 32 ft.

FRESH WATER: Fresh water delivered to vessels at wharves or docks by pipeline. Hoses can be supplied by port per tariff charges. Fittings on pipeline are 2.5 in. Minimum charge of U.S.$50.00. Water $0.90 per ton of 240 gallons.

FUEL: Private firms (9) with trucks or barges available by prior arrangement through vessel's Agent.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels, handling dangerous, hazardous, or inflammable cargo. Smoking is also prohibited in any areas where gasoline or like materials are being handled or serviced to equipment.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on, the wharves or other facilities of Port of Palm Beach by special arrangements with and at the option of the Port Director, and the receiving, handling, or storage of such commodities shall be subject to Federal and State laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the U.S. Coast Guard must be received and a copy of the consent filed with the Port Director. Responsibility for safeguarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

DRY DOCK/REPAIRS: No major facilities at port. Mobile repair companies available. No berths dedicated for repair work.

SURVEYORS: Marine surveyors representing Lloyd's, A.B.S., N.V., operate at the port or nearby ports.

C. L. Marine Inc., 825 Oleander Street, Boca Raton, FL 33432. Tel: (407) 391-8932.

Douglas G. Lamb & Associates, P.O.Box 11367, Fort Lauderdale, FL 33339. Tel: (305) 564-3045. Telex: 159052 (ASST. CTR.)

Continental Marine Consultants, Inc., P.O.Box 14915, North Palm Beach, FL 33408. Tel: (407) 844-6111.

Donald J. Mahoney & Co. Inc., Marine Surveyors & Adjusters, The Tamiami Mall, 8776 S.W. 8th Street, Miami, Florida 33174. Tel: (305) 553-7066. Telex: 52-2268.

GANGWAY/DECK WATCHMEN: No requirement for watchmen required except for special vessel conditions or security reasons as determined by Port Director.

HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: United States Customs Regulations.

REPATRIATION: Facilities exist for changes of crews and repatriation of seamen. Scheduled aircraft service Palm Beach area daily with additional flights from two nearby airports. Airports are 5 miles, 35 miles and 70 miles from port.

POLICE/AMBULANCE/FIRE: Police Tel: 845-4123 or 911; Fire Department Tel: 845-4111; Sheriff Tel: 833-7471; Ambulance Tel: 844-6577; Hospital Tel: 844-6300.

CARGO GEAR: Crane capacity can accommodate single lifts up to 300 tons. Also available are 2×150 ton cranes, 3×200 ton crane, 1×65 ton crane and 1×40 ton crane also 1×23 ton fork lift. 7×40 ton straddle carriers, 7×40 ton fork lifts, 3×25 ton fork lifts, 1×20 ton fork lift, 33 tractors in terminal (10×40 tons and 23×35 tons). Load/discharge operations can be performed by ship's gear or shore gear.

HOLIDAYS: New Year's Day; Washington's Birthday; Columbus Day; Decoration (Memorial) Day; Independence Day; Labour Day; Veteran's (Armistice) Day; Thanksgiving Day; Christmas Day. When any one of these falls on Sunday, the following Monday is observed as a holiday. When any one of these falls on Saturday, the preceding Friday is observed.

BANKS: *Banks with Foreign Departments:*

Barnett Bank, 2001 Broadway, Riviera Beach, FL 33404. Tel: (407) 845-3400.

Florida National Bank, 411 South County Road, Palm Beach, FL 33480. Tel: (407) 655-3900.

First Union, N.A., 1710 S. Andrews Avenue, Fort Lauderdale, FL 33316. Tel: (305) 467-5322.

Sun Trust/South Florida, Inc., International Department, 25 S. Andrews Avenue, Fort Lauderdale, FL 33301. Tel: (407) 832-4121.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Drums or skips available through private industry licensed by government. Ship's agent to notify U.S.Department of Agriculture local agent for coordination of transfer operations. Local DOA agent, Tel: (407) 844-9935. Contact Port Maintenance Superintendent, Tel: (407) 844-6330, for current charges.

WASTE OIL DISPOSAL: Service provided by duly licensed private contractor. Tanker trucks utilised for collection and removal. Ship's agent to make arrangements with private licensed contractor and Port Authority Dockmaster.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

GENERAL: Marine terminal 1.3 miles from the open sea, served by U.S. Highway 1 and is directly connected by port-owned belt-line railroad to the Florida Coast Railway.

Broad aprons (80 ft.) with ship-side rail, and warehouses backed by open storage areas. The slips and wharves are located on a salt water sound, fully protected from the sea by barrier islands; departures from the slips average only 15 minutes through inlet to open sea.

DEVELOPMENTS: New 6 acre container marshalling area has been recently added. Raw sugar storage facility at Slip 2 capacity 20,000 tons, loading rate 600 t.p.h. Acquisition of additional land for port expansion underway. Port Administration Building completed offering Government Services and office space for Maritime companies located at the port. A foreign trade zone and a Cruise Terminal and enclosed Passenger Jetway are available.

AUTHORITY: Port of Palm Beach, P.O.Box 9935, Riviera Beach, Florida 33419. *Tel:* (407) 842-4201. *FAX:* (407) 842-4240. *Contact:* Benson B. Murphy, Executive Port Director. Martin A. Mets, Deputy Port Director. Henry E. McKay, Assistant to Port Director. Jack Smith, Dock Master. Sam Logan, Manager of Security.

PANAMA CITY, Florida: 30.10 N. 85.40 W. (See Plan)

DOCUMENTS:

3 Passenger Lists.
3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
Register.
Load Line Certificate.
Tonnage Tax Certificate.
Certificate of Financial Responsibility (Oil Pollution).

PILOTAGE: Compulsory. Pilots board at sea-buoy. Guard Channel 16 VHF. Safe anchorage at sea-buoy if waiting for Pilot.

PC Port Pilots Inc.: Pilot boat, grey and white hull with black lettering. Tel: (904) 785-2209.

PC Pilots Inc.: Pilot boat, red and white hull. Tel: (904) 769-0058.

ANCHORAGES: Several safe anchorages inside bay with 32 ft. or more depth.

RESTRICTIONS: Maximum safe draft over bar is 32 ft. No other restrictions except in case of bad weather.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Preferably WLO Radio, Mobile, Alabama, U.S.A. Also good service from RCA. Vessel should radio ETA and cash requirements.

TUGS: 2 tugs available. Tug is used only to assist in berthing. Always uses ship's lines.

BERTHING: Any time, except for unusual weather. Good safe Berths are about 1 hour from Pilot station.

Deepwater Terminal in St. Andrew's Bay:

1. 2,590 ft. of deepwater berthing:
   (a) 5 berths.
   (b) Mean depth of water 32 ft.
   (c) Concrete apron 60 ft.
   (d) Construction – steel sheet piling.
2. 6 Transit sheds totalling 280,000 sq.ft.
3. Bulk Warehouse (28,800 sq.ft.). Storage Silos (6,500 ton cap with scale weight in and out.
4. Covered loading/unloading rail service to each warehouse.
5. Truck dock serving each warehouse.
6. Marginal track capability.
7. Heavy lift capability by prior arrangement.
8. 24 hour security service.
9. Paved open storage – 300,000 sq.ft.
10. Ro/Ro capabilities.
11. Container facilities.
12. Barge/Container feeder service.

Barge Terminal in St. Andrew's Bay and Gulf Intracoastal Waterw

1. 600 ft. of shallow draft:
   (a) Mean depth of water 12 ft.
   (b) Concrete apron.
   (c) Construction – steel sheet piling.
2. Transit shed totalling 30,000 sq.ft.
3. Bulk transfer capability.
4. Service for:
   (a) Covered rail loading and unloading.
   (b) Truck loading and unloading.
5. Paved open storage – 90,000 sq.ft.
6. Heavy lift capability by special arrangement.

Port Equipment:

1. 8 lift trucks, 5,000 lb. capacity.
2. 9 paper roll clamp machines, 7,000 lb. lift capacity.
3. 1 trackmobile switcher.
4. 1 diesel switch engine.
5. Rail tracks owned by Panama City Port Authority, capab accommodating approximately 80 rail cars.
6. Sweepers.
   (a) Tennant.
   (b) Tractor with brush and front end loader.
7. Gantry crane.

STEVEDORES: 7 companies. Must have ETA by 1500 hrs. loca in order commence loading 0800 hrs. next day. Normal wor 0800 – 1200 hrs., then from 1300 – 1700 hrs., Monday through F

MEDICAL: Medical and hospital service available.

TANKERS: No slop discharge facilities, oil waste by barge.

DENSITY: Salt water. 1.5 ft. tide range.

FRESH WATER: Available all berths but ships must supply hose

FUEL: Limited amount of diesel oil available. No heavy fuel. Local can make available through truck transfer or barge. Midstream Supply located at Port.

CONSULS: None.

REPAIRS: Limited deck and engine repairs can be effected.

GANGWAY/DECK WATCHMEN: Only if required by ship's Own Master.

OPENING/CLOSING HATCHES: Only MacGregor hatches ma opened by the crew.

CUSTOMS ALLOWANCES: Tobacco, 1 carton 200 cigarettes. Spirits, reasonable quantity – 1 or 2 bottles.

CARGO GEAR: Must show safety inspection if requested.

REPATRIATION: Available.

AIRPORT: Approximately 4 miles from port. Served by 2 schedu lines (Delta and U.S.Air).

TIME: Central Standard Time (GMT minus 6 hours).
Central Daylight time in Summer (GMT −5 hours).

HOLIDAYS: *No work holidays:* New Year's Day; Easter; 4th July; Day; Christmas Day.

Working holidays: Lincoln's Birthday (February 12); Washington's Birthday (Third Monday in February); Memorial Da Monday in May); Veterans' Day (Fourth Monday in October); Fall Day, Thanksgiving Day (Fourth Thursday in November).

POLICE/AMBULANCE/FIRE: Dial 911.

TELEPHONES: Placed aboard only by very special arrangeme normally available.

SERVICES: Most repairs to radio, radar and other such equ Advance notice required.

SHORE LEAVE: Any time – any berth.

IDENTIFICATION CARDS: All crew must have U.S. Imm Landing Permit.

DELAYS: Normally, delays infrequent and for short durations.

AUTHORITY: Panama City Port Authority and Foreign Trade Z P.O.Box 15095, 5321 West Highway 98, Panama City, FL *Tel:* (904) 763-8471. *FAX:* (904) 769-5673. *Contact:* H.R. Eth Port Director. T.L. Berry, Assistant Port Director.

PASADENA, Texas: 29.43 N. 95.13 W.
Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Alb

AGRICULTURE: See "Agriculture" before first U.S.A. port (A

PASCAGOULA, Mississippi: 30.21 N. 88.34 W.

(See Plan)

PORT LIMITS: Subject to Charter-Party Terms, an "arrived ship", subject to jurisdiction of the Port Authority, occurs when a ship arrives at Horn Island Sea Buoy.
DOCUMENTS: See "New Orleans".
PILOTAGE: Compulsory. Pascagoula Bar Pilots' Association ((601) – 762 – 1151). Pilot boat to be contacted on VHF Channel 16, pilot boat has black hull with white house, International light and sound signals to be made by vessel requiring a Pilot. Pilot to be taken aboard vessel in vicinity of Horn Island sea buoy. Usual safety measures are required, with respect to boarding. Vessels may anchor in this area while awaiting Pilot, there is a 35 ft. to 50 ft. depth with good holding bottom.
ANCHORAGES: Only anchorages permitted are in vicinity of Horn Island Sea Buoy or seaward.
RESTRICTIONS: Under normal conditions there are no entry restrictions as to time or state of tide.

From Horn Island Sea Buoy to Horn Island Pass the channel is 450 ft. wide by 40 ft. deep; from Horn Island Pass to Pascagoula River Turning Basin the channel is 350 ft. wide and 38 ft. deep; the Pascagoula River Turning Basin is 950 ft. wide and 38 ft. deep.

Channel into Bayou Casotte (East Harbour) from Junction Buoy to mouth of Bayou Casotte Harbour is 225 ft. by 38 ft. deep to South Turning Basin 1,150 ft. wide by 38 ft. deep; thence at inner harbour channel is 300 ft. wide and 38 ft. deep into the Bayou Casotte Turning Basin; the Bayou Casotte Turning Basin is 940 ft. wide and 38 ft. deep. All dimensions listed are project dimensions; depths refer to MLLW datum.

No vessel or tow shall enter Bayou Casotte Channel outbound after a seagoing vessel or tow has passed Buoy 30 inbound, and; no vessel or tow shall enter Bayou Casotte Channel inbound after a seagoing vessel or tow has passed Buoy 11 outbound. Vessels or tows which are at a dock should remain at the dock until the inbound seagoing vessel or tow has passed, or until it has reached its berth, whichever occurs first.
MAX. SIZE: Pascagoula River: Length of vessel is restricted to approx. 00 ft. by turning basin, no breadth restriction, draft 38 ft. at MLW. Normal tidal range 1.6 ft.

Bayou Casotte: Vessels with length over 785 ft., max. breadth 125 ft. and draft 38 ft. are taken on a case-by-case basis.
RADAR/VHF: Radar and VHF radio on pilot boat, Channel 16.

Every vessel shall, when entering the Horn Island Pass Channel, and the Bayou Casotte Channel, or when getting underway from a berth, or when approaching the Pascagoula Channel while transiting the Intracoastal Waterway:

(a) Maintain a radio watch on VHF – FM Channels 13 and 16 in accordance with Vessel Bridge to Bridge Telephone Regulations of January 1st, 1973.

(b) Check on other traffic operating in the area by transmitting on Channel 16:

"SECURITY, SECURITY,
SECURITY(Vessel Calling)
THIS IS ....
ENTERING..
CHANNEL PROCEEDING FROM
..................TO ....
CHECKING FOR TRAFFIC, STANDINGBY
ON CHANNELS 13 and 16, ...
(Vessel Calling)
....OUT"

If other traffic replies, utilise Channel 13 for exchange of information relative to safe navigation.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Use of Pascagoula Marine Radio (KLU-775) is advisable for ETA cables to Agent. Stands by on VHF Channel 16 and operates on Channel 27 throughout 24 hours.
TUGS: Tugs will join vessels in harbour or off docks. No escort required. Tugs lines normally are used.
BERTHING: Private and public berths are available, by prior arrangement, in both the Pascagoula River Harbour (West Harbour) and the Bayou Casotte Harbour (East Harbour).

West Harbour – Public: Bulk facility, 900 ft. berth at 780 ft. wharf and 38 ft. deep.

Terminal 'A' with transit shed, 500 ft. wharf and 38 ft. deep.
Terminal 'B' with transit shed, 544 ft. wharf and 38 ft. deep.
Terminal 'C' with bulk cold storage, 718 ft. wharf and 38 ft. deep.
Terminal 'D' with 732 ft. by 187 ft. open wharf by 38 ft. deep, with transit shed.
South Clusters, 1 ship berth approximately 600 ft. by 24 ft. deep.

West Harbour – Private – Ingalls Shipbuilding: Note. These berths are normally occupied with ships being fitted out and are not normally available.

West Bank Shipyard, 4,219 ft. bulkhead, 5 berths by 38 ft. deep.
East Bank Shipyard, one 750 ft. pier with berthing both sides, 38 ft. deep.
Ham Industries, rig repair facility; 1,100 ft. wharf by 38 ft. deep.

East Harbour – Public:
Terminal 'E' with transit shed, 517 ft. wharf by 38 ft. deep;
Terminal 'F' with transit shed, 737 ft. wharf by 38 ft. deep;
Terminal 'G' with transit shed, 516 ft. wharf by 38 ft. deep;
Terminal 'G' Extension 695 ft. by 64 ft. open wharf by 15 ft. deep.
Terminal 'H' with transit shed, 556 ft. wharf by 38 ft. deep.

East Harbour – Private:
Chevron U.S.A. Inc., Wharf No. 1, 5 berths by 38 ft. deep;
Chevron U.S.A. Inc., Wharf No. 2, 1 berth by 38 ft. deep; (crude and coke dock).
Chevron U.S.A. Inc., Wharf No. 3, 1 berth by 38 ft.;
Mississippi Phosphate Company, 2 loading docks each 475 ft. by 38 ft. depth;
Trinity Marine – Pascagoula, slip 900 ft. by 20 ft. deep.

SPECIALISED CARGO HANDLING: Chevron U.S.A. Inc., Wharf No. 1 has facilities for handling acid, caustic, ammonia, and LPG, in addition to petroleum products. Chevron U.S.A. Inc., No. 2 has facilities for handling coke and crude. Chevron U.S.A. Inc., No. 3 has facilities for handling crude.

Gulf Coast Cold Storage Inc.:

Freezer Area: 1.5 million cu.ft. of −10°F. storage; plus 425,000 cu.ft. of −5°F storage at Terminal A warehouse.

Cooler Area: 500,000 cu.ft. of +40°F. storage.

Blast Freezers: 4×−50°F. Capacity 24,000 lbs. per day.

Location: Approx. 3 miles South of I – 10 of the West Bank area of the port. Adjacent to dock on a 38 ft. channel.
CRANES: The Port has a heavy lift capability of 400 tons by an arrangement with Ingalls West Bank Facility. Truck cranes with capacity up to 110 tons also available in the port area.
BRIDGES: None affecting 38 ft. channels.

Two bridges across the Pascagoula River above the turning basin, not passed through between channel and harbour.
STEVEDORES: 12 hours notice requested to arrange stevedore gangs.

Check with individual stevedoring companies for arrangements, straight time, and overtime computations.
MEDICAL: Agents to be advised if immediate medical attention is required. Free Pratique granted except in case of communicable diseases aboard, inoculations required by Public Health Service, etc. Doctors and hospital services readily available.
TANKERS: Chevron U.S.A. Inc. owns and operates 3 wharves on East side of Bayou Cosotte harbour. Facilities have 6 in., 8 in. and 12 in. lines with adaptors, discharge tanks with a capacity of 60,000 tons, 3 tanker berths with a 38 ft. draft. Wharf No. 2 for receiving crude oil from large tankers. Wharf designed and built for 50 ft. draft, but presently limited to 38 ft. draft on account of channel and seaward. Wharf No. 2 also handles coke ships.

Shipmaster's Report: June 1980.
Vessel: 32,000 g.r.t., loading ammonia at Chevron Refinery.
Approaches: Charts BA. 3981 and 3380.
Pilotage: There is no berthing at night for vessels of this size (32,000 g.r.t.) due to having to turn in the turning area above the berth. Vessels may sail at night but careful consideration should be given to weather conditions before agreeing to do so.

Contacted Pilot Office on VHF Channel 16, thereafter working on Channel 13.

Pilot boards from a fast, black hulled launch off "HIP" buoy, ladder on lee side about 1 m. above water.

> *CAUTION:* The outer channel is well marked with conspicuous buoys but the configuration of the channel is liable to change. The approach may be swept with strong conflicting cross currents and, since the widest section is only 350 ft., very careful attention must be paid to steering.

Once inside Petit Bois Island the channel narrows to 225 ft. in places; the Pilots do have an unofficial 'one way traffic scheme' in progress but this is not always adhered to by tows and fishing vessels.

Proceeding inwards, the vessel is turned at the very head of the harbour with the assistance of 2 tugs; vessel is turned to starboard and the head tug then shifts from the port bow to the starboard bow for berthing. Berthing is always port side alongside.

There is not a great deal of room in the turning basin, although the Pilots say that vessels over 800 ft. are turned there regularly.

On sailing, with a deep draft (32 ft. maximum) special care must be paid to steering within the channel. With a width of just over 200 ft. there is no room for error. I would advise that the watchkeeping officer be in attendance on the helmsman throughout the passage.

Time from Pilot aboard to 1st line ashore is about 2 hours.
Berth: Chevron Refinery: Least depth sounded 12.2 m. Very good, with a substantial Chicksan area and fairly good mooring arrangements.

Once made fast and loading a very careful watch must be kept on the moorings since large tankers pass up and down the harbour to the tanker berth close ahead; the shore personnel will not hesitate to stop loading if they think the moorings will allow the vessel to surge.

No motor access to the gate some 200 m. distant.

Telephone on the quay.
Loading: No difficulties were experienced. The facility is very keen on pollution and will watch the discharge of ballast very closely.

The refinery do require ballast to be discharged ashore but that is out of the question. A disclaimer will be presented for the ship to sign.

Since the upreach of the Chicksan is not sufficient, the low extension or flexible hoses will have to be rigged prior to arrival. Shore connection is 8 in. 150 ASA and was done on this occasion by ship's personnel.

No vapour return line.

There is a recirculating system and there was no need to blow through lines on completion.

Product was cold at this call but 'warm' product has been experienced here in the past. Overall load rate was 343 t.p.h. which the shore personnel were extremely happy with. Hourly rates frequently over 500 t.p.h.

Shore Surveyor attended and all figures were based on ship's gauges.

Personnel generally helpful.
General: Fresh water available on the quay but reported as *not potable.*

Bunkers available.

Stores have to be manhandled along the jetty but there are small trolleys available.
Gangway: Best left turned in until in position thence no problem, being clear of obstructions.

No objection made to ship's crew "touching up" ship's side from quay.

Also see "Specialised Cargo Handling".
DENSITY: Density varies with the state of tide and wind, from fresh to salt water.
FRESH WATER: Potable water is available at most berths. Water at public terminals can be delivered at flow rate of 50 g.p.m.
FUEL: Vessels are bunkered at berth in the harbour by truck or barge. All grades of fuel are available.

FIRE PRECAUTIONS: Usual safety precautions required. Verify unusual procedures for approval of U.S. Coast Guard.
CONSULS: Many countries have consuls within a 100 mile radius of Pascagoula. (Mobile and New Orleans).
REPAIRS: Most deck and engine repairs could be arranged within port facilities.
DRY DOCKS: Ingalls Shipbuilding Corporation, has 1 launch pontoon (dry dock) with 38,000 ton capacity.

Flechas Shipyard has one 600 ton dry dock.

There are several marineways in vicinity, capacities 50 – 100 tons.
SURVEYORS: Licensed Marine Surveyors are available in Port.
GANGWAY/DECK WATCHMEN: Port guards are furnished for the general cargo terminals at the port's expense. At least 1 person must be on duty aboard vessel.
HATCHES: Opening/closing hatches by the crew is at the discretion of the ship.
CUSTOMS ALLOWANCES: Each crew member is allowed either 300 cigarettes or 50 cigars or 3 lbs. of tobacco. In addition, each member is allowed 1 quart of alcoholic spirits as regulated by provisions of the Mississippi Alcoholic Beverage Commission Rules.
CARGO GEAR: No requirements for cargo gear other than it be certified by a recognised International organisation.
REPATRIATION: The City of Pascagoula is served by regularly scheduled transportation. Vessel's Agent to arrange clearance with Customs and Immigration officials.
AIRPORT: An airport is available approx. 35 miles from the city and is served by regularly scheduled airlines.
TIME: The Port of Pascagoula is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months. (First Sunday in April to last Sunday in October).
HOLIDAYS: New Year's Day (January 1st); King's Birthday (3rd Monday in January); Washington's Birthday (3rd Monday in February); Mardi Gras (41 days before Easter – Tuesday); *Easter Sunday/Easter Monday (1st Sunday after 1st full moon after March 21st); King's Memorial Day (April 4th); Memorial Day (Last Monday in May); *Independence Day (July 4th); *Labour Day (1st Monday in September); Veterans' Day (November 11th); Thanksgiving Day (Last Thursday in November); *Christmas Eve (December 24th); *Christmas Day (December 25th); *New Year's Eve (December 31st).

(*Non-working). Non-working holidays are observed from midnight of the holiday through to 0700 hrs. of the following day with the exception of Christmas Eve and New Year's Eve when the non-working portion of the holiday commences at noon.

Should any of the above holidays except Easter, Christmas Eve, and New Year's Eve fall on a Sunday the following Monday will be observed.

Saturday shall not be considered as a layday in determining time ships are in berth in this harbour.
POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are: Fire 762-1133; Police 762-2211; Ambulance 762-4949 or 762-4848. Universal emergency No. 911.
TELEPHONES: Through special arrangements with steamship agents.
SERVICES: Facilities are available for compass adjusting. Tank cleaning and receipt of tank washings can be arranged by contract services available in the area.
SHORE LEAVE: Allowed for any crew member not detained by Immigration Office.
IDENTIFICATION CARDS: Standard Immigration Form I-95 to be made up for each crew member on arrival. Not necessary for crewmen already holding Form I-95 issued for the same vessel.
GARBAGE DISPOSAL: Garbage collection available upon request. Arrangements should be made through ship's Agent. Service provided by BFI. (Tel: (601) 769-7850), and Waste Management. (Tel: (601) 832-3144).
WASTE OIL DISPOSAL: Service provided by Waste Oil Collectors. (Tel: (601) 497-4585). Arrangements should be made through ship's Agent.
SEAMAN'S CLUBS: Seamans Center operated by Jackson County Baptist's Association, 3709 Hospital Road, Pascagoula. Tel: (601) 769-7101. Services: Telephones, postage, stationery, games, transportation to shopping area.
DELAYS: Berths at Public Terminals and the South Clusters are assigned by the Harbour Master of the Port of Pascagoula. Berths at private docks are assigned by the respective owners. No exceptions to this are allowed. Berth at grain elevator is assigned by The Harbour Master of the Port of Pascagoula. No delays are encountered by following this procedure, emergencies excepted.
GENERAL: Some difficulty encountered by unscheduled tows who use harbour for shelter in inclement weather. Pilot Association aware of current situations. Ample barge storage is available in Barge Fleeting Area operated by Colle Towing Company who may be contacted on VHF Channel 16 (KKV-933). Tel. (601) 762-5700.

AUTHORITY: Port of Pascagoula, 3033 Pascagoula Street, P.O. Box 70, Pascagoula, Mississippi 39567-0070. *Tel:* (601) 762-4041. *Telex:* 161858 PRT PASC. *FAX:* (601) 762-7476. *Contact:* Melody Bradley, Port Director. Paul J. Gavin, Harbour Master. Allen E. Moeller, Manager – Operations and Sales.

No. 5	72,000 sq.ft.
No. 6	90,000 sq.ft.
No. 7	15,000 sq.ft.
No. 8	83,000 sq.ft.
No. 9	40,000 sq.ft.
Total	459,300 sq.ft.

EQUIPMENT: Leased Equipment: 18×6,000 lb. fork lift 8×9,000 lb. fork lift trucks, 2×15,000 lb. fork lift trucks, 1 front end 2 motorised driven sweeper, 1 motorised driven scrubber, 1 paper and stevedoring equipment: Fork lift trucks have individual heig 10, 14, 15, 16 and 17 ft. Attachments permit conversion for ha paper rolls and bales. 1×63,000 lb. lift truck.
TANKERS: *Private:* Coastal Fuels Marketing, Mitch Sartin, Ma Mid Gulf Area, Port of Pensacola, P.O.Box 12626. Pensacola, FL3 Tel: 904-432-2471. Facilities: Industrial, Marine Fuels. 6 bulk oil of 662,000 barrels capacity connecting by pipeline to Berths 1, 2 5 positions for loading and unloading. 5 bunkering stations and a loading facility.
Report: Port Approaches – Cautionary Advice: Vessels can ap the Sea Buoy with little or no difficulty. Deep loaded vessels sho enter past Buoy No. 1 without a Pilot. Currents in the Gulf of M are varied, but will usually set in direction of the wind; some approaching 4 to 5 knots during severe storms. When entering h full manoeuvring power and a good helmsman are essential current in the Entrance Channel can reach 5 knots. Currents ins harbour are approximately 1 knot and set fair with channel. Vessels anchor outside of Buoy No. 1 and off the centre of channel line no Pilot is available to take them to the Inner Anchorage. Light permitted at the Inner Anchorage. Harbour bottom consists of so There is very little harbour traffic.

Entering and Berthing: This harbour is serviced by one organisation who knows all anticipated movements within the ha so no unexpected traffic should be encountered and all passing at desirable positions. Vessels can enter and berth at any stage Pilots will use West Channel for ships docking at Berth No. 3 pier face. When docking at Berth No. 3, the Pilot approaches the dredging the vessel's anchor and passes her lines. When tu available in the harbour, Pilots will employ them.
FRESH WATER: Available.
AIRPORT: Pensacola Regional Airport is served by both domes international air carriers in addition to intrastate airline service.
GARBAGE DISPOSAL: Service available. Dumpsters up to 40 on board or alongside. Collection on demand. Contact: B.F.I. o 433-7425, or Environmental Waste on (904) 478-0633. Rates on r
WASTE OIL DISPOSAL: Collection available for liquid or contam solids. Capacity into trucks up to 10,000 gallons. Available at a berth. Charges available on request. Contact: Industrial Waste (904) 479-1788, or Pensacola Pollution Control on (904) 479-8

(See Plan)

DOCUMENTS:

3 Crew Lists, Form I-418 (suggest 6 be made).
3 Passenger Lists, Form I-418 (suggest 6 be made).
3 Customs Stores Lists (suggest 6 be made).
3 Curio Lists (own ship Form) (suggest 6 be made).
3 Narcotics Lists (own ship Form) (suggest 6 be made).
Manifest (Ship Cargo List). If Philadelphia first port of call, require 1 copy for Customs and 1 copy to be used as "traveller" surrendered last port of call. If Philadelphia not first port of call, 2 copies required, all cargo to be discharged at Philadelphia.

For Immigration Service:
Visaed Crew List.
Valid Passport or Seaman's Book for each person on board.
Crewman's Landing Card (Form I-95) for each crew member.

PILOTAGE: Pilotage is provided by members of the Pilots' Association for the Bay and River Delaware who maintain a shore station and operations tower at Cape Henlopen. The Pilot Station is in operation on a 24 hour basis and guards VHF Channels 16 and 14. Telegraphic address is: Delpilots, 214 S. Eleventh Street, Philadelphia, Pa. 19107. Telex: 510-1002653. Arrangements for Pilot may be made by the local Agent although an ETA and draft either by cable or VHF radio will be greatly appreciated and will facilitate prompt boarding on arrival. The Pilot boarding area is inside a line between Entrance Buoys No. 5 and 6, or approximately 2 to 2.5 miles S.E. of Harbour of Refuge Lighthouse. Pilots may board further off-shore upon special request.

ANCHORAGES: Large and deep draft vessels awaiting berth are encouraged to avail themselves of the deep water anchorage adjacent to the Breakwater near the Pilot Station. There are 16 anchorage areas available along the Delaware River for moderate size vessels of lesser draft.

Shipmaster's Report: Good holding ground at Big Stone Anchorage. There is a launch service from Big Stone Anchorage to the shore, call VHF Channels 9 and 14.

RESTRICTIONS: There are no restrictions imposed upon entry except those dictated by vessel draft. Throughout most of its length, the Delaware River is dredged to 40 ft. at MLW. In addition there is a mean tidal range of about 5.7 ft. Vessels of 40 ft. fresh water draft can safely transit the river on a rising tide.

MAX. SIZE: Deep-draft oil carriers are lightered in a special anchorage approximately 10 miles N.W. of the Pilot Station. Vessels are restricted to a max. draft of 55 ft. by Federal Law.

Chesapeake/Delaware Canal: See "Wilmington" – Delaware.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: A port radio service operated by The Ports of Philadelphia Maritime Exchange on a 24 hour basis is also available to all vessels while transiting the Delaware River. VHF Channels 16 and 14 guarded for purposes of this service.

Ship reporting service in operation.

TUGS: Tugs normally join vessels adjacent to berth. Tug's lines are used.

BERTHING:

Terminal	*Length* (ft.)	*Depth* (ft.)	*Use*
Packer Avenue	3,800	35-40	Containers, Steel Products, Refrig., Fruit, Heavy Lifts.

Pier 96	1,380	30	Automobiles.
Pier 82/84	2,849	30	Fruit, Breakbulk, Project Cargoes.
Piers 78/80	3,892	35	Newsprint, Wood Pulp, Forest Products, 2 Ro/Ro Ramps.
Piers 38/40	1,100	35	Newsprint, Wood Pulp, Forest Products.
Petty's Island	1,000	35	Trailers (dry and reefer), Ro/Ro, Containers, Steel Products.
Beckett Street	2,300	30-40	Containers, Scrap Metal, Steel Products, Plywood, Lumber, Salt, Breakbulk.
Broadway	4,000	30-40	Bananas, Pineapples, Coal, Petrocoke, Minerals, Breakbulk.
Tioga (Container)	1,450	40	Containers, Breakbulk, Automobiles, Ro/Ro.
Tioga (Fruit)	1,753	40	Refrig. and Fresh Fruit, Containers, Paper, Cocoa Beans, Autos, palletised and Project Cargoes.
Northern Shipping	3,300	34	Breakbulk, Containers, Bulk, Project and General Cargoes.
Chester	1,100	35	Containers, Steel, Metals, Hardboard, Lumber, Glass, Woodpulp, Paper Products.
Fairless	2,500	40	Steel Products, Iron Ore.

CONTAINER HANDLING FACILITIES: *Tioga Marine Terminal:* Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 2×45 ton container cranes. Length of the marginal wharf is 3,300 ft., upper slip berth 725 ft. and lower slip berth 625 ft.

Packer Avenue Marine Terminal: Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 5×45 ton container cranes, one has a heavy lift capacity of up to 375 tons. The marginal wharf is 3,800 ft. in length and the Roll-on/Roll-off slip berth is 825 ft. in length. 80 Reefer outlets.

Holt Marine Terminal: 2×35 ton container cranes. Ro-Ro facilities available.

Gloucester City Marine Terminal: Located on the New Jersey side of the Delaware River, in Gloucester City. Terminal area 150 acres. 6 berths with total length 5,500 ft. (4 berths – depth 40 ft.; 1 berth – depth 35 ft. and 1 berth – depth 30 ft.). 320 reefer outlets. 2×45 tons container cranes, 1×300 tons P&H truck crane, 1×180 tons Vicon truck crane. 4×92,000 lb. Toploaders, 5×30,000 lb. Toploaders, 230×3,000 lb. – 35,000 lb. forklifts and 30 yard hustlers.

BULK HANDLING FACILITIES:

Berth No.	*Location*	*Operator*	*Berth Length* (m.)	*Berth Depth* (m.)	*Loading Rate* (tonnes/p.h.)
Pier No. 124 (inactive)	Greenwich	Conrail	310	12.19	5,000 (coal)
Pier No. 122 South (2 berths)	Greenwich	Conrail	260	12.19	3,000 (ore)
Pier E	Port Richmond	Conrail	260	12.19	
Camden-Beckett Bulk Terminal (4 berths)	Camden	South Jersey Port Corp.	200	11.50	

STEVEDORES: Ship's Agents make arrangements for stevedore gangs. Agents should be kept advised of any change in ETA.

MEDICAL: Advance notice of requirements desirable to the extent possible. Hospital facilities are available.

TANKERS: All terminals are equipped with reducers. There are slop (residue) facilities at most terminals. Some main terminals listed below:

Fort Mifflin	Atlantic Refining and Marketing Co.	40 ft. depth
Point Breeze	Atlantic Refining and Marketing Co.	32 ft. depth
	Ballast Wharf	32 ft. depth
Hog Island	Chevron U.S.A. Oil Terminal	40 ft. depth
Paulsboro	Mobil Oil Terminal	30 ft. and 40 ft. depth
	B.P. Oil Terminal	36 ft. depth
Marcus Hook	B.P. Oil Corp.	35 ft. depth
	Sun Oil Co.	40 ft. depth
Westville (Eagle Point)	Coastal Eagle Point Oil Co.	40 ft. depth
Girard Point	Chevron U.S.A.	33 ft. depth
Delair	Amerada Hess Corp.	31 ft. depth
Delaware City	Texaco Inc.	37 ft. depth

In addition to the above, the following are available for tankers and chemical carriers:

GATX (NJ) – 3 berths.
GATX (Pa.) – 1 berth.
Citgo (NJ) – 3 berths asphalt).
TCI (Pa.) – 1 berth.

Atlantic Refining and Marketing Co. – Fort Mifflin: Entering and Docking: There is a 5-knot tidal current that may cause extra care in tending lines while moored. Passing river traffic also requires constant attention to mooring lines. "A" and "B" Berths are 800 ft. in length and total mooring leads to each berth being 15. Maximum bow/manifold at "A" Berth is 375 ft.; head lines are 4 breast line leads. "A" Berth also requires 4 forward springs, 2 stern lines, 2 stern/breast lines and 4 after spring lines. "B" Berth requires 2 head lines, 2 forward breast lines, 4 forward spring lines, 2 stern lines, 2 after breast lines, 4 after spring lines. A gangway is not provided by the terminal.

Berthing: If the vessel is under 50,000 d.w.t., 2 tugs (1,000 h.p. – 2,000 h.p.) are required. Vessels in excess of 50,000 d.w.t. and equipped with a bow thruster may utilise 2 tugs. However, if the vessel is in excess of 50,000 d.w.t. and has no bow thruster, then 3 tugs should be used for docking. During normal conditions for vessels of any tonnage 1 tug (1,000 h.p. – 1,500 h.p.) should be employed for undocking. The vessel is normally turned off the dock prior to docking for starboard side mooring. Normal mooring is done approximately 1.5 hours prior to HW. A Pilot is required during docking and undocking. All hoses are 10 in. with bolted flanges. Cargoes handled are: crudes, gasolines, heating oil and kerosene. Maximum working pressure is 100 lbs. The terminal has no facilities for handling ballast or slops.

British Petroleum – Marcus Hook:

Pilotage and Docking: The services of a Pilot and Docking Master is both compulsory and recommended. When docking vessels of tonnages up to 30,000 d.w.t., 1 tug (1,700 s.h.p.) is required. Tonnages less than 50,000 d.w.t. require 2 tugs and vessels with a tonnage greater than 50,000 d.w.t. require 3 tugs when docking. For undocking vessels of any tonnage, 1 tug is required.

Hose Connection: Crude oil is discharged through 2×10 in. and 1×8 in. arm. All cargo connections are made with hydraulic quick coupler loading arms. Maximum loading and discharge pressure is 100 lbs. Fuel oils and heating oil are discharged through 10 in. and 8 in. arms to the vessel. The terminal has storage facilities for up to 92,000 bbls. of ballast and does not handle slops.

Facilities and equipment available at the terminal for cargo control include check valves on the dock leading to the shore pipeline system. An emergency control to stop loading is located at the dock manifold.

Bunkers: Fuel oil and diesel oil are available from an 8 in. line with a maximum delivery rate of 2,500 bbls.p.h Quantities delivered are as required. Fresh water is piped at a maximum rate of 20 t.p.h. through a 3 in. line, there are no restrictions on amount delivered.

British Petroleum – Paulsboro:

General: The BP refinery at Paulsboro is located 1.5 miles Eastward of Bramell Point (87 miles from the Sea Buoy). The terminal has 2 offshore wharves which provide 1,053 ft. of berthing space. Depths of 38 ft. are reported alongside, and deck heights are 11 ft. and 12 ft. There is a 3.5 million-barrel storage capacity. The terminal is used for receipt and shipment of petroleum products and bunkering vessels. The berths are parallel to the channel and each have 4 steel dolphins.

Vessels up to 675 ft. in length and a maximum of 38,000 d.w.t. can be accommodated at the Terminal Dock. Max. draft (fwd) is 37 ft. at the dock. Docking of vessels is done 2 hours prior to HW. Vessels up to 26 ft. can dock or undock at any stage of the flood tide. Vessels in excess of 26 ft. must wait for HW to dock or undock. Passing river traffic will cause some surge to take place. Proper tension should be maintained on all mooring leads. A gangway is not provided by the terminal.

Pilotage and Tugs: The services of a Pilot and Docking Master is both compulsory and recommended. Vessels tonnages in excess of 1,000 g.r.t. required tug assistance from 1 or 2 tugs depending on prevailing winds. For undocking vessels of any tonnage 1 tug is required. Due to shoaling adjacent to the berth, be advised that undocking vessels should be lined up on the Billingsport Range prior to the exchange of the Docking Master and Pilot.

Hose Connection: Clean products, No. 4 fuel oil and No. 6 fuel oil are handled at this terminal through 8 in. hoses. These hoses are connected with bolted flanges, there are 2 connections for each product. All products are pumped with a maximum pressure of 100 lbs. The terminal has no facilities for handling ballast or slops.

Bunkers: Fuel oil and diesel oil are available in desired quantities. Maximum delivery rate is 2,000 bbls.p.h. through 8 in. lines. Fresh water is not available.

Dupont – Gibbstown:

General: Deepwater Point, located 0.6 miles above the New Jersey end of the Delaware Memorial Bridge and 59 miles from the Sea Buoy, is the site of the Dupont Chemical Company plant. The 550 ft. wharf (Lat. 39° 41' 37" N., Long. 75° 30' 40" W.) at the plant can provide 600 ft. of berthing space with dolphins. Depths of 33 ft. are reported alongside; dock height is 10.5 ft. Liquid sulphur, acids, and chemicals are handled at the wharf.

Pilotage and Docking: Vessels up to 630 ft. in length, beam 90 ft. and 28,000 d.w.t. can be accommodated at the dock. Max. draft allowed is 32 ft. The dock has a limited strength. Shoaling in the berth places a limit on vessel draft. For drafts of 32 ft. docking is done 2 hours prior to HW. Undocking can be done at any stage of the tide. Passing river traffic will cause the vessel to surge in it's berth. Proper tension should be maintained on all mooring leads. A gangway is not provided by the terminal.

The services of a Pilot and Docking Master is compulsory and recommended. Recommended mooring is with the bow downriver. The vessel is turned off the dock with tug assistance. For docking, 2 tugs (approximately 2,000 h.p.) are required. When undocking 1 tug (approximately 2,000 h.p.) is sufficient. The dock runs parallel to the river channel. All vessels are moored port side to. No mooring cables can be employed. All leads must be manilla or polypropylene lines.

Hose Connection: Fuel oil is discharged through 2×10 in. lines. These lines are connected by a flange. Maximum pumping pressure is 100 lbs. Numerous cargo lines are located on the dock for handling barge shipments of petro-chemicals and acid. Assigned vessels are cautioned to keep mooring lines clear of cargo lines. Safety check-lists are employed at this facility. Personnel at the facility are familiar with and follow safety practices. The terminal has no facilities for ballast or slops.

Fresh Water: Fresh water is only available at the dock. Fresh water is piped at 20 t.p.h. and supplied in an emergency only.

Chevron Oil – Hog Island (Berths No. 3 and 4):

General: The Hog Island Wharf is located 90 miles from the Sea Buoy on the Mifflin Range section of the Delaware River at Lat. 39° 51' 46" N., Long. 75° 14' 15" W. The terminal is a deepwater berth providing 2,754 ft. of berthing space with dolphins. Depths of 37 ft. are reported alongside the dock and deck height is 16 ft. The terminal is used for receiving crude oil and shipping refined petroleum products. There is a 5.5 million-barrel storage capacity at the terminal.

Entering and Docking: Vessels up to 1,000 ft. in length, 135 ft. beam and 110,000 d.w.t. can be accommodated at both berths. Maximum fresh water departure draft allowed is 37 ft. Vessels over 35,000 d.w.t. have a maximum fresh water departure draft of 36.5 ft. For vessels making arrival to the Hog Island Berths that have pre-arrival displacements over 35,000 d.w.t. a lightering service is available in the vicinity of Big Stone Beach. Chevron provides Yokohama Fenders for the lightering operations. Vessels over 35,000 d.w.t. should have a minimum arrival draft of 36.5 ft. (salt) prior to transit up the Delaware River. A gangway is not provided by the terminal.

Pilot and Tugs: The services of a Pilot and Docking Master is compulsory and recommended. Vessels should arrive off the berth 2 hours prior to HW. All vessels are turned prior to docking for starboard-side berthing with the heading down-river. 2 tugs are required if the tug is between 1,000 h.p. and 2,000 h.p. 3 tugs are required for vessels exceeding 35,000 d..w.t. For undocking 1 tug is required for all tonnages. No gangway is provided by the terminal. Passing river traffic will cause berthed vessels to surge. All mooring lines and/or wires should be tended at all times. Additional spring lines are recommended for vessels in excess of 35,000 d.w.t.

Hose Connection: Crude oil is discharged through 4 loading arms at both berths. The hoses are 12 in. and are connected with a bolted flange. Max. discharge pressure is 100 lbs. All lines on shore are common crude lines. The terminal has no facilities for ballast or slops.

Fresh Water/Fuel: Fresh water when required by the vessel can be provided by the terminal. Max. delivery rate is 50 t.p.h. through a pipeline. Fuel oil can be delivered by barge only.

Citgo Petroleum:

General: The Citgo Fuel Pier is located at the S.W. limits of M Anchorage, 81 miles from the Sea Buoy. The entrance of Mantua C is adjacent to the Western end of the Fuel Pier dolphin located a end of the pier. The terminal is used for the discharge of crude oil, heating oil, jet fuel and petrochemicals.

Vessels up to 800 ft. in length, 125 ft. beam and 80,000 d.w.t. c accommodated at the berth. Maximum fresh water draft allowed pier is 37.5 ft. Shoaling at the berth may place further limitations allowed fresh water draft.

Pilotage and Tugs: The services of a Pilot and Docking Mas compulsory and recommended. Following transit of the Dela Riveron a rising tide, vessels should arrive off the dock 2 hours p HW. Vessels are turned around in the Anchorage Area North terminal with 2 tugs assisting. After completion of the turn the ves then breasted, port side, into the berth. The berth is almost para the channel. 2 tugs are used for docking vessels of all sizes. 1 used for undocking all vessels. Approximate tug horse-power req is 2,000 h.p. All vessels are moored port-side to. The te recommends that manila or polypropylene mooring lines be used location. Passing river traffic will cause surging of the vessels berth. To minimise this surging, the terminal recommends doub fore and aft spring lines. All mooring lines should be tended cons

Hose Connection: Cargo handled at this terminal includes heating oil, fuel oil and jet fuel. Jet fuel is handled through an 8 in All other cargoes are handled through 10 in. lines. Connections of are made with flanges. Maximum pumping pressure is 90 lbs completion of cargo discharge the terminal displaces the cargo hose with nitrogen. The terminal connects and disconnects all and has no facilities for ballast or slops.

Bunkers and Freshwater: No fuel or freshwater is available at the The terminal will not permit fueling of vessels at this berth.

Mobil Oil – Paulsboro: (Also see "Shipmaster's Report November 1992).

General: The Mobil Oil Terminal is located at Bramell Point West end of the Paulsboro waterfront which is approximately 80 from the Sea Buoy. Facilities include a 2,453 ft. marginal wharf pro 2,254 ft. of berthing space. Depths of 39 ft. have been reported alon and deck height is 12.5 ft. There is a 6.2 million-barrel storage ca The terminal is used for the receipt and shipment of petroleum pro and bunkering vessels.

Vessels up to 900 ft. in length, unlimited beam and 80,000 d.w be accommodated at the terminal berths. Drafts to 38 ft. (fresh- have also been accommodated at these berths. Shoaling at the may place further limitations on the allowed fresh-water draft.

Pilots and Docking: The services of a Pilot and Docking Ma compulsory and recommended. Vessels should arrive off the 2 hours before HW and are turned prior to docking for a por mooring. After completion of the turn the vessel is breasted in berth. Additional spring lines are recommended to prevent s caused by passing river traffic. To insure a proper lead on the lines, the terminal recommends the spring lines be crossed. The te does not provide a gangway.

Tugs: Tug requirements for docking vessels include: 1 tug for up to 30,000 d.w.t., 2 tugs for vessels over 30,000 d.w.t. For und vessels tug requirements include 1 tug for vessels up to 50,000 and 2 tugs for vessels in excess of 50,000 d.w.t.

Hose Connection: Crude is discharged at No. 1 Berth. 4 loadin with 10 in. hoses using bolted flanges are connected to the ship discharge pressure is 125 lbs. Clean lubes are handled at No. 2 through 3 loading arms when loading and 4 loading arms discharging. 8 in. hoses with bolted flanges are connected to th Max. line pressure is 100 lbs. Lube oils are handled at No. 3 B the same manner as No. 2 Berth. The terminal has limited facil handling ballast through a 6 in. line. There are no common pipel cargo in the terminal. Safety check lists and practices are follo terminal personnel.

Bunkers and Fresh Water: All quantities of fuel oil, diesel oil an water are pumped to the vessel as required.

Sun Oil – Marcus Hook: (Also see "Shipmaster's Report September 1984).

General: Located at Mile 69 North, Marcus Hook is an im petroleum centre where large quantities of crude oil are recei refined petroleum products are shipped. Vessels can be bunkere rate of 1,500 and 5,000 bbls.p.h. Sunoco Wharf No. 3 (Lat. 39° 48' Long. 75° 25' 10" W.), and Sunoco Wharf No. 2 (250 yar Northeastward of Wharf No. 3) are both owned and operated Oil Company.

Wharf No. 2A can accommodate vessels up to 750 ft. in lengt beam, max. 50,000 d.w.t. and max. fresh water draft 35 ft. Whar can accommodate vessels up to 810 ft. in length, 125 ft. bea 76,000 d.w.t. and max. fresh water draft of 35 ft. Wharf No. accommodate vessels up to 1,000 ft., 125 ft. beam and dra Shoaling at the berth may place further limitations on allowed fre drafts.

Pilots and Docking: The services of a Pilot and Docking compulsory and recommended. Vessels should arrive off 2 hours prior to HW. Vessels are turned above the facilities docking. Undocking is done at any stage of the water hei completion of turn the vessel is then breasted into the be starboard side mooring. Passing river traffic will cause moore to surge unless proper tension is maintained on mooring le times.

Tugs: Tug requirements for docking vessels include 2 tugs 1,500 h.p. and 2,000 h.p. For vessels undocking 1 tug is su

Hose Connection: Crude and fuel oil are discharged at Ber and 3A. Both berths have 4 loading arms, 12 in. hoses, pumping pressure of 125 lbs. All connections are made wi flange. Clean products are handled at all 3 berths through 8 in hoses. Maximum pumping pressure is 125 lbs. Petro-che discharged at Berth No. 3A through a 10 in. line with a max. pumping pressure of 125 lbs. All connections for clean products and petrochemicals are made with bolted flanges.

Bunkers and Fresh Water: Fuel oil and water is available at all berths. Fuel oil is delivered at 2,000 bbls.p.h. through an 8 in. line. Fresh water is piped at a rate of 45 t.p.h. Quantities available are enough to satisfy individual vessel requirements.

Tank Cleaning Inc. – Harkness Point, Schuylkill River:

General: The Schuylkill River is approximately 85 miles from the Sea Buoy on the Northside of the Delaware River. The junction is marked with a flashing red 4 sec. light mounted on a stone pile on the right side of the junction and Buoy "C1" on the lest side of the junction. A fogsignal is located on the West side of the river junction. A lighted range (bearing 021.5°T) marks the entrance. Vessels proceeding to Harkness Point will pass under the Girard Point Bridge and Penrose Avenue Bridge, 0.6 miles and 1.3 miles, respectively, above the river mouth. Both bridges have fixed spans with clearances of 135 ft.

Pilotage and Docking: The terminal berth can accommodate vessels up to 630 ft. in length, 90 ft. beam, max. 28,000 d.w.t. and max. fresh water draft of 33 ft. There is a bow-to-manifold restriction and no proper breast line leads therefore the present mooring arrangement considered to be unsafe. Vessels should arrive at the Schuylkill River at HW slack for docking. Undocking can take place at any stage of the tide. A parallel approach is made when docking. A Pilot and Docking Master are compulsory and recommended. 2 tugs are assigned to all vessels when docking. For all vessels undocking 3 tugs must be employed. Undocking vessels have to be backed down the Schuylkill River to the junction with the Delaware River before turning can be accomplished.

Hose Connection: Fuel oil, heating oil, bunker and gasoline are all offloaded at this terminal. Bunkers are also loaded onto vessels at the berth. 4×10 in. lines are used for fuel oil and heating oil. All cargo lines are connected with a bolted flange. Max. pumping pressure on all lines is 100 lbs. 1×6 in. line is used for bunkers and 1×8 in. line is used for gasoline. The terminal has no facilities for ballast or slops. The dock manifold only permits the discharge of one grade at a time, this could affect the trim of the vessel.

Fresh Water/Fuel: Fuel oil and water is available at the berth. Fuel oil is delivered through a 6 in. line at 2,000 bbls.p.h. as per vessel requirements. Fresh water is piped at 40 t.p.h. maximum delivery rate.

Coastal Eagle Point Oil Co. – Westville Nos. 2 and 3:

General: The Terminal is located 90 miles from the Sea Buoy at Lat. 39° 52' 43" N., Long. 75° 09' 30" W., East of Eagle Point. The facility has an offshore wharf which provides 1,380 ft. of berthing space. Depths of 40 ft. are reported alongside and deck heights are 6 ft. and 16 ft. There are water and elecrical shore power connections. Vessels can be bunkered at the rate of 1,500 bbls.p.h.

The terminal can accommodate vessels up to 910 ft. in length, unlimited beam, max. 85,000 d.w.t. with a max. fresh water draft of 38 ft. The controlling depth at the berth is 40 ft.

Piiotage and Docking: A Pilot and Docking Master are compulsory and recommended. Vessels dock at HW or first stage of ebb. Undocking takes place at any stage of the tide. For docking 2 tugs are recommended. For undocking the Master may decide to use 1 or 2 tugs, depending on the weather and tidal conditions. Vessels are turned prior to docking for a port side mooring. No gangway is provided by the terminal. A normal mooring arrangement is used. Distance between shore manifolds is 878 ft. The terminal requires 100 ft. clearance between vessel when Berths No. 2 and 3 are occupied simultaneously.

Hose Connection: Berth No. 2 handles off-loading of crude, No. 4 and No. 6 fuel oil through 12 in. and 8 in. hoses. All connections at both berths are bolted flanges. Max. pumping pressure at both berths is 100 lbs. for all cargoes except chemicals which are pumped at 95 lbs.

Berth No. 3 handles No. 4 and No. 6 fuel oil through 6 in., 8 in. and 12 in. hoses. The terminal can handle up to 10,000 tons of ballast providing the separator is operational. Slops can also be sent ashore. The shore ballast line is segregated. Fuel Oil and crudes are handled through a common line.

Fresh Water/Fuel: Available.

Dirty Ballast Facilities:

Marcus Hook (Sun): Line 8 in. Max. quantity acceptable 1,800 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Marcus Hook (B.P.): Line 8 in. Max. quantity acceptable 2,000 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (Mobil): Line 6 in. Max. quantity acceptable 2,000 tons. Rate 150 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (B.P.): Line 10 in. Max. quantity acceptable 4,000 tons. Rate 800 t.p.h. Clean ballast may be pumped overboard.

Point Breeze (Atlantic): Line 6 in. Max. quantity acceptable, no limit. Rate 300 t.p.h. Clean ballast may be pumped overboard.

Eagle Point (Coastal): Line 10 in. Max. quantity acceptable, no limit. Rate 1,000 t.p.h. Clean ballast may be pumped overboard.

Girard Point (Chevron): Line 8 in. Max. quantity acceptable, no limit. Rate 500 t.p.h. Clean ballast may be pumped overboard.

General: Lighterage of deep drafted tankers effected at anchorage inside the Capes and before entering the main Ship Channel, i.e. at Big Stone Reach Anchorage, etc.

The holding ground in the upper river anchorages, such as Reedy Point, Marcus Hook, Mantua Creek, etc. is reported to be poor, whilst considerable siltation is also reported in these areas. Masters are therefore advised to take suitable precautions when having to use these anchorages.

Loading Fresh Water: This is effected at Mantua Creek Anchorage only.

Shipmaster's Reports:

September 1984.

Sun Oil Jetty (3C) at Marcus Hook.

Vessel: 140,000 d.w.t. LOA 270 m.

This is the only berth at Marcus Hook suitable for tankers of this size. Usually berth starboard side alongside, arriving off berth about 2 hours before HW. 1 tug each end, tugs' lines and usually made fast on main deck. 2 back springs first then 2 to 3 breasts and 2 to 3 head/stern lines. With this size of vessel it is better to have forward back springs from forecastle and use main deck moorings as head lines. Aft normally have back springs and stern lines from poop and breast lines from main deck.

Shore gangway and with an accommodation ladder about 20 m. abaft after manifold it is best to remove platform and land shore gangway there.

If bunkering then usual to pull off berth and anchor in Marcus Hook Anchorage.

Berthing Pilot boards off and normally uses accommodation ladder.

November 1992.

Mobil Oil No. 1 Jetty at Paulsboro.

Vessels normally berth port side to at the beginning of the flood tide.

Normal mooring is 3-2-2, and all lines sent by shore messenger. Springs and breasts are sent first, and finally head/stern lines by boat.

Fresh water available by barge only.

Bunkers available from jetty to Mobil vessels only.

Shore gangway available.

Transport to and from main gate by security van.

No crane available for taking stores.

Report: September 1993.

The following was sent by an Agent to an Owner/Operator:

Port of Philadelphia Bulletin:

1. The United States Coast Guard Captain of the port in Philadelphia has issued a directive that eliminates the grace period for vessels arriving in Philadelphia with an expired Tank Vessel Examination (TVE) or Letter of Compliance (LOC). Vessels will not be allowed to commence cargo operations until they complete their TVE. Those vessels arriving at Big Stone Anchorage with an expired TVE may incur costly delays, as the U.S.C.G. will only normally conduct a TVE during daylight hours.
2. Past U.S.C.G. practices would allow a vessel to lighter at Big Stone Anchorage, and then complete the TVE when berthed. This will no longer be allowed.
3. To prevent delays we advise that all vessels have a valid TVE upon arrival at Big Stone.
4. At the September 9th meeting of the Mariners' Advisory Committee, it was resolved that vessels of Panamax size and greater would not be allowed up river on an ebb tide, if their draft exceeded 35 ft. 6 in.
5. Also note that as of 0001 hrs. on September 10th, Marcus Hook Anchorage will be closed due to dredging. Only one vessel at a time will be allowed access to the Anchorage. 24 hours advance notice must be given to the U.S.C.G. Vessels are allowed to anchor for a period of up to 12 hours. If the Anchorage is not available, vessels will have to bunker at Mantua Creek or Wilmington with a stand-by tug. Dredging is expected to continue until November 10th 1993.
6. In order to reduce possible vessel delays, we request to be advised immediately of any vessel that will arrive with an expired TVE. We will coordinate with the Terminals and pilots on arrival times to reduce waiting for flood tides for those vessels mentioned above.

LNG/LPG: COAST GUARD REGULATIONS:

REQUIREMENTS FOR THE TRANSPORT AND TRANSFER OF LNG/LPG:

The following requirements are issued in the interest of port safety to supplement existing local, State, and Federal Regulations.

A. GENERAL REQUIREMENTS.

1. *Pre-arrival Conference:* Prior to a vessel's initial port call, or when such a vessel has not been to the port within six months, and is laden with LNG or LPG enroute to a facility under the jurisdiction of the Captain of the Port, Philadelphia zone, as defined in 33 CFR 3.15-25, a pre-arrival conference shall be held with all personnel concerned in the delivery and operation of the facility. The purpose of this conference is to disseminate and explain Captain of the Port requirements, local regulations, and establish emergency procedures for that vessel during the initial and subsequent port calls. The conference will include representatives of the Coast Guard, the vessel's Agent and charterer or operator, terminal owner/operator, and local authorities including the fire department.

2. *Notification:* The Captain of the Port must be notified:

(a) At least 72 hours in advance of a vessel's arrival at the Delaware Breakwater with confirmation 12 hours in advance, and certification upon arrival.

(b) Of the vessel's ETA at Delaware Memorial Bridge.

(c) Of the intended length of port call and estimated time of departure.

(d) Of any changes in the intinerary.

B. VESSEL DOCUMENTS: Prior to proceeding past the Delaware Breakwater at Cape Henlopen, the Master of the vessel shall ensure the following documents are valid and can be produced on demand:

1. A Certificate of Financial Responsibility issued by the Federal Maritime Commission.

2. If U.S. Flag, a Certificate of Inspection endorsed for the product(s) carried.

3. If foreign flag, a Letter of Compliance (LOC) for the carriage of the product(s) carried.

a. Vessels not holding a valid LOC shall be boarded by a joint COTP/OCMI inspection party at the Breakwater Anchorage prior to proceeding upriver. The vessel shall be examined in accordance with 46 CFR, part 154. If the examination is satisfactory, the vessel will be permitted to proceed upriver to the facility. Compliance with Part C of this chapter will be strictly observed.

C. TRANSIT RESTRICTIONS FOR VESSELS LADEN WITH LNG/LPG CARGO:

1. *Vessel Movement:* Vessel movement will be conducted only with prior approval of the Captain of the Port.

2. *Propulsion and Machinery Status Report:* No vessel may proceed past the Delaware Breakwater unless the Master sends a message to

the Captain of the Port within 12 hours before arrival stating that "To the best of my knowledge and belief there are no known casualties to this vessel or its machinery and all cargo handling and gas detection equipment is in proper operating condition". Should any condition be present that precludes the sending of this message, the vessel shall be boarded by the Coast Guard at the Breakwater Anchorage so that a determination can be made as to the vessel's seaworthiness and repairs necessary prior to transiting the river.

3. *Transits:* LNG/LPG laden vessels may only transit the Delaware Bay/River daytime during hours if the visibility is two miles or greater. After discharging, a vessel empty of LNG/LPG cargo may depart at any time.

4. *Intra-Harbour Movement:* An LNG/LPG carrier should submit 2 hours' advance notice of intra harbour movement to the Captain of the Port, earlier notice is desired if practicable.

5. *Radio Guards:* Continuous radio guard must be maintained on Channel 13 (156.65 MHz) and Channel 16 (156.8 MHz) during transit.

6. *Tug Escort:* No LNG/LPG laden vessels shall transit the Delaware River above Delaware Memorial Bridge without at least one commercial tug escorting.

7. *Coast Guard Escort:* Unless specifically authorised by the Captain of the Port, no vessel may transit the Delaware River above Delaware Memorial Bridge without a Coast Guard escort vessel.

8. *Meeting and Overtaking:* While transiting the river, the vessel will not overtake river traffic; nor will river traffic be allowed to overtake the vessel. The vessel shall be navigated so as not to meet other vessels at bends in the river channel. During meeting situations, neither vessel shall proceed in such a manner that they will meet at a relative speed greater than 20 knots.

9. *Emergency Situations:* In the event of an emergency situation, the Captain of the Port must be promptly notified of the vessel's position, draft, nature of emergency, time required to restore normal operations and future intentions. The vessel's Master or Agent shall have the authority to immediately enlist commercial assistance in an emergency situation or when the COTP deems that commercial assistance is required to prevent an emergency.

D. ANCHORAGE RESTRICTIONS AND REGULATIONS:

1. Transfer of product at anchorage is not permitted except in the event of an emergency such as to warrant, in the opinion of the Captain of the Port, specific authorisation.

2. A live bridge watch shall be maintained by a qualified watch officer. A round of bearings and/or ranges fixing the vessel's position shall be taken hourly followed by a report on the hour to COTP Philadelphia on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the norm. In addition to these requirements, during periods of sustained winds in excess of 25 knots, but less than 40 knots, the vessel must maintain the capacity of having engines on line within 30 minutes; if sustained winds are 40 knots or over, the main propulsion plant must be on line.

3. A continuous radio guard shall be maintained on Channel 16 FM while at anchor.

4. Vessels anchored in Mantua and Marcus Hook Anchorages may be required by the Captain of the Port to have tug assistance during the change of tide.

E. VESSEL TRANSFER OPERATIONS: (The Master shall be responsible for compliance with this section): Prior to the commencement of transfer operations, a Coast Guard boarding party will examine the vessel. Cargo transfer shall commence only after satisfactory completion of the inspection and issuance of Coast Guard Form 4260, Permit to Handle Dangerous Cargo.

1. The following is a partial list of items inspected by the Coast Guard boarding party:
(a) Relief valve records and data.
(b) Gas detection system/alarms operation and records.
(c) Remote shutdown operation.
(d) Firefighting equipment.
(e) Boiler burn off system (if installed).
(f) Condition of piping, flanges, expansion joints, relief valves, cargo valves, and gauges.
(g) Intrinsically safe equipment.
(h) Automatic controls.

2. In addition to the above, the inspection party will ensure the following requirements are complied with:

(a) Person-in-Charge: The Master shall ensure a licensed officer or qualified supervisor is aboard the vessel throughout the entire cargo discharge/loading operation.

(b) Other Vessel Activities: Only such activities as bunkering, loading of stores, repairs i.e., normal ship maintenance and support activities as approved by the Captain of the Port at the pre-arrival conference, will be permitted – under such conditions as stipulated – while vessels are transferring LNG/LPG. No cutting, burning, welding or other hot work is allowed on the vessel without specific approval from the COTP.

(c) Smoking Areas: Smoking areas shall be designated by the Master and posted at the gangway.

(d) Bonding: The Terminal Manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended. The Master shall not commence hookup until this action is taken.

(e) Mooring Requirements: The vessel shall, when possible, moor bow to seaward, and be prepared to get underway on short notice. It may be required to have a live tug standing by during operations. A wire rope towing hawser shall be made ready forward, amidships, and aft with the bight at water's edge.

(f) Operations During Storms: Cargo transfer operations shall cease if an electric storm occurs and at any time lightning is observed or thunder heard; cargo transfer connections may be maintained.

(g) Language Requirements: Ship's supervisory personnel d involved in supervision of cargo transfer operations must be able to speak and understand the English Language.

(h) Transfer Connections: Each flange in the overall transfer ope will be secured with all bolts and properly gasketed, or with a Guard approved quick disconnect device.

(i) Venting: Venting of boil off vapours is prohibited. LNG vessels demonstrate the ability to contain or consume boil off vapours minimum of 21 days.

(j) Fire System: The Master shall ensure the vessel's fire main is to the waterfront facility fire fighting system so that the vesse maintain a firefighting capability, even if its fire pumps are inope The bonding hose shall never be charged unless in use during a

(k) Personnel Aboard: A minimum number of personnel to be re aboard the vessel shall be established during the pre-arrival confe or dockside inspection.

(l) Barge Personnel: In operations involving barges. a tanke possessing an appropriate certificate for the product being handled be present during cargo operations.

F. FACILITY OPERATIONS: (The Terminal Manager shal responsible for compliance with this section).

A pre-arrival conference shall be held in accordance with Para that the following regulations may be explained and disseminated to the initial operation of a facility. Drawings indicating cargo routing the dock to all storage tanks shall be provided to Coast G representatives. A current list of qualified cryogenic supervisors sh maintained with copies provided to the COTP. The following regula shall be complied with during all transfer operations.

1. *Facility Security:* All facility/terminal security zone areas are posted and restricted to personnel authorised by the terminal man Adequate physical security shall be provided, including a guard for allow on authorised personnel, i.e., those persons who have and need for presence on the facility, during operations.

2. *Equipment Inspections:* Immediately prior to handling carg shore piping which is to be used in the operation shall be inspect proper operation of automatic controls, gas detection, instrumentation. If any of the system contains air, it shall be purged to handling the product by an inert gas, in special circumstance using low pressure LNG/LPG vapour. Care shall be taken in purg minimise the volume of flammable mixtures present at an Following the purging, piping shall be so cooled as to prevent exce thermal stress.

3. *Supervisor and Personnel:* A designated cryogenics supe shall be in attendance at the waterfront facility in the proximity during all cargo operations. During all periods of cargo transfe terminal shall have one man on board the vessel and one man tank car or storage tank loading stations who shall be a communicate with each other at all times with intrinsically equipment.

4. *Language Requirements:* All shore supervisory personnel d involved in supervision of cargo operations must be able to readi speak and understand the English language.

5. *Smoking:* No smoking shall be permitted except in desig areas determined by the facility operator, subject to the approva COTP.

6. *Hot Work:* Hot Work will not be permitted without prior auth the COTP.

7. *Notification:* The COTP shall be notified one hour in adva the commencement and termination of the cargo transfer opera the waterfront facility.

8. *Fire Equipment:* The Terminal Manager will ensure currently and inspected fire hoses are laid out and connected to hydrants car and storage tank loading areas unless otherwise provide approved, permanently installed facilities. The international connection shall be connected in accordance with Para E, Transfer Operations. Hydrants shall be tested for satisfactory flo to connecting hoses. In addition to portable equipment, the mooring area or waterfront facility area shall have any combina semi-portable dry chemical extinguishers totalling 600 pounds main water source and spray equipment must be available as will be the Terminal Manager's responsibility to have his fire m and fire equipment present at the connecting and disconnecting of the operation.

9. *Lighting:* Adequate shoreside lighting in conformance w National Electric Code shall be provided.

10. *Hoses:* Each hose used to handle cargo shall have been d for handling such products and shall be tested at 1 – 1.5 t maximum allowable working pressure or 250 psi, whichever is prior to commencing the transfer operation.

11. *Vessel Protection:* Vessels moored to existing facili marginally to a channel, or when otherwise deemed necessar COTP, must be afforded protection through the use of barges or Any such protection shall have specific approval of the COTP.

12. *Inspection of Reception Facilities:* All tank cars, tank barges and storage tanks shall be inspected prior to loading their last test shall be verified. Operability of overpressure p devices shall be verified by a person designated by the manager.

13. *Remote Shutdowns:* Remote cargo shutdowns shall be satisfactory by a person designated by the terminal manager.

14. *Transfer Completion:* Upon completion of all cargo trans product line from pier head to tank car and/or storage loading in the type of operations where this applies, shall be unloaded in containers and not vented into the atmosphere. Where the op the LNG/LPG terminal is such that the product will be c continuously, it need not be unloaded – thus there will be no the start of each cargo transfer operation while bringing the pi to operating temperature, and a resultant reduction in cycling o stresses. However, the unloading arms shall be drained, using

purge and left in a nitrogen atmosphere with the shipboard end of the unloading arm blanked off until ready for the next transfer operation.

15. *Bonding:* The terminal manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended.

DENSITY: Philadelphia ports are fresh-water ports.

FRESH WATER: Fresh water normally not available directly at berth. Fresh water available by tank truck or through fire department. Water by barge available.

River Associates, Inc. of Philadelphia, Tel: (215) 922 – 6027, provides wash water in Philadelphia and Delaware Bay with two barges, 220 tonnes and 1,000 tonnes capacity.

FUEL: Bunker C and diesel fuel available at most oil terminals. Vessel's Agent should confirm berthing space at least 24 hours in advance.

CONSULS: The following countries are represented in Philadelphia:

Austria
Belgium
Chile
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Germany
Great Britain
Guatemala
Haiti
Honduras
Iceland
Israel
Italy
Japan
Korea
Lesotho
Mexico
Netherlands
Norway
Panama
Portugal
Spain
Sweden
Switzerland
Venezuela

REPAIRS: All types of ship repairs can be effected.

DRY DOCK: Floating dock with capacity 70,000 tons.

SURVEYORS: American Bureau of Shipping. Tel: (609) 354-6366.
Caleb Brett. Tel: (215) 521-1725.
National Cargo Bureau. Tel: (215) 925-3546.
E. W. Saybolt. Tel: (215) 583-4460.
Bureau Veritas. Tel: (215) 543-5884.
China Corp. Register of Shipping. Tel: (215) 543-5884.
Panama Bureau of Shipping. Tel: (215) 543-5774.
SGS Controls Services, Inc. Tel: (609) 467-1702.

GANGWAY/DECK WATCHMEN: These services are left to the discretion of the Master. It is often recommended by ship's P & I Club that watchmen be engaged when seamen are detained by U.S. Immigration. Ship is subject to fines by U.S. Government if any detained seaman deserts vessel.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Ship's Register and Load Line Certificate are mandatory. If vessel is carrying passengers from the U.S. they will require a U.S. Coast Guard Certificate. This can easily be obtained in about 1 or 2 days subject to meeting the requirement for life-saving equipment.

CUSTOMS ALLOWANCES: No set rule. Reasonable amount allowed for personal use.

CARGO GEAR: For exceptionally heavy lifts, Pennsylvania Shipbuilding Co. has a floating derrick with 800 tons lifting capacity.

AIRPORT: Philadelphia International Airport is located approximately miles from central harbour area.

TIME: Standard Time GMT minus 5 hours. Daylight Saving Time (GMT minus 4 hours) from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day (1st January); Martin Luther King, Jr's. Birthday (15th January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Thomas Gleason Birthday (17th March); Richard L. Askew Birthday (6th April); Good Friday; Memorial Day (Decoration Day); Flag Day (14th June); Independence Day (4th July); Labour Day (1st Monday in September); Columbus Day (12th October); November Election Day (1st Tuesday in November); Armistice or Veteran's Day (11th November); Thanksgiving Day; Christmas Eve; Christmas Day; and any other national holiday as may be provided by executive authority.

POLICE/FIRE/AMBULANCE: Fire Tel: LO 3-6700; Police Tel: 231-3131; Port Disaster Tel: 609-WO 3-6420 or WA 5-8780.

SHIP SUPPLY SERVICE:
Fleet Helicopter Service. Tel: 282-4100.

PINEY POINT, Maryland: 38.08 N. 76.32 W. (See Plan)

ST Services Terminal on East bank of Potomac River, 82 miles from sea.

DOCUMENTS/PILOTAGE: Refer to "Baltimore".

ANCHORAGE: Unlimited, available in Chesapeake Bay.

RESTRICTIONS: Berthing 24 hours a day with max. draft of 35 ft. 6 in.

MAX. SIZE: LOA 850 ft., beam 120 ft. and draft 35 ft. 6 in.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: WMH Baltimore Radio. VHF Channel 26.

TUGS: 2 tugs available for berthing, join vessel off berth. Tugs despatched from Baltimore. 2 tugs required docking and 1 sailing.

BERTHING: 1 tanker berth only operated by ST Services. Long lines required for first ashore.

FRESH WATER: Available at berth.

FUEL: Not available.

AIRPORT: Washington National (80 miles) or Baltimore-Washington (100 miles).

TIME: GMT minus 6 hours. Summertime from April to October.

SHORE LEAVE: Allowed.

GENERAL: Nearest city with full services is Washington, 65 miles distance and Baltimore 110 miles.

AUTHORITY: Maryland Ports Administration, The World Trade Centre Baltimore, Baltimore, Maryland 21202. *Tel:* (301) 659-4550.
Operator: ST Services, P.O. Box 418, Route 249, Piney Point, Maryland 20674.

PLAQUEMINE, Louisiana: 30.20 N. 91.14 W. (See Plan)

(A) DOW CHEMICAL – DOCK NO. 1
(B) DOW CHEMICAL – DOCK NO. 2

(A) DOW CHEMICAL – DOCK NO. 1

LOCATION: Dow Chemical, Louisiana Dock (Dock 1) is located on the West bank of the Mississippi River 25 miles S.E. of Baton Rouge at Plaquemine, Louisiana, at Mile Mark 209.9, above Head of Passes on the right descending bank in approximate position Lat. 30° 19' N., Long. 91° 14' W.

NOTICE OF READINESS: Notice of Readiness must be tendered either at the Dow facility, at Burnside Anchorage (which is customary anchorage for the Port of Baton Rouge at Mile 165.5), or at the nearest available anchorage to Dow. Tendering Notice of Readiness at any other site will not be received or accepted. Agent must be immediately informed at the time of tendering.

RESTRICTIONS: No time restrictions on berthing. No bunkering or lightering. Vessels must berth with bow facing up-river. All connections must be on port side.

MAX. SIZE: Dock accepts vessels up to 825 ft. in length and 130 ft. in breadth. Draft guaranteed to 39 ft. when Baton Rouge River stage is 10 ft. or greater. When river stage is below 10 ft., restrictions may apply.

HEALTH: See "Health: All Ports" before U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Ship must arrange for docking tugs. E.N.Bisso (Tel: (504) 861-3551 or (504) 861-0321) or an approved substitute may be used.

Docking Tugs: 1 tug required if ship length is less than 450 ft.
2 tugs required if ship length is 450 ft. or greater.

Hold-in Tugs (arranged for by the facility): Hold-in tugs required when load arm or hose is connected to ship.

1 tug required when river stage is above 25 ft. or below 10 ft. and ship length is between 600 ft. and 700 ft.

2 tugs required when river stage is above 25 ft. or below 10 ft. and ship length exceeds 700 ft.

Additional hold-in tugs will be invoiced to ship's account.

BERTHING: One chemical berth available with length 893 ft. All loading done by Dow equipment located on shore. All discharging performed by ship's equipment. See "Max. Size" for draft information. Cargoes handled are: Butanol, Ethylene Dichloride, Propylene Oxide, Propylene Glycol, Diethylene Glycol, Chloroform, Caustic Soda, Carbon Tetrachloride, Methylene Chloride, Monoethylene Glycol, along with the following Dowanols products: PM, EB, MEA, DEA, TEA.

Moorings: Minimum mooring requirements are as follows:

Head Lines:	Either 4 soft or 3 soft / 1 wire or 3 wire if no soft available.
Spring Lines:	Either 2 soft or 1 soft / 1 wire or 3 soft when no breast lines (position these on mooring points that allow them to be as long as possible).
Breast Lines:	2 soft or 1 soft / 1 wire (on both bow and stern when possible).
Stern Lines:	4 soft or 3 soft / 1 wire or 3 wire if no soft available.

Under no circumstances should mooring lines be slack. Ship must supply its own gangway.

CRANES: 3 (7,500 lb. capacity) cranes available for handling hoses and fittings, all run by Dow personnel.

CARGO HANDLING: All cargoes mentioned under "Berthing" are transferred through hoses that are 6 in. 150 lb. rated, except for Caustic Soda which is capable of transferring simultaneously through 6 in. 150 lb. and 8 in. 150 lb.

BRIDGES: Sufficient clearance for all stages of river at all times; 3 bridges at New Orleans, 1 at Donaldsonville and 1 at Luling-Destrehan.

TANKERS: See "Cargo Handling" for loading hose specifications. Ship should fit any reducing pieces before arrival. If ship is unable to fit pieces, contact Ship Planner in advance, so dock will be ready with pieces upon arrival. Shore steam is available. No ship-to-ship transfer facilities. Slop discharge facilities available.
DENSITY: No tide. Fresh water at all times.
FRESH WATER: Available at U.S.$3.00/metric ton. Ship must supply hose.
FUEL: Bunkering not permitted.
FIRE PRECAUTIONS: Ship must have a cable hung over the starboard side and attached to a fixture enabling a tug to pull ship away from dock. Equipment is available to combat oil spills; namely 1,000 ft. of oil boom. Approximately 35 fire extinguishers (dry chemical, Foray, CO_2) and 8 monitor guns, all strategically located on dock. In addition, a fire hydrant and hose system that can be connected to fire trucks.
CONSULS: Norwegian at Baton Rouge, all others at New Orleans, 60 miles distant.
REPAIRS: Prior approval needed.
DRY DOCKS: None.
SURVEYORS: Cargo inspector: SGS Control Services, Inc., 6624 Langley Drive, Baton Rouge, LA 70809. Tel: 504-752-1462. Fax: 504-753-6930. Telex: 4979968.
WATCHMEN: Supplied by dock at no cost, 24 hours a day.
CUSTOMS ALLOWANCES: Tobacco: Each crew member allowed 1 carton of cigarettes. Master allowed reasonable quantity. Wine and/or spirit: Each crew member allowed 1 bottle each of wine and spirit. Master allowed reasonable quantity.
REPATRIATION: Crew changes are permitted. Control room must be notified of any pedestrian traffic on dock.
AIRPORT: Ryan Airport in Baton Rouge, 25 miles distant. Serviced by all major airlines.
TIME: Local time is Central Standard Time – GMT minus 6 hours. April through October, local time is Central Standard Daylight Savings Time – GMT minus 5 hours.
POLICE/AMBULANCE/FIRE: State Police (Hazardous Materials Unit): Tel: 504-925-6595.
West Baton Rouge Sheriff: Tel: 504-343-9234.
Iberville Parish Sheriff: Tel: 504-687-5100.
Fire: Tel: 911.
Ambulance: Tel: 1+267-1111.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Headquarters. Tel: 1-800-424-8802.
SERVICES: Slop facilities available at dock.
Garbage disposal available at dock, although prior notification is needed.
Nigrogen supply facilities available at U.S.$0.50/100 standard cu.ft.
BANKS: Bank of West Baton Rouge. Tel: 687-6111.
Citizens Bank & Trust. Tel: 687-3576.
STORING: Truck service only. Trucks must be parked on levee and dollies used on dock. Cranes equipped with baskets can be used to transfer goods from dock to ship (See "Cranes").
SHORE LEAVE: Shore leave is permitted. Those going ashore must be fully clothed (shirts, long pants, shoes) and proceed directly from gangway to control room or levee. In addition to being fully clothed, those not proceeding to the levee or control room must be wearing appropriate safety gear.
IDENTIFICATION CARDS: None required at dock.
GENERAL: The following information, given through Agent, will be needed before docking: Vessel's name, ETA, ship length, ship breadth, arrival and departure draft, arrival and departure deadweight tons, product name and appropriate quantity (in metric tons), liquid header connections (size, lb., rating), vent connections (size, lb., rating), amount inhibitor, refrigeration (semi or fully), number and sizes of mooring lines (cable and rope; head, bow spring), safety relief valve setting (bars), maximum receiving or pumping rates, involved tank numbers, last contained materials, second to last contained materials, and third to last contained materials, whether tanks are empty and have been cleaned; if cleaned, the method in which they were cleaned.
OPERATOR: The Dow Chemical Company, P.O.Box 150, Plaquemine, Louisiana 70765-0150, U.S.A. *Tel:* (504) 353-6166. *FAX:* (504) 353-1985. *Contact:* Dow Chemical Dock (Dock 1) (KUF 628 on VHF Channel 16). Fax: 504-353-2496. Tel: 504-353-8647 or 504-353-8646 (Dock), 504-353-6186 (Ship Planner).

(B) DOW CHEMICAL – DOCK NO. 2

LOCATION: Dow Chemical, Louisiana Division Hydrocarbon Dock (Dock 2) is located on the West bank of the Mississippi River, 15 miles S.E. of Baton Rouge at Plaquemine, Louisiana, at Mile Mark 221.8, above Head of Passes on the right descending bank in approximate position Lat. 30° 21' N., Long. 91° 14' W.
NOTICE OF READINESS: Notice of Readiness must be tendered either at the Dow facility, at Burnside Anchorage (which is customary anchorage for the Port of Baton Rouge at Mile 165.5), or at the nearest available anchorage to Dow. Tendering Notice of Readiness at any other site will not be received or accepted. Agent must be immediately informed at the time of tendering.
RESTRICTIONS: No time restrictions on berthing. No bunkering or lightering. Vessels must berth with bow facing up-river. All connections must be on port side.
MAX. SIZE: Dock accepts vessels up to 825 ft. in length and 130 ft. in breadth. Draft guaranteed to 39 ft. when Baton Rouge River stage is 10 ft. or greater. When river stage is below 10 ft., restrictions may apply.
HEALTH: See "Health: All Ports" before U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Ship must arrange for docking tugs. E.N.Bisso (Tel: (504) 3551 or (504) 861-0321) or an approved substitute may be used.
Docking Tugs: 1 tug required if ship length is less than 450 ft.
2 tugs required if ship length is 450 ft. or greater.
Hold-in Tugs (arranged for by the facility): Hold-in tugs required load arm or hose is connected to ship.
1 tug required when river stage is above 25 ft. or below 10 ft. and length is between 600 ft. and 700 ft.
2 tugs required when river stage is above 25 ft. or below 10 ft ship length exceeds 700 ft.
Additional hold-in tugs will be invoiced to ship's account.
BERTHING: One hydrocarbon berth available with length 998 loading done by Dow equipment located on shore. All discha performed by ship's equipment. See "Max. Size" for draft informa Cargoes handled are: Benzene Toluene Zylene (BTX), Naphtha, Pentanes, Vynyl Chloride Monomer (VCM).
Moorings: Minimum mooring requirements are as follows:

Head Lines:	Either 4 soft or 3 soft / 1 wire or 3 wire if no available.
Spring Lines:	Either 2 soft or 1 soft / 1 wire or 3 soft whe breast lines (position these on mooring points allow them to be as long as possible).
Breast Lines:	2 soft or 1 soft / 1 wire (on both bow and stern possible).
Stern Lines:	4 soft or 3 soft / 1 wire or 3 wire if no soft avail

Under no circumstances should mooring lines be slack. One gangway provided at dock. This gangway is located along dock ac roadway and can only be utilised from this point.
CRANES: 3 (7,500 lb. capacity) cranes available for handling hoses fittings, all run by Dow personnel.
CARGO HANDLING: There are 5 loading arms at the berth.

Arm No.	*Connection*	*Size* (in.)	*Rating* (lb.)	*Product*
1	Liquid	8	300	BTX
	Vapour	6	150	
2	Liquid	12	150	BTX Naphtha
3	Liquid	12	300	Naphtha
	Vapour	6	150	
4	Liquid	12	300	LPG
	Vapour	6	300	Pentane
6	Liquid	12	150	VCM
	Vapour	4	300	

Loading Arms No. 4 and 6 have PERC (Pressure emergency re coupling). These arms are also used for purging.
BRIDGES: Sufficient clearance for all stages of river at all 3 bridges at New Orleans, 1 at Donaldsonville and 1 at Luling-Destr
TANKERS: See "Cargo Handling" for loading hose specifications should fit any reducing pieces before arrival. If ship is unable to fit p contact Ship Planner in advance, so dock will be ready with pieces arrival. No shore steam is available. No ship-to-ship transfer fac Slop discharge facilities available.
DENSITY: No tide. Fresh water at all times.
FRESH WATER: Available at U.S.$3.00/metric ton. Ship supply hose.
FUEL: Bunkering not permitted.
FIRE PRECAUTIONS: Ship must have a cable hung over the star side and attached to a fixture enabling a tug to pull ship away from Equipment is available to combat oil spills; namely 1,000 ft. of oil b Approximately 35 fire extinguishers (dry chemical, Foray, CO 12 monitor guns (foam and water with remote control side-t swivel), all strategically located on dock. In addition, a fire hydran hose system that can be connected to fire trucks.
CONSULS: Norwegian at Baton Rouge, all others at New Or 60 miles distant.
REPAIRS: Prior approval needed.
DRY DOCKS: None.

PLAQUEMINES, Louisiana: 29.40 N. 89.55 W.

ANCHORAGES: See "New Orleans".
RESTRICTIONS: Main channel depth 55 ft.
TUGS: Available.
BERTHING:

Amax Metals Recovery, Inc. (Formerly Amax Nickel, Inc.): Route 1, Box 160, Braithwaite, LA 70040. Tel: (504) 682-2341.
Depth Alongside: 35 ft. Barge dock: 15 ft.
2 Berths: Length 250 ft. – 700 ft. One ship (dry dock). One barge (wet dock).
Cranes: 1×35 ft. (American) breakbulk crane.
Railroad: Norfolk Southern.

B.P. Oil, Inc.: P.O.Box 395, Belle Chasse, LA 70037. Tel: (504) 656-7711.
Depth Alongside: 40 ft.
2 Berths: Length 280 ft. – 1,205 ft. One tanker, one LPG.
Railroad: Missouri Pacific (1 Spur).

International Marine Terminal: Route 1, Box 649, Port Sulphur, LA 70083. Tel: (504) 656-7341.
Location: Mile 57 AHP.
Depth Alongside: 45 ft.
3 Berths: Length 1,044 ft. – 1,200 ft.: (2) one ship; one gulf barge.
Max. LOA 290 m. Max. draft 12.2 m. Max. beam 48 m. Length of travel of loader 244 m. One loading spout. Max. loading rate for coal 9,000 tonnes per hour.
Cargo Handled: Coal.

Electro-Coal Transfer Corporation: Perez Landing, Davant, LA 70046. Tel: (504) 333-4244, (504) 524-4181.
Location: 55 miles AHP, opposite Myrtle Grove.
Depth Alongside: 55 ft. – 80 ft.
3 Berths: 3,000 ft. of continuous docks.
Cranes: 4 travelling clam shell cranes; 1 stationary ship loader (rate 4,840 tonnes/hr.) with 48 ft. air draft at 0 river stage; 1 travelling ship loader (rate 6,000 tonnes/hr.) with 56 ft. air draft at 0 river stage; 2 continuous river barge unloaders; 4 portable cranes, utilised for offshore topping-off services.

M.F.P. (Formerly Ferruzzi Inc.):
Location: On West bank, 61.5 miles AHP.
Cargo Handled: Grain.
1 Berth: Total length 790 ft.
Depth Alongside: 50 ft.
Facilities: Storage of 6.1 million bushels.

Chevron – Oak Point:
Cargo Handled: Crude and petroleum products.
1 Berth: Total length 250 ft.
Water Depth: 40 ft.
Facilities: Product handled over wharf: Organic chemical compounds used in the blending of lubricating oils for transportation and industrial related equipment. Have loading/unloading facilities: Can handle tank cars, tank trucks, also container trucks, drums. Actual product storage estimated roughly on wharf tanks 8 – 10 million gallons. 44 ft. × 110 ft. structure with 5×8 in. marine loading arms. Accommodates barges from 180 ft. – 250 ft. long. Can handle 5 separate materials at one time.

TANKERS: See "Berthing".
AUTHORITY: Plaquemines Port, Harbour and Terminal District, Edna Lafrance Building, 124 Edna Lafrance Road, Braithwaite, LA 70040-9715, U.S.A. *Tel:* (504) 682-0081, (504) 392-6690, Ext. 2610. *FAX:* (504) 682-0649. *Contact:* Luke A. Petrovich, Chief Executive Officer. Robert L. Thomas, Director of Operations. Urban L. Treuil, Jr., Chief Parish/Port Safety Engineer.

PORT ADAMS, Texas: 29.45 N. 95.11 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PORT ANGELES, Washington: 48.08 N. 123.25 W. **(See Plan)**

DOCUMENTS, etc.: Refer to "Tacoma".
APPROACHES: Depth at entrance 100 ft. – 160 ft. No bar.
PILOTAGE: Compulsory for all vessels except those in coasting trade. Pilot station at Ediz Hook serves all vessels bound for Puget Sound ports. Pilot boards off Port Angeles.
ANCHORAGE: In harbour, depth at least 42 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available from Foss Launch and Tug Co.
BERTHING: 3 pier berths and 2 dolphin berths, depth up to 45 ft. MLLW. Forklifts with capacity to 10 tons.
STEVEDORES: 8 local gangs, additional gangs may be imported if required.
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Barge delivery only.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities specified; reasonable allowance at discretion of Custom's Inspector.
AIRPORT: William R. Fairchild International Airport 3.5 miles from the harbour.
HOLIDAYS: See "Tacoma".
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available through local agent. City provides dumpsters alongside. Contact Solid Waste. Tel: (206) 457-0411.
WASTE OIL DISPOSAL: Disposal available via Seattle or Tacoma environmental transporters. Contact Port of Angeles, Marine Terminal. Tel: (206) 457-1909. Fax: (206) 452-1129.
SEAMAN'S CLUBS: Limited services available through church groups. Contact Port Authority.
CURRENCY: U.S.Dollar (U.S.$).
AUTHORITY: Port of Port Angeles, P.O.Box 1350, 338 W. 1st Street, Port Angeles, Washington 98362. *Tel:* (206) 457-8527, 457-1909. *FAX:* (206) 452-3959, 452-1129. *Contact:* Chris Anderson, Executive Director. David H. Hagiwara, Director of Marketing. David Callentine, Marine Terminal Supervisor.

PORT ARTHUR, Texas: 29.52 N. 93.56 W. **(See Plan)**

DOCUMENTS:
Entrance Direct from a Foreign Port:
Master's Oath on entry on vessel in Foreign trade, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
Ship's Stores Declaration, Customs Form 1303 (2 copies).
Crew Effects Declaration, Customs Form 1304 (2 copies).
Clearance from Last Port.
Inward Foreign Manifest, Customs Form 1302 (2 copies)
Passenger/Crew List. Form I-418 (3 copies).
In event import cargo is onboard, an additional copy of each of the above Forms is required for travelling Manifest. A copy of the Manifest for each port is also required.
Entrance from Domestic Port:
Clearance from Last Port.
Crew Effect Declaration, Customs Form 1304 (2 copies).
Stores List, Customs Form 1303 (2 copies).
Crew List, Customs Form I-418 (2 copies).
Master's Oath, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
PILOTAGE: Come up in vicinity of the Sea Buoy. 24 hours notice of ETA should be given and revised if ship is delayed 1 hour or more. Telegraphic address is "Sabine Pilots, Port Arthur, Texas". Pilot station keeps 24 hour continuous watch on VHF Channel 12 – 156.6 MHz and on 2738 kHz. Pilot boat is motor vessel with black hull, white housing flying Pilot insignia by day and Pilot light by night. Location of pilot boat is in general vicinity of Sabine Pass Sea Buoy. Pilot ladder only on lee side of vessel.

Pilot will, upon request and at extra cost, board incoming vessels at buoy marked "SB" in position Lat. 29° 25' N., Long. 93° 40' W.

Gulf of Mexico Pilots

American Master Mariners licensed by the United States Coast Guard. They are experienced in handling vessels of all types and sizes, and have many years of experience in navigating the Gulf of Mexico.

Gulf of Mexico Pilots cover the entire Gulf and the Florida Straits. They are on call to board vessels wherever requested within the service area, on 48 hours advance notice.

Request for service may be directed to:
Gulf of Mexico Pilots, 3741 Memorial Blvd., Port Arthur, Texas 77640. Cables: Gompilots. Tel: (409) 982-2961.

The Gulf of Mexico Pilot will provide assistance and advise in heavily congested areas. He will utilise up-dated local knowledge of conditions peculiar to navigation in the Gulf of Mexico. He will assist with VHF radio communications, expedite arrivals and departures between the Gulf Ports resulting in savings of time and fuel, while easing the human-fatigue factor caused by the demanding duties of Shipmasters operating in unfamiliar environment and the continuously changing conditions therein.

RESTRICTIONS: The Port Arthur Ship Channel is in operation 24 hours per day. The only restrictions that might hamper vessel traffic would be the draft of the vessel (Port will be able to handle vessels taking up to 40 ft. of water) or extremely bad weather conditions such as fog or high winds. Also, vessels of the 85,000 ton or more class can only be moved during daylight hours.

MAX. SIZE: Port Arthur Ship Channel will be authorised to 40 ft. in depth and will vary from 400 to 800 ft. in width. Turning basin, which is located at Mile 19 (only about 0.5 miles upstream from existing port facility) is 900 ft. in width. Bulk carriers going to grain elevator at Port Arthur or to one of the oil refineries would only be restricted by draft which would vary from 30 ft. to 40 ft. depending on load/discharge berth the vessel is en route to. See "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: For a vessel in the Gulf of Mexico, and en route to Port Arthur, the best way to route an ETA message is to radio "Port Arthur Radio" (Radio Marine Corporation of America) whose call sign is WPA. Port Arthur Radio will then either send the message through Western Union via its telefax machine or via telex if the receiver of the message has a telex machine. There are also radio stations located in Galveston, Texas (Mackay Radio, call sign KLC) and in Mobile, Alabama (call sign WLO).

VHF: Pilot office on Channel 20. Pilot boat on Channels 12, 13, 16 and 65A.

TUGS: The exact position that the tug meets the vessel varies with each vessel but usually they meet just below Texaco Island. In some cases they meet as far up as Great Lakes Carbon Co. Berth (usually when vessel is in ballast and going to Gulf Oil Docks). Whether or not the tug uses the vessel's lines or its own lines depends entirely on the circumstances involved but the tugs usually use the ships lines. Port Arthur is served by 2 towing companies, (1) Moran Towing of Texas and (2) Sabine Transportation Company, Inc.

BERTHING: The first procedure for obtaining a berth at Port Arthur is to submit a Berth Request Form. The Berth Request will contain the following information and will be submitted, in duplicate, to P.O. Box 1428, Port Arthur, Texas: Date of request; type and name of vessel; loading ports; registry or flag; where vessel is to arrive from; ETA; where vessel is to sail for; estimated date of departure; what inbound cargo, if any, consists of; what outbound cargo, if any, consists of; date you expect to begin receiving outbound cargo. The Form must be signed by the Agent or Owner of the vessel. (Berth Request Form will be made available by the Port.) Upon receipt of a Berth Request from the Agent or Owner, the Port will then, upon determining availability of berth, return one copy of the initial Berth Request to the Owner or Agent as an assignment of berth. Berths are assigned on a first come first served basis at all times. All changes in vessel's ETA must be given to the Terminal Office immediately. All mooring and unmooring will be done by the Port. Procedure may differ at the various private terminals which are not under the jurisdiction of the Port Arthur Navigation District.

Also see "Developments".

BULK HANDLING FACILITIES: *Pabtex Terminal Company:* Bulk Marine Terminal in the Port's deepwater industrial park is located at Mile 26, handles dry bulk commodities from rail cars to storage to vessels at rates up to 3,000 t.p.h. and has space available for shipper storage tanks on pads, with open storage for 300,000 tons. The terminal also includes a 750 ft. wharf and is located directly on the Sabine-Neches Waterway which presently offers an authorised channel depth of 40 ft. All terminals described above are served by subject waterway and limitations of depth will vary at the face of dock at individual terminals. Pabtex maintains 40 ft. depth at the face of their facility.

Great Lakes Carbon Co.: Length of berth 300 m. Max. LOA 210 m. Max. draft 10.5 m. 2 loaders with total loading capacity 500 tonnes p.h. Petroleum, coke and coal handled.

CRANES: 1×75 ton diesel electrical crane services Berths No. 1 – 3.

BRIDGES: There are no bridges that would require a vessel to arrive at any certain time at Port Arthur, however, the first bridge approached involves a vertical clearance of 136 ft. MHW.

STEVEDORES: Advance order for longshore gangs varies as to contract held by ILA (International Longshoremen's Association). In Port Arthur, gangs have to be ordered as follows: Order by 1800 hrs. for the next morning (either 0700 or 0800 hrs.); order by 0800 hrs. for 1000 hrs; order by 1100 hrs. for 1300 hrs.; order by 1600 hrs. for 1900 hrs. Must order by 1800 hrs. day before for any starting time Sunday or Holiday.

MEDICAL: It is not usually required that the Agent be given advanced notice of required medical attention but in some instances it is helpful in arranging transportation to a hospital and in obtaining a bed in the event the hospitals are near full. Port Arthur is served by 2 hospitals; (1) St. Mary's Hospital and (2) Park Place Hospital, both of which are very well staffed and have adequate facilities for almost any emergency. Also, advance notice is helpful when vessel is scheduled to dock late in evening or during night, as doctors are not in their offices and have to be located.

Particular inoculations required by the Public Health Department vary as to the vessel's last foreign port of call. Any crew members who have not had the required inoculations can usually be given these inoculations on board either by the Public Health Officer or a Physician. This is usually arranged by the Agent or Owner.

TANKERS: There are 3 major oil companies: Chevron Oil Corpo Star Enterprise Inc.; and Fina Oil and Chemical Company. Chevr Corporation and Star Enterprise Inc. are 2 of the largest oil refine the country. The diameter of load/discharge lines range anywhere 4 in. to 12 in. depending on the grade of the petroleum product loaded. As far as slop discharge facilities are concerned there are ba tanks at all major oil companies. Chevron Oil has 3,400 linear ft. of accommodation and Star Enterprise has 5,299 linear ft. of accommodation together enough to accommodate 11 supertanke barges. Fina Oil and Chemical Co., being the smaller of the companies, has berth accommodation for 3 vessels.

Report: Chevron Oil Terminal is located on the East side of the T Bayou Turning Basin 30 miles from the Sea Buoy. The controlling of the channel and turning basin is 40 ft. The maximum size ve normally received at this terminal is 50,000 d.w.t. The water abo terminal is salt. Docking and undocking occurs day and night. Ves are cautioned of shoaling in the basin.

Vessels are normally turned upon arrival so as to head out. Wire are not permitted unless fitted with fibre rope pennants of at 3 fathoms in length. Fire wires must be rigged fore and aft.

Two tugs are normally used when docking unless vessel is 34,000 d.w.t. when 3 would be used. When undocking, 2 tugs are for vessels over 30,000 d.w.t., under 30,000 only one tug is used.

Amdel Pipe-line is located at the former ARCO Docks on the Ne River Channel 42 miles from the Sea Buoy and includes Berths and B. Controlling depths for the channel, manoeuvring area/tu basin, and berth is 40 ft. The water at the berth is fresh to bra Attention to moorings by deck watch is required when passing ve approach due to the close proximity of the berths to the channel.

Berth No. 1 is the largest and will accommodate vesse approximately 50,000 d.w.t. Berth "A" normally accommodates ves of 28,000 d.w.t. Berth "B" is normally used for crude oil and barge Loaded vessels normally moor starboard side to with standard mo lines fore and aft. 2 tugs are used for both docking and undo Incoming vessels are met by tugs 1 mile below the berth. Vesse turned just above Berth "B". Fire wires must be out fore an For undocking 2 tugs are normally used.

DENSITY: Varies from fresh water (1000) to pure salt water depending on amount of rainfall and tide variations. According to obtained from the National Cargo Bureau, average density is 50 water or (1012.5).

FRESH WATER: The Port has 4 ships service outlets for fresh each of which is served by a 4 in. water line. Watering barge available in the area for facilities which are not equipped to watering services.

FUEL: Almost any grade of fuel or marine diesel is available. In instances there are fuel lines running directly to docks, but bunkering barge is available. An advance notice is usually requi bunkering barge depending on number of vessels awaiting bunke

FIRE PRECAUTIONS: The Port has, in each of 4 equally sp indentations along the front of its transit shed, a fire hose outlet an 8 in. water line and there are numerous fire hose boxes throu the transit shed. In addition to this a 24 hour guard service is cons on the watch and is in direct communication with the Port Arthu Department which is only seconds away. Authorised on-dock sm areas are clearly defined for proper safety controls.

CONSULS: The nearest Consul-Generals are in Houston, approximately 90 miles from Port Arthur.

REPAIRS: All types of deck and engine repairs can be accomp Main ship repairers are: Vessel Repair, Inc., Gulf Cop Manufacturing Corp., Sabine Propeller Company and Coastal Service, all of which are located in Port Arthur.

DRY DOCKS: 2 dry docks, largest being Texas Drydock Inc.'s ne service rig/vessel facility located 8 miles up-river from the Sabine Anchorage. The dry dock at this Texas Drydock Inc. repair yard enough to lift any mobile offshore unit working the Gulf today handle any jackup, whether mat-supported or independent-leg semi-submersibles, submersibles or drill ships. This sectional ste offers lift capacity of 56,000 long tons, 30 ft. of water over the and it can be configured to provide a clear docking area of 362×310 ft. or 825×122 ft., depending on the size and shape incoming vessel. The dock is outfitted with machine, pipe and shops, and has the crane capacity to give it full repair service ca For especially heavy lifts, Texas Drydock Inc.'s 400-ton capacity barge is available.

The smaller dry dock is Vessel Repair, Inc., which occupies 6 with 3,200 linear ft. of frontage on Port Arthur Ship Channel. Th also designs, constructs and repairs barges, tugs and other ve has fully equipped shops, 2 marine railways with haul-out capa 1,000 and 1,500 tons and 1 floating dry dock of 3,000 ton capa

GANGWAY/DECK WATCHMEN: Under normal conditions a wa is not necessary on most vessels. Under certain conditions s communicable disease or a malafide crewman, a watchman w feasible but the decision is left up to Master or owner of the There is a $1,000 fine if a malafide crewman disembarks from the

OPENING/CLOSING HATCHES: Paragraph 2, Rule No. 1 of the Deep Sea Longshore and Cotton Agreement for Texas ports and Port of Lake Charles, Louisiana, states as follows: "When vessel is in loading or unloading berth, loading and laying of dunnage and the opening and closing of hatches, when in connection with the handling of general cargo and/or cotton, is longshore work and will not be done by ship's crew." This agreement, however expired in 1978.

CUSTOMS ALLOWANCES: Tobacco: Each crewman is allowed to keep 300 cigarettes out of bond while in port. Wine and/or Spirits; Each crewman is allowed to keep 1 quart of spirits out of bond while in port.

CARGO GEAR: A current certified Gear Certificate is required to be on board at all times and is to be kept up to date.

REPATRIATION: There are facilities for effecting crew changes and repatriation.

AIRPORT: Port Arthur is served by Mid-Jefferson County Airport which is located approximately 10 miles North of Port Arthur on Highway 69. The Mid-Jefferson County Airport is served by various airlines.

TIME: Central Standard Time (GMT minus 6 hours) during Winter. From first Sunday in April till last Sunday in October Central Daylight Time clocks are moved ahead 1 hour).

HOLIDAYS: Longshore Holidays are: Veterans Day (Nov. 11th), Thanksgiving Day (Fourth Thursday in Nov.), Christmas Day (Dec. 25th), New Year's Day (Jan. 1st), Martin Luther King's Birthday (Jan. 15th), Washington's Birthday (Third Monday in Feb.), Texas Independence Day (March 2nd), Good Friday, Memorial Day (Last Monday in May), June 19th, July 4th, Labour Day (First Monday in September).

At Lake Charles, LA., Mardi Gras Day to be substituted for Texas Independence Day. No work shall be performed on Labour Day or Christmas Day, except in case of fire or where property is in danger.

When holidays fall on Sunday, the following Monday to be recognised as the holiday. No work to be performed between 1600 hrs. and 1900 hrs. on election days. When Christmas falls on Sunday, Monday will be an overtime day and gangs will work as ordered.

POLICE/AMBULANCE/FIRE: Police Department Tel: 983-8600; Fire Department Tel: 983-8700; Ambulance Service Tel: 985-5504 or 983-5666.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Captain of the Port, 2875 75th St., Highway 69, Port Arthur, Texas 77640. Tel: (409) 724-4343.

TELEPHONES: Facilities for placing a telephone on a vessel by request. There is a coin-operated telephone on the dock for anyone's use.

SERVICES: Tank cleaning done in port must be done by longshore labour. All major oil companies have facilities for removing tank washings.

BANKS: First Interstate Bank, 441 Austin Avenue, Port Arthur, Texas 77640. Tel: (409) 985-8851.

First Bank & Trust, 4000 Twin City Highway, Groves, Texas 77619. Tel: (713) 963-1141.

Nederland State Bank, 1308 Boston, Nederland, Texas 77627. Tel: (409) 727-3161.

Bank One, 3723 Gulfway Drive, Port Arthur, Texas 77640. Tel: (409) 982-5741.

STORING: See "Prelims".

1. Vessels are generally stored by truck in the area but barge storing does occur on rare occasions.
2. There are no specific regulations covering barge storing while vessel is working other than what the individual terminal may deem proper.
3. Trucks normally deliver at shipside at the Ports' facilities but this will vary from terminal to terminal.
4. Fork lift trucks are never used on the jetty to handle stores.
5. None other than Bonded Warehouse products.
6. Can but are seldom used. Generally handled by ship's crew or other less costly labour that is available in the area.

SHORE LEAVE: The question of whether shore leave is allowed is entirely up to the ship's Master. The only requirements being; each crewman on shore leave must have a landing permit issued by the Immigration Department and no malafide crewman may be granted shore leave. Port Arthur has no restrictions pertaining to shore leave.

IDENTIFICATION CARDS: American crewman do not need any identification card. Foreign crewman need only the landing permit from Immigration Department in order to go ashore.

GARBAGE DISPOSAL: Arrangements should be made through local steamship agent. Service provided by Browning Ferris Inc. (BFI), Highway 69, Nederland, TX 77627. Tel: (409) 724-2371.

WASTE OIL DISPOSAL: Arrangements should be made through local steamship agent. Service provided by Carotex Inc., P.O.Box 3901, Port Arthur, TX. 77643. Tel: (409) 962-0251.

SEAMAN'S CLUBS: Port Arthur International Seaman Center Inc., 101 W Lakeshore Drive, Port Arthur, TX. 77640. Tel: (409) 982-4504.

DELAYS: Delays in berthing usually arise from vessels ETA being delayed and thereby causing a berth conflict. The port is on a first come, first serve basis.

GENERAL: On vessels arriving directly from a foreign port there are 3 Government Agency Representatives that must board. Already mentioned and explained are Customs and Immigration. The remaining one, Animal and Plant Inspection Services. The Meat Quarantine representative boards the vessel to seal up all meat with the exception of what will be needed while in port. In the event a vessel is detained in port for some reason and more meat is needed the Meat Quarantine Rep. must return to the vessel and personally break the seal and then re-seal the remaining meats. This representative boards all vessels entering the port whether from foreign or coastwise.

The Plant Quarantine Rep. boards all vessels entering from a foreign port to check all fresh fruits and vegetables for any foreign insects such as the Khapra Beetle.

NOTICE:

Notice from U.S. Coast Guard (Dated May, 1983).

Liquified Gas Vessels.

This is to clarify U.S. Coast Guard policy regarding liquified gas vessels operating in the Calcasieu Waterway that seems to be causing some confusion. Synopsis of each is as follows:

(1) The Captain of the Port (COTP), Port Arthur, Texas, needs to be informed of the arrivals and departures of all liquified gas vessels, whether loaded or in ballast, a minimum of 4 hours advance notice is required to ensure that a Notice to Mariners is broadcast. The vessel is reminded to have a Calcasieu River Pilot's confirmation of movements prior to notifying the COTP at (409) 724-4330.

(2) The COTP has determined that it is an unsafe practice to bunker a loaded or partially loaded liquified gas vessel at anchor from a barge alongside. If you have a loaded vessel arriving that needs bunkering, make your arrangements so that the vessel is offloaded prior to bunkering. If an empty vessel arrives, make arrangements to have the vessel bunkered prior to loading.

If there are any questions concerning these guidelines, please contact Port Arthur (Tel: (409) 724-4337 or 724-4339) or Lake Charles, La (Tel: (318) 433-3765).

Signed: Captain, U.S. Coast Guard, Capt. of the Port, Port Arthur, Texas.

DEVELOPMENTS: Located only 19 miles from sea, the new Public Ocean Terminal of the Port is located on the Sabine-Neches Waterway, presently 40 ft. deep with a minimum bottom width of 400 ft. The initial facility encompasses 360,000 sq.ft. including 1 transit shed 180 ft. × 1,080 ft. or 194,400 sq.ft. Rail trackage totals 120 car-spots at dockside with a 150-car storage yard behind the wharves. The facility includes a Gantry Crane (handling dry bulk, magnet, container and heavy lift cargoes) which straddles 2 of the 3 marginal tracks, travelling the entire 1,200 ft. length of dock. Crane will lift 75 tons a distance of 75 ft. off the face of docks, with all areas brilliantly lighted for 24 hour cargo operations. In addition to the 25 acre facilities described above, the District owns a total of 73 acres or 1 mile of frontage for future development. The master plan calls for a total of 4 Transit Sheds, additional open-dock wharves and Roll-on/Roll-off facilities.

AUTHORITY: Port of Port Arthur Navigation District of Jefferson County, Texas, 900 Fourth Street, P.O. Box 1428, Port Arthur, Texas 77641. *Tel:* (409) 983-2011. *FAX:* (409) 985-9312. *Contact:* Ben Goldstein, Port Director.

PORT CANAVERAL, Florida: 28.25 N. 80.35 W.

(See Plan)

DOCUMENTS: Vessels arriving in the Customs Territory of the United States, Bureau of Customs Documentary Requirements:

1. The vessel's Register, International Load Line Certificate, Tonnage Tax Certificates, Clearance from last Foreign Port, and Certificate of Financial Responsibility (Oil Pollution).

2. Additional Documents required:

(a) Original Manifest (lists) of:
All Cargo on Board – Customs Form 1302.
All Passengers on Board.
Stores List.
Crew Purchase List.
Crew List.
Narcotic List.

(b) All items listed in Nos. 1 and 2 *(a)* must be presented to the boarding Customs Inspector and later at the Customhouse for entry. In addition a Customs Form 1300 (Master's Oath) and Customs Form 1301 (General Declaration) must be presented at the Custom House.

(c) Duplicate Manifest (lists) of:
1. All Cargo for discharge at this port.
2. All Passengers for discharge at this port.
3. Stores List.
4. Crew Purchase List.
5. Crew List.
6. Narcotic List.
7. CF3171 – Permit to Lade or Unlade (this will usually be furnished by the vessel's Agent prior to the arrival of the vessel).

(d) If vessel is proceeding coastwise from Port Canaveral with residue foreign cargo on board, prepare a Traveling Manifest which is a true copy of everything listed in the Original Manifest (2*(a)*). This must be presented to the boarding Customs Inspector and later at the Customhouse.

3. Other Documentary requirements: The Immigration Officer will require the original certificate Crew List on Form I-418. The same for passengers. He will also require the presentation of all passports and documents of seamen and passengers as to their immigration status for entry into the United States. A supply of Seaman's Landing Permit Form No. I-95A and passenger Permit No. I-94 should be maintained and they should be typed and ready for landing.

The Immigration Officer will want to inspect the entire crew. The Customs and Agriculture Officers will want to inspect the food storage areas and the quarters of the crew. The Agriculture Officer will also require a stores list. The Customs Officer will place a seal on the Bonded Stores Locker.

PILOTAGE: Pilotage is compulsory for all foreign vessels and for United States vessels under register in the foreign trade. Pilotage is optional for United States coastwise vessels who have on board a Pilot licensed by the Federal Government. Vessel applies for Pilot through Agent or Port Authority. May also call Pilot Office direct, Tel: (407) 783-4645. Pilot will board at Buoys 3 and 4 (Lat. 28° 22.6' N., Long. 80° 31.7' W.). Pilot boat is 37 ft. long with black hull, white house and buff deck, has "Pilot" painted on sides. Standard day/night pilot signals are displayed. Pilot boat stations itself 1 mile S.E. of Buoys 3 and 4, 0.5 hours before ETA of vessel. Vessels may anchor anywhere in area. Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz), but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given.

ANCHORAGES: Within the harbour itself, none.

The port's location is given as Lat. 28° 24' 46" N., Long. 80° 30' 49" W. Vessels arriving from off-shore may find a safe anchorage in the general vicinity of one mile South to S.W. of Approach Channel Buoy No. 3. A vessel shall ensure that its position will not impede the safe progress of other vessels transmitting to/from the approach channel.

RESTRICTIONS: Docking and undocking carried on day and night. Draft restrictions – if draft exceeds 36 ft. 6 in. vessel must await rising tide to enter port.

MAX. SIZE: Length and draft at Tanker Berth No. 1 and No. 2, 650 ft., with 39 ft. draft. Cargo dock, length unlimited – 39 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz) but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given. Best to route ETA cables through Western Union Telegraph. Port Canaveral is equipped with VHF Port Operations frequency 156.6

ETA Advice: Estimated time of arrival is required by the Harbour Master's office 24 hours prior to arriving at the pilot boarding station. Details to include ETA/ETD, vessel flag/Registry, GRT/LOA/draft.

TUGS: There are 2×1,800 h.p. tugs and 1 × 2,400 h.p. at Port Canaveral; most ships use the tugs for docking and undocking, but it is not mandatory. Tugs normally join vessel inside jetties and tugs lines are used.

BERTHING: All vessels unless prevented by conditions will be turned around upon entering turning basin and will be berthed headed seaward. No berthing permitted without Port Pilot aboard.

Northside:

Piers 1, 2, 3 and 4, all 39 ft. draft, general cargo, water available. Piers 3 and 4 with combined continuous length of 1,200 ft. – 39 ft. draft. Potable water and electricity available.

Southside:

Marginal Wharf with total length of 1,620 ft. at 39 ft. draft, 250 ft. at 24 ft. draft, general cargo, bunkers, water available.

Ro/Ro Ramp No. 1: 30 ft. width, elev. + 3 ft. MLW.

Tanker Berth No. 1: Dolphin type, 39 ft. draft, petroleum products, cement, bunkers, water available.

Tanker/Cargo Berth No. 2: Length 400 ft., 39 ft. draft, petroleum products, water available.

Cruise Terminals No. 2, 3 and 4: 35 ft. draft, 2,060 ft. combined length.

Cruise Terminal 5: 35 ft. draft, 525 ft. berth.

Cruise Terminal 8: 35 ft. draft, 725 ft. berth.

Cruise Terminal 10: 35 ft. draft, 725 ft. berth.

Also see "Tankers".

STEVEDORES: Important that vessel gives accurate ETA at least 24 hours in advance to enable Agent to order gangs.

MEDICAL: Advance notice for Agents not required, but if available is appreciated. There are good hospital facilities available and an emergency walk-in clinic at the Port. A contract physician's office of the U.S. Public Health Service is at Cocoa Beach, just South of the port.

TANKERS: Tanker Berths No. 1 and 2 available at present for discharge operations, with 35 ft. draft limit. No oil to be pumped overboard. Heavy fines imposed for oil pollution, however slight. The ship or ship's Agent will immediately report any spillage of oil on the wharf or on the water and the extent of the spill to the Port Manager and the Harbour Master. If spillage is considerable all cargo operations must stop and vessel prepare to undock.

FRESH WATER: All wharves have facilities for supplying fresh water, delivered by 4 in. water line.

FUEL: The general cargo wharf and Tanker Berth No. 1 have facilities for supplying fuel. 24 hours' notice requested. Fuelling by truck available at other berths.

FIRE: Ships discovering fire on board or close by on shore will sound repeated long whistle blast signals and use every other available means to report the fire.

Gasoline Tankers: All deck scuppers must be plugged before starting to discharge cargo. Supply of sand or sawdust must be on hand near the discharge headers. Static cable must be connected to wharf. Minimum 100 lb. pressure must be on water main and fire hose connected. Discharging must be stopped during severe lightning. Deck Officers must keep close check on hose connections for gasket leaks. Emergency Ship Movement Policy of Port Canaveral must be observed.

CONSULS: None.

REPAIRS: Available in the port.

SURVEYORS: Surveyors are available on request.

GANGWAY/DECK WATCHMEN: Not usually employed, this service left to discretion of Master.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Tonnage Tax Certificate.
Derat Certificate or Derat Exemption Certificate.

CUSTOMS ALLOWANCES: 300 cigarettes per crew member, and/or spirits: 1 quart per crew member.

REPATRIATION: All facilities available for effecting crew change arranging any necessary repatriations.

AIRPORT: Two airports available, serviced by regular airlines, Or International Airport, Orlando, Florida, approximately 54 miles fro Port; Melbourne Regional Airport at Melbourne, Florida, approxi 30 miles from Port. Also Space Coast Executive Airport approxi 25 miles from the Port, but this airport has only limited service.

TIME: GMT minus 5 hours normal, GMT minus 4 hours Daylight S Time.

HOLIDAYS: Numerous holidays do not effect operation of port, operates 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Police/Fire, Tel. 783 – 7800; Ambu Tel. 452 – 1444.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Station, Port Canaveral. Tel: (407) 853-7601.

TELEPHONES: Arrangements are not available for placing on bo

BANKS: Barnett Bank, 430 Brevard Avenue, Cocoa, Florida.

Numerous other banks are available in this area.

STORING: See "Prelims".

1. Vessels stored by truck only.
2. N/A.
3. Yes.
4. No.
5. Usual.
6. Yes, if required.

SHIP SUPPLY SERVICE: No ship supply services operate at the

In times of emergency, launch or tug service could be arra through the Port Authority, and helicopter evacuation provided th the United States Coast Guard.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

REGULATIONS: All radio frequency radiations from ships in Canaveral must be scheduled to prevent any possible interfere missile tests conducted on the Cape Canaveral Missile Test Anne only exception is standard ship/shore HF harbour control freque Vessels desiring to radiate will request permission from the Port Ma and/or Harbour Master.

GENERAL: All vessels, civilian and military, will provide wire ropes the bow and stern with eyes that can be reached by tugs o alongside. Pilots will make sure wires are in proper position leaving vessel. All vessels will undock and proceed to outer anch when so ordered by Port Manager and/or Harbour Master in the of: *(a)* a severe oil spillage; *(b)* fire is discovered on board a vesse with petroleum, explosives or a quantity of dangerous *(c)* vessel is in jeopardy due to conditions on shore. Eme movement of ships will be made with an able sea watch without a for return of other ships personnel.

DEVELOPMENTS: Western Basin Expansion started in mid completion 2008. 7 additional ship berths, including container, cargo, bulk cargo, shipyard and cruise terminals. Estimated U.S.$400 million.

Inlet channel to be widened from 300 ft. to 400 ft. and entrance to be deepened.

2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register a Line Certificate. In addition, the following documents will be req formal entry to be made within 48 hours of arrival from ab 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
All other ship's documents (Water Pollution Certificates, etc U.S. Certificates of payment of tonnage tax (Customs Form Certified Crew List.
American vessels only – All foreign repairs (Customs Form

PILOTAGE: Pilot boards at Port Everglades Sea Buoy, lo Lat. 26° 05' 30" N., Long. 80° 04' 45" W. Pilot available 24 hou

ANCHORAGE: A Sea Anchorage is designated outside the harbour and North of the Entrance Channel, where ships may anchor without damaging existing underwater cables or the local reef system. Water depth is 60 ft. – 90 ft. The rectangular anchorage is 1,000 ft. wide and 1.5 miles long, inside the following designated area:

N.E.	Lat. 26° 07' 46" N.,	Long. 80° 04' 51" E.
N.W.	Lat. 26° 07' 46" N.,	Long. 80° 05' 01" E.
S.E.	Lat. 26° 06' 20" N.,	Long. 80° 05' 01" E.
S.W.	Lat. 26° 06' 20" N.,	Long. 80° 05' 10" E.

There is a Government Restricted Area immediately offshore, South of the Entrance Channel.

Offshore Loading: Sea Anchorage limited to above coordinates. Water depth 60 ft. – 90 ft. No lighters based at Port.

RESTRICTIONS: Entrance to Port Everglades is by a straight channel running in a due Westerly direction for a distance of 1.7 miles from the 50 ft. contour of the ocean to the turning basin. The channel is 500 ft. wide at its seaward end, narrowing to 450 ft. wide from the jetty entrance to the Turning Basin. The water depth is 44 ft. including the Turning Basin. All depths are at Mean Low Water.

BASIN: *Main Turning Basin:* The Main Turning Basin is 1,200 ft. East and West and 2,450 ft. North and South with a depth of 44 ft. The North extension of turning basin is 620 ft. wide East and West on the North limits and 900 ft. wide East and West on the South limits and 1,150 ft. North and South, with a depth of 31 ft. The South extension of the Main Turning Basin is 1,300 ft. wide East and West by 1,300 ft. North and South, with a depth of 38 ft.

Southport Turning Basin: 900 ft. East and West by 800 ft. North and South, with a depth of 44 ft.

Tide: Mean tidal range at the harbour entrance is 2.5 ft. with a Spring tide of 3.0 ft. Tide range in the slips is from 0.2 ft. – 0.3 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: The following radio channels are available to communicate with facilities at Port Everglades:

Ship calling and safety: Channel 16.
Harbour Master: Channels 16, 14, 7A and 18A.
Operations: Channels 14, 7A and 18A.
Port Everglades Bar Pilot: Channels 12, 16, 13, 14, 18A, 19A.
Port Everglades Towing Co.: Channels 16, 13, 77, 14 and 18A.

TUGS: 5 tugs available to assist berthing with up to 4,200 h.p. Available 24 hours a day.

Port Everglades Towing Inc., P.O.Box 13038, Port Everglades, FL.33316. Tel: (954) 523-2200. Fax: (954) 527-1744.

BERTHING: Port Everglades' 48 berths currently available for ocean-going vessels are of varying lengths and depths and are divided among the port's 3 areas of operation – Southport, Midport and Northport. Ten of the berths are located in 3 slips, with the others along marginal wharves and T-heads. Bulkheads are sheet steel piling with concrete caps and rubber high-impact absorption fendering. Total berthing space measures 25,072 lineal feet.

The Southport area is used for cargo operations, with a focus on containerised and Ro-Ro services. Midport furnishes cruise berthing, cargo facilities, military vessel berthing and smaller lay-in spaces. Northport primarily handles cruise operations and liquid bulk unloading, with some cargo operations.

Foreign Trade Zone Warehouses: There are 5 warehouses in the Foreign Trade Zone (FTZ) with a total of 401,000 sq.ft. of space.

FTZ "A"	110,000 sq.ft.
FTZ "A Annex"	110,000 sq.ft.
FTZ "B"	30,000 sq.ft.
FTZ "E"	45,000 sq.ft.
FTZ "F"	106,000 sq.ft.

Transit Warehouses: There are 9 transit sheds containing a total of 536,900 sq.ft. of in-transit storage space.

Warehouse area (sq.ft.):

No. 1	41,200
No. 2	30,600
No. 4	56,640
No. 6	15,826
No. 16	89,598
No. 18	35,000
No. 19	45,000
No. 26	73,600
No. 29	54,000

Open Storage: Approximately 266 acres, paralleling the length of the harbour, and located next to cargo berths. All berths have vehicular access, and Berth No. 4 has rail service. Most dry and general cargo berths are designed for dual requirements of open and coverage storage, eliminating the necessity of shifting vessels after partial unloading. Open storage areas are enclosed and secured with chain link fencing.

Typical commodities consigned to open storage are lumber, containers, construction steel and steel products, automobiles, heavy duty equipment, scrap metal and other bulk commodities.

Open Yard Area Facilities:

Location	*Acres*	*Use*
Northport – West of Building 4	4	Containers
Northport – West of Berth 4A	4	Containers
Northport – Pier 2	1	Containers/Steel
Midport – Container Yards	44	Containers

Southport – Scrapyard	5	Scrap Metal
FTZ	4	Vacant
FTZ	8	Warehouse Expansion

Foreign Trade Zone: Broward County Board of County Commissioners is the Grantee and Operator of Foreign Trade Zone No. 25 located within the Port. Use of the facilities is outlined in Foreign Trade Zone No. 25 Tariff No. 1, which may be obtained from Foreign Trade Zone staff.

Reefer Outlets: There are currently 400 reefer outlets located at Port Everglades, primarily 3 phase 480V, 60 cycle, 100 amps.

Refrigerated Warehousing: A one million cubic foot reefer plant with 6 temperature adjustable chambers (Port Everglades Cold Storage) is located less than 200 ft. from the Container Terminal (Berths No. 16 – 18).

Roll-On/Roll-Off Facilities: There are 8 Ro/Ro ramps built into the sea walls. One ramp is located at Berth No. 1, two ramps are located at the West end of Berths No. 4 and 5, and two additional ramps are located at the corner of Berths No. 18 and 19. Three ramps are located in Southport at Berths No. 33A, 33B and 33C.

Ramp	*Width* (ft.)	*Depth* (ft.)
Berth 1	70	31
Berth 4	145	43
Berth 5A	145	43
Berth 18	43	38
Berth 19	84	38
Berth 33A	140	44
Berth 33B	120	44
Berth 33C	120	44

CRANES: With the exception of rail-mounted container gantry cranes, all cargo handling equipment is owned and operated by stevedoring and agency firms. Companies provide modern handling equipment, mobile cranes of 100, 65, 30 and 20 tons. Attachments include clamshell buckets, electric magnets and automated ship-unloaders. No floating cranes or derricks are based at the Port.

BULK CARGO FACILITIES: Port Everglades is highly diversified in the type of cargoes it handles. Storage facilities are available for petroleum, scrap metal, bulk cement, etc.

Cement: Berths No. 14 and 15 are the Port's designated berths for handling bulk cement. There are currently 34 bulk cement silos, 14 owned by Rinker Cement and 20 owned by Continental Cement Company of South Florida, Inc. The Rinker facility has a total holding capacity of 65,000 short tons and handles both white and grey cement with bagging for white cement. Product is distributed by Rinker Transport Company and others, to destinations throughout Southeast Florida.

Rinker has a privately owned Kovako ship unloader sitting on approximately 700 ft. of dockside rail, and providing the capacity to unload up to 400 metric tons of bulk cement per hour. Continental Cement's 20 silos have a total bulk grey cement capacity of 48,600 tons. Continental has a privately owned Siwertell ship unloader, located adjacent to its dockside silos sitting on 400 ft. of rail, with the capacity of discharging cement at a rate of 800 metric tons per hour. Bagging services are available at Continental, which also distributes its product throughout Southeast Florida.

Lumber: The designated lumber yard is located at Berth No. 29. There is currently one primary lumber company with Port Everglades operations. Gulf Atlantic Lumber Sales ships Western red cedar and Western hem fir from British Columbia mills with distribution throughout the State of Florida.

Petroleum: There are 264 various sized petroleum storage tanks located in the Port Everglades jurisdiction, with a total capacity of approximately ten million barrels. The majority of tanks are privately owned. Also see "Tankers".

Scrap Metal: Five acres are dedicated to scrap metal storage and processing. The primary company providing these services is SIDCO Enterprises, Inc./Sunshine Metal Processing, Inc.

Steel: Construction steel and other steel products are normally stored at Berth No. 29. Indoor storage of steel coils is available.

Waste Paper/Newsprint: Indoor storage is made available for these commodities in dockside transit warehouses.

CONTAINER HANDLING FACILITIES:

Berths: Container operations are currently centered around Midport Berths No. 16, 17 and 18 with 2 gantry cranes, lighted and secured, also at Berth No. 6, 28F, 29 and Southport Berths No. 30 and 33A with 3 low profile Post-Panamax gantry cranes (A fourth crane will be delivered to Southport mid-1997).

Handling Equipment: A full range of container handling equipment is available, including container top handlers, yard mules, high capacity forklifts, chassis and flatbed trailers.

Terminals: Storage areas total 59 acres in the Midport and Northport area, accommodating both wheeled and grounded configurations. All container terminals are adjacent to the Berths to facilitate container transfer and loading. Trailer operations are already in effect at the developing 155 acre Southport Container Complex through Crowley Caribbean Transport's 55 acres container/trailer facility. Gantry crane operations available at Southport.

Cranes: Port Everglades currently has 3 container cranes available for service. All are rail-mounted, diesel electric single trolley, through-leg load handling, gantry type container cranes.

Midport: Kone Oy Gantry Crane:
Operator: Port Everglades Authority.
Operating features:

Rated capacity (below spreader)	30 long tons
Rated capacity (below cargo hook)	37 long tons
Hoist speed at rated capacity	160 ft./min.
Lower speed at rated capacity	160 ft./min.
Hoist acceleration at rated capacity	2 sec. (approx.)
Hoist speed with empty spreader	380 ft./min.
Trolley travel	500 ft./min.
Gantry travel	150 ft./min.
Boom travel (up or down)	5 min.

Principle Dimensions:

Rail gauge	50 ft.
Frame leg clearance	50 ft.
Overall portal clearance	44 ft.
Total lift, top of rail to underside of spreader	81 ft.
Total lift minimum	131 ft.
Outreach, centreline waterside rail – centreline spreader	130 ft.
Backreach, centreline landslide rail to centreline of spreader	40 ft.
Width of crane with bumpers extended	95 ft.
Boom stowed crane height	240 ft.

Paceco Gantry Crane:
Operator: Port Everglades Authority.
Operating features:

Rated capacity (below spreader)	50 long tons
Rated capacity (below cargo hook)	58 long tons
Hoist speed at rated capacity	150 ft./min.
Lower speed at rated capacity	190 ft./min.
Hoist acceleration at rated capacity	2 sec. (approx.)
Hoist speed with empty spreader	360 ft./min.
Trolley travel	500 ft./min.
Gantry travel	150 ft./min.
Boom travel (up or down)	5 min.

Principle Dimensions:

Rail gauge	50 ft.
Frame leg clearance	60 ft.
Overall portal clearance	51 ft.
Total lift, top of rail to underside of spreader	100 ft.
Total lift minimum	150 ft.
Outreach, centreline waterside rail centreline spreader	135 ft.
Backreach, centreline landslide rail to centreline of spreader	75 ft.
Width of crane with bumpers extended	95 ft.
Boom stowed crane height	270 ft.

Southport: 3 cranes operational (Fourth crane will be delivered 1997). Samsung, post-Panamax, low-profile, shuttle boom.
Operator: Port Everglades Authority.
Operating features:

Rated capacity (below spreader)	40 long tons
Rated capacity (under cargo hook)	57 long tons
Hoist speed loaded	180 ft./min.
Hoist unloaded	380 ft./min.
Lowering loaded	180 ft./min.
Lowering unloaded	380 ft./min.
Trolley travel	600 ft./min.
Boom shuttle time	2.5 minutes in out
Gantry travel	150 ft./min.

Principle Dimensions:

Dock rail gauge	100 ft.
Clear height under spreader over rail	106.25 ft.
Overall portal clearance	50 ft.
Total lift minimum	155 ft.
Maximum gantry width (bumpers extended)	86.5 ft.
Workable outreach	145.5 ft.
Minimum workable backreach at post-Panamax working position	45 ft.
Maximum boom width	30 ft.
Overall height limit above rail	151.25 ft.

Spreaders:
(1) Bromma Twin 20 ft., rated 40 long ton.
(1) Bromma Telescopic, 20 ft. – 40 ft., rated 40 long ton.
(6) Bromma Telescopic, 20 ft. – 45 ft., rated 40 long ton.

STEVEDORES: These services are provided by licensed steved firms. Arranged by Agent.

TANKERS:

Berth 4: Length 900 ft., depth 43 ft.
Operators: Coastal Fuels Marketing Inc.; Exxon Co., U.S.A.; Mar Oil Co.

Berth 5: Length 900 ft., depth 43 ft.
Operators: Coastal Fuels Marketing Inc.; Exxon Co., U.S.A.; Am Hess Corp.; Marathon Oil Co.; Shell Oil Co.; Trumbull Asphalt.

Restaurants:

Burt & Jacks Restaurant: Located at Berth 23. Formal American dining in a Mediterranean villa with water on three sides. Prime steaks and jumbo Maine lobster are the specialities for this award winning restaurant. Owners are Mr.Jack Jackson and Mr.Burt Reynolds. Entertainment nightly. Jackets required for dining. Tel: (954) 522-5225.

Snack Bars: Snack bars are in operation at each cruise terminal when a cruise ship is embarking or disembarking passengers at that terminal.

AUTHORITY: Port Everglades Department of Broward County, 1850 Eller Drive, Fort Lauderdale, Florida 33316, U.S.A. *Tel:* (954) 523-3404. *Telex:* 240042. *FAX:* (954) 525-1910. *Contact:* James J. O'Brien, Port Director. Dave Miller, Director of Corporate Communications. Alan Kehrer, Director of Passenger and Development. Carlos Buquevas, Director of Cargo Marketing.

PORT HURON, Michigan: 42.59 N. 82.26 W.

Refer to St. Lawrence Seaway for important general information.

PILOTAGE: Compulsory, by Seaway Pilots.

ANCHORAGES: Near head of St. Clair River at Sarnia. Vessels should anchor as close to shore as safely possible to keep channel clear for passing vessels.

RESTRICTIONS: Navigation season from mid-March to end-December approx. Dock channel depth – 25 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Port can be contacted through Marine Operator, Sarnia.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING: Port Terminal Co. Dock: 700 ft. long 26 ft. – 31 ft. depth.

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Obtainable by pipeline at all docks.

FUEL: All grades available by pipeline at all docks.

REPAIRS: Machine shops available for limited deck and machinery repairs.

AUTHORITY: *Managers:* Port Huron Seaway Terminal Co., 2336 Military Street, Port Huron, Michigan 48060. *Contact:* W.R. Neal, President.

PORT JEFFERSON, New York: 40.59 N. 73.06 W.

(See Plan)

OPERATOR'S REPORT: 1981

PILOTAGE: Harbour Pilot/Docking Master will board outside of the sea buoy. If at anchor, Docking Master will board at the anchorage.

APPROACHES: *Port Approaches – Cautionary Advice:* (via New York) Charts: 12339, 12366, 12367, 12363, 12362, 12354.

Vessels leaving New York bound for Port Jefferson transit New York's East River and Long Island Sound.

Sandy Hook Pilots handle the ship in the East River and Hell's Gate, and the Long Island Sound Pilots handle the ship in the Sound. The change of Pilots is made off City Island. The pilot boat can be raised on Channel 13. All shoals and rocks are well marked and the shore line provides an excellent radar target for position checking.

During Summer months, thick fogs present a hazard on this route. Long Island Sound is also a major yachting centre so extreme care must be exercised while transitting this area.

There are several dangers to be wary of when making the passage from New York to Port Jefferson; in order of approach they are:

1. East River and Hell's Gate are areas of strong tidal currents averaging 4.6 knots during ebb tide which set in a Southwesterly direction. Vessels drawing up to 35 ft. may transit Hell's Gate only at Slack High Water. Sluggish handling vessels should arrange for tug assistance through the East River and Hell's Gate.
2. 26-ft. buoy "32A"; usually passed well clear to the South.
3. Cable and Anchor Reef; usually passed to the South.

Port Approaches – Cautionary Advice: (From Block Island) Charts: 13205, 13215, 13209, 12354, 12362.

On approaching Block Island from a Southerly direction, a good radar picture is obtained of the Island's South coast. The RDF station at S.E. Light is also useful.

It is advisable to remain at least 1 mile to the East of Block Island because of the numerous shoals close in shore.

Non-U.S. flag vessels and U.S. flag vessels under registry approaching from Block Island embark Pilot about 2.5 miles South of Point Judith.

U.S. flag vessels under enrolment approaching from Block Island embark Pilot 1.4 miles East of Old Harbour – Block Island.

There are several dangers to be wary of when making the passage to Port Jefferson; in order of approach they are:

Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.

The Race is a narrow channel into Long Island Sound. Strong East to West currents occur during maximum ebb or flood and knowledge of position should be maintained in view of possibility of unusual set. Valiant Rock may be passed on either side. The Race is an extremely popular area for sport fishermen and the area is usually congested with small craft.

Extreme caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound as there is heavy traffic of pleasure craft.

Thick fog is prevalent during Summer months.

Good water is found in Long Island Sound from The Race to Port Jefferson as long as the mid-channel Buoys "P1" and "CF" are passed close to, and care is taken so as not to pass North of "28-ft. shoal" buoy.

Vessels headed for Port Jefferson will pass South of "Stratford Shoal" light. Radar is the best navigational aid in this area, also, there are several RDF stations that can be used.

ANCHORAGE: Anchorage is available North of "Mount Misery" shoal in depth of 80 ft. to 100 ft. Barges are available for lightering from New York. Winter weather conditions with strong winds sometimes hold up lightering operations 2 to 3 days. Vessels with stern anchors can sometimes minimise this delay by making a lee for the barge.

RADIO: Send ETA to Agent 72 hours, 48 hours and 24 hours prior to arrival at Block Island Pilot Station. Advise max. draft (salt water) in the initial message.

VHF: Pilot: Channel 13, 16 and 18A. Tugs: Channel 19A "KFT 234" 18A. Traffic Control: Channel 13. USCG: Channel 16. Terminal: Channel 13.

TUGS: 3 tugs available from New Haven, 2 single screw diesels of 1,800 s.h.p. and 1,600 s.h.p. and a twin screw boat of 1,800 s.h.p.

TANKERS: Tosco Pipeline Company: Traffic at times may be heavy near the harbour entrance and in the inner harbour. Sand and oil tows, coastal tankers, and the Bridgeport/Port Jefferson ferry may be encountered. Arrangement should be made with the Pilot ensuring that other traffic is not hampering the safe entrance and channel transit.

Vessels start in one hour prior to HW. The entrance between the jetties is made by lining up with the ranges at the head of the harbour. Consideration should be given to a possible cross set. Once inside the jetties, speed is reduced, and the vessel is stopped off the dock. The vessel is then breasted into position starboard side to with the assistance of 1 or 2 tugs. The terminal is located approximately 1.8 miles from the breakwaters on the starboard side of the channel.

Vessels in a light condition, when departing with the assistance of 1 or 2 tugs, are backed and turned off the LILCO dock with the forward draft not exceeding 14 ft.

Shore Facilities: 2×8 in. hoses.
2×16 in. shoreline (3.5 miles long).
Shore booster pumps.

FRESH WATER/FUEL: Bunkers are not readily available; in an emergency, bunkers could be arranged by Ecklof Marine, Bayway, N.J. and delivered by barge from New York. Fresh water is available ex berth.

GARBAGE DISPOSAL: Drums available alongside. Service provided by Miller Environmental Group at 24 hours notice.

WASTE OIL DISPOSAL: Contact Mr.Czujko at Tosco (Tel: (516) 941-4040) 24 hours in advance. Tanker trucks available with 2 in. hose.

SEAMAN'S CLUBS: At New York, which is 40 miles away.

GENERAL: *Gangway:* Ship's gangway is required.

Tides and Depth of Water: The depth of water in the channel determines the safe draft for entering. Agent and Pilot should be consulted as to safe draft. Strong Westerly winds will cause the water level to be lower than usual, and strong Easterly winds will increase the water level. Average range of tide is 6.6 ft.

Oil Pollution: This area is very sensitive to oil pollution, so extreme care should be exercised. In case of an oil spill, consult with Pollution Control Officer and notify U.S. Coast Guard, Terminal Representative and Agent. Visible smoke from ship's stack is also a very critical area of pollution in this port. Spill booms are deployed.

Security: The terminal is fenced and guarded. Maintaining a gangway watch is recommended.

Ballast/Slop Facilities: There are no dirty ballast or slop facilities in Port Jefferson.

Firefighting Facilities: The terminal is equipped with 2 fire pumps which service 2 fire monitors on the dock. The fire line has the capability to deliver foam. There is a 3,150 lb. wheeled dry chemical extinguisher and various hand extinguishers to cover the hose tower area.

Fire wires should be hung, one forward and one aft, on the offshore side with eyes which can easily be reached by tugs in case of fire. The tanker should have all fire fighting equipment aboard in readiness to combat any fire that may arise.

AUTHORITY: Tosco Pipeline Company, 19 Belle Mead Road, East Setauket, New York 11733, U.S.A. *Contact:* Zenon Czujko, Manager.

PORT LAVACA/POINT COMFORT, Texas:

PORT NECHES, Texas: 30.00 N. 93.57 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.

BERTHING: Texaco Chemical Co. (Jefferson Dock) Chemical Co.: Distance from sea 30 miles, depth at berth November to March 32 ft., and from March to November 35 ft. Max. LOA 800 ft.

Texaco Terminal: Distance from sea 34 miles, depth at berth 38 ft. Max. LOA 810 ft.

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Available by barge.

FUEL: Bunker C not available ex-wharf at Texaco Terminal, only by barge from Port Arthur or Beaumont.

CONSULS: Nearest at Houston.

REPAIRS, DRY DOCKS: See "Port Arthur".

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.

AIRPORT: 15 minutes from docks. Several flights a day 0600 hrs. – 2200 hrs. to Houston International Airport.

IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.

AUTHORITY: *Operators:* Texaco Chemical Company, P.O.Box 27712, Houston, Texas 77227-7712, U.S.A. *Contact:* W.C.Kent, Manager – Distribution Operations.

PORT ROYAL, South Carolina: 32.23 N. 80.42 W.

(See Plan)

PORT LIMITS: Sea buoy at channel entrance. Dockage charges commence when vessel moors and end upon unmooring and applies for each 24 hour period or fractional part thereof.

DOCUMENTS: Valid original vessel documents plus basic Customs documents for entry in triplicate:

Master's Oath, CF 1300.
General Declaration, CF 1301.
Manifest of Cargo on Board, CF 1302.
Ship's Stores Declaration, CF 1303.
Crew Effects Declaration, CF 1304.
Crew List/Passenger List, I-418.

PILOTAGE: Compulsory. Pilotage provided by Port Royal Branch Pilots Association, 1191 Brotherhood Way, Beaufort, SC 29902. Tel: (803) 522-0805.

ANCHORAGES: No designated anchorages. However, vessels may anchor in Port Royal Sound or vicinity of Sea Buoy (2PR) as long as navigation is not restricted. Average depth 12.0 m.

MAX. SIZE: Max. LOA 182.9 m. (600 ft.). Max. draft 8.23 m. (27 ft.) salt water.

HEALTH: See "Health:All Ports" before first U.S.A. port (Albany).

RADIO: Port has no radio communication equipment. U.S. Coast Guard Station, Tybee Island, Georgia, can be reached on VHF Channel 16.

VHF: See "Radio".

TUGS: Compulsory. Contact the Terminal Manager (See "Authority").

BERTHING: The facility has a single marginal concrete berth 12.0 m. (40 ft.) wide and 172.2 m. (565 ft.) long. Usable berthing space is 182.9 m. (600 ft.), depth alongside is 8.53 m. (28 ft.) at MLW.

CRANES: Mobile cranes up to 90 ton capacity are available by prior arrangement.

BULK CARGO FACILITIES: Facility has handled gypsum, sand, pig iron, fertiliser and crushed granite. Approximately 10 acres open storage available.

SPECIALISED CARGO HANDLING FACILITIES: Berth suitable for Ro-Ro operations on vessels having quarter turn ramps. Liquid bulk storage 11,000 tonnes (Kaolin slurry).

BRIDGES: None.

STEVEDORES: Union and non-union gangs available. Hours of operation flexible. Normal hours of operation for port personnel 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs., Monday to Friday.

MEDICAL: Full hospital facilities available without prior notice. Dentists available by appointment during normal working hours.

TANKERS: Tankers routinely call at the port to load clay slurry in bulk in approximate 7,000 tonne lots.

Also see "Shipmaster's Report".

DENSITY: 1025 (salt water).

FRESH WATER: Available on berth via 2 in. line at U.S.$ 2.75 per 2,000 gallons.

FUEL: Private firm with trucks or barges available by prior arrangement with ship's Agent.

FIRE PRECAUTIONS: Smoking is prohibited in transit sheds, warehouse and on the apron of the wharf.

CONSULS: Charleston: Chile Tel: (803) 792-2489, 884-6224. Denmark Tel: (803) 577-4000. Norway Tel: (803) 577-5782.

Spartanburg: Germany Tel: (803) 582-5133. Switzerland Tel: (803) 585-3922.

REPAIRS: No major facilities available at port. Mobile repair companies available in area.

DRY DOCKS: None.

SURVEYORS: Marine surveyors, representing Lloyd's, ABS, NV, operate within 75 miles of the port.

GANGWAY/DECK WATCHMEN: No requirement for watchmen, except for special security conditions as may be determined by the Port Director.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: U.S. Customs regulations applicable.

CARGO GEAR: Mobile crane (90 tons), lift trucks to 15,000 lb., flatbeds (40 ft.) and yard truck available at port. Other gear available by prior arrangement.

REPATRIATION: Through Charleston, 90 minutes away.

AIRPORTS: Beaufort County, 9.6 km. (6 miles). Savannah, 45 minutes and Charleston, 90 minutes.

TIME: GMT minus 5 hours.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (Third Monday in January); Washington's Birthday (Third Monday in February); Memorial Day (Last Monday in May); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (Second Monday in October); Thanksgiving (Fourth Thursday in November); Friday after Thanksgiving; Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Police, Tel: Emergency 911. Non-Emergency after 1700 hrs. weekends and holidays (803) 524-2777. Fire Department, Tel: Emergency 911. Business (803) 525-7055. Ambulance, Tel: Emergency 911.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard. Tel: Emergency (912) 652-4353.

TELEPHONES: Not available for onboard use through Ports Authority. Check with ship's Agent.

SERVICES: Most common services can be arranged by ship's Agent, given prior notice.

BANKS: Wachovia, 1011 Bay Street, Beaufort, SC 29902. Tel: (803) 522-2200. Fax: (803) 522-2224.

SHIP SUPPLY SERVICE: Ship chandler arranged through ship's Agent.

SHORE LEAVE: When cleared by Customs/Immigration/Agriculture, at discretion of Master.

IDENTIFICATION CARDS: Normally not required.

GARBAGE DISPOSAL: See "Agriculture" before first U.S. port.

WASTE OIL DISPOSAL: Service provided by duly licensed private contractor. Arranged by ship's Agent.

SEAMAN'S CLUBS: Baptist Seaman's Service within walking distance of port. Tel: (803) 525-0884.

CURRENCY: U.S. Dollars.

SHIPMASTER'S REPORT: August 1996.

Charts: B.A. 2801 and B.A. 2805.

Approach: Approach to buoyed channel should be made on a course of 360° if arriving from Savannah Pilot Station to avoid 2 wrecks in position Lat. 32° 03.8' N., Long. 80° 36.1' W. Northern wreck is reported to have shifted 0.3 miles N.E.

Lay a course to Lat. 31° 03.5' N., Long. 80° 34.9' W., then a course 360° to pass Fairway Buoy to port.

Buoyed channel is conspicuous on radar.

Channel starts 9.5 miles N.E. of Savannah Light Tower.

Coastline is flat with no identifying marks.

Pilot: Pilot boards either off Charleston or at Savannah Fairway Buoy using port's pilot boat, arranged through Agent. Pilot leaves by same method. Port Royal pilot boat discontinued due to low traffic density. 24 hour availability for berthing and unberthing is dependant on tide.

Presently, pilot resides at Port Royal (Tel: (803) 522-0805), but in near future, he will retire and Charleston Pilots will be used. Pilotage compulsory North of Sea Buoy.

Channel: It is 18.5 miles from Sea Buoy to State Dock and about 1.5 hours steaming.

Channel is well buoyed, and maintained by U.S. Army Corps of Engineers. Channel dredged in 1994/95, but is prone to shoaling, especially in lower reaches near Buoys No. 6 and 7. This area again shoaling at S.W. tip of Saint Michael's shoal. Beware of squat in this area.

Controlling depth 27 ft. MLW. Channel width 500 ft. from Fairway Buoy to Bay Point and then 300 ft. in upper reaches.

Least depth on this visit was 23 ft. MLW at Beacon 43 (Port Royal Reach).

Anchorages: At Sea Buoy (but vessel then proceeds to Savannah Pilot Station for Pilot), Savannah Light Tower, or Port Royal Sound outside channel – under pilotage.

Tug: Local tug stationed at State Dock, it is old and of moderate power, tug's line used. Tug used inwards only if swinging prior to berthing.

Berthing: Vessels of maximum length 600 ft. and 28 ft. S.W. draft (dependent on tide) have berthed at State Dock. Pilot will dock such vessels with prior consent, through Agent.

Normally port side to for berthing.

Dock reported to have 30 ft. MLW. General cargo wharf with shed. Wooden fendering was good.

Turning Basin immediately off berth with 21 ft. MLW (reported) and 680 ft. turning circle.

Tidal range maximum 7.5 ft. Moorings conventional with stern lines (if port side to) to bollard on creek bank.

Ship's accommodation ladder easily landed.

Berth owned by South Carolina Ports Authority.

Density: 1017 at H.W. and L.W. Pilot reports a lot of density layering with S.W. over F.W. at Springs.

Cargo: Main product handled is the export of Kaolin Clay slurry, various blends depending on customer requirements being shipped. Trade in other products is being marketed. Scrap metal, timber and metal ingots are also handled.

About 2 ships per month call at the port.

Kaolin slurry is transported by rail in tank cars from mines some 300 miles away in Georgia. Rail freight access is good.

Slurry is stored in 2×5,000 tonne tanks just behind the berth. Temperature of product is ambient. Approx. SG 1.780.

Slurry is pumped onboard through 2×6 in. lines into quay gantry then 2×6 in. rubber hoses to ship's manifolds (Camlock couplings). Loaded rate about 650 tonnes/hr.

Tanks inspected prior to loading by National Cargo Bureau.

Facilities: Fresh water through dockside meter, ship's hoses used.

Fuel by truck.

Town of Beaufort, 2 miles to North, has most local facilities, including medical and dental.

Telephone about 100 m. outside nearby dock gate.

Nearest main airport is Savannah, about 40 miles to South.

Chandler from Savannah.

Agent from Savannah or Charleston.

Local repair works fairly comprehensive. Owned by ex-British merchant navy officer (Tel: (803) 525-0818).

Documents: If first port:
- 6 copies Crew List.
- 2 copies Stores List.
- 2 copies Crew Effects List.
- 3 copies Cargo Manifest (If cargo onboard).
- Crew Passes.
- 2 copies Inward Declaration.

If second port:
- 3 copies Crew List.
- 2 copies Stores List.
- 2 copies Crew Effects List.

For Clay slurry, Bill of Lading made out onboard from ship survey figures.

AUTHORITY: South Carolina State Ports Authority – Port of Port Royal, P.O.Box 557, Port Royal, SC 29935, U.S.A. (Street address: 601 Paris Avenue, Port Royal). *Tel:* (803) 524-9311. *FAX:* (803) 524-5397. *Contact:* A.J. Pesavento, Terminal Manager.

PORT ST. JOE, Florida: 29.49 N. 85.19 W.

DOCUMENTS:

All documentation must be on United States forms.

At least: 3 Passenger Lists.
- 3 Crew Lists (1 for visa Crew List).
- 3 Curio Lists.
- 3 Stores Lists.
- 2 Complete Manifests.
- Clearance from Last Port.

PILOTAGE: Apply for Pilot through ship's Agent – address is "Port St. Joe, Pilots" and advance ETA 18 hours. "VHF – Channel 16". Pilot boat station is at Sea Buoy, Port St. Joe only and location of anchorage for vessel awaiting a Pilot is 1 mile West of Sea Buoy.
ANCHORAGES: Local harbour charts indicate safe anchorage.
MAX. SIZE: Draft 32 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call sign WLO, Mobile, Alabama.
TUGS: None presently available.
STEVEDORES: ETA must be received by 1800 hrs. in order to have gangs at 0800 hrs. following day.
MEDICAL: No notice required. Hospital facilities available. Inoculations required same as public health U.S. Government requirements.
TANKERS: Discharge lines 8 in. No residue discharge allowed. 2 tanker berths 32 ft. draft.
DENSITY: Salt water – heavy concentration.
FRESH WATER: Available in unlimited quantities by hose connection from dock to ship, 1.5 in. to 2.5 in. size at 60 p.s.i.
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Only when requested by ship.
OPENING/CLOSING HATCHES: Work can be performed by either stevedores or crew.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per week per crew member permitted. Further allowances would depend on circumstances. Wine and/or Spirits 1 bottle per crew member as allocated by Customs.
CARGO GEAR: Must be in compliance with "U.S. Government Longshoremen Safety Codes".
REPATRIATION: Can be accomplished by Agent and Immigration but should be accomplished in larger ports if possible.
AIRPORT: Served by regular airlines. 6 combined flights a day. Distance 40 miles.
TIME: Standard Time GMT minus 5 hours. GMT minus 4 hours Daylight Saving Time from first Sunday in April to last Sunday in October.
HOLIDAYS: *No Work Holidays:* No work performed New Year's Day, Fourth of July, Labour Day, Christmas Day, or December 24th & December 26th, and Easter Sunday, except handling of mail, baggage and perishables (except bananas) or unless a ship is in distress, such as fire or leaking bottom, or, other causes that would damage cargo or vessel. In event work done on New Year's Day, Fourth of July, Labour Day, Christmas Day, December 24th & December 26th, or Easter Sunday, rate of pay for such ship work shall be double the normal time rate. Should above holidays fall on Sunday, double time will be paid. Following Monday will be paid at time and one-half.
Working Holidays: Armistice Day, Thanksgiving Day and Memorial Day are to be paid for at overtime rate – one and one-half times straight-time rate. Should any of above holidays, except Sunday fall on Sunday, the following Monday will be observed.
POLICE/AMBULANCE/FIRE: Police Tel: 229-8265; 227-4526; Ambulance Tel: 227-1115 (Comforter), 277-1818 (St. Clair), 229-8111; Fire Tel: 227-1115.
TELEPHONES: Available for placing aboard.
SHORE LEAVE: Shore leave allowed when cleared by Immigratio
REGULATIONS: Normal working hours of longshoremen from 08 2230 hrs. only, 7 days a week.
DELAYS: Only when due to port congestion.
GENERAL: In sending ETA when ship is going to arrive over week (Saturday and Sunday), an ETA notice should arrive prior to 170 Friday.
AUTHORITY: Port St. Joe Port Authority, P.O.Box 280, Port St. Florida 32456. *Tel:* (904) 227-1111. *Contact:* Amelia Tapper.

PORT SAN LUIS, California: 35.10 N. 120.45 W.

(See P

APPROACHES: The approach channel, directly off the end o Harbour District's Pier is an entrance channel, which is unlit and iden by large green or red buoys.

The tanker channel runs North/South to Pier No. 2 (Union Oil small vessels using Pier No. 3 (Harford) run a course of approx. S N.W.
ANCHORAGE: The best anchorage in the Harbour is on the starb side, coming from the sea, being the area between Pier No. 3 and second, Union Oil Terminal Pier. Anchorage be outside of the exis mooring area and the holding ground is primarily sandy bottom.
MAX. SIZE: Tankers up to 750 ft. length and 26 ft. draft.

48,000 d.w.t. tankers may not use Pier No. 3 (Harford). Ve wishing to use Pier No. 3 must give prior notice in writing, e commercial fishing vessels.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany)
AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban
RADIO: Vessels should contact Union Oil Company through Ma Operator. "Walkie-talkie" sets used for communication with term VHF station KTD 411, Channels 10 and 16.
VHF: Harbour Office, call sign "KYZ 664", on VHF Channe throughout 24 hours, working Channels 10 and 12.
TANKERS: Tanker berths only at Union Oil Company Pier. Vesse off pier at Berth No. 4. Depth alongside 32 ft. MLW.

1×12 in. and 1×16 in. load/discharge lines. No ballast disc allowed.
DENSITY: Salt water, 1025.
MEDICAL: Services available.
FRESH WATER: Available.
FUEL: The Harbour District maintains and operates a diesel fuel fa capacity 12,000 gallons. The facility is at the end of the District's 1, pier. Limited use restricted to small vessels (Commercial "Dyed" (fuel only) up to 300 d.w.t. Gasoline also available.
CONSULS: Nearest consuls situated at Los Angeles and San Fran
REPAIRS: There is a work dock facility available, equipped with p and water.
AIRPORT: County Airport, San Luis Obispo, situated 12 miles d 6 flights daily to Los Angeles and to San Francisco.
HOLIDAYS: Christmas and New Year; Martin Luther King President's Day; Memorial Day; Independence Day; Labour Veteran's Day; Thanksgiving Day and following day.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A (Albany).

No garbage services for large craft other than local garbage dum by special order.
WASTE OIL DISPOSAL: 50 galls. collection drums on one pier
SEAMAN'S CLUBS: None.
WEATHER: The mean tidal range in San Luis Obispo Bay is 3.6 Spring range is 5.3 ft. and the maximum range is approximately The highest observed tide was 7.5 ft. above MLLW mark in Ja 1948. The lowest tide of −2.3 ft. MLLW mark occured on Janua 1951. Tidal level above the MHHW or MLLW will occur approxim 20% of the time during severe storms. The existing breakwate partial protection from waves approaching from the Western par San Luis Bay. The bay is exposed to open sea from the So Southwest. Northwesterly winds are predominant, except dur Winter months, October through April, when these storms from the generate waves that approach from the S.W. to S.E. The magn the surge is usually less than 0.5 ft. However, 1 ft. waves are com

The prevailing wind is from the N.W. and averages 5 to 15 kno during a Southerly storm, can go up to 60 knots.

The climate and weather are typically mild and favourable. Th season, including the storm season, is generally from Novemb to April 15th. Occasionally, brisk winds or fog make it temporarily to navigate within the Port. Rain and heavy winds are not experienced at other times of the year. Normally, the temperatu the low 50's to the high 70's.
GENERAL: Port San Luis is an official Port of Entry with U.S. C The Port Director is on duty Monday to Friday from 0800 hrs. to 16

There is a boat yard with a 60 ton mobile hoist.
AUTHORITY: Port San Luis Harbour District, Pier No. 3, P.O.B Avila Beach, California 93424. *Tel:* (805) 595-5400. *Fax:* (805) 5 *Contact:* J.K. Elder, Harbour Manager. John D'Ornellas, Op Manager.

PORT SULPHUR, Louisiana: 29.28 N. 89.41 W. (See Plan)

DOCUMENTS, etc: Refer to "New Orleans".
PILOTAGE: A vessel coming into port from sea can arrange to pick up a Bar Pilot (Associated Branch Pilots) by furnishing ETA to the ship's Agents, radio contact by VHF Channel 9 and AM Channels 2738 and 2182. Bar Pilot is exchanged for river Pilot at Head of Passes, Pilot Town, Louisiana. River Pilot (Crescent River Port Pilot's Association) can be arranged through ship's Agent in New Orleans and radio contact as above. Vessel awaiting Pilot for departure may remain at dock until Pilot arrives. Advance notice of 3 hours is required for departing Pilots. This can be arranged by the ship's Master with the shipping foreman.
ANCHORAGES: Anchorage is available on East bank of river opposite to Freeport Sulphur Company Dock. Depth of water at anchorage is 40 ft., the controlling depth in the river.
RESTRICTIONS: No restrictions for entry because of time of day, nor conditions of tide or draft except the controlling depth of Mississippi River to Port Sulphur (35 ft. – 40 ft. as published in reports by U.S. Army Corps of Engineers).
MAX. SIZE: Max. permissible length – 750 ft., breadth not limited, draft equal to controlling depth of river.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio WNU New Orleans.
TUGS: Tugs not normally required. Shore crews usually handle ship's lines. Tug may join the vessel opposite the dock. Charges for handling ship's lines.
STEVEDORES: Not normally required. When requested, stevedoring services can be obtained from Port of New Orleans; contact ship's Agents for particulars.
MEDICAL: Advance notice for personnel requiring medical service is required through ship's Agents. Hospital facilities are available.
TANKERS: 1 tanker berth, permitted draft equal to or greater than controlling depth of Mississippi River. Diameter of loading/discharge lines are 12 in. and 16 in. respectively.
DENSITY: Density in port not affected by tide. Fresh water.
FRESH WATER: Not available.
FUEL: Fuel may be loaded by barge with vessel at anchor. Fuel transfer is not permitted at dock.
FIRE PRECAUTIONS: No welding repair permitted at dockside. Fuel transfer is not permitted. No other specific precautions observed except for "no smoking" precautions, etc.
CONSULS: Consuls offices are located in New Orleans, Louisiana.
REPAIRS: Engine and deck repairs are possible when the dock is not otherwise occupied.
CERTIFICATES: Certificate of condition of cargo handling gear required when use of gear is necessary.
GANGWAY/DECK WATCHMEN: Services of watchmen desirable but not required. Port does not furnish this service.
AIRPORT: New Orleans International Airport, served by most major airlines. 55 miles from Port Sulphur.
TIME: Local time is Central Standard Time (GMT minus 6 hours), except from April/October, Daylight Saving Time is in effect.
HOLIDAYS: Vessels are loaded on all holidays.
POLICE/AMBULANCE/FIRE: Police Tel: 564-2525; Ambulance Tel: 564-2525; Fire Tel: 564-3231.
TELEPHONES: Pay telephones are available.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Immigration Form I-95.
DELAYS: Loading will not commence until all holds are clean of scale and other foreign matter.
AUTHORITY: Freeport Sulphur Company, P.O.Box 1025, Port Sulphur, Louisiana 70083. *Tel:*(504) 564-3981. *Contact:* A.W. Dow, Operations Manager.

PORT WENTWORTH, Georgia: 32.09 N. 81.08 W.

PILOTAGE: Compulsory. Pilot boards at Savannah Sea Buoy. 48, 24 and 12 hours notice required through Agent.
RESTRICTIONS: Vessels can enter and leave port during hours of darkness and at any stage of the tide, however, depth of water at River Bends controls draft.
MAX. SIZE: See "Berthing".
VHF: Pilot on Channels 16, 14 and 13.
TUGS: Tugs from Savannah assist with berthing and unberthing.
BERTHING: *Continental Can & Paper Co.:* Port Wentworth is the most inland berth up the Savannah River and is 29 miles from the entrance. Max. size of vessel so far to berth was LOA 628 ft. Pilots would accept vessels of 700 ft. LOA but would be unable to swing with this length. The berth is dredged to approximately 40 ft. for a length of 700 ft. Least depth of water in channel from sea to berth 28 ft.

Mean tidal range at berth 8 ft. to 9 ft. Nature of bottom – mud.

Vessel is able to dock at any stage of the tide, however, vessels undock on the flood to swing off berth. (Approximately one hour's flood tide required). The berth is a timber faced concrete wharf of length 240 ft. *Facilities:* There are no bulk handling facilities or quay cranes. Three mobile cranes used. There are no Ro-Ro facilities or floating cranes available. Fork lifts are available for handling reels of linerboard. There are no facilities for handling containers as berth is only used by Paper Mill.
STEVEDORES: Savannah labour used (Experts on loading paper reels).
MEDICAL: Doctor and hospital available.
DENSITY: 1001.
FRESH WATER: Not available.
FUEL: Bunker fuel oil available by barge. Diesel oil and lubricating oils also available.
SERVICES: (Available locally or from Savannah). Fresh provisions, repairs, dry dock, airport, surveyors and laundry service.
GARBAGE DISPOSAL: Service available on request at a charge.
WASTE OIL DISPOSAL: Service available on request at a charge.
SEAMAN'S CLUBS: None.
AUTHORITY: Stone Savannah River Pulp and Paper, Inc., P.O.Box 548, Savannah, Georgia 31402. *Tel:* (912) 964-1271. *FAX:* (921) 966-4342. *Contact:* J.R.Knight, Traffic Manager.

PORTLAND, Maine: 43.39 N. 70.14 W. (See Plan)

DOCUMENTS:
1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign Purchases Lists.
2 Inward Foreign Manifests uniform cargo.
Original Bill of Lading.
1 Form 1300 Master's Oath on entry of vessel.
2 Form 1374 Outward Foreign Manifest.

PILOTAGE: Ship's Agents usually notify Pilot approximately 48 hours in advance of arrival then changes are made at 24 and 12 hours. Pilot boat usually called on Channel 16 and then switched to Channel 11 to continue conversation. Pilot goes aboard ship in vicinity of the large navigation buoy using ladder on lee side. When weather bad, suggest vessel anchors approximately 1 mile North of the large navigation buoy (LNB).

Portland Pilots Inc. Tel: (207) 774-5623. Fax: (207) 774-5683.
Docking Pilots: McDuffie Pilots Inc. Tel: 781-3954.

ANCHORAGES:
Anchorage A (General): Beginning at Eastern corner of Grand Trunk Railway Company Pier No. 3 (Pier removed); thence approximately 90°, 1,700 yd. to Brooklyn Ledge Buoy 16; thence 330°, 350 yd.; thence 25°, 780 yd.; thence 303°, 750 yd.; thence 254°, 560 yd.; thence 186°, 750 yd.; and thence to the point of beginning.
Anchorage B (General and Quarantine): Beginning at Brooklyn Ledge Buoy 16, thence 58° to Little Diamond Island thence along the S.W. shore to the pier on the Southern end of Little Diamond Island; thence 143°, 1,200 yd.; thence 270.25° to House Island Light; thence along the Western shore of House Island to Fort Scammel Point Light; and thence 329°, 1,620 yd. to the point of beginning. Anchorage B is intended for general purposes, but especially for use by oil tankers and other deep-draft ships entering the harbour at night and intending to proceed to the dock allotted at daylight the following morning, or as soon as practicable. This area also is to be used for quarantine anchorage. Any vessel anchored in this area shall be ready to move on short notice.
Anchorage C: Bounded on the N.W. by House Island; on the North by a line running 90° from House Island Light to Peaks Island; on the East by the Western shore of Peaks Island, by a line running 198° from the Westernmost point on Peaks Island to Cushing Island, and by the shore of Cushing Island to its Westernmost point; and on the Southwest by a line running from the Westernmost point on Cushing Island to Fort Scammel Point Light. Anchorage C is intended for use only by small vessels and for temporary anchorage.
Anchorage D: Southerly and Westerly of a line beginning at Lighthouse Channel Buoy 1; thence 35° to Anchorage Buoy E; and thence 145° to the mainland. Anchorage D is for use only by small yachts and pleasure craft, and small, light draft coastwise freighters.
RESTRICTIONS: No entry restrictions at night. Deep draft vessels brought in on high water only.

Max. beam through bridge – 93 ft.
Max. draft through bridge – 35 ft.

MAX. SIZE: Size of vessel restricted to 45 ft. draft in harbour area. No outside installations at port at present.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tugs in Portland Harbour use Channel 7. Vessels arriving at Portland go through radio station in Chatham, Mass., RCA installations, or call station WOU via radio-telephone. VHF Harbour Control at Portland.
VHF: Voluntary reporting system in effect on Channel 13.

Channel 16, Calling & Distress Frequency, monitored 24 hours day;
Channel 22A, Main Coast Guard Frequency;
Channel 11, Portland Pilots;
Channels 7A and 78, Portland Tugboat and Ship Docking;
Channel 13, Ship to Ship.

TUGS: Tugs join vessel at Spring Point in Portland Harbour. Tugs use own lines at no additional charge. Docking Pilots not supplied by Company but are available.
BERTHING: Tidal conditions govern arrivals and departures. Depth alongside up to 35 ft.
Merrill Marine Terminal: Located in the upper Fore River. 600 ft. × 134 ft. concrete marginal wharf with 4 dolphins and provides 900 ft. berth with 35 ft. MLW and a 450 ft. Ro/Ro berth with 25 ft. MLW. 2 cranes. Liquid storage, covered storage. This Berth handles a variety of cargoes, including woodpulp, steel, fertiliser, long logs, tapioca.

This is the only general cargo facility within the Port. Located on the upper Fore River approximately one mile above the lift bridge and adjacent to the fixed highway (U.S. Route 1) and railroad bridges. Vessels normally navigate the Fore River on a rising or high tide and, depending on vessel's manoeuvring equipment (bow thrusters, etc.), either one or two tugs may be required for berthing. Vessels may dock either port or starboard side to. There is no minimum number of mooring lines required. Each berthing is handled on a case by case basis. Fresh water is available at the berth. Vessels may undock at any time and again may require the assistance of one or two tugs, depending on manoeuvring capabilities.

International Terminal: A passenger, container and Ro/Ro facility with limited cargo capability. Located immediately East of the lift bridge. Tug boats required for berthing. Wharf is a marginal wooden structure with 730 ft. of face, the Easterly 290 ft. being new concrete construction, and 35 ft. depth at MLW. Fresh water is available at the berth. Vessels may undock at any time and will require assistance of tugs.

The terminal accommodates an international ferry and Hapag Lloyd's container service.

Maine State Pier Transient Berth:

Length:	270 ft.
Utilities:	Water, sewer, reefer hook-ups, floodlighted dock.
Location:	Pier face far West end of Bath Iron Works facility.
Draft:	25 ft.
General:	Layover berth for small passenger or other vessels. Immediately adjacent to downtown area, vehicle access limited. Prior reservation required via City of Portland Waterfront Office, Tel: 207-773-1613 during working hours (0800 – 1600).

BRIDGES: No undocking on ebb tide through bridge.

STEVEDORES: 4 hours notice on ordering gangs.

MEDICAL: No advance notice required by Agent. 2 hospitals, Maine Medical Center and Mercy Hospital, who take bed patients.

TANKERS: Tankers arriving at Portland Pipe-line, Pier 2, make preparations for 2×10 in. and 12 in. hoses.

Berth	*Depth Alongside*
Clean Harbours of Maine	18 ft. MLW
B.P. Oil Terminal	34 ft. MLW
Getty Terminal	34 ft. MLW
Gulf Oil Terminal	28 ft. MLW (at bow)
Koch Terminal	34 ft. MLW
Mobil Terminal	35 ft. MLW
Northeast Petroleum Terminal	35 ft. MLW
Portland Pipe-line Pier No. 1	35 ft. MLW
Portland Pipe-line Pier No. 2	48 ft. MLW
Star Enterprise Terminal	38 ft. MLW

Shore Storage: Due to shore storage difficulties the Portland Pipe-line Authorities have requested vessels leaving Venezuelan ports for discharge at Portland to provide the following information in order to avoid ship delays at this terminal:

(a) Vessel's expected time of arrival at Portland.
(b) Quantity and grade of cargo loaded.
(c) In case of split cargoes, intended order of discharge.

The above mentioned information should be radioed to Portland Agent for forwarding to Portland Pipe-line Authorities immediately on sailing from the final Venezuelan loading port.

Report: *General/Anchorages:* Deeply laden vessels will enter Portland through the Witch Rock Channel, passing between Buoys "1" and "2", which mark Witch Rock. Lightly loaded vessels will enter through Willard Rock Channel. All vessels will pass between Portland Head and Cushing Island. The swell usually subsides near Spring Point, allowing the tugs to come alongside. Vessels bound for certain Terminals (N.E. Petroleum, Getty, B.P., Koch, Mobil and Star Enterprises) must pass through the South Portland bascule lift bridge which has a horizontal clearance of 98 ft. 2 tugs assist vessels through the lift bridge; one on the starboard bow with good backing line, the other on the starboard quarter. The bridge will not open between the hours of 0700 to 0900 and 1600 to 1800, Monday through Friday. The bridgetender can be contacted on VHF Channel 13; a minimum of 1 hour's notice prior to arrival at the bridge is desired.

Vessels proceeding to Hussey Sound to lighter will be taken by the Sea Pilot through West Cod Ledge and will enter the sound via the channel between Peaks Island and Long Island. Extreme care should be exercised while passing Soldier Ledge, a rock ledge with 40 ft. of water at MLW marked by lighted buoy "6".

N. E. Petroleum Terminal: The vessel continues approximately 1 mile above the lift bridge where it is turned to port and worked ahead into the berth. Vessels dock starboard side to with a minimum of 12 mooring lines. The terminal prefers synthetic mooring lines. The first lines positioned on the dock are the forward spring lines which are passed as the vessel moves ahead slowly. The pier is a typical wooden finger pier with 2 woodfaced steel pile breasting dolphins. Breast lines are led across the dock to wood pile clusters. Vessels dock at Slack High Water and generally can undock at any time with the assistance of 2 tugs. Upon undocking, the vessel must back into the channel and turn before heading out to sea.

Gulf/Cumberland Farms Terminal: The Terminal is located in South Portland about 1 mile outside the lift bridge. The berth consists of 2 steel breasting dolphins 40 ft. in diameter which are fendered with wood. The hose rig and manifolds are located midway between the 2 dolphins. Vessels approach the finger pier and are breasted alongside by 2 tugs. Care should be taken not to work the vessel along the pier face. Vessels dock port side to with a minimum of 10 mooring lines. The 2 stern lines lead to 2 mooring buoys. Vessels start in 3 hours prior to HW in order to arrive at the dock at HW. Vessels undock with either 1 or 2 tugs. Mooring lines should be carefully tended as strong Northeasterly winds may cause a vessel to move off the breasting surfaces.

Getty, B. P. and Koch: This Terminal is located at the extreme Western end of the Fore River, approximately 1.5 miles beyond the lift bridge and adjacent to a fixed highway and railroad bridge. Vessels transit the Fore River on a rising tide in order to dock at Slack High Water. The vessel approaches the dock slowly, in line with the pier and slightly off of the face to prevent rubbing on the wood fendering. The vessel should be stopped dead in the water and then gently breasted alongside. All vessels dock port side to with a minimum of 11 lines. Stern lines are run to a mooring buoy. Vessels undock with the assistance of 2 tugs.

Mobil Terminal: This Terminal is a marginal-type berth located on the South bank of the Fore River approximately 1.25 miles above the lift bridge. The dock has 2 breasting cells 160 ft. apart. The cells are concrete capped supported by cylindrical steel pipes. The hose gantry platform is located midway between the breasting cells and is set back 3 ft. from the outer face of the cells. The breasting cells are equipped with hard rubber fixed fendering. The mooring points for head, stern, and breast lines are smaller concrete caps supported by steel pipes. A wood walkway runs the length of the dock connecting the the concrete caps. 2 tugs breast the vessel alongside for a port side to docking. 12 mooring lines are considered the minimum acceptable. Vessels dock at HW. On departure, the vessel is worked astern and then turned off the dock with the assistance of 2 tugs.

Portland Pipe-line Terminal: Portland Pipe-line Corporation operates 2 separate finger piers in South Portland. The Terminal is the Eastern terminus of a pipeline which carries oil to Montreal, Quebec.

Pier No. 1 is the older of the 2 piers. There is a tanker berth on both the East and the West sides of the pier. Vessels dock bow in, starboard side to on the East side and port side to on the West side. On approaching the pier at Slack High Water, vessels are turned to port with the assistance of 2 tugs and are worked into the berth. Forward spring lines are positioned first. 12 mooring lines are recommended. Vessels undock with the assistance of 2 tugs at any stage of the tide. Max. size: 30,000 d.w.t. and 32 ft. draft at MLW.

Pier No. 2 consists of a 975 ft. extension to an older 1,000 ft. finger pier. There is a tanker berth on both the North and the South sides of the pier. Vessels dock bow in, starboard side to on the South side and port side to on the North side. Vessels drawing less than 42 ft. dock at Slack Water. Vessels dock at Slack Water due to the fact that the tide sets across the pier at about 1 knot. Vessels under 80,000 d.w.t. dock with the assistance of 2 tugs; vessels up to 110,000 d.w.t. may require additional tugs. Vessels make a normal approach to the finger pier, are turned to port, and worked slowly into the berth. Forward spring lines are positioned first. 12 mooring lines are considered the minimum acceptable. Vessels undock at any stage of the tide with the assistance of 2 tugs. Max. size: 124,000 d.w.t. and 45 ft. draft at MLW.

Vessels bound for Portland Pipe-line Terminal are usually brought to the inner anchorages, Diamond Island Roads, one tide before their scheduled berthing in order to dock at Slack Water.

Star Enterprise Terminal: The Terminal is located on the South side of the Fore River directly inside the lift bridge. Vessels dock with the assistance of either 2 or 3 tugs. The vessel must transit the bridge as slowly as possible for it must stop immediately after the bridge. It is then slowly turned slightly to starboard and breasted alongside the pier by the tugs for a port side to docking at Slack High Water. Vessels undock at any time with the assistance of 2 tugs and are turned before proceeding through the bridge outbound. 10 mooring lines are considered the minimum acceptable.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.

FUEL: No. 6 diesel oil and blended intermediate fuel oils. Delivery is via barge only and 24 hours notice required.

FIRE PRECAUTIONS: None – except at certain oil piers where information given to Shipmaster upon arrival at pier. Ample fire protection, salt water lines, sprinkler system on pier, local fire department.

CONSULS: Honorary Consuls for France and Sweden.

REPAIRS: Repair facilities for all types of machinery available.

DRY DOCKS: 3 basins divided into 7 berths which can handle a vessel up to 455 ft. long and 62 ft. wide (not currently activated). Also 3 other smaller marine slipways.

80,000 ton lift floating dock. Depth over keel blocks 14 m. Length 257 m. Clear width 40.7 m.

New Bath Ironworks: New dry dock in operation.

Specifications:	Clear Width:	134 ft.
	Draft:	46 ft. over 4 ft. keel blocks
	Max. Size:	LOA 1,000 ft. Beam 130 ft.
	Max. Lift:	90,000 long tons
	Dock Length:	747 ft. without outriggers 797 ft. with one outrigger.

SURVEYORS: National Cargo Bureau, Tel: 781-4467. Caleb Brett U.S.A. Inc., Tel: (207) 799-5569. E.W.Saybolt, Tel: (207) 799-1142.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew open hatches.

CERTIFICATES: Load Line Certificate, Certificate of Foreign Clearance, Ship's Safety Certificate, U.S. Tonnage Tax Certificate of previous trip if available, Radio Operator's Licence.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wine and/or Spirits, 1 bottle per person.

CARGO GEAR: Additional gear may be required for dry cargo. Vessel or agent should contact stevedores regarding same as soon as possible prior to vessel's arrival.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Portland Municipal Airport 3.5 to 4 miles distant.

HOLIDAYS: Accepted holidays: New Year's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day and Christmas Day. Stevedoring available on any of these days by prior arrangement.

POLICE/AMBULANCE/FIRE: Switchboard 775 – 6361. Emergencies 911.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

IDENTIFICATION CARDS: Form I-95 must be filled-out on arriving unless seaman has had a prior one made out for a previous arrival on same ship.

GARBAGE DISPOSAL: Several local companies available. Contact Department of Agriculture. Tel: (207) 780-3237.

WASTE OIL DISPOSAL: Several local companies available.

SEAMAN'S CLUBS: New England Seaman's Mission Inc., Boston Tel: (617) 569-6719.

GENERAL: Discussions underway with Coast Guard and other officials to install fixed lighthouse stations to replace lightships at entrance.
DEVELOPMENTS: Plans under way for redevelopment of waterfront. Plans call for deepening Fore River from 35 ft. to 45 ft.
AUTHORITY: Port of Portland, Waterfront Division, Two Portland Fish Pier, Suite 307, Portland, Maine 04101. *Tel:* (207) 773-1613. *Contact:* Thomas F. Valleau, Director. Captain Steve Richmond, Waterfront Manager.

State of Maine, Department of Transportation, State House Station No. 16, Child Street, Augusta, Maine 04333. *Tel:* (207) 287-2841. FAX: (207) 287-2896. *Contact:* R.D. Elder, Port Development Director.

PORTLAND, Oregon: 45.30 N. 122.40 W. (See Plan)

LOCATION: Portland is located 96 miles up-river from Astoria.
DOCUMENTS:

3 Cargo Manifests.
3 Stores Lists.
3 Crew Curio Lists.
3 Crew Lists.
1 Clearance from Last Port.
1 Tonnage Tax Certificate.
1 Copy of Vessel's Register.
1 Itinerary of Vessel, port by port.

PILOTAGE: Compulsory. ETA Bar Pilot Astoria at least 12 hours before arrival giving deepest draft. Bar pilotage covers from sea to the Port of Astoria, river pilotage covers from Astoria to Portland. They change from launch while steaming in channel off Astoria Buoy No. 37.

Warning: Due to heavy swells on bar during stormy Winter conditions, crossings may be temporarily suspended, therefore Masters should attempt earliest VHF radio contact on Channel 16 with Pilots or Coast Guard Station "Cape Disappointment" for latest bar conditions.

During Summer months Masters should use extreme caution in poor visibility as many small fishing craft will be encountered near mouth of Columbia River.

Also see "General – Pilotage" before first U.S.A. port (Albany).
ANCHORAGES: Vessels may anchor to await berths at various locations on the Columbia River. Usual spots are at Tongue Point Astoria, Longview and at Vancouver, Washington.
RESTRICTIONS: All vessels Masters or their Agents to obtain Coast Guard Clearance at least 24 hours before arrival. Captain of Port may impose movement restrictions if any hazardous cargo. Under 36 ft. draft no movement restrictions, 36 ft. and over up to maximum permissible draft of 39 ft. on Pilot's recommendations. Bar Pilots will take vessels up to 45 ft. draft out on HW.

No size restrictions length and beam, however, Corps of Engineers maintain only 600 ft. wide channel, therefore, deep laden vessels over 600 ft. in length to use extreme caution when turning.
MAX. SIZE: No restrictions length and breadth. Depth at Columbia River Bar 55 ft. River channel to Portland/Vancouver maintained at 40 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Portland.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

Master to radio with ETA state of crew health noting any sickness. Agent will report sickness to Seattle Quarantine Station for clearance instructions.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Route ETA cables through KLBITT Seattle, Washington.

Marine Exchange of the Columbia River District (Merchants Exchange): 24 hour marine reporting. Call sign "KDO 759". Call on Channel 16 VHF. Working (Astoria – Longview and 50 miles out to sea) on Channel 9 and (Longview – Portland) on Channel 11 and 18A.

Marine Exchange (Tel: 503 – 228 – 4361) pass messages to vessels from Agents and vice-versa. Coverage is good in river and 50 miles to seaward.
TUGS: Tugs normally join vessel at designated berth. Tugs' lines used at no charge.
BERTHING: The port operates 4 public ocean cargo terminals (Terminals 2, 4 and 5 are located on the Willamette River and Terminal 6 on the Columbia River) containing 19 deepwater berths, including 7 container berths with 8 high-speed container cranes. A new Post-Panamax crane is due to be operational late 1995. Present depths alongside berths is 40 ft. min. at MLLW.

There are general cargo berths and berths for commodities which require special handling. Port facilities include 21 transit sheds, and 8 warehouses with 2.2 million sq.ft. of sprinkler protected storage area.
SPECIALISED CARGO HANDLING FACILITIES: As well as the 8 container cranes, there are 2 Whirley cranes, 8×45 ton gantry cranes and a 175 ton mobile crane, largest of its kind on the Pacific Coast.

At Terminal 2 is a 2,535 ft. container/general cargo pier with a 40 ton, a 50 ton, a 36 ton revolving crane and an 85 ton straight line crane and 2×65 ton gantry cranes. Terminal 2 contains a Roll-on/Roll-off berth and a 400 ft. barge dock. Pier has a 27 acre open storage yard with rail and truck service. 4 straddle carriers, capable of stacking 20 ft. containers 3 high, or 40 ft. 2 high, serve the yard. Pierside warehouses and container freight station 300,000 sq.ft.

At Terminal 4 there is an 8.1 million bushel capacity grain elevator (Cargill), with box car tipper, truck dumper and barge unloading facility. There is a Dravo bulk unloader with digging capacity of 900 t.p.h. and a bulk outloader with a loading capacity of 1,500 t.p.h. Tanks are available for special cargoes such as petroleum, molassses, tallow and ore concentrates. Also available is a 120 acre open storage area and floating dock for import of automobiles (Toyota). Three general cargo berths, totalling 2,400 ft., equipped with 1×35.5 ton straight line container handling crane and 1×36 ton revolving crane. 48 acre open yard storage and 200,000 sq.ft. covered storage available.

The Terminal 5 elevator is the most modern grain outloading facility in the lower Columbia River and is operated under sub-lease by Columbia Grain Inc.

The elevator has a storage capacity of 4 million bushels and is the fastest on the river, with an outloading capability of 2,100 tonnes/p.h. The facility can receive grain by rail, truck and barge. The barge leg operates at 1,000 t.p.h., trucks are unloaded at 200 t.p.h. and railcars can be unloaded at 1,250 t.p.h.

Terminal 6 has a container pier, length 2,850 ft., with 3×50 ton and 2×40 ton straight line cranes and a 200,000 sq.ft. container freight station, 72 acres of open storage and 2 on-dock rail facilities capable of handling 60 double stack rail cars. Switching is by Burlington Northern R.R. with direct access by Union Pacific R.R. Also a 150 acre open storage area and 2 floating docks for import of automobiles (Honda and Hyundai).

Bunge Corp: Depth alongside 40 ft. Storage Capacity: 8,000,000 bushels. Receiving Capacity: Ex-barge 500 t.p.h.; ex–rail 750 t.p.h. and ex-truck 750 t.p.h. Loading Capacity: 1,800 t.p.h. (1 belt and 5 spouts).
Louis Dreyfus: Depth alongside 42 ft. Storage Capacity: 1,500,000 bushels. Receiving Capacity: Ex-barge 600 t.p.h.; Ex-rail 350 t.p.h. Loading Capacity: 1,200 t.p.h. (2 belts and 6 spouts).
BRIDGES: No arrival times designated if coming from sea and in excess of 750 tons gross. Departures regulated, with bridge closures during peak traffic flow (0700 to 0900 hrs. and 1615 to 1815 hrs.) unless permission granted by Harbour Master.
STEVEDORES: Allocation for gangs Monday to Saturday must be confirmed at 1100 hrs. to longshore hiring hall. Allocation for gangs Sunday and Monday made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. in afternoon if night gangs are to work.
MEDICAL: Any type medical treatment provided and hospital facilities available.
TANKERS:

Berth	Max. Size Vessel Length	Draft
Shell Oil Company	575 ft.	32 ft.
Standard Oil	660 ft. – 700 ft.	35 ft.
Texaco Inc.	650 ft.	30 ft.
Phillips Petroleum Co.	No maximum	30 ft.
Time Oil Co.	600 ft.	38 ft.
Mobil Oil Corp.	550 ft.	31 ft.
Richfield	600 ft.	30 ft.
Union Oil Co.	550 ft.	30 ft.

DENSITY: Fresh water at all times.
FRESH WATER: Available at most berths delivered through pier-side connections.
FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential. Also see "Notice" No. 2.
FIRE PRECAUTIONS: Fire precautions respecting tankers administered by U.S. Coast Guard, which enforces shipboard regulations under the Code of Federal Regulations, Part 46, Sub-Part D, Sections 20 to 40; the Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; Fire Marshal exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

All vessels to have towing cables rigged fore and aft on the offshore side. Cables to be made fast with the eye 1 m. above the water.
CONSULS: The following countries are represented in Portland:

Barbados
Belgium
Cyprus
Denmark
Finland
France
Germany
Great Britain
Ivory Coast
Japan
Korea
Malaysia
Mexico
Netherlands
Norway
Sweden

REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: 3 floating docks, largest 982 ft.×185 ft. clear width, with lift capacity of 81,000 long tons.
GANGWAY/DECK WATCHMEN: Option of vessel Owner/Agent and available through private firms.
OPENING/CLOSING HATCHES: While ship at dock, opening and closing is work of longshoremen. Ship may open or close own hatches while underway.
CERTIFICATES: Registered Tonnage Certificates. Certificate of Financial Responsibility (all details must agree with vessel's register).
CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.
REPATRIATION: Arrangements possible for crew changes or other repatriation.
AIRPORT: Airport 10 miles distant, served by 14 regularly scheduled passenger airlines with direct service and/or connections domestically and world wide. 17 cargo carriers also serve the area.
TIME: GMT minus eight hours. Daylight Saving Time becomes effective annually on the first Sunday in April through the last Saturday in October.
HOLIDAYS: *New Year's Day; Martin Luther King's Birthday (January 15th); President's Day (February 21st); Memorial Day (May 30th); *Independence Day (July 4th); Harry Bridges Birthday (July 27th); *Labour Day (first Monday in September); Columbus Day (October 8th); Veterans' Day (November 11th); Thanksgiving Day, *Christmas Day (December 25th), State-wide Election Days. Other legal holidays may be proclaimed by state or national authority. When holiday falls on Sunday, the following Monday is observed as holiday. Longshore work performed on any of above listed days is overtime, which is one and a half time rate. Days marked (*) are stop-work days, i.e. no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police Tel: 911; Fire Tel: 911; Ambulance: provided by several private firms, but can be obtained through police or fire number.

TELEPHONES: Available by order from terminal superintendents at $5.00 connection charge.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

IDENTIFICATION CARDS: Immigration Dept. requires Form No. I-95A and No. 31 (Repatriation). Changes can be effected at any U.S. Immigration Office.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Service available using private contractors.

Contact:
Disposal Group. Tel: (206) 892-9594.
Foss Environmental. Tel: (503) 283-1150.
Northwest Field Services. Tel: (503) 241-3827.
Reidel Environmental Services. Tel: (503) 286-4656.
Spencer Environmental. Tel: (503) 655-0896.
Western Compliance Service. Tel: (503) 682-2341.

WASTE OIL DISPOSAL: Portland Ship Repair Yard. Tel: (503) 240-3041. Fax: (503) 240-3080. Storage tank capacity 250,000 barrels.

Service also available using private contractors. Contact: Foss, Northwest Field Services, Reidel, Spencer or Western (See "Garbage Disposal" above).

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

NOTICE No. 1:

Customs of the Port: July 1993.

The Customs of the Port with respect to bulk grain and other bulk commodities handled through export grain elevators in the Columbia River District is published by the Merchants Exchange as a convenience to the trade and to facilitate commerce.

These Customs set forth the normal and customary trade practices of vessels loading in the Columbia River District, considered as one port with grain berths from Astoria, Oregon, to Portland, Oregon, including Longview, Kalama, and Vancouver, Washington.

These Customs do not, and are not intended to, supersede the basic contractual relationships between the parties (vessel, charterer, shipper, etc.). Instead, where these contractual arrangements do not cover specific local conditions, these Customs are intended to be made available for the information of and application by the parties.

SECTION 1:

Subject to the exceptions enumerated below, vessels are assigned to a berth(s) in the order in which they file with the elevator(s) as ready to load. A vessel is considered ready when it has obtained Certificate of Readiness issued by the National Cargo Bureau, Inc., and an official Certificate of Stowage Examination from the U.S. Department of Agriculture, Federal Grain Inspection Service, Inspection Division, stating the vessel is completely fit in all compartments in which it is intended to receive cargo.

Exceptions:

(a) In assigning berth to vessels at any elevator, Liners are given preference over other vessels except that any tramp vessel, whose allowed loading laytime has expired, assumes the status of a liner vessel for purposes of berth assignment (Under these Customs, the term "Liner" is a vessel sailing under an advertised Pacific Coast schedule and operated by a line maintaining regular sailings from any Pacific Coast port to named ports, and on which the total quantity of all grain to be loaded does not exceed one-half of the total deadweight tonnage of the vessel). A vessel which arrives and presents Notice of Readiness to load in accordance with these Customs, but which cannot attain "Liner" status because the allowed loading laytime is not defined in the contract between the parties, will not lose its berthing priority to a tramp vessel with later Notice of Readiness, that has gone on demurrage.

(b) An elevator may alter the turn of the vessels whenever confronted with the urgent necessity of receiving or loading any particular grade of grain, or to facilitate conditions at the elevator. When requested, elevator operator will supply written confirmation of such loading alteration as provided under these Customs and/or applicable tariff to Owner's or Charterer's representative.

SECTION 2:

(a) Normal working days are Monday through Saturday from 0800 hrs. to 1700 hrs. Exceptions are Sundays and holidays as defined in the Pacific Coast Longshore Contract Document.

(b) Overtime – is all work over 8 hours in one day, and work between 1700 hrs. and 0800 hrs., Monday through Friday, and all work on Saturdays, Sundays and holidays as defined in the Pacific Coast Longshore Contract Document.

(c) A waiting vessel – where the same holiday is observed on different days in adjoining states, a waiting vessel not knowing where it could work will observe (for laytime purposes) the holiday in the state that it first works.

SECTION 3:

If a vessel refuses to work during a normal working day, or beyond a normal working day when so required in writing by the elevator in accordance with its published tariff, it loses its turn and vacates the berth in favour of the next vessel that is willing to work overtime. The vessel so losing its turn shall be entitled to berth as soon as the berth is next available thereafter. If any vessel refuses to vacate its berth when ordered to do so under the above circumstances, the elevator may effect the removal of such vessel at the vessel's risk and expense.

SECTION 4:

The Board of Directors of the Merchants Exchange will, on an annual basis, select a mediator for the purpose of mediation or interpretation of the Customs of the Port set forth herein.

Requests for mediation or interpretation of these Customs shall be submitted in writing, stating the parties involved and outlining the facts in brief detail to the Executive Director of the Merchants Exchange. The Executive Director of the Merchants Exchange and the mediator will select the time and place for the mediation. Failure of the parties named in the mediation to respond or acknowledge the request for mediation will require the mediator to furnish his interpretation on the facts as presented by the requesting party.

Mediation fees payable to the Merchants Exchange shall be $50, plus any extraordinary charges in connection therewith, to be paid by the party requesting the mediation or interpretation.

Any requests for revisions of these Customs, to reflect new or different custom trade practices, must be submitted in writing to the Chairman of the Customs of the Port Committee with a copy to the Executive Director of the Merchants Exchange.

NOTICE No.2: Issued by the Harbour Master in August, 1980.

SUBJECT: Discontinuing Ship Repairs at Grain and Oil Docks, and Refuelling at Grain Docks.

We feel after considerable deliberation that ship repair at Oil and Grain Docks is an unnecessary hazard and should be discontinued at once.

The practice of refuelling ships at Grain Docks also would be considered taking an unnecessary risk, and as such, will be stopped.

After surveying numerous longshoremen and Grain Operators who reaffirmed this position, we are hereby notifying the concerned contractors that this will be our policy from now on.

AUTHORITY: Port of Portland, P.O.Box 3529, 700 Northeast Multnomah Street, Portland, Oregon 97208. *Tel:* (503) 231-5000. *Telex:* 910-464-5105. *FAX:* (503) 231-5332. *Cables:* Portofport. *Contact:* Mike Thorne, Executive Director.

PORTSMOUTH, New Hampshire: 43.03 N. 70.45 W.

(See Plan)

PILOTAGE: Pilot boards at entrance.

TUGS: The Port of Portsmouth is serviced by 3 regular tugs, one of 1,200 h.p. and two of 1,600 h.p. operated by the Portsmouth Navigation Division of the Central Wharf Towboat Company, Inc. Tel: 1-603-436 1209 (radio frequency 1316). Additional tugs are available in the area if needed.

The rates for moving vessels from the anchorage (1 mile South of Sea Buoy KR2) to berths in the harbour vary according to distance, conditions and tonnage of vessels. Tonnage referred to is s.d.w.t. or Coastwise, whichever greater.

BRIDGES: *Bridge Clearances:*
Memorial Bridge (lift): Horizontal 260 ft., vertical 150 ft.
ME.-N.H Bridge (lift): Horizontal 200 ft., vertical 135 ft.
1-95 Highway Bridge (fixed): Horizontal 440 ft., vertical 135 ft.
General Sullivan Bridge (fixed): Horizontal 100 ft., vertical 46 ft.
New Castle Highway Bridge (Bascule): Horizontal 29 ft., vertical 12 ft.

BERTHING:

w Hampshire State Port Authority:

Operator:	J. T. Clark & Son of N.H. Inc. Tel: (603) 436-8500. Fax: (603) 436-2780.
Location:	3 miles from Outer Anchorage (Buoy KR2).
Depth at Dock:	35 ft. (MLW).
Max. LOA:	700 ft.
Type of Pier:	Length 600 ft. Concrete and steel pile with precast concrete deck.
Products Handled:	General cargo, bulk and containerised.
Dry Storage:	50,000 sq.ft. in two sheds.
Dockside Services:	Potable water, power, telephone, stores and marine bunkers. Modern forklift trucks, bucket loaders, tractors and heavy lift cranes are permanently stationed at the facility to prevent any delays in servicing all types of vessels. The cranes range in size from 35 tons to 225 ton mobile crane. Additional mobile cranes of 165 ton capacity are readily available. A certified weighing system is located in the centre of the freight marshalling area for easy access to trucks and containers entering or leaving the terminal.
Developments:	Expansion of facilities is planned and will include a 700 ft. pier with 35 ft. at MLW and a 400 ft. pier with 25 ft. MLW for containers and project cargoes.

Storage Tank Development Corp., Fuel Storage Corp. and Sea-3, Inc.

Operator:	Fuel Storage Corp. and Sea-3, Inc.
Address:	78 Patterson Lane, Newington, NH 03801. Tel: (603) 431-6000.
Office:	889 Elm Street, P.O.Box 1032, Manchester, NH 03105-1032. Tel: (603) 622-7133.
Sea-3 Terminal:	103 Old Dover Road, Newington, NH 03801. Tel: (603) 431-5990.
Office:	144 Washington Street, Portsmouth, NH 03801. Tel: (603) 436-6225.
Type of Pier:	Steel piled cells offshore 125 ft.
Depth Alongside:	38 ft. (MLW).
Normal Ship Side to Dock:	Port.

Line Handling Boat required: Motorised shore bollards.
Access to Vessel (for stores and repairs): Trucks to shoreside, cart or hand to shipyard.
Product Handled: No. 2 oil, asphalt, MMA, propane, kerosene, low sulphur diesel.
Size and Number of Pipelines: 4 in. – 16 in.
Bbls. per hour Discharge Capacity: 12,420 bbls.p.hr.
Maximum Vessel Dimensions: 44,000 d.w.t.
Storage Capacity: 400,000 bbls.
Other Dock Users: Coastal Oil, U.S. Government, Trimont International, Cyro.

Also see "Shipmaster's Report".

Public Service Co. of N.H. Dock:
Operator: Mobil Oil Corp.
Address: Gosling Road, Newington, N.H. 03801.
Depth Alongside: 32.6 ft. (MLW).
Normal Ship Side to Dock: Port.
Access to Vessels (for stores and repairs): Limited.
Products Handled: Petroleum and liquid bulk.
Size and Number of Pipelines: Various.
Discharge Capability: 6,000 bbls.p.hr. (varies on product and tank size).
Average Distance to Storage Tanks: 0.75 miles.

Simplex Wire & Cable:
Operator: Simplex Wire & Cable.
Address: 2073 Woodbury Avenue, Newington, NH 03801.
Tel: 436-6100. Fax: (603) 427-0701.
Type of Pier: T-Shape (permanent).
Depth Alongside: 36 ft. (MLW).
Normal Ship Side to Dock: Port (bow upstream).
Line Handling Boat required: Yes.
Access to Vessel (for stores and repairs): Yes.
Product Handled: Ocean cables.

Public Service of N.H. – Schiller and Newington Stations:
Operator: C. H. Sprague & Son.
Location: 1.5 miles above the Interstate Bridge.
Distance Seabuoy to Dock: 7.1 miles.
Controlling Depth in Approaches: 35 ft.
Controlling Depth at Dock – MLW: 37 ft., ledge bottom.
Rise and Fall of Tide: 8 ft.
Products Handled: No. 4 and No. 6 fuel oil, coal, dry bulk.
Docking and Undocking Conditions: Docking is restricted to a high water operation – Pilot starting ship in from anchorage area at high water only.
Undocking: Low water slack at the dock or 1 hour before high water slack at the dock.
Length of Dock and Construction: 700 ft. with dolphins. Concrete pile, concrete decked T-head wharf with a 100×20 ft. approach.
Tugs and Line Handlers: 2 or 3 tugs used to dock and undock. Terminal personnel used as linesmen.
Bunkers: Available through 6 in. line at 2,000 bbls./hr.
Water: Supplied through 2.5 in. line.

Sprague Portsmouth Terminal:
Sprague's Portsmouth Terminal consists of approximately 8.55 acres of industrial-zoned land abutting Public Service of New Hampshire's (PSNH) Schiller Generating Station. The Terminal has 342,000 bbls. of liquid storage capacity.
Other Facilities and Services: Siwertell dry bulk material unloading system rated at 1,000 tons/hr. Vessels of up to 700 ft. length and 36 ft. draft can be accommodated.

Sprague Energy – Newington Terminal:
Operator: Sprague Energy
Address Terminal: 126 River Road,
Newington, N.H. 03801.
Tel: (603) 431-5131. Fax: (603) 431-2675.
Office: One Parade Mall,
Portsmouth, N.H. 03801. Tel: (603) 431-1000.
Type of Pier: Steel piled cells (2) and cement mooring dolphins (3). Offshore 300 ft.
Depth Alongside: 35 ft. (MLW).
Normal Ship Side to Dock: Port.
Line Handling: Motorised capstans on all dolphins. Lines handled by Sprague personnel.
Lines: 6-18 depending on size of vessel.
Access to Vessel (for stores and repairs): 5 ton vehicle or less to ship side. 5 ton vehicle or more, cart or hand to ship side.
Size and Number of Pipelines: 1×16 in., 1×14 in., 3×10 in., 1×8 in., 1×6 in.
Discharge Rate: 7,000-20,000 bbls./hr. (varies on product and tank size).
Max. Vessel Size: 736 ft. overall length.
Storage Capacity: 1,200,000 bbls.
Dockside: Potable water, pay telephone, marine bunkers (light oil only).
Other Facilities and Services: Sprague operates a dry bulk material handling conveyor system capable of handling self-unloading vessels. Receipt rate approximately 2,500 tons/hr.
Products Handled: Petroleum: No. 2 fuel oil, diesel fuel, kerosene.
Dry Bulk: Cement, gypsum, salt, aggregate.
Chemicals: Caustic soda, tallow, calcium chloride, asphalt.

National Gypsum Company:
Operator: National Gypsum Company.
Address: Michael Succi Drive, Portsmouth, NH 03801.
Tel: (603) 436-4840.
Mailing: P.O.Box 270, Portsmouth, NH 03802-0270.
Type of Pier: 2 circular marine cells, 40 ft. dia. at shore side.
Depth Alongside: 40 ft. (MLW).
Normal Ship Side to Dock: Port.
Line Handling Boat required: Motorised shore bollards.
Access to Vessel (for stores and repairs): Trucks to shoreside.
Product Handled: Gypsum ore through a conveyor system designed for self-unloading ships.
Other Dock Users: Northeast Petroleum Corp.

Granite State Minerals:
Operator: Granite State Minerals.
Address: 227 Market Street, Portsmouth, NH 03801.
Tel: (603) 436-8505.
Location: 3 miles from Outer Anchorage Buoy (2KR).
Type of Pier: Steel pile with wood deck.
Depth at Dock: 36 ft.
Max. LOA: 735 ft.
Normal Ship Side to Dock: Port.
Products Handled: Dry bulk products.
Discharge Capability: Two shoreside mobile cranes.
Storage Area: 4 acres.
Dockside Services: Water, bunkers, no shoreside electricity.
General: Granite State Minerals offers throughput of products such as cement, stone, gypsum, lumber and other dry bulk products and arranges transportation from point of origin to point of destination for most materials.

TANKERS: Also see "Berthing".

Report: Cautionary Advice – Port Approaches: Vessels approaching Portsmouth should pass South of Isles of Shoals, and, if waiting for the Pilot, anchor inside of Gunboat Shoals Buoy No. 1. Vessels should not anchor during periods of heavy swell. It is not prudent to enter port in fog, snow or when swell is running West of Whaleback Reef. Numerous small craft frequent this area during Summer months.

Tugs: 4 tugs are available at this port. Pilot acts as Docking Master and his advice should be heeded concerning number of tugs and number and placement of mooring lines.

General: Portsmouth Harbour is at the mouth of the Piscataqua River and is the approach to all marine terminals located on the river. The terminals are located above the City of Portsmouth. Vessels transiting up-river must pass beneath either 2 or 3 bridges, depending on the terminal. The first bridge is the Memorial Highway Bridge which is a lift bridge with a vertical clearance of 150 ft. in the raised position. The second bridge is the Route No. 1 Bypass and Railroad Bridge (Noble Island Bridge) which is also a lift bridge and has a vertical clearance of 135 ft. in the raised position. The third bridge is the Route 95 Bridge which is a fixed structure with 135 ft. of vertical clearance. The 2 lift bridges monitor VHF Channel 13. The minimum horizontal clearance on the bridges is 200 ft.

The Agent must notify the U.S. Coast Guard 24 hours prior to the vessel entering the harbour. The vessel must notify the U.S. Coast Guard on VHF Channel 16 upon entering the harbour. The Pilot will get a vessel under way approximately 1 hour before the tide changes in order to make a Slack Water passage. Tugs will come alongside after the vessel has rounded Fort Point.

Sea 3 Terminal: LPG vessels scheduled to discharge at this terminal must pass through all 3 bridges. The terminal is located 2.9 miles above the Memorial Highway Bridge on the South bank of the river. An exact ETA is important for LPG vessels due to the nature of the vessel's cargo and necessary notification of state, local, and federal agencies (USCG). LPG vessels must meet the following Port Regulations:

(a) Vessels move within the harbour only during daylight hours (loaded or light).

(b) Vessels move within the harbour only during periods of good visibility. If the visibility falls to less than 2 miles, vessels at sea must not enter port without the permission of the USCG Captain of the Port. If a vessel is under way within the harbour and the visibility deteriorates to less than 2 miles, the vessel must notify the Captain of the Port and then proceed to the berth or anchor as directed.

(c) Vessels must continuously monitor VHF Channel 13 while under way in the harbour. Constant communications must be maintained with the attending tugs and the USCG escort craft.

(d) Vessels transiting in-bound may do so only during periods of Slack Water. This could be either High or Low Slack Water, depending on the vessel's draft. On departure from the berth, vessels leave either at LW or 1 hour before Slack High Water (daylight only).

(e) Vessels transit the harbour with at least 4 tugs in attendance.

(f) LPG vessels should not enter the port unless the terminal is able to immediately receive cargo.

(g) On a LPG vessel's first call to the port, a USCG inspection team will board the vessel at anchorage. All LPG vessels, whether awaiting inspection or harbour transit, must anchor 1 mile South of the Sea Buoy "KR2". After the initial inspection, a vessel on future calls to Portsmouth need only send the following message to the Captain of the Port, South Portland, Maine:

"To the best of my knowledge and belief, there are no known casualties to this vessel or its machinery which might affect its seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition."

This will permit vessel to proceed to the dock for pre-transfer inspection. Failure to send the message will require the vessel to be inspected at anchor.

(h) Vessels must be prepared to get under way on short notice in case of an emergency. One "live" tug must stand-by during all cargo operations.

LPG vessels transit Portsmouth Harbour and the Piscataqua River escorted by a USCG vessel with 4 tugs in attendance. The marginal-type dock consists of 3 concrete cells connected by catwalks. The 4 tugs breast the vessel alongside for a port side to docking. The bow is worked in first while head and forward breast lines are positioned and secured to the bitts. The stern is then worked alongside and the remaining lines positioned. This allows for the required tension on the long mooring leads forward. 20 mooring lines are considered the minimum acceptable as the ebb current forces the vessel off the dock and the bow has a tendency to yaw with the current. All moorings lines must be carefully tended. Light vessels undock with 3 tugs; vessels departing with part cargo must use 4 tugs to undock.

Also see "Shipmaster's Report".

New England Tank Industries – Newington: Located approximately 10 miles rom the Sea Buoy in the Piscataqua River. Vessels generally dock and undock with the assistance of 3 tugs. Vessels are breasted alongside by the tugs for a port side to docking. 12 mooring lines are considered to be the minimum as current can reach 8 knots especially during Spring freshets. Vessels dock and undock day or night. Vessels are turned off the dock or in the turning basin upon undocking after discharging.

Northeast Petroleum – National Gypsum: Located on the West bank of the Piscataqua River below and adjacent to the Route 95 Fixed Bridge. The berth is approximately 5 miles from the Sea Buoy and is above the City of Portsmouth. The marginal-type dock consists of 2 breasting cells set on 163 ft. centres. The hose gantry is mounted on a third cell which is set back 4 ft. from the face of the breasting cells.

Both breasting cells are fitted with hard rubber fixed fenders. A gypsum unloading conveyor gantry is located at the South end of the pier but the structure does not interfere with tanker operations. The mooring line lead to the shore mooring point is approximately 115 ft. Vessels dock day or night with the assistance of 2 tugs. The tugs breast the vessel alongside for a port side to docking. 17 mooring lines are considered to be the minimum acceptable. Vessels undock with the assistance of 2 tugs and are turned below the berth. Due to the strong river currents and the close proximity to the navigational channel, lines must be tended closely.

C. H. Sprague & Son – Company Shiller Station: Located on the South side of the Piscataqua River about 7.1 miles above the Route 95 Fixed Bridge. The dock consists of a concrete pile, concrete decked 'T'-head wharf and dolphins. The overall length of the dock with the dolphins is 700 ft. Pilots start vessels in from the anchorage area at a suitable time in order to dock during Slack High Water. Vessels dock and undock with the assistance of either 2 or 3 tugs. Vessels dock port side to using approximately 14 mooring lines due to the extreme currents experienced during maximum stages of ebb and flood. After completion of discharge, vessels are turned in the turning basin or off the dock. Vessels undock either at Slack Low Water or 1 hour before Slack High Water. As with other terminals, mooring lines must be closely tended at all times due to the strong river currents.

Tides and Depth of Water: Tidal currents are very strong in the Piscataqua River, averaging between 3 – 5 knots. Spring freshets increase this current. Eddies form around most of the berths making slack tide berthing mandatory. Tidal range is 8.1 ft.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Facilities available.

BANKS: First National Bank of Boston. Tel: (617) 434-3770.
First National Bank of Portsmouth. Tel: (603) 436-7700.
Maine National Bank. Tel: (207) 439-0451.

GENERAL:

VESSEL ARRIVALS AND DEPARTURES

Marine Section, Federal Building, Room 103, Portsmouth. Tel: (603) 436-7620, ext. 737.

District Office (Portland, ME): Tel: (207) 780-3328.

COMMERCIAL VESSELS, ARRIVALS & ENTRY

Report of Arrival: These vessels must report arrival to a U.S. Customs Officer within 24 hours (19 U.S.C. 1433):

A. Vessels arriving at any port or place in the U.S. from any foreign port or place (refers to domestic and foreign vessels);

B. Domestic vessels arriving at any port or place in the U.S. from another U.S. location with bonded merchandise or foreign merchandise for which entry has not been made. Failure to report results in penalties.

Entrance: Within 48 hours of arrival from a foreign port, the Master is required to make entry of his vessel, even though the vessel may be at anchor awaiting berth. Foreign flag vessels arriving in ballast from another U.S. port must also make entry within 48 hours of arrival. When vessels which have residue foreign cargo and/or passengers on board arrive from another U.S. port, entry should be made within 24 hours.

Vessels arriving from a foreign port must have made either Preliminary or Formal entry prior to transacting any type of business or permitting anyone on board other than Customs, Immigration, Agriculture, Public Health, and Agent's personnel. Vessels arriving from another U.S. port to discharge cargo must make Preliminary or Formal entry prior to discharging cargo.

Foreign non-commercial vessels are also required to make entry. In Portsmouth this will be done on board at the time of boarding by Customs. The Officer will provide necessary forms and assistance. Non-commercial vessels may contact the New Castle Coast Guard Station for assistance in obtaining a Customs Officer.

WARNING REGARDING SEA STORES

(U.S. Dept. of Agriculture, Animal & Plant Health Inspection Service)

You are hereby warned that WHILE YOUR VESSEL IS IN THE TERRITORIAL WATERS OF THE U.S., regulations of the Department of Agriculture **prohibit** the unloading for any purpose of:

1. Fresh, chilled or frozen meats;
2. Undrawn poultry carcasses;
3. Plants or plant products, including fruits or vegetables;
4. Garbage, consisting or contaminated with scraps, parts or other waste of meats, plants, fruits, and vegetables.

DEVELOPMENTS: The Port Authority has developed a comprehensive plan for maximum utilisation of existing space on a phased basis. An integral part of that plan is another docking facility, 1,000 ft. long with a depth of 35 ft. alongside at MLW. This new docking facility will provide additional berthing space for new users as well as prevent costly delays due to terminal congestion. The Port Authority is also planning to develop approximately 10 acres of new land from a tidal basin adjacent to the present facility. This area will be used for open as well as enclosed throughput storage.

Also see "Berthing".

SHIPMASTER'S REPORT: February 1983.

Sea-3 Terminal:

The vessel arrived off Portsmouth N.H. on the 2nd February, at the entrance to which port the Pilot boards, to take vessels up river to Newington. At the arrival time a S.E. gale was in force, so the passage was ended at 2400 hrs. and the vessel stood some 20 miles off the coast waiting for the weather to abate, as I considered it unwise to proceed to the waiting area to anchor; as the holding ground is not good, and in S.E'ly winds there is no shelter. The vessel cruised around at reduced speed until the following day.

At 1450 hrs. on the 3rd February, with the weather, and sea conditions much improved, the vessel anchored 1 mile South of Kitts Rock No. 2 Buoy (KR2). Two U.S. Coast Guard officers boarded from a local harbour tug after some difficulty in coming alongside, due to the ground swell that was still running. The Officers carried out an inspection of all cargo handling equipment, and shut down systems. The Coast Guard officers then granted permission for the vessel to enter the Port of Newington, and disembarked at 1715 hrs.

As there is a port regulation that no LPG carrier can move during the hours of darkness, and that large vessels can only dock, and undock during slack water periods, it was necessary to wait until the following morning before docking.

At 1020 hrs. on the 4th February the Pilot boarded. At 1040 hrs. anchor aweigh, and the vessel proceeded up river. At the mouth of the river there is a shallow patch with only 35 ft. over it at low water. This left only 5 ft. clearance under the keel, and the vessel had to proceed very slowly over it. Four tugs were made fast, 2 for'd and 2 aft, and a U.S. Coast Guard cutter escorted the vessel up-river. The river is narrow, with some very sharp bends. There are 3 bridges, with the port limitations governed by the Noble Island Bridge. The vertical clearance on this bridge is 135 ft., and the horizontal distance is 200 ft. Maximum draft loaded, and on high water is 36 ft. On approaching this bridge it was necessary to let go the 2 for'd tugs, and allow them to pass through the bridge first, making them fast again when the vessel has passed through.

The vessel docked at Sea 3 Terminal, at 1315 hrs. 4th February. The berth constructed from 3 cement and steel dolphins, joined together by a steel platform. It stands about 150 ft. out in the river, and is connected to the shore by a narrow footbridge. The mooring arrangements for a vessel of this size are poor. There is not sufficient leads on the head lines or stern lines due to the way the mooring bollards are placed on the shore, and all the weight is taken on the spring lines. Recommended mooring arrangements as supplied by the Port Authority (See "Plan"). On the full run of the tide the water runs at up to 4 knots alongside, and because of this there is a port regulation that a tug must stand-by at all times while the vessel is alongside. The cost of this tug, on this call was U.S.$300 per hour, which can add a considerable amount to the overall cost of calling at Newington.

Before loading commenced, a liquid and vapour return line were connected. At 1530 hrs. on the 4th February loading commenced. The vapour return line proved very important as it appeared there was a large percentage of impurities in the product received judging by the performance of the vessel's reliquification plant. It was necessary to return a considerable amount of vapour to the shore tank during loading operations. I issued a Letter of Protest, to the Terminal Manager protesting the quality of the product.

On docking, the vessel was again boarded by the U.S. Coast Guard, and further inspections were carried out. The Coast Guard personnel remained on board throughout the loading operation; sometimes as many as 6 Officers, but never less than 3 at any one time. It was explained to me by their Commanding Officer that some of the personnel had no experience of LPG vessels, and were on board to learn. In this respect the ship's Officers gave all assistance possible in showing them around. The loading rate was slow, only reaching an average of 400 tonnes/p.h. on full rate, and the shore installations could not supply the product any faster. Loading was completed at 0730 hrs. on Monday, 7th February when the cargo loaded was estimated as follows:

Ship's figure: 23,965.127 tonnes
Surveyor's figure: 23,901.602 tonnes
Shore figure: 23,828.614 tonnes (taken from shore tank gauge reading)

The draft on completion was 33 ft. 00 in. for'd., 34 ft. 08 in. aft.

Owing to port regulations the vessel had to remain alongside until the next daylight high water which was at 0800 hrs. on the 8th February. The vapour return line remained connected during this time, as regulations prohibit releasing uncondensables to the atmosphere, and in view of the impurities in the product it was found necessary to use this vapour return line.

At 0745 hrs. on the 8th February while the vessel was preparing to sail, a Coast Guard Officer boarded and informed me that the visibility in the river was less than 2 miles, and the U.S. Coast Guard would not grant permisson for the vessel to sail. Heavy snow had fallen throughout the previous day, but had cleared during the night, and the visibility at the vessel was over 2 miles. Evidently further down river it was still snowing, and visibility was restricted. The vessel had to remain alongside until the next daylight high water which was 0900 hrs. on the 9th February.

At 0715 hrs on the 9th February while preparing the vesel to sail, the vapour return line was disconnected, and a further survey of the product on board carried out. The result was as follows:

Loss of product as found by ship: 50.283 tonnes
Loss of product as found by Surveyor: 52.568 tonnes

At 0855 hrs. on the 9th February the vessel sailed for the Panama Canal. She was assisted by 5 tugs, as both the Pilot and the U.S. Coast Guard insisted on an additional tug being employed for the down-river passage as the vessel was deep loaded. There was no difficulty in leaving the berth. All stern lines were let go, and the vessel's stern allowed to swing out into the river, while still made fast for'd, with all weight coming on the for'd spring lines. When the vessel was at right angles to the dock all lines were let go, and the tugs pushed her around until she was heading down river. The river passage went without incident, and the Pilot disembarked at 1037 hrs. when approaching Kitts Rock No. 2 (KR2) buoy. The passage commenced at 1100 hrs on the 9th February, 1983.

AUTHORITY: New Hampshire State Port Authority, Port of Portsmouth, 555 Market Street, Box 506, Portsmouth, New Hampshire 03801. *Tel:* (603) 436-8500. *FAX:* (603) 436-2780. *Contact:* Ernest Connor, Port Director. Captain Thomas Orfe, Harbour Master: Tel: (603) 436-8500. Geno J. Marconi, Operations Manager.

PROVIDENCE, Rhode Island: 41.48 N. 71.23 W.

(See Plan)

PILOTAGE: Compulsory. Pilot boards 1 mile South of Brenton Reef Light Tower (position: Lat. 41° 25' N., Long. 71° 23' W.). Send ETA to Agent 24 hours prior to arrival. Pilots (call sign "Rhode Island Pilots") on Channels 16, 12 and 18A.

ANCHORAGES: There is no port anchorage for dry cargo vessels. It was reported that tankers can discharge into barges off Newport.

RESTRICTIONS: Vessels can enter and leave at any stage of the tide, day or night.

MAX. SIZE: Pilot advised max. draft is 38 ft., however, Agent recommends 38 ft. with 2 ft. keel clearance.

RADIO: Station WCC.

VHF: Port Authority on Channels 16 and 18A. Agent on 16, 18A, 13 and 9. Also see "Pilotage".

TUGS: 9 tugs available, 1,600 h.p. – 3,200 h.p. Vessels may dock and undock without tugs, however, they are required for turning in the harbour.

Providence Steamboat Company serving Ports of Providence, Narragansett Bay, Fall River and New England Electric at Brayton Point. 4 tugs – 24 hour dispatching service. 2×3,000 h.p. tugs.

BERTHING: *Municipal Pier No. 6:* The berth is the first port hand berth when entering Providence. Distance from entrance to berth 25 miles. Length and beam no limit. Max. draft 38 ft. Least depth of water in channel from sea to berth reported to be 40 ft. Mean tidal range at berth 4.5 ft. Also see "General".

Cargo Handling Facilities: Mobile cranes only available for handling bulk steel and scrap cargoes. 6 mobile cranes, capacity 100 tons to 250 tons. No Ro/Ro facilities. No floating cranes. There are facilities for handling 20 ft. and 40 ft. containers, also sufficient storage space. There is also adequate storage space for breakbulk and palletised cargoes.

MEDICAL: Doctor and hospital available.

TANKERS: LPG/LNG carriers – see "Shipmaster's Report" dated February 1985.

Report: *American Chemical-Wilkes Barre:* General: The Wilkes Barre Terminal of the American Chemical Company is located 26 miles from the Sea Buoy on the Providence River. This facility was formerly operated by Exxon Company, U.S.A. It is now operated by Union Oil Company of California and Getty Oil Co., Inc. The wharf has a 75 ft. face, 300 ft. with dolphins; 30 ft. depth alongside. Deck height of 9 ft.

The berth can accommodate vessels up to 600 ft. in length, 85 ft. beam, maximum 25,000 d.w.t., and maximum drafts to 27 ft. Docking is accomplished at HW or rising tide only. Undocking can take place at any state of the tide.

Pilotage and Docking: The services of a Pilot and Docking Master are recommended. The width in the existing berthing area and required approach manoeuvres make utilisation of the Docking Master mandatory. 2 tugs are required when docking vessels of any tonnage. A minimum of 1 tug (1,800 h.p.) is required when undocking. During strong Southerly winds 2 tugs shoud be employed for undocking.

Mooring: Normal mooring leads are adequate for this berth. However, strong Southerly winds are cause for concern. There is a poor lead for the after spring and breast lines. During times of excessive Southerly winds, all lines should be tended and checked frequently. The terminal does not provide a gangway.

Only No. 2 heating oil is discharged at this terminal. Discharge is accomplished through 2×8 in. hoses using ASA flange connections. Pumping pressure is 125 p.s.i. The terminal has no facilities for receiving ballast or slops.

Amoco – Providence, Kettle Pt.: General: The Amoco Wharf is on the East side of Providence River 26 miles from the Sea Buoy. This wharf is used for the receipt and shipment of petroleum products. The berth is aligned North and South with a total of 6 wooden breasting dolphins. The wharf has a 500 ft. face (600 ft. with dolphins). Hose rig and hoist are located on a "T" head 90 ft. long, 30 ft. wide at the centre of the pier.

Entering and Docking: 2 mooring dolphins located approximately 90 ft. inside the main pier and used for fore and aft breast lines, head lines are run to a mooring dolphin, and stern lines to bollards located on shore.

Vessels can dock either port or starboard side to but a starboard side berthing is preferred. Deep draft vessels dock on Slack High Water only, day or night, and can unberth at any stage of the tide any time.

Depth of water alongside the berth is 35 ft. MLW. Average tide at Providence is 4 ft. 6 in.

A Docking Master is recommended. Docking should not be attempted without local knowledge. 2 tugs are used for docking under normal conditions. One tug is used for normal undocking. Both tugs and Docking Master meet the vessel 0.5 miles below Kettle Point and assist vessels to the berth.

Gasoline, heating oil, diesel, and No. 5 fuel are all discharged through 8 in. hoses. All connections are made with ASA flanges. Maximum pumping pressure for all cargo lines is 90 p.s.i.

Gulf – Gulf Oil Pier: General: The berth projects Westerly into the river for a distance of 800 ft., and is 50 ft. wide, wooden piling, open faced construction, and wooden decked, terminating in a "T" head 90 ft. long and 30 ft. wide which is aligned North and South.

There are a total of 6 wooden piling breasting dolphins, 3 on each side of the "T" head for a total face of 280 ft. The hose rig, hoist, and discharge heads are located at the centre of the "T" head.

Entering and Docking: Vessels can berth heading either North or South, but a starboard side-to or up-river berthing is preferred. Bow, stern, and breast lines are run to mooring buoys.

Vessels can dock day or night, any stage of the tide, depending on draft. The depth of water alongside the berth is 35 ft. MLW.

In this area local features are such that current movement in particular is subject to considerable distortion.

This berth can accommodate vessels up to 675 ft. in length, maximum 100 ft. beam and maximum draft to 31.5 ft. at MLW. Docking should not be attempted without a Docking Master. 2 tugs are employed for docking and undocking all vessels. Tugs and Docking Master meet the vessel in the vicinity of Kettle Point and assist the vessel to the berth generally with the starboard side alongside the berth. Head lines and stern lines are run out to mooring buoys. Forward and back spring lines are run out to the "T" head. The terminal does not provide a gangway.

Mobil – South Terminal: General: The Mobil Oil Corporation Terminal is located 25 miles from the Sea Buoy on the Eastern side of the Providence River. This facility is used for the receipt and shipment of petroleum products and bunkering vessels.

Maximum size of vessels that can be accommodated at this facility include lengths up to 750 ft., beams to 125 ft., 50,000 d.w.t. maximum, and drafts to 39.5 ft. The water at this berth is brackish. Distance from bow to manifold is limited to 390 ft. Docking is done at HW only day or night.

Entering and Docking: The services of a Docking Pilot is both compulsory and recommended. 2 tugs are used for docking and one tug for undocking. Tugs and Docking Master meet incoming vessels in the vicinity of Sabin Point and assist vessels to the berth for a starboard side docking. If a port side landing is required, vessels proceed about 1 mile beyond the berth to Fox Point Reach and turn around. Normal mooring leads are used at this berth. No gangway is provided by the terminal.

C. H. Sprague: General: The C. H. Sprague and Son Terminal is located 26 miles from the Sea Buoy at the Allens Avenue Terminal.

The main pier projects Easterly into the river and is 526 ft. long and 37 ft. wide, wooden piling, open faced construction. A turning dolphin, concrete crown, wooden fendered, and connected by a walkway extending out from the main pier an additional 75 ft. and fitted with 2 bollards, making for a total face of 601 ft. The berth also has 3 unloading towers serving a belt conveyor system.

The South side of the pier is not used and has a depth of 12 ft. to 14 ft. alongside. The North side has a depth of 35 ft. LW, but commences to shoal up 35 ft. from the inner bulkhead.

Vessels up to 650 ft. in length, maximum beams of 100 ft., and drafts at MLW of 35 ft. can be accommodated at this terminal. Maximum deadweight of vessels at this terminal is 38,000 d.w.t. The water at this terminal is brackish.

Ships having a large flared bow should exercise caution as the loading towers extend over the pier, and in light condition the ship has to be given a 3° list before undocking.

Maximum limit bow to manifold is 380 ft. There are 4×8 in. hoses and 2 lines, 1×18 in. for No. 6 fuel and 1×12 in. line for heating oil. Vessels scheduled to call at this terminal should have hose derrick ready for lifting the hose as there are no facilities on the berth for this operation.

Deep draft vessels dock day or night, HW only, and undock anytime, any state of the tide.

Entering and Docking: A Docking Pilot is not compulsory but is recommended. Docking should not be attempted without local knowledge. 3 tugs are used for docking all vessels and 2 tugs are used for undocking all vessels. Tugs and Docking Master meet incoming vessels in the vicinity of Kettle Point and manoeuvre vessels to the berth. Normal mooring leads are used at this berth.

Normal docking is done port side to. The terminal does not provide a gangway.

Texaco/Curran: General: The Texaco/Curran Terminal is located 26 miles from the Sea Buoy at the Allen's Avenue Terminal.

The berth projects Easterly into the river for a distance of approximately 100 ft. and is 70 ft. wide, wooden piling, open faced construction, concrete decked for the first 800 ft. and the remainder of the dock is wooden decked.

The South side has a total of 3 wooden pilings, concrete crowned 20 ft.×20 ft. breasting dolphins, wooden fendered for a total face of 500 ft. Usable length of the berth on the South side is 650 ft. for fully loaded vessels and 700 ft. for partially loaded vessels and a controlling depth of 32 ft. MLW.

The hose rig hoist and discharge headers on the South side are located on a 60 ft.×25 ft. concrete platform 35 ft. from the extreme Eastern end of the pier, and is used by Texaco.

The North side of the dock has a turning dolphin at the extreme Eastern end of the pier, open faced wooden piling construction with a 12 in.×12 in. chafing string piece.

The North side has a usable length of 650 ft. for fully loaded vessels and 700 ft. partially loaded. A controlling depth of 32 ft. MLW. The hose rig and discharge headers are located 320 ft. from the extreme Eastern end of the pier and is used by Curran & Burton.

Vessels up to 700 ft. in length, beams of any width, drafts to 32 ft. at MLW, and 35,000 d.w.t. maximum can be accommodated at this berth. Vessels normally dock at HW, day or night, and undock at any stage of the tide. Water at this berth is brackish.

Entering and Docking: The services of Docking Master are not compulsory but are recommended. Docking should not be attempted without local knowledge. Docking Master and tugs meet the vessel about 0.5 miles below the berth and proceed to off the berth where the vessel is turned 90° and manoeuvred into the berth for a starboard side landing. 2 tugs are used for all vessels and 1 tug is used for all undockings under normal conditions. Normal mooring leads are used at this berth.

Cargoes handled at this terminal include heating oil, kerosene, gasoline, jet fuel, diesel fuel, and avgas. Sizes of cargo lines are 6 in., 8 in. and 10 in. All connections are ASA bolted connections. Maximum pumping pressure on all lines is 100 lbs.

DENSITY: 1016.

FRESH WATER: Available, rate 15 t.p.h. – 30 t.p.h.

FUEL: Bunker fuel oil available if vessel has contract. Diesel oil not available. Lubricating oils available.

REPAIRS: Minor repairs possible, machine shop available.

AIRPORT: At Green Airport, Providence, R.I.

SURVEYORS: At Rhode Island.

GENERAL: *Quay:* Granite slab construction with a wooden pile facing. A large number of the piles are missing but there are still sufficient to land on. Surface of quay looks very rough and covered in sand and earth but it is metalled under this and will take heavy mobile crawler cranes.

Ship Chandler: Satisfactory, prices reasonable.

Laundry: Satisfactory and prices reasonable. Laundry collected Saturday 1430 hrs. and returned Sunday morning.

SHIPMASTER'S REPORT: September 1982 (Updated 1990).

Documents: The same as for other U.S. ports.

Pilotage: (Serving all ports in the Narragansett Bay area).

Pilot boards near Brenton Reef Light structure. There is a 24 hour service. Cable address for Pilots is "Rispilot Providence". Pilot launch as well as their shore establishment have VHF and operate on Channels 16 and 10.

Anchorages: There are a number en-route to Providence. Our vessel anchored off Jamestown for 3 days in a well sheltered place and good holding. Max. draft allowed I was informed is about 36 ft.

Berths: There are a number of isolated tanker berths in and around Providence, details of which are found in the Sailing Directions.

A total of 6 berths comprise the Municipal Docks. There are 2 cargo storage sheds, one of recent construction. There are 2 Alliance container gantry cranes.

Fresh Water: Fresh water is laid on to the quay.

Stevedores: Normal cargo working is from 0800 hrs. – 1700 hrs. (Monday to Friday), overtime can be worked until 1900 hrs. and also weekends.

Cargo-Imports: Mainly automobiles from Japan, containers from feeder vessels, steel, lumber and general cargo from Europe by regular liner trade.

Cargo-Exports: Scrap steel, logs, timber and latterly waste paper.

Our vessel loaded a full cargo of wastepaper (cardboard) of almost 12,000 tons. Stowage factor was 135 cu.ft./tonne. 1,400 tons were stowed on deck suitably lashed and covered. The whole cargo was loaded in 27 working days using ship's cranes. Sizes of paper bales varied immensely with weights ranging from 500 kg. to 800 kg.

Bunkers: Not available.

Repairs: Main repair facilities are at Providence.

General: It was found difficult to bring the vessel alongside the quay at Berth No. 3 during the whole stay in port. This was due to strong water outlets on the quay face from the adjacent sewage works.

Vessel should be amply moored to compensate for strong off-shore winds which are quite common even in Summer.

SHIPMASTER'S REPORT: February 1985.

Port Limits: Entrance to Narraganset Bay, Brenton Tower.

Documents: Standard for U.S.A. Customs & Immigration. Coastwise documents are sufficient if coming from a U.S. port, no others are asked for.

Pilotage: Rhode Island Pilots, arranged via Agents, require 8 hours' notice. Board off Brenton Tower, listen VHF 16.

Anchorage: Can be obtained 1.5 miles S.E. of Brenton Tower but bottom is rock hard and holding will be doubtful in bad weather. There are allocated anchorages within Narragansett Bay.

Restrictions: Vessels can enter/leave at any time except for LNG/LPG Tankers. These must transit in/out in daylight only, whether they have cargo onboard or just cooldown 'heel' remaining. LPG Tankers are provided with a Coast Guard escort vessel, which creates a Safety Zone 2 miles ahead and 1 mile astern, keeping all other traffic clear.

Max. Size: 35 ft. draft was quoted; this vessel went in at 30 ft. comfortably.

Health: Standard U.S.A. requirements.

Radio: WCC Chatham.

VHF: All Channels used as necessary, no special allocation. "Securite" messages for LPG Tanker transit are broadcast on Channels 13 and 16.

Radar: No radar surveillance or Vessel Traffic Scheme (VTS) Control.

Tugs: Join off berth, using their own lines.

Berthing: LPG (Propane) is discharged at Municipal Wharf No. 5, with empty oil drums providing a safety area around the shore manifold, as this is a Public Wharf with free access.

Moorings were adequate, 2 headlines, 1 breast line, 2 springs forward and similar aft, the berth being a continuous quay with rubber tyre fenders.

Bridges: One vertical bridge, clearance 194 ft.

Medical: All facilities available.

Tankers: LPG discharged at No. 5. Municipal wharf at a bulk rate of 750 tonnes per hour, through a 10 in. Chicksan. This Chicksan is a mobile one connected temporarily into an underground line, and jacked up off its wheels; thus it is rather fragile and demands precise positioning during berthing, and careful control of the list during the discharge as it is at its maximum reach when a 60,000 cu.m. vessel is in ballast.

Density: Salt.

Fire Precautions: LPG Tanker, only those imposed by the ship.

Surveyors: Saybolt attended this LPG vessel on behalf of receivers.

Gangway/Deck Watchmen: None. Ship's accommodation ladder was used to the wharf.

Customs Allowances: Usual U.S.A. allowances but no check of bond made on this visit.

Repatriation: Local Airport with services to Philadelphia for International flights, or by bus – approximately 1 hour ($7.00) to Boston International.

Airport: See above.

Time: GMT minus 5 hours. Eastern Daylight Saving Time GMT minus 4 hours in the Summer.

Emergency: U.S.C.G. "Castle Hill" on Channel 16 VHF, working 22A or 12.

Telephone: At Municipal Wharf No. 5 there is a public telephone booth within 250 ft. of the foot of the gangway, against the wall of a warehouse.

Storing: No known restrictions.

Shore Leave: Bus route into town (2 miles) about 100 yards from Wharf No. 5.

Identification Cards: Standard U.S.A. Immigration requirements.

Regulations: All LNG/LPG Tankers have to anchor off Brenton Tower for U.S.C.G. inspection (2 – 3 hours), even those with valid letters of compliance and if no LOC then the inspection could take about 6 – 7 hours. During the discharge of LPG, 2 U.S.C.G. personnel are permanently stationed by the shore manifold, and do occasional spot checks onboard.

Delays: See above.

SHIPMASTER'S REPORT: October 1991.

Pilotage/Anchorage/Channel/Tugs: See "Fall River" – "Shipmaster's Report – dated 1991".

Berth: Vessel berthed at Municipal Wharf No. 5 to discharge latex.

Vessels can berth either side alongside and generally avoid berthing at night time (1700 hrs. – 0600 hrs.) due to the very high cost of the linesmen. Daytime charge is U.S.$1,000.00 and nighttime charge is U.S.$2,000.00.

The depth alongside is approximately 40 ft. and the tidal range about 4 ft. The fenders and bollards are in good condition and the vessel secures with 2 headlines, 2 breastlines and 2 springs forward and 2 springs, 2 breastlines and 2 sternlines aft.

The quay is a flat open quay with the latex manifold sunk into the quay. The tanks with a total capacity of 300,000 U.S. gallons (10,500 tonnes) are above ground.

Shore pumps and lines are used for discharge of cargo and the ship's crew are required to tend the lines.

A brow gangway is required due to the high quay face.

The berth is good for storing as trucks are allowed alongside the vessel.

LPG is also discharged at this berth using portable Chicksans and then to adjacent tank.

Density: The density at L.W. was 1019.

Fresh Water: Fresh water is available and the quality is excellent. Hoses are provided by the Port Authority and the rate of loading was about 100 tonnes/hr. Cost of water is U.S.$0.75 per tonne plus a standard labour charge of U.S.$130.00.

Fuel: IFO and MDO available at Providence by tanker truck of 31 tonnes capacity. No barge delivery service at the port.

Supplies: Fresh produce is available and of good quality and reasonable price.

Airport: T.H. Green Airport is about 10 miles South of Providence and operates services to New York and Boston.

AUTHORITY: Port of Providence, Marine Terminal Building, Municipal Wharf, Providence, Rhode Island 02905. *Tel:* (401) 781-47

Contact: John D'Artuono, Port Director.

RED DOG (Kivalina), Alaska: 67.33 N. 164.12 W.

(See Plan)

LOCATION: Situated in Lat. 67° 34' 42" N., Long. 164° 03' 30" W.; Northeast of The Bering Strait near a small town, Kivalina, Alaska. This port is capable of exporting some three quarters of a million tons of zinc and lead concentrates annually for shipment during the Summer season.

DOCUMENTS: See "General".

PILOTAGE: A compulsory pilotage area has been established for vessels calling and leaving from the Red Dog Anchorage. The Pilot Station is located approximately 14 miles, bearing 238° (T), from the barge loading dock. Vessels bound for Red Dog should amend their ETA to Pilot Station as necessary and keep North Pacific Maritime, Ketchikan, Alaska, Cable "Sousteve Ketchikan", Telex: 099-55295, Fax: 907-225-8254, well posted of any change.

The Pilot will normally board via a tug from Red Dog. A combination pilot ladder must be properly rigged 2.0 m. from sea level and, in case of arrival during hours of darkness, adequate lighting must be provided. If, because of adverse weather (or for any other reason) the Pilot is prevented from boarding the vessel at the scheduled time, Masters are to obtain permission and instructions from Red Dog Port Control prior to entering the pilotage area and proceed to the assigned anchorage position.

ANCHORAGE: An anchorage, nominally 2.5 by 2.5 miles, has been allocated to the loading of vessels; the Easternmost side of it lies about 3.4 miles from the barge loading pier, and anchorage may be reached from the open sea via a surveyed approach 10 miles long and 1 mile wide with its main axis bearing 058.75°/238.75° (T).

Water depth at the anchorage varies from 55 ft. inshore to 72 ft. offshore (17 m. to 22 m.), and likewise the surveyed approach changes depth progressively with a slight gradient.

There is a steady current at the anchorage that runs parallel to the shore in a Northwesterly direction, and vessels will tend to lie head into this predominant feature.

Although the anchorage can accommodate more vessels, usually no more than 2 vessels will be anchored at any one time, leaving ample room for final manoeuvering, safely mooring and lying at anchor. The seabed in this area is flat, comprising of silty sand with a firm muddy strata lying just below, and has proved excellent holding ground. Vessels can safely withstand winds of up to 45 knots.

The sea swell, when not coming from the 3rd and 4th quadrant, is short and lacks effective energy, and pitching, if any, is minimal.

An anchor chain length of no less than 8 shackles should provide ample holding with the second anchor kept ready to be lowered to the bottom to reduce yawing, should squally conditions develop.

With vessels loading at a maximum draft of 45 ft. or 13.72 m., it is intended that the underkeel clearance will be no less than 10 ft. at all times. However, in line with the customary safety precautions to be taken when loading in an open roadstead, Masters are requested to frequently check their vessel's position visually and by reference to radar, water depth and draft, making regular entries in the log book. Taking into account the visual position fixing aids presently available, the occurrence of lateral drift or dragging can best be detected through observing a permanent radar watch, keeping the secondary radar unit on constant stand-by. We also recommend that engines be kept on permanent short notice stand-by, and the vessel be ready to weigh anchor and shift to a position further offshore, should weather conditions deteriorate sufficiently to warrant it.

Also see "Berthing".

NAVIGATION: *Navigational Charts and Red Dog Port Site Plan:* Navigation and approach to the Red Dog Anchorage are covered by NOAA Chart No. 16005. However, with a scale 1:700,000, it was decided to supplement this with a larger scale chart entitled "Red Dog Port Site" for the final approach and anchoring. This chart has a scale of 1:24,000, and covers the surveyed approach, the anchorage and the barge loading pier. A copy of this chart will be placed on board at the earliest opportunity. The Salvage Association were commissioned by Cominco to ensure that the equipment, used by the vessel engaged to carry out the survey, was of the approved type and in good working order.

Navigational Aids: The coastal profile being low, flat, relatively featureless and with visibility sometimes below 3 miles, radar identification of conspicuous targets is of considerable importance to any approaching vessel.

The following is a list of targets most easily identifiable when approaching Red Dog Pilot Station:

(i) The De Long Mountains, together with Mulgrave Hills profile will provide first good radar targets to those vessels fitted with sensitive long range equipment.

(ii) Concentrate Storage Shed, about 1,300 ft. long and 120 ft. high. This structure lies in a direction N.W./S.E., and is about 0.75 miles inland from the shoreline. The entire structure is painted white with a distinctive left blue corner and a red horizontal stripe on the roof.

(iii) Immediately S.E. of the Storage Shed, 4 oil storage tanks, 150 ft. high, painted white, can be identified.

NOTE: A container storage area has been established in front of the oil storage tanks. Radar reproduction will consequently appear as a straight horizontal line instead of the expected 4 distinct traces.

(iv) Concentrate surge bin (Lat. 67° 34' 42" N., Long. 164° 03' 09" W.), 112 ft. above sea level, located about 2,000 ft. inshore from the barge cellular loading pier, a "Sea Beacon 2" Racon is installed on top of this structure, operating on both X-Band (3 cm.) and S-Band (10 cm.). The Racon is transmitting the Morse code letter "K" which should be picked up at over 25 nautical miles on X-Band and at over 20 nautical miles on S-Band (recent experience shows that it has been received at a 45 mile range).

The Racon transmits on each band at separate time intervals to allow the picture on a ship's radar planned position indicator (PPI) to clear. The ON intervals for each band is 20 seconds each (i.e. the Racon transmits on X-Band 4 seconds, then on S-Band for 20 seconds, then shuts down for 20 seconds). To the mariner, a 20 second ON time would appear as 4 to 5 clear traces of the Morse code letter "K" on the PPI, before the Racon switches to a different transmit frequency. The letter "K" display size is proportional to the range scale.

Characteristics: Light – Flash (1) white every 8 sec. 15 miles Racon – Morse code letter "K" (dash dot dash) displayed 20 secs. on X-Band, 20 secs. on S-Band, 20 secs. idle.

(v) Barge loading finger pier: This structure is situated on the shore line and lies on the continuation of the surveyed approach centre line. The barge loading boom installed on this pier provides an excellent radar target, and because of the relative location of the other two targets mentioned above, may be the first echo to appear on the 48 mile range. The pier is permanently illuminated by flood lights and a quick flashing, high intensity light, is positioned above the loading control tower.

NOTE: In order not to obliterate the finger pier trace on the P.P.I., the Racon "K" trace will appear on shore on the ship's heading.

APPROACHES: *Approaches Red Dog Port:* After making good The Bering Strait, the navigational aids enroute to the port become scarce. However, for a vessel fitted with LORAN C, SATNAV, or OMEGA and the benefit of a positive departure point from Little Diomede, making good a course well clear of the shoals off Shishimaref is a relatively simple navigational challenge. Masters are, however, cautioned against the possibility of encountering ice in the early part of July, and the consequences of course adjustments on their ship's position.

Prince of Wales and Shishmaref Shoals: The closest approach to either of these shoals occurs passing through The Bering Strait when, out of necessity, the vessel's course brings it within 10 to 12 nautical miles of the Prince of Wales Shoal.

Passing within 10 to 12 nautical miles of the Prince of Wales Shoal does not constitute hazardous navigation when one takes into account:

(i) The abundance of reliable and easily identified radar targets.

(ii) The reliability of Satnav and Loran C in this area.

(iii) The existence of lights on Cape Prince of Wales and Big Diomede.

(iv) The absence of paucity of traffic.

Safely rounding the Northernmost extremity of Cape Prince of Wales Shoal has not presented any problems, due to the excellent radar targets afforded by Cape Dehzneva and Diomede, which provide the mariner with reliable reference points for his course alteration.

From the Bering Strait to the Red Dog Lighterage Area (and vice versa), vessels follow a Northerly course until reaching Lat. 66° 30' N., and passing some 30 nautical miles to the North of the shallow waters off Shishmaref Island. With a reliable departure point as a starting reference, a Northerly current set, the ability to obtain frequent accurate fixes using Satnav and/or Loran C and echo soundings to warn of shoaling, it is difficult to conceive how Shishmaref Shoal could pose a hazard to navigation to vessels following this track. From the approximate position Lat. 66° 30' N., Long. 168° 30' W., the direct landfall course to the Red Dog Pilot Station lies approximately 6 miles North of the compulsory pilotage waters boundary. Unless dictated by ship's safety considerations, Masters are reminded not to enter pilotage waters, unless a licensed pilot is on board (See "Plans").

As an additional guide, the Radio Beacon at Cape Dezhneva (when operative) can be used as a stern bearing until the Racon or the port radar targets are picked up. It should also be remembered that operations are carried out predominantly during Summer months, and long daylight will largely prevail.

The following summarises navigational notes made by the Master of the tug "Justine Foss", whilst on passage from the Bering Strait to Red Dog Port Site in September 1989:

(i) *Loran C:* Reception poor from South of Cape Prince of Wales. Best combination was slaves 29 and 47.

(ii) *Radar:* Good through The Bering Strait, Diomedes and Cape Dezhneva, providing satisfactory targets up to 10 miles North of Cape Prince of Wales. 20 miles North of Diomedes, coverage poor until making final approach. Mountain Peaks on the Russian side making cross bearings with Diomedes useful for clearing shoals. On the final course towards Red Dog, the mountain tops behind the port provided echoes at 40 miles and the storage shed at 18 miles *(Please note well, this passage was made before the aids to navigation were installed at the port, and with the inclusion of the Racon Beacon and the installation of the loader, more precise position fixing is available).*

(iii) *Radio Beacon:* Cape Dezhneva has a beacon. Not used, as tug not equipped with R.D.F.

(iv) *Satnav:* Seemed the most reliable means of fixing after The Bering Strait.

(v) *Current:* Very little set in The Bering Strait, as current runs Northerly. No set was experienced during transit from Strait to Port Site.

Shipboard Navigation Equipment Performance: Vessels that have so far navigated The Bering Strait and the Chukchi Sea, and loaded at the Red Dog Anchorage, have reported the following performance:

(i) Gyro Compass: Accurate and reliable.

(ii) Radar: Accurate and reliable with many readily distinguishable targets showing at ranges of 33 to 60 n.m. (nautical miles). Of particular note were:

Fairway Rock: 33 to 35 n.m.
Diomede Islands: 48 to 49 n.m. (38 n.m. when astern).
Cape Prince of Wales: 51 n.m. (38 n.m. when astern).
Cape Dezhneva: 30 to 58 n.m. (60 n.m. when astern).
Red Dog Port Site: 47 to 50 n.m.
Red Dog Racon: 21 to 48 n.m.
Cape Krusenstern (Igichuck Hills): 46 n.m.
Cape Krusenstern: 34 n.m.

(iii) Satellite Navigator: Accurate and reliable with frequent (hourly) fixes readily obtainable.

(iv) Omega: Less accurate with errors between 2 and 8 nautical miles. The error was found to increase with latitude.

(v) Loran C: Accurate and reliable, until about Lat. 67° N.

RESTRICTIONS/MAX. SIZE: The lead and zinc and concentrate shipments from Red Dog Anchorage will be carried by bulk carriers, basically grouped in two size categories:

(a) Panamax vessels up to 70,000 d.w.t. – These vessels will load to a draft of up to 45 ft. S.W. or their Summer marks, whichever is the lesser.

(b) Handysize vessels up to 35,000 d.w.t. – These vessels will load to a draft determined by the available draft at the port of discharge or their Summer marks, whichever is the lesser.

RADIO: *Notices of Arrival:* The following parties must be notified of vessel's ETA and arrival amended as necessary:

(i) Upon departure last port, then daily thereafter.

Cominco Metals, Toronto, att. F. Rizzi. Cable address: "Comtor-Toronto". Telex: 06-22912. Fax: (416) 869-1964 or 869-8553.

Navios Pacific Representative, Red Dog Port. Fax: (907) 645-2183. Tel: (907) 645-2109, or via North Pacific Maritime, Ketchikan, Alaska.

North Pacific Maritime, Ketchikan, Alaska. Telex: 099-55295. Cables: Sousteve, Ketchikan. Fax: (907) 225-8254.

Navios Pacific Co., Stamford, CT. Telex: RCA 238853 Navios, or MCI 6819519 Navios. Fax: (203) 961-0845/0847. Cables: Navcargo Stamford Connecticut (Routine), Navcarush Stamford Connecticut (Emergency).

In addition to the above, you are to notify all parties immediately of any delays of more than 4 hours since last ETA notice.

(ii) Contractually, it is required that a Stowage Plan, together with a loading sequence should be included with the 7 days ETA notice. However, we urge Masters to provide this information earlier if possible.

(iii) In addition to the above messages, Red Dog Port Site may be contacted when within reach, by VHF Channels 12 – 16. Any last minute change in the Stowage Plan should be notified through the above channels. Upon entering the Chukchi Sea, vessels can also contact Red Dog Site on SSB frequencies 2096.5 and 4125.0 kHz.

Notice of Readiness: To be tendered by Telex or Radio to Cominco Red Dog Operations Centre, with copies to Cominco Toronto and Navios, immediately upon anchoring or, if conditions prevent the vessel from navigating to the anchorage, N.O.R. to be tendered from the *closest safe position.*

TUGS: Two tugs will be employed in this operation: "Sandra Foss" and "Stacy Foss". Both are 3,000 h.p., and equipped with Kort Nozzles, weather fax and communication facilities. A third smaller tug, "Iver Foss", is also available on site, and is mainly used to assist barge operations, hold loading vessel's sterns up wind in case of running swells exceeding 4 ft. or cross swells and embarking/disembarking pilots.

BERTHING/LOADING: *At the Anchorage:* The ocean vessel should anchor as close to the barge loading pier as is safely possible, but not closer than 3 miles offshore. By doing so, the barges' shuttling time will be kept to a minimum.

Loading will commence as soon as hold inspection is satisfactorily completed and the barges are made fast alongside. The vessel's crew should be ready to attend and assist the barges in making fast. An ample supply of heaving lines and good messengers (30 m.) should be prepared and ready on both sides on the main deck. Also, some special gear (wire slings, shackles, etc.) may be passed from the barges onto the ship's deck. They will be used in accordance with special instructions, either from shore or the barge operators.

In order that the barge operator can readily identify the hatch in which the loading boom is to be positioned, a conspicuous object should be placed at the ship's rail adjacent to the desired hatch.

Similarly, during the periods of darkness, Masters are requested to rig cargo lights at the ship's rail and the beams to be directed downwards at the water. It is suggested that three be placed evenly spaced on each side of the vessel, plus one at the stern. This will provide the tug skippers' with assistance, when the barges make their approach to come alongside.

A crew member must be on deck at all times, being ready to open or close the hatches as required, particularly during periods of threatening weather. Holds not actually in use for loading should be kept closed.

Cargo spillage on the deck or the hatch covers should be swept up promptly, and deposited in the appropriate cargo hold to avoid airborne dust pollution.

Communication with the barges is performed via VHF, and a particular working channel will be indicated at the appropriate time (The following working channels have been allocated: Barge Loader Channel 7. Barge "Kivalina" assisted by tug "Barbara Foss" Channel 6. Barge "Noatak" assisted by tug "Stacey Foss" Channel 18). Vessels not in possession of portable VHF sets will be handed one on arrival together with one spare battery and a charger. The Navios representative at portsite will monitor both loading channels and canbe reached on Channel 12. These sets must be returned upon completion of loading. Communication between vessel and barges must be continuous and uninterrupted. The Master is responsible for ensuring that the entire operation is properly supervised.

Loading is performed 24 hours a day, 7 days a week; so an adequate watch schedule must be implemented on board the vessel.

The stowage of the cargo, as always, is the responsibility of the ocean vessel. Its distribution should be carefully supervised. There are no bulldozers available, therefore directing the loading spout to attain an acceptable shaped pile within the hold, is of great importance.

MASTERS PLEASE NOTE WELL:

To facilitate the loading of the end holds, the barges may have to be moored in an unconventional way, i.e. bow to stern. In some instances, where the anchor chain impedes the approach and operation of the barge, the ocean vessel may have to re-moor using the other anchor.

Access to the vessel is limited to official personnel. There is to be *no crew shore leave permitted.* No accommodation ladder is required, but a good safe pilot ladder should be rigged on both sides of the vessel and lowered upon request.

As previously stated, cargo distribution must be planned in a manner which minimises barge shifting, but when shifting becomes necessary, the vessel's crew must be prepared to assist as required.

Red Dog Anchorage does not offer provisions, mail service, bunkering, potable water, stevedoring or other facilities. Medical assistance is confined to emergencies only.

Fishing is prohibited, and the use, distribution and sale of alcoholic beverages is strictly banned during the ship's stay at the anchorage.

The Shuttle Barges: Two 286 ft. × 76 ft. × 18 ft. (87.2 m. × 23.2 m. × 5.50 m.) barges, especially fitted for the transport in bulk of zinc and lead concentrates, are employed to shuttle the cargo to the anchorage (See "Plans").

An extendable boom, 120 ft. (36.5 m.) long and 38 ft. (11.6 m.) high from deck level, is positioned at the centre line.

Particular attention must be paid to the boom movement in relation to the vessel's structure, especially hatch coamings, in order to avoid damage to both the barge and the vessel. Good coordination and constant communication in clear English language are consequently essential. The cargo is transferred at an approximate rate of up to about 1,200 tonnes per hour.

The barge cargo gear has a fixed rubber spout fitted for dust control purposes only, and because the outreach of the boom will comfortably extend to the opposite hatch coaming, ore can be stowed to a pile profile acceptable within tank top stresses, and always in compliance with the provisions of IMO. It remains the responsibility of the Master or his delegated Officers to ensure the cargo is stowed correctly.

In order to take full advantage of the barge's increased stability in its fully loaded condition, and consequently eliminate the danger of contact between the loading boom and the ship's structure, it is recommended that the transfer be performed in the following sequence:

1. Loading should commence in the four corners of the hatch square in suitable pile sizes.
2. Fill in between the piles underneath the coamings.
3. Finally pour into the main body of the hatch square.

There are no bulldozers or other cargo trimming equipment available. Similarly, no discharging or lightering equipment is available at Red Dog, and Masters are warned that it is impossible to correct errors in the cargo distribution once loaded.

The mooring equipment on the barges consists of four remote controlled winches, each fitted with a 1.125 in. wire rope and a "Berger Fairlead". Two are positioned forward on each side; the after winches are, however, positioned inboard, and their fairleads are situated close to the barge's centre line. The barges are also fitted with a train of four "Seaguard" fenders, which can be positioned on either side.

The mooring concept contemplates that barges will moor using their gear only, however in case of threatening weather, or should a particular necessity arise, vessels are requested to assist, and it is recommended that two good polypropylene lines fore and aft, and the fore/aft spring lines on maindeck be made ready for this purpose.

To assist with final trimming, each barge is equipped with belt scales, but draft checks must be regularly implemented throughout loading. Particularly, it is required that a draft survey be performed halfway through the loading, and another prior to the commencement of loading from the last barge. Results are to be passed ashore for comparison and confirmation of the last barge cargo quantity. Whilst the mid-loading draft survey is carried out in order to determine the ship/shore difference, the survey performed prior to the completion of the last barge loading will identify the exact quantity which is needed to put the vessel at her assigned draft and trim with no cargo remaining on the barge.

If possible, this survey should be carried out during the idle time between the last two barges, as time lost in barge loading, due to this particular survey, does not count as laytime.

Prior to completion of each barge discharge, a Mate's Receipt will be signed by the Chief Officer or the Officer responsible for the cargo. Any notation regarding the nature, status and quantity remaining on the barge, should be made on this document.

When loading is completed, the vessel will be requested to produce a ship's figure as early as possible, and the result of the draft survey passed ashore by VHF, as the vessel will be sailing soon after the last barge is clear from the ship's side under the Early Departure Procedure.

Cargo: Three grades are loaded at Red Dog, namely:

(a) Zinc concentrates stowing approximately 15 cu.ft. per metric ton and 130 lb./cu.ft. having an angle of repose of 35°/45°.

(b) Lead concentrates stowing about 12 cu.ft. per metric ton and 180 lb./cu.ft. having an angle of repose of about 35°/45°.

(c) Middlings (or ISF) which is a mixture of two two ores. Stow factor and angle of repose is consequently a prorated average of (a) and (b). Please note that shippers, Cominco, will deliver cargo quantities *measured in short tons.*

The total cargo will be one or a combination of any of the above three grades. Natural segregation between grades is required, and under no circumstances can different grades be stowed in the same hold.

Great care should be exercised to properly identify each barge, its cargo grade and the appropriate receiving hold before permitting cargo transfer to take place.

When dry, these grades are dusty, and given the breezy nature of the anchorage area, every precaution must be exercised to prevent airborne pollution. Hatches not involved in actual loading must be kept closed. In case of consistent heavy rain, loading is to be suspended and hatches closed after due consultation with the Navios on-site representative.

Cargo spillages on deck, however small, *should not* be swept overboard. With deck scuppers properly cemented and plugged, overflowed quantities should be returned to relevant holds either by hand or mechanical means (i.e. available on board). On completion of loading each hold, dust accumulated on cargo hatches, to be thoroughly swept back into the hold prior to closing. Should a major spillage occur, cargo must be stopped immediately, and Kivalina Port Control informed, and the resulting quantity to be returned to the hold immediately. Cargo flow to be resumed only after normal conditions are restored.

Zinc and lead concentrates must be handled in accordance with the Code of Safe Practice for Solid Bulk Cargoes as recommended by IMO (also see "Safety").

Moisture Content: The moisture content will always be within IMO limits and certified by shippers or their designated surveyors. Documentation stating the Moisture Content and Transportation Moisture Limit will be furnished by the shippers.

Stowage Plan: Upon receiving instructions to proceed to Red Dog, a Stowage Plan must be prepared, inclusive of a hold by hold loading sequence, bearing in mind the following:

1. Cargo wil be brought to the anchorage by two self unloading barges. Each barge will nominally lift about 6,000 short tons of cargo. Cargo distribution and loading sequences should be planned to ensure as many entire barges as possible are discharged into single holds, thereby restricting shifting alongside to a minimum. Quantities needed for final trimming must be of the same grade.
2. Experience gained over past years suggest that:
   (i) Vessels loading for Vancouver discharge are encouraged to adopt an "all holds" distribution which ensured a lower cargo profile in the holds, thereby facilitating future cleaning.
   (ii) Vessels proceeding via the Panama Canal are advised to confine the stowage to the least number of holds possible.
3. Concurrent with the development of a Stowage Plan, ballast discharge sequence should also be worked out very carefully, so that the vessel retains, at all times, a waterline to top of hatch cover airdraft not exceeding 47 ft. In practice and if feasible, it is suggested that ballast discharge commences upon completion of transfer of the first two barges, *but Masters must ensure that the vessel's rate of deballasting should not exceed that which is necessary to comply with the 47 ft. restriction.*

Ballast:

1. A heavy ballast condition on arrival is recommended and all ballast water must be clean; any dirty ballast should be changed well before arrival.
2. Vessels should maintain an even-keel trim during the first loading phase, and only take on a stern trim sufficient to strip ballast tanks after a safe airdraft reserve has been achieved.
3. The maximum recommended draft at the anchorage is 45 ft. S.W. However, in most cases, other restrictions will apply: Either the vessel's Summer marks, the draft at the discharge port, or in the case of vessels sailing to Europe, the Panama Canal draft.
4. Overboard discharge of ballast, especially topside tanks, to be programmed in such a way that barges are not in the path of overflowing water, thereby avoiding the possiblity of wetting and damaging cargo.

Hold Cleanliness: Whilst enroute from the last discharge port, the holds should be cleaned by sweeping and washing by high powered water jet. When previous cargo residues and any loose rust or paint have been carefully removed, a fresh water rinse should be made. Any puddles in the tank tops should be swept into the bilges to ensure that cargo spaces are reasonably dry. Particular attention should be given to removing cargo residues, *especially coal*, which is a serious contaminant to ore concentrates.

Hold Inspections: A representative of Cominco will carry out an inspection for cleanliness. Usually, he will board with the Pilot and carry out his inspection (swell conditions permitting) enroute to the anchorage.

Bills of Lading: The Bill of Lading shall be prepared in metric tons in accordance with the draft survey as ascertained by the authorised surveyor appointed by Cominco Alaska. Should the appointed surveyor be unavailable, the ship's figure, as determined on completion of loading, shall be used as the official quantity to be entered in the Bill of Lading. A letter of authorisation, from the Master to Fednav Montreal to sign original Bills of Lading on his behalf, shall be prepared prior to commencement of loading.

MEDICAL: Assistance only available in an emergency.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Official Formalities:* As the ocean vessel loads outside the U.S. Territorial Waters (i.e. outside the three mile limit), the vessel is not deemed by U.S. Customs to have entered into the United States. There is, therefore, no requirement to Enter In or Clear Out the vessel with Customs.

However, this three mile limit criterion is no longer regarded by the Immigration and Naturalisation Service (I.N.S.) as the limit of their jurisdiction. Instead they consider a vessel within the twelve mile limit to have entered U.S. Territorial Waters, and that they have the right to board. Accordingly, the Master must prepare all the usual documentation, including a visaed Crew List, to satisfy the requirements by the U.S. I.N.S. Whenever possible, the Crew List should be visaed by the American Consulate at the last port of call prior to departure for Kivalina. The local Agent should also be instructed to courier the Crew List to North Pacific Maritime, Ketchikan. Should this not be feasible, North Pacific Maritime, Ketchikan, should be notified with the first ETA message.

On Site Representation: Navios Pacific is represented at Red Dog by one of their senior operations staff. He will be on hand to provide up-to-date information and assistance as needed.

WEATHER: *Sea Surface Current:* From the Bering Strait, the current tends to move in a Northeasterly direction veering North when N.W. of Kotzebue. Its strength is variable, but it may reach over 3 knots, off Red Dog and Kivalina.

NOTE: Current may become variable and sometimes assume a Southerly set in the aftermath of Northerly or Northwesterly strong winds.

Ice Conditions and Reporting: A summary of the typical ice conditions, to be expected during the loading season, may be found in the Climatological Survey.

The U.S. Navy – NOAA Joint Ice Centre and Ice Forecasting Centre, Ottawa, produce frequent ice reports and forecasts for the Western Arctic. This information is available by fax and transmission times and frequencies are listed in the official List of Radio Aids to Navigation (Pub. 117 DMAH 1989). The following Radio Stations also can be used: Point Race (weather only), Kodiak (weather and ice conditions) Kotzebue AM radio 1040/1050 kHz. broadcasts marine weather bulletins that have been found useful to navigation. In addition, Guam, Pearl Harbour and Japanese Stations are all in the broadcast range and cover the area North of the Bering Strait.

SAFETY: In addition to "Code of Safe Practice for Solid Bulk Cargoes", published by IMO, Masters should be aware that zinc/lead concentrates are potentially dusty in nature, and loading in a open roadstead will require care to be exercised by both, deck personnel attending cargo operations, and those in spaces immediately adjacent to the main deck.

Besides the discomfort of working in potentially dusty surroundings, it should be borne in mind that, when in the proximity of holds being loaded, no eating, drinking or smoking should be permitted, in order to prevent involuntary ingestion of these harmful substances.

When loading these cargoes, it is recommended that:

Shut off external ventilation to the accommodation area; internal recirculation system only to be used.

A no smoking, eating or drinking rule should be enforced on the weather deck and any other areas exposed to dust from the cargo.

Galley doors to be kept closed and no through passage from outside to be allowed.

One accommodation space with direct access from the main deck should be designated as a changing room. Working clothes, boots and other protective gear to be stored there prior to entering the accommodation spaces. Wearing deck working gear inside the accommodation should be prohibited.

No duty mess service will be available for deck personnel on duty.

Floor, alleyways and corridors are to be adequately protected from dirt and dust.

VHF sets used on deck to be covered with plastic bags and changed regularly.

Deck personnel on watch at hatches to stand always on the windward side.

Hard hat, goggles, face masks, gloves and boots to be available to and worn by all those working on deck.

All other precautions and hygiene rules applicable to dusty cargoes to be followed (use of protective ointments on exposed skin surfaces, showering when going off duty, thorough laundering of working clothes separately from other clothing, etc.).

As strict water pollution regulations are enforced at Kivalina, no garbage, whether treated or not, may be disposed of overside.

No hot work to be performed on deck or inside accommodation or the engine room while loading cargo.

SHIPMASTER'S REPORT: August 1991.

This is an anchorage port and the position of anchoring varies in accordance with the ice edge.

At any one time a maximum of 2 vessels can be handled.

Approaches: The approach to the anchorage is simple, from the Bering Strait keep Fairway Rock abeam (bearing 270°) and at a distance of 6 miles. Steer due North for 53 miles until reaching the position Lat. 60° 30' N., Long. 168° 30' W. On arrival at this position alter course to 058°(T) for a distance of 108 miles, which will bring the vessel to the Pilot Station which is located at Lat. 67° 27' N., Long. 164° 35' W.

Anchorage: The designated anchorage is between the following co-ordinates:

Lat. 67° 30.3' N.	Long. 164° 15.6' W.
Lat. 67° 32.5' N.	Long. 164° 19.2' W.
Lat. 67° 33.9' N.	Long. 164° 13.4' W.
Lat. 67° 31.6' N.	Long. 164° 09.8' W.

The anchorage is about 10 nautical miles from the Pilot Station in the direction 058°(T).

Anchoring is in the open sea, so vessels should have sufficient chain out at all times. We used 7 shackles and the holding ground was good. The maximum wind experienced during our visit was about 30 knots.

Restrictions: The port is open from the beginning of July until the middle of October each year (in 1991 the last vessel left on October 8th). The closing date is governed by the ice. The port started operating in the Summer of 1990.

Loading: The cargo loaded is zinc and lead concentrates and at present the maximum size vessel that can be loaded is "Panamax" size and the maximum allowable airdraft is 45 ft.

There are 2 self-unloaders of 6,000 tonnes capacity which bring the cargo to the anchorage from the shore loading facilities. The rate of loading with one shiploader is about 1,500 tonnes/hr.

At times, 2 self-unloaders can be tied-up alongside the vessel, one on either side. The self-unloading vessels are secured alongside with 2 headlines and 2 sternlines.

In order to minimise the vessel's rope handling work, all headlines and sternlines are placed on automatic self-tensioning winches and are controlled from the self-unloaders. The self-unloaders which do not have their own propulsion are berthed alongside with the assistance of 3 tugs.

Medical: Medical facilities are very restricted. In case of serious illness crew members are flown to Anchorage by a small jet.

Fresh Water: Not available.

Fuel: Not available.

Consuls: None locally.

Repairs: No facilities available.

Repatriation: Crew changes are only possible in cases of emergency.

General: Stores: Not available.

Operator: Cominco Alaska.

SHIPMASTER'S REPORT: July 1996.

The following is a navigational report covering the passage from entering the Bering Sea on 7th July 1996 to finally anchoring off Red Dog Port (Kivalina) on 10th July 1996.

Navigation to Red Dog Port: The vessel entered the Bering Sea via the passage between the Komandorskiye Ostrova Islands and Attu Island, being the last in the chain of the Aleutian Islands. Just shortly after that, we crossed the International Warranty Limit, Lat. 54° 30.0' N., leaving behind the Kuro Shio and Aleutian currents. The vessel was too far East to be affected by the strong Southbound Kamchatka current, further indicated by the drop in sea temperature from 15° to 8°C.

Usually in July once this far North, the weather is predominantly controlled by a high pressure system situated to the North over the Arctic Ocean. This leaves the typical North Pacific low pressure systems to pass to the South. One of the main reasons for the busy great circle route from the West coast of North America to Japan, etc., passing through the Aleutian Islands. But like most things to do with the weather, it occasionally disagrees with the experts. A very intense low pressure system developed to the S.W. of us. This promptly followed us into the Bering Sea until right above our position, then decided to head in its more familiar direction of East, leaving in its wake Force 8 to 10 winds and a most uncomfortable beam swell. 48 hours later, things tended to settle and with its passing visibility was much improved.

The vessel passed some 120 nautical miles to the West of St. Matthew Island. The affect of a seasonal N.E.'ly current became apparant as we approached the channel between St. Lawrence Island and Chukotskiy Poluostrov (Siberia) and remained with us for the rest of the passage. We detected by radar Mys. Chukotskiy 63.9 nautical miles and West Cape 51.7 nautical miles very clearly. Since the passage of the low pressure system, humidity was much reduced, thus further reducing the effect of attenuation on the radars. The G.P.S. position was constantly compared with the radar and generally was within 2 to 4 cables.

The passage from St. Lawrence Island to the Bering Strait was conducted with head winds of between Force 7 and 8, but with the current, an estimate of 1 knots – 1.5 knots, it seemed to have little effect on our speed. The Charterers' had requested us to slow down as well. This particular stretch of Russian coast line is well appointed with Radio Beacons. Once one had established the intricacies of the Russian morse code, they were easily identifiable.

Approaching the Bering Strait again, the radars did us proud, Cape Prince of Wales was detected at 58.4 nautical miles and Fairway Rock at 29.7 nautical miles. Visibility throughout remained excellent, the current and wind remaining about the same. By now, the ambient air temperature had a maximum of 8°C and a minimum of 3°C. The sea water temperature remained at around 6°C – 8°C.

On entering the Arctic Ocean, or the Chukchi Sea to be precise, proceeding to our alteration waypoint, the wind force diminished to Force 4, sea and air temperature began to rise dramatically, both reaching 15°C by the time we anchored. On entering the Arctic Ocean, one would expect at least the sea temperature to fall.

On our final course, visibility was excellent. The coast line has nothing whatsoever to ascertain decent radar fixes. The position fixing was mainly by G.P.S. At around 37 nautical miles, the first signs of radar returning energy began to emerge. Using the G.P.S. and a reciprocal range and bearing, we established that this was probably the Concentrate Storage Shed. At a range of 24 nautical miles, we could see this building with the naked eye. By now the vessel was experiencing a strong Northerly/N.W.'ly set, and at times I applied up to 10° of set to maintain an accurate approach to the pilot station. At the same range, the 2nd Officer had plotted the two ships that lay at anchor, one was to sail as we approached. By plotting the anchored vessel, the current was calculated to be between 2 knots – 3 knots. The Loading Dock had also become clear on radar as well as visually. Unfortunately, the racon beacon was inoperative. I discussed this with the Pilot on his boarding, and during the approach to the anchorage the racon was not activated.

The Alaska Marine Pilot in fact did not board our vessel until we were halfway down the approach channel. He boards by tug and requires a boarding speed of 6 knots. On board we found no information regarding tides, so I took this up with the Pilot. The height of tide if any, he claims, is no higher than 30 cm. Whilst vessels are loading at this port, and Alaska Marine Pilot remains here for a tour of duty of 3 weeks, the ship will predominantely lie to the strong N.W.'ly current, unless the wind builds up. Generally our vessel lay between 140° – 180°T. Where we eventually anchored, the depth is 15.0 m., draft at the transducer 5.0 m., based on our loaded draft of 11.1 m., there will still be an under-keel clearance of over the mentioned 10 ft. in the manual provided.

The method of communication to Red Dog Port Site is somewhat contentious. The "Red Dog Port Operation and General Information for Masters", Para 5.16(iii), requested contact via SSB radio telephone frequencies 2,096.5 kHz and 4,125.0 kHz. This was to no avail. We also tried additional frequencies, 8,297.0 kHz and 3,261.0 kHz, as per our voyage instructions, but with no luck, and all this was after the port told me over the Satcom telephone to call them that way. On the other hand, VHF contact was established at 30 nautical miles on U.S. Channel 7A. The barges and tugs operate on Channels 8 and 18. Take note this port and the tugs, barges, etc., do not listen on Channel 16.

Red Dog Port Site Operations: As this port can only handle vessels at anchor, working this port are 2 barges, "Kivalina" designed with her control tower starboard side. This is to work facing forward on our port side and vice versa on our starboard side. On the other hand the "Noatak". Both barges are very well fendered. In addition, there are 3 tugs working the port and barges. The "Stacey Foss", "Sandra Foss", each 2,250 b.h.p., and "Ivor Foss", some 2,400 b.h.p.

There was already a vessel working at the anchorage and the port only works one vessel at any time. Therefore we remained idle for a day and a half. The anchorage is approximately 2.5 nautical miles × 2.5 nautical miles, and at any one time only 2 vessels allowed to anchor. As the vessel is more than 3 nautical miles offshore, there is no requirement for Customs Clearance. Immigration on the other hand claim up to 12 nautical miles offshore territorial waters and therefore require a Visaed Crew List. Even so no U.S. Officials attend the vessel.

The barges mooring lines are made fast by the ship's crew, 2 head lines, 2 stern lines, all 4 lines are wires with nylon tails and rigged for quick release in case of weather or an emergency. A further polypropylene spring line is used. On average, it took 50 minutes to make fast, and 20 minutes to let go. During docking and sailing, 2 tugs are always in attendance. One tows the barge alongside, the other keeps the barge in position until fast.

The barges require an airdraft of 14.3 m. (47 ft.). A handy size vessel is no problem, but Panamax size vessels have to be a little more careful. The extendable boom swings over the working hold. The Barge Master controls and guides the boom with the assistance of a video camera mounted at the end. As the weather conditions during our stay were very favourable, the boom could almost touch the coaming, but at the end of the season, that's another matter. The boom shoot is not fitted with any form of mechanical triming device.

The density of the sea water here can vary from 1019 to 1025.

The season here is very short, commencing at the beginning of July and closing mid-October. These dates tend to vary, depending on the ice conditions prior to July and after mid-October. No vessels trade here outside of that operating window. The port presently exports some 750,000 tonnes of zinc and lead concentrate, but is expected to rise to 1 million tonnes by 1998. Only handy size and Panamax size bulk carriers are loaded. During a season, around 15 to 20 ships will be loaded here.

Rescue and Distress: No rescue and distress services available.

Supplies: There are no supplies available at this port. Storage tanks of fuel and water are for the tugs, barges and port services.

Services: There are no services available. In a medical emergency, the person can be transported to the Red Dog Mine for attention. If serious medical attention required, there is an airstrip and arrangements would have to be made to fly an aircarft in.

Communications: A single 52 mile long asphalt road joins the mine to the port. There is an airfield at the mine capable of landing medium size jet aircraft. Chartered aircraft arrives Mondays. Port radio communications on SSB 2,096.5 kHz, 4,125.0 kHz. and VHF Channels 7A (U.S.) and 12. Tugs and barges work VHF Channels 8 and 18.

Port Authority: The port is private, operated by Cominco Alaska. The address is Red Dog Port Site, Kivalina, Alaska. Tel: (907) 645-8117/8118. Fax: (907) 563-5204.

AUTHORITY: Masters should be aware that the parties involved in operations are:

(i) *Cominco Alaska* are the Operators of the Red Dog Terminal, and are the Shippers of the cargo loaded onto their vessels.

(ii) *Foss Maritime* of Seattle are the Operators of the self-discharging barges and tugs, and are contracted to Cominco, Alaska, to provide shuttling and transhipment of the cargo.

(iii) *Navios Pacific* are the providers of the ocean transportation and contracted to Cominco, Alaska.

Navios Corporation, Stamford Harbour Park, 333 Ludlow Street,
Stamford, Connecticut 06902-6913, U.S.A. Tel: (203) 961-0800.
Fax: (203) 961-0845. Telex: 238853. (Also see "Radio").

REDWOOD CITY, California: 37.32 N. 122.12 W.

(See Plan)

DOCUMENTS, PILOTAGE and all general information refer to "San Francisco".

RESTRICTIONS: Though a natural deep water channel extends down the bay to Redwood City there is controlled depth channel 500 ft. wide and 30 ft. deep across San Bruno Shoal. The entrance channel to the port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 ft. to 350 ft. wide. There are 2 large turning basins at either end of the port harbour channel. See also San Francisco.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BERTHING:

Port of Redwood City:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
No. 1	500	36	General cargo and bulk cement through pneumatic pipelines.
No. 2	355	36	
No. 3	450	36	General cargo, heavy lifts and scrap metal.
No. 4 (New Berth)	450	36	General cargo USGS facility.
No. 5	500	36	Designed to accommodate large tankers, general cargo and heavy lift cargoes.
Private Facilities:			
Bell Marine	649	12	Barge unloading dock. Used for storage (not in use).
Lone Star Industries	496	18	Barge dock for loading cement. Not in use.
Lone Star Industries	20	16	Oil berth. Not in use.
Leslie Salt Co.	200	33	Elevator berth used for loading crude bulk salt.

BRIDGES: The San Mateo Hayward Highway Bridge with a vertical clearance of 141 ft. and horizontal of 500 ft. crosses the ship channel

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Garbage disposal is available. Dumpsters from 4 to 15 cu.yd. can be ordered and placed alongside. The company to order dumpsters from is BFI. Tel: (415) 591-2025.
WASTE OIL DISPOSAL: Collection service is available at Wharf 5 from Gibson/Pilot JV. Tel: (800) 582-3935 or (805) 327-0413. Fee schedule on application.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar (U.S.$).
DEVELOPMENTS: See "Plan".
AUTHORITY: Port of Redwood City, 675 Seaport Boulevard, Redwood City, California 94063-2794. *Tel:* (415) 306-4150. *FAX:* (415) 369-7636. *Contact:* Michael Giari, Executive Director.

RICHMOND, California: 37.56 N. 122.25 W. **(See Plan)**

(A) CHEVRON, U.S.A.
(B) OTHER TERMINALS AT RICHMOND.

(A) CHEVRON, U.S.A.

LOCATION: Richmond Long Wharf is situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55' 20" N., Long. 122° 24' 35" W. Wharf heading is 324° – 144°.
DOCUMENTS: *Quarantine and Pratique:* To clear vessel for entry, the Custom House requires the following papers for Foreign Flag Vessels:

1. Vessel Registry.
2. U.S. Tonnage Tax Receipts.
3. Water Pollution Certificate (CIOPP).
4. Load Line Certificate.
5. Safety Equipment Certificate.
6. International Tonnage Certificate.
7. Clearance from Last Port.
8. Customs Forms (CF):
   1300 – Master's Oath (3 copies).
   1301 – General Declaration (3 copies).
   1303 – Stores List (3 copies).
   1304 – Crew's Effects Declaration (3 copies).
   I-418 – Crew List (3 copies).
   1302 – Cargo Manifest (3 copies).
   On CF1300, "Master's Oath", be sure to note docking time and arrival deep draft papers for Customs clearance.
9. Departing Crew Members, if signing-off a foreign vessel, must fill out a CF-5021 "Crew Member Declaration".
   CF I-418 – Crew List (4) Note CF5129 numbers to be shown in Column 5.
   CF5129 – Crew Member Declaration (one for each officer/crew member).
   CF226 – Foreign Repair Oath/Entry (4) and Supporting Invoices.

Inspectors from various government agencies may require additional information. This additional information may include but not be limited to the following:

1. Certificate of Documentation.
2. Water Pollution Certificate.
3. Load Line Certificate.
4. Safety Equipment Certificate.
5. U.S. Tonnage Tax Receipts.
6. A Certified Crew List from last U.S. port (with Seaman's Action Certificates to account for all crew changes).

Documents required for Customs clearance of U.S. Flag Vessel to Foreign Port:
CF1300 – Master's Oath (2 copies).
CF1301 – General Declaration (2 copies).

State of California Department of Fish and Game Office of Oil Spill Prevention and Response requires documents 1 – 6 as listed above (the Boarding Inspector may require additional information).

Vessel's cargo decks shall be clean with no oil on the deck, or water build-up. They shall be free of dirty rags, rubbish, debris, and loose tools. Excessive hydrocarbon build-up in pump room bilges shall not be permitted.
PILOTAGE: Pilotage in and out of San Francisco is compulsory for all foreign registry and U.S. vessels under enrolment not having a federally licensed Pilot on board.

Pilots board near the San Francisco approach lighted horn buoy "SF". Pilot boat "San Francisco" call sign "WYZ-8288". Pilot boat "California" call sign "WYK-4689". Pilot boats monitor VHF Channels 10, 13, 16 and 18A.

Pilots can be contacted through the pilot boats "San Francisco" or "California". Pilot office monitors VHF Channel 10 (156.5 KHz) and can be contacted by telephone No. (415) 393-0457.
MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.
LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to Anchorage No. 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening Supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening Supervisor will observe all the lightening operations. The terminal will provide oil spill recovery equipment during lightening.
HEALTH: See "Health: All Ports" before first U.S.A port (Albany). *Quarantine and Pratique:* Vessels are not required to pass a quarantine inspection. It is necessary that vessels notify their Agents at least 2 days in advance of arrival in San Francisco Bay if sickness or disease is on board. The Agent shall notify Public Health for further action if necessary.

All vessels arriving from foreign ports will require clearance by the following U.S. Government Agencies: Customs House, Immigration Service, Department of Agriculture.

The vessel's Agent should make arrangements for the inspectors to board dockside or at anchorage.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

The Terminal is U.S.C.G. Certified for removal of non-hazardous plastic waste from vessels.
RADIO/VHF: The official language of the terminal is English. Therefore, vessel must have personnel on duty at all times who can communicate in English with the wharf personnel. If at any time proper communication is compromised, the transfer of oil will be stopped per Code of Federal Regulations.
General:

San Francisco has an established advisory traffic service. The Vessel Traffic Centre, radio call "San Francisco VTS" monitors VHF-FM Channels 13 and 16, and uses Channels 13, 12, 18A and 22A.
Note: The VTS is currently considering replacing Channel 13 VHF with Channel 14 VHF as its main working frequency. Channel 12 VHF is the working frequency for the Offshore Vessel Movement Reporting System (OVMRS).

Federal Communication Regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 MHz distress and calling frequency).

The U.S. Coast Guard requires all vessels anchored in San Francisco Bay to maintain a radio listening watch on VHF-FM Channel 13 (156.65 MHz) when the wind is 25 knots or greater. Any ship not equipped with Channel 13 shall maintain the listening watch on Channel 16 (156.8 MHz). This radio watch must be maintained by a person who can speak English.

The 2-3 MHz radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call "WRS 943 Richmond Long Wharf") is equipped with VHF radio, manned 24 hours, on Channel 10 (156.5 MHz).

Chevron Shipping office hours are 0800 hrs. – 1645 hrs., 7 days a week. If vessel needs to contact Chevron Shipping while in San Francisco Bay, call them on the following 2 channels during regular office hours.

1. KCE-372 "Chevron Shipping".
2. Channel 10 (156.5 MHz).

While vessel is at anchor in San Francisco Bay, it should maintain normal listening watches on VHF Channel 10.
ETA Requirements:

The Master of a vessel bound for the San Francisco Bay is required to provide Chevron Shipping (via Fax to Chevron Richmond Long Wharf, Tel: (510) 242-3159) with the following information as soon as possible before arrival, *but not later than* 2 days for tank vessels, and not later than 12 hours for barges prior to arrival at Richmond Long Wharf.

The following 25 items must be provided in the Pre-Arrival Report:

1. (a) Name of vessel/barge (full name).
   (b) Flag of Registry.
2. (a) Last port of call prior to arrival at San Francisco Bay.
   (b) Previous cargo.
3. When vessel was last at Chevron Richmond Long Wharf.
4. (a) Specific ETA 72, 48 and 24 hours prior to arrival.
   (b) Identify whether based on San Francisco Pilot Station or alongside the Richmond Long Wharf.
5. (a) Is the vessel/barge calling at other terminals in the San Francisco Bay area?
   (b) Please identify terminal and any timing constraints associated with Richmond Long Wharf or these other terminals.
6. Cargo trade and quantities to load and/or discharge at Chevron Richmond.
7. Draft on arrival (in feet/inches).
8. Maximum draft and trim expected during transfer operation.
9. Quantity and nature of slops, dirty ballast to be transferred at Richmond Long Wharf and any contamination thereof by chemical additives. (Note: The Chevron Richmond Refinery operations require that any slop discharge at the Long Wharf be avoided or, if this is not possible, minimised to the fullest extent).
10. Any repairs that could delay commencement of cargo transfer.
11. Any special pre-load or discharge procedures (i.e. flush prior to load) or delays (i.e. vessel U.S. Coast Guard inspections).
12. Any specific load/discharge sequence required.
13. Distance from vessel/barge bow to the centre of the cargo manifold area.
14. Manifold details, including size and type (steel, cast iron, annealed iron) of cargo and bunker connections. (Note: The use of cast iron connections are not allowed at the Chevron Richmond Long Wharf).
15. (a) Does the vessel require bunkers?
    (b) If so, type and quantity in net barrels and equivalent metric tons.
16. Does the vessel require potable water?
17. (a) Is the vessel/barge equipped with a Vapour Recovery system?
    (b) If so, type and size of connections.
    (c) Is system certified by the U.S. Coast Guard?
    (d) Where is the connection located with regard to the cargo manifold? Note: Maximum system pressure on arrival at Chevron Richmond not to exceed 15 psia.
18. (a) If vessel is discharging, will there be a need to ballast into cargo tanks which last contained crude, motor gasoline, aviation gasoline or any other Class A cargo?
    (b) If so, how much ballast and how many hours to ballast.

19. Are there any anticipated special operations which the vessel/barge must perform at the Chevron Richmond Long Wharf (i.e. crude oil washing, tank cleaning, personnel to/from the vessel, load lube oils, load stores, etc.)?
20. Is the tug "Chevron Richmond" needed to assist in docking and/or undocking?
21. Any defect of hull, machinery, piping, valves, or other equipment which may affect the safe manoeuvrability of the tank vessel or barge; or constitute a hazard to public health and safety and/or the environment.
22. Any other information pertinent to mooring and cargo transfer operations.
23. Does the vessel/barge have a valid "California State Certificate of Financial Responsibility" on board? (Note: Vessels/barges which do not have this Certificate may not call at the Chevron Richmond Long Wharf).
24. Has the vessel met Oil Spill Prevention and Response and Oil Pollution Act 1990? (i.e. Does the vessel have a written Oil Spill Response Plan with a list of qualified contractors?). If not, vessel is not allowed at the Long Wharf.
25. All tank vessels are required to have a cellular phone on board while berthing at Richmond Long Wharf as an alternate communication system. What is your cellular phone number?

NOTE: Chevron will not be responsible for delays associated with non-compliance of these regulations.

Wharf Communication: The Richmond Wharves are equipped with a positive and dedicated ship-to-terminal radio communication system. On arrival, you will be provided with one radio (walkie-talkie). It must be with the English speaking person on duty at all times; the radio will be tested at regular intervals. You will be instructed in the proper use of this radio during the Cargo Pre-Transfer Conference. If the radio is not returned, we will levy a charge of $3,500 each.

TUGS: 1×4,000 h.p. and 1×1,800 h.p.

BERTHING: Berthing of a deep draft tanker should be timed to allow the ship to remain alongside at her arrival draft through the next low water.

If cargo transfer is delayed and it's determined that the allowable berth draft limit (BADL) will be exceeded, the vessel shall be ordered to make preparations to sail 6 hours before BADL will be reached, making all tug and pilot arrangements (costs will be determined based on the responsibility for the berth delay).

Vessels shall be required to depart the berth based on safe tidal and current conditions, but always before manoeuvering area draft limit (MADL) is reached.

The Wharf Controller and Agent will set berth assignment prior to vessel's arrival. If a berth is not available at the time of arrival, the Agent will instruct vessel to proceed to anchor (as directed by the Captain of the Port) and maintain radio contact with Richmond Long Wharf by VHF Channel 10. At least 3 hours before vessel's assigned docking time, contact Richmond Long Wharf to confirm docking time. At that time, the Wharf will advise the inbound vessel of expected vessel traffic at the Long Wharf. The Wharf will also advise the inbound vessel of any changes once the vessel has made initial contact. Inbound vessels will typically have priority over departing vessels. If an outbound vessel is restricted to a particular sailing time, due to draft and tide, and if the inbound vessel can safely lose time outside the Bay or safely proceed to anchor, the Wharf will request that the outbound vessel has priority. If there is a decision to be made regarding holding a vessel alongside, it will be made by the Onshift Wharfmaster. At one hour before vessel's assigned docking time, recontact Richmond Long Wharf to establish with the terminal what channel the Pilot will be using to moor vessel. The terminal has available the following VHF Channels: 65A, 13, 77, 5, 7A and 18A. While mooring or unmooring, the terminal's internal safety procedures require that vessel-to-terminal communications be established before vessel is 150 ft. from wharf, and then maintained throughout the event. Vessels are cautioned to check with SF Bay VTS on other vessel movements in the area that are not controllable by the Richmond Long Wharf, for instance, vessels proceeding out of Richmond Inner Harbour which may also intend to use Southampton Shoal Channel.

To avoid dangerous meeting and passing situations in the manoeuvring area and Southampton Shoal Channel, departing vessels must be clear of channel before the next arriving vessel can enter the channel, and vice versa.

Berths are assigned according to:

Time of arrival.
Product(s) to be transferred.
Size of ship.
Loaded draft.
Tide and weather conditions.
Availability of dock crews.

No fees are charged for berthing at Chevron piers for normal cargo transfer. However, wharfage fees are charged for ships which cause undue delay or expense. You will be notified when this occurs.

Recommended Docking Practices: The guidelines here must be strictly adhered to. Prior Terminal Management approval is required for any exceptions. For more information about positioning the vessel, see "Plan Section".

The terminal require the use of adequately powered tugboats when docking at the wharves. Chevron Shipping Company has two tugs that can be hired, provided arrangements are made prior to vessel's arrival.

(a) In order to ensure maximum safety while berthing and unberthing ships at Long Wharf, the following minimum tug assistance is required:

Vessel Size	*Mooring* (No. of Tugs)	*Unmooring* (No. of Tugs)
Up to 50,000 d.w.t.	1 large and 1 medium	1 large and 1 medium
50,001 to 80,000 d.w.t.	2 large and 1 medium	2 large
80,001 to 180,000 d.w.t.	3 large	2 large and 1 medium
Over 180,000 d.w.t.	4 large	3 large

Medium tug is 1,750 h.p. to 3,999 h.p.
Large tug is 4,000 h.p. or greater.
A 1,000 h.p. bow thruster is equivalent of a medium tug.

(b) Vessels should always stem the tide when docking.

(c) Steep-angle approaches should be avoided.

(d) In view of the strong tidal currents at the wharf, make sure vessel is moored securely. Check on the number of lines and their strength and condition. Pay special attention to the fore and aft leads.

(e) Mooring lines shall be kept taut at all times during transfer operations, and those lines not on mooring winches must be made fast on the mooring bitts. *Under no circumstances will mooring lines be made fast to winch drums (gipsy heads).*

(f) An all wire mooring arrangement is the safest and most desirable. A minimum amount of mooring lines leading in the same direction will not be mixed (See "Plan"). This is an unsafe practice and creates a false sense of security owing to the difference in elasticity. The only exception would be when additional lines are utilised above the minimum requirements.

For barges less than 100,000 barrels, an all synthetic mooring arrangement can be used, subject to the approval of Terminal Management.

The required minimum number of mooring lines are:

Barges less than 250 ft. in length = 6 mooring lines.
Barges greater than 250 ft. in length = 8 mooring lines.
Ships less than 80,000 d.w.t. = 9 wire mooring lines or 11 synthetic mooring lines.
Ships greater than 80,000 d.w.t. = 10 wire mooring lines or 12 synthetic mooring lines.

These are the minimum requirements. Under severe weather or tidal conditions, additional mooring lines are recommended.

(g) Winch brakes must be on, mooring lines in good condition, and mooring lines of adequate size are required as set forth by regulatory agencies. This will insure that the vessel will remain within the envelope of the arms and/or hoses, and will not break away due to sudden changes in wind or sea conditions or from surging caused by passing vessels.

Vessels should employ mooring lines that provide 75% of the rated breaking strength (i.e. lines must be in good condition). The eye of each mooring line should be led to a quick-release mooring hook. This allows the vessel to depart quickly in an emergency. Permission should be obtained from Terminal representative if a mooring line is to be led to a bollard. The number of lines led to a bollard should be restricted to an absolute minimum. Lines to bollards must all be released first when unmooring. Wires will not be led to bollards.

(h) Be advised, vessels departing from Richmond Long Wharf with drafts of 38 ft. or over will generally not be taken from the berth under strong ebb tide conditions. Vessels are advised to consult with the Pilot's Association on their particular situation.

Hose Handling and Mooring Lines: Wharf crews are on duty continuously to handle oil hoses/arms and mooring lines. *However, they will not handle mooring lines and hoses on board vessels; this is the vessel's responsibility.* There must be a Wharf Observer aboard the vessel when connecting or disconnecting Chicksans or hoses.

Anchors: Anchors are not to be used after vessel is secured.

Gangway: Rig your gangway properly and safely with handrails and adequate illumination. If vessel does not have a gangway, the pier has some available in limited sizes. However, the Company cannot be liable for the manner in which the ship's crew rigs the gangway. Berths No. 1 and No. 4 have permanently installed gangways.

Ship Movement: Make sure your deck watch stays continually alert for vessel movement off-spot. Vessel should be kept against the fender at all times. If the vessel moves off the fender or 7 ft. in either direction along the wharf, stop all cargo transfer operations immediately and disconnect the hoses or arms. Do not resume operations until the situation is corrected. The Terminal requires a tug to move the vessel and hold it off the fenders while moving the vessel parallel to the wharf.

Oil Wharves: There is one pier that accommodates oil transfers. It is commonly referred to as Richmond Long Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 3,396 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 132.5 ft.

Berths 1, 2 and 3 deck level is 15.5 ft. above MLLW. Berth No. 4 deck level is 25 ft. above MLLW.

There are 4 deep water berths on the West side. Berth No. 1 is 950 ft. long with a project depth of 50 ft. at MLLW. Berth No. 2 is 650 ft. long with a project depth of 40 ft. at MLLW. Berth No. 3 is 700 ft. long with a project depth of 40 ft. at MLLW. Berth No. 4 is 1,100 ft. long with a project depth of 50 ft. at MLLW. They are numbered 1 through 4 from South to North. The fender-to-fender width of the Wharf is 132.5 ft.

There are two inner Berths (No. 9 and No. 11). They are used primarily for barge loading or discharging. Project water depth is 20 ft. at MLLW. NOTE: Specific barge size and towboat restrictions may pertain to barges arriving and departing the barge berths. Consult the Wharf Controller for specifics.

Silting is a continuous problem at all berths. Consult the Wharf Controller or the Wharfmaster for updated drafts.

HOSES: *Cargo Hoses:*

(a) Before transfer, inspect cargo loading hoses or arms to see that they are in good condition, *fully bolted*, and properly connected. All hoses must be marked showing the service for which the hose is designated, date of last hydrotest, and a maximum allowable working pressure of at least 275 psi.

(b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.

(c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.

(d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and flanged *before* being removed from the vessel.

The Terminal Head Operator or his/her delegate is to be aboard vessel to oversee the connecting and disconnecting of the loading arms and also to alert crew members when passing the arms.

Vapour Hoses: Vapour hoses as required for Vapour Recovery operation will be provided by the Terminal. Vapour hoses will be distinctly marked with painted red/yellow/red bands and will be labelled. Their flange will have a unique bolt hole configuration to prevent cross connection to a cargo system. The flange sizes are 10 in. at Berths No. 2 and 3, and 8 in. and Berths No. 4 and 9.

Vapour hoses will require a purge with nitrogen before and after loading operations. This purge will be done by Terminal Operators.

LOADING/UNLOADING: Berth No. 2 is fitted with 4 in., 6 in, and 8 in. hoses for cargo transfer. Berth No. 1 has two 12 in. and two 16 in. Chicksan loading arms. Berths No. 3 has two 8 in. and four 12 in. Chicksan arms. Berth No. 4 has two 12 in. and three 16 in. Chicksan arms. Do not reduce Chicksan loading arm flange size by more than 4 in. unless approved by Terminal Management. Berths No. 9 and 11 are fitted with 4 in., 6 in. and 8 in. loading risers for cargo transfer.

NOTE: All terminal flange facings are carbon steel ANSI 150 lbs. rating.

No cast iron is allowed outside of (and including) the first valve on the vessel's cargo or bunker system.

Berth vessels so that manifolds are positioned within the horizontal and vertical limits of the hoses or Chicksan arms as directed by Terminal Person-in-Charge (TPIC) spotting vessel.

Cargo Transfer:

(a) Pre-Transfer Declaration of Inspection – Before cargo transfer begins, the TPIC will board vessel. The TPIC will discuss with Master and officers the safe transfer of cargo. He will also review the Declaration of Inspection with Master and sign it with Master when all items are understood and agreed upon.

(b) Inspection During Cargo Transfer – A Terminal representative will also visit the ship during cargo transfer. With the approval of Deck Watch, he will check to ensure that safe working practices are being observed by both ship and wharf.

(c) Minimum Cargo-Handling Crew – When transferring cargo or ballast, the officer-in-charge of cargo transfer must have at least two assistants: one to maintain watch on the open-deck cargo transfer manifolds; the other to assist in handling valves, tank gauging, or shutdowns of transfer pumps in case of emergency. Other crew members may be needed depending on the size and complexity of ship transfer system. These requirements will be developed at the pre-cargo-transfer conference. When loading ship's bunkers and lubes, the Master and Chief Engineer will assure the terminal that this transfer will be handled in a similar manner.

(d) Both vessel and Terminal representatives shall conduct a regular inspection of the dock area and the water area around the ship prior to and during the transfer operations.

(e) Vessel shall not deposit any form of hazardous waste on the Wharf.

Loading Rates: Several products can be loaded at each berth. Loading rates depend on a multitude of situations. These will be discussed at the pre-cargo-transfer conference.

Unloading Rates: Unloading rates also depend on many things – vessel's pumps, the size and availability of terminal lines and tanks, refinery operations, etc. The pre-cargo-transfer conference will develop the estimated unloading and deballasting rates and procedures.

To expedite cargo transfer, it may be necessary to use booster pumps. To eliminate hazards to this equipment, notify the Berth Operator 15 minutes ahead of time whenever you are going to: Stop or change any cargo transfer rate, strip any tanks, switch tanks, begin or stop Crude Oil Wash (COW).

Maximum Temperature and Pressure Limits: The terminal cargo-handling system is designed to comply with the 150 lbs. ANSI flange rating. For example: 275 psig at 100°F, 240 psig at 200°F, etc. Special restrictions apply for aromatic and other hazardous stocks. These will be explained during the pre-cargo-transfer conference.

Tank Gauges: To ensure proper handling of each cargo, the terminal requires vessels to be gauged every *two* hours and matched with shore-tank gauges. Transfer operations will shut down immediately if:

- the transfer rate is over 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 20% of that transfer rate.

  OR
- the transfer rate is under 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 30% of that transfer rate.

For example:

Vessel arrived with 120,000 bbls. of crude. First 2 hour gauge at 1010 hrs. Estimated rate 7,000 b.p.h.

	Ship	Shore	Difference
1000 hrs.	14,241	13,996	245
1200 hrs.	28,435	25,643	2,792

As the estimated transfer rate is 7,000 bbls./hr., the allowable difference would be 1,400 bbls. The 245 bbls. difference at 1000 hrs. is OK and transfer should continue. The 1200 hrs. gauge of 2,792 bbls. difference is out of tolerance and the transfer should be discontinued until discrepancy can be resolved.

NOTE: For those equipped with IGS, obtain the 2 hour gauge from the automatic gauging system. Do not breach IGS.

Allow approximately 2 hours for shore and vessel cargo reconciliation after transfer is complete.

BALLAST: No dirty ballast will be discharged overboard while vessels are moored at Richmond Long Wharf.

If vessel has a clean dedicated ballast system and Terminal Management approves and a segregated ballast form is filled out, vessel may be able to discharge clean ballast to local waters.

Tank Flushes: Product for use in flushing vessel's tanks is available on request, but must be arranged for at least 48 hours in advance through Chevron Supply and Distribution or Chevon International Oil Company. The flush material will be provided for a $250 handling fee plus a reprocessing fee for each barrel which will vary depending on the exact flush stock requested. The exact reprocessing fee can be obtained by contacting Supply and Distribution.

POLLUTION:

NOTICE TO SHIPS
WHILE IN SAN FRANCISCO BAY WATERS
TO SHERMAN ISLAND

EXCESSIVE SMOKE

Section 3110 of Regulations 2 of the Bay Area Air Pollution Control District prohibits the emission of smoke as dark or darker than Ringlemann 1 for more than 3 minutes in one hour.

BOILER TUBE BLOWING

Boiler tubes must not be blown in a manner that results in soot being deposited on shore in such quantities as to create a nuisance. Blowing of tubes anywhere within San Francisco, San Pablo, and Suisun Bays, or in the San Joaquin River within Contra Costa County, must be kept to a minimum. Every reasonable effort must be made to reduce the number of occasions of such in-port soot blowing.

California Health and Safety Code, Section 24360, provides that a person shall not discharge from any source whatsoever such quantities of air contaminant or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public or which cause or have a natural tendency to cause injury or damage to business or property.

Persons responsible for violations of District Law and regulations are subject to a penalty of up to $25,000 for each day's violation. This may be assessed against any person responsible including the officers of the ship, the Owners, the Operators, and may be secured by a lien against the ship itself. These persons may also be subject to abatement orders and contempt of court.

GOOD NEIGHBOUR NOISE POLICY

When ships or barges are suspected of being too noisy during the course of their operations, the following procedure should be followed:

1. The Wharfmaster shall initiate action when any noisy vessel arrives at Richmond Long Wharf for discharge. The Wharfmaster will requst the CFRE (Chevron Environmental Field Representative) to go to the Point Richmond "hill area" and report on any noise observation.
2. If the noise is excessive in the judgement of the Wharfmaster and CFRE, it may be necessary to make adjustments to the rate, number of pumps, etc., in order to moderate noise to a satisfactory level. In Chevron's efforts to maintain an effective "Good Neighbour Policy", if a vessel is found to be creating a noise nuisance, it may be ultimately necessary to secure cargo operations until daylight hours.

While docking and undocking, no excessive noise should be created.

OIL INSPECTIONS: To control product quality, the terminal has several requirements for sampling and gauging the oil as it is being transferred. These requirements will be explained during pre-cargo transfer conferences. Outside inspection service is provided by the following independent companies:

Caleb Brett U.S.A. Inc., 4108 Lakeside Drive, Richmond, California 94806. Tel: (510) 222-0877. Fax: (510) 222-0930. Telex: 184231.

S.G.S. Inspection, 435 Valley View, El Sobrante, California 94803. Tel: (510) 236-3007. Domestic TWX (910) 382-6013. Fax: (510) 223-0956.

Herguth Petroleum Lab., 101 Corporate Place, P.O.Box "B", Vallejo, California 94590. Tel: (707) 554-4611. Fax: (707) 554-0109. Telex: 317596.

E.W. Saybolt Company Inc., 124 Parker Avenue, Rodeo, P.O.Box 704, California 94572. Tel. (510) 799-2843. Fax: (510) 799-2851. Telex: 229171.

Columbia Inspection Inc., 1214 "B" Pomena Street, Crockett, California 94525. Tel: (510) 671-4814. Fax: (510) 671-4814.

Inspectorate, 3773 Pacheco Blvd., Martinez, California 94553. Fax: (510) 372-3384. Telex: 402472.

MEDICAL: No facilities at wharves. Richmond Refinery has a direct line to the regional ambulance. Emergency medical technicians (EMTs) will respond to provide basic life support, first aid and escort the ambulance to the Wharf.

Non-emergency medical services must be arranged through the Agent.

Brookside Hospital. Tel: (510) 235-7000.
Regional Ambulance Service (ground). Tel: (510) 234-3242.
Air Ambulance International Inc. Tel: (800) 982-5806.
California Aviation Service Inc. Tel: (415) 584-9045.

FRESH WATER: Potable water can be provided to vessels at the Long Wharf. Arrangements to load potable water must be made prior to arrival by contacting the Wharf Coordinator. The Wharf Coordinator will advise the vessel's Agent of current hook-up fees and rates. Loading rates and forms will be fully explained at the Pre-Transfer Conference. The Wharf will make all connections dockside, and will control all valves associated with the water transfer.

FUEL: Many grades of bunkers, diesel and lubricating oils are available in bulk or drum quantities. Agents should order them from (1) Chevron U.S.A., Supply and Distribution (call (415) 944-6200), or (2) Chevron International (call (415) 944-6292), at least 48 hours before vessel arrives, to avoid delaying the vessel.

To take on bunkers and diesel, vessels must be able to connect to terminal's 4 in., 6 in. and 8 in. hoses in Berth No. 2, connect to 8 in. Chicksan in Berth No. 3, to 12 in. Chicksans in Berths No. 1 and 4 without a reduction of more than 6 in. Bunker barges are not allowed to bunker vessels while at Chevron's wharf.

PROVISIONS: Provisions and stores are available through ship's Agent. However, they will be loaded only when the loading does not interfere with cargo or ballast transfer. No hydrocarbons, paints, detergents or other polluting materials will be allowed to go aboard the vessel by means of slings or cargo nets. Such stores must be hand carried on board. The vessel may use its own gear for handling other types of stores. However, forklifts, cranes and trucks are not available for this operation. Stores will not be handled by wharf personnel, and will not be allowed on the wharf until the vessel arrives.

REPAIRS: There are some major repair facilities located in the San Francisco Bay Area. The Agent can probably make arrangements for use of their services.

Repairs at the terminal are not permitted unless it is absolutely necessary in order to move the vessel. Any repair work that would necessitate hot work must have approval from Refinery Management and U.S.C.G. No repairs will be allowed that would delay cargo transfer or lengthen the transfer time.

REPATRIATION: Facilities exist for repatriating of crew by sea or air. Make the arrangements through ship's Agent, and notify the terminal management.

TIME: Local time: Pacific Standard Time GMT is minus 8 hours.

(Note: From the first Sunday in April to the last Sunday in October, this is modified by use of Daylight Time which is GMT minus 7 hours).

All communications should refer to local time.

TELEPHONES: Blue Courtesy telephones are spaced adequately along the dock. These telephones can be used to call this partial list of commonly used numbers within the Refinery:

Wharf Control Room (PAD) (24 hrs. coverage)	242-4494
Wharf Master	242-4388
Wharf Coordinator	242-4387
Head Operator	242-2190
Terminal Superintendent	242-2314
Wharf Bus	6-6880

There are 3 public telephones on the Long Wharf for outside calls, 2 between Berths No. 1 and 2, and one at the lower level of the Wharf Office Building.

STORING: See "Prelims".

1. Vessels cannot be stored by barge while at docks; however, they can be stored by small trucks.
2. Storing by truck requires the truck to be cleared by operations and towed into location. No paint or hydrocarbon may be lifted by net over local waters. This is described in the "Provisions".
3. Trucks can come alongside vessel (within 50 ft. of vessel).
4. There are no forklifts available at the terminal and the rental of one requires the rental of a "spark approved" forklift. Arrangements must be made with the Wharf Master.
5. All customs rules and regulations are enforced.
6. Local riggers can be employed to help get stores aboard vessel, but the vessel must make arrangements with ships Agents, and all storing of vessels must be approved by Wharf Master.

Also see "Provisions".

SHORE LEAVE: In order to permit vessel's crew to exit and enter the Refinery, 2 copies of the vessel's Crew List with anticipated changes must be given to the Terminal Person-in-Charge (TPIC) during the Pre-Transfer Conference.

Walking on the causeway is not permitted. Bicycle riding is not allowed on the causeway. Chevron Shipping Company provides bus service from the wharf to shore and from there, ship's personnel can connect with local taxi or bus service nearby (For transit system information outside the Refinery call (510) 232-5665).

To call for the Long Wharf bus, dial 6-6880, and talk to the bus driver, using the courtesy telephones that are adequately spaced along the face of the Wharf identified by a blue sign.

No animals or pets are allowed on wharf or wharf bus.

No smoking in the bus, on the wharf, or the approach to the wharf.

No ship's commercial passengers are ever allowed to board or leave a ship at the wharf.

The Blood Alcohol Concentration (BAC) cut-off level for all employees, contractors, and visitors who require access to the Refinery is 0.04%. This is recognised as the level at which impairment of judgment and coordination appear and is the level established under Federal Law by the U.S. Coast Guard. Therefore, crew members returning from shore leave must comply with the law and Refinery policy, and *will be denied* entry through Refinery gates if they are 0.04% BAC or above. It is Chevron's policy that any person attempting access to the Richmond Refinery, including all marine personnel/seafarers returning to their vessel, who appear in any way to be under the influence of alcohol will be detained at the gate. The specifics of Refinery alcohol policy will be discussed during the Pre-Transfer Conference.

GARBAGE DISPOSAL: Please follow the United States Department of Agriculture (USDA) and Animal and Plant Health Inspection (APHIS) requirements to dispose of plastic waste (See Marpol Annex-V). The Terminal is U.S.C.G. certified for the removal of non-hazardous plastic waste from vessels.

GENERAL:

Transportation of Alcoholic Beverages: The Refinery regulations state that no alcoholic beverages are allowed in the Refinery.

The Refinery recognises that under certain conditions it is necessary for alcoholic beverages to be transported for certain vessels and their crews. For these specific cases, the following permit system should be used.

Parties requesting to make deliveries of alcoholic beverages to the Wharf should be requested to do so at the Main Gate. At that time, they will be issued a permit to transport the beverages.

Please also refer to Chevron's policy on Blood Alcohol Concentration (BAC) (See "Shore Leave").

Tides and Currents: The maximum tidal range is approximately 9 ft. and the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They generally run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. The normal wind, however, is from the N.W. in Summer, and S.W. in Winter.

Visibility: The visibility in this area of San Francisco Bay is generally fair to excellent, with occasional late evening fog in the Summer lasting until noon the following day. In the Winter, morning or tule fogs frequently occur. The Winter fogs are generally more dense than those of Summer.

Weather: The local weather is usually moderate, with average temperatures ranging between 40°F and 85°F.

The (NOAA) National Weather Service VHF-FM Radio Station, KBH-49, provides mariners with continuous FM broadcasts of weather observations on 162.55 MHz.

Navigation: Master is required to notify the U.S. Coast Guard Captain of the Port at least 24 hours before arriving in the Bay. Master will satisfy this requirement automatically if he reports in accordance with the U.S. Coast Guard's voluntary Automated Merchant Vessel Report (AMVER) System.

On entering the Bay, follow the traffic-separation scheme shown on National Ocean Survey Chart 18649.

Charts and Publications: The following official charts and publications are recommended for use when entering San Francisco Bay:

National Ocean Service Charts:

No. 18640 – San Francisco to Point Arena.
No. 18680 – Point Sur to San Francisco.
No. 18645 – Gulf of the Farallones.
No. 18649 – San Francisco Entrance (Vessels drawing over 45 ft. be aware of "Note D" on chart referring to "Deep Draft Route" inbound, North of Harding Rock and Alcatraz Island).
No. 18650 – Angel Island to Candlestick Point (Anchorage No. 9).
No. 18653 – San Francisco Bay, Angel Is., to Point San Pedro.

Pacific Coast of North America and Asia, Tidal Current Tables West Coast of North and South America, published by National Ocean Service.

U.S. Coast Pilot No. 7 – Pacific Coast – California, Oregon, Washington and Hawaii, published by the National Ocean Service.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists, Volume VI, Pacific Coast and Pacific Islands, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117), published by U.S. Hydrographic Office.

SAFETY REGULATIONS:

I. PRINCIPLES:

When a ship is berthed at our wharf, we expect its Master to give top priority at all times to safety and efficiency; and to follow all safety regulations generally followed in the marine transport industry, as well as those included here.

All cargo handling operations on the ship are the Master's responsibility. To assist in ship-to-wharf communications, we will provide you with a radio pack set (walkie-talkie), which will enable the person in charge of cargo transfer to communicate with the Berth Operator and Chevron Shipping Office.

The pack set is certified intrinsically safe for use in a hazardous location.

If a vessel disregards any of the following safety regulations, Terminal personnel are authorised to stop cargo transfer operations, and request the vessel to leave its berth. The vessel also has the right to shut down transfer operations if it is felt unsafe to proceed, provided adequate notification is given prior to shutdown.

II. EMERGENCY FACILITIES:

It is the ship's responsibility to keep its firefighting systems in readiness at all times. Likewise the Terminal will keep its firefighting and oil spill containment equipment in readiness at all times. An international fire connection is kept ready at each berth at the wharf.

III. SIGNALS FOR EMERGENCY:

The fire signal at the Terminal is one long blast of the docking whistle, followed by short blasts, indicating berth number where fire has occurred. The oil spill signal is two long blasts followed by the berth in which the spill has occurred (you will be notified if the Terminal requests you to shut down on an oil spill). For any other emergency, such as a man overboard, breaking of lines, etc., sound a series of short blasts on your ship's whistle.

Richmond Refinery has a direct line to the "Regional Ambulance". If an ambulance is required, notify the Berth Operator. Wharf personnel will notify Plant Protection, who will call the "Regional Ambulance" and respond with EMT's (Emergency Medical Technicians) and provide escort for the ambulance and basic life support until the ambulance arrives.

If an emergency occurs on the wharf, your ship will be notified by the Berth Operator and by the terminal whistle. You will be notified if the Terminal wants you to clear the berth. In the event of extreme emergency that necessitates evacuation, Wharf personnel will advise vessel crews of assembly areas and evacuation procedures.

In an emergency situation, stop all cargo transfers immediately and secure valves. In case of fire on the wharf, shut down transfer and prepare to depart.

IV. OVERFLOW AND SPILLAGE:

An oil spillage of any kind is considered an extreme emergency. If one occurs, notify the Berth Operator, sound the emergency alarm, and *immediately* stop all cargo transfer operations. Do not resume them until the oil is removed from the surface of the water and from the deck of the vessel; and until any damage is repaired and no further danger exists.

All reasonable clean-up and damage costs will be at the ship owner's expense.

If you observe oil from an unknown source, you must shut down, unless you are positive it is not from your ship. In either case, you must notify the Berth Operator immediately.

The Terminal is required by law to notify promptly, the U.S.C.G. Tel: (510) 437-3073, and various other County, State and Federal offices, of any spills, and permit their representatives to investigate the circumstances.

Oil spill clean-up material will be supplied at cost, upon request.

INIMUM NUMBER OF SHIP'S CREW:

See that your crew is large enough to connect hoses and arms safely and to conduct cargo operations safely. The vessel will be maintained in trim, and the engine in a condition that it could leave the pier on short notice (30 minutes or less). The crew aboard will be maintained at sufficient size to disconnect cargo connections, unmoor, and get the vessel away from the dock.

GENERAL:

A. Following regulations must be observed at all times while berthed at Long Wharf:

1. Boiler-tube Blowing — Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify the Terminal, who in turn will notify the Air Quality District Control.
2. Cargo Tank Tops:
   - (a) Before berthing, all tank tops, ullage plugs, and gauge tapes and sample wells must be closed and dogged down.
   - (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every hole* is the minimum requirement.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 uncoiled fire hoses are required at the vessel's manifold area, one forward and one aft. Provide (U.S.C.G. approved) five portable Class BC extinguishers with capacity of not less than 20 pounds, two located forward and two aft or the manifold, one located at the gangway or the accommodation ladder. All fire extinguishers shall be approved by the appropriate authority of the vessel's flag country.
6. Gas Venting:
   - (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   - (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
   - (c) Vessels equipped with IGS: All breaches of IGS, for any reasons, require the approval of the Superintendent or his assistant.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of Terminal Management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Hatches, watertight doors and portholes – Shall remain closed throughout the vessel while at the wharf.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the Terminal Management. Hot work will require *written* approval by Terminal Management and U.S.C.G.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155. All engine room bilge overboard valves shall be tightly closed, lashed and sealed.

    The seals are *not* to be broken while berthed except in the presence of the Wharf Head Operator or in case of emergency.
14. Sewage Discharge – Not allowed.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times. All holes to be bolted.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to 2.0 m. from the water's surface on the offshore bow and stern, where they can be reached by tugs in case of emergency.
18. When fast in the berth, ship's propeller will not be turned, except by use of jacking gear.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.
2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. The ship shall advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks be kept secured except for momentary passage.
4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
   - (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected. All hoses must be marked, showing the service for which the hose is designated, date of last hydrotest, and a maximum allowable working pressure of at least 275 p.s.i.
   - (b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.
   - (c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.
   - (d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.
8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.
9. Special Stock Hazards:
   - (a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static charge they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. No overall loading is permitted.
   - (b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the Wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the Wharfmaster deems the tanks unsuitable for loadback.
   - (c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.
10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 90 secs. Closure times less than 90 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.
11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

VII. VAPOUR RECOVERY:

As of July 1, 1991, in order to comply with Regulation 8, Rule 44-301 of the BAAQMD, Vapour Recovery operations are required when loading Organic Liquids into vessel tanks. Vapour Recovery will also then be required when loading any product (or ballast water) into vessel's tanks which previously last contained Organic Liquids (and therefore contain vapours from Organic Liquids). Definition of "Organic Liquids" (per BAAQMD Rule 8-44-204) is as follows – all gasoline, gasoline blending stocks, aviation gas and aviation fuel (JP-4 type) and crude oil).

BAAQMD also requires (Rules 8-44-303 and 304) that all vessels associated with the loading of Organic Liquids requiring Vapour Recovery maintain their equipment (all hatches, pressure relief valves, connections, gauging ports and vents) leak free and gas tight. In order to comply with this Rule, certification that vessels meet these requirements will be required during the loading event (leak detection monitoring per E.P.A. reference Method 21). Failure to satisfy compliance requirements during loading will require that the vessel's owner or operator file an "Emergency Variance" with the BAAQMD. Certification must be given to the Terminal (CUSA) before departure of vessel, and certifying process must be done during loading, before 20% completion of cargo loading.

FUEL: Many grades of bunkers, diesel and lubricating oils are available in bulk or drum quantities. Agents should order them from (1) Chevron U.S.A., Supply and Distribution (call (415) 944-6200), or (2) Chevron International (call (415) 944-6292), at least 48 hours before vessel arrives, to avoid delaying the vessel.

To take on bunkers and diesel, vessels must be able to connect to terminal's 4 in., 6 in. and 8 in. hoses in Berth No. 2, connect to 8 in. Chicksan in Berth No. 3, to 12 in. Chicksans in Berths No. 1 and 4 without a reduction of more than 6 in. Bunker barges are not allowed to bunker vessels while at Chevron's wharf.

PROVISIONS: Provisions and stores are available through ship's Agent. However, they will be loaded only when the loading does not interfere with cargo or ballast transfer. No hydrocarbons, paints, detergents or other polluting materials will be allowed to go aboard the vessel by means of slings or cargo nets. Such stores must be hand carried on board. The vessel may use its own gear for handling other types of stores. However, forklifts, cranes and trucks are not available for this operation. Stores will not be handled by wharf personnel, and will not be allowed on the wharf until the vessel arrives.

REPAIRS: There are some major repair facilities located in the San Francisco Bay Area. The Agent can probably make arrangements for use of their services.

Repairs at the terminal are not permitted unless it is absolutely necessary in order to move the vessel. Any repair work that would necessitate hot work must have approval from Refinery Management and U.S.C.G. No repairs will be allowed that would delay cargo transfer or lengthen the transfer time.

REPATRIATION: Facilities exist for repatriating of crew by sea or air. Make the arrangements through ship's Agent, and notify the terminal management.

TIME: Local time: Pacific Standard Time GMT is minus 8 hours.

(Note: From the first Sunday in April to the last Sunday in October, this is modified by use of Daylight Time which is GMT minus 7 hours).

All communications should refer to local time.

TELEPHONES: Blue Courtesy telephones are spaced adequately along the dock. These telephones can be used to call this partial list of commonly used numbers within the Refinery:

Wharf Control Room (PAD) (24 hrs. coverage)	242-4494
Wharf Master	242-4388
Wharf Coordinator	242-4387
Head Operator	242-2190
Terminal Superintendent	242-2314
Wharf Bus	6-6880

There are 3 public telephones on the Long Wharf for outside calls, 2 between Berths No. 1 and 2, and one at the lower level of the Wharf Office Building.

STORING: See "Prelims".

1. Vessels cannot be stored by barge while at docks; however, they can be stored by small trucks.
2. Storing by truck requires the truck to be cleared by operations and towed into location. No paint or hydrocarbon may be lifted by net over local waters. This is described in the "Provisions".
3. Trucks can come alongside vessel (within 50 ft. of vessel).
4. There are no forklifts available at the terminal and the rental of one requires the rental of a "spark approved" forklift. Arrangements must be made with the Wharf Master.
5. All customs rules and regulations are enforced.
6. Local riggers can be employed to help get stores aboard vessel, but the vessel must make arrangements with ships Agents, and all storing of vessels must be approved by Wharf Master.

Also see "Provisions".

SHORE LEAVE: In order to permit vessel's crew to exit and enter the Refinery, 2 copies of the vessel's Crew List with anticipated changes must be given to the Terminal Person-in-Charge (TPIC) during the Pre-Transfer Conference.

Walking on the causeway is not permitted. Bicycle riding is not allowed on the causeway. Chevron Shipping Company provides bus service from the wharf to shore and from there, ship's personnel can connect with local taxi or bus service nearby (For transit system information outside the Refinery call (510) 232-5665).

To call for the Long Wharf bus, dial 6-6880, and talk to the bus driver, using the courtesy telephones that are adequately spaced along the face of the Wharf identified by a blue sign.

No animals or pets are allowed on wharf or wharf bus.

No smoking in the bus, on the wharf, or the approach to the wharf.

No ship's commercial passengers are ever allowed to board or leave a ship at the wharf.

The Blood Alcohol Concentration (BAC) cut-off level for all employees, contractors, and visitors who require access to the Refinery is 0.04%. This is recognised as the level at which impairment of judgment and coordination appear and is the level established under Federal Law by the U.S. Coast Guard. Therefore, crew members returning from shore leave must comply with the law and Refinery policy, and *will be denied* entry through Refinery gates if they are 0.04% BAC or above. It is Chevron's policy that any person attempting access to the Richmond Refinery, including all marine personnel/seafarers returning to their vessel, who appear in any way to be under the influence of alcohol will be detained at the gate. The specifics of Refinery alcohol policy will be discussed during the Pre-Transfer Conference.

GARBAGE DISPOSAL: Please follow the United States Department of Agriculture (USDA) and Animal and Plant Health Inspection (APHIS) requirements to dispose of plastic waste (See Marpol Annex-V). The Terminal is U.S.C.G. certified for the removal of non-hazardous plastic waste from vessels.

GENERAL:

Transportation of Alcoholic Beverages: The Refinery regulations state that no alcoholic beverages are allowed in the Refinery.

The Refinery recognises that under certain conditions it is necessary for alcoholic beverages to be transported for certain vessels and their crews. For these specific cases, the following permit system should be used.

Parties requesting to make deliveries of alcoholic beverages to the Wharf should be requested to do so at the Main Gate. At that time, they will be issued a permit to transport the beverages.

Please also refer to Chevron's policy on Blood Alcohol Concentration (BAC) (See "Shore Leave").

Tides and Currents: The maximum tidal range is approximately 9 ft. and the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They generally run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. The normal wind, however, is from the N.W. in Summer, and S.W. in Winter.

Visibility: The visibility in this area of San Francisco Bay is generally fair to excellent, with occasional late evening fog in the Summer lasting until noon the following day. In the Winter, morning or tule fogs frequently occur. The Winter fogs are generally more dense than those of Summer.

Weather: The local weather is usually moderate, with average temperatures ranging between 40°F and 85°F.

The (NOAA) National Weather Service VHF-FM Radio Station, KBH-49, provides mariners with continuous FM broadcasts of weather observations on 162.55 MHz.

Navigation: Master is required to notify the U.S. Coast Guard Captain of the Port at least 24 hours before arriving in the Bay. Master will satisfy this requirement automatically if he reports in accordance with the U.S. Coast Guard's voluntary Automated Merchant Vessel Report (AMVER) System.

On entering the Bay, follow the traffic-separation scheme shown on National Ocean Survey Chart 18649.

Charts and Publications: The following official charts and publications are recommended for use when entering San Francisco Bay:

National Ocean Service Charts:

No. 18640 – San Francisco to Point Arena.
No. 18680 – Point Sur to San Francisco.
No. 18645 – Gulf of the Farallones.
No. 18649 – San Francisco Entrance (Vessels drawing over 45 ft. be aware of "Note D" on chart referring to "Deep Draft Route" inbound, North of Harding Rock and Alcatraz Island).
No. 18650 – Angel Island to Candlestick Point (Anchorage No. 9).
No. 18653 – San Francisco Bay, Angel Is., to Point San Pedro.

Pacific Coast of North America and Asia, Tidal Current Tables West Coast of North and South America, published by National Ocean Service.

U.S. Coast Pilot No. 7 – Pacific Coast – California, Oregon, Washington and Hawaii, published by the National Ocean Service.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists, Volume VI, Pacific Coast and Pacific Islands, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117), published by U.S. Hydrographic Office.

SAFETY REGULATIONS:

I. PRINCIPLES:

When a ship is berthed at our wharf, we expect its Master to give top priority at all times to safety and efficiency; and to follow all safety regulations generally followed in the marine transport industry, as well as those included here.

All cargo handling operations on the ship are the Master's responsibility. To assist in ship-to-wharf communications, we will provide you with a radio pack set (walkie-talkie), which will enable the person in charge of cargo transfer to communicate with the Berth Operator and Chevron Shipping Office.

The pack set is certified intrinsically safe for use in a hazardous location.

If a vessel disregards any of the following safety regulations, Terminal personnel are authorised to stop cargo transfer operations, and request the vessel to leave its berth. The vessel also has the right to shut down transfer operations if it is felt unsafe to proceed, provided adequate notification is given prior to shutdown.

II. EMERGENCY FACILITIES:

It is the ship's responsibility to keep its firefighting systems in readiness at all times. Likewise the Terminal will keep its firefighting and oil spill containment equipment in readiness at all times. An international fire connection is kept ready at each berth at the wharf.

III. SIGNALS FOR EMERGENCY:

The fire signal at the Terminal is one long blast of the docking whistle, followed by short blasts, indicating berth number where fire has occurred. The oil spill signal is two long blasts followed by the berth in which the spill has occurred (you will be notified if the Terminal requests you to shut down on an oil spill). For any other emergency, such as a man overboard, breaking of lines, etc., sound a series of short blasts on your ship's whistle.

Richmond Refinery has a direct line to the "Regional Ambulance". If an ambulance is required, notify the Berth Operator. Wharf personnel will notify Plant Protection, who will call the "Regional Ambulance" and respond with EMT's (Emergency Medical Technicians) and provide escort for the ambulance and basic life support until the ambulance arrives.

If an emergency occurs on the wharf, your ship will be notified by the Berth Operator and by the terminal whistle. You will be notified if the Terminal wants you to clear the berth. In the event of extreme emergency that necessitates evacuation, Wharf personnel will advise vessel crews of assembly areas and evacuation procedures.

In an emergency situation, stop all cargo transfers immediately and secure valves. In case of fire on the wharf, shut down transfer and prepare to depart.

IV. OVERFLOW AND SPILLAGE:

An oil spillage of any kind is considered an extreme emergency. If one occurs, notify the Berth Operator, sound the emergency alarm, and *immediately* stop all cargo transfer operations. Do not resume them until the oil is removed from the surface of the water and from the deck of the vessel; and until any damage is repaired and no further danger exists.

All reasonable clean-up and damage costs will be at the ship owner's expense.

If you observe oil from an unknown source, you must shut down, unless you are positive it is not from your ship. In either case, you must notify the Berth Operator immediately.

The Terminal is required by law to notify promptly, the U.S.C.G. Tel: (510) 437-3073, and various other County, State and Federal offices, of any spills, and permit their representatives to investigate the circumstances.

Oil spill clean-up material will be supplied at cost, upon request.

INIMUM NUMBER OF SHIP'S CREW:

See that your crew is large enough to connect hoses and arms safely and to conduct cargo operations safely. The vessel will be maintained in trim, and the engine in a condition that it could leave the pier on short notice (30 minutes or less). The crew aboard will be maintained at sufficient size to disconnect cargo connections, unmoor, and get the vessel away from the dock.

GENERAL:

A. Following regulations must be observed at all times while berthed at Long Wharf:

1. Boiler-tube Blowing — Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify the Terminal, who in turn will notify the Air Quality District Control.
2. Cargo Tank Tops:
   - (a) Before berthing, all tank tops, ullage plugs, and gauge tapes and sample wells must be closed and dogged down.
   - (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every hole* is the minimum requirement.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 uncoiled fire hoses are required at the vessel's manifold area, one forward and one aft. Provide (U.S.C.G. approved) five portable Class BC extinguishers with capacity of not less than 20 pounds, two located forward and two aft or the manifold, one located at the gangway or the accommodation ladder. All fire extinguishers shall be approved by the appropriate authority of the vessel's flag country.
6. Gas Venting:
   - (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   - (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
   - (c) Vessels equipped with IGS: All breaches of IGS, for any reasons, require the approval of the Superintendent or his assistant.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of Terminal Management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Hatches, watertight doors and portholes – Shall remain closed throughout the vessel while at the wharf.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the Terminal Management. Hot work will require *written* approval by Terminal Management and U.S.C.G.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155. All engine room bilge overboard valves shall be tightly closed, lashed and sealed.

    The seals are *not* to be broken while berthed except in the presence of the Wharf Head Operator or in case of emergency.
14. Sewage Discharge – Not allowed.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times. All holes to be bolted.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to 2.0 m. from the water's surface on the offshore bow and stern, where they can be reached by tugs in case of emergency.
18. When fast in the berth, ship's propeller will not be turned, except by use of jacking gear.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.
2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. The ship shall advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks be kept secured except for momentary passage.
4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
   - (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected. All hoses must be marked, showing the service for which the hose is designated, date of last hydrotest, and a maximum allowable working pressure of at least 275 p.s.i.
   - (b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.
   - (c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.
   - (d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.
8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.
9. Special Stock Hazards:
   - (a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static charge they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. No overall loading is permitted.
   - (b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the Wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the Wharfmaster deems the tanks unsuitable for loadback.
   - (c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.
10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 90 secs. Closure times less than 90 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.
11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

VII. VAPOUR RECOVERY:

As of July 1, 1991, in order to comply with Regulation 8, Rule 44-301 of the BAAQMD, Vapour Recovery operations are required when loading Organic Liquids into vessel tanks. Vapour Recovery will also then be required when loading any product (or ballast water) into vessel's tanks which previously last contained Organic Liquids (and therefore contain vapours from Organic Liquids). Definition of "Organic Liquids" (per BAAQMD Rule 8-44-204) is as follows – all gasoline, gasoline blending stocks, aviation gas and aviation fuel (JP-4 type) and crude oil).

BAAQMD also requires (Rules 8-44-303 and 304) that all vessels associated with the loading of Organic Liquids requiring Vapour Recovery maintain their equipment (all hatches, pressure relief valves, connections, gauging ports and vents) leak free and gas tight. In order to comply with this Rule, certification that vessels meet these requirements will be required during the loading event (leak detection monitoring per E.P.A. reference Method 21). Failure to satisfy compliance requirements during loading will require that the vessel's owner or operator file an "Emergency Variance" with the BAAQMD. Certification must be given to the Terminal (CUSA) before departure of vessel, and certifying process must be done during loading, before 20% completion of cargo loading.

Facilities will consist of a vapour connecting header through vacuum pumps located on the wharf, and a thermal oxidiser located off-site of the wharf. Vapour Recovery operational details will be discussed during the Pre-Transfer Conference.

In addition, the Terminal has certain regulations designed to eliminate obnoxious odours. Your vessel may, therefore, be required to follow special procedures before tank cleaning, loading, or ballasting. If in spite of precautions, your vessel does cause such odours, your loading or unloading operations may be stopped.

VIII. INERT GAS SYSTEM (IGS):

Terminal Guidelines for Vessel Inert Gas System (IGS):

1. The following guidelines supplement Richmond's Terminal Manual.
2. Ship's Agents are requested to inform their principals and/or ship's Masters of the content of these guidelines, particularly of the pre-arrival information requested of the Master. A copy of the guidelines shall also be provided to the Master on arrival.
3. Nothing contained in these guidelines relieves the Master of his responsibilities. The Terminal takes no responsibility for the safe condition and/or operation of the vessel, for which the Master remains fully responsible.
4. *Communications:*

   4.1 The Master shall inform the Terminal, as soon as possible, of any event or situation which may be the cause of concern for the safe and/or efficient operation of the vessel at the Terminal (e.g. equipment malfunction or breakdown, hull leakage, grounding, collision, structural damage, inadequacy of officers and/or crew regarding certification, experience of manning level, etc.). Such notification is in addition to, and does not relieve the Master of his obligation, to notify Government and/or Harbour Authorities, if so required by existing laws or regulations.

   4.2 As part of the pre-arrival information supplied by the Master at the request of the Terminal, the Master will confirm the following conditions are met by the vessel's IGS. The vessel will *not be berthed* unless it complies with all conditions listed below:

   (a) The IGS is fully operational and can deliver inert gas with an oxygen content below 5%.
   (b) The cargo control room, IGS analyser and alarm are operational. The Terminal will require vessel to retain a marine chemist to confirm readings, if these are found inoperable.
   (c) Each tank will be maintained positively pressured and below 8% oxygen during all port time.
   (d) All tank openings will be closed and gas tight, and all tanks have closed gauging systems.
   (e) IGS will *not* be breached, and tanks will not be opened for inspection, unless mutually agreed to by both the Master and Terminal Managers.

5. *Inert Gas System Guidelines:*

   5.1 All vessels, which are equipped with IGS, shall keep the IGS operational at all times during berthing, while at berth, and during unberthing, and all cargo and slop tanks shall be kept in an inerted condition. IGS may be breached on individual tanks for inspection or measurement only by mutual agreement of the Master and Terminal Manager.

   As part of the Pre-Transfer Conference and Declaration of Inspection, the Master shall provide the Terminal with a signed declaration that the IGS is operational, that the cargo and slop tanks are inerted, and that the IGS will be kept in operation, as necessary, to maintain all cargo and slop tanks inerted.

   5.2 The Master shall permit the Terminal Representative to check:

   (a) The vessel oxygen analyser readings to monitor that the oxygen content of the inert gas being delivered by the IGS contains less than 5% oxygen.
   (b) The vessel oxygen analyser readings to monitor that the oxygen content is maintained below 8% in the cargo and slop tanks.
   (c) The IGS pressure readings to monitor that the cargo and slop tanks are maintained positively pressured.

   5.3 *Inert Gas System Failure:*

   5.3.1 In the event that the IGS is or becomes inoperative, and is unable to maintain a positive pressure and/or the oxygen content at or below 8% by volume in the cargo and slop tanks, the following action shall be taken:

   (a) If the vessel arrives with an inoperative IGS or the IGS becomes inoperative before berthing, the vessel shall not be berthed until the IGS is repaired, and the Master warrants in writing that the cargo and slop tanks have been checked and found to be inerted.
   (b) If the IGS becomes inoperative after the vessel has berthed, then the Master shall not start or shall immediately stop all cargo/ballast operations, and take immediate action to prevent any air being drawn into the cargo and slop tanks. Cargo/ballast operations shall not commence or resume until the IGS has been repaired, and the Master warrants in writing that the cargo and slop tanks have been checked and found to be inerted. The vessel shall not leave the berth until the IGS has been repaired, if the Terminal so requires.
   (c) Vessels Loading Organic Liquid:
   In case a vessel declares that their IGS becomes inoperable, and cannot be repaired in a time frame acceptable to Terminal Management, the vessel will have to go to anchor to make repairs. When repairs are completed, and IGS is operational, the vessel should contact the Richmond Long Wharf to reschedule a berthing plan.

   5.3.3 During any necessary re-inerting of a tank following a breakdown and repair of the inert gas system, or during the initial inerting of a non-gas free tank, no dipping, ullaging, sampling or other equipment should be inserted, until it has been established that the tank is in an inert condition. If it is necessary to introduce a gas sampling system into the tank for this purpose, there shall be a wait of 30 minutes after stopping the injection of inert gas before insertion of the sampling system. Metallic components of the sampling system shall be securely earthed.

   5.3.4 The attention of the Master is directed to the requirement of Regulation 11(c) of Chapter 1 of the 1978 SOLAS Protocol, to advise the Authorities in the event of the IGS having become inoperative. The Master shall confirm to the Terminal that such requirement has been fulfilled.

   5.3.5 All damages and expenses, and all time lost by the vessel, because of the vessel IGS being or becoming inoperative or the tanks not being inerted as required, will be for vessel's account.

AUTHORITY: Chevron, U.S.A., P.O.Box 1272, Richmond, CA 94802-0627, U.S.A. *Tel:* (510) 242-4630. *FAX:* (510) 242-3264. *Cables:* Chevronship Sanfrancisco and Chevronship Richmond. *Contact:* Fred Modugno. P.E. Jacobson, Wharf Terminal Superintendent.

(B) OTHER TERMINALS AT RICHMOND

BERTHING: *Levin-Richmond Bulk Commodity Wharf:*

Owners: Levin-Richmond Terminal Co.

Operated by: Levin-Richmond Terminal Co.

Use: Receipt and shipment of various dry-bulk commodities and scrap metal.

Water Depth: 35 ft. – 36 ft.

Mechanical handling facilities: On wharf; 4×50 ton electric, travelling full portal gantry cranes, each with 100 ft. boom and 2×45 ton electric travelling full portal gantry cranes, each with 118 ft. boom.

Dimensions: Length of face 600 ft.

Remarks: 50,000 sq.ft. warehouse. Railroad on premises.

Santa Fe Sugar Dock:

Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.

Use: Presently not in operation, but the railroad should be contacted for further use.

Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Richmond Terminal No. 3:

Owners: City of Richmond.

Operated by: Stevedoring Services of America.

Use: Receipt and shipment of containerised and breakbulk cargoes in all trades.

Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 35 ft.

Mechanical handling facilities: Two rail-mounted dock cranes and two bridge cranes. Semi-automated operation.

Remarks: Area of container terminal – 16 acres plus a 80,000 sq.ft. enclosed warehouse.

Richmond Terminal No. 4 Wharf:

Owners: City of Richmond.

Operated by: Paktank Corp.

Use: Bulk Liquids.

Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32 ft. – 50 ft.

Richmond Terminal No. 5:

Owner: City of Richmond.

Use: Available for tug, barge and vessel lay-ups.

Dimensions: Two finger piers, each 550 ft. long; Pier No. 1, East side – depth 13 ft. and West side – depth 30 ft. and is leased to Marine Spill Response Corp. Pier No. 2 East side – depth 16 ft. and West side – depth 12 ft., and is leased to Marin Tug & Barge Co. (Pier No. 2 only).

Pt. Potrero Marine Terminal – Terminal No. 7:

Owner: City of Richmond.

Operated by: Pasha Maritime Services.

Use: Import service and delivery of foreign automobiles.

Dimensions: Length of face 1,615 ft.; depth alongside at MLLW 35 ft. usable berthing space with dolphin 900 ft.

Mechanical handling facilities: Mobile handling equipment available.

Richmond Terminal No. 6:

Owner: City of Richmond.

Operated by: Various Lessees.

Use: Five shipyard basins available for lay-berthing, fleet mooring, lay-up and project consideration.

Dimensions: No. 1, 4 and 5: 575 ft.×100 ft., 84 ft. gate. – Depth 15 ft. MLLW.

No. 2: 748 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.

No. 3: 587 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.

TANKERS: *Atlantic Richfield Tanker Dock:*

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and occasional shipment of petroleum products bunkering vessels.

Dimensions: Length of face approx. 250 ft.; lower and upper sides 40 ft. each; depth alongside at MLLW 35 ft.

Atlantic Richfield Barge Dock:

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and shipment of petroleum products by barge; bunkering vessels.

Dimensions: Length of face 150 ft.; depth alongside at MLLW 34 ft.

Richmond Terminal No. 1 Wharf:
Owners: City of Richmond.
Operated by: Presently unused.
Use: Receipt and shipment of petroleum products, chemicals and petrochemicals.
Dimensions: Length of face 557 ft.; depth alongside at MLLW 35 ft.

Richmond Terminal No. 2 Liquid Cargo Wharf:
Owners: City of Richmond.
Operated by: California Oils Co.
Use: Receipt and shipment of vegetable oils, chemicals and petrochemicals.
Dimensions: Berthing length 720 ft.; depth alongside at MLLW 35 ft.

Texaco Wharf:
Owners: Texaco Inc.
Operated by: Texaco Inc.
Use: Receipt and shipment of petroleum products.
Number of Berths: One.
Water Depth: 35 ft.
Dimensions: Length of face 600 ft.

Time Oil Company Wharf:
Owned and operated by: Time Oil Co.
Use: Receipt and shipment of petroleum products.
Number of Berths: One.
Water Depth: 35 ft.
Special Remarks: 3×10 in. pipelines extend to 25 steel storage tanks in rear; total capacity of 618,000 barrels.

Unocal Tanker Dock:
Owned and operated by: Union Oil Co. of California (also services Unitank).
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Unocal Barge Dock:
Owned and operated by: Union Oil Company of California.
Use: Shipment and occasional receipt of petroleum products; bunkering vessels.
Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.
Remarks: Wharf and Tanker Docks are spaced about 230 ft. apart; together they provide 1 large tanker berth.

SURVEYORS: Surveyors are available from various San Francisco Bay Area companies and organisations.
EMERGENCY CO-ORDINATION CENTRE: The Emergency Co-ordination Center for the Port of Richmond is the U.S. Coast Guard, San Francisco, California. CA. Tel: (415) 556-2103.
BANKS:
Bank of America, Richmond Main Office, 261 Harbour Way South, Richmond, California. Tel: (510) 841-4443. Telex: TWX (San Francisco) 910 372 7720.

2. Yes.
3. Yes.
4. Yes.
5. Normal U.S. Customs Regulations apply.
6. Yes.

AUTHORITY: Port of Richmond, 1411 Harbour Way South, P.O. Box 4046, Richmond, California 94804. *Tel:* (510) 215-4600. *FAX:* (510) 233-3105. *Contact:* Michael R. Powers, Port Director.

RICHMOND, Virginia: 37.32 N. 77.25 W. (See Plan)

LOCATION: On the James River, 90 miles from Chesapeake Bay.
DOCUMENTS: See "Hampton Roads".
PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.
ANCHORAGE: Hampton Roads Anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.
RESTRICTIONS: Vessels up to 255 ft. LOA may transit at night from Hopewell to Port of Richmond.
James River Dimensions:
Hampton Roads to Hopewell – 300 ft. wide, 25 ft. depth.
Hopewell to Port of Richmond – 200 ft. wide, 25 ft. depth.
Standard operations for vessels destined to Richmond: Earliest departure from Newport News 5.5 hours prior to sunrise; latest departure from Newport News 7 hours before sunset.
From Richmond to sea: Earliest departure from Richmond 30 minutes before sunrise; latest departure from Richmond 2.5 hours before sunset.
MAX. SIZE: Maximum length (daytime): Container ships 559 ft. LOA and breakbulk ships 564 ft. LOA. Maximum draft 22 ft. Depth of channel 25 ft. MLW. Tide range: 3 ft. 5 in.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: See "Hampton Roads".
TUGS: Not needed for berthing unless vessel is to be turned around. Tug available from Blaha Towing, Inc. on reasonable notice.
BERTHING: Vessels berth alongside wharf 1,584 ft. long. Depth 25 ft. at MLW.
Turning Basin: 600 ft. at widest point, 1,600 ft. length.
CRANES: M-250 Manitowoc; 4600 Manitowoc; 4100 W Manitowoc; 350 tons capacity.
BRIDGES: 3 bridges across the James River between Hampton Roads and the Port of Richmond. No specific time or notice required. Air draft 145 ft.
STEVEDORES: Meehan Overseas Terminal Ltd., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. Tel: (804) 275-9248. Fax: (804) 275-7461.
MEDICAL: Vessels cleared by U.S. Health Officials at Hampton Roads before proceeding up river.
DENSITY: 1000.
FRESH WATER: Available at pier.
FUEL: Bunkers available from Ocean Shipping Services, Inc., 9900 Saybrook Court, Richmond, Virginia 23236. Tel: (804) 320-5022.
CONSULS: No consuls in Richmond, handled through Hampton Roads or Washington, D.C. if needed.
REPAIRS: Only minor repairs, no shipyards.
GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.
OPENING/CLOSING HATCHES: On bulk vessels, usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Certificate.
Tonnage tax receipts.
Certificate of nationality.
Passenger Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.
REPATRIATION: Handled through Norfolk, Virginia.
AIRPORT: Approximately 10 miles from port, regular airline service.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time from first Sunday in April to last Sunday in October.
HOLIDAYS: January 1st, January 15th (Martin Luther King Day), Good Friday, May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police Tel: (804) 780-5100. Ambulance Tel: (804) 355-9300. Fire Tel: (804) 780-6640. Emergency telephone number for all services is 911.
TELEPHONES: No arrangements for placing aboard vessels.
SHORE LEAVE: Allowed. Proper papers should be available.
IDENTIFICATION CARDS: Immigration landing permit required.
GARBAGE DISPOSAL: A collection service using dumpsters is available through Meehan Overseas Terminal Ltd., for terminal operator, Tel: (804) 275-9248 and Fax: (804) 275-7461. Drums or skips are not provided on board or alongside vessels for this service.
WASTE OIL DISPOSAL: A collection service is available through the Port of Richmond, Tel: (804) 743-7678 and Fax: (804) 271-1524. There are no shore tanks, barges, tanker trucks or special berths for this service.
SEAMAN'S CLUBS: Rev. G.C. Harbuck, Jr., of the Catalytic Language Missionary provides services for seafarers. The address of the Catalytic Language Missionary is 1913 Grove Avenue, Richmond, Virginia 23220; Tel: (804) 355-0225, (804) 743-1502.
Meehan Overseas Terminal Ltd. (the terminal operator) provides international telephone service for seafarers in their Shipping and Receiving Office on port.
CURRENCY: The name of the local currency is the U.S.Dollar. No currency exchange facilities are available in the port. Foreign currency may be exchanged at the Crestar Bank, 919 E. Main Street, Richmond, Virginia 23219. Tel: (804) 782-5689.
DEVELOPMENTS: The Port of Richmond has completed an $8.8 million Master Development Plan, which includes a 318 ft. wharf extension, major site improvements to maximise container handling, storage and gate operations, construction of a new maintenance building, stormwater detention pond, rehabilitation of the vehicle storage building and paving of over 13 acres of container storage area. The project was completed late 1995.
AUTHORITY: Port of Richmond, 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Tel:* (804) 743-7678. *FAX:* (804) 271-1524. *Contact:* Martin J. Moynihan, Executive Director.
Terminal Operator: Meehan Overseas Terminal Ltd., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Tel:* (804) 275-9248. *FAX:* (804) 275-7461. *Contact:* Chandoris L.G. Smith, Vice President.

RIVERHEAD, Long Is., New York: 41.00 N. 72.39 W. (See Plan)

LOCATION: The fixed Offshore Tanker Berth is situated 1.2 miles offshore from the North shore of Long Island in Long Island Sound, 4 miles 257° True from the beacon on Mattituck Inlet Breakwater and 12.7 miles 178.5° True from Falkner Island Lighthouse. The geographical position of the centre point of the Operating Platform is in Lat. 41° 00' 01" N., Long. 72° 38' 50" W. The platform has 4 navigation lights situated on each corner of the structure flashing every second. A similar navigation light is also situated on each of the East and West mooring dolphins.

DOCUMENTS: See "New York".

Terminal will provide "Declaration of Inspection" Form which must be completed before cargo transfer begins.

PILOTAGE: Pilotage must be arranged by the vessel or vessel's Agent. Vessels arriving from sea with a draft of 40 ft. or less will pick up the pilot 3 miles S.S.E. of Point Judith Buoy No. 2 (normally found at Lat. 41° 19.3' N., Long. 71° 28.5' W.).

Deeper draft vessels will be instructed by the pilot station to board the Pilot further seaward. Vessels proceeding to Riverhead from the New York Harbour will normally board the Pilot at anchor at N.Y. Anchorage or at a berth in New York.

Tosco Corporation (Tosco) has been advised by Pilots rendering services to vessels coming to the Riverhead Terminal, that the recommended route to the Riverhead Terminal is from the sea East of Block Island or S.S.E. of Point Judith Buoy No. 2 through Block Island Sound between Point Judith and the North of Block Island and through The Race into Long Island Sound, clearing Horton Point and outlying shoals on the approach to the Riverhead Terminal Platform area.

It is further recommended that any vessel 100,000 d.w.t. or more employ 2 Pilots, one to conn the vessel and an Assistant Pilot to assist in the navigation of the vessel. The number of Pilots to be employed, the route(s) and the navigation of vessels calling at the Riverhead Terminal are the sole responsibility of the vessel.

The Pilot is required to remain aboard the vessel (for Tosco's account) on stand-by while the vessel is moored at the offshore platform.

The Pilot Associations serving the Riverhead area are:

Interport Pilots Associates, Inc.,
Post Office Box 312,
Atlantic Highlands.
New Jersey 07716.
Tel: 201-291-1310.
Cables: Port Pilots – Atlantic Highlands, New Jersey.

Northeast Marine Pilots, Inc.,
243 Spring Street,
Newport,
Rhode Island 02840.
Tel: 401-847-9050 (weekdays), 401-331-4824 (nights, weekends and holidays)
Cables: RIS Pilots Providence.

Sandy Hook Pilots
201 Edgewater Street,
Staten Island,
New York 10305.
Tel: 718-448-3900.

ANCHORAGES: Vessels awaiting berth will normally anchor North of the Offshore Platform. Vessels drawing more than 50 ft. may wish to anchor in deeper water Northwest of the platform. Pilots are familiar with the best anchoring areas. Holding ground is good, and a scope of 90 fathoms (6 shackles) of chain is considered adequate.

RESTRICTIONS: Generally, vessels are moored on any stage of the tide and at night when weather conditions permit.

MAX. SIZE: The maximum size vessel which can be received in the North Berth is 225,000 d.w.t., 1,150 ft. LOA and 62 ft. draft.

The maximum vessel size which can be received in the South Berth is 42,000 d.w.t., 600 ft. LOA and 42 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

COMMUNICATIONS: Telephone at Riverhead, station to station: Dial (516) 284-2000. Cable Address "Tosco Corporation Riverhead New York". Radio I.T.T. Amagansett. TWX No. 96-1415, TWX No. 510-224-6443 or 510-226-7837.

Use of the vessel's main radio equipment while at the platform is expressly prohibited. If a tanker's main radio telegraph must be tested following repairs, arrangements must be made to stop the transfer of cargo during the tests.

Wireless messages are most expeditiously received if transmitted via "RCA Chatham".

VHF: Communications with the Terminal may be conducted by VHF Channels No. 16 and 19A; with the platform on Channels No. 16 and 19A; and the utility boat on Channels No. 13, 16, 19A, 12, 6 and 22. Channel No. 16 is monitored by all stations when manned. A private frequency radio is provided to the Person-in-Charge of the vessel during oil transfer operations.

VHF Marine Operators use VHF Channels: Riverhead (N.Y.) Marine Operator 28; New London and New Bedford Marine Operators 26; Bridgeport Marine Operator 24; to place land calls.

TUGS: Tug assistance for docking is required, and will be arranged by the vessel's Agent. Normally, 2 or 3 tugs will be used for docking and one tug for undocking. The use of additional tugs for undocking is subject to the discretion of the Pilot and Master. Tugs are usually arranged through Spentonbush Red Star Co., based in New Haven, Connecticut (because of the shorter running time from that port).

Tugs normally based in New Haven are:

Newport (1,800 s.h.p., 20 ton B.P.) .... Single Screw
New Haven (1,800 s.h.p. 17 ton B.P.) .... Twin Screw

Call Spentonbush Red Star Co. on (212) 536-3800.

Tugs must be ordered at least 24 hours in advance of the scheduled docking time.

Red Star has additional horsepower available, if given adequate notice, including: Stanford (3,000 s.h.p., 32 L.T. B.P.), Crusader (4,000 s.h.p., 47 L.T. B.P.).

Other tugs are available from New York Harbour, or from the Providence Steamboat Co., Providence, Rhode Island, on (401) 331-1930, which has 3,000 h.p. tugs available, or Reinauer Towing (718) 816-8167 or Gateway Towing (203) 467-1997.

BERTHING: Vessels calling at the Offshore Platform or pier are moored at any time. The tidal current periods are substantially the same as the Race. Strong winds from the North and Northwest are experienced during the Winter and Spring. Tidal currents during maximum ebb and flood may reach 3 knots. Both docking and undocking operations may be delayed due to adverse weather conditions.

The mean range of the tide is 5.4 ft.

A terminal working crew will board arriving vessels from a 60 ft. utility boat on approach to the mooring platform. This crew will provide assistance and information to the vessel's Master and the line handling crews. The crew carries private-frequency radios for communication with the platform in positioning and mooring the ship.

The designated Person-in-Charge for Tosco Corporation will receive and sign the Notice of Readiness and complete all paperwork necessary for the transfer of cargo. Two representatives of the terminal will board each tanker as it approaches the platform. They will provide radio communications with the platform and terminal, and advice and assistance while mooring the ship.

North Berth: Vessels berthed during flood tide will moor starboard side to and during the ebb tide current will moor port side to. Forward and stern spring lines are secured to breasting dolphins and bow and stern lines are made fast to mooring dolphins located to the East and to the West of the platform structure. Terminal Foreman boards vessel to provide communications and assistance during mooring operation.

South Berth: Vessels berthed during flood tide current will moor port side to and during the ebb tide current will moor starboard side to. Forward and stern spring lines are secured to the breasting dolphins in the South Berth. Bow and stern lines are made fast to the mooring dolphins located to the East and West of the platform structure. Breast lines are secured to the North breasting dolphins.

Two mooring buoys are situated South of the mooring facility which were formerly used for mooring vessels in the North Berth. Mooring buoys will be used at the discretion of the Docking Master (Pilot) and/or Tosco's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and that all mooring equipment must be in proper working order and in good condition. If, in the opinion of the Pilot (Docking Master) or Tosco's Marine Supervisor, the vessel's mooring equipment is inadequate, the vessel will not be permitted to remain in the berth.

Vessels must be equipped with 12 manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake are acceptable. Warping winches must be adequate to handle mooring lines under heavy strain. Efficient stopper lines must be readily available to transfer mooring lines from winch to bitts without loss of tension. The Docking Master (Pilot) will assist the Master in the berthing of the vessel and supervise the mooring and unmooring operations.

No gangways are used at this terminal. Crew must use ship's ladder for launch service. Crew are forbidden to go on to the Platform, except on ship's business.

BERTHING FACILITIES: *North Berth:* The distance between the North Breasting Dolphins is 294 ft., centre to centre. The depth of water in the North Berth is 64 ft. at low tide. Spring lines from forward and aft are secured on to quick-release hooks situated on the North corners of each of the North Breasting Dolphins. Vessels moor heading either East or West and can normally be moored at any stage of the tide. Mooring dolphins located East and West approximately 350 ft. from the centre of the platform provide the mooring points for bow and stern lines from the vessel. The mooring dolphins have 4 quick-release hooks each for the North Berth, and 2 quick-release hooks each for the South Berth. These mooring hooks are provided with hydraulic releasing mechanisms which can be operated remotely from the mooring platform during vessel departure. Two mooring buoys are situated South of the mooring dolphins to provide securing points for extra bow and stern lines from very large vessels or in cases where anticipated severe weather conditions indicate the need for additional lines.

South Berth: The distance between the South Berth Breasting Dolphins is 160 ft., centre to centre. Spring lines from forward and aft are secured to bollards situated on the South Breasting Dolphins. Bow and stern lines are secured to the mooring dolphins described for the North Berth, breast lines to the South bollards or the mooring hooks on the lower decks of the North Breasting Dolphins. Depth of water 45 ft. at MLW

Operating Platform: The Operating Platform is 100 ft. long by 45 ft. wide.

The East Building contains 2 diesel powered 100 KW. generators, either of which will supply sufficient power to drive the deepwell Fire Pump rated at 750 g.p.m. at 120 p.s.i. The other generator will supply power to the hydraulic system for the operation of the loading/unloading (L/U) arms, the electric mooring capstans and air compressor, as well as illumination of the structure, including floodlighting and other electrical devices. A diesel powered 15 KW. alternator is available for normal power requirements such as charging emergency lighting system batteries, navigation aid batteries and normal illumination.

The West building contains quarters for personnel, office space for recordkeeping, radio and telephone communication equipment, and emergency and other control equipment. The quarters and control room are situated in the North half of the building and South half of the building is available for storage of emergency equipment, i.e. sorbent boom, life jackets, etc.

There are 4 hydraulically operated L/U arms, 2×12 in. and 2×16 in. situated at the North end of the Operating Platform. At the South end of the platform 2×12 in. L/U arms are situated to accommodate the South Berth. Connections can be made to 8 in., 10 in., 12 in., 14 in. and 16 in. 150 p.s.i. A.N.S.I. manifold flanges. Connections cannot be made direct to valve flanges (spool pieces must be provided). Adjacent connections cannot be made to flanges less than 6 ft. apart. The L/U arms are connected to the platform manifold which is designed to handle all products to or from either berth and is connected to the 2×24 in. submarine pipelines leading to the shore facility.

Approximately 1,200 ft. of 26 in. oil containment boom and 2,000 ft. of 36 in. containment boom is stored on lower level of Northeast and Northwest Breasting Dolphins. reasting Dolphins. The boom is stored in a manner so that it may be safely and effectively deployed in the event of an accidental discharge of petrolem into Long Island Sound.

Terminal Transfer Piping: Vessels discharging cargo at the offshore platform should understand that they are discharging to an oil storage terminal approximately 1.5 miles distant from the dock and at an elevation of 150 ft. above sea level. The pipeline is 24 in. in diameter. The static head pressure generated by this pipeline arrangement is about 56 p.s.i.

Booster Pump Operation: Booster pumps are available to assist with the discharge of vessel's cargo. However, the Person-in-Charge of the vessel must realise that it is necessary for the ship to generate sufficient discharge pressure (minimum of 75 p.s.i.) and volume (minimum of 7,000 bbls./hr.), at the booster pump inlet, to start moving the product in the pipeline and to permit the booster pump to be engaged. Each booster pump will normally move 10,000 barrels per hour. The normal start-up procedure when discharging at Tosco Corporation docks is as follows:

(a) following agreement to begin transfer, the shore opens the platform manifold valves;
(b) the vessel will start its cargo pumps and increase pump speed until a discharge pressure of about 60 p.s.i. is obtained at the top of the pump room;
(c) the ship opens its manifold valves;
(d) ship pump's speed is increased until a discharge pressure of 100 p.s.i. is obtained;
(e) the pumpman on the ship is stationed at the pump controls and the shore is requested to start the booster pumps;
(f) as the booster pumps are started, ship personnel adjust their pumps as necessary to prevent engaging the overspeed trip;
(g) the ship adds pumps and increases pump speed as necessary to maintain desired discharge pressure.

Rapid fluctuations in the discharge pressure of the ship will cause the booster pumps to trip-out. To avoid this, speed adjustments to the ship's pumps should be made gradually. Booster pumps are set to trip-out at a low pressure of 75 p.s.i. and, therefore, can provide no assistance to the ship for stripping cargo ashore.

After all cargo tanks have drained and the pumps have lost suction, the discharge of cargo will be declared finished. With the agreement between the Ship's Officer and the Platform Operator, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipeline system does not allow the complete draining of the unloading arm, then arrangments must be made to drain the arm into a container or via a drain hose into a cargo tank. *No product will be permitted to drain out on to the open deck of the vessel.* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

The discharge pressure at the rail shall be a minimum of 100 p.s.i. (maximum 125 p.s.i.) or the vessel's pumping rate shall be a minimum of 10,000 bbls./hr.

LOADING/DISCHARGING:

Discharging: Tankers are expected to achieve an unassisted discharge rate of 10,000 barrels per hour. Ships discharging at less than 10,000 barrels per hour will be subject to charges for the extra platform time used.

High Pour Petroleum: High pour petroleum must be discharged at 4,500 barrels per hour or more. If the discharge rate falls below 4,500 barrels per hour for more than 2 consecutive hours, the vessel will be instructed to stop discharge of cargo and leave the platform. If the submarine line must be displaced from shore to vessel due to low discharge rate, ship will be responsible for all expenses due to this procedure. Laytime will stop and wharfage will commence.

No. 6 oils, or other viscous products shall be heated, before discharge, to at least 120°F (49°C), or at least 30°F (17°C) above the pour point of the product, whichever temperature is higher. (For example: Oil with a pour point of 75°F must be heated to 120°F or higher. Oil with a pour point of 100°F must be heated to 130°F or higher).

A "viscous" oil is one which has a Saybolt Furol Reading greater than 25 seconds at 122° F. (This requirement is dependent, to a degree, on the pour point, discharge temperature, viscosity, and average discharge rate. The terminal reserves the right to order any vessel to stop discharging at any time terminal operations require.)

Loading: Tankers can be loaded at rates up to 30,000 barrels per hour at the request of the vessel and with the agreement of the terminal.

BALLAST: No ballast disposal facilities. Long Island Sound is inland water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matter which may pollute sea water is to be discharged overboard while vessel within Long Island Sound and approaches.

Ballast suction valves must be sealed with a numbered seal on arrival. Terminal personnel will inspect seals before and after cargo transfer.

MEDICAL: A full-service hospital is available in Riverhead for treatment of medical emergencies. This is Central Suffolk Hospital located at the traffic circle/intersection of Roanoke Avenue (Route 73) and Route 58, Riverhead, about 4 miles from the Tosco Terminal.

Emergency transportation to this hospital can be obtained by dialling 911 and indicating to the dispatcher the location of the medical emergency, for instance: "on the ship at the Tosco Corporation's Riverhead Terminal on Sound Shore Road".

DENSITY: Flood tide density 1025. Ebb tide density 1020.

STORES/FRESH WATER: No fresh water facilities. Stores should be ordered through the ship's Agent. For delivery of stores at anchor, or alongside the platform, Miller Launch. Tel: (516) 473-0132.

FUEL: Bunkers *may* be available by special arrangement *if* pipelines are in black-oil service.

Ship's bunkers should be ordered through the Agent, from the regular supplier for delivery, by barge, at anchor. Bunkering of ships is not permitted while alongside Tosco Corporation Docks. Eckloff Marine (212) 442-1112 and Standard Marine Services, Inc. (212) 888-1818 will perform bunkering services.

CONSULS: All Consuls offices located in New York City.

REPAIRS: No repair facilities are available. Vessel must remain in sailing readiness at all times while moored at the platform facilities.

DRY DOCKS: At New York Harbour.

SURVEYORS: *Inspection Companies:*

Caleb Brett – New Jersey. Tel: (201) 925-8282.

Surveyors:

American Bureau of Shipping, 65 Broadway, NY, NY 10006. Tel: (212) 440-0300.
Bureau Veritas, 17 Battery Pl. N., NY, NY 10004. Tel: (212) 442-2317.
Det Norske Veritas, 616 Palisade Avenue, Englewood Cliffs, NJ. Tel: (212) 868-6595.
Lloyd's Register of Shipping, 17 Battery Pl., NY, NY 10004. Tel: (212) 425-8050.
Panama Bureau of Shipping, 104 E. 40 St., NY, NY 10016. Tel: (212) 867-4760.

QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is the quarantine, customs, immigration and agricultural quarantine port of entry for Tosco. Officials are stationed in New York City. Arrangements for inspections of vessels arriving from foreign ports must be made by ship's Agent in advance, not less than 24 hours before arrival on Monday through Friday, and 48 hours on Saturday or Sunday. Vessels arriving from foreign ports are reminded to provide 24 hours' pre-arrival notice to the U.S. Coast Guard, Captain of the Port, New Haven, Connecticut.

Officials will board vessels in the anchorage prior to arrival, within the vicinity of the offshore platform.

Customs Officers: Customs officers will board all vessels arriving from a foreign port, or U.S. flag vessels arriving with foreign cargo. The Customs Officer must be the first person aboard the ship (with the exception of the Pilot). He will require the close assistance of the ship's cargo officer and the public inspector, for the prompt completion of his duties. Agents are requested to order U.S. Customs Inspectors for a time *2 hours before* the vessel's ETA at the terminal.

For questions concerning Customs business, the Regional Office should be contacted on (212) 466-4407 during business hours, otherwise the Communications Office on (212) 466-5472 should be contacted.

Immigration: An Immigration Officer will normally board vessels arriving from foreign ports. Until clearance is obtained from the Immigration Officer, no crew members may leave the ship.

For questions concerning Immigration matters, contact the District Office on (212) 264-5886.

Coast Guard Inspections: Coast Guard Officers may board tankers or barges at any time for the purpose of making inspections necessary to enforce the laws of the United States.

The Riverhead Terminal is within the jurisdiction of the Captain of the Port, New Haven, Connecticut, on (203) 773-2464.

A Regional Office is maintained at 1190 Old Town Road, Coram, NY.11726. Tel: (516) 732-0326.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.

REPATRIATION: Crew members departing vessels from the Tosco Terminal may obtain transportation to domestic or foreign destinations (i.e. to an from either of the major international airports: J.F. Kennedy International Airport or LaGuardia Airport), by one of several methods.

The Riverhead Station of the Long Island Rail Road is located 10 minutes from the terminal by taxi and has services for both railway and bus.

Another method is limousine service (see telephone directory).

AIRPORT: New York Airports, 80 miles distant. Islip Mac Arthur Airport, 35 miles distant.

POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.

State Police Tel: 727-2727, Police Tel: 911 (Emergencies only). Fire Tel: 0 (to report fire, otherwise 727-2750). Ambulance Tel: 911 or 298-4016.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard at New Haven, Connecticut. Tel: (203) 773-2464; and the United States Coast Guard National Response Centre. Tel: (800) 424-8802 (toll free number).

BANKS: European American Bank, located at 209 West Main Street, Riverhead, New York, NY 11901. Tel: (516) 727-7082.

STORING: Bunkers must be taken at anchor. Stores can be loaded during transfer.

Trucks cannot proceed alongside the berth, but by launch only.
Fork lift trucks cannot be used to handle stores.
Customs Regulations regarding storing are not known by this terminal.
Local Riggers can be employed to assist with storing.

TELEPHONES: A coin telephone is located in the platform office. Tel: (516) 727-9549.

SHIP SUPPLY SERVICE: *Launch Service:* Launch service must be arranged for by the vessel's Agent, and can be obtained from: J. & H. Launch Service, Port Jefferson, New York. Tel: (516) 331-5336.

The launches operate on VHF Channels 8 or 13.

Riverhead: Launch service must be provided for the transportation to and from the offshore platform of boarding officials, ship's personnel, repair personnel and ship's stores. The launch service must be maintained for the duration of the vessel's stay at Riverhead.

The terminal's workboat will assist in the mooring of the vessel and the connection of L/U arms, and shall at all times render the general servicing of the platform operation. It must remain at or near the platform during petroleum transfer operations in the event of any emergency.

In the event of an oil spill, J & H Launch Service will assist in the deployment of the spill containment boom. Their launch crew and Tosco's marine personnel have been trained to implement the appropriate response to a spill in accordance with Tosco's Facility Response Plan.

SHORE LEAVE: Shore leave permissible by arrangement with local launch service.

IDENTIFICATION CARDS: Issued by Immigration Officer.

GARBAGE DISPOSAL: *Ship Generated Garbage Reception Facilities:* United States laws prohibit the dumping of any garbage, trash, refuse or debris overboard while within U.S. navigable waters. Procedures for the reception and disposal of garbage received from vessels at Tosco Corporation's Riverhead and Port Jefferson facilities are in compliance with 33 CFR Parts 151, 158 Annex V of MARPOL, the International Convention for the Prevention of Pollution from Ships, and the Animal and Plant Health Inspection Service (APHIS) Regulations 7 CFR 330.400 and 9 CFR 94.5.

General Procedures: Both foreign and domestic vessels are received at Tosco's Terminals. Tosco's policy is to take the most conservative approach to the disposal of garbage received from vessels. Tosco will assume no liability associated with these wastes. A vessel desiring to tender any garbage must give the Terminal at least 24 hours notice, and state the volume and approximate weight of the refuse. No chemicals or flammable materials will be accepted for disposal.

1. All garbage and any medical or infectious wastes generated from foreign vessels, or any vessel arriving from a foreign port, will be incinerated in accordance with APHIS approved procedures.
2. Segregated of regulated wastes (i.e. medical or infectious wastes or plastics) from general domestic ship generated garbage shall be the sole responsibility and obligation of the vessel.

Foreign Vessels: (Including U.S. vessels holding foreign stores).

Packaging: Any vessel requesting garbage disposal will be provided with 4 mil polyethylene bags and fibre drums with securable rings from Miller Environmental Group (MEG). All garbage shall be double bagged and the exterior bag will be tagged indicating vessel's name and date. Bags will then be placed in sealable drums which are pre-labelled with EPA-DOT required insignia.

Handling: Subject to the approval of the U.S. Customs Inspector, MEG launch personnel will receive and inspect each drum generated from the ship. If the drum is properly sealed, the ship's name and date will then be written on the outside of each drum with weather-proof marker. The number of drums, total weight, ship's name, date and location will be completed on the Bill of Lading, with one copy presented to the ship's officer and the remaining two copies intact for tracking with the drums.

Transportation: Properly packaged drums will be placed in secure storage in Tosco's Terminal. MEG will contact Medi-Waste Ltd., 44 Field Street, West Babylon, New York (Tel: 516-249-3131), for pick-up and transportation to their incinerator. *Incineration will take place within 4 days of receipt of the garbage.* The final Bill of Lading and all invoicing for this service will be for the account of the vessel and will be forwarded to the ship's Agent by MPC for payment.

WASTE OIL DISPOSAL: *Oily Waste Reception Facilities:* In accordance with requirements of the International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) and with United States Coast Guard Regulations 33 CFR Part 158, Tosco Corporation will provide oily waste reception facilities at its Riverhead and Port Jefferson Terminals. Both Terminals have received Letters of Adequacy from the U.S. Coast Guard, COTP, New Haven.

The established capacity for oily waste reception at each facility is ten metric tons (3,360 gallons) per day. The oily waste is limited to sludge from on-board fuel, lubricating oil processing equipment and oily bilge water. Vessels visiting the Riverhead offshore platform will be required to transfer the oily waste to a licensed waste hauler at anchorage. This service will be provided at Riverhead between April 30th to October 1st only, weather permitting. Ballast water *will not* be received in Tosco's Riverhead or Port Jefferson facilities.

Vessels requesting the disposal of oily waste at Tosco's Terminals must request this service 24 hours in advance. The U.S. Environmental Protection Agency (EPA) and the N.Y.S. Department of Environmental Conservation require that any transfer of oily waste be carried on transport trucks approved and licensed by the state. A Hazardous Waste Manifest must accompany the transport truck, and must identify the generator of the waste to be disposed. The generator's U.S. EPA identification number, name and registry of the vessel *must* be stated. It is essential that you register with the U.S. EPA and obtain a generator's identificication number, if you wish to dispose of oily waste at Tosco's facilities.

Payment for the cost of transportation and disposal of the oily waste shall be borne by the vessel's owner or its Agent. For ten metric tons of oily waste, the cost may range from $ 3,000 to more than $ 25,000. The cost will depend upon the method of disposal of the waste as determined at the waste disposal site by laboratory analysis and any indication of toxic content.

Before acceptance by the waste hauler of any oily waste, Tosco will require satisfactory proof of ability to pay and assurance of payment up to, but not limited to, $ 25,000. Tosco will also require indemnification against any liability arising from the transfer, transportation and/or final disposition of the oily waste.

SEAMAN'S CLUBS: Seamen's Church Institute, 241 Water Street, New York, New York 10038.

WEATHER AND TIDE: Strong winds from North and N.W. experienced during Winter and Spring. Tide during maximum ebb and flood often reaches 3.5 knots to 4 knots velocity.

AUTHORITY: Tosco Corporation, 212 Sound Shore Road, Riverhead, NY 11901, U.S.A. *Tel:* (516) 284-2000. *Telex:* 96-1415. *Cables:* Tosco Corporation Riverhead Terminal. *FAX:* (516) 284-2053. *Contact:* D. Gianfalla, Terminal Manager. A. Golz, Marine Supervisor. D. Gianfalla, Operations Co-Ordinator.

ROCHESTER, New York: 43.17 N. 77.36 W. **(See Plan**

Refer to "St. Lawrence Seaway" for important general information. See "General" below.

PILOTAGE: Not necessary.

ANCHORAGE: No anchorage available within harbour limits.

RESTRICTIONS: Permit for non-emergency docking must be obtaine 2 weeks in advance by mail or telephone request.

MAX. SIZE: Channel depth 20 ft. (LW). All depths in channel or alongsid wharves should be checked carefully against the latest recorde elevated or lake level. This may vary from month to month. Entranc width 300 ft., turning basin depth 20 ft., 600 ft. in width.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Rochester Coast Guard Station.

TUGS: Not available.

BERTHING: Entrance piers are parallel to each other, and about 450 ft apart. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long Fog horn and beacon on West Pier, East pierhead lighted. Radio beacon Port Authority Terminal located on West bank of Genesee River at end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth of wate alongside quay wall uncertain, estimated at between 10 ft. and 16 ft Charlotte Docks located about 2 miles upstream from mouth of river o West bank.

CRANES: Not available, except through private arrangements.

BRIDGES: New York Central Railroad swing bridge near mouth of the river and upstream from Port Authority Terminal. Traffic lift bridge abou 0.25 mile upstream from railroad bridge.

STEVEDORES: Vessel to make own arrangements.

DENSITY: Fresh water.

FRESH WATER: Available at Port Authority Dock only.

FUEL: Vessel to make own arrangements.

CONSULS: None.

REPAIRS: Minor only.

REPATRIATION: Can be arranged.

AIRPORT: Approximately 10 miles from port.

POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire Tel: 911.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: By special arrangement only. Contact Wast Management of New York. Tel: (716) 254-3500.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: Rochester, New York, no longer operates a commercial por The facilities are available only for tour and cruise boats to take on an discharge passengers, and by commercial vessels in the case of a extreme emergency.

It should be stressed that emergency docking is completely the Master's responsibility. The City of Rochester and the Department o Recreation and Community Services assume no liability for any vess docking under emergency conditions at the former Port of Rochester.

AUTHORITY: City of Rochester, Department of Parks, Recreation an Human Services, Office of the Commissioner, City Hall, Room 222-B 30 Church Street, Rochester, New York 14614-1277, U.S.A. *Tel:* (716 428-6755. *FAX:* (716) 428-6021. *Contact:* Port Director.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KBA 386, 156.9 MHz (24 hours).
TUGS: Join vessel at Light 76 (turning basin).
BERTHING: Anchor – ships will have at least 1 anchor ready to let go in case of emergency, when docking or undocking. Anchor will be raised immediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, immediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets shall be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring lines immediately after docking, and shall be maintained in place until ship's departure.

Pier 1:
Owned and operated by: Port of Sacramento.
Use: Bulk-loading rice facility.
Construction: Concrete with timber fender piles, length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m).
Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 470 tons each; 6 silos at 270 tons each.
Mechanical handling facilities: 3 loading spouts dockside, conveyor system to storage facility.
Loading rate: 600 t.p.h.

Wharf 2:
Owned and operated by: Port of Sacramento.
Use: General cargo.
Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9).
Water depth: 30 ft. (9.1 m.).
Transit sheds: One, 86,400 sq. ft.

Pier 5:
Owned by: Port of Sacramento.
Operated by: Cargill of California, Inc., as a public utility.
Use: Bulk-grain facility.
Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels. Two dry bulk storage domes of 9,000 tons storage each.
Mechanical handling facilities: Bulk ship loader (600 t.p.h.), conveyor belt system connects bulk storage/rail/truck.

Wharf 6:
Owned and operated by: Port of Sacramento.
Use: General cargo and containers.
Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.); apron 60 ft. (18.3 m.).
Water depth: 30 ft. (9.1 m.).
Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.

Wharves 7-8:
Owned and operated by : Port of Sacramento.
Use: Bulk material facility and general cargo.
Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Storage capacity: Covered 200,000 tons, open 750,000 tons.
Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck.
Loading rate: 600 t.p.h.
Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.

STEVEDORES: Same as San Francisco. Port stevedores for bulk cargo.
MEDICAL: All normal medical facilities available.
DENSITY: Full fresh.
FRESH WATER: Available at all berths.
FUEL: All grades available with 24 hours notice. Delivered by barge.
CONSULS: Nearest at San Francisco.
REPAIRS: Limited repair facilities available.
GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.
OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.
REPATRIATION: Can be arranged through local Agent.
AIRPORT: 16 miles from port and served by regular airlines.
TIME: GMT minus 8 hours.
HOLIDAYS: Only days not worked are 4th and 5th July, Labour Day, Christmas Eve and Day, New Year's Eve and Day.
POLICE/AMBULANCE/FIRE: Tel: 371-8000. Extensions 200.
TELEPHONES: Telephones are available.
SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available. Charges are man-hour rates to supply and remove double plastic bag lined 4.5 cu.ft. boxes for incineration plus per box incineration cost of $30 plus 25%. 24 hour notice must be given for garbage service. Contact Tel: (916) 371-8000, ext.280. Collection scheduled as needed.
WASTE OIL DISPOSAL: By truck with 24 hours notice.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar (U.S.$).
IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.
REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.
DEVELOPMENTS: Deep water channel dredging project to minimum 35 ft. by 2000.
AUTHORITY: Port of Sacramento, P.O. Box 980070, West Sacramento, California 95798-0070. *Tel:* (916) 371-8000. *FAX:* (916) 372-4802. *Contact:* John Sulpizio, Port Director.

SALEM, Massachusetts: 42.31 N. 70.53 W. (See Plan)

SHIPMASTER'S REPORT: August 1986.

DOCUMENTS: See "Boston".
PILOTAGE: Cape Ann Pilots Association (serves Gloucester and Salem). Pilot on VHF Channels 16 and 12. Pilot boards about 1 mile South of Eastern Light Buoy No. 2.
ANCHORAGES: About 2 miles S.W. of Eastern Point.
RESTRICTIONS: Salem Channel 150 ft. in width only, therefore large vessels berth or unberth in daylight hours only.
MAX. SIZE: Length 700 ft. (approx.). Breadth 110 ft. (approx.) and draft 34 ft. (salt water).
TUGS: Available from Boston.
BERTHING: New England Power Company (NEPCO) operates Salem Terminal Wharf to supply Salem Harbour Station with coal and fuel oil.

No cranes available, coal is discharged from "self-unloading vessels" only.

TANKERS: 2 arms (Chicksan-type), 12 in. diameter. Discharging rate: 7,000 bbls. each. Length of wharf (incl. dolphin) 250 m. (approx.) dredged to 34 ft. at LW.
DENSITY: 1022 – 1025.
AIRPORT: See "Boston", about 45 minutes. Cost U.S.$50 by van.
TELEPHONES: Not placed on board, however communication with Agents via VHF possible.
GENERAL: Port is served by 1 or 2 colliers a week, and about 3 tankers a month.

NEPCO Representative acts as Loading Master. Linesman are provided from the power station.

REPORT: From Tanker Operator:
Port Approaches: The RDF stations at Cape Cod, Boston Buoy 'B' and Eastern Point are useful navigation aids. The rocky shore lines provides a good target for position fixing by radar. Fathometer readings should not be relied on for position fixing purposes, since bottom contours are erratic. Fishing boat traffic in Massachusetts Bay is heavy especially near Gloucester. It should be noted that the small fishing vessels in this area sometimes display working and running lights that could be mistaken for reguar range lights. During the Summer months, the yacht traffic is considerable. Most yachts reportedly show up poorly on the radar screen.
Channel Transit and Berthing: Loaded tank vessels enter with a rising tide. The Pilot and Agent should be consulted with regard to the actual water depths available in the channel during the intended period of transit.

The transit from the pilot boarding area to the terminal is about 10 miles. Salem Sound is entered via the Salem Channel between Bakers Island and Little Misery Island, leading Westwards for 3 miles thence Southwestward through a dreged section to the turning basin off the berth. The channel is well marked with buoys and range lights.

Shallow vessels and tows crossing the channel may be met. During Summer months, Salem Sound is crowded with pleasure craft. Coast Guard patrol boats must sometimes be utlised to clear a path.

The tugs usually join the ship before entering the inner dredged channel Buoy No. 16. The ship is berth port side to, which requires a starboard turn of approximately 130° before landing.

During normal weather conditions, 10 mooring lines are considered to be the minimum acceptable.
Weather: Gales occur year round. The severest storms occur during the Winter months. Rain or snow associated with these storms, at times, reduce visibility to zero for extended periods. During the Winter months, freezing spray may be experienced.

Fog presents a problem year round, being heaviest during late Spring and early Summer. It is not advisable to enter or leave in thick weather.

REPORT: August 1994.

The offshore mooring dolphin has incurred extensive damage, and use for stern lines should be discontinued.

Stern lines will be run to a bollard ashore, approximately 100 yards (300 ft.) from stern of vessel, acting more as an after breast line (See "Plan").

Vessel will also be breasted off by 2×10 ft. diamater Yokohama fenders whilst repairs to the dock are being conducted.

AUTHORITY: *Operator:* Northeast Petroleum, 72 Cherry Hill Drive, (P.O.Box 1090), Beverly, MA 01915-0790, U.S.A. *Tel:* (508) 524-1552. *Telex:* 949409. *Contact:* Bruce Young, Port Captain.

SAN DIEGO, California: 32.41 N. 117.07 W. (See Plan)

PORT LIMITS: The seaward boundaries of the Port of San Diego at which a vessel is considered to be an "arrived vessel" is that time when the vessel is boarded by a Port Pilot at Sea Buoy No. 1 (Buoy SD) and (subject to charter party terms) lay time commences when Notification of Readiness is tendered at berth.
DOCUMENTS:
Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.

If the vessel arrives from foreign direct, 3 copies each of the above documents are required.

If the vessel movements are between U.S. ports, 2 copies each of the above documents are required.

Health Documents. Arrival from Foreign Direct, 1 copy only. All crew members should be in possession of valid vaccination certificates.

Manifests. Arrival from Foreign Direct, 1 copy of Travellers Manifest which remains with vessel, and 3 copies each of U.S. Customs Inward Foreign Manifest. Bills of Lading, ship's papers carried aboard vessel varies with steamship companies.
PILOTAGE: Compulsory. The San Diego Pilots do not maintain Pilots on station. Service is rendered according to ETA received from vessel. If any vessel's arrival or departure is delayed over 1 hour, an additional charge will be made. Telegraphic address of Pilot Station – radio ETA to "Pilots", San Diego. Advance notice of ETA required – 24 hours prior to arrival of vessel with amendments 2 hours prior to arrival. Pilot boat is 63 ft. in length, painted white. The exact area where Pilot boards the vessel is No. 1 sea buoy. Pilot on VHF Channels 16 and 12 (Tel: (619) 233-7814).
ANCHORAGE: 3 miles S.E. of Point Loma Light.
MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside fac of terminal, 35 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
VHF: The Port of San Diego Harbour Police maintains a listening watch on Channels 12 and 16. Channel 11 is available after initial call-up on Channel 16.
TUGS: Tugs normally join vessel approximately 1 mile before berth. 5 available ranging from 200 h.p. – 2,400 h.p. There is no charge for the use of tug's lines.
RADIO: All radio messages go through the Los Angeles station for relay.
BERTHING:

Name/Operator		*Berth* No.	*Berthing Space* (m.)	*Depths Alongside at MLLW* (m.)

(1) Equipped with pipelines for bunkering vessels handling cargo at beths.
(2) Also used for shipment of bulk commodities.
(3) Also used for receipt of automobiles.
(4) Also used for receipt of lumber.

CONTAINER FACILITY: A high-speed, all-electric container crane capable of handling 20 ft. and 40 ft. units, or single hook lifts of 40 long tons at National City Marine Terminal. Depth 35 ft. MLLW.
SPECIALISED CARGO HANDLING FACILITIES: High-speed bulk loading facilities exist with 800 ft. of 35 ft. MLLW deep water berthing space and bulk storage, plus a bulk loader boom that travels 500 ft. laterally and can be extended or raised enough to load nearly any size or type of ship. The bulk loader is capable of loading 1,800 t.p.h.

A state-of-the-art cold storage facility, located on dock, provides 10,000 sq.m. of cold storage capability, and 10,000 sq.m. of receiving handling, and fumigation area; capable of handling fresh or frozen fruits vegetables and other products at varying temperatures and humidities.
Specialised Berthing:

Pier	*Berthing Space* (m.)	*Depths alongside at MLLW* (m.)
Embarcadero	472	5.5
Tunaboat Pier No. 1	171	5.5
Tunaboat Pier No. 2	171	5.5
Standard Oil Co. Pier	155	5.5
G Street Pier (Tuna vessels) West Side	278	8.5

STEVEDORES: Advance notice of 24 hours desired in order to arrange gangs.
MEDICAL: Agents should receive notification of medical attention required 24 hours prior to ETA of vessel. Complete hospital facilities available.
TANKERS: Diameter of load/discharge line 6 in. to 8 in. Slop (residue discharge facilities available upon request. 2 tanker berths – max. dr 35 ft. MLLW. There are also 2 tanker berths at National City Ma Terminal with 12 in. discharge lines.
DENSITY: Salt water in bay.
FRESH WATER: Fresh water available, delivery via pipeline.
FUEL: Diesel and bunker fuel available.
CONSULS:

Chile
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
Finland
France
Germany
Honduras
Italy
Mexico
Netherlands
Norway
Panama
Peru
Sweden

REPAIRS: All types of deck and engine repairs are available.
DRY DOCKS: Largest dry dock 1,000 ft. length, 140 ft. wi accommodates up to 30,000 displacement tons. Six additional dry doc from 3,500 to 28,000 displacement tons capacity.
SURVEYORS: A full complement of cargo inspectors and surveyors available locally.
GANGWAY/DECK WATCHMEN: Available if considered necessar
OPENING/CLOSING HATCHES: Carried out by stevedores.

CERTIFICATES: Registered Load Line Certificate, Certificate of Inspection, Safety Certificate.

CUSTOMS ALLOWANCES: Tobacco: Per each crew member U.S. Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine and/or Spirits: Quantity allowed per each crew member – 1 quart.

CARGO GEAR: Up-to-date certification of all cargo gear required in order to comply with Pacific Coast Marine Safety Code.

AIRPORT: Distance from marine terminal approximately 5 miles. Airport is serviced by major airlines.

TIME: Local time GMT minus 8 hours. Daylight Saving Time becomes effective the first Sunday in April and continues to the last Sunday in October.

HOLIDAYS: Recognised holidays are: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day, Independence Day, Labour Day, Columbus Day, Veteran's Day, Thanksgiving Day, Statewide Election Day, Christmas Day, or any other legal holiday that may be proclaimed by State or National Authority; when a holiday falls on a Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Non-Emergency Police Telephone Number is 236-6566. All other emergencies (including paramedic) Tel: 911.

EMERGENCY CO-ORDINATION CENTRE: Local maritime emergency co-ordination is handled by the U.S. Coast Guard, San Diego Region, 2710 North Harbor Drive, San Diego, CA 92101. Tel: (619) 557-5860.

TELEPHONES: Arrangements exist for placing telephones on board. No charge for hooking up.

SERVICES: Tank-cleaning equipment. Facilities for tank washings. Compass and radar adjustments, etc.

BANKS: Full banking services for both domestic and international transactions are available locally.

STORING: Storing and provisioning may be accomplished at dockside or via barge by prior arrangement. Trucks and forklifts may be used alongside and riggers are available by arrangement with the representative Agent. U.S. Customs Agents will board on arrival and seal all bonded items. Otherwise, normal procedures concerning controlled items will be observed by the vendor.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: U.S. Immigration requires completion of Form I-95, U.S. Coast Guard requires landing permits.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Domestic garbage (Non-APHIS Controlled): Numerous companies available through local agent. Volume, charges, and collection times vary.

International (APHIS/MARPOL V Controlled): Pacific Treatment Environmental Services, 1452 N.Johnson Avenue, El Cajon, CA 92020. Tel: (619) 441-1818. Volume, charges, and collection variable as required or scheduled.

WASTE OIL DISPOSAL: Available through agent. For MARPOL I controlled substances: Pacific Treatment Environmental Services, 1452 N.Johnson Avenue, El Cajon, CA 92020. Tel: (619) 441-1818. Volume, charges and collection variable as required or scheduled.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: Port of San Diego, P.O. Box 488, 3165 Pacific Highway, San Diego, California 92112. *Tel:* (619) 686-6340. *Telex:* 695-456. *Cables:* Sun Harbor San Diego. *FAX:* (619) 234-3965. *Contact:* Lawrence M. Killeen, Executive Director. Stanley R. Westover, Director, Marine Operations.

SAN FRANCISCO, California: 37.48 N. 122.25 W. (See Plan)

DOCUMENTS:

General Declaration (arrival) on Customs Form 1301.

Cargo Manifest (Customs Form 1302). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.

2 copies of Crew's Effects Declaration on Customs Form 1304.

2 copies of Ship's Stores Declaration on Customs Form 1303.

2 copies Passenger List (Form I-418).

2 copies Crew List (Form I-418).

1 copy "Oil Pollution Certificate", issued in Washington D.C.

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:

(a) Health Pratique.
(b) Master's Oath (Customs Form 1300).
(c) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
(d) Certified Crew List (U.S. vessels only).

Radio *Officer's Report:* April 1991.

Crew List: Get the Crew List (Form I-418) visaed at the last port before the USA. Be sure to insert in column 4, date, city and country of birth column 5 and place of issue and the authority issuing passport.

Arrival USA: Prepare for every crew member a Crewman's Landing Permit (Form I-95A). If they still have one it is only valid if they are still on the same ship.

Immigration: Hand over all Crew Landing Permits (Form I-95A) and passports. Every crew member must present himself to the Immigration Officer. Immigration will issue a form to be retained on board.

Customs broker:

2 copies Master's Oath (Form 1300).
2 copies Crew Lists (Form I-418).
2 copies Crew Effects Declaration (Form 1304).
2 copies Ship's Stores (Form 1303).
2 copies General Declaration (Form 1301).

Agriculture: Will board the ship and probabaly seal meat and vegetable storerooms. Agriculture will issue a Form 288, which must be presented at next U.S. Port. The seal may not be broken.

Customs: Customs will not board the ship.

Departure: A "Traveller" will be issued.

PILOTAGE: Pilotage in and around Golden Gate Region is performed by the San Francisco Bar Pilots who provide service from sea to all ports within the regions, including the Ports of Sacramento and Stockton.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radiotelephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange Communication Centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000 ft. wide, 55 ft. deep main ship channel across the sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The pilot boat is at a station 3 miles outside Main ship Bar Channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the Pilot Station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGES: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:

1. *General Anchorage*

(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.

(b) No. 9 – found in the South Bay, also has no limitations.

2. *Temporary Anchorage*

(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.

No. 8 – same as No. 7 but has a 6 hour limit.

3. *Explosive Anchorage*

No. 12 – is normally not activated.

No. 13 – found off Larkspur, this mooring is activated only as the need arises.

No. 14 – found in the South Bay, this mooring is always activated.

4. *Naval Anchorage*

No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supercede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°; North lane inbound 120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridgethere are large current eddies near the foundation piers which may require care to maintain proper course.

The Bar Channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 6 ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 40 ft. No restrictions on length or beam. The best time to dock with max. draft is at a rising tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 MHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

Coast Guard Regulations: Foreign tankers should give 72 hours' advance notice of arrival to ensure that U.S.C.G. has enough time to check the vessel's records for compliance or outstanding violations and to arrange for any onboard inspections required. Failure to provide 72 hours' notice may delay the commencement of cargo transfer while awaiting the required U.S.C.G. inspections. Letter of Compliance inspections must still be arranged through Washington D.C. The statutory notification remains at 24 hours. This notice applies only to the San Francisco Bay area. Any vessel required to have an inert gas system must have its tanks inerted at all times unless they are gas free.

VHF: VTS in operation. Call sign "San Francisco Vessel Traffic Centre", operates on Channels 16, 13, 12 and 18A.

TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan). (Not part of the Port of San Francisco). Alameda, an island and city across the Inner Harbour channel from Oakland, is the home of Encinal Terminals, the largest privately owned and operated steamship terminal in the United States. There are 6 berths for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk liquids. Total berthing length 2,125 ft. Depth 31 ft. to 33 ft.

Berth 5: Used for general cargo. Length 750 ft. Depth 35 ft. Berth equipped with Paceco crane.

Berth 6: Used for receipt and shipment of bulk liquids. Depth 30 ft. Facility has tank storage of 12 million gallons.

Operator: Encinal Terminals, 1521 Buena Vista Avenue, P.O.Box 2453, Alameda, CA. 94501. Tel: (415) 523-8800. Telex: TWX (910) 366-7174.

CONTAINER/BULK HANDLING FACILITIES:

San Francisco Container Terminal - (SFCT) South: (formerly Pier 94/96).
Container Ship Terminal.
Cargo Way.
Steamship Lines: Central American Container Line, Chilean Line, Grancolombiana Line, Evergreen Line, Navicana Line, Transportacion Maritima Mexicana, Zim Container Service.
Assigned to: Stevedoring Services of America.
Dimensions: Total terminal area is 76 acres. Outer apron is 2,456 ft.
Number of berths: Three at 40 ft. MLLW alongside and a design load of 800 p.s.f.
Special Facilities: The ondock Intermodal Container Transfer Facility accommodates up to 20 rail cars on a single switch. Port packers used for yard operations. Elevated control tower with radio and PA communications systems. A maintenance and repair building of 24,000 sq. ft. is sprinklered and has a 5-ton capacity overhead bridge crane. Other buildings include an administration building (14,000 sq. ft.) and gate house/terminal office building (2,475 sq. ft.). 135×240 volt and 32×480 volt reefer outlets.
Lift equipment: 2×30 ton Paceco cranes, and 2×30 ton Starporter cranes, rail mounted. The spreaders can be expanded in order to afford easy accommodation of both 20 ft. and 40 ft. containers. Each crane has a 50 ft. gauge with an outreach of 115 ft., backreach of 30 ft. and an 88 ft. clear hoist above HW (to be upgraded to 103.5 ft. clear hoist above HW). The Paceco can load and off-load containers thwartships. There is also 1×25 ton P&H mobile crane.
Connections: Trucks via Cargo Way; Southern Pacific Railroad tracks. San Francisco Belt RR.

San Francisco Container Terminal - (SFCT) North:
(formerly Pier 80)
Combination Terminal - Container/Ro-Ro/Unitised Break Bulk.
Foot of Army and Marin Streets.
Construction: Concrete pilings, concrete deck.
Steamship Lines: Blue Star Line, Ciamar, ELMA, Maruba, Mitsui OSK Line, National Shipping Corporation of Philippines, Nedlloyd Lines, Norsul, South Pacific Interline, South Seas Steamship.
Assigned to: Metropolitan California Stevedore Company.
Dimension: Total terminal area is 68.5 acres. The face measures 1,296 ft. North measures 1,138 ft. and South measures 2,657 ft.
Berths: Four at 40 ft. MLLW alongside.
Special facilities: 2 steel-framed transit sheds totaling 396,000 sq. ft., 273×220 volt and 36×480 volt reefer outlets and Container Freight Station accommodations. The van yard is fully lighted and completely fenced for security.
Lift equipment: 1×30 ton and 3×40 ton Paceco Cranes, and 1×30 ton Starporter Crane, rail mounted. All cranes can accommodate 20 ft. and 40 ft. containers. Each crane has a 34 ft. gauge and an 88 ft. clear hoist above high water. (2 New Paceco cranes have a clear hoist of 95 ft. above HW). Cranes can load and off-load containers thwartship.
Connections: Via Army Street or Marin Street; SP Railroad tracks.

Pier 70-72: Automobile Terminal.
Foot of 23rd Street.
Construction: Timber pile, timber deck.
Dimensions: The total terminal area is 24.5 acres. The face measures 723 ft.
Berths: Two at 40 ft. MLLW alongside.
Special facilities: 22 acres of open storage for car-loading, unloading and processing.
Connections: Via Third Street, East on 20th Street.

Pier 50: Combination Terminal.
Container/Ro-Ro/Unitised Breakbulk.
Foot of Mission Rock Street.
Construction: Concrete piles, concrete deck.
Steamship Lines: Various.
Dimensions: Total terminal area is 20.8 acres. The face measures 1,000 ft. North measures 1,480 ft. and South measures 1,100 ft. and 582 ft.
Berths: Four at 35 ft. MLLW alongside.
Special facilities: This pier offers 8 acres of open storage, 4 transit sheds totaling 274,000 sq. ft. and reefer outlets.
Connections: Via Mission Rock Street; Santa Fe Railroad tracks.

Pier 27 – 29: Newsprint/General Cargo/Containers.
Foot of Lombard Street.
Assigned to: Marine Terminals Corp.
Construction: Concrete piles, concrete deck.
Steamship lines: B.C. Forest Products, Papua New Guinea Line, Sig Bergesen, Star Bulk Shipping, Atlantic Cargo Services and Scann Scot.
Dimension: The face measures 206 ft., North measures 750 ft. and South measures 1,340 ft.
Berths: Three at 35 ft. MLLW alongside.
Special facilities: Piers 27-29 are integrated piers connected by a 117,000-sq. ft. bulkhead and 2.5 acres of open storage space. It also offers 601,700 sq. ft of transit shed space.
Connections: Via Embarcadero; Belt Railroad tracks.

Pier 92: Bulk Liquids Terminal
Cargo Way.
Assigned to: Baker Commodities (Bulk Liquids) and California Stevedo and Ballast (Fishmeal).
Construction: Concrete piles and deck, timber apron.
Dimensions: The face measures 702 ft. and 166 ft. This facility also has a transit shed measuring 57,270 sq. ft.
Special Facilities: 10 acres of open storage space for automobile automobile detailing and repair centre, bulk oil processing and storag equipment, and heated and cooled pipelines connecting pier with th storage tanks.
Berths: One with 38 ft. MLLW alongside.
Connections: Via Cargo Way from Third Street; Southern Pac Railroad/S.F. Belt

STEVEDORES: Stevedores orders must be placed 1000 hrs. for nig gangs and day gangs. 2×8 hour shifts 7 days a week. Sunday an Sunday night gangs must also be ordered on Saturday 1000 hrs.

MEDICAL: Medical, and all hospital facilities available. No advan notice required.

TANKERS: All major oil companies have their own oil discharging p which are outside the jurisdiction of the Port Authority. Reducing p are available. The max. drafts are 35 ft. Tankers arriving with a gr draft are partly discharged in the bay before docking.

Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 3 MLW.

Martinez: Shell Oil Co. Wharf, depth alongside 30 ft. – 42 ft. MLW.
Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30 ft. – 42 ft. MLW.
Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. MLW.
Unich Oil Co. depth alongside 35 ft.
Ozol: Oil Wharf, depth alongside 39 ft. MLW.
Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.

DENSITY: Average density in the bay is 1016.

FRESH WATER: Available at all piers, rate 25 t.p.h. – 50 t.p.h.

FUEL: Fuel available by barge or at the oil companies own pier. Special blends require some advance notice.

FIRE PRECAUTIONS: Any special instructions are given to the Master upon docking.

CONSULS: All Maritime countries represented at San Francisco.

REPAIRS: The major yards in the Golden Gate region have fully equipped machine-shop facilities capable of handling virtually any job; welding, heavy plate construction, turning, boring, facing, grinding, milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electrical, carpentry, painting, rigging, machining and boiler work.

Southwest Marine, Westwinds, Service Engineering, SFW Corp., Todd and Triple "A" Repair are all located in San Francisco and provide berth space for all types of ship repairs at plant and at any location in the San Francisco Bay area.

DRY DOCKS: San Francisco Shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Continental Maritime - New floating dock, carrying capacity 22,000 tons, LOA 664 ft., length over blocks 579 ft. clear draft over blocks 34.5 ft., clear width for docking 138 ft. Dock will accept vessels up to 70,000 d.w.t.

Williamette Iron and Steel Company's yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. × 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60 ton capacity and 2 of 45 ton capacity, and the outfitting pier by 3×45 ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay piers.

Hunters Point Naval Shipyard: (Triple A Machine Shop) Under lease from the U.S. Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.

OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.

CUSTOMS ALLOWANCES: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.

REPATRIATION: All facilities for crew changes by sea, air or land.

AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers..

TIME: GMT minus 8 hours. Summertime from first Sunday in April till last Sunday in October – GMT minus 7 hours.

HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Dial 911 or Police Tel: 533-0123; Fire Tel: 861-8020; Ambulance Tel: 695-6600.

TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.

SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

This service can be arranged using skips or pick-up trucks alongside. Collection by appointment. Contact Golden Gate Disposal Co. Tel: (415) 621-3840.

WASTE OIL DISPOSAL: Pick-up by tanker truck or barge at most berths. 24 hour service. H & H Ship Service Co. Tel: (415) 543-4835.

SEAMAN'S CLUBS: Apostleship of the Sea, 399 Fremont Street, San Francisco, CA 94105. Tel: (415) 421-7845.

Den Norske Fjomannskirke (Norwegian), 2454 Hyde Street, San Francisco, CA 94109. Tel: (415) 775-6566.

Golden Gate Christian Reformed Church (Chinese), 378 18th Avenue, San Francisco, CA 94121. Tel: (415) 751-2242.

Scandinavian Seaman's Mission, 2128 15th Street, San Francisco, CA 94114. Tel: (415) 861-8499.

CURRENCY: U.S.Dollar (U.S.$).

GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.

DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.

Improvements to Pier 35 – Passenger Terminal: Improvements to the passenger boarding and unloading facilities at Pier 35, including a new Customs area have been completed.

Pier 35 is the major steamship passenger facility in the Bay Area and the point of disembarkation for tens of thousands of cruise passengers who look forward to San Francisco as a port of call or destination.

The area involved contains a 200,000 sq. ft. passenger processing facility on the first floor with a 10,000 sq. ft. visitor waiting area on the second floor.

Expansion of Rail Capabilities to Pier 94-96: New track construction, as well as reconstruction of existing track, from the Terminal to Southern Pacific's mainline track has been designed to allow unit train access onto the Container Terminal.

The Container Terminal is composed of Piers 94-96. This 65 acre three-berth facility is serviced by 4 rail-mounted cranes and represents a $45 million capital investment. An additional 75 acres of expansion area lies adjacent to the Pier.

Direct rail access to this terminal will position San Francisco as a competitive intermodal port offering direct land-bridge and mini-bridge services through Port facilities. By being able to move containers directly from ship to rail, carriers will have the advantages of reduced costs, better control of containers and less damage.

San Francisco will be the first port in California with this capability.

AUTHORITY: Port of San Francisco, Ferry Building, San Francisco, California 94111. *Tel:* (415) 274-0400. *Telex:* 275940 PSF UR. *FAX:* (415) 274-0528. *Cables:* Sfportcomm. *Contact:* Dennis P. Bouey, Executive Director. Roger Peters, Director - Cargo Services. Charles Mitchell, Chief Wharfinger.

SAVANNAH, Georgia: 32.02 N. 81.07 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Stores Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.

These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Customs Form 1302, in duplicate with Abstract Manifest of Savannah only cargo; Crew List on Form I – 418, in triplicate; Passenger List on Form I – 418, or other acceptable form, in triplicate; Crew Curio List, in triplicate, with Crew Declaration on Customs Form 1304, or Crew List on Form I–418, in triplicate, with numbers of attached Forms 5129 endorsed thereon for American vessels, List of Sea Stores and Ship's Stores Customs Form 1303, in triplicate; for American vessels, Repair Declaration on Customs Form 226; for American vessels, Certified Crew List; Clearance from Last Foreign Port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1301, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah; Stores List, in duplicate; Crew List, in duplicate; Crew Purchase List, in duplicate, and any Crew Declarations on Customs form 5123 for Savannah for American vessels; Passenger List, in duplicate.

PILOTAGE: Savannah Pilots' Association, 550 E. York, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738 kHz. Pilot boards vessel 1 mile outside Fairway Buoy.

SHIP CHANNEL: Project depth and widths are as follows: Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 35 ft. depth×400 ft. width.

ANCHORAGES: Outside Fairway Buoy, North and N.E. of Fairway Buoy; no anchorages in river.

RESTRICTIONS: 31 ft. at any time; over 31 ft. on incoming tide, no restrictions day or night.

MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 14 – 15 – 16 – 17 (slip 1). Vessels 550 ft. to 600 ft. on slack water; vessels less than 550 ft. any time to Berths 14 and 17; vessels docking or undocking at OT 15 – 16, with vessels in OT Berths 14 and 17, can be docked or undocked during slack water.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.

TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessels in vicinity of Fort Jackson or well below berth. Tugs' lines used at all times.

BERTHING: The Georgia Ports Authority operates 12 general cargo berths, 2 tanker berths, 5 container berths and 1 dry bulk cargo berth.

CRANES: *Ocean Terminal:* One 175 short ton gantry crane, one 100 short ton gantry crane, two 50 short ton gantry cranes, one 30 short ton gantry crane, one 100 ton mobile crane, one 30 ton mobile crane. *Garden City Terminal:* Two 35 short ton gantry cranes, one 100 ton mobile crane, one 30 ton mobile crane. Garden City Terminal (container port) – 9×45 short ton container cranes, 9×45 short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.

BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 1 dry bulk cargo berth (loading). This facility is suited for the handling of various ores, grains, peanuts, meals and fertiliser materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.

Colonial Terminals: Kaoline/mineral bulk terminal. Handling rate 800 t.p.h. 12×109 cu.ft. Silos for kaoline. Minerals stored in 8×73,000 cu.ft. storage bays.

SPECIALISED CARGO HANDLING FACILITIES: Located at Container Port, on the up-river end of Berth 60, is a stern Ro-Ro ramp which is situated as to allow a vessel to utilise the Ro-Ro ramp and container cranes at the same time. Accommodating side and quarter ramps also available. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 68,000 sq. ft.

BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW. Distance between fender uprights – 600 ft.

Also see "Developments".

MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.

TANKERS: Standard requirements on diameters of load/discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. A.P.I. of local types of oil is 36 gravity marine diesel fuel. 8 tanker berths in port, max. drafts range from 32 ft. – 38 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

	High Water	Low Water
Savannah River Entrance		
Surface	1.0196	1.0090
Bottom	1.0196	1.0181
Port Area		
Surface	1.0022	0.99915
Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals.

FUEL: Marine gas oil (No. 2 Fuel). Marine diesel oil (No. 4 Fuel Oil). All Intermediate grades from Intermediate 30 (=30 centistokes at 50°C) to Intermediate 420 (=420 centistokes at 50°C) Bunker fuel oil (No. 6 Fuel). Advance notice of 24 hours required.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

CONSULS:

Savannah: Brazil (912) 234-2266. Dominican Republic (912) 234-2266. France (912) 236-2491. Germany (912) 236-8165. Italy (912) 232-5581. Sweden (912) 238-2301.

STORING: See "Prelims".

1. Yes
2. Yes
3. Yes
4. Yes
5. Usual U.S. Customs Regulations
6. Yes

SHORE LEAVE: Crew members are allowed ashore provided they are not detainees.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, I-94, to any passenger; and I-95, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

DELAYS: With reasonable advanced notice of ETA no delay anticipated in berthing, loading, discharging or bunkering.

DEVELOPMENTS: Container Berth No. 6 under construction.

New bridge constructed close seaward of Talmadge Bridge with clearance of 186 ft. at H.W.

Channel to be dredged to 42 ft. (from 38 ft.).

Channel has been widened from 400 ft. to 500 ft.

SHIPMASTER'S REPORT: August 1980.

Pilotage: Because of difficulties with the port crane and large storing programme we elected to berth starboard side alongside this call.

The Pilot will only undertake this on the flood (since vessel is invariably deep, berthing will only be done on the flood in any case) but because of a delay we were off the berth very nearly at slack water. The Pilot carried out the manoeuvre in the most reassuringly competent manner and I would not hesistate to do the same again if necesary; only with a Pilot prepared to carry out the manoeuvre.

Vessel is swung downriver off the container berth, about 4 cables below the berth.

When landed on starboard side to, it is just possible to plumb the berth with the crane by making the connection to the after crossover.

Discharge: Straightforward; some slight initial delay. Capable of receiving cargo at over 1,000 t.p.h. Our rate 810 t.p.h. overall.

Connection 12 in. 150 ASA. No VRL.

Density 1000 this call.

Storage capacity about 50,000 cu.m. Storage plant only for filling road and rail tankers.

U.S.C.G.: Deck inspection before commencing. Vessel was congratulated on her 'very high standard of equipment and personnel'. Monitoring detail on board throughout. Scuppers unplugged, please.

They are aware of the draft problem at LW and boarded immediately on berthing.

General: Lloyd's Surveyor easily available.

Bunkered lube oils whilst discharging with U.S.C.G. approval.

Can touch up ship's side from quay.

Movements allowed at night, dependent on draft/tide.

Chandler: Southern Marine: Poor service this time despite our cables. This is in contrast to excellent service last time. These services are entirely at the mercy of ship representative.

SHIPMASTER'S REPORT: October 1980 (Updated 1984).

Approach: From East: The coast between Sandy Point to Isle of Palms near Charleston shows up at 40 miles and South of Hunting Island near Port Royal Sound at 35 miles, on radar. Port Royal Channel gives a good radar echo at 15 miles. Soundings give little indication of position until fairly close inshore. Savannah light was observed at 28 miles.

D/F stations at Tybee and Charleston are useful if nothing else is available.

Anchorage: Pilots advise anchoring to N.E. of Savannah Light Beacon. Good holding ground without obstructing arriving and departing traffic.

Arrival Procedure: ETA through Agents.

For deep draft ships proceeding to Ammonia Berth No. 61 about 5 miles above town, Pilot will board between 3 hours to 1.5 hours before HW.

Under 31 ft. can berth/sail any state of tide day or night. Berthing day or night.

Can berth either side to, the generally accepted side to is port side. However, if taking stores try for starboard side as the crane plumbs better, plus the Chicksan arm is in the way of trucks.

For starboard side to, arrive well in time for earliest Pilot boarding time.

The problem is the berth has a reported 36 ft. at LW (actually by lead line we found (Oct. '80) a minimum of 33 ft. 9 in. reduced to datum along the dock face). Therefore before LW you have to pump out about 2,000 tonnes, any delay can be important.

Pilots: Board from large cutter between Savannah Light and Whistle Buoy.

Give plenty of notice as cutter might be lying up-river at Pilot Station. Based at Cockspur Island in the ship channel. Call "Savannah Pilots".

Pilot ladder must be 8 ft. above water. Side dependent on wind.

Berthing Pilot joins from tug using own ladder at Kings Island.

On departure from berth, Pilot requires 1.5 hours notice.

VHF: "Alpha" Channels used frequently.

U.S.C.G. uses 22A, Pilots use 18A, tugs use 19A. Otherwise use 16, 12 and 13.

Channel: The maximum draft of vessels has been 39 ft. with a 6 ft. tide. Normal maximum 37 ft. This can only take place on the flood so as to be on the berth at slack water.

Channel is narrow, less than Houston Ship Canal. Constant dredging is required. From Whistle Buoy to berth is about 3 hours.

Vessel is swung in Argyll Turning Basin off the container quay. 24 hour navigation is undertaken.

From soundings from Savannah Light Beacon to Berth No. 61 proceeding inwards 3 hours before Savannah HW (2.5 m.) a minimum of 1.6 m. under keel was found with draft 11.15 m.

Berth: Depth: See "Plan". Minimum depth reduced to datum found to be 33 ft. 9 in. along jetty face.

Berth No. 61: Owned by G.P.A. and leased to Occidental.

Concrete jetty on piles with centre section connected by roadway to shore, and mooring dolphins either end connected to jetty by catwalk. Length of centre section 266 m. Good fendering.

The upriver dolphin is not used due to damage. Can turn gangway out before arrival.

Pilot with the aid of powerful tugs swings vessel in very competent manner at Argyll Turning Basin.

Density: 1001 to 1002.

Moorings: Basic 3, 2, 2, each end. Forward headlines (3) go to Ro-Ro dock and breastlines to dolphin with springs to main jetty. Due to damage the upriver dolphin cannot be used so all stern and breast lines go to Grain Berth No. 62.

Springs out first, last in. Mooring boat used. Port Authority mooring gang require 4 hours notice.

Tugs: Atlantic Towing Company and Crescent Towing and Salvage Company of Savannah, Inc. based along town water front. Several large and powerful tugs. Two used, one each end, American style, tie up with own lines alongside. One and a half hours notice required.

U.S.C.G.: Very co-operative. Although Agent will try to get them to board in river for pre-inspecton, they board at dock. Carry out Check List and inspection before cargo allowed to be worked. Takes about 30 minutes.

One U.S.C.G. rating on board at all times (8 hour shifts). Strict on pollution.

The U.S.C.G. do not seem to mind which way round the ship is berthed. Scuppers to be plugged.

Discharge: Into mobile Chicksan (as berth only leased). After manifold if starboard side too. Maximum rate about 1,200 t.p.h. but generally nearer 900 t.p.h. to 1,000 t.p.h. Connection 12 in. 150 ASA. No vapour return line. Shore tank capacity 45,000 tonnes, which fills rail and road tankers. Takes about 45 minutes to connect/disconnect. Shore labour assist. Shore personnel always in attendance. Manager very helpful.

In light ship condition we had 18 m. air draft which did not create any difficulties.

General: Lloyd's Surveyor easily obtainable from Jacksonville. Fresh water from jetty, require 6 hours notice, especially at weekends.

Lube oils whilst discharging with U.S.C.G. permission. Stores lorry able to get close alongside ship.

Ship's crane (if starboard side to) will just plumb after end of jetty.

Liferaft service (Beaufort) at Southern Ship Supply – 24 hour service.

Shoreline infested with rats, snakes and big spiders.

Chandler: Southern Ship Service, good fresh produce.

Town: About 5 miles away. Can telephone for taxi – free of charge local calls, from hut at grain berth about 100 yards from gangway.

Airport 6 miles South of town centre with regular flights to Atlanta International, etc.

SHIPMASTER'S REPORT: August 1990.

Charts: B.A.Charts No. 2807 and 2865.

Approaches: New exploration towers around 80° 10' W., about 45 miles offshore give a guide.

Coastline low, first indications on radar at 30 miles.

Savannah Light good, but Racon not operating (Pilots report that it rarely does).

About 30 miles East of the Gulf Stream axis, a Southerly set of about 1 knot was found.

Pilots: Pilot boards from large fast blue hulled cutter named 'Georgia' or smaller cutter called 'Savannah' at Fairway Buoy. Pilot will advise height of ladder, dependent on cutter.

Pilot Station at Cockspur Island inside breakwater at Lat. 32° 02.05' N., Long. 80° 54.20' W. Just West of the Pilot Station is a U.S.C.G. base.

Usual East Coast U.S.A. practice, tug master actually berths and unberths vessels.

Pilotage to Ammonia Berth (No.61) at Garden City is about 2.5 hours.

VHF: Pilots generally use Channel 14.

Anchorage: North of Savannah Light Tower, exposed.

Entry: For gas carriers no night transit inward or outward, unless totally gas-free, between 1600 hrs. (last pilot boarding time) and 0700 hrs. (first pilot boarding time).

U.S.C.G. do not escort vessel, unlike some other U.S. ports.

Channel: The range light at Fort Scriven is conspicuous. Pilots report 33 ft. maximum draft any state of tide, or 39 ft. H.W. to Berth No.61, above this berth to Port Wentworth 20 ft. at L.W. Maximum length 1,000 ft.

Actually found 36 ft. (reduced to M.L.W.S.) as minimum depth to Berth No.61. Least depth about 1 mile seaward of Talmadge Bridge.

New Bridge nearly completed, just seaward of Talmadge Bridge. Completion due early 1991. Vertical clearance MHW – 185 ft. When commissioned, the old bridge will be removed.

Tugs: 9 tugs up to 4,000 i.h.p. available from Atlantic Towing (now under new name) and Crescent. Two tugs and tug's lines generally used. Tugs join just upriver of bridge.

Berth: Ammonia Berth is Berth No.61 at Garden City, just above container quays. Berth is able to take up to 75,000 cu.m. gas carriers, but restricted due to river draft.

Always port side too, head upriver. Vessel swings in adjacent turning basin on departure.

Concrete dock with reasonable fendering. Mooring dolphin either end of dock connected by catwalk.

Mooring leads good (2, 2, 2), if bollards on adjoining docks used. No mooring boat, using wires as head or stern lines takes a long time.

Cargo: Mobile Chicksan which plugs into quay (12 in. 150 ASA coupling). It can take a long time to disconnect, if Chicksan diesel power plant fails to operate, which it is prone to.

Discharge to 45,000 tonne tank behind Soya Bean Silo. Actual pumping distance is about 0.5 miles.

Sometimes VRL from shore used (out of commission this visit).

Fast pumping at around 850 t.p.h. at maximum B.P. of 6.8 kg. (100 p.s.i.), back pressure generally less.

Only NH3 handled, terminal likes product cold - no warmer than −32°C.

Surveyors (Saybolt) prompt and read draft when vessel berths.

Terminal representative onboard throughout discharge, in Cargo Control Room with UHF set.

U.S.C.G. very attentive and always board vessels on arrival.

Pipework checked for soft patches – leaks, if any found, vessel will nearly always be refused permission to discharge.

Facilities: Fresh water available on jetty. Good pressure, no charge.

Stores trucks allowed alongside forward up to Chicksan position.

Bunkers by barge during discharge.

Public telephones near Soya Bean Silo office, or Agent leaves his mobile on board.

Local airport very near at hand with frequent flights to Atlanta International.

Chandler – We obtained some bonded stores from Southern Marine Supplies. Prices high compared with Tampa, and range limited.

SHIPMASTER'S REPORT: August 1996.

Charts: B.A. 2801 and B.A. 2807.

Approach: Flat and featureless. From the N.E., the Port Royal buoyed channel is radar conspicuous.

The light on Savannah Tower is not conspicuous. Racon can be detected at about 12 miles.

Anchored vessels N.E. of Fairway Buoy are a good indication of approach.

Anchorage: N.E. of Fairway Buoy in approx. position Lat. 31° 59' N., Long. 80° 42' E., open and exposed. Holding poor.

Pilot: Available 24 hours. Pilot station on Cockspur Island just seaward of U.S.C.G. Station Tybee (Lat. 32° 02' N., Long. 80° 53.9' W.). Pilot boards at Fairway Buoy.

Two launches – "Savannah" and "Georgia". "Georgia", the largest, is fast and powerful. For ships with low freeboard, Pilot steps onboard from launch boarding gantry. Launch can operate in all conditions. To board and disembark, vessel to have speed of 6 knots to 8 knots. Vessels berthed to order Pilot 2 hours in advance for leaving.

VHF: Pilot station as ALRS, principally Channel 14.

Channel: Controlling drafts refer to fresh water. 37 ft. any tidal state. 42 ft. on HW.

Port can take all Panamax container ships.

Fog can cause delays. Vessels already underway in channel continue on radar, otherwise if at berth or seaward of Fairway Buoy, wait for fog to clear.

Distance to city docks – 24 miles (about 3 hours).

Vessels can generally berth any side to, dependent on load/discharge requirements.

Four Turning Basins – Fig, Marsh, Kings and Argyle Islands.

For Colonial Docks, the Marsh Island Turning Basin is used if necessary.

Vessels up to 120 m. LOA with thruster can usually turn short round in river.

Tugs: Two companies (Atlantic and Coastal) have numerous powerful tugs, based near city waterfront. Tugs' lines used. Dependent on size and thrusters, vessels normally take at least one tug. Tugs join vessels at Talmadge Bridge.

Weather: Hurricane season officially 1st June to 30th November.

If hurricane is approaching, the U.S.C.G. Captain of the Port will require vessels to leave port, if able to do so.

The area is low lying and does not provide a safe haven.

Berth: Discharge of Sulphuric Acid at Colonial Dock No. 3 (Lat. 32° 06.10' N., Long. 81° 06.9' W.). Berth also used for discharge of other chemicals and fuel oil.

The berth is a common user terminal as part of Kaolin Clay complex. Vessels should be securely moored due to passing traffic.

The ebb is strongest at a maximum of 5 knots.

We found a density of 999 at H.W. and L.W. Tidal range up to 8 ft.

Reported to have 26 ft. M.L.W. alongside.

The berth is a tanker 'T' type of substantial concrete construction with large outlying mooring dolphins connected by catwalks.

Moorings: Depends on ship size. If port side to – 2,2,2. Stern lines to shore bollard. Good mooring gang.

Cargo: Sulphuric Acid discharged through 1×6 in. rubber hose with flange connections. Hose strung from hose gantry. Discharge rate about 500 tonnes/hr. into 2×12,000 tonne tanks near berth.

Sample surveys prior to discharge. No discharge until samples passed.

Facilities: Fresh water available ex-berth, connection near hose gantry. It has good pressure.

Telephone at next berth upriver.

Stores have to be hand-trucked along mooring catwalk to dolphin, about 100 m. Vessel cannot handle stores amidships whilst working cargo.

Chandler – used Southern Marine – good.

Savannah Airport about 15 minutes from ship.

Fuel by barge. Minimum HFO quantity is 100 tonnes. All fuel grades available.

All facilities, including repairs.

Authorities: Liable to U.S.C.G. visit.

Customs require crew members signing-off to present themselves at Customs House with baggage, they will not clear on vessel.

The following documents are required if first port:

6 copies Crew List.
2 copies Stores List.
2 copies Crew Effects List.
2 copies Declarations.
3 copies Cargo Manifest.
Crew Shore Passes.

AUTHORITY: Georgia Ports Authority and East Coast Terminal, Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour Regulations, pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

Georgia Ports Authority, P.O.Box 2406, Savannah, Georgia 31402. *Tel:* (912) 964-3811. *Telex:* 804782 and TWX 810-784-5634. *Cables:* Gaports. *FAX:* (912) 966-3615. *Contact:* George E. Nichols, Executive Director.

SEARSPORT, Maine: 44.28 N. 68.56 W. (See Plan)

LOCATION: The Port of Searsport is located on Penobscot Bay, approximately 112 road miles East of Portland, and 20 miles from Bangor.

DOCUMENTS:

Clearance from Last Port.
2 copies of Form 1300 (Master's Oath).
2 copies of Form 1301 (General Declaration).
3 copies of Form 1302 (Inward Foreign Cargo Manifest).
NOTE: Form 1302 will only be accepted.
2 copies of Form 1303 (Ship's Stores Declaration)
(Including Narcotic Medicines).
Form 1374 Outward Foreign Manifest.
2 copies of Form 1304 (Crew Effects Declaration).
2 copies of I-418 (Crew List).

Also available: Vessel Register, Safety Equipment Certificate, Load Line Certificate, Certificate of Financial Responsibility, (Oil Pollution), and U.S. Tonnage Tax Receipts.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours in advance of arrival, correcting at 24 hours. Pilot's boat called on Channel 16.

Vessels from South and West, Pilot boards at Monhegan Island (Buoy 14M). Vessels from East, Pilot boards at Matinicus (Buoy 2WB). The Pilot Station is located on Matinicus Rock Island. Pilot boards at Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49' N., Long. 68° 50' W.

The pilot boat is a fishing boat with a white hull showing the international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 MHz).

36 and 24 hours ETA requested, cable "Penbay – Belfast/Maine", via Chatham Radio.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide – approach to Searsport 35 ft. – Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channels 16 and 13. Vessels arriving Searsport go through radio station at Chatham, Mass., RCA installation, SSB station or a VHF public correspondence station.

TUGS: Maineport Towboats Inc., Marshall Wharf, Belfast, Maine 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders for tugboat service be given during normal business hours, 24 hours in advance.

Tugs: "Verona", 1,800 h.p.
"Mack Point", 1,800 h.p.
"Cape Rosier", 1,800 h.p.

Radio: Ship to ship, VHF Channels 16-13-10.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostock Pier: Length 800 ft., width 100 ft. Depth alongside (East side) 34 ft., (West side) 30 ft.

This pier handles a wide variety of cargoes including petroleum, forest and agricultural products, such as newsprint, tapioca, long logs dimension lumber, potatoes, etc.

Cargoes can be off-loaded or loaded directly from or to railroad ca or trucks. There are 4 warehouses on the facility available for import export cargoes.

C. H. Sprague Dock: Length 614 ft., depth alongside East side 33.6

This facility has and can handle many bulk cargoes, including sa coal, gypsum, potash, bauxite, liquid chemicals, and Bunker petroleum. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Weekdays:

Order gangs by 1700 hrs. for following day 0800 start.
Order gangs by 0900 hrs. for same day 1300 start.
Order gangs by 1300 hrs. for same day 1800 start.

Weekends:

Order gangs by Saturday 1200 hrs. for a Sunday 0800 start.
Order gangs by Saturday 1200 hrs. for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, W County, which takes bed patients.

TANKERS: 2 berths at Searsport – 2 for No. 6 oil and 1 for light oil and gas. 2×8 in. hoses. 34 ft. LW.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire at anchorage. Drinking water available at piers.

FUEL: No. 6 oil at C. H. Sprague Dock. Light oils delivered by tank truck at dock.

FIRE PRECAUTIONS: At certain oil piers information given to Shipmaster upon arrival at pier. Ample fire protection, salt-water lines, sprinkler system on pier, local fire department.

CONSULS:

French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.

Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.

Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Maine.

Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, Vice-Consul.

Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portland, Maine.

Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portland, Maine.

REPAIRS: All types of machinery repairs.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew may open hatch after longshoremen boarded ship.

CERTIFICATES:

Load Line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage Tax Certificate of previous trip if have them.
Radio Operator Licence.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wine and/or Spirit allowance 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Bangor International Airport, 30 miles, Delta, United Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas Day and Veteran's Day. Possible to get gangs to work all days except on Labor Day and Christmas.

POLICE/AMBULANCE/FIRE: Police Tel: 548-6372; Ambulance Tel: 548-2900; Fire Tel: 548-2900.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

IDENTIFICATION CARDS: Form I-95 must be filled out on arriving unless seamen has had a prior one made out for a previous arrival on same ship (on plastic card).

DEVELOPMENTS: Directly across from the Port of Searsport lies Sears Island. A major new cargo facility and industrial park will be constructed. Emphasis will be directed toward potential user groups, equipment assembly and manufacturing, plus a full spectrum of forest products storage and shipment.

This development will feature modern container-handling facilities and breakbulk handling capability.

AUTHORITY: State of Maine, Department of Transportation, Division of Ports & Marine Transportation, State House Station No. 16, Child Street, Augusta, Maine 04333. *Tel:* (207) 287-2841. *FAX:* (207) 287-2896. *Contact:* R.D. Elder, Port Development Director.

Town of Searsport, Maine, P.O.Box 499, Searsport, Maine 04974. *Contact:* Wayne Hamilton, Harbour Master. Tel: 548-2985.

SEATTLE, Washington: 47.36 N. 122.20 W. **(See Plan)**

PORT LIMITS: Port of Seattle limits are co-extensive with the boundaries of King County in which Seattle is situated. A vessel has "arrived" when it has tied-up to a berth.

DOCUMENTS (on arrival from foreign):

Clearance from Last Foreign Port.
2 Crew Lists on Form. I-418.
2 Passenger Lists on Form I-418 (if applicable).
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for discharge on CF1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on 1302, one for Customs at this port and the other for use as a "Travelling Manifest" to go forward to other discharge ports.

(A) – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43. (Only required if boarding on arrival is necessary) see "Health" before first U.S.A. port.

(B) – For U.S. Dept. of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form AIQ.43.

(C) – For U.S. Immigration Boarding Officer:
Crew List on Form I-418 visaed by U.S. Consul abroad.
Passenger List on Form I-418.
Attachment to Passenger List on Form I-92.
Form I-94 for each passenger.
Form I-95 or ID Card (Form 184) for each crewman. (These are reusable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival).

(D) – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I-418).
3 copies Cargo Manifest on Form 1302.*
3 copies Stores List – Form 1303.*
3 copies Crew Purchases or Curio List (Form 1304).*
3 Passenger Lists on Form I-418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of Lists of Stores and Curios remaining on board.

PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Port Angeles Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at Pilot Station off Port Angeles.

Port Angeles Pilots: Pilotage service furnished to any port or place on Puget Sound and its adjacent inland waters.

Pilot stations are located on Ediz Hook, Port Angeles and Seattle Washington.

Vessels desiring a Pilot should proceed to a position 0.25 miles East of Ediz Hook, where Pilot will board the vessel. If a Northwest wind, sea, or swell exists, vessels are requested to proceed to a position inside and South of Ediz Hook to obtain a lee and facilitate boarding.

In clear weather, vessels should indicate their desire for a Pilot by hoisting the International Code Flag "G" and by blowing the whistle signal of 1 long, 1 short and 1 long blast.

In fog or thick weather, the blowing of this whistle signal will attract the attention of the Pilot Station and repetition of this signal will assist the pilot boat to locate the vessel.

The Pilot Station is located 1,200 yards, 277° from Ediz Hook Light. At night, the station will show from a mast, 3 vertical lights, the highest and lowest being red and the middle one green, to indicate that the pilot boat is en route to the ship. The Pilot Station is equipped with radar to locate and track vessels. The pilot boats, 'Juan de Fuca' and 'Puget Sound' are equipped with radar.

Communications: Vessels may ensure prompt service by advising their ETA, Port Angeles, 24 hours in advance, via radio to station KLB, addressed to Port Angeles Pilots, Seattle, Washington. A vessel may also advise the Pilot Station, Port Angeles, Washington, addressed to "Pilots Port Angeles" of their ETA, and amended ETA, when subsequent conditions make it necessary. The message is transmitted immediately from KLB to Port Angeles via telephone. The Pilot Station, Port Angeles, monitors VHF Channels 14 and 16 continuously and transmits on Channel 13.

At the time of passing Cape Flattery, inbound vessels are requested to re-affirm their ETA by calling the Pilot Station directly, using VHF calling Channel 16 and transmitting on Channel 13.

Channel 14 is for Vessel Traffic System only.

Pilot Ladder Requirements:

1. Please contact pilot boat via voice radio (Channel 13) approximately 30 minutes prior to arrival for desired lee.

2. The ladder must be kept clean and used solely for embarking and disembarking Pilots.

3. Rigging of the ladder, along with embarking and disembarking Pilot, must be under supervision of a licensed officer.

4. The ladder must be made in 1 length and not consist of 2 lengths shackled or lashed together, and should be equipped with spreaders about 10 ft. apart to comply with SOLAS Regulation 17, Chapter 5.

5. The pilot boats have their own lights to illuminate the pilot ladder, but a standby light should be ready for an emergency.

6. The area of the deck where the Pilot boards and leaves must be well lighted and the area must be clear of all obstacles to ensure a safe passage for the Pilot.

7. *No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.*

8. Ladders must be rigged well clear of discharge and water outlets and at a place near midship which affords the best lee for the Pilot. At no time should the ladder be rigged near the stern of the vessel.

9. Means must be provided to allow the Pilot to pass safely onto the ship's deck. Where portable stanchions and bulwark steps are used for this, the portable stanchions must be rigidly attached to the ship's structure and not the steps. The bulwark steps must also be securely fastened.

10. The ladder must be in good condition. The treads must remain horizontal when used and the upper surface must have a rough nonskid quality.

11. Manropes approximately 3 in. manila in circumference, a heaving line and a ring buoy with a self-igniting light must be provided.

12. If your vessel is to take a load of logs, make sure the Agent makes arrangements to have a cat-walk to provide safe passage to and from the ladder.

Accommodation Ladders for Embarking or Disembarking of Pilots:

1. All vessels where the distance from sea level to the point of access of the ship exceeds 9 m. (30 ft.) at any time, should carry on each side an accommodation ladder. The ladder is to be so sited that when in use the lower end of the ladder shall rest firmly against the ship's side under all conditions of roll and heel, clear of all discharges, and within the parallel length of the ship.

2. A conventional pilot ladder should be rigged just abaft the lower platform of the accommodation ladder. The pilot ladder should be secured firmly to the lower platform to allow access between the pilot ladder and accommodation ladder. The pilot ladder should extend at least 2 m. (6 ft.) above the lower platform of the accommodation ladder. Manropes to be provided and rigged alongside the pilot ladder.

ANCHORAGES: Extensive anchorage in Eliott Bay, depths of 90 ft.

RESTRICTIONS: Overhead power cables at Burlington Northern Railroad Bridge with a vertical clearance of 155 ft.

MAX. SIZE: Controlled by depth at berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, 2nd tug normally used.
BERTHING: Over 46 berths for ocean-going vessels. Depths alongside, 10.6 m. – 21 m. MLLW.

Terminal No.	*Total Length* (m.)	*Depth* (m.)	*Remarks*
2	244	12.0	Leased to North Star Forwarding – barge berths.
5	537	13.5	3 container berths.
	166	—	Undeveloped berth (one).
18	1,844	12.0 – 15.0	Container, breakbulk, bulk, Ro-Ro, non-petroleum products. 352 reefer plugs.
25	482	15.0	2 container berths. 120 reefer plugs.
28/30	823	12.0	Container and breakbulk.
			2 container berths and 2 general cargo berths.
37	270	15.2	1 container berth. 186 reefer plugs.
42	290	15.2	1 container berth
46	336	15.2	1 container berth. 217 reefer plugs.
48	585	10.6	
66	436	8.5 – 10.6	3 berths. Passenger ship terminal.
86	130	21.0	Export grain terminal operated by Cargill, Inc.
91	3,058	10.66	General cargo, auto import, fruit, frozen meats and seafood. Oil tank farm handles bunker fuel and waste oil products. Chill space 53,802 cu.m. Liquid storage 213,000 barrels.
105	338	12.0	Barge facility.
115	366	12.0	Steel imports, fish and crab processing, general cargo.
	122	4.25	Barge berth.

CRANES: *Terminal 5:* 5×50 ton container cranes.
Terminal 18: 6×45 ton container cranes and 1×50 ton revolving crane.
Terminal 25: 3×45 ton and 1×33 ton container cranes.
Terminal 30: 1×50 ton gantry, 3×50 ton container cranes.
Terminals 37, 42 and 46: 6×45 ton container cranes.
Terminal 115: 1×50 ton gantry crane.
STEVEDORES: 40 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.
SPECIALISED HANDLING FACILITIES: Terminals 18 and 20 combined and now designated as Terminal 18. Pipe-lines are available to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 105 – 2 berth, barge operation – Crowley Maritime.
Terminal 115 – 2 berths, capacity, import steel.
Terminal 115 – Jore Corporation Barges, has specialised finger piers, to handle container-to-barge operations.

Terminals 5, 18, 25, 30, 37, 42 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 30, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. 1 berth, length 600 ft. (Max. LOA 1,400 ft. using dolphins). Depth of water 70 ft. at MLLW. Grain Terminal: capacity 4.2 million bushels, loading rate 3,000 t.p.h. via twin conveyor belts.

DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.
FRESH WATER: Available at all wharves.
FUEL: Available.

SEWARD, Alaska: 60.06 N. 149.27 W. **(See Plan)**

DOCUMENTS:

3 copies Cargo Manifest (Form 1302) the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Form 1300).
All Foreign clearances.
U.S. Certificates of payment to tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilots provided by Southwest Alaska Pilots Association (See"Homer').

Pilot boards 1.1 miles × 152° from Caines Head Lt. (Lat. 59° 58' N., Long. 149° 22' W.).

MAX. SIZE: Harbour depth 35 ft. MLLW.

ANCHORAGE: Suitable anchorage in 30 fathoms depth; available for deep draft vessels at the head of the Bay, South of marked buoy.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

RADIO: KWA 346 (AM) Alaska Railroad Dock, frequency monitored 2182 kHz. KWA 364 (SSB) Alaska Railroad Dock frequency monitored 4-6-8-12 Megs.

TUGS: Tug service available. Anderson Tug & Barge (907) 224-5506.

BERTHING: *Alaska Railroad Corp.:* 24 hour berthing. Berthing permit required. Advance notice of 48 hours requested.

200 ft. by 735 ft. steel and concrete finger pier.

East Side — 450 ft. long with 35 ft. depth of water (10 ft. out from dock face).

West Side — 600 ft. long with 35 ft. depth of water.

South End — 200 ft. long with 35 ft. depth of water.

(East and West Berths serviced by railroad spurs).

Ro/Ro capability provided through a triple deck, articulating ramp along West Berth.

CRANES: East and West Dock Face – 2 gantry cranes. Maximum capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging up to 35 ton capacity.

Operator: The Alaska Railroad Corp., P.O.Box 95, Seward, Alaska 99664. Tel: (907) 224-5550.

BULK HANDLING FACILITIES: *Terminal Specifications:*

Unit Train Unloading	3,000 tonnes*/p.h.
Stacking	
Rail-mounted stacker/reclaimer	1
Stacking capacity per hour	3,000 tonnes
Reclaiming capacity per hour	1,000 tonnes
Shiploading	
Fixed position slewing shiploader	1
Loading capacity per hour	1,000 tonnes
Ship berth	1
Maximum d.w.t.	120,000
Maximum draft (MLLW)	58 ft.
Additional Data	
Seward Coal Terminal Area	33.91 acres
Total conveyor length	6,590 ft.
Stockpile capacity	120,000 tonnes
Annual throughput capacity	3,000,000 tonnes

*1 tonne is equivalent to approximately 2,204 lbs.

Operator: Suneel Alaska Corporation, P.O.Box 1789, Seward, Alaska 99664. Tel: (907) 224-3120. Telex: 25353 Suneel Swrd.

City Dock Facilities: City Dock: Located inside Small Boat Harbour. Up to 100 ft. vessels. Depth 15 ft. MLLW.

Fourth Avenue Dock: Up to 300 ft. vessels. Depth 35 ft. at MLLW. Power available. Mobile cranes to 100 tons.

Seward Marine Industrial Centre: Basin is 660 ft. × 1,200 ft. with depth of 21 ft. at MLLW.

Syncrolift shiplift 300 ft. × 80 ft. with 3,600 ton lift capacity.

Adjacent 100 acre industrial site.

Light cargo dock 300 ft. long with 21 ft. at MLLW.

STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.

MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.

DENSITY: 1024.8 at Mean High Water.

FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.

FUEL: Marine Gas Oil available from pipeline at South & West Berth. Marine Diesel Oil available from same pipeline during Summer months only (Maritime Oil, Vancouver, B.C.).

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

DRY DOCKS: Syncrolift available. See "Berthing".

OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.

AIRPORT: 1 mile. 1 flight daily to Anchorage.

TIME: Alaska Standard Time.

HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.

POLICE/FIRE/AMBULANCE: Tel: 911.

IDENTIFICATION CARDS: U.S.C.G. Port Security Card or Seaman's Card required.

AUTHORITY: City of Seward, P.O.Box 167, Seward, Alaska 99664. *Tel:* (907) 224-2231. *FAX:* (907) 224-3248. *Contact:* Foster Singleton, Harbour Master.

SITKA, Alaska: 57.03 N. 135.20 W. **(See Plan)**

Located on the Western side of Sitka Sound, Baranof Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: 3 natural channels: Western, Middle and Eastern.

PILOTAGE: Pilot pick-up point – close vicinity of Eckholm Light.

ANCHORAGE: Jamestown Bay.

MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, local.

TUGS: 7 tugs 300 h.p. to 1,200 h.p.

BERTHING: 3 wharves.

1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.
2. Japonski Dock: Government dock for limited commercial use only.
3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.

STEVEDORES: 3 gangs.

MEDICAL: Sitka Community Hospital and S.E.A.R.H.C. Hospital on Japonski Island.

DRY DOCKS: 1×400 ton floating dock at Jamestown Bay, approximately 3 miles East of Central Sitka.

REPAIRS: Light repairs only.

FRESH WATER: Available.

FUEL: Not available.

TRANSPORTATION: Air and ferry.

GARBAGE DISPOSAL: 350 gallon dumpsters provided alongside. Charge is U.S.$ 35.00 per dumpster.

WASTE OIL DISPOSAL: A 2,000 gallon tank truck is available for collection service. Contact Sitka Sound oil contractor. Tel: 747-6662.

SEAMAN'S CLUBS: None.

AUTHORITY: City and Borough of Sitka, 304 Lake Street, Sitka, Alaska 99835. *Tel:* (907) 747-3439, 747-3294, 747-3245. *FAX:* (907) 747-7403. *Contact:* Brian G. Bergman, Harbour Master.

SKAGWAY, Alaska: 59.27 N. 135.18 W. **(See Plan)**

Located at the Northern end of Lynn Canal, 14 miles North of Haines.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: Via Lynn Canal.

PILOTAGE: Pick-up point located in vicinity of Point Retreat.

MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".

ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Customs and Immigration available in Skagway.

TUGS: 2 tugs available at Skagway.

BERTHING: 1. White Pass and Yukon Railroad Dock: Containerised cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 1,240 ft. long, 100 ft. wide; depth at face varies from 20 ft. to 43 ft. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock. Deck for 400 lbs. per sq. ft. loading.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Used for bulk cargo ships and cruise ships. Vehicle ramp available. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

3. Skagway Terminal Co.: Cruise vessel dock. 960 ft. berth, fender dolphins and walkway (built 1990).

4. State: City joint use ferry pier – barge off-loading facility. Upland storage of 120,000 sq.ft.

5. City of Skagway: Small boat harbour, approx. 100 stalls. Fuel available. Water available in temperate seasons.

STEVEDORES: 3 gangs.
MEDICAL: Medical clinic and one nurse.
REPAIRS: None.
SURVEYORS: Not available locally.
WATER: Available in temperate seasons only.
FUEL: Available at Chevron Dock and small boat harbour.
AIRPORT: One mile from harbour. Scheduled and charter flights available daily. 3,400 ft. paved runway.
POLICE/AMBULANCE/FIRE: Emergency 911. Police Tel: 983-2301 Ambulance Tel: 983-2300. Tel: Fire 983-2300 or 911.
EMERGENCY CO-ORDINATON CENTRE: Skagway Fire Hall, Tel: 983-2300 or 911.
TELEPHONE: Pay phone at top of small boat harbour ramp.
BANKS: National Bank of Alaska, Skagway.
STORING: See "Prelims".
Storing at White Pass Railroad Dock:

1. By truck.
2. No barge storing.
3. Trucks can proceed alongside, except south 400 ft. of dock.
4. Fork lift trucks can be used.
5. Customs perform supervision of loading/unloading of all bonded stores. Customs/Immigration Tel: 983-2325
6. Local riggers are available.

GENERAL: Highways: Klondike Highway open all year round.
AUTHORITY: City of Skagway, P.O.Box 415, Skagway, Alaska 99840. *Tel:* (907) 983-2297. *FAX:* (907) 983-2151. *Contact:* Port Manager or Harbour Master.

SMITHS BLUFF, Texas: 30.00 N. 93.59 W. (See Plan)

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.
BERTHING:

Sun Co.: Distance from sea 47.6 miles, depth at berth 40 ft.

Sun Marine Terminals:
Operators: Sun Marine Terminals, P.O. Box 758, Nederland, Telex: 77-9469. Tel: 409-727-2301.
Type of terminal: Handling crude oil and lub.
Density: Fresh water.
Controlling Depth: From channel to berth – 39 ft. – 40 ft. Actual depth alongside – 40 ft.
Vertical clearance at HW: 136 ft.
Max. length of berth facility: 150 ft.
Max. length of vessel to be moored safely: 900 ft.
Hoses: 4×12 in. (Crude). 6×6 in. (Lub).
Usual Discharge Pumping Capacity: 50,000 bbls.p.h. (Crude). 2,000 bbls.p.h. (Lub).
Usual Discharge Pumping Capacity: 50,000 bbls.p.h.
Ballast Facilities: Deballasting facilities available with prior notification.
Fresh Water: Available on 24 hour basis.
Fuel: Available ex-wharf.
Tugs: Per Pilot's requirements.
Anchorage: Max. draft 39 ft. (2 anchorages).
Report: Sun Marine Terminals is located on the Neches River 47.6 miles from the Sea Buoy. The terminal is owned, operated and used by Sun Company. The controlling depth of the channel and turning basin is 40 ft. The density of the water at this terminal is 1000. The maximum size vessel normally received at this terminal is approximately 76,000 d.w.t. at Berth No. 1 and 130,000 d.w.t. at Berths No. 2, 3, 4 and 5. Vessels are docked and undocked day or night. Vessels are cautioned to keep mooring lines tight and be on alert for passing traffic.

2 tugs are normally used while docking and 1 while undocking. Sabine Towing requests a 3 hour advance notice when ordering tugs.

Vessels are berthed head upstream port side to with a usual arrangement of mooring lines including 3 forward springs and 3 aft springs. Head and stern lines run by launch. Pilots require one-way traffic and daylight navigation for all vessels in excess of 85,000 d.w.tonnes (83,700 LT). 2 lay-berths are provided across the channel. These consist of trenches dredged into the entrances of an unused ox-bow in the river. There are mooring points but most vessels lie to an anchor in the trench.

Sun Marine Terminals provides a gangway.

Fuel and fresh water are available at the terminals.

The terminal is fenced and guarded.

Pollution Control: 4,500 ft. of spill boom launch.

Fire: There are foam nozzles and monitors on the dock.

MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available ex-wharf.
FUEL: Available ex-wharf.
CONSULS: Nearest at Houston.
REPAIRS/DRY DOCKS: See "Port Arthur".
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
AUTHORITY: *Operator:* Sun Marine Terminals, P.O.Box 758, Nederland, Texas 77627. *Tel:* (409) 727-2301. *Telex:* 77-9469 Sun NDLN.

SOUTH LOUISIANA, Louisiana: 30.06 N. 90.29 W. (See Plan)

LOCATION: The Port of South Louisiana's jurisdiction includes the parishes of St.Charles, St.John the Baptist and St.James, and extends from River Mile 114.9 A.H.P. to River Mile 168.5 A.H.P.

IMTT is located at River Mile 118 A.H.P. (above Head of Passes) on the East bank of the Mississippi River, and is in the port's jurisdiction.

The Chevron facility at Oak Point is in the jurisdiction of the Port of Plaquemines, and is located at River Mile 70 A.H.P. on the West bank of the Mississippi River.

PORT LIMITS: *Port Boundaries:* River Mile 114.9 to 168.5 A.H.P. on the Lower Mississippi River.
ANCHORAGES: See "New Orleans".
RESTRICTIONS: Minimum water depth in main channel is 45 ft.
BERTHING: Please also see Index, as some ports/terminals may also be included in entries at other ports.
General Cargo Terminal:
Globalplex International: P.O.Drawer 559, Reserve, LA.70084. Tel: (504 536-8300. Fax: (504) 536-8304.

Location: River Mile 138 A.H.P., between New Orleans and Baton Rouge.

Depth alongside: 50 ft.

Maximum crane outreach (from ship fenders):	61 ft.
Height of crane (above low water):	94.34 ft.
Bottom of bucket (at low water): (High water 22 ft.)	79.04 ft.
Transfer capabilities:	Ship to barge or storage. Barge to ship or storage. Storage to ship, barge, rail or truck
Conveyor System:	42 in. (45°).
From dock to storage:	Heavy duty nylon rubber belt with trave speed of 431 ft. per minute.
Barge loader:	60 in. (45°) nylon rubber belt with trave speed of 431 ft. per minute.
Barge fleeting:	140 barge fleeting area.
Harbour boats:	1,200 h.p., 800 h.p., 2 × 2,600 h.p.
Floating cranes:	Barge mounted crawler, 80 ton 100 ft. boom Barge mounted 200 ton, Lima with 12 yard bucket.
Rail spar:	24,000 ft. of rail and one yard locomotive.
Weighing scales:	Rail (300,000 lb. capacity). Truck (100,000 lb. capacity). Front end loader scale mounted on IH 80 Hough.
Auxiliary equipment:	International Hough 80 (4 yd. bucket). 3 × 916 cat front end loaders. 931 D-4D cat dozer. Dump trucks. Bobcat 980. Payloaders.

Use: Shipment, receipt and storage of general and dry bulk cargo.

Description: 200 acre intermodal terminal; wharf 454 ft. long; 43 wide; mooring dolphins 754 ft. centre to centre; upstream buoy 1,000 centre to centre; 2×18,000 lb. Peco gantry cranes, capacity 340 tons per hour per crane; 1×80 ton barge-mounted crawler crane; 1×200 t barge-mounted Lima crane; conveyor system; 300,000 sq.ft. of covered storage facilities, storage racks, pallet conveyor, climate control, r docks, truck docks, stacking and reclaiming capabilities; 3 concrete sil water purification plant; waste water treatment plant.

Rail Facilities: Rail spur; served by Illinois Central and Kansas Ci Southern Railroads.

Truck Facilities: Site is within 7 miles of Interstates 10 and 55, 2 mi from U.S. 61, 25 miles from New Orleans International Airport.

Dry Bulk Terminals: *Port Terminal No. 1:* ADM, Reserve Grain Eleva P.O.Box AC, Reserve, LA 70084. Tel: (504) 536-1151. Telex: 784 Fax: (504) 536-1152.

River Mile: 139.2 A.H.P.
Depth alongside: 50 ft.
1 Berth: 858 ft.
Railroad: Illinois Central.

Port Terminal No. 2: MFP St. Elmo Terminal, P.O.Drawer 69, Paulina, LA 70763. Tel: (504) 869-4405. Fax: (504) 869-4517.
River Mile: 150.5 A.H.P.
Depth alongside: 45 ft.
1 Berth: 984 ft. dolphin to dolphin.
Railroad: Illinois Central.
See "Shipmaster's Report" dated December 1979.

Port Terminal No. 3: ADM, Destrehan Grain Elevator, P.O.Box 267, Destrehan, LA 70047. Tel: (504) 764-7586. Telex: (TWX) 810-955-5503. Fax: (504) 764-7586 (Ext.28).
River Mile: 120.6 A.H.P.
Depth alongside: 40 ft.
Loading Rate: Max. 75,000 bushels per hour with 2 belts.
Storage: 168,000 tonnes.
1 Berth: 800 ft.
Railroad: Illinois Central.
Also see "Shipmaster's Report" dated March 1991.

Port Terminal No. 6: Cargill Inc. K-2, P.O.Box 150, Convent, LA 70723. Tel: (504) 562-7313, 388-9455, 443-3059. Fax: (504) 388-9455.

Monsanto Company: P.O.Box 174, Luling, LA 70070. Tel: (504) 785-8211. Telex: 62690920. Fax: (504) 785-3325.
River Mile: 120 A.H.P.
Depth alongside: 25 ft. – 30 ft.
1 Berth: 312 ft. with dolphins (ammonia dock).
1 Berth: 430 ft. with dolphins (oil dock).
1 Berth: 460 ft. with dolphins (DAP dock).
Railroads: Southern Pacific, Union Pacific.

Petroleum Fuel & Terminal Co.: P.O.Box T, Garyville, LA 70051. Tel: (504) 535-6256.
River Mile: 144.6 A.H.P.
Depth alongside: 50 ft.
3 Berths: Berth 1 and 2: 50 ft. × 300 ft. (barge loading).
Berth 3: 940 ft. (barge/ship).

Shell Oil Company: P.O.Box 10, Norco, LA 70079. Tel: (504) 465-7111.
River Mile: 126 A.H.P.
Depth alongside: 45 ft. – 90 ft.
3 Berths: Berth 1: 750 ft.
Berth 2: 900 ft.
Berth 1A: 750 ft.

2 tanker berths (80,000 d.w.t., 900 ft. LOA downstream, 55,000 d.w.t., 750 ft. LOA upstream) 16 in. and 8 in. loading arms for transfer, transfer rate variable, ballast line 12 in., capacity 20,000 bbls.

Berthing always starboard side to. Requires 2 tugs to assist in berthing. Forward and aft mooring lines handled simultaneously.

Railroads: Illinois Central, Kansas City Southern.

Report: General: The berth at Norco is approximately 126 miles AHP and consists of a single dock constructed of steel pilings and a concrete deck. A continuous fender system of wood-faced steel piles provides continuity between the dock and mooring dolphins.

All cargo is handled through 6×12 in. loading arms with 8 in. reducers. The arms are arranged so as to permit washing of the arms into a slop tank ashore; thus, grade changes may be made without removing the arms.

Cargo Handled and Shore Installations: Various products are handled through a common shoreline including crude, clean products, jet fuel, kerosene and heating oil.

The maximum allowable rail pressure for discharging vessels is 150 p.s.i.

An emergency shutdown system to stop loading is located in the dock office and at the levee in the guard office.

Docking: Docking is normally performed by the River Pilot and is strictly starboard side to. 1×800 h.p. tug is required for both docking and undocking operations.

Vessels should approach the dock with a tug on the port bow, stemming the current, at a maximum angle to the dock of 10° and at a velocity no greater than 5 ft./sec.

Communications: A public telephone located at the head of the dock is available for use by ship personnel.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunkers are not available.

Fresh water is available at Norco.

Ballast/Slop Facilities: Ballast and slop facilities are available. The shore storage/treatment tank has a 150,000 bbls. capacity and is connected to the dock manifold by a 14 in. shore line.

Report: February 1995.
Dock No. 1: Max. size – 110,000 tons displacement or 45 ft. draft.

Vessels of 100,000 d.w.t. use 3 tugs for berthing and unberthing. If for any reason an outwardbound vessel has to anchor, 1 tug assists for turning in river.

Fog may delay vessel in Winter.

Pilots will take vessels in and out with 48 ft. draft, but vessel will have no U.K.C. in S.W. Pass.

Star Enterprise (Texaco): P.O.Box 37, Convent, LA 70723. Tel: (504) 562-7681. Fax: (504) 562-7681, ext. 200.
River Mile: 168.1 A.H.P.
Depth alongside: 40 ft.
2 Berths: 1 × 810 ft.; 1 × 900 ft.
Railroad: Illinois Central.

TransAmerican Refining Company: 257 Prospect Avenue, Good Hope, LA 70079. Tel: (504) 764-8611.
River Mile: 125 A.H.P.
Depth alongside: 25 ft.
2 Berths: 1 × 423 ft.; 1 × 480 ft.
Railroads: Illinois Central, Kansas City Southern.

Union Carbide Corporation: P.O.Box 50, Hahnville, LA 70057. Tel: (504 468-4624, 468-4627, 468-4676. Telex: 887739. Fax: (504) 468-4406.
River Mile: 127.3 A.H.P.
Depth alongside: 30 ft.
1 Berth: 725 ft.
Railroad: Union Pacific.

U.S. Department of Energy Strategic Petroleum Reserve: P.O.Box 157, St.James, LA 70086. Tel: (504) 265-3073. Telex: (TWX) 810-951-5393 Fax: (504) 265-3073, ext. 281.
River Mile: 158.7 A.H.P.
Depth alongside: 57 ft.
2 Berths: 940 ft. each.

TANKERS: See "Liquid Bulk Terminals" above.
Report: *Garyville:* The Marathon Dock is located on the right ascendin bank of the Mississippi River, Mile 140. It consists of 5 separate berths (each 1,000 ft.) fitted with quick connecting hydraulic Chicksan arms fo cargo transfer and quick release hooks on all mooring points. Dept alongside 45 ft.

Each dock is equipped with an emergency stop at the Chicksan arm assembly.

Cargo Handled and Shore Installations: Both docks handle asphal No. 6 fuel oil, unleaded gasoline and No. 2 diesel oil. Each dock ca effect the transfer of No. 6 fuel oil through 2×16 in. arms, No. 2 diese oil through 2×16 in. and/or 3×12 in. arms, unleaded gasoline throug 2×12 in. arms and asphalt through a 1×16 in. arm. All cargo i transferred to or from storage tanks 1 mile away through 16 in. to 24 in shore lines.

Docking: The River Pilot normally docks vessels at these berths docking is strictly starboard side to. Vessels of 600 ft. LOA or greate are required to use 2 tugs for assistance in docking and undocking smaller vessels may use a single tug.

Approach to the docks is made with the vessel stemming the curren at slow speed. Tugs assist in positioning the vessel alongside.

The Marathon Terminal requires that vessels use 2 head wires o synthetic head lines, 3 forward spring lines (wire or synthetic), 2 sprin lines aft (wire or synthetic) and 2 stern wires or 3 stern ropes. All moorin points are equipped with quick release hooks.

Communications: Public telephones are available for use by ship's personnel.

Gangway: The vessel's gangway must be used and should be proper rigged and illuminated.

Bunkers and Fresh Water: Bunker C and diesel fuel are available o request; however, no bunker barges are allowed alongside a vesse docked at either berth.

Ballast/Slop Facilities: Ballast and slops can be received by the docks in limited quantities.

SHIPMASTER'S REPORT: February 1979.
Restrictions: Not allowed to take bunkers, lub oils or stores from doc while alongside. Large tankers often require 2 tugs pushing all the tim to keep them alongside, especially when river is in flood. This at GAT No. 4.
VHF: Standby on Channel 13 during pilotage and when anchore Agents normally place walkie-talkie aboard for their dire communication.
Berthing: Always starboard side to. Forward will have 2 back springs t jetty, 4 headropes, 2 breasts to buoys, lashings not required, same a Only one boat used and secures the bow first.
Telephones: Not available at GATX No. 4 but there is one on next je upriver.

SHIPMASTER'S REPORT: December 1979 (Updated 1992).
Port: Paulina.
Location: 3 miles up river from Gramercy at St. Elmo Point. River Mi 120.6 A.H.P.
Anchorage: A waiting anchorage is situated 2 miles down river from th elevator at Grand View Reach.
Tugs: Available from Gramercy.
Berth: Peavey Grain Elevator. Depth of water alongside is 45 ft. Loadi rate with one spout is 1,000 t.p.h.

The berth is a concrete pier on steel girders with 4 weak fende Spring lines are run to the pier, and head and stern lines to dolphins
Fresh Water: Available from pier, rate 6 t.p.h. (approx.)
Fuel: Not available from quay.
Services: Provisions available from New Orleans, will be delivered b launch from Gramercy as pier can only be reached on foot over a catw 700 ft. long including stairs.

SHIPMASTER'S REPORT: March 1991.
Location: Destrehan is an area on the right ascending bank of th Mississippi River about 120 miles above Head of Pass.
St. Charles Elevator: Close above Bunge Elevator. Berth has 7 spo with loading rate 1,000 t.p.h. A 720 ft. vessel is secured with 3 headli to a buoy, 3 breastlines and 2 backsprings to the wharf, 3 backspri 2 breast ropes which led forward and 2 sternlines to the wharf. A forw facing gangway can reach the wharf, but the ship is fendered off ab 3 ft. Minimum airdraft under the spouts may be 42 ft. at highest r stage, increasing as the level falls. Stores can be taken from the wh only at the forward hatch. Fresh water from the wharf by 1.5 in. hos 2 t.p.h. – 3 t.p.h. Taxi fare to nearest city is U.S.$25.00 each way. Ve loaded corn gluten pellets with spout trimming only. This cargo doe run freely and large voids were left, the ship had a 1.5° list on comple away from wharf. There is a small convenience store with telepho
Bunge Elevator: The elevator is equipped with 7 spouts, pos 2,000 t.p.h. Berth is said to be capable of berthing 1,000 ft. s Headlines go to buoys.

A.D.M. Buoy Systems: Located between the St. Charles Elevator and the Highway Bridge. There are 2 systems of buoy moorings. These are served by floating elevator "Gemini" which has a rate of 500 t.p.h., with one Buhler arm. Vessel dropped port anchor outside port head buoy, then starboard anchor inside starboard head buoy. 4 or 6 headlines are run to the 3 head buoys according to season. 2 sternlines are run to each buoy aft. The lines to the same buoy must be hove up together, which may require preparation on board. Vessel waited nearly 2 days for corn gluten to settle, and topped up all 7 hatches in 5 hours.

The elevators at AMA, Bunge and St. Charles and the 2 buoy systems are operated by A.D.M.

AUTHORITY: Port of South Louisiana, 171 Belle Terre Blvd., P.O.Box 909, La Place, LA 70069-0909. *Tel:* (504) 652-9278, 568-6269. *FAX:* (504) 652-9518. *Contact:* R.J. Clements, Port Director. Glenda B. Jeansonne, Assistant Port Director. Mitch Smith, Port Operations Director.

SOUTHPORT, North Carolina: 33.56 N. 77.59 W. **(See Plan)**

SHIPMASTER'S REPORT: August 1996.

DOCUMENTS: If first U.S. port, officials board at pier. Usual U.S. forms required.

PILOTAGE: Pilot boards from fast cutter with black hull and white upperworks. The pilot station is at Southport.

The boarding area is in the vicinity of the Sea Buoy. Pilot for Southport boards 1 hour before H.W./L.W. (Berthing on slack tide). If employing a tug, which is generally the case, Docking Pilot boards about 10 minutes away from berth.

APPROACHES: *Chart:* B.A. Chart No. 3688.

Approach: Frying Pan Shoals Light Tower is conspicuous.

Racon (C) on Sea Buoy (CF41) picked-up at 12 miles.

Coastline low and featureless.

Channel: It is 10 miles from Sea Buoy to "ADM" Pier at Southport, about 1 hour steaming.

Maximum draft 38 ft. on H.W. to Cape Fear Terminal Wilmington, 34 ft. anytime. Channel width 500 ft.

Dredging is in progress to increase channel to 40 ft. maximum draft.

Presently, dredging at Buoy No. 5, where granite rock is being encountered, putting the channel deepening project at least 12 months behind schedule.

ANCHORAGES: To the West of the Fairway Buoy (Sea Buoy). An area centered on Lat. 33° 47' N., Long. 78° 07' W. has been found to be foul with old wires (2 miles S.W. of Sea Buoy). We anchored in position Lat. 33° 48' N., Long. 78° 08' W., and found the area clear but exposed.

Do not anchor to S.E. of Sea Buoy, as it is an old spoil ground.

MAX. SIZE: 50,000 d.w.t.

VHF: Cape Fear Pilots monitor Channels 16 and 12, range is low.

TUGS: Tugs come from Wilmington. Number depends on ship's size, but always at least one tug. Tug's lines used. Tug and Docking Pilot come alongside about 10 minutes before berthing.

BERTHING: Southport Chemical Pier known as "ADM" is in position Lat. 33° 56.1' N., Long. 77° 59.2' W., near Southport Ferry Terminal. The berth is a 1,400 ft. trestle with tanker "T" berth.

Vessels berth on edge of Cape Fear/Wilmington shipping channel, so there is ship movement and very strong ebb tide, up to 8 knots, so moorings have to be carefully planned and tended.

Vessels only berth on slack water.

The flat face mooring length (including connecting dolphins) is 230 ft. plus outlying mooring dolphins each end giving 1,050 ft. mooring length.

Vessels berth port side to only.

The fenders consist of 3×3 m. Yokohama type fenders chained to central pier and connecting mooring dolphins.

Reported depth alongside is 34 ft. at MLW.

Moorings: The mooring boat comes from Wilmington and stays at ADM Pier whilst vessel alongside. Mooring gang is good. Moorings planned with Docking Pilot before coming alongside.

Generally, a minimum of 3-2-2, each end.

Since the pier was built, an extra mooring dolphin has been constructed on the upstream side as a breasting mooring.

When letting-go on the flood tide, care is required that the after moorings are not caught in the propeller/rudder. The mooring boat should hold on to the lines until inboard.

Tankers: The pier handles sulphuric acid, caustic soda, molasses and fuel oil for adjacent plant.

1×11,400 tonne sulphuric acid tank.

1×6 in. rubber hose to 8 in. pipeline on trestle.

Hose handled from gantry.

Ship's crew make connection.

SGS Surveyor available.

Rates up to 600 tonnes/hr. can be handled.

Care is necessary if vessel should drift off pier on strong ebb.

DENSITY: 1007 (L.W.) to 1013 (H.W.).

FRESH WATER: Available. Normally no charge. Ship's hose required for connection near hose gantry.

FUEL: No fuel barge alongside due to current and proximity of river traffic. For bunkering, vessel would have to shift to Southport or Wilmington Anchorage.

TELEPHONES: Telephone in Pier Control Cabin, can be used through terminal switchboard for outside line (phone card necessary).

GENERAL: *Storing:* Only light stores allowed down pier.

Gangway: Difficult to land gangway onto mooring dolphin.

STOCKTON, California: 37.57 N. 121.19 W. **(See Plan)**

DOCUMENTS: See "San Francisco".

PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting San Francisco Bar Pilots Association, Pier 7, Buckhead (P.O. Box 26409, S.F., California 94126). Tel: (415) 362-5436.

ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 37 ft. depth.

RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".

MAX. SIZE: Draft restrictions of 35 ft. at low tide, 37 ft. at high tide (fresh water). (Also see "Developments").

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Ship to shore Radio (KBP 376 – Marine Channel 18A) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.

TUGS: 2×1,000 h.p. and 1×1,200 h.p. tugs available. Tugs join vessel 0.5 miles up river from Main Channel; generally, ship's lines used, however, tug lines may also be utilised.

Tug Company: Brusco Tug and Barge Co. Tel: (209) 462-5534, 464-3400.

BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Shipment of dry-bulk commodities, both systems handle the following: coal, petroleum coke, clay, copper concentrates, fertiliser, soda ash, sulphur, and other dry bulk commodities; receipt of liquid fertiliser.

Dimensions: Length of face 850 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 40 ft.; usable berthing space 880 ft.

Mechanical handling facilities: Two bulk handling systems.

(A) Max. vessel loading rate 1,000 short tons/p.h. Equipped with shiploader, belt conveyor, 360 degree spout trimmer, bottom drop car dump (Max. 7.5 cars per hr.) and truck unloader hopper (Max. 30 trucks per hr.) (B) Max. vessel loading rate 4,000 short tons/p.h. Conveyor system equipped with a 54 in. belt, rotary car dump, loop railroad for unit train.

Port Stockton Wharf, Berths 10-11:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Container-handling dock; receipt of molasses, bulk dry cargo, container cargo and general cargo. Delivery of scrap steel, container cargo and general cargo.

Dimensions: Length of face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 35 ft.; usable berthing space 810.5 ft.

Remarks: Face of wharf is in line and continuous with face of Berth 9 providing a total of 1,455.5 ft, of berthing. This dock has 5.5 acres of open marshalling area. 2×30 tonne multi-purpose bridge cranes for handling dry bulk, general cargo, containers. 700 ft. of crane rail. Construction of loop line R.R. track completed.

Port Stockton General cargo Wharf, Berth 9:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo and receipt of bulk cargo.

Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space: Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.

Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:

Owned by: Stockton Port District.

Operated by : Stockton Port District.

Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses. Anhydrous Ammonia also unloaded at this dock through refrigerated pipelines.

Dimensions: Length of 396 ft.×88 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 516 ft. depth alongside MLLW 37-36 ft.; usable berthing space 516 ft.; width of apron 31 ft. with trestle.

Port Stockton Wharf No. 6:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 418 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 329 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 428 ft.; depth alongside MLLW 35 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo, receipt of bulk cargoes.

Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo and receipt of bulk cargoes.
Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable berthing space 461 ft.; width of apron 81 ft.

Dock has 30 ton bridge crane capable of handling general and bulk cargoes, as well as containers.

Port Stockton Open Wharf No. 2:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo. Also receipt of bulk cargo.
Dimensions: Length of face 506 ft.; depth alongside MLLW 32-36 ft.; usable berthing space 550 ft.; width of apron: open.
Remarks: Wharf has 39,000 sq. ft. of open storage area and 7 cone shaped buildings for handling inbound bulk fertiliser, with direct belt conveyor from dock to cone buildings, with a capacity of 70,000 short tons to the rear of the dock area. At the Industrial Park approx. 60 acres of open storage area are located South of W. Washington Street; this area can be used for storing or staging import and export cargoes. An additional 45 acres of open storage are located North of W. Washington Street. There is a total of other warehousing with a capacity of 2.7 million sq. ft. of covered storage area comprised of 33 separate units.

Cargo may be transferred from off dock acreage via truck or rail.

This dock also has two Whirley type gantry cranes with a 30 short tons capacity each at 36 ft. offshore reach. Equipped to handle bulk dry materials, containers, heavy lifts, etc.

Continental Elevators Grain Elevator Main Wharf No. 1:
Owned by: Continental Elevators Inc.
Operated by: Continental Grain Co.
Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.
Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft.; depth alongside at MLLW 35-37 ft.; usable berthing space 780 ft.; width of apron, open end 20 ft.
Mechanical Handling Facilities: 2 towers on wharf, each with 13 in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 short t.p.h. (26,557 bu.) at West tower; combined rate, 900 short tons.
Remarks: Grain gallery connecting towers on wharf has a 30 in., electric-belt conveyor; and gallery extending from East tower to grain elevator has 2×30 in. belt conveyors. Grain elevator capacity 6,000,000 bushels.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with minimum clearance of 134 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez Bridge, with minimum clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 291 ft. A third bridge, 22 miles above Southern Pacific bridge, is near Antioch. It has a fixed span bridge with minimum clearance above MHW 135 ft.

STEVEDORES: *General Cargo* – For gang start at 0800 hrs., orders must be placed at 1600 hrs. of previous day; night gangs must be ordered by 1100 hrs. These times pertain to week-day gangs. For week-end gangs, 1100 hrs. Saturday for Saturday night, Sunday morning, Sunday night and Monday morning. Day shifts from 0800 to 1700 hrs. Night shifts 1700 to 0300 hrs. Arrangements can be made for a special third shift from 0300 to 0800 hrs. Rates quoted on request.

Bulk Ore and Grain Cargoes – Orders for gangs must be placed at same time as for general cargo. This operation on 24 hour basis; day shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing shift, midnight to 0800 hrs. Stop work meeting first Tuesday of each month.

Also see "Radio".

MEDICAL: Arrangements with San Joaquin Medical Society for physicians, surgeons and dentists. 5 hospitals within radius of 6 miles from port. Ambulance service readily available. Telephone number for this service is 948-1334.

FRESH WATER: Available through pipelines.

FUEL: All grades of fuel available with 1 day's advance notice.

CONSULS: See "San Francisco".

REPAIRS: Minor types of repairs carried out.

DRY DOCKS: Nearest dry docks, San Francisco.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary. Available if requested.

OPENING/CLOSING HATCHES: Hatches may be opened prior arrival and closed after ship sailed from port; any opening or closing of hatches at dockside must be performed by stevedores.

CERTIFICATES: See "San Francisco".

CUSTOMS ALLOWANCES: See "San Francisco".

CARGO GEAR: Safety regulations require strict adherence to max. loading or unloading weight capacity of ship's gear.

REPATRIATION: No facilities in Stockton for effecting crew changes and arranging any necessary repatriations. Special arrangements may be made through Customs.

AIRPORT: Stockton Metropolitan Airport located approx. 6 miles from port. Serviced by Frontier, Air West and PSA.

TIME: Pacific Standard Time, GMT minus 8 hours; Pacific Daylight Time goes into effect on first Sunday of April until last Sunday in October, when clocks are advanced 1 hour.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Memorial Day; Independence Day; Harry Bridge's Birthday; Labour Day; Admission Day; Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Eve Day; Christmas Day and New Year's Eve Day are all holidays. In addition to above, General Election Day, both State and National, as well as any day proclaimed by Governor of California or President of United States shall be observed as holiday. Work can be arranged for all holidays except New Year's Day, Labour Day, Thanksgiving Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a day and can be reached by dialling extension 222 for any emergency that might arise.

ELECTRIC CURRENT: At wharves where current available for ship's use, it is 110 volt, single phase, 60 cycle for lighting and 440 volt, 3 phase, 60 cycle for power.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available.

SEAMAN'S CLUBS: None.

REGULATIONS: Port of Stockton requests notice of ship's intent to come into port at least 7 days prior to arrival; vessels, who have made prior arrangements, will have precedence over vessels who sail into port without previous notice.

GENERAL: *Railroad Service:* Two transcontinental railroads serve the Port – Santa Fe and Union Pacific with reciprocal switching privileges. *Truck Scales:* Public truck scale available, operated by the Port.

AUTHORITY: Port of Stockton, 2201 West Washington Street, Stockton, California 95202. Postal address: P.O.Box 2089, Stockton, California 92501-2089. *Tel:* (209) 946-0246. Toll free outside State of California (800) 344-3213 or 344-3214. *FAX:* (209) 465-7244. *Contact:* Alexander Krygsman, Port Director. Mark Tollini, Manager – Port Operations. Patricia Huff, General Manager – Trade and Property Development.

TACOMA, Washington: 47.14 N. 122.28 W. (See Plan)

DOCUMENTS (on arrival from foreign port):
Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I-418
2 Passenger Lists on Form I-418 (if applicable)
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for Discharge on C.F. 1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on C.F. 1302, one for Customs at this port and other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.
B – For U.S. Department of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form A1Q.43.
C – For U.S. Immigration Boarding Officer:
Crew List of Form I-418 visaed by U.S. Consul abroad.
Passenger List on Form I-418.
Attachment to Passenger List on Form I-92.
Form I-94 for each passenger.
Form I-95 of ID Card (Form 184) for each crewmen. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)
D – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I-418).
3 copies Cargo Manifest on Form 1302.
3 copies Stores List – Form 1303.
3 copies Crew Purchases or Curio List – Form 1304.
3 Passenger Lists on Form I-418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

* At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yards N.N.W. of the outer end of Puyallup Waterway West Jetty.

City Regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE: Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: Pilots on Channels 13 and 14.

TUGS: Available, join vessel in Commencement Bay, approx. half wa between Brown's Point and the designated Dock. Tug's lines are us and there is a charge for tug's lines.

BERTHING: 32 deep water berths. Water depths: 9.15 m. to 21.34 below MLLW.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of op storage paved, lighted, fenced, serving all piers.

Logs are handled at the Port's Blair Terminal, where special shipme of heavy equipment are also handled. Total terminal area is 12 ac with 2 berths totalling 1,200 ft. (366 m.), depth 45 ft. and 32 acres backup storage space.

Pierce County Terminal at 147 acres, is used for special cargoes a auto imports. It has 2 berths totalling 1,420 ft. (433 m.) and depth u 45 ft. 1×54 tonne crane available.

BULK HANDLING FACILITIES: 550 m. pier with 12 m. to 15 m. water depth. Bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility.

Bulk Grain Elevator: Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 3 (Maersk):* A 40-acre container terminal with berthing capacity of 950 ft. (290 m.) and water depth of 45 ft. (13.7 m.) at MLLW. The terminal can accommodate the largest container ships, and is located directly adjacent to the Port's North Intermodal Rail Yard. It serves both rail service and over-the-road carriers by use of chassis space. Available container cranes include 2 post-Panamax cranes rated at 66 short tons and 2 container cranes rated at 55 short tons. Other facilities include 3 on-site truck scales, 260 reefer hook-ups and a 7 lane truck gatehouse.

Terminal 4 (Evergreen): A 33-acre container terminal with 2 berths totalling 1,900 ft. (579 m.) and water depth of 45 ft. (13.7 m.) at MLLW. Located directly adjacent to the Port's North Intermodal Rail Yard. Serves both rail service and over-the-road carriers by use of chassis space. Available container cranes include 2 post-Panamax cranes rated at 66 short tons, 2 container cranes rated at 55 short tons and 2 container cranes rated at 50 short tons. Other facilities include 300 reefer hook-ups and a 7 lane truck gatehouse.

Terminal 7: A 79-acre terminal for containers and general cargo. 4 berths, totalling 2,700 ft. (818 m.). Water depth 45 ft. – 50 ft. (13.7 m. – 15.2 m.). 2 warehouses: One transit warehouse with 96,000 sq.ft. (8,918 sq.m.) and one container freight station with 102,400 sq.ft. (9,512 sq.m.). 4 container cranes (50 and 55 short tons capacity) and 1 Whirley crane (40 short tons). 1 Peiner multi-purpose bulk unloading crane (40 short tons capacity). 36 reefer hook-ups, 1 truck scale, 11 truck stations and 7 rail car doors in the warehouses. Direct shipside rail access.

Terminal 7-D (Husky): A 33-acre container terminal with 1 berth totalling 900 ft. (274 m.) and water depth of 50 ft. (15.2 m.). 3 container cranes (55 and 50 short tons capacity). 4 transtainers and 186 reefer hook-ups. Adjacent to Terminal 2, 7 warehouses and direct access to the Port's North Intermodal Rail Yard. Direct rail access to shipside. Berth operated by Cooper T. Smith Stevedoring and International Transportation Service, Inc.

Sea-Land Terminal: A 140-acre container terminal with 2 berths totalling 1,600 ft. (484 m.) and water depth of 45 ft. (13.7 m.). 5 container cranes, 407 reefer hook-ups and 66 hustler tractors. Facilities include operations control tower, administration offices, maintenance shop, container freight station and additional covered storage.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair (to be removed by late June 1997) and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Jones-Washington Stevedore Company, Eagle Marine Services Ltd., Maersk Stevedore Co., Marine Terminals Corp., Husky Stevedore Co. and Stevedoring Services of America (SS of A).

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard Regulations strictly enforced.

DENSITY: The average density in the port is 1016.8 at 15°C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available. Advance notice required.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165 – 175
PS – 400	112 – 116
Bunker Special	50 – 60
PS – 300	32 – 35

FIRE PRECAUTIONS: Very strict precautions in force.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:

- Certificate of Registry.
- Certificates for any previous U.S. tonnage tax payments within the past year.
- International Load Line Certificate.
- Safety Radio Certificate.
- Derat Certificate.
- Cargo Gear Inspection Certificate.
- Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCES: Tobacco and Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, starting the first week-end in April and finishing the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers:
Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 4 and 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHIP SUPPLY SERVICE: Contact: Foss Launch and Tug, 225 East F Street, Tacoma, WA. 98421. Tel: (206) 272-0362.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Service undertaken by City of Tacoma. Tel: 206-591-5544.

WASTE OIL DISPOSAL:
Chemical Processors. Tel: 206-243-6776.
Clean Care. Tel: 206-627-3925.
Northwest Enviro Service. Tel: 206-622-1090.

SEAMAN'S CLUBS: Tacoma Seamen's Centre, 1225 E. Alexander Avenue, 98421. Tel: 206-272-0716.

AUTHORITY: Port of Tacoma, P.O.Box 1837, Tacoma, Washington 98401-1837. *Tel:* (206) 383-5841 or Seattle (206) 838-0142. *FAX:* (206) 572-3436. *Contact:* John H. Bush, Senior Director – Operations.

TAMPA, Florida: 27.57 N. 82.28 W. (See Plan)

DOCUMENTS:

Passports and Seamen's Books.
Vaccination Certificate for each Seaman.
Certified Crew List: Must be on American Form and certified by American Consular office at foreign country from which departed.
Crew List.
Ship's Register.
Load Line Certificate.
Certificate of Financial Responsibility (Oil Pollution Certificate).
U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:
  Vessel's name and flag.
  Master's name.
  Last foreign port of departure.
  Net registered tons of vessel.
  When and where vessel built.
  Consigned to Agent.
  Bill of Lading Number.
  Marks and numbers (on cargo).
  Complete description of merchandise.
  Weight in kilos or pounds.
  Port of loading.
  Port of discharge.
Stores Lists (original and 3 copies).
Crew Curio List (original and 3 copies).
Narcotics List (original and 3 copies).
*Dangerous Cargo List (original and 3 copies). This should be filled out even if nothing dangerous aboard.

Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

PILOTAGE: Compulsory for all foreign vessels and U.S. vessels under register in the foreign trade. Pilotage is optional for U.S. coastwise vessels drawing over 7 ft. that have on board a Pilot licensed by the Federal government. Pilots board vessels day or night. Vessels entering by Egmont Channel are boarded between the Tampa Bay Lighted Whistle Buoy "T" (Lat. 27° 35.3' N., Long. 83° 00.7' W.) and Egmont Channel Lighted Bell Buoy No. 2 (Lat. 27° 35.4' N., Long. 82° 59.0' W.). Vessels entering by S.W. Channel are usually boarded between S.W. Channel Buoy No. 2 and Lighted Bell Buoy No. 3, or if desired, at the lighted bell buoy off the entrance to the channel.

Tampa Bay Pilots serve Tampa Bay. Tampa Bay Pilots have 3 launches, "Desoto", "Egmont" and "Manatee", each with a black hull and white deckhouse with the word "Pilot" on either side. Pilot Association monitors VHF-FM Channels 10 (156.50 MHz), 12 (156.60 MHz), and 16 (156.80 MHz) continuously; call-sign, Tampa Bay Pilots. Pilot Association's boats are equipped with VHF-FM Channels 10, 12 and 16 and use Channel 10, 12 and 11 as working frequency. All pilot boats fly the International Code flag "H". For boarding, Pilots request that vessels maintain a speed of 6 knots or less and have the pilot ladder rigged 8 ft. above the water. Vessels are requested to give a 24-hour and a 3-hour advance notice of their time of arrival. Length, beam and max. draft of the vessel should be provided with the first notification. Vessels are normally not moved in dense fog, and during strong North/South winds vessels are boarded inside Egmont Key. In December 1995, the deepest draft entering Tampa Bay anytime was 39 ft. Pilots can be obtained by radiotelegraph (cable address: "Tampilot") by telephone (813-248 3732) through the Tampa Marine Operator, or through ships' Agents.

Pilots for St. Petersburg and Port Manatee can be obtained through the Tampa Bay Pilots.

Tampa Bay Pilots – Recommended Navigational Guidelines for Vessels in Tampa Bay (Dated December 1995).

Port Manatee	Vessels with a draft of 25 ft. or less – Anytime. 25 ft. to 27 ft. – less than 1 knot current. Over 27 ft.– Slack water. Maximum of 34 ft. plus tide level. Turning Basin – Less than 700 ft. LOA – 35 ft. plus tide level; 700 ft. – 765 ft., 32 ft. plus tide level with 3 tugs. Weak and variable tides (0.2 knot or less) will be considered slack water
Big Bend	Vessels with draft of 33 ft. 06 in. or less – Anytime. Maximum draft of 35 ft. 06 in. Turning Basin – Vessels with LOA greater than 650 ft. must have draft less than 27 ft. plus tide. No passing at Agrico IMC West end.
East Tampa	Vessels with draft of 31 ft. 04 in. plus tide level – Anytime. Vessel with LOA of 675 ft. may dock at Cargill provided that no other vessels are in the turnaround area and restrictions for LOA over 650 ft. are met.
Ports of Tampa (including Port Sutton, East Bay and Tampa)	Vessels with draft of 33 ft. 06 in. plus tide level – Anytime. Certain berths may have other draft limitations (both deeper and shallower). Please consult Marine Advisory Council Safety Guidelines or contact Pilot Office for specific requirements. Sparkman Channel requires one-way Bay traffic and vessels with draft restriction of 34 ft. 06 in. plus tide level to a maximum of 35 ft. 06 in.
G – Cut	Vessel draft restriction of 33 ft. plus tide level to a maximum of 35 ft.
Port Tampa	Vessels with draft less than 25 ft. (outbound) – Anytime. Less than 25 ft. (inbound) less than 1.0 knot (tank ships less than 0.5 knot ebb). 25 ft. or greater slack water. Inbound Class "A" tug required. Vessel size restricted to 750 ft. LOA. Sailing headout slack water is considered 0.5 knot or less. Vessels will be passed only upon agreement of Pilot and Master.
Weedon Island (Florida Power)	Vessels with draft of 28 ft. 06 in. (at manifold) plus tide level. Lesser drafts required 200 ft. or more West of the manifold. Vessels with draft over 28 ft. 06 in., less than 1.0 knots current. Maximum LOA is 675 ft.
Rattlesnake Bayou	Vessels with draft of 12 ft. or less – Anytime. Vessels to Misener Marine with draft of 14 ft. plus tide level – Anytime.
Bayboro Harbor	Vessels with draft of 19 ft. 06 in. plus tide level – Anytime.
Gadsden Anchorage	Vessels of greater than 675 ft. LOA or 27 ft. draft may not anchor in Gadsden.
Tampa Bay	Vessels with draft of 39 ft. plus tide level – Anytime to a maximum allowable draft of 41 ft. Vessels with draft of 39 ft. or more must be started in at least 4 hours before appropriate tide level window; must be sailed prior to high tide if subsequent tide change is less than draft over 39 ft.

Recommendations are subject to change. Greater restrictions may be defined by the Captain of the Port and/or the Safety Guidelines Committee.

ANCHORAGES: Vessels with good ground tackle can anchor anywhere outside Egmont Bar in depths of 35 ft. to 50 ft. Inside anchorages Southward of Mullet Key in depths of 30 ft. to 35 ft.; and S.W. of Gadsden Point in depths of 29 ft. to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and South of Interbay Peninsula.

(1) Explosives Anchorage, East of Mullet Key. A rectangular area in Tampa Bay, approximately 4,459 yd. long and 1,418 yd. wide, beginning at Lat. 27° 38' 30" N., Long. 82° 39' 09" W., and extending N.E. to Lat. 27° 39' 48" N., Long. 82° 37' 15" W.; thence S.E. to Lat. 27° 39' 17" N., Long. 82° 36' 46" W.; thence S.E. to Lat. 27° 37' 52" N., Long. 82° 38' 38" W.; thence N.W. to point of beginning. Anchorage is used by vessels awaiting loading or unloading at Port Tampa where duration of anchorage will exceed 72 hours.

(2) Temporary Explosives Anchorage, South of Interbay Peninsula. Beginning at a point bearing 107°, 1,750 yd. from Cut F Range Front Light; thence to a point bearing 125°, 2,050 yd., from Cut F Range Front Light; thence to a point bearing 180°, 1,725 yd., from Cut F Range Front Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range Front Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range Front Light; and thence to the point of beginning. Anchorage is used for vessels engaged in loading explosives when duration of the anchorage is less than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular area with a radius of 200 yd. with the point at Lat. 27° 50' 22" N., Long. 82° 34' 15" W.

(4) Quarantine anchorage. S.E. of the temporary explosives anchorage, beginning at a point bearing 097° true, 4,370 yd., from Cut F Range Front Light; thence to a point bearing 113° 30', 5,370 yd., from Cut F Range Front Light; thence to a point bearing 161° 30', 3,770 yd., from Cut F Range Front Light; thence to a point bearing 163° 30', 2,070 yd., from Cut F Range Front Light; thence to the point of beginning.

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No tid restrictions with exception of loaded vessels into Port Tampa.

43 ft. harbour deepening project is completed.

Existing Channels:

Name of Channel	*Width* (ft.)	*Length* (naut. miles)	*Restrictions* (ft.)
Egmont Channel	700	3.9	40
Mullet Key Channel	600	2.9	40
Tampa Bay Channel Cuts A-F	500	13.6	41
Gadsden Point Cut	500	3.1	41
Hillsborough Bay Cut A & C	500	6.6	41
Hillsborough Bay Cut D	400	1.0	39
Seddon Channel	300	1.1	23
Garrison Channel	275	0.4	35
Ybor Channel	400	0.9	35
Sparkman Channel	400	1.2	35
East Bay Channel and Turning Basin	2,700	1.5	34/41
Port Tampa Channel	400	7.3	34
Port Sutton Channel	280	1.0	39
Alafia River Channel	200	3.4	32

MAX. SIZE: Max. draft 41 ft. Vessels with draft of 39 ft. or more mus be started in at least 4 hours before appropriate tide level window; mus be sailed prior to high tide if subsequent tide change is less than dra over 39 ft. No limit on length and breadth.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

VESSEL TRAFFIC ADVISORY SYSTEM: The Tampa Port Authority provides a voluntary navigational aid to vessels transiting the bay. The VTAS can be reached by calling WHX362 on VHF Channel 12.

TUGS: Positions are:

Main port area – right past Beacon No. 35
Port Sutton & East Bay – Beacon No. 29
Port Tampa – Cut "K"
East Tampa – Beacon No. 16

Tug's lines only.

BERTHING: See "Tables" on pages 2527 - 2528.

Container Facilities: Containers are handled at several general carg terminals, but no specialised container facilities are currently in place.

Heavy lift capability exists to 300 tons with prior approval of the Tamp Port Authority. Electrical service for 52 refrigerated containers availabl

Also see "Tankers", "General Cargo Facilities", "Specialised Genera Cargo Facilities" and "Dry Bulk Facilities".

Also see "Developments".

BRIDGES: The Sunshine Skyway Bridge spans lower Tampa Ba Navigational clearance of 800 ft. Airdraft 175 ft. (MHW).

STEVEDORES: Stevedoring gangs must be ordered approximatel 24 hours in advance (before 1700 hrs. on day before needed).

MEDICAL: Advance notice for medical attention not required, but i preferable.

TANKERS:

* Also see "Shipmaster's Report" dated September 1996.

Note that part of above terminals use same piers. Most terminals ha residue discharge facilities.

FRESH WATER: Available all over port and delivered through sh hoses and meters. Rates of delivery various.

FUEL: All grades and types available, including all types of blended and Bunker "C". 24 hour notice required. All types of lube-oil avail with delivery in bulk or drums – 24 hours' notice is required. Major companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, Centra etc.) represented in Tampa. Delivery ex-pipeline, barge or truck.

GENERAL CARGO FACILITIES:

Operator	Location	Length	Depth	Remarks and Equipment
Tampa Bay International Terminal Inc. Thompson Shipping (Port Authority Berths No. 201, 202)	Verger Boulevard	900 ft. & 600 ft.	34 ft. 33 ft.	Mobile cranes to 300 tons available. 86,000 and 45,000 sq.ft. warehouses. Forklifts: 22×10-22.5 tons. Cruise ship passenger terminal and parking. 52 reefer plugs. Over 24 acres of paved backland adjacent to berths.
Tampa Bay International Terminals Inc. (Port Authority Berths 208, 209)	Verger Boulevard	1,500 ft.	33 ft. & 32 ft.	Mobile cranes to 300 tons available. 25,000 sq.ft. warehouse. Forklifts: 22×10-22.5 tons. 15 acres of paved backland adjacent to berths.
Harborside Refrigerated Services (Port Authority Berths No. 210, 211)	Verger Boulevard	1,200 ft.	35 ft. & 38 ft.	Dockside cold storage facility (198,000 sq.ft.). Mobile cranes to 300 tons available. Forklifts: 22×10-22.5 tons.
Tampa Bay International Terminals Inc. (Port Authority Berths No. 251, 252	Foot of Grant St.	1,200 ft. Marginal Wharf	33 ft. & 30 ft.	Forklifts: 22×10-22.5 tons. Conveyor system.

SPECIALISED GENERAL CARGO FACILITIES:

Operator	Location	Length	Depth	Remarks and Equipment
Commercial Metals Co. (Port Authority Berth 1)	Port Sutton	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes: 3×80 ft. boom, 1×70 ft. boom, each equipped with electric magnets.
Tampa Export, Winner Metals of Florida, David J.Joseph Co. (Port Authority Berth 219)	Maritime Boulevard Verger Boulevard Maritime Boulevard	400 ft.	40 ft.	Scrap metal loading facility. 3 floating barge cranes available.
Tampa Port Authority (Port Authority Berth 232)	Lehman St.	245 ft.	22 ft.	Cattle loading facility and holding pen.
Tampa Port Authority Terminal No. 2 and 1 (Port Authority Berths 272, 273)	Channelside Dr.	1,232 ft.	30 ft. & 33 ft.	Cruise ship passenger terminals and parking.
Tampa Port Authority Terminal No. 6 (Port Authority Berths 267, 268)	McKay St.	1,200 ft.	31 ft.	Cruise ship and ferry passenger terminal and parking.
Harborside Marine & Tankerman Services (Port Authority Berth 205)	Barker Rd.	580 ft.	34 ft.	Orange juice concentrate in bulk.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.

FIRE PRECAUTIONS: No specific precautions other than usual.

CONSULS: The following countries are represented in Tampa:

Colombia	Honduras	Norway
Denmark	Italy	Panama
Finland	Mexico	Sweden
Germany		

REPAIRS: All types are possible.

DRY DOCKS: Graving dock: 900 ft. long × 150 ft. wide, 21 ft. from MLW to top of keel blocks; 525 ft. long on bottom × 80 ft. wide, and depth over keel blocks 16-18 ft. at MHW.

Dry dock: 200 ft. long × 65 ft. wide. There are 2 other dry docks besides those listed above.

GANGWAY/DECK WATCHMEN: Watchmen not necessary, but available when required.

OPENING/CLOSING HATCHES: Longshoremen open and close hatches.

CERTIFICATES:

Documentation Papers.
Load Line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCES: Tobacco, 2 packs of cigarettes per day per man; wine and/or Spirit, no set amount. Each boarding officer has different views (i.e. German and Scandinavian vessels allowed 2 bottles of beer per day per man). Allowances made within reasonable bounds at Master's discretion subject to boarding officer's approval.

CARGO GEAR: No local special safety requirements. Longshoremen and U.S. Department of Labor requirements are uniform over the U.S.

REPATRIATION: No foreign crew pools in Tampa (located in New Orleans, San Francisco and New York), but crew changes can be made when Master radios requirements to Agent who arranges with local Consul or through crew pool in nearest city named above for applicable country (if no Consul is available in Tampa). American crew pools for all unions in Tampa.

Repatriation available via Tampa International Airport and is handled by Consul or Master.

AIRPORT: Tampa International Airport served by regular airlines and located approximately 15 miles from main port area; 5 miles from Port Tampa and 16 miles from East Tampa.

TIME: Tampa normally on Eastern Standard Time (GMT minus 5 hours) with Daylight Saving Time in effect from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day, January 1st; Martin Luther King's Birthday, 3rd Monday in January; George Washington's Birthday, 3rd Monday in February; Good Friday; Memorial Day, Last Monday in May; Independence Day, July 4th; Labour Day, 1st Monday in September; Armistice Day, November 11th; Thanksgiving Day, 4th Thursday in November; Christmas Eve, December 24th; Christmas Day, December 25th; New Year's Eve, December 31st.

When any of above holidays fall on Sunday, they will be observed on Monday following. Work on these holidays is by special arrangement only.

POLICE/AMBULANCE/FIRE: Dial 911.

TELEPHONES: Installation of telephone aboard can be arranged by agent.

SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.

SHIP SUPPLY SERVICE: Captain Riley F. Bryan, Sea Taxi, P.O.Box 46618, Pass-A-Grille, Florida. Tel: (813) 381-3999.

Suncoast Helicopters, 4111 W. Columbus Drive, Tampa, Florida 33607. Tel: (813) 872-6625.

A. P. St. Philip, Inc., 1305 Shoreline Drive, Tampa, Florida 33605. Tel: (813) 248-1123.

SHORE LEAVE: Immigration Authorities grant Clearance after examination of Passport or bona fide seaman's papers.

IDENTIFICATION CARDS: Passports required.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Garbage disposal is available through the ship's agent. Charges are usually based on tonnage.

Disposall, Inc., 3702 East 7th Avenue, Tampa, FL 33605. Tel: (813) 247-2446.

International Ship Supply, Inc., 2923 North B Street, Tampa, FL 33609. Tel: (813) 651-9840.

UETA, 223 S. 12th Avenue, Tampa, FL 33605. Tel: (813) 223-9155.

Browning-Ferris Ind., 11500 43rd Street North, Pinellas Park, FL 34622-4925. Tel: (813) 572-6800.

WASTE OIL DISPOSAL: Service is available using various local contractors. Ship's agent will usually arrange this on being informed of ship's requirements.

SEAMAN'S CLUBS: No Seaman's club. However, Rev. Ray Mungo runs the Seamen's Ministry and takes care of many of the seamen's needs. He handles international telephone calls, bank runs, trips to Disney World, Busch Gardens and other amusement parks, books, clothing, etc. He also provides church services. His details are:

Reverend Ray Mungo, 1516 Port Avenue, Tampa, FL 33605. Tel: (813) 247-5237.

CURRENCY: U.S.Dollar (U.S.$).

DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. Some delay possible in general cargo loading or unloading.

DEVELOPMENTS: Main harbour channel is 43 ft. Berth 201/202 Terminal is a multip-purpose general cargo complex with 156,000 sq.ft. of warehouse space and 1,500 lineal ft. of berthing space, with 10 acres of paved area for lumber, steel, containers, etc. This complex includes 52 reefer plugs. Berth 205 is a specially designed terminal to receive inbound bulk concentrate. The new 900 ft. Berth 208 is backed-up by 20 acres of paved area. An 80,000 sq.ft. warehouse is under construction at the site, scheduled for completion in November 1996. Berth 208 has on dock rail. Just South of Berth 208 is the 200,000 sq.ft. Harborside facility, the largest dockside cold storage terminal in the U.S. The port owns and operates 2 mobile P and H cranes, with 140 ton and 300 ton capacity. The Southern end of the main port peninsula is being expanded. By the end of the century, the port will have an additional 66 acres of deepwater property for further expansion.

In 1995, the Tampa Port Authority constructed two additional cruise terminals downtown, bringing Tampa's cruise terminal total to four.

DRY BULK FACILITIES:

Operator	*Location*	*Depth*	*Max. L.O.A.*	*Max. Beam*	*Height of Vessel Waterline to bulwark*	*Chute Travel*	*Loading Rate (N)=Net (L)=Long t.p.h.*
IMC-Agrico Chemical Co.	Big Bend	34 ft.	1,500 ft.	120 ft.	47 ft.	1,500 ft.	3,000 (N)
CF Industries Inc. (Port Authority Berth No. 204)	Holland Terminal	34 ft.	600 ft.	85 ft.	47 ft.	Stationary	1,100 (N)
Eastern Associated Terminals Co.	22nd St. Causeway Boulevard	38 ft.	850 ft.*	120 ft.	50 ft.	400 ft.	3,500 (N)
Rockport	22nd St. Causeway Boulevard	41 ft.	1,460 ft.*	120 ft.	53 ft.	1,450 ft.	3,000 (N)
Cargill Fertiliser	Highway 41 South	33 ft.	600 ft.*	80 ft.	51 ft.	335 ft.	400–900 (L)
IMC-Agrico Terminal Co.	Port Sutton	34 ft.	700 ft.*	104 ft.	43 ft.	378 ft.	1,800 (L)

*Can load longer vessels by shifting during operation.

Shipmaster's Report: (Updated 1996) Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned b CSX and Eastern Associated Terminal).

Loading rates: about 1,800 t.p.h. at Port Sutton;
about 3,000 t.p.h. at the two berths in East Bay area.

Trimming: The loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weigh 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to plac the bulldozer on board. A minimum of 8 ft. to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

DRY BULK FACILITIES: (continued)

Operator	*Location*	*Depth*	*Berthing Space*	*Handling Equipment*	*Area*	*Storage*	*Product Handled*
Cargill Inc. (Port Authority Berth No. 256)	North 19th St.	33 ft.	756 ft.	Marine leg for unloading 30,000 bushels/p.h., and spout loader-rate of 600 tons.	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.		Grain and dry bulk products.
Lafarge Corp.	Hookers Point	33 ft.	860 ft.	Belt material handling system capable of receiving 4,000 short t.p.h. of cement or 1,500 short t.p.h. of gypsum, 3 electric travelling bridge cranes equipped with 2.5 and 3 cu.yd. grab buckets.	800×100 gypsum storage shed; 215,000 barrel holding tanks for fuel storage (for plant consumption) 220,000 ton capacity open storage.		Gypsum rock, cement.
Vulcan/ICA Distribution Co.	Pendola Point Rd.	43 ft.	1,000 ft.	Conveyor system.			Limestone.
Holnam Inc.	Port Sutton	15 ft.	550 ft.	2×8 in. pipelines to storage. 4×12 in. pipelines to storage.	8 silos with 190,000 barrel capacity. 3 bins with 5,840 ton capacity.		Cement.
Tampa Bulk Services	Port Tampa	33 ft.	730 ft.	Belt elevator from storage to loading spout. Rate of discharge 500 t.p.h. Direct transfer from rail cars to vessels at 200 net t.p.h.	Silo capacity of 10,000 net tons.		Citrus pellets and other dry bulk products.
National Gypsum Co.	Port Tampa	34 ft.	750 ft.	Receiving hopper and conveyor–unloading rate of 2,000 net t.p.h.	Open area approx. 10 acres.		Gypsum rock.
Pakhoed Florida, Inc.	Pendola Pt., Road	32 ft.	700 ft.	Dock crane with 80 ft. boom with unloading rate of 400 t.p.h. Loading tower with rate of 1,200 t.p.h.	Building 125 ft.×700 ft. with storage capacity of 50,000 tons. 4 silos with 8,000 ton capacity.		Potash, phosphat products.
Tampa Electric Co.	Big Bend	30 ft.	788 ft.	200 ft. high travelling tower-conveyors system with unloading rate of 4,000 t.p.h.	24 acres.		Coal.
Tampa Electric Co.	Port Sutton	33 ft.	700 ft.	2 electric travelling unloading towers equipped with straight-line boom, and receiving hopper-combined unloading capacity of 1,600 t.p.h.	Exact size unknown.		Coal.
Southdown, Inc.	Pendola Pt. Road	43 ft.	1,000 ft.	Pipelines.	Silos.		Cement.
Martin Marietta Aggregates	Hookers Point	40 ft.	700 ft.	Conveyor. 2 radical stackers.			Cement, building construction aggregates and materials.

SHIPMASTER'S REPORT: July 1990 (Updated 1992).

Charts: B.A. Charts No. 3847 and 3848.

Approach: Low lying coastline. Radar picks up 'Sarasota' to South of Tampa Bay at 30 miles.

Anchorage: The Fairway Anchorage is North of Buoy No.1 (45 ft.). Various anchorages inside Tampa Bay with depths up to 30 ft. U.S.C.G. only allow vessels to remain a maximum of 48 hours.

Pilot: Boards at Fairway Buoy from fast black hulled cutter. Pilot Station at 'Egmont Key' South of main ship channel. Call Pilot Station on VHF Channels 16 and 12.

One Pilot takes vessel to berth and docks ship.

Outwards Pilot disembarks at Buoy No.14.

Pilot requires 2 hours notice inwards and outwards.

Channel: The maximum channel draft at present is 39 ft. L.W., even though some berths and channels have well over 40 ft. Patches still require maintenance dredging to 40 ft.

Gas Tankers (Foreign flag) of any size, daylight transit only in loaded condition. Complete passage must be in daylight, but if in ballast 24 hour berthing allowed. Gas tankers allowed to shift berth in loaded condition throughout 24 hours, but only if in Port Sutton Channel.

Oil and chemical carriers over 106 ft. LOA transit daylight only in loaded condition.

Sunshine Skyway Bridge near bay entrance consists of new bridge with vertical clearance of 175 ft. above MHW.

Tugs: 8 tugs in operation, up to 6,000 i.h.p., including 2 'Tractor' tugs.

Generally tie up "American Style" alongside with tug's lines, except 'Tractor' tugs which are on short line.

Tugs generally immediately available in emergency, otherwise require 2 hours notice.

Cancellation without payment, as long as tug has not left its berth.

Two tugs used when loaded, and one tug when in ballast.

Berth: Gas (Ammonia) carriers can discharge at 3 berths, IMC and Seminole in Port Sutton Cut and Royster off 'Cut D'.

IMC: North side of Port Sutton Channel (27°54.25' N., 82° 22.80' W.). Jetty set out from Port Sutton Channel. Fendering dolphins each end of jetty.

Berth can take up to 70,000 cu.m. gas tankers. Limiting factor is dra Presently maximum is 35 ft. plus tide. Fendering good, moori arrangement good, 3, 2, 2 each end, starboard side alongside, head o Ship's gangway used. Two public telephones near at hand at dock offi

Fresh water at good pressure. Connection at Chicksan, for which the is a charge.

Seminole: North side of Port Sutton Channel near entra (27° 54.25' N., 82° 25.50' W.). Facility formerly owned by Grace, but s in 1988.

Jetty set out from Port Sutton Channel. Outlying fender dolphins ea end.

Berth can also be used for caustic soda and scrap metal. The Caus Soda Jetty to the East of the Ammonia Jetty has no fendering, so ta care when berthing.

Scrap metal ships often use same berth to load from facility to E of Ammonia Jetty. Check with Agent that dock bottom is clear of sc before berthing. Apart from above, fendering fair. Berth can take u 70,000 cu.m. gas carriers with limiting draft of 35 ft. plus tide.

Vessels berth starboard side alongside, head out. Shore gang used. Nearest public telephone is at IMC to East. Master is permi to use Seminole office telephone in working hours. Fresh water at g pressure. Connection at Chicksan, no charge.

Royster: Vessels can berth either side of finger pier at Hooker's Po opposite Peter O.Knight Airport.

About 50,000 cu.m. gas carriers maximum size. Also used for o oil products and chemicals. Position: 27° 55.15' N., 82° 26.60' W., N side No. 227, port side too, South side No. 226, starboard side Ship's gangway used at both berths. One public telephone near b of jetty. Fresh water near Chicksan, charged.

Lay-By Berth No. 31, Pendola Point: If awaiting discharge berth, a b attached to a cement silo can be used at South Entrance to Port S Channel at Pendola Point (27° 54.2' N., 82° 26.0' W.) with 38 ft. plu alongside. Jetty with outlying mooring dolphins. Mooring leads a not good. Port side alongside, head out. Ship's gangway used. No f water, no telephone. Berth very isolated.

Discharge: IMC: Terminal requires product to be at −32.2°C. or colder. Tank pressures 49.2 mb. although not rigidly enforced.

Average discharge rate is 760 t.p.h., with approximately 6.5 kg./sq.cm. at ship's manifold, equates to 4 pumps.

One 20,000 cu.m. tank for NH3.

Chicksan 10 in. 150 ASA.

Necessary to cease discharge for passing traffic.

Surveyors: Saybolt and Thornton. Saybolt Surveyor may read draft before boarding. Thornton Surveyor uses different Density Tables from ship.

Seminole: Permitted pressure approximately 7.5 kg./sq.cm. at manifold, average discharge rate 535 t.p.h. using 3 pumps.

Necessary to cease discharge for passing traffic.

Chicksan 6 in. 150 ASA.

1×20,000 cu.m. and 1×12,000 cu.m. storage tank immediately adjacent.

Surveyor (Saybolt) reads draft before boarding. Arm drained to shore on completion.

Royster: Average discharge rate 980 t.p.h., equates to 6 pumps.

12 in. 150 ASA Chicksan which can swing either side of pier.

Stores: We used Florida Ship Supply who were helpful, and prices reasonable. Can use midship derrick at all berths, and aft derricks at Royster.

Repairs: Tampa International Ship Repair for repairs. Tampa Electric Motor Co. 'TEMCO' for electric motors repairs.

General: Tampa/St.Petersburg International Airport about 30 minutes from Port Sutton, to N.W. of city centre.

Plenty of shopping malls plus entertainment, such as Busch Gardens and Disney World, near at hand.

SHIPMASTER'S REPORT: October 1991.

Pilotage: Tampa Tri-County Pilots have discontinued service.

For pilot call Tampa Bay Pilots on VHF Channels 10 and 12. The pilot boards and disembarks between Buoys No. 9 and 10 (original entrance to the channel before being extended in 1984). This pilot also berths and unberths the vessel.

There is no longer any restriction on gas carriers, they may now berth and unberth throughout 24 hours.

If the weather is poor (strong Northerly winds), the pilot may embark and disembark near Buoy No. 20, but this depends on the vessel and the Master.

Channel: The Egmont Channel has a projected depth of 50 ft., but is liable to constant shoaling. The distance from the Fairway Buoy to Port Sutton is 41 miles. The maximum permitted draft in October 1991 to Tampa was 40 ft. 06 in. on a rising tide, but this was only to certain berths.

When there is a strong Northerly wind, a heavy swell can form over the Egmont Channel, thereby causing deep draft vessels to bottom.

Anchorage: See B.A. Chart No. 3847. There is no shelter in this anchorage.

Bridges: The old Sunshine Bridge (shown on B.A. Chart No. 3847 as the operating bridge) to the West of the new bridge is finally being demolished and contractors machinery and plant are working on the old spans. The piers for the bridge will be removed to a depth of 42 ft. adjacent to the shipping channel and below small craft draft outside the shipping channel.

Tugs: For vessels proceeding to Port Sutton Channel and berths further North, the tugs join at Beacons No. 25/26.

Tugs are supplied by St. Phillip Towing Co., who operate numerous old tugs and a new tractor type called the "Kingsman Eagle". If the "Kingsman Eagle" is used the charges are double that of the older tugs.

Normally 2 tugs and tug's lines are used.

Berthing: Chemical parcel tankers berth at Boliden Chemical Co. on the South side of Port Sutton Channel (27° 52.2' N., 82° 24.8' W.), where the depth reported by the pilots is 31 ft. The berth is a typical tanker 'T' jetty with Chicksan arms and hoses. The berth can accept parcel tankers up to 40,000 d.w.t. The berth is made of a 20 m. 'T' head with breasting dolphins at each end. Vessels generally berth head in, starboard side to. Ship's brow gangway required.

There is a berth at the Western end of Port Sutton Cut at Pendola Point (27° 54.2' N., 82° 26.0' W.) which has been dredged to 45 ft. and is used for topping-off bulk carriers loading phosphate.

Cargo: Sulphuric acid discharge: There are 2×6 in. shore hoses for discharge of sulphuric acid to the nearby shore tanks. Sulphuric acid can be accepted at up to 1,000 tonnes/hr.

A shore radio is provided and co-operation with the shore is good.

Ship's air line is required on completion to blow the manifold and line ashore. It is best to have connection ready for ship's own manifold.

Caustic and asphalt also handled at this berth.

Loading Master has a Cellnet telephone which the Master can use for local calls.

Density: 1017.

Fresh Water: Fresh water is available from a stand pipe on the jetty (no meter) at about 20 tonnes/hr. Ship's hoses are used and the rate is lower during the night.

Supplies: There are numerous ship chandlers in the port. We found Florida Ship Supply (Telex No. 52422) very good on our numerous visits to the port. For bonded stores we used Bonnani (Telex No. 6732315).

Storing: Trucks can back-up to within 15 m. of the ship's side.

Telephones: There are 2 telephones on the jetty at the end of Port Sutton Dock which is about 0.25 miles from the berth. The agent will also rent a portable Cellnet telephone to the vessel.

SHIPMASTER'S REPORT: September 1996.

Charts: B.A. Charts No. 3847 and 3848.

Approaches: Racon on sea buoy conspicuous at 12 miles.

Coast line generally flat.

Coastal high rise buildings to North of channel visible around 14 miles (radar targets over 24 miles).

Pilots: As per ALRS Vol. 6, H3270.

Pilots work on Channel 12 with good range (50 miles).

Pilot station on Egmont Key (24 hour service).

Pilot generally boards at Buoys No. 7/8 from large fast black hulled cutter with conspicuous red deck.

Pilot departs at Buoys No. 9/10, depending on ship's size, draft and weather.

In severe weather, Pilot will request vessel to come inside.

Anchorage: As per B.A. Chart No. 3847, North of Fairway Channel. Poor holding and exposed.

Channel: Lights on outer Buoys No. 1/2 not conspicuous (very dim). Distance to Port Manatee Channel 23 miles, to St. Petersburg Channel 31 miles and to Tampa/Port Sutton 41 miles (about 3 hours transit to Port Sutton).

Main channel to Tampa takes 40 ft. draft (SW).

Channel outer width 600 ft., narrowing to 400 ft. near Tampa.

Vessels using Port Sutton Channel swing in Turning Basin off Pendola Point and either back in or out with tug assistance, depending on berth and vessel preference.

Tugs: Numerous and powerful tractor tugs available. Tug's lines used. We used one small tug.

Berth: Martin Gas Terminal (No. 24): Previously known as Bolieden. Berth is located on the South side of Port Sutton Channel. It is a typical 'Tanker T' jetty set out from shoreline by 60 ft. with effective fender length of 215 ft.

The central section is 35 ft. with outlying mooring/fender dolphins, giving over 215 ft. of berthing length. Dolphins are connected to shore by a catwalk.

The central section has a hose gantry, control cabin and F.W. pipe. Ships of less than 350 ft. LOA would find it difficult to land on the fenders, taking into account the bow/stern curve. Pilots say 32 ft. alongside MLW. Generally, starboard side to.

Density: 1011 at all tidal states.

Cargo: Terminal handles acids, caustics, asphalt and fuel oils. Hoses are 6 in. and 8 in. from hose gantry. Ship's crane/derrick required. Tank farm immediately adjacent.

Sulphuric acid handled by 2×6 in. hoses. Rate as fast as vessel can pump (up to 100 p.s.i., about 700 tonnes/hr.).

Good cooperation from Terminal, and helpful.

Facilities: Fresh water from hose jetty at 15 tonnes/hr. Ship's hoses used. Ship's wharf ladder can be landed on Western mooring dolphin.

Stores can be delivered within 60 ft. of ship's side and then hand-trucked along Western mooring dolphin catwalk.

Bunkers by barge or off jetty.

All usual facilities of a large city, including medical facilities and repairs. Note: Fresh water only obtainable from berths, there is no fresh water barge available in Tampa.

Stores: A number of chandlers available.

For Korean produce we used Kim Brothers. Telex: 02559102503910. They gave prompt service, good produce, but expensive.

For general and Western produce, we used Florida Ship Supply. Tel: 813-248-1175. Fax: 813-247-5798. Good service. They also provide bonded stores.

Unitor have a small depot. Most items, except gases, have to be freighted in from either Nola or Miami.

Authorities: No difficulties. Usual entry forms required. Health/Agriculture Inspector boards on arrival and checks all produce. Any non-Florida fruit is sealed.

AUTHORITY: Tampa Port Authority, George B. Howell Maritime Centre, 811 Wynkoop Road, (P.O.Box 2192), Tampa, Florida 33601. *Tel:* (813) 272-0555. *FAX:* (813) 272-0570. *Contact:* Robert N. Steiner, Port Director. Steven L. Fidler, Operations Director.

TEXAS CITY, Texas: 29.22 N. 94.53 W. (See Plan)

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".

RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.

Industrial canal deepened from 34 ft. to 40 ft., in 1981.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required.

Report: *AMOCO:*

General: The Amoco Terminal at Texas City consists of Berths No. 31, 33 and 34 barge dock, 32, 37, 38, 40 and 41 (Berths No. 40 and 41 also used by T.C.T. and Marathon). Distance from the sea buoy to these berths is 15 miles.

Mooring and Berth: Pilot services for the Texas City port are provided by the Galveston Pilot Association.

Products handled at Berths No. 31 and 32 include gasoline, distillate, anhydrous ammonia, crude and also ballast and slops. Anyhdrous ammonia is handled through 1 stainless steel arm, 6 in. flanged connection and maximum pumping pressure of 35 p.s.i. All other products are handled through 8 in. lines with flanged connections. Maximum pumping pressure on all products is 100 p.s.i.

Berths No. 40 and 41 handle the discharge of crude only. Both berths have 2 loading arms. All lines are 12 in. and are quick disconnect-type connections. Maximum pumping pressure is 150 p.s.i. There are no facilities for handling ballast or slops at these berths.

A minimum of 2 tugs are required for docking and undocking. However, the Master of the vessel and the Docking Master may determine actual tug requirements for their vessel based on vessel manoeuvrability and weather conditions.

The normal mooring arrangement at Berths No. 31 and 32 is starboard side to. Port side mooring is done after turning the vessel in the turning basin. 2 head lines, 2 forward breast lines, 2 spring lines, 2 stern lines, 2 aft breast lines and 2 aft spring lines are sufficient for mooring most vessels. Line handlers are supplied by Texas City Boatman Co. and Amato Linehandlers. This terminal does not furnish a gangway to vessels.

ARCO:

General: The ARCO facility is located toward the North end and on the West side of the Texas City Turning Basin. Berths No. 11 and 12 are the 2 berths at this terminal. The area around these berths is dredged to 40 ft.

The ship dock is a concrete and steel finger pier permitting vessels to moor on either side. 2 vessels are the maximum that may be discharged at one time. There is no provision to load vessels at the facility and no facilites for dry cargo handling.

Mooring and Berth: Water depth is the factor that limits the size of fully loaded vessels that call at the facility. Lightered or partially loaded vessels of greater size can be accommodated. Distance from the bow of a vessel to the centre of its manifold cannot exceed 468 ft. and from the centre of its manifold to the stern of the vessel cannot exceed 500 ft. Vessels will be docked bow in unless prior arrangement has been made with facility operators to permit bow out mooring. Should the vessel be moored bow out, the bow/manifold restrictions become 500 ft. and the stern/manifold distance 468 ft.

The pilotage of vessels to Texas City is performed by the Galveston/Texas City Pilots. This terminal does not make arrangements for Pilots.

9 mooring structures are installed at each berth and several lines can be secured on each. A boat is required to reach some structures. The ship's Agent will be responsible for arranging mooring and unmooring line handlers. The handlers will be under the orders of the Ship's Officer regarding the handling of each individual line and location of the shore end. The facility has Regulations concerning the minimum number of lines and the type of lines used.

They are:

Vessels less than 525 ft. LOA:
- 2 head lines
- 2 forward breast lines
- 2 forward spring lines
- 2 aft spring lines
- 2 aft breast lines
- 2 stern lines

Mixed moorings not encouraged or allowed.

Vessels greater than 525 ft. LOA:
- 3 head lines
- 3 forward breast lines
- 3 forward spring lines
- 3 aft spring lines
- 3 aft breast lines
- 3 stern lines

Vessel's mooring lines must be kept taut and secure at all times. If the vessel moves more than 4 ft. away from the dock or 4 ft. in either direction along the dock, all cargo transfer operations must be stopped immediately, and the proper manifold valves must be closed. Operations must not resume until the condition has been corrected.

Facility will provide gangway. Vessel's crew must attach gangway to the vessel and furnish/install safety net under gangway. If it is necessary to use vessel's gangway, facility's crew will help position gangway onto dock platform.

Aluminium gangways with rotating platforms and feathering treads are provided. The shipboard end is designed to attach to the vessel's gunwhale or over the ship's rail.

Crude is the only cargo handled at this berth. All lines are 16 in. and have hydraulic connections. Maximum pumping pressure is at 175 p.s.i. There are no facilities for ballast or slops at this terminal.

Municipal Docks No. 16, 18 and 20:

General: Municipal Docks No. 16, 18 and 20 are located adjacent to the Texas City Harbour turning basin.

Dock No. 16 has a 140 ft. face, 283 ft. with dolphins; 40 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil and shipment of petroleum products, chemicals and petrochemicals.

Dock No. 18 has an 88 ft. face, 320 ft. with dolphins; 34 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil. Dock No. 20 has a 98 ft. face, 284 ft. with dolphins; 32 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil and shipment of petroleum products.

Mooring and Berth: Tug requirements are determined according to vessel size, Master's requirements and recommendations of the Docking Master doing the docking.

The normal berthing manoeuvre into Dock No. 16 consists of a tu of 140° to port from the Texas City Turning Basin. The berth is on th starboard hand of the basin about 1,500 ft. from the turning basi entrance. Vessels tie up either port or starboard side to manila o polypropylene lines are normally used, but wire is permissib No gangway is provided at this berth.

Vessels destined to Berth No. 18, enter the turning basin from th Texas City Channel. Berth No. 18 is at a right angle to the turning bas approximately 2,000 ft. from the entrance to the turning basin. Vess normally turn in the turning basin in order to back into the berth. Norm side to dock is the port side. Berth No. 18 is the first berth on the Nor side of the municipal dock basin. No gangway is available at this doc

Vessels destined to Berth No. 20 enter the turning basin from th Texas City Channel. Berth No. 20 is also at a right angle to the turnin basin approximately 2,500 ft. from the entrance to the turning basi Vessels turn bow first into this dock area from the turning basin for port side docking. Manila or polypropylene lines are used. This is th poorest of the 3 docks. Adequacy of mooring facilities is margina physical condition of the dock is poor, but acceptable. Dock equipme is fair, but acceptable. No gangway is provided at this berth.

Products handled by Berth No. 16 are all handled through 8 in. line with flanged connections at pumping pressures between 20 p.s.i. an 125 p.s.i. Ballast and slops are handled through 8 in. lines with maximum pumping pressure of 100 p.s.i.

At Berth No. 18 crude oil is discharged through 2×8 in. lines wi flanged connections. Maximum pumping pressure is 125 p.s.i. Faciliti for ballast and slops are available.

Products handled by Berth No. 20 are all handled through 8 in. line with flanged connections at pumping pressures between 30 p.s.i. an 125 p.s.i. Ballast and slops are handled through 8 in. lines with maximum pumping pressure of 100 p.s.i.

MEDICAL: All medical assistance available.
DENSITY: Brackish.
FRESH WATER: Available at all wharves except Union Carbide.
FUEL: Bunker "C" available to tankers loading/discharging. All grad available by barge from Houston.
CONSULS: See "Houston".
GANGWAY/DECK WATCHMEN: Required only if crewmen detaine by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars o 1 lb. tobacco. 1 qt. wine/spirits.
TIME: Central Standard Time GMT minus 6 hours. Daylight saving tim effective from April to October.
SHORE LEAVE: No restrictions unless detained by Immigration.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. po (Albany).

A garbage collection service is available through Browning-Fer Industries. Tel: 1-800-637-7339.

WASTE OIL DISPOSAL: Collection of waste oil is available throu Malone Company, Texas City. Tel: (409) 945-3301 or 938-1791. Th company is licensed by the State to receive and transport hazardo material for disposal.
SEAMAN'S CLUBS: At Galveston and Houston.

SHIPMASTER'S REPORT: February, 1979.
Restrictions: Vessels on maximum draft must be clear of Texas Ci Channel before dark. There is no sailing or berthing during darkness t maximum draft vessels.

For large vessels it is necessary to ballast during discharge otherwi shore connections become too high.

VHF: Channel 13 from sea and Channel 14 for berthing.
Tugs: Usually 4-6 tugs for vessels on maximum draft.
Tankers: Large tankers dock at Docks 40 & 41 usually starboard si to. On either dock it is not easy loading stores from the doc 2×12 in. connections.
Customs Allowance: All souvenirs to be collected (items intended a presents) and sealed.
Repatriation: As with all U.S. ports must make out Form I-408 application to pay off or discharge alien crewman.
Airport: At Houston.
Telephone: Pay telephone at bottom of gangway.
General: Will require ship's gangway abaft of manifold if bottom gangway is more than 115.5 ft. (35.20 m.) abaft after manifold wi freeboard of 23 ft. or more.

AUTHORITY: Texas City Terminal Railway Co., P.O.Box 591, Tex City, Texas 77592-0591, U.S.A. *Tel:* General Office (409) 945-44 Harbour Master (409) 945-5011. *FAX:* (409) 948-9160, 945-84 *Contact:* H. Ritter, President and General Manager. J. Gilder, Harb Master.

TOLEDO, Ohio: 41.42 N. 83.28 W. (See Pla

Refer to "St. Lawrence Seaway" for important general informatio
PILOTAGE: By Seaway Pilots.
RESTRICTIONS: Navigation season from mid-March to end-Decem approx. The port is connected to Lake Erie by an entrance cha depth 27 ft. Vessel's size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 104 ft. ab water-line which applies to grain berths only.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany)
RADIO: Master must give at least 24 hours' notice to Command Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Also, at least 24 hours' notice of ETA at first U.S. discharge po required. Toledo Port can be contacted through Lorain, Ohio or Colborne, Ontario.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

The Great Lakes Towing Company, 1800 Terminal Tower, 50 Public Square, Cleveland, Ohio 44113-2274. Tel: (800) 321-3663 and (216) 621-4854. Fax: (216) 621-7616.

BERTHING:
CSX Coal Dock: 2,000 ft. long, 26 ft. depth alongside.
Torco Dock: 1,200 ft. long, 26 ft. depth alongside.
Heidtman Steel Corporation: 23 ft. depth alongside.
Countrymark Cooperative, Inc. Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.

CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.

CARGO HANDLING FACILITIES: 2 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 3 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h.

Iron pellets are received at new Torco Dock from self-unloading lake vessels. Storage Capacity 800,000 tons.

Liquids handled include petroleum products, industrial molasses, trichlorethylene and perchlorethylene.

6. Yes.

DEVELOPMENTS: Major construction projects by the three riverfront grain operators has increased grain handling capacity from 10.2 million bushels to over 22 million bushels. A new 6 million gallon facility for storage of liquid fertiliser is planned and an additional ship loading dock is under construction.

AUTHORITY: Toledo – Lucas County Port Authority, One Maritime Plaza, Toledo, Ohio 43604-1866. *Tel:* (419) 243-8251. *FAX:* (419) 243-1835. *Cables:* Portol. *Contact:* J.M. Loftus, Seaport Director.

UNALASKA (Dutch Harbor), Alaska:
53.54 N. 166.30 W. **(See Plan)**

DOCUMENTS:

Customs:
Master's Oath (1300).
General Declaration (1301).
Cargo Declaration (1302).
Ship's Stores Declaration (1301).
Crew Effects Declaration (1303).
Clearance from Last Port.

Immigration:
Immigration Documentation (I-418).
Crew/Passenger List.
Landing Permit (I-95).
Visaed Crew List for Shore Leave (Supplied by Immigration).
Passport and (or) Seamens' Book.

PILOTAGE: Compulsory. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Unalaska/Dutch Harbor must make prior arrangements at least 12 hours before entering port. The following information must be included:
1. Name/Call Sign of vessel.
2. Nationality.
3. Length, draft and g.r.t.

Pilot Boarding Station:
Lat. 53' 55' 00" N., Long. 166° 29' 00" W. 1 mile (1.61 km.) East of Ulakta Head. Pilots, tugboats, Harbour Master and shipping Agents standby on VHF Channel 16 (156.8 MHz).

Berthing:
(a) Pilot – Compulsory. Shifting of and EDT requires 1 hour advance notification.
(b) Berths arranged by Agent in advance.
(c) 1 small tug available annually. Circumstances may arise when other tugs are available for ship assistance.
(d) Lineman – Arranged through ship's Agent.
(e) Boatmen – Arranged through ship's Agent.

ANCHORAGE:

Outer Anchorage: Lat. 53° 54' 00" N. to Lat. 53° 55' 00" N. at Long. 166° 27' 00" W., Rocky, Depth 12 fathoms.

Inner Anchorages: Domestic and other vessels which have cleared customs.
1. Dutch Harbor: Lat. 53° 54' 00" N., Long. 166° 31' 20" W., mud, depth 18 fathoms.
2. Iliuliuk Bay: Lat. 53° 52' 40" N., Long. 166° 31' 10" W., mud, depth 14 fathoms.
3. Captain's Bay: Lat. 53° 52' 00" N., Long. 166° 33' 33" W., mud, depth 15 fathoms.
4. Nateekin Bay: Lat. 53° 53' 00" N., Long. 166° 37' 00" W., mud, depth 17 fathoms.
5. Broad Bay:
   (a) Lat. 53° 55' 05" N., Long. 166° 36' 30" W.
   (b) Lat. 53° 56' 05" N., Long. 166° 36' 30" W.

Must check with the U.S. Coast Guard and the Alaska Department of Fish and Game prior to anchoring or placing an oil rig at these locations. More locations may be forthcoming.

Note: When anchoring in Dutch Harbor, no vessel may anchor in the glide path to the airport.

MAX. SIZE: No restrictions except draft at various facilities and through the East Channel 24 ft., Rocky Bottom at MLLW.

RADIO:
(a) Department of Public Safety, Harbour Master, Pilots, Tugs, Shipping Agents and National Marine Fisheries Observer Transfer Station standby on Marine VHF Channel 16. 4125 A kHz.
(b) Alaska Department of Fish and Game and the Alaska Department of Fish and Wildlife, (State Troopers) standby on Marine VHF Channels 6 and 16. 4125 A kHz.
(c) Marine Operator calls vessels on Marine VHF Channel 16 and receives all radio traffic on VHF Channel 28.
(d) All other traffic stands by on Marine VHF Channel 9.

TUGS: Padilla Tug Co. and Dunlap Towing.

Boatmen:
Victory Services – VHF Channel 78.
Ballyhoo Services – VHF Channel 16.

BERTHING:

Berth No.	*Wharf Length* (ft.)	*Depth at MLLW* (ft.)	*Remarks*
1	1144	30	City Dock and Petro Marine tank farm – Warehouse available.
2	300	40	APL – 208, 3 ph., 60 cycle power. 100,000 lb. gantry crane.
3	360	50	Delta Western Fuel Pier.
4	160	30	Trident Seafoods Inc.
5	234	36	Petro Marine.
6	250	26	Petro Marine.
7	1000	26	Delta Western.
8	35	22	MarCenCo.
9	35	22	Icicle Seafoods Inc.
10	995	35	Split Dock Facility (City)
11	505	24	Alyeska Fisheries North Dock.
12	300	36	Alyeska Fisheries West Dock.
13	460	30	East Point Seafoods.
14	250	30	Aleutian Processors barge.
15	250	36	Greatland Seafoods.
16	250	30	Unisea Inc.
17	250	30	Unisea Inc (barge Vita).
18	90	30	Unisea Inc (Galaxy Dock).
19	40	30	Unisea Inc (Viceroy Dock).

Berth No.	*Wharf Length (ft.)*	*Depth at MLLW (ft.)*	*Remarks*
20	800	18 (var.)	City Small Boat Harbor, Fishing/ Pleasure.
21	78	20	Walashek Industries (Repair, 300 ton haulout).
22	160	31	Underwater Construction.
23	300	35	Crowley Maritime.
24	420	20	Offshore Systems Inc.

CRANES: 100,000 lb. container lift at American President Lines. Mobile cranes at the other facilities up to 150 tons at request through Shipping Agent. The City Dock also has a container crane.
FRESH WATER: Fresh water is available at most berths. Order through Agent or Dock Operator. The City Dock has 5 outlets.
FUEL: Available at Delta Western Fuel Pier No. 3; Petro Marine Piers No. 1 and 6 and Crowley Maritime No. 23. The City Dock has 8 outlets for fuel.
REPAIRS/SERVICES: Most deck, hull, engine, radar, RT, gyro, hydraulic, refrigeration and almost all types of marine electronic and electric repairs. Divers available for underwater surveys and repairs.
DRY DOCKS: Walashek Industries 300 ton haulout facility.
SURVEYORS:

1. Kodiak Marine Surveyors, P.O.Box 356, Kodiak, Alaska 99615. Tel: (907) 486-5616.
2. Rocky Point Enterprises, Inc., P.O.Box 1047, Homer, Alaska 99603. Tel: (907) 235-8967.
3. Alaska Marine Surveyors, SRA-2 Box 9312, Eagle River, Alaska 99577. Tel: (907) 694-3055.
4. Capt. Wolslenholm, P.O.Box 3313, Anchorage, Alaska 99510. Tel: (907) 277-5109.

GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway used.
OPENING/CLOSING HATCHES: Stevedores or ship's crew whichever to ship's advantage.
REPATRIATION: Crew changes and repatriation can be carried out with little difficulty.
AIRPORT: No more than 4.5 miles from any facilities and adjacent to City Dock. Daily flights to Anchorage with domestic and international connections. Peninsular Airways, Reeve Aleutian, Alaska Airlines and Aleutian Aire Ltd. Air charter service state wide.
TIME: GMT minus 9 hours in Winter, and GMT minus 8 hours in Summer. First Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.
HOLIDAYS: New Year's Day, Lincoln's Birthday, Washington's Birthday (3rd Monday in February), Seward's Day (last Monday in March), Memorial Day (last Monday in May), Independence Day, Labor Day, Alaska Day (18th day in October), Veteran's Day (November 11th), Thanksgiving Day and Christmas Day and every Sunday and every day designated by public proclamation by the President of the United States or the Governor of the state as a legal holiday.

Port Department on duty 24 hours every day.
POLICE/FIRE/AMBULANCE: Tel: (907) 581-1233; Emergency Tel: 911; VHF Channel 16, 24 hours a day.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard. Dial 0 – Ask operator for Zenith 5555 or 2182 kHz.
GENERAL: Fishing vessel's wide lights and searchlights must be turned out prior to vessel entering port.
AUTHORITY: International Port of Dutch Harbour, City of Unalaska, P.O.Box 610, Unalaska, Alaska 99685. *Tel:* (907) 581-1254. *FAX:* (907) 581-2519. *Contact:* James Severns, Port Director. Haraldur Gudjonsson, Harbour Master.

VALDEZ, Alaska: 61.07 N. 146.21 W. (See Plan)

Also see "Valdez Marine Terminal".

Located at head of Valdez Arm in Prince William Sound.
DOCUMENTS: See "Anchorage, Alaska".
APPROACHES: Via Prince William Sound to the Valdez Pilot Station.
PILOTAGE: Pilotage provided by Southwest Alaska Pilots Association. Pilot boards approximately 3.6 miles × 246° from Blight Reef Buoy (Lat. 60° 49' N., Long. 147° 01' W.).
MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. Also see "Berthing" and also see "Valdez Marine Terminal".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Excellent, close by dock. Bay is too deep.
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage.
TUGS: Limited availability.
BERTHING: Valdez City Dock: 26 ft. MLLW. 600 ft. long by 60 ft. wide. Stevedore provides equipment which includes fork-lifts and 2×100 ton mobile cranes and 1×150 ton mobile crane.
Floating Quay: Length 700 ft., width 100 ft. Mobile cranes available. Facilities for Lo/Lo and Ro/Ro.
STEVEDORES: 3 gangs.
MEDICAL: 15-bed hospital, 3 doctors and 1 dentist available.
TANKERS: *Tesoro Petroleum, Petroleum Dock:* Length 200 ft., width 40 ft., depth 36 ft. at MLLW.

Also see "Valdez Marine Terminal".
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs only.
TRANSPORTATION: Air; highway to Fairbanks and Anchorage.
GARBAGE DISPOSAL: Service is available, truck or dumpste provided. Charges: Non-regulated $ 125.00 per truck load. Regulate $ 14.00 per pound (50 pound minimum). Contact Port Director. Tel: 90 835-4313.
WASTE OIL DISPOSAL: Available by contractor. For arrangeme contact Port Director (see above).
AUTHORITY: City of Valdez, P.O.Box 307, Valdez, Alaska 9968 *Tel:* 907-835-4313, 835-4981. *FAX:* 907-835-4479. *Contact:* Thoma W. McAlister, Port Director. Tim Lopez, Harbour Master.

VALDEZ MARINE TERMINAL, Alaska: 61.05 N. 146.24 W. (See Pla

OPERATORS: Alyeska Pipeline Service Company.

The terminal does not provide any tug, launch or pilotage assistan for the berthing or unberthing of tankers calling at the terminal. Thes services, as well as any other tanker services, must be arrange separately by tanker owners.
LOCATION: The Trans-Alaska Pipeline Valdez Marine Terminal i situated on the Southern shore of Port Valdez.

Port Valdez is a natural deep-water fjord located at the N.E. part o Prince William Sound which provides access from the Gulf of Alaska Port Valdez is about 12 miles long and 2.5 miles wide, is surrounde by steeply rising mountains, and remains ice free throughout the yea The approach to Port Valdez is by way of Valdez Arm, a deep-wate channel with a minimum width of approximately 3,000 ft.

The overland approach to the site, which is close to the mouth of th Lowe river, is by road about 6 miles long connecting the terminal wi the Richardson Highway. The town of Valdez is 14 miles from th terminal by this route. The distance by boat across to Port Valdez i approx. 2.5 miles.

The terminal operates 24 hours per day, 7 days per week, througho the year.

The administrative offices will normally be open between 0800 an 1630 hrs., Monday through Friday. The office telephone number is (907 835-6620.
DOCUMENTS:

Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
Derat Certificate.
Clearance from Last Port.
Oil Record Book.
Prince William Sound Spill Prevention and Response Plan.
Ballast Water Survey Form (BWSF) to be completed on arrival.

PILOTAGE: The Pilot boards off Blight Reef (See "Valdez" Arrangements to be made by vessel's Agent.
ARRIVAL ADVICE: Masters of vessels bound for the terminal mu advise the terminal as follows:
Last Port ETA: Tankers en route to the terminal, upon departure fr their last port of call prior to Valdez, will send a telegram or telex t Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 002 62806129, 0023-62890691, 0023-62880291 (Answerback: Alyes Valz), advising the estimated Alaskan local time and date of arrival.
72-hour ETA: Not less than 72 hours, unless transit time is less th 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a tel or telegram to Alyeska Pipeline Service Company providing the termi with the following information:

a. ETA at Cape Hinchinbrook.
b. Quantity of ballast to be pumped ashore and grade of last cargo.
c. Quantity of oil to be loaded.
d. Distance from the bow to cargo manifolds.
e. Size, number and type of cargo connections.

} At first call to Terminal. Not necessary on subsequent voyages.

f. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of th arrival. This 24 hour ETA shall be as accurate as possible and tank will notify the terminal whenever the arrival time changes by more th 3 hours.
Notice of Arrival: After entering the Coast Guard's Prince William So Vessel Traffic Service, vessels ready to commence loading deballasting should give immediate notice to the terminal. This noti extremely important as it can affect berthing priority.
Coastguard Notification: Terminal will advise USCG at Valdez of all ET received.
AMVER Participation: The Notice of Arrival requirement to be give the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be if vessels participate in the Automated Mutual-assistance Vessel Re System (AMVER). Participation in AMVER will also make the Co Guard's Prince William Sound Vessel Traffic Service aware of tankers that will be entering the service.
Initial Radio Contact: Ship-to-shore radio telephone calls can be to the terminal, (907)-835-2261, 24 hours a day by normal comm Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

Weather Broadcasts:

Weather Service Offices:

		Frequency	Times (GMT)
Ketchikan	(NMJ)	416	0530 hrs., 1730 hrs.
Kodiak	(NOJ)	470	0630 hrs., 1930 hrs.

Broadcast Notice to Mariners: Broadcast Notice to Mariners are disseminated on the following schedules:

Safety Broadcast:

(1) RADSTA Ketchikan (NMJ). (a) Code (CW) — Last 15 seconds of 1st Silent Period after receipt, next on operator schedule and repeat text only on next scheduled broadcast unless message cancelled. Additional broadcasts as directed, preliminary call on 500 kHz, broadcast on 416 kHz.

COMMSTA Kodiak (NOJ). Voice (AM) — Upon receipt, repeat text only on next scheduled broadcast. Additional broadcasts made as directed with preliminary call on 2182 kHz, broadcast on 2670 kHz.

(3) RADSTA Adak (NOX). Code (CW) — Last 15 seconds of 1st Silent Period after receipt, next on operator schedule and repeat text only on next schedule broadcast unless message cancelled. Additional broadcasts as directed, preliminary call on 500 kHz, broadcast on 450 kHz.

(4) RCA — Alascom Ketchikan (WGG 58). Voice (AM) — On 2400 kHz upon receipt and as directed in broadcast instructions.

(5) RCA — Alascom Ketchikan (WGG 56). Voice (AM) — On 2400 kHz upon receipt and as directed in broadcast instructions.

Note: Watch hours (GMT) for single operator ships:

West Coast	Central Pacific
0001 – 0200 hrs.	0001 – 0200 hrs.
0400 – 0600 hrs.	0400 – 0600 hrs.
1600 – 1800 hrs.	0800 – 1000 hrs.
2000 – 2200 hrs.	2000 – 2200 hrs.

Scheduled Broadcasts: (Routine Precedence)

(1) RADSTA Ketchikan (NMJ)
  (a) Code (CW) – 416 kHz – 0530Z and 1730Z
  (b) Voice (AM) – 2670 kHz – 0630Z and 1800Z
(2) COMMSTA Kodiak (NOJ).
  (a) Code (CW) – 2670 kHz – 0630Z and 1930Z
  (b) Voice (AM) – 2670 kHz – 0445Z and 1645Z
(3) RADSTA Adak (NOX). Code (CW) – 450 kHz – 0430Z and 2130Z
(4) RCA – Alascom Juneau (WGG 58). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).
(5) RCA – Alascom Ketchikan (WGG 56). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).

VHF: The Alyeska Pipeline Service Company operates a VHF – FM base station in Valdez, Alaska under the call sign "WAB – 952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. (Transmit/receive range of this station is limited to Port Valdez.) The official language for all communications shall be English.

Channel	Frequency	Use	At
10	156.500 MHz	Intership and Ship to Coast Guard	A – B – C
16	156.800 MHz	Distress – Safety and Calling	A – B – C
	A –	Contingency Management Centre	
	B –	Oil Contingency Warehouse	
	C –	Operational Control Centre	

VHF – FM marine radio system utilised by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF – FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF – FM transceivers.

TUGS: 2×7,000 h.p. and 1×9,000 h.p. twin-screw tugs and 2×300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or fire water at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80 MHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

BERTHING: Also see "Table" on page 2537.

Berth Priority: Berth priority and berthing order will be determined by the Terminal Marine Manager, who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs will be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely responsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berths No. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berths No. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note: (a) 1 knot=20.2 in./sec.
(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plans" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released locally.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plans"). The recommended mooring line arrangement diagrams are provided in the "Plans" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimise the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilising conventionally constructed tank vessels manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETAs, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.
b. Loran C Receiver.
c. Two Independent Radar Systems. (10 cm. and 3 cm.).
d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF – FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.
b. Radiotelegraph.
c. Portable UHF transceiver will be supplied by the terminal.
d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.
b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.
c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.
d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.
e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.
f. All ullage caps will remain closed during loading except during gauging or sampling.
g. Prince William Sound emergency towing cable package.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorised by the Terminal Marine Supervisor.
b. The tanker's main CW wireless set must be de-energized and switched off while alongside the loading berth.
c. Tank tops shall remain closed during loading operations. Petroleum vapours shall be vented through mast risers or stand pipes at an appropriate height above the main deck.
d. Ship's crew will assist with connecting and disconnecting loading arms to and from the vessel's cargo transfer manifold. Assurance that the arms are secured properly without damage shall be observed during pre-loading inspection. However, as a convenience the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection.
e. All sea valves connected to the cargo piping system shall be sealed in the closed position prior to loading oil.
f. Prior to commencement of loading operations, a joint inspection of the vessel and a pre-transfer conference will be held by the Terminal Marine Supervisor and the tanker officer in charge.
g. No repairs that would result in immobilisation of the vessel shall be carried out while alongside of the loading berths unless the Terminal Marine Supervisor specifically authorises such work.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint safety inspection:* Prior to the discharging of ballast from cargo tanks or loading of oil, a pre-transfer conference and a joint safety inspection will be conducted by the Terminal Marine Supervisor and a responsible deck officer aboard the tanker who will be in charge of bulk liquid transfers aboard the tanker.

The purpose of the pre-transfer conference and the joint safety inspection is to insure that both the terminal and the tanker are suitable and ready for safe loading and handling of oil.

The Check List is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Safety Guide which relates to the agreed procedures and safety checks prior to the commencement of cargo loading.
b. Title 46, U.S. Code of Federal Regulations, Section 35.35-30 relating to a Declaration of Inspection for Tank Vessels.
c. Title 33, U.S. Code of Federal Regulations, Section 156.150, relating to a Declaration of Inspection prior to the transfer of bulk liquid cargo from a shore facility to a large vessel.

The Check List is to be taken aboard the tanker by the Terminal Marine Supervisor and shall be used during the pre-transfer conference and the joint safety inspection of the tank vessel to insure compliance with applicable regulations and safety standards. Columns are provided on the Check List for the Terminal Marine Supervisor and the tanker person-in-charge to initial, indicating that the requirements have been met. The original of the check list shall remain aboard the tanker, and a copy shall be returned to the Terminal Marine Supervisor for subsequent delivery to the berth operator.

Terminal personnel are authorised to suspend oil transfer operations if any of the safety rules listed or on the check list are not observed, or if any other danger is believed to exist.

The Master of the tanker or his representative has the right to shut down loading operations in the event he feels shore operations are unsafe.

During the pre-transfer conference, the Terminal Marine Supervisor shall provide the responsible ship's officer with a printed sheet detailing description and location of the fire-fighting system and the other emergency systems at the terminal in general and at the berth to which the tanker is moored in particular. The Terminal Marine Supervisor sha also advise the vessel if any unusual or dangerous weather condition are forecast or expected.

As the shifts on the berth change, the relieving Terminal Marin Supervisor and berth operator shall assure themselves that all condition pertinent to their responsibilities are as previously agreed to, and sha sign the copy of the Declaration of Inspection. The relieving office aboard the tanker shall assure himself that the original conditions sti exist and shall sign the original of the Declaration of Inspection aboar the tanker. These relieving personnel will then become the person-i charge of the transfer operation for the terminal and the tanke respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of th approximate quantities of segregated clean and dirty ballast in th Master's pre-arrival message. This message should also state whe the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include thre 430,000-barrel ballast reception tanks. Discharge of dirty ballast will b by way of the four 12 in. loading arms (Chicksans) on Berth No. 1 an the four 16 in. loading arms on Berths No. 3, 4 and 5. These loadin arms connect to 20 in. lines at the berths and lead into a 42 in. lin connecting each berth to the ballast reception tanks. Although the sho lines are insulated, they are not heat traced and there are no booste pumps to assist in the discharge of dirty ballast.

No. 5 Berth is situated approx. 1.25 miles from the reception tank and has a possible head of 150 ft. Max. pressure 40 p.s.i. (approx.).

In the event of any stripping problems, it is recommended that tank containing unpumpable ballast be stripped internally to the slop tank an that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to b discharged overboard. Segregated ballast is defined as ballast wate that is introduced into a tank which is completely separated from th cargo oil and the oil fuel system and which is permanently allocated t the carriage of ballast. The deck log book must record all times of balla discharge and when pumps are started or stopped. This log must als indicate whether or not the segregated ballast is being dropped in th initial stages to sea level. A close watch must be maintained on th overside discharge, with a deck floodlight or portable explosion-proo light being trained on the discharge during hours of darkness. If ther are any indications of discolouration or sheen, discharge must b suspended and an investigation must be carried out. If there is any dou as to the quality of the segregated ballast, all discharge will be mad into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used f the carriage of oil will be classed as dirty no matter how clean the balla may appear to be. No ballast carried in cargo tanks may be discharge at sea or in port.

After the connection of the loading arms has been completed and th suitable valves between the arms and the ballast reception have bee opened, permission to commence discharge will be given to th responsible tanker officer by the berth operator who will have receive approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of th UHF radio that will be placed on board by the Supervisor. As during a transfer operations, there will be a continuous watch near the ship' manifold. In the event of an emergency on the berth, pressing of th emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must sto the ship's ballast pumps to avoid damage by pumping against a close valve system ashore. (See "Emergency Procedures"). On commencin discharge of dirty ballast and at frequent intervals during the discharg a watch will be kept on the area around the sea valves even though th sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Mari Supervisor. Any indications of any oily sheen will necessitate a shutdow of the discharge pumps and an investigation to be carried out befo any further ballast can be discharged. Thirty minutes before completi of discharge, the responsible tanker officer will inform the berth operat who will in turn advise the OCC and the duty Terminal Marine Supervis

On completion of the discharge and after pumps have been stoppe the loading arm(s) used for dirty ballast discharge must be drained ba into the slop tank. On vessels with an inert gas system, gauging will b taken by way of the deck purge pipes to determine that tanks are emp It is not intended that vessels will depressure cargo tanks for visu inspections, nor should tank lids be opened on any compartment tha not gas free.

All safety regulations applicable during the loading of oil will also ap during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a ves scheduled to take on any petroleum product or cargo, complete and si the State of Alaska Department of Environmental Conservation Ba Water Discharge Certificate Affidavit. To support this affidavit, the Mas must be prepared to produce both deck and engine room log books a a legible copy of that portion of the Oil Record Book relevant to the s passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the ter is required by the United States Department of the Interior to obtain fr the Master of the vessel a legible copy of that part of the Oil Rec Book that pertains to the voyage of the vessel to the terminal from t vessel's last oil discharge port. This legible copy shall be certified u oath by the Master as being true and correct. If the vessel is not requ to maintain an Oil Record Book or similar records, the Master of t vessel is required to provide the terminal with an affidavit, duly sw to and signed, stating any and all facts bearing upon any discharg oil or oily water from the vessel during its voyage to the terminal f its last oil discharge port.

Should the Master be unable to comply with the preceding require or if it appears from the Oil Record Book or other documentation th vessel has discharged oil or oily water during its voyage to the ter the terminal is required to promptly notify the Department of the Interior's representative, the Authorised Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope Crude Oil. The following preliminary characteristics of North Slope Crude Oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.8933 at 60°F.
API Gravity: 27.0° API.
Pour Point: + 15°F.
Viscosity: 73.5 SSU at 100°F., 169 SSU at 60°F.
Reid Vapour Pressure: 4.0-4.5 lbs.
Sulphur Content: 0.94 per cent by weight.
Waxing: 85-117°F. (begins to precipitate). 50-55°F. (bulk of wax begins to come out of solution).
Mercaptan Sulphur: approx. 14 parts per million.
Loading temperature: approx. 100°F.
Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for assisting with handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chicksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chicksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the Supervisor.

If required, the terminal will supply 10 in. – 16 in. reducers at Berth No. 1 and 12 in. – 16 in. at Berths No. 3, 4 and 5.

Check List Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The Master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Danger" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping-Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping–off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic Control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping-Off:* As the tanker begins the topping-off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby. The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coast Guard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coast Guard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:

- provide information on terminal safety regulations.
- agree on designated smoking areas
- advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
- present ship/shore Safety Check List.
- present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING
NO OPEN LIGHTS
NO SMOKING
NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit. *Vessels Alongside* – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.
(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection Check List. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.
(b) Repairs to tanker's radiotelephone or communications equipment.
(c) Repairs to radar equipment.
(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coast Guard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the following fire-fighting equipment:

(a) 2 fixed foam monitors.
(b) 2 fixed firewater monitors.
(c) 5 fire hydrants.
(d) 3 hose reels.
(e) 1 shore to ship firewater connection including 75 ft. of 2.5 in. hose.

Each berth also has the capability to be interconnected with the tugs or with fire trucks to provide increased fire-fighting capacity. The foam system is designed for coverage of fire on the berths only and is not normally interconnected for use by shipboard firefighters in the event of a fire.

Note: Regardless of any assistance the terminal may render, vessels at the berth are expected to put their own emergency procedures into effect whenever required.

Man Overboard: In the event of a man overboard from a tanker moored at the berth, rescue efforts will be implemented immediately, and the Berth Operator shall be advised by UHF radio. The Terminal Marine Supervisor shall also be notified by the Berth Operator. The standby tug and mooring boat shall be advised by the Berth Operator and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also on the berthing and mooring dolphins. In case of a man overboard, the medical authorities will also be alerted by the Berth Operator.

Oil Spills: The notification requirements for an oil spill are delineated by Federal Law. The Federal Water Pollution Control Act (FWPCA) requires persons in charge of vessels (among others) to notify the appropriate federal agency whenever an oil spill enters navigable waters or the adjoining shoreline. The appropriate agency designated to receive these reports is the U.S. Coast Guard which can be contacted on Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the berth operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be notified.

The terminal will provide any available containment and cleanup assistance for any oil spill at the terminal. The terminal will activate its oil spill response procedures upon notification of an oil spill and shall utilise all available personnel, equipment, and resources to limit and minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publications are recommended for study when planning a voyage to Valdez, Alaska and the Terminal:

(a) National Ocean Survey Charts:

Chart Number		*Title*
Old System	*New System*	
8500	531	Gulf of Alaska – Strait of Juan de Fuca to Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entrance
8519	16708	Prince William Sound – Port Fidalgo & Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska
(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort Sea (1964) with current supplement.
(d) Tides Tables, West Coast, North and South America (current year).
(e) Tidal Current Tables, Pacific Coast of North America and As (current year).
(f) United States Coast Guard Light List, Vol. III, Pacific Coast an Pacific Islands (current year).
(g) Weekly Notice to Mariners published by Defense Mapping Agenc Hydrographic Center (DMAHC).
(h) Local Notice to Mariners issued by Commander, Seventeen Coast Guard District, Juneau, Alaska.
(i) Radio Navigational Aids, Pacific and Indian Oceans (Publicatio No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez tend t constrain the flow of air to either an Easterly or Westerly direction. A Valdez Narrows, the predominant directions are Northerly and Souther

Jackson Point experiences stronger winds than Valdez Airpor however, light winds (less than 13 m.p.h.) occur about 85 per cent o the time. The prevailing wind directions are S.W. from May throug September and N.E. from October through April. The N.E. Winter wind reach gale force but usually do not prevail for long periods. The site i well protected from Southwesterly winds but is fully exposed to th Northeasterlies and to winds coming off Mineral Creek, directly North o the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from an direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operation during Winter seasons. As indicated, combinations of low temperature and high winds combine to provide extremely low equivalen temperatures. Outdoor operations under these conditions should b closely supervised to insure that personnel and crewmen do not suffe from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with th majority falling during the months July through November. Valdez ha an average annual precipitation of 62.37 in. with a mean total of 244.5 i of snow per year. Greatest snowfall in a 24-hour period was 43 in. i February 1928. Precipitation of an amount in excess of 0.01 in. occur an average of 170 days per year. Estimate 1 in. rain = 12-15 in. sno

Temperature: The mean monthly annual temperature is 35.7°F. wi recorded extremes of +87°F. (June 1953) and −28°F. (February 1947 The month of January is the coldest with a mean daily minimum of 11°F and a mean daily maximum of 26°F. The month of July is the warmes with a mean daily minimum and maximum of 45.2°F. and 60.1°F. respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibil during Winter months. At the Valdez Airport, visibilities of 1 mile or les occur 3.7 per cent of the time, annually. Visibilities greater than 5 mile occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mea range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected fro the open sea and the wave action within the port is limited to win generated waves which are constrained by the fetch available. Th maximum calculated wave height is 9.4 ft. from the East with a perio of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W quarter. An important exception to this is a Tsunami or seismical generated wave which can be far in excess of the heights quoted abov Investigations in 1968 showed mean wave heights 3 ft. to 6 ft. in Winte (independent occurence 0.7 per cent of time) and 2 ft. to 3 ft. in Summe (0.1 per cent of time). Berths at the terminal are designed to withstan waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerne Light ice forms along the banks and in the small boat harbour at Valde but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wi conditions in Port Valdez often oscillate with the tide, moving genera in and out of the port with maximum speeds of 0.5 knot. The Easte (flooding) surface current during a falling tide may or may not pers throughout the year. Although Volume 9 of the U.S. Coast Pilot f Alaskan waters describes the current in Port Valdez as "too weak a variable to be predicted", measurements of surface current spee typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weath conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, a Valdez Narrows in order that accurate information may be passed t outbound tankers.

VISITORS: Access to the terminal is limited to terminal person authorised governmental personnel and authorised visitors with va reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to ma arrangements through the Administrative Office in advance of their arr at the Terminal. Authorised visitors shall be met at the main gate, wh provides the only land access to the Terminal and is located at the E end of the Terminal site, and shall be escorted through the Term area. All persons passing through the main gate shall sign in and with the guard. Any visitor who arrives at the main gate outside nor working hours of the Administrative Office and who has not made p arrangements shall be turned away and requested to contact t Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to mee tanker crewman to wait at the gate until the vessel is called arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to doc the terminal site without the approval of the Terminal Marine Superv Only taxicabs with valid passes will be permitted to enter the Ter site, and any private or commercial vehicles that are permitted in t terminal area will be subject to inspection on entering and depart

SHORE LEAVE: If tanker personnel return to the Valdez Ma Terminal site in such a condition that they might require assistan insure their safe return to the ship, they shall remain at the main g until the guard grants them admittance. Should an escort be requ it will be provided by vessel personnel.

All tanker personnel transiting the Terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the Terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +9(ZD 9). Local time is modified from the first Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +8 (ZD 8) for Alaska Daylight Saving Time. This time is 1 hour behind that in Seattle and California and 4 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be quoted in Alaska Local Time.

FRESH WATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.

POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.

TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.

AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

AUTHORITY: Alyeska Pipeline Service Company, Valdez Marine Terminal, P.O.Box 300, Valdez, Alaska 99686. *Tel:* (907) 835-6620. *Telex:* 0023-62880291. *FAX:* (907) 835-6078. *Contact:* Captain T.F. Plummer, Marine Operations Manager/Port Captain.

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berths No. 3, 4 and 5 are fixed structures.

	Berth No. 1 See Note 1	*Berth No. 3* See Notes 1 and 2	*Berth No. 4* See Notes 1 and 2	*Berth No. 5* See Notes 1 and 2
Vessel Size (Design) d.w.t.	16,000 – 125,000	16,000 – 250,000	16,000 – 265,000	16,000 – 265,000
Type of Berth	Floating dock	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck Level of Berth above MLLW	32 ft. 8 in.	36 ft. 7 in.	36 ft. 7 in.	36 ft. 7 in.
Depth Alongside at MLLW (ft.)	125	85	85	80
Loading Arms (Number × Size)	4 × 12 in.	4 × 16 in.	4 × 16 in.	4 × 16 in.
Max. Rate Per Loading Arm (bbls.p.h.)	20,000	27,500	27,500	27,500
Max. Design Flow Rate (per berth) (bbls.p.h.)	80,000	110,000	110,000	110,000
Loading Arm Spacing on Operating Dock (ft.)	11	11	11	11
Maximum Ship Manifold Pressure	Pressure alarm points will be set, based upon information given by ship's officers.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Emergency Shutdown	Can be initiated by berth operator or by OCC shut-down complete within 6.5 seconds after initiation.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Access to Ship	42 ft. aluminium gangway	49 ft. 6 in. aluminium gangway	Telescopic Gantry	Telescopic Gantry

2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery and mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorised.

VANCOUVER, Washington: 45.36 N. 122.40 W.

(See Plan)

DOCUMENTS: 3 copies of each of the following:
Cargo Manifest.
Stores List.
Crew Cargo List.
Crew List.
One copy of following:
Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: See "General-Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River Pilots. Anchorage in Vancouver harbour by permission of Harbour Master.

RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KBLITT Seattle, Wash.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Normally join vessel at designated berth. Tug lines used at no charge.

BULK HANDLING FACILITIES: The grain terminal, owned by the Port and operated by the United Grain Corporation, has about 1,000 ft. (305 m.) of dock available. The 7 vessel spouts load 1 vessel at a time at a combined loading rate of 40,000 bushels per hour. The grain terminal can off-load at 18,000 bushels per hour, and they have a storage capacity for 5,000,000 bushels.

Dry bulk facility with 50,000 ton capacity covered storage. Bottom dump pit and top unload for gondola railcars. Mineral concentrations such as copper concentrate, quartz silica and zinc concentrate. Covered conveyor to special dry bulk dock.

EQUIPMENT: The Port of Vancouver has 3 Whirley cranes, 1 of which is rated at 65 short tons at 60 ft. (18 m.) and 15 short tons at 130 ft. (40 m.) the other 2 Whirley cranes have a capacity of 34 short tons at 60 ft. (18 m.) and 10 short tons at 130 ft. (40 m.). These 3 travelling gantry or Whirley cranes operate on parallel tracks on the face of the dock in conjunction with the double direct transfer tracks.

Bulk materials make up a sizeable portion of the Port's traffic, and consequently, large crane buckets are available for handling these cargoes. In addition, the Port has a special crane bucket for the successful handling of zirconium – a very fine sand material considered a "problem" commodity for efficient and waste-free handling.

The Port maintains a full complement of support equipment. They have 42 lift trucks with 2 – 3.5 ton capacities, 9 lift trucks with 7.5 – 15 ton capacities, 1 lift truck with a 26 ton capacity, along with various straddle-carriers, conveyors, front-end loaders, jitneys – and a range of special attachments and gear for all their equipment (such as prong-lifts for steel coils, grabs and squeezers for paper rolls, push-pull slip sheets for bag goods, cartons and boxes) to handle any special situations or problem with which they might be confronted.

BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

13 berths. Total length 9,206 ft., depth 40 ft. Ro/Ro facilities available with depth 15 ft.

Terminal/Berth No.	*Length* (ft.)	*Depth at MLW* (ft.)	*Cranes* (No.)	(tons)	
Terminal 2:

Berth No. 7	800	40			Dry bulk
Terminal 3:					
Berths No. 8 & 9	1,250	40	1	80	
Terminal 4:					
Berth No. 10	1,040	40			Floating auto dock
Berths No. 13 & 14	1,360 + dolphins	40			
Grain Elevator	715 + dolphins 965 (barge)	40			

STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.

Marine Terminal Corporation manages Berths No. 8 and 9.

MEDICAL: Any type of medical treatment can be provided and hospital facilities available.

TANKERS: 1 berth. 3 × 6 in. pipelines to 33 tanks. Storage capacity 682,800 bbls.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

CONSULS:

Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Germany
Great Britain
Iceland
Italy
Japan
Lebanon
Mexico
Netherlands
Norway
Panama
Peru
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: See "Portland, Oregon".

GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship is at dock, opening and closing hatches is work of longshoremen. Ship may open or close own hatches while under way.

CERTIFICATES: Registered tonnage certificate.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantity. Wine and/or Spirit, reasonable quantity.

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

REPATRIATION: Any arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles from town, served by 7 regularly scheduled airlines with direct service and/or connections domestically and worldwide.

TIME: GMT minus 8 hours. Daylight saving time becomes effective annually on first Sunday in April through last Saturday in October.

HOLIDAYS: Following holidays are recognised: *New Year's Day; Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); *Independence Day (July 4th); *Labour Day (1st Monday in September); Columbus Day (Oct. 12th); Veteran's Day (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statewide Election Days. Other legal holidays may be proclaimed by State or national authority. When holiday falls on Sunday, following Monday observed as holiday. Longshore work performed on any of above-listed days is at overtime, which is one-and-a-half time rate. Days marked(*) are stop-work days, viz., no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police Tel: 693-2555; Fire Tel: 693-1441; Ambulance provided by several private firms, but can be obtained through police or fire number.

SERVICES: All services available such as compass adjusting, major minor repairs either with work barges or at ship repair berths; lay bert available; charts available from private companies; all chandlery supplie available.

SHORE LEAVE: Crew members permitted ashore except where vess has made first arrival from Communist-controlled port.

IDENTIFICATION CARDS: Immigration Dept. requires Forms No. 5 and No. 31 (Repatriation). Changes can be effected at any U. Consulate and are honoured here.

GARBAGE/WASTE OIL DISPOSAL: See "Agriculture" before fi U.S.A. port (Albany).

Vessels requiring discharge of oily waste or garbage at the Port Vancouver shall inquire of the Port's Operations Department for th names of oily waste or garbage contractors. The vessel shall arrang directly with such oily waste or garbage hauler(s) for such services an equipment. Payment of charges for these services and equipme provided by such oily waste or garbage hauler shall be made directly t the oily waste or garbage hauler by the vessel, it's agent, owne charterer, or any other party responsible for such payment of charge by the vessel.

The oily waste or garbage haulers are independent contractors an are not agents or employees of the Port of Vancouver, and as such th Port of Vancouver shall not be liable for any act, omission, or negligenc of any such oily waste or garbage hauler. Rates and charges assesse against vessels by the Port of Vancouver for use of its facilities o services do not include this service or insurance coverage for an potential liability of any oily waste or garbage hauler permitted by th Port of Vancouver. The discharge by a vessel of oily waste or garbag at the Port of Vancouver shall be allowed only in accordance with th terms of this item and applicable Federal, State and Local regulation

List of Haulers for Marpol V Compliance:

WHITTIER, Alaska: 60.47 N. 148.40 W.

SHIPMASTER'S REPORT: October 1980. (Updated 1988)

GENERAL: Whittier is a small port in position Lat. 60° 47 Long. 148° 40' W. The population in October 1984 was 250. There 2 hotels, 3 grocery stores, a school and a post office. The port constructed between 1941 to 1943. It was developed as a main su depot for the storage of oil for the Anchorage area and also a transhipment port for produce from other areas in the United St There is regular barge traffic from Seattle and other West coast p with ammunition, food, merchandise and motor cars. All these are ca aboard flat top railway wagons which can be loaded or discharg any state of the tide. The port is operated by the Alaska Railroad sy and there is no shore gear of any kind. Whittier is surrounded by high mountains and there is no road or footpath in or out. There

very short landing strip suitable for small aircraft but the normal communication is by rail which goes under the mountains in two long tunnels. The journey takes about 1.5 hours and the timetable is frequent in the Summer when a lot of people visit Whittier for boating and fishing or to get the ferry to Valdez. During Winter however the service is about four times a week, weather permitting.
APPROACHES: *Recommended Route to Whittier Pilot:* British Charts BA. 3363 and 3364.

When Smith Island bears 256°×8 miles, vessels should leave the traffic zone and steer 277° passing 1.5 miles South of Naked Island and 1.2 miles North of Point Eleanor. Then alter course to 281° passing 1 mile South of Mears Point. After passing Mears Point, steer 350° through Ferry Passage and alter to 280° off Point Culrose Light to the Pilot Station. It is not locally recommended to pass North of Perry Island through the Dutch Group.
PILOTAGE: Pilotage is operated by the Southwest Alaska Pilots' Association who have an office in Valdez, telephone number (907) 835 – 2134. They also have an office in Homer, telephone (907) 235 – 8783. Both stations maintain a continuous watch on Channels 10 and 16.

In theory, Pilots embark at Hinchinbrook Entrance. This has not been the practice however, for the last year or so, due to the long sea passage for the small pilot boat and the severe weather sometimes encountered in this area. Pilots normally embark at Blight Reef near Glacier Island. The pilot boat is stationed at Rocky Point some 10 miles away. The normal pilot boat is "Bering" which is a 63 ft. long trawler, capable of 10 knots, with a blue hull and white house. A newer boat is also in attendance. This is a 43 ft. glass fibre boat called "Bernhof" capable of 20 knots. She has a white hull.

No vessel may enter Prince William Sound through the Hinchinbrook Entrance without permission from the Coast Guard at the Valdez Traffic Control Centre on Channel 13 or 16. Large vessels may only transit Prince William Sound in daylight hours.

If permission is obtained, vessels may proceed direct to the Pilot Station at Whittier, 1 mile South of Point Pigot. See "Approaches".
ANCHORAGE: Anchorage off Whittier may be obtained in 12 fathoms at Pigot Bay (Lat. 60° 50.4' N., Long. 148° 22.0' E.).
BERTHS/FACILITIES: The 2 railway berths are only for barges carrying flat top railway cars on which all cargo is carried. The Delong Pier is used for oil tankers. The length of the wharf is 140 m. and the maximum length of ship is about 170 m. The minimum depth alongside is 48 ft. at the West end and 80 ft. at the East end.

Tankers normally berth port side alongside. In October 1980 there was one tug "Avenger" in attendance being 2,000 h.p. A shore gangway is supplied. All manifold connections are 6 in. The ship must supply all reducers. 2 lines are used for kerosene. Jet fuel, Mogas and diesel are imported. The distance to the shore tanks is 1.5 miles. All products are pumped from the storage area to Anchorage. Bunkers are not available for large ships. Provisions and supplies can be purchased in Anchorage and shipped down by rail. There is a small clinic with a physician's assistant. The nearest doctor or dentist is in Anchorage. In an emergency there is an ambulance which can run on the road or rails.
GENERAL:
Weather: The winds are very strong and variable. It is very wet in Summer and has an extremely high snowfall in the Winter months. The port is completely ice free the whole year round.
Formalities: All the usual American forms apply. Customs, Immigration and Coast Guard all come from Anchorage as there are no officials at Whittier.
Joining/Leaving: Crew may sign on and off at all times. During Winter Whittier is often cut off by snow.
Accommodation: Pilot and Agent stayed aboard throughout our 36 hour stay which proved very convenient for clearance and paperwork.
Agent: North Star Terminal & Stevedoring Company, Anchorage, Alaska 95510. Cable: "Norstevco Anchorage". Telex: 26471.
AUTHORITY: Whittier Harbour Commission, P.O.Box 608, Whittier, Alaska 99693. *Tel:* (907) 472-2201. *FAX:* (907) 472-2404. *Contact:* Port Director/Harbour Master.

WILMINGTON, Delaware: 39.45 N. 75.30 W. (See Plan)

DOCUMENTS: Handled through local Agents.
PILOTAGE: Compulsory.

Delaware Bay and River Pilots Association. Tel: 1-215-922-7164.
Christina River Pilots. Tel: 1-302-652-1666.
Also see "Philadelphia".
ANCHORAGE: At Cherry Island.
RESTRICTIONS: The Delaware River has a channel depth of 12.0 m. to Fairless. Christina River, on which the Port of Wilmington is located, has a channel depth of 11.5 m.
MAX. SIZE: Length unlimited, breadth unlimited, draft 38 ft. MLW tide range 5.5 ft.
Chesapeake/Delaware Canal: Max. LOA 760 ft. Max. draft 35 ft. (FW) (Max. draft 27 ft. in report dated January 1990). Height of mast 133 ft. Max. beam 170 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: U.S. Coast Guard, Gloucester, N.J.
TUGS: Towage available from Wilmington Tug and Launch Co. Tel: (302) 652-1666.
VHF: Channels 16 and 14.
BERTHING: 4,600 ft. marginal wharf (8 berths) with depth 38 ft. 20 – 100 ton crane capacity. 400 – 600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 1,050,000 cu.ft. at present.

Two multi-purpose bulk/container cranes available, capacity 40 tons, outreach 115 ft.

Roll-on/Roll-off cargoes handled.
MEDICAL: Hospital and medical facilities available in the city of Wilmington (7 km.).
TANKERS: One berth of 1,000 ft. length with depth 35 ft.
DENSITY: Fresh water port. Normal 12 hour tides.
FRESH WATER: Hose connection from dock.
FUEL: All grades available from B.P. or Chevron.
CONSULS: All Consuls are located in Philadelphia, Pa.
REPAIRS: Possible.
DRY DOCKS: Major repairs and dry dock facilities – Penn Ship Yard, Chester, Pa. Tel: (215) 499-2000.
GANGWAY/DECK WATCHMEN: Required.
OPENING/CLOSING HATCHES: Optional.
REPATRIATION: Facilities are available and arranged by Agent.
AIRPORT: Philadelphia International Airport (20 km.), Wilmington Airport (8 km.), regular service.
TIME: U.S. Eastern Standard (GMT minus 5 hours) and Daylight Time, from first Sunday in April till last Sunday in October.
POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, Tel: 302-654-5151.
TELEPHONES: Dock-side pay phones.
SERVICES: All services available.
SHORE LEAVE: Allowed unless restricted by Immigration.
IDENTIFICATION CARDS: See "New York".
DEVELOPMENTS: Additional land has been acquired and one new berth along the marginal wharf has been completed.
AUTHORITY: Port of Wilmington, Delaware, Diamond State Port Corporation, P.O.Box 1191, Wilmington, Delaware 19899. *Tel:* (302) 571-4600. *Telex:* TWX 510-666-2181. *FAX:* (302) 571-4646. *Contact:* R. McBride, Executive Director. John B. O'Donnell, Director of Trade Development. John H. Doherty, Director of Planning.

WILMINGTON, North Carolina: 34.14 N. 77.57 W. (See Plan)

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.
DOCUMENTS:

3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (Curio List) (Customs Form 1304).
3 copies Stores List (Customs Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form. I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
Oil Pollution Certificate.
General Declaration (Customs Form 1301).
Load Line Certificate.
Safety Equipment Certificate.

APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hatteras and 26 miles North of Cape Fear.
PILOTAGE: Pilots board vessels at Buoy "2CF" off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA at Buoy "2CF" in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking Masters normally board vessels for purposes of docking.
ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy "2CF". There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.
RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.
MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 3 towing companies operate at Wilmington.
BERTHING: A continuous marginal wharf, 6,768 ft. long. Docking at any hour, day and night.

SPECIALISED CARGO HANDLING FACILITIES: State Port Terminal: Fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 1×45 ton gantry crane, 1×115 ton gantry crane, 3×40 ton and 2×50 ton container cranes and 1×225 ton gantry crane; 1 berth with tank farm for handling liquid chemicals (See "Shipmaster's Report"). 129×480 volt electrical outlets for refrigerated containers (70 additional outlets planned).

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25 ton cranes and 1×85 ton derrick. No facilities for LPG carriers.
TANKERS: 10 tanker berths with drafts from 30 ft. to 40 ft. MLW. Night berthing at all berths. Fresh water available.
FRESH WATER: Available from shore connections at rates up to 50 t.p.h.
FUEL: Bunker "C" and diesel fuels available locally.
FIRE PRECAUTIONS: Normal precautions observed.
REPAIRS: Minor ship repairs available.
DRY DOCKS: 1×1,000 ton lift floating dry dock.
AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by U.S. Air and American Eagle.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time from first Sunday in April till last Sunday in October.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

The Port of Wilmington is a USDA-approved handler of international garbage, whereby drums are provided to the vessel for collection of garbage and subsequent incineration.
WASTE OIL DISPOSAL: The Port of Wilmington has a MARPOL-approved contractor on retainer available to handle this service for the account of the vessel. Direct contact should be made to High Rise Services. Tel: (919) 371-2325.
SEAMAN'S CLUBS: International Seamen's Service, P.O.Box 486, Wilmington, N.C. 28402. Tel: (919) 762-3792. Facilities include chapel and chaplain, bibles, telephone service, books, table tennis, bicycles and free refreshments.

SHIPMASTER'S REPORT: August 1996.
Berth: Chemeserv.
Charts: B.A. 3688 and NOAA 11537.
Approach Channel: The berth is 29 miles from Cape Fear Sea Buoy on East Bank of Cape Fear River, 1 mile below head of Ocean Navigation. We passed through 3 bridges and passed Wilmington City Front. Transit time about 3 hours, depending on tide.

B.A. Chart 3688 terminates 1 mile below berth. NOAA Chart 11537 shows berth, and terminates at the Grace Berth (the Head of Ocean Navigation, 1 mile above Chemeserv).

Present maximum channel draft 31 ft. (FW) MLW. State funds for deepening to 40 ft. have been sanctioned.

Maximum ship length 690 ft., breadth 85 ft.

Turning Basin of maximum ship length 584 ft., about 1 mile North of Chemeserv.

Ships over Turning Basin length (584 ft.) have to be backed in or out through 2 bridges and turned just above 'North Carolina' Battleship monument.

Vessels up to 400 ft. LOA can turn off Chemeserv Berth.
Pilot/Tugs/Anchorage: Basically same as Southport (See "Southport").

Maximum size vessels require 3 tugs for backing into or out of berth.
Berth: About 2 miles above City front.

A typical U.S. tanker 'T' jetty of wooden pile construction, set about 100 ft. offshore.

The berth has mooring dolphins each side of jetty, plus on the upstream side a mooring buoy, on downstream side is a shore mooring post.

Vessels can berth either side to, but starboard side to preferred by Pilots.

Docking is fairly critical for time scale. Docking on falling tide, undock on rising tide.

Dock reported to have same depth as channel (31 ft. (FW) MLW).

River water absolutely filthy, wherever next deballasting, ballast water should be changed twice, even then it is still off colour.

Moorings (if starboard side to) 2 head lines to buoy, 2 springs fore and aft to dolphins and 2 stern lines to shore post (see "Plan").
Density: 995 (LW) to 997 (HW).
Cargo: The Terminal handles sulphuric acid, caustic soda, asphalt, molasses and methanol, plus its derivatives.

6 in. rubber hoses connected onto 8 in. lines to tank farm.

Shore hydraulic crane, hoses slung from gantry.

Pumping rates generally the maximum the ship can pump.

SGS Surveyor available.

Loading Foreman in cabin on jetty, has telephone which can be used to telephone Agent.

Tank farm adjacent to jetty, generally low back pressure.

As with all U.S. liquid installations, 100 p.s.i. is maximum pressure.
Facilities: Bunkers by barge alongside allowed whilst working cargo.

Public payphone at Terminal Office, about 2 minutes from jetty.

Fresh water available, by meter, ship's hoses used.

Stores to end of jetty, about 100 ft. from ship. Terminal has 2 hand trucks.

Shore gangway (bridle type) available from 'T' jetty. We were unable to land normal accommodation ladder.

Terminal personnel helpful.

Nearest shopping mall by taxi (U.S.$6.0). Loading Foreman will arrange taxi.
AUTHORITY: North Carolina State Port Authority, 2202 Burnett Boulevard, P.O.Box 9002, Wilmington, North Carolina 28402. *Tel:* (910) 763-1621. *FAX:* (910) 763-6440, 343-1042. *Contact:* Erik Stromberg, Executive Director.

WRANGELL, Alaska: 56.28 N. 132.22 W. (See Plan

Located on Wrangell Island. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guar Island.) Under pilotage from Guard Island.
ANCHORAGE: Good anchorage N.E. of Woronofski Island i 22 fathoms of water.
MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 f diurnal range 16.1 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany).
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Immigration, Guard Island or local Customs Offic Quarantine and Customs, local.
TUGS: 9 tugs up to 1,800 h.p. available with sufficient notice.
BERTHING: 4 wharves.

1. Wrangell Lumber Co. Dock: Berthing length 320 ft., 150 ft. wide depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tid 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acre open storage.
2. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed spac
3. Port of Wrangell Wharf: 35 ft. depth at both ends. Fresh wat available. Lift trucks on rental from local private firms. Dock face 400 f with additional mooring dolphins for a total overall length of 700 ft.
4. Barge: Transfer bridge facilities, 17 ft. wide, capable of up t 70 tons (140,000 lbs.).

STEVEDORES: 4 gangs available.
MEDICAL: Small but new hospital.
WATER: Available.
FUEL: Small quantities available.
REPAIRS: None.
TRANSPORTATION: Air and ferry.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. por (Albany).

Service available. Contact Public Works Office for collection. Tel: (907 874-3904, or the Port Office, Tel: (907) 814-3736.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: Usual local facilities.
AUTHORITY: City of Wrangell, P.O.Box 531, Wrangell, Alaska 9992 *Tel:* (907) 874-3736 or 874-2381. *FAX:* (907) 874-3952. *Contact:* Dav Mork, Harbour Master.

YORKTOWN, Virginia: 37.14 N. 76.30 W. (See Pla

OPERATOR'S REPORT:

GENERAL: The Amoco Oil Terminal at Yorktown, Virginia is locat about 3 miles below the York River bridge on the South side of the riv approximately 38 miles from the Chesapeake Bay Sea Buoy "CB". Co ordinates of the terminal are Lat. 37° 13' 37" N., Long. 75° 26' 23" A 3,000 ft. finger pier ending with a marginal pier, reaches the deepwat channel in the river. Tankers supply the refinery with crude an intermediate feedstocks which are refined into gasolines, fuel o liquefied petroleum gas, coke, and liquid sulphur which is distributed b barges and tankers.
APPROACHES: *Cautionary Advice:* RDF stations at Chesapeake Lig and Cape Henry provide coverage for position fixing and numero buoys mark the fairways, channels and obstructions. While proceedi to the Pilot Station one should be aware of the heavy traffic in this ar and the ship should stay within the prescribed traffic lane. Care consideration should be given to the current, which has a velocity of to 3.0 knots and higher and which tends to set a vessel out of the chann
PILOTAGE: Pilots board 1.5 miles N.E. of Cape Henry Light. Vess should use traffic lanes as outlined on Chart No. 12221 wh approaching the pilot area.

U.S. flag should call the Chesapeake Federal pilot boat approxima 1 hour before arrival to arrange Pilot embarkation. Non-U.S. flag vess should call the Virginia State pilot boat 1 hour before arrival.
ANCHORAGES: *Anchorage and Lightering:* Vessels requiring lighter proceed to Hampton Roads where all lightering operations a conducted. This channel is well marked and presents no difficulties. Up completion of lightering, the vessel must return to Cape Henry bef proceeding to the berth. The bottom of Hampton Roads consists of s mud and provides good holding ground.
RADIO: ETA messages should be sent to Agent 72, 48 and 24 ho before arrival. Any change in ETA should also be transmitted, as t pilot vessel is not continually on station. Advise draft (brackish wat first message.
VHF:

Pilots	Channels 6, 11, 13, 16, 1
Tugs	Channels 9, 10, 12, 13, 1
U.S.C.G.	Channel 16
Marine Operators – Norfolk	Channels 16, 22, 27

BERTHING: The Docking Master boards the vessel from a tug 1 – 2 miles East of the Amoco Dock. 2 tugs are generally used for docking; vessels over 28,000 d.w.t. may require 3 tugs at the Docking Master's discretion. The vessel makes a normal marginal approach to Dock No. 1 with the tugs breasting the vessel alongside and holding it there until secured. Vessels generally dock port side to at Berth No. 1. Berth No. 2 is of new construction and is located 1,122 ft. to the West of Berth No. 1. When docking at Berth No. 2, vessels approach Dock No. 1 on a Southwesterly heading to initially avoid a shoal area located N.N.W. of Berth No. 2. When the vessel is within 550 ft. of Berth No. 2, the approach is made parallel to the dock face until the vessel is off the dock when it is breasted into position port side to by the tugs. Extra caution must be exercised when approaching Dock No. 2 when there is a ship at Dock No. 1. At Dock No. 2, difficulties will be experienced in placing vessel's gangway due to the extremely limited dock space amidships.

No. 2 Tanker Dock is equipped with 2×12 in. Chicksan arms for crude or No. 6 Oil discharge. Weather conditions are carefully monitored by terminal personnel, and vessels are shut down when conditions warrant such action.

FRESH WATER: Available.

FUEL: No fuel available at No. 2 Tanker Dock.

GARBAGE DISPOSAL: A dumpster is provided at the end of the dock.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

OPERATOR: Amoco Oil Company, Yorktown Refinery, P.O.Box 578, Yorktown, Virginia 23690-0578. *Tel:* (804) 898-9700. *FAX:* (804) 898-9636.

NOTES

Please also advise Shipping Guides Ltd.

Uruguay

GENERAL:

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements, maximum fine being 760 U.R.) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias", may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Master of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel.

The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Masters must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Master's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, Article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 m. of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the International Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters "QL").

Flag "Q" must be hoisted and maintained in position until Health Authority has given Free Pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the Roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:

Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Colregs.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 m. from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible outside the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Masters must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Masters, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Masters and owners of vessels must see that their vessels do n obstruct or cause harm to port works, beacons, buoys, or semaphor and once tied up they must not slacken ropes without permission of th Marine Authority except under conditions covered by items 1, 2 and of Article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence lists due to bad trimming of cargo.

Only those lines necessary for tying up to be used. When 2 or mo vessels tie up alongside to load or discharge they are all obligated t ensure that the handling of their respective cargoes does not prejudic the working of the others.

Vessels must take proper precautions when loading or dischargin raw material, i.e. sand, bones, ash, coal, etc., by placing suitable plan of wood close together to prevent any such material falling into the wate

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the qua This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the qua as to leave adequate passage for vehicular traffic, i.e. Police, Fi Brigade, Health Authorities, Customs and Port Officials.

Planks of wood — when planks are used for any operation, they mu not be placed in contact with mooring bitts or cables. When work cease all pieces of wood, ladders, small trucks, etc, must be removed fro quay, and those belonging to the ship must be taken on board, this s as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, wate or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbis sewage or other material susceptible to polluting the water.

Very serious offences are the lightening of ships carrying petrol, crud oil, or the like, likewise the washing-out of tanks, except in authorise zones. The fine is based on the area spoiled by the wrongful discharg

All ships should have local Agents, otherwise in the case of offence the Master is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to qua installations by the cargo they load or discharge, and must always lea berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not han over the side of the vessel in port, except during operations of launchin and reshipping on board, where such operations are conducted at point indicated by the Marine Authority. Such small craft may only be use for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels an heavy fines are imposable for the carriage of passengers or cre members not listed.

Vessels exceeding their navigation limits shown in their Certificate o Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on letters of minimum of 15 centimetres height and 8 centimetres wid Letters must be white on black or black on light colour.

Masters, Owners and Agents must report any crew offence o irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag.

N.B. It is recommended that Masters correctly establish the prescribe times for raising and lowering the Uruguayan flag, in order to avoid fine

Vessels must have their gangway equipped with handrails, and th gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods a being worked, the vessel must hoist the International Code Signal lett "B", and at night show a red light on the bow masthead, must alwa have engines in a state of readiness in case of danger, keep two-thir of the crew on board, keep watchmen and firemen available (the numb of whom will be determined by the number of holds containing th hazardous material), must only work with incandescent lights, and kee a Port Pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellers, except under th direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be n improper use of the International Code Signal. Signal flags must not b interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast d to a bereavement on board, the Marine Authority's permission must b first obtained.

The use of whistles, sirens or any other audible signal within the a of the roads, bay, ante-port or docks, for any reason other than justif for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or qua must show a white light from sunset to sunrise which can be seen a distance of 500 m.

In the access channel to Montevideo, no more than 4 vessels m navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There m be no anchoring in the Free Zone, reserved for the manoeuvrin vessels entering and leaving.

At Montevideo there must be no anchoring along the route lea from the Free Zone to Channel "A", between the quay and the pi the same letter. Also on the route leading from Pier "A" along a lin 100 m. to the North of the end of the West Jetty.

No anchoring in any area less than 200 m. from Pier "A" in a s circular coverage, taking as middle point a position half way betw Quay "A" and Pier "A".

All vessels must keep to the right or to the middle when there ar other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between Jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between Jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 m.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between Jetties "A" and "B"; the semaphore signals transmitted by Quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards Jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of Jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving Jetty "A" has priority, coming from Docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 m. from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan Pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:

Consular Documents: The Consulate in a foreign port from which merchandise is to be shipped to a Uruguayan port must be presented with the following documents:

(a) Cargo Manifest, original and 3 copies.
(b) Crew List, original and 1 copy.
(c) Passenger List (or no-passenger declaration), original and 1 copy.
(d) Bills of Lading, original and 3 copies.
(e) Commercial Invoice, original and 3 copies.
(f) In the event that the vessel is cleared in-ballast, an in-ballast declaration, original and 1 copy.

One copy of each document is filed at the Consulate, and the following are returned, duly visaed:

1 original Manifest, 1 copy of each Bill of Lading, and 1 copy of the Commercial Invoice, in an envelope addressed to the Customs Administrator of the port of destination.

1 copy of the Manifest, and 1 copy of the Bills of Lading, in an envelope addressed to the National Ports Administration.

1 copy of the Manifest, the original and 2 copies of the Bills of Lading, the original Commercial Invoice, the original Crew List, and the original Passenger List (or no-passenger declaration).

Prior to Arrival:

Notification of Arrival – by Ships' Agents.

(a) Container vessels (minimum load 30 FCL and minimum discharge 30 FCL stipulated) and passenger vessels have berthing priority. Agents must notify the arrival of the vessel 10 days in advance to the National Port Administration (ANP) and confirm ETA 2 days ahead of arrival.
(b) For arrival in Uruguayan ports of all other vessels, agents must notify the ANP 48 hours in advance.

All notifications must be made on special forms from the ANP on request for a berth, presenting original and 6 copies, accompanied by a complete set of cargo manifests in Spanish.

For container vessels, Agents must present lists with details of a complete nature covering the containers to be unloaded in Montevideo (prefix, number, contents, gross weight and tare), whether to be discharged to store or to quay, and final destination in the case of transit.

Request for Port Services:

As has been said in the previous section, the berthing request must be presented to the ANP and acts as advice of arrival.

Each morning at 1000 hrs. the ANP designates berthing crews for vessels for the next 24 hours. In the event of there being no berthing staff available, the ANP appoints a place for waiting berthing in turn in accordance with the order of arrival at the port of Montevideo.

On Arrival:

Type of Document	*Number and distribution of documents*						
Basic forms	*Prefectura*	*Customs*	*Im'gration*	*Police*	*Health*	*Agency*	*Total*

(a) Visaed by the Uruguayan Consulate.
(b) For the Postal Service.
(c) The Consulate returns 1 envelope to the Customs Administrator, another to the National Ports Administration (with a copy of Manifests and Bills of Lading), and a third to the agency, with the required visaed documents.

Other Requirements:

The agency must provide a cargo book (tally book) for each port to the National Ports Administration.

Prior to Departure:

24 hours prior to sailing, the vessel must notify the Maritime Prefecture and Migration. Representatives of these agencies must receive a crew list and check any changes. If the vessel carries passengers, the Inspector of the National Migration Administration must prepare a record of a sailing inspection, similar to that required upon the vessel's arrival.

The Maritime Prefecture authorises the clearance of the vessel.

PILOTAGE: Also see "Control". Pilotage is compulsory in all river and port zones, except for vessels coming from the East to ports between La Paloma and Montevideo Roads, or entering Montevideo Roads for no commercial reason. All coastal vessels either Uruguayan or foreign are also exempt.

Pilotage Zones:

1. RIVER PLATE – Comprises zone between imaginary lines in the East from Punta del Este (Uruguay) and Punta Rasa, on Cape San Antonio (Argentina) and on the West between Colonia and San Isidro (Argentina).
2. RIVER URUGUAY – From 56.5 km. of Farallon Channel to Uruguayan ports on the River Uruguay.
3. PORTS – Pilotage zones, comprises limits of each port including its Roads.
4. SBM at Jose Ignacio.

In the River Plate, Pilots presently board to the South of the wreck of the *Calpean Star,* approximately 4.5 km. South and lying 70 m. West of the dredged access channel.

Several of the pairs of buoys are missing, and only the Mid Channel Buoy indicating the entrance to the Access Channel, 5 miles South from the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5-mile mark.

There is no more than 30 ft. in the Access Channel at the moment; dredging is being carried on, but there are only 2 dredgers operating between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, and changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel and South of the *Calpean Star;* there is 24 ft. up to 500 m. West of the channel. The zone to the East of the Access Channel has submarine cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to date communications system installed in their office on the 11th floor of Custom Building.

Permanent watch is kept on Channel 16 VHF, and operator speaks English. It is possible to call "Practicos Montevideo" and ask to be connected by phone to the vessel's Agent's office for last minute instructions, etc.

Channel	Frequency	Channel	Frequency
9	156.45	11	156.55
16	156.80		

The port is closed when wind force exceeds 43 knots or, at night 37 knots, or if visibility is less than 1 km., but otherwise vessels can enter or sail at any time.

There is also a Telex machine with 24 hour watch, over which messages can be transmitted to Agents out of office hours, over a weekend, for example. Call sign is DGT 843 Pilot CX. This is particularly useful for vessels sailing late from Buenos Aires, and the Office will pass on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with their office, the Port Authority or the Semaphore Station, using Channel 9 for the Port Offices and 11 for the Pilot's Office, 16 being kept for use with vessels.

Ordering of River Pilots for Sailings from Uruguayan River Ports: Although Masters can apply directly for Pilots such applications must be made by telegram addressed to the Practico Mayor Montevideo, it is preferable for them to keep their Montevideo Agent fully informed and leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having been discontinued makes it more essential than ever that Montevideo Agents are kept accurately informed regarding expected readiness to sail. Failure to do so will result in unnecessary demurrage being paid to Pilots or delay to the ship concerned.

Pilots for Vessels Proceeding from Sea to a Uruguayan Port on the River Uruguay: A Uruguayan Pilot must be employed to conduct ships from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine River Pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port Pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port bound for Uruguayan River Port: Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels leaving Uruguayan Port for Argentine Ports on the River Parana: Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels Arriving from Elsewhere:

Capitan .... solicita libre platica
(here the name of the vessel)
informando proceder de Buenos Aires, siendo su escala anterior......
(here a port in another previous country which could be Santos,Valparaiso, Capetown, etc.)
ondicion sanitaria buena .... Capitan
(here the name of the Master)

Vessels Arriving from Buenos Aires:

Capitan .... solicita libres platica
(here the name of the vessel)
informando proceder de..
(here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.)
siendo su ultimo puerto ....
(here say Santos – Valparaiso – Capetown, etc.)
condicion sanitaria buena .... Capitan
(here the name of the Master)

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for Free Pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take Pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port Pilot also, it is advisable in these cases to ask for Pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of Pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness On Board: Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health Department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Master does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners:

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kHz. A3 0.4 kW. at 0003, 1403 and 1903 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602,12750, 17208.8 kHz. A1 1.5 kW., also on 421.5 kHz. A1 and A2 5 kW. at 0000, 1400 and 1900 hrs. (after the weather forecast).

Montevideo CX 16850 kHz. A3 10 kW. at 1302 hrs. and 1602 hrs. on working days, at 1700 hrs. on Sundays.

Montevideo	CX 6	659 kHz	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 1600 hrs.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA10	11900	A3 20 kW.

Weather Forecast: A weather forecast is transmitted in Spanish to cover 3 zones. (See "Plans").

Reference AAA 830 is the Coastal area from Lat. 30° S., Long. 50° W. out to Lat. 30° S., Long. 46° W. and down to Lat. 33° 30' S., Long. 53° W. and Lat. 35° S., Long. 49° W.

AAA 860, River Plate zone from Lat. 33° 30' S., Long. 57° W. to Lat. 35° S., Long. 49° W. and down to Lat. 35° 30' S., Long. 57° W. to Lat. 39° S., Long. 53° W.

AAA 870 Coast of Argentina from Lat. 35° 30' S., Long. 57° W. to Lat. 39° S., Long. 53° W. and down to Lat. 41° S., Long. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours

CWA on 421.5 kHz. A1 5 kW. at 0001, 1400 and 1900 hrs.

CWF on 2768.5 kHz. A3 0.4 kW. at 0005, 1405 and 1905 hrs. and A1 over 4346 kHz, 8602 kHz, 12750 kHz and 17208 kHz.

Time Signals: Are transmitted from 2 stations in Montevideo at 1500 an 2000 hrs. The hour is indicated by 6 dots preceded by a 10 second das and a 5 second silence. The last dot indicates the hour.

CX 6 on 650 kHz. A3 25 kW.
CXA 6 9620 kHz. A3 20 kW.

Standard time is GMT minus 3 hours.

Direction Finding: There are 2 radio beacons specially for maritim navigation. Both operating on circular sweep from the lighthouses a Cape Polonio and Isla de Lobos.

Cape Polonio: Lat. 34° 24' 00" S., Long. 53° 47' 45" W. frequenc 295 kHz. A2 range 380 miles, and 500 kHz. A1 A2.

The signal is "P" repeated 3 times in 10 seconds followed b 18 dashes in 30 seconds, repeat "P" 3 times and 10 seconds silenc total period 1 minute. This is repeated 4 times after 5 minutes silenc total 10 minutes.

In good weather transmission must be requested from CWM 21 o 500 kHz. A1 A2. In fog, there is continuous transmission from the hou

Isla de Lobos: Lat. 35° 01' 33" S., Long. 54° 53' 17" W. frequenc 300 kHz. A2 range 380 miles. The signal "L" is repeated 3 times i 10 seconds, followed by 18 dashes in 30 seconds, repeat "L" 3 times silence 10 seconds. Total period 1 minute, repeated 4 times, the 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 2 on 500 kHz. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kHz	
Colonia	COL	34° 27' 33"	57° 45' 49"	203	A2 0.075 kW. cont.
Montevideo	CAR	34° 46' 15"	56° 01' 28"	380	A2 0.05 kW. cont.
	CRO	34° 48' 55"	56° 01' 45"	305	A2 0.05 kW. cont.
	CRR	34° 49' 50"	56° 00' 15"	280	A2 0.05 kW. cont.
Gral. Artigas	GA	34° 45' 00"	55° 58' 00"	260	A2 0.05 kW. cont.
Punta del Este	CB	34° 55' 00"	54° 55' 00"	325	A2 occasional only.

GENERAL INFORMATION: *River Uruguay*

Rises in Brazil, and later separates Argentina and Uruguay. Its rig bank is generally low, wooded and swampy, the left bank high and hill Preparatory work has commenced on a large hydro-electric dam to b built at 332 km., above Concordia, which will take some years but wi contribute to a regularisation of the river, which at present rises and fal twice every year, with the varying rainfall seasons in its basin, so tha approximately half the year the water is low, usually from January t April and again in August. However, the wind also affects the depth o the water as in the River Plate, so that any seasonal forecast i impossible. A safe year round draft to Concepcion del Uruguay can b taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 i

The Ministry of Marine publishes fortnightly a bulletin with a information on depths of water in the channels, as well as of change in buoys, lights, etc.

Two new bridges communicating with Argentina now span th Uruguay River at Fray Bentos and Paysandu. The bridge at Fray Bent has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO: Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port o in transit, may be handled by the crew, as otherwise the vessel will b called on for high extra wages to stevedores. This also affects the lashin of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earnin double wages while doing so. They can also be persuaded to hand baggage or mail.

When handling dusty cargo in general, or which gives off ammonia nicotine, or organic emanations, masks must be provided for stevedore use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with th consequent delays in delivery and expenses for the vessel. Holds shou be carefully inspected as soon as discharge is said to have been finishe to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clea receipt cannot clearly be given, otherwise the cargo should be rejecte Mate's receipts cannot be claused to cover any damage from ra wetting or other causes which might be sustained after the carg received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vess and the dock side a wooden scaffolding, with lateral boards, or str canvas to collect all material which is liable to fall into the water or to the Dock during handling. There is a heavy fine for non-complia

This should be remembered when writing charter parties, especi under FIO conditions, as this should be for account of shippers receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, ligh or wagons. When the cargo is delivered to Fiscal Warehouses, rec for this is given to the vessel's Agents by the Custom House offici charge of the Warehouse. If discharged to lighters the lighterman obt receipt from the Custom House official once the cargo is receive warehouse. When the cargo is delivered direct to Consignees' lo the receipt is given by special Custom House officials called "Ca Receivers".

The goods are delivered by the Custom House officials to Consignees against the presentation of the "transferencia" (tra ticket) signed by the Agents of the vessel. The Agents sig "transferencia", extended on stamped paper, against the Original B Lading, which must be legalised by the Uruguayan Consul at the of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be re-shipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking Pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Masters and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within 15 days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Masters of vessels having stowaways on board must report them to the Authorities, stating their name and port of embarkation. The stowaways must be kept on board. If they escape and are found after the vessel sails, Agents will be responsible for their repatriation and upkeep charges until they leave the Country. As with deserters, vessels with stowaways on board are liable to a fine per man if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be used for repatriating the stowaway or for conveyance to the port of embarkation.

Landing members of crew – Paying off crew for other than medical assistance is not permitted, but exceptions are granted in special cases. An application must be presented by the Agents to the Immigration Department, and if the permit is granted, a formal declaration is signed by the Master of the vessel, the Agents, the Immigration Inspector and the person wishing to disembark, setting forth length of time he is going to remain in the Country and conditions of departure. The personal documents of the person allowed to land, remain in charge of the Immigration Board.

If any member of the crew is landed for medical treatment or paid off without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes alongside the quay, but this must not be presented before coming in to the quay. Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached and handy, and a safety net must be placed under the gangway, otherwise shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil lamp is not sufficient.

As soon as vessel is securely moored, regulation size (not less than 80 cm.) rat-guards must be placed on all ropes, wires, fenders, lines and hoses.

Heavy fines are imposed for non-compliance with any of these or other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scuppers, engine room, etc. must be screened or covered when vessel is alongside the quay, as vessels will be fined if the discharge falls on the dock or gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition issued by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies for a Pilot, official or private, for navigating the Channels, the Pilot must first check the compass for deviations of more than 5°, and if such deviation has been determined more than 6 months ago, especially in a place with great difference of latitude or different hemisphere, compensation of compass is obligatory when not in true order, and a written declaration to this effect will be made in the pilotage agreement. The Authorities will also send an officer to verify that the compass is in satisfactory condition before entering the Straits".

To avoid probable delays, ships heading for the Straits can make the necessary compensation in the Port of Montevideo or in the ante port whilst waiting for orders for departure. This port is most convenient for this class of compensation because at the present moment there is no magnetic variation and also because it is a quiet harbour with sufficient depth for turning. A compass adjuster may be obtained at any time.

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reserving all fishing and undersea exploitation rights. A number of foreign flag vessels fishing without permits have been seized and heavily fined, their catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gross, to operate within 60 miles from shore, while all activity in territorial waters (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a strict prohibition of dumping anything into the port, and oil tanks must not be cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission from the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are being lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 ft. or more off the quay. If the vessel has no fenders, or due to deck cargo cannot use them Agents should be warned in advance to rent the necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to control the vessel as she moves in, it is essential that the anchor should be hove in again once the ship is moored. Port regulations require this and any damage to other craft, real or imaginary, through fouling anchor or chain, would cause considerable trouble.

SYSTEM OF CONTROL CENTRES AND MARITIME INFORMATION (COASTAL STATIONS FP-FT-FW, VHF-FM):

Legal Basis

(a) System of Control and Information of Movement of the Port of Montevideo and its zone of influence made operative on 9/4/75. (Maritime Regulation No. 1).

(b) Control Centre and Information of the Maritime Movement of the Port of Colonia and its zone of influence made operative on 23/9/76. (Maritime Regulation No. 3).

(c) Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira and its zone of influence made operative on 1/10/76. (Maritime Regulation No. 4).

(d) Control Centre and Information of the Maritime Movement of the Port of Punta del Este and its zone of influence made operative on 2/1/77. (Maritime Regulation No. 5).

(e) Control Centre and Information of the Maritime Movement of the Western Coast and its zone of influence made operative on 27/4/78. (Maritime Regulation No. 11).

(f) Control Centre and Information of the Maritime Movement of the Port of La Paloma and its zone of influence made operative on 1/11/78. (Maritime Regulation No. 12).

Note: In all the creations of the Control Centres, due account was taken of Programmes 1.09 and 3.08 corresponding to Law 14.106 and Sub-Programmes: "Maritime Police" and "Direction of Mercantile Marine".

(g) Control and surveillance of fishing vessels in the various fishing areas within the waters in the jurisdiction of the P.N.N. – Sources: Laws Nos. 14.145, 14.521 and 14.106 of the P.N.N. – Programme 1.09. (Maritime Regulation No. 2).

(h) Equipment which fishing vessels under the Uruguayan flag must possess when they operate in the common fishing zone between the Eastern Republic of Uruguay and in the Uruguayan fishing areas proper.

Sources: Maritime Regulation No. 2 of the 23/7/76. Decree of Co-ordination of Punta del Este of 27/1/76 (P.N.N. – P.N.A.). (Maritime Regulation No. 6).

(i) Equipment which vessels and/or craft in the coasting trade, pleasure craft, passenger vessels and working boats must carry where they operate in the Ports of the Republic and Navigate in the River Uruguay. (The zone between International Bridges and the Salto Grande).

Sources: Appendix 18 MAR 2 of the Radio communications regulation of the UIT and the Agreement arising from the meeting between Uruguay and Argentina (Buenos Aires 9/76) in respect of the use of VHF and FM channels and Maritime Regulations No. 1 to 6 of the P.N.N. – (Maritime Regulation No. 7).

(j) Law covering the control of pollution: Sources: Law No. 13.833 of the 29/12/69 and in particular articles 2 and 12 of the said Law. Chapter IX Pollution – (Articles 47 to 52) of the Treaty of the River Plate and its Maritime Frontage and Regulation of 28/10/74 of the Prefecture of the Port of Montevideo (Maritime Regulation No. 8).

(k) Zones for lightening ships and complement of cargo: Sources: Resolutions No. 2 and 4 of the Administrative Commission of the River Plate of dates 30/9/77 and 26/10/77 as laid down in Article 28 of the Treaty of the River Plate and its River Frontage and established transitorily in the Article 88 of the said treaty (Maritime Regulation No. 9).

(l) "LASH" – Type Operations: Sources: Resolution No. 1/2/78 of the Administrative Commission of the River Plate, Chapter IV. Articles 24 and 27 (Port Facilities, lightening operations and complements of cargo) of the Treaty of the River Plate and its maritime frontage (Maritime Regulation No. 10.).

(m) Agreement on the International Regulation for preventing unauthorised boarding.

(n) The Treaty of the River Plate and its Maritime Frontage.

(o) The Statutes of the River Uruguay.

(p) The International Agreement for the Safety of Human Life at Sea – 1974.

(q) Regulation of Radio-communications of the International Union of Telecommunications (UIT) and nomenclatures.

Particulars of the System

1. AIMS OF THE SYSTEM OF CONTROL CENTRES

(a) To effect positive sovereignty over the Area of the System:
  1. Territorial Sea
  2. River Plate
  3. River Uruguay
  4. Merin Lagoon

(b) To offer support to the National Mercantile Navigation and of third parties, complying with the objectives as propounded by the International Maritime Organisation (IMO) and by the International Telecommunications Union (UIT).

(c) To serve as a chain of Control Towers, effecting control and information of Movement of vessels and Port Operations.

(d) To co-ordinate with Public and Private Institutions who operate within the Ports of the Republic, to facilitate and activate port operations, avoiding delays and inconvenience.

2. GENERAL FUNCTIONS

The General functions of the Centre are:

(a) To maintain real and efficient control of the movement of vessels, in the area of application of the system in order:
  1. To prevent collisions between vessels.
  2. To alert the systems of Search and Rescue and/or Salvage in the event of vessels requiring assistance.
  3. To facilitate BYR operations.

(b) To maintain real and orderly control of the operations in the ports to:
  1. To prevent groundings and collisions with obstacles in port works:
  2. To have prepared emergency plans for cases of disasters and maritime accidents within the Ports and International Bridges (River Uruguay).

(c) To maintain up-to-date information concerning the state of the weather, lighting and all other matters contributing to the safety of navigation and operations in the area.

(d) To maintain up-to-date information for Maritime Agencies and/or Owners, providing such information to facilitate and activate port operations to be effected by vessels, obviating delays and inconvenience at all times.

(e) To serve Public and/or Private Institutions who operate in th Ports, collecting, classifying, analysing, evaluating an disseminating all the necessary information for the better fulfilme of port service.

(f) To comply with all other functions which are specified by th Mandate and to co-operate with Public Authorities an organisations in all matters relating to its functions.

3. CONTROL AND INFORMATION FROM THE CENTRES

The system belongs to the National Navy and is controlled by th National Navy Prefecture. It is directed from the Montevideo Contro Centre.

(a) Control of Movement of Vessels – Control of vessels navigatin within the Vessel Movement Areas.

(b) Control of Port Operations – Control of vessels manoeuvrin within the ports of the Republic, including roads and acces channels.

(c) Control of International Bridges – Control of vessels navigatin in the International Bridges Zone – Gral. Jose Artigas Bridge a Paysandu, and Gral. San Martin Bridge at Fray Bentos.

(d) Vessel Movement Service – Maritime Mobile Safety Servic between coastal stations and vessels or between vessels, wher the messages refer solely to vessel movement.

(e) Port Operation Service – Maritime Mobile Service in a port or i its district, between coastal stations and vessels, where th messages refer solely to vessel operations, movement and safet and, in the event of emergency, to safeguarding persons.

4. ZONES OF CONTROL AND INFORMATION OF THE CONTRO CENTRE SYSTEM

(a) Port of Montevideo (Deep Sea – Coasting – Fishing).
  1. "Alpha" – Control and information of vessel movement.
  2. "Bravo" – Control and information of port operations.

(b) Port of Buceo (Pleasure Craft).
  1. "Oscar" – Control and information of port operations.

(c) Port of Santiago Vazquez (Pleasure Craft – Coasting).
  1. "Papa" – Control and information of port operations.

(d) Port of La Paloma (Fishing Centre).
  1. "Kilo" – Control and information of movement of vessels.
  2. "Lima" – Control and information of port operations.

(e) Port of Punta del Este (Fishing – Pleasure Craft).
  1. "Golf" – Control and information of vessel movement.
  2. "Hotel" – Control and information of port operations.

(f) Port of Piriapolis.
  1. "Tango" – Control and information of port operations.

(g) Port of Colonia (Passage port to Buenos Aires).
  1. "Charlie" – Control and information of vessel movement.
  2. "Delta" – Control and information of port operations.

(h) Port of Sauce (Coasting).
  1. "Uniform" – Control and information of vessel movement an of port operations.

(i) Port of Nueva Palmira (Deep Sea).
  1. "Echo" – Control and information of movement of vessels.
  2. "Foxtrot" – Control and information of port operations.

(j) Port of Carmelo (Pleasure Craft – Coasting).
  1. "Quebec" – Control and information of port operations.

(k) Port of Fray Bentos (Overseas – Navigation – Internatio Bridges).
  1. "India" – Control and information of the movement of vesse
  2. "Juliet" – Control and information of port operations.

(l) Puerto Paysandu (Overseas – Navigation – Internatio Bridges).
  1. "Mike" – Control and information of the movement of vesse
  2. "November" – Control and information of port operations.

(m) Puerto Salto (Coasting – Pleasure Craft – Passages).
  1. "Romeo" – Control and information of the movement o vessels.
  2. "Sierra" – Control and information of port operations.

5. COMMUNICATIONS

All Centres maintain permanent listening on Channel 16 (VHF – F

(a) *Language:* The language used in communication is Spanish. Vessels who have difficulty in communicating in Spanish ma do so in English, and if there are problems in hearing prope they may use the groups of the International Code Signals, Tabl of Spelling equivalents and Numbers, or "Q" Code.

(b) *Channels – Frequencies and Usages:* There will be those a defined by Appendix 18 Mar 2, of the Radiocommunicatio Regulations of the International Telecommunications Uni published by the General Secretary of the UIT in Geneva 19 and the points agreed in the Uruguay – Argentina Meeting, carr out in the City of Buenos Aires 9/76, use of the VHF Chann (Band 156 – 174 MHz.).

Channel	*Frequencies*	*Usage*
6	156.300 MHz.	Bridge to Bridge.
8	156.400 MHz.	Port Operations.
9	156.450 MHz.	Port Operations.
11	156.550 MHz.	Transmission from the Centres in fulfilme of objectives.
13	156.650 MHz.	Transmission from the Centres in fulfilme of objectives.
15	156.750 MHz.	Meteorological Bulletins and Warnings t Navigators.
16	156.800 MHz.	Calling up and Security.
18	156.900 MHz. Reception	Jose Ignacio Oil Terminal.
	161.500 MHz. Transmission	Jose Ignacio Oil Terminal.

Should problems arise with VHF equipment on vessels (the rang same, out of service, etc.) communications should be effected o or on HF with the Safety Coastal Stations of the P.N.N.

The services and frequencies of the Coastal Stations are described in the tables at the end of "Uruguay General" Section.

Vessels who, for some reason or other cannot effect communications by radiotelephone (VHF, HF, MF), should do so by radiotelegraphy through the intermediary of the Coastal Station (open to public correspondence) Cerrito Radio CWA.

Radiotelegrams should be sent in time to the telegraphic address Comopre.

(c) *Listening Out by Vessels:*

1. *All vessels* in Uruguayan judicial waters must maintain permanent listening watch on Channel 16 (VHF – FM) except when they are moored in port. If there are problems on VHF they should listen out on 2182 or 4125 kHz.
2. When a vessel cannot, due to any fault of whatever nature, maintain listening watch on Channel 16, she should pass to Channel 11 or 13, but advise the Control Centre first.
3. In the various zones, the vessels must use as a working channel to communicate with the Zone Centre, the frequency which the Control Centre will indicate to them on Channel 16.
4. In all the ports of the Republic, vessels and/or craft in the coasting trade, pleasure craft (Categories A and B), passenger craft and traffic units (tugs, dredgers, launches, lighters, etc.) must be equipped with a VHF – FM transmitter and receiver for local communications with Port Controls, Appendix 18 Mar 2 of the Radiocommunications Regulations of the International Telecommunications Union.
5. *All vessels or craft* navigating or carrying out operations within 25 miles or more of the coast, must be equipped with a BLU transmitter and receiver (with corresponding frequencies) of 150 watts effective power and A3A and A3J type transmission.

(d) *Services and Frequencies of the FP, FC and FW Dependent on the P.N.N.*

Coastal Station (FC), Station for Port Operation (FP), Station for Service of Vessel Movement (FT), Station which is both for Port Operations and for Service of Vessel Movement (FW).

(e) If in fulfilment of the regulations set out by this System, vessels on calling up the Control Centre cannot obtain a reply, they should immediately make the communication in question to the Director of the System (telegraphic address: Comopre) by radiotelegraphy or radiotelephony via Cerrito Radio (CWA) or Punta Carretas Radio (CWF) respectively.

Communications to Centres:

1. From Vessels in the Zone.
   (a) Position on entering and leaving each Zone of Vessel Movement (Flag, Name, International Call Sign, Where From, Where Bound, Latitude, Longitude, Course, Speed and Maximum Draft).
   (b) ETA at next port.
   (c) Problems with characteristic aspects during navigation.
   (d) If anchoring or raising anchor at any point in the Control Zone of Vessel Movement, it is necessary to ask for authorisation when this is done within Port Operation Zones, and also whenever any manoeuvre is intended to be carried out, and this authorisation expiring within twenty (20) minutes from its request.
   (e) Any damage suffered by the vessel.
   (f) Assistance given to damaged vessels or those in difficulty.
   (g) Any indications of dangerous obstacles to navigation which are not duly indicated by buoys and lights.
   (h) Any serious reduction in visibility.

2. Pilotage:
   (a) Whatever is specified in the General Pilotage Regulations.
   (b) Time of embarkation and/or of disembarkation.
   (c) Request of Master concerning change, mooring, etc.
   (d) Difficulties in pilotage.

3. Concerning the Owner or Agent:
   (a) Monthly list of expected vessels.
   (b) Confirmation of arrival of vessels 24 hours in advance.
   (c) News concerning vessels being delayed or arriving early.
   (d) Information if the vessels are carrying hazardous cargo (explosives or inflammables) 24 hours in advance of arrival, including any such cargo in transit, mentioning:
      (i) The amount and location of such cargo.
      (ii) The correct technical name of the substance (the designation used for transportation purposes), the UNO number (if this is given), classification in the IMDG Code (if this is given), the flash point (if applicable) and quantity.
      (iii) The presence or otherwise on board of a Certificate which is valid showing the ability of the vessel in respect of the cargo which it is carrying (only for hazardous substances carried in bulk);
      (iv) The stowage of hazardous cargo on board, indicating those which have to be unloaded and those which have to remain on board;
      (v) The condition in which the hazardous cargo is and any defect which is known in respect of packages or drums, together with the system of containing and handling of the cargo, of the equipment and instruments used (when hazardous bulk cargo is involved), which may engender excessive risk.
      (vi) Any known defect which may effect considerably the safety of navigation.

(f) *Communications from the Centres:*

1. To vessels (navigating towards Uruguayan Ports).
   (a) The quay at which they will berth.
   (b) The Pilot who will assist the vessel.
   (c) Any information from the Maritime Agent with regard to future operation.
2. To the Pilot:
   (a) Tugs and cable launches who will assist him.
   (b) Defences on the sea wall.
   (c) Bitts which the vessel will use.
3. To the Owner or Agent:
   (a) Position of their vessel.
   (b) ETA.
   (c) Conditions of cargo.
   (d) Time at which the Pilot will go on board.
   (e) Time of berthing.
4. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port of Montevideo) immediately any information is obtained with regard to:
   (a) A BYR incident or any difficulty which is presented to a vessel.
   (b) A deep sea or coasting vessel (data concerning Naval Messages in accordance with the Abbreviated Code).
   (c) A fishing vessel, with the Naval Message data being as follows:
      - Where from, Flag, Name, International Call Sign, Month, Day and Hour of sailing, Position (for Customs Clearance), Month, Day and Hour of Position, Activity (fishing or bound for Port).
      - Arrival, Flag, Name, International Call Sign, Month, Day and Hour of Arrival, Port of Arrival.
      - Fishing or within the Zone, or the Port, Flag, Name, International Call Sign, Position, Month, Day and Hour of Position ETA (if it is within the Zone or the Port).

(5) To the adjacent Control Centre:

When a deep sea or coasting vessel sails from a port controlled by the Control Centre, or when this vessel effects a passage to the Vessel Movement Zone controlled by that Centre, this must be informed to the adjacent Control Centre (according to the course of the vessel) stating ETA and the Zone of Vessel Movement of this adjacent Centre.

Note: The Control Centres will effect communications by Naval Message. These Naval Messages must be sent immediately after receipt from vessels or when such information comes to hand from other sources.

(Naval Messages in this context will have Priority Precedence).

(6) Command of to the Naval Control of Maritime Traffic in Uruguay (Contramu). Immediately on receipt all information specified in item (f) – Number (4).

(g) *Communications from Coastal Stations (Vessel Movements – FT, MF-HF)*

1. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port of Montevideo). Immediately on receipt all information specified in Item (f) Number (4).
2. To the Control Centre with responsibility over the zone to which a message refers.

The same as those quoted in the preceding Number 1.

6. FISHING VESSELS:

(a) All fishing vessels clearing entry or departure from any national port towards the different Fishing Areas must communicate to the Maritime Authority the following:

1. On Sailing:
   a. Flag (FL)
   b. Name of Ship (SHP).
   c. International Call Sign (IND).
   d. Port of Departure (DEP)
   e. Month, day and hour of departure (TOD).
   f. Destination (Indicate Fishing Zone and Position) (DST).
   g. Month, day and hour estimated at arriving at the Fishing Zone (ETA Z/P).
2. On Arrival:
   a. Flag (FL).
   b. Name of Ship (SHP).
   c. International Call Sign (IND).
   d. Port of Arrival (PORT).
   e. Month, day and hour of arrival (ARR).

(b) All fishing vessels *navigating* must communicate every 6 hours with the Safety Coastal Station of the National Naval Prefecture of the Eastern Republic of Uruguay which is nearest to them (or to which they are listening) giving the following information:

1. International Call Sign (IND).
2. Position in Latitude and Longitude (POS).
3. Month, day and hour of the position (DHPOS).
4. Port of Destination (DET).
5. Activity: (Fishing – Coming to Port – Going to Zone) (ACT).

(c) *Normal Fishing Zones:*

1. High Seas Zone (Altamar): Zone which is outside the judical waters and within the Common Fishing Area.
2. Common Fishing Area (ZOCOPES): Art. 73 of the River Plate and Territorial Sea Treaty.
3. The Zone of the River Plate (RIPLATA).
4. The coastal Zone of the Atlantic Ocean (COSATLAN): Zone included between our coast on the Atlantic Ocean and a Line 12 miles out.
5. Zone of the River Uruguay (RIURU).
6. Zone of the Merin Lagoon (LAMERIN).

(d) Uruguayan Fishing Vessels which are *navigating* in the Common Fishing Area (Uruguay – Argentine) within the Sector of Argentine Jurisdiction are obliged to communicate its position to the Argentine Maritime Authority. Communications will be made on frequency 3860.6 kHz. to the Coastal Safety Station of the Prefecture of the Mar del Plata.

(e) *Note:* Information to be communicated: All the communications as specified in (b).
All fishing vessels must *listen out permanently* on Channel 16 (VHF – FM), except when they are moored in port. If they are at a distance from the coast which prevents a safe communication on VHF, listening must be effected on 2721.5 kHz. Those effecting operations 25 miles or more from the coast, must be equipped with a BLU transmitter and receiver (with the corresponding frequencies) with 150 watts effective power and type of transmission A3A and A3J, and also fishing vessels must be equipped with a receiver on 2721.5 kHz.

(f) Vessels, after prior request to the Control Centre covering them, may pass to Channel 6 or 8, and keep on those *only for the necessary time* for Fishing Manoeuvres, after which they must return to Channel 16, and advise the Centre accordingly.

7. HYDROCARBONS: It is prohibited to pour hydrocarbons or residual matter arising from the washing of tanks, clearing of bilges and ballast in general or any other action capable of having contaminary effects in waters within the territorial sea of Uruguay with the exception of the zone which is:
   - (a) Outside the limits of the River Plate.
   - (b) Outside 100 miles of the Uruguayan Territorial Waters, i.e. 100 miles out from the Atlantic Ocean coast.
   - (c) Outside the Prohibition area for contaminatory action (Article 78 of the River Plate Treaty).

8. ZONES OF OPERATION FOR LIGHTENING AND COMPLEMENT OF CARGO:
The zones of operation for lightening and complement of cargo are as follows:
Zone "A": Between the Parallels of Lat. South 35° 04' and 35° 08' and between the Meridians of Long. West 56° 00' and 56° 02'.
Zone "B": Between the Parallels of Lat. South 35° 30' and 35° 33' and between the Meridians of Long. West 56° 30' and 56° 38'.
Zone "C": Between the Parallels of Lat. South 35° 35' and 36° 06' and between the Meridians of Long. West 56° 30' and 56° 38'.
Zone "D": Between the Parallels of Lat. South 35° 04' and 35° 06' and between the Meridians of Long. West 56° 11' and 56° 16'.

9. OPERATIONS OF LOADING AND UNLOADING "LASH" TYPE VESSELS:
The operation of loading and unloading "LASH" type vessels for the national territory, on the one hand may be effected apart from within the lightening and complement of cargo areas in ports, also in the corresponding roads.

10. TRANSFER OF VESSELS:
The transfer of vessels between roads and lightening areas and for complement of cargo purposes, will be effected under pilotage and tug control using the Port Services from which the barges in question have come.

CONTROL CENTRES:

Control Centre and Information of Maritime Movement of the Port of Colonia.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of Colonia, within the free zone of the Port, located in the main building of the free Port zone of Colonia (Latitude 34° 28' 28" S., Longitude 57° 57' 38" W.).

(b) The call sign of the Control Centre is CWC 23, and for calling up purposes it is possible to use CONTROL COLONIA PREFECTURE.

(c) The Control Centre of the Port of Colonia is located in the Prefecture of the Port of Colonia.
The Prefecture of the Port of Colonia is a dependency of the National Naval Prefecture (2nd Circumscription).
Telephone No. of the Control Centre – 688.
Address – Boulevard Espana 2054 (Department of Colonia).

AREAS OF CONTROL.

(a) The Control Centre and Information of Maritime Movement, covers:
1. Zone "CHARLIE". The area of the River Plate marked by the Meridians which pass through Martin Chico Point (Longitude: 58° 12' 30" W.) and Punta Rosario (Longitude: 57° 21' W.) and the middle line equidistant from both coasts (Law 14.145/74 – "Treaty covering the Limits of the River Plate"), with the exception of the area of water included between the imaginary line which joins San Carlos Point; Lopez West Island; Farallon Island; the Green Buoy of Vienna, Parallel 34° 30' S., the Meridian which passes through Riachuelo Point Longitude: 57° 43' 18" W., and the coast ("DELTA" AREA).
2. "DELTA" area. Area of the River Plate, limited by the imaginary line which joins San Carlos Point; Lopez West Island, Farallon Island; the Green Buoy of Vienna, Parallel 34° 30' S., the Meridian which passes through Riachuelo Point Longitude: 57° 43' 18" W., and the coast.

(b) The Control Centre and Information of Maritime Movement of the Port of Sauce covers:
1. "UNIFORM" zone. The area of the River Plate included between Meridians 57° 25' 48" W. and 57° 33' W., the coast and the parallel Latitude: 34° 29' 18" S.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels.
1. In zone "CHARLIE". The Control Centre must be inform when the following points have been passed:
Punta Rosario
Puerto Sauce
Roca Barriles
Puerto Colonia
Km. 56.5 (Farallon Island)
Km. 71.3 (San Pedro Bar)
Km. 101 (Martin Chico Point)
In both Zones of Control the communications as designated following tables, must be effected.

(b) From the Director of Hydrographic Studies of the MTOP.
1. The place assigned for berthing or mooring.
2. Guard and order tugs (when these exist).

Control Centre and Information of the Maritime Movement of the Port of Fray Bentos

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of Fra Bentos (Latitude: 30° 06' 50" S., Longitude 58° 18' 27" W.).

(b) The International Call Sign of the Control Centre and Informatio of the Maritime Movement of the Port of Fray Bentos is CWC 25 When calling up it is possible to use CONTROL FRAY BENTOS PREFECTURA.

(c) The Control Centre of the Port of Fray Bentos is located in the Prefecture of Fray Bentos (5th Circumscription P.N.N.).
Telephone No. of the Control Centre is 321.
Address: Luis A. de Herrera 1249 on the corner with 25 de Agost Fray Bentos Department of Rio Negro.

CONTROL AREAS.

(a) The Control Centre Information of the Maritime Movement of the Port of Fray Bentos covers:
1. Zone "INDIA" The area of the River Uruguay marked by the parallel 33° 30' S. (Punta Amarilla Km. 46) and the parallel 32 50' S. (Roman Island) navigable areas of the Rio Negro and San Salvador and the middle line equidistant from both coasts with the exception of the Port of Fray Bentos and the area of water marked by the port and maritime constructions (zone "JULIET").
2. Zone "JULIET". The port of Fray Bentos and the areas of water marked by the port and maritime constructions.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels:
1. In zone "INDIA". The Control Centre must be notified during navigation when the following crossings are made:
Km. 46 (Punta Amarilla)
Km. 61 (Riacho Yaguari)
Km. 83 (Paso Barrizal)
Puerto Fray Bentos
International Bridge "General San Martin"
Km. 122 (Nuevo Berlin)
Km. 140 (Roman Island)
In both Areas of Control the designated frequencies are show in following tables.

THE BRIDGE ZONE

All vessels of 100 tons or more gross registered tonnage mus comply with the following instructions:

(a) Navigation day and night in both directions will be made under the bridges by the marked channel, in the central arch, betwee piles 10 and 11 in the Bridge "Libertador General San Martin".

(b) It is prohibited to cross or overtake between Km. 100 and Km. 102.5 and for this purpose the following passage priorities are established:
1. Those navigating downstream over those navigatin upstream.
2. Convoys with a tug either pulling or pushing have priority ove all vessels which include those that are navigatin downstream.

(c) The vessel or convoy which has to give way will wait outside th limits indicated in point (b). Between those limits it is prohibite to anchor for any cause, even though the channel is left free.

(d) Between the limits indicated in point (b), speed must be reduc to the minimum compatible with good steering and manoeuvrin

(e) In the zones included between the limits indicated in point (b) is prohibited to effect any form of dredging operation across th whole width of the river.

Control Centre and Information of the Maritime Movement of th Port of La Paloma

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of La Paloma (Position: Latitude 34° 39' 30" S. and Longitude 54° 28" W.).

(b) The International Call Sign of the Control Centre and Informati of the Maritime Movement of the Port of La Paloma is CWC For calling up purposes "CONTROL LA PALO PREFECTURA" may be used.

(c) The Control Centre La Paloma is located in the Prefecture of Port of La Paloma (8th Circumscription P.N.N.)
Telephone No. of the Control Centre – 16.
Address – Avenida del Navio (Puerto de La Paloma) – Roc

CONTROL ZONES.

(a) The Control Centre and Information of the Maritime Movement of the Port of La Paloma comprises:

(1) Zone "KILO". Zone of the Atlantic Ocean (Territorial Sea) situated between the meridians 50° 50' and 54° 15' W., limited by the straight line 128° of the Chuy Lighthouse (lateral maritime limit with the Federal Republic of Brazil – Law 14.163) and to the South by the lateral maritime Argentine–Uruguay limit (Law 14.145/974). – "Treaty of Limits of the River Plate". Art. 70), with exception of the Port of La Paloma, between the coast and an imaginary line which goes between the end of the breakwater towards the Eastern point of the Costa Azul (Zone "LIMA"). Zone "LIMA".

(2) Zone "LIMA". Port of La Paloma, zone situated between the coasts and an imaginary line which goes from the end of the breakwater to the Eastern point of Costa Azul.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels to:

(1) In Zone "KILO" – The Control Centre must be informed during navigation when the following points are crossed:

The Lighthouse Chuy
The Lighthouse Cabo Polonio
The Lighthouse Santa Maria

(2) In Zone "LIMA"
During navigation in the Access Channel and within the Port when the Port jetty small light is passed.

Also, in both control zones the communications shown in the following tables must be effected.

(b) From the Hydrographic MTOP Directorate:

(1) Place assigned for berthing or mooring.
(2) Guard or order tugs (when they exist).

Control Centre and Information of the Maritime Movement of the Port of Montevideo.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS

(a) The Centre is controlled from the National Naval Prefecture, located on the Floors 11, 12 and 13 of the General Command Tower of the Navy (Customs Building Lat. 34° 54' 03" S., Long. 56° 12' 44" W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Montevideo is CWC 39. In calling up it is possible to use "CONTROL MONTEVIDEO PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Buceo is "CONTROL BUCE PREFECTURA".

(d) The Call Sign of the Control Centre of the Port of Santiago Vazquez is CWC 38.
In calling up it is possible to use "CONTROL SANTIAGO VAZQUEZ PREFECTURA".

(e) The Control Centre of the Port of Montevideo is located in the building of the Navy General Command.
Telegraphic Address – "Comopre" (Control Montevideo Prefectura).
Telephones – 95.51.01 – 95.24.77 – 95.62.53.
Telex UY 929
Address – Rambla 25 de Agosto de 1825.

ZONES OF CONTROL.

(a) The Control Centre and Information of the Maritime Movement of the port of Montevideo covers:

(1) Zone "ALFA". Zone of the River Plate situated between the Uruguyan coast and the meridians 55° 30' and 57° 21' W., and to the South to the limit of the River Plate with the Argentine Republic (Law 14.145/74 "Treaty of Limits of the River Plate").
With the exception of the areas of water included:
(a) Between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01' S. (Zone "BRAVO").
(b) Between the meridians 56° 00' and 56° 09' W. and the parallel 34° 57' S. (Zone "OSCAR").
(c) Between the meridians 56° 20' and 56° 40' W. and the parallel 34° 56' S. and the coast (Zone "PAPA").

(2) Zone "BRAVO". Zone of the River Plate included between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01' S., including the Access Channel to the Port of Montevideo, Foreport, Docks, Channel or Inflammable Cargo Docks (ANCAP).

(b) The Control Centre and Information of the Port of Buceo includes:
(1) Zone "OSCAR". Zone included between the meridians 56° 00' and 56° 09' W. and the parallel 34° 57' S.

(c) The Control Centre and Information of the Maritime Movement of the Port of Santiago Vazquez includes:
(1) Zone "PAPA". Zone included between the meridians 56° 20' and 56° 40' W. and the parallel 34° 56' S. and the coast. It includes the Port, Anchorages and all areas of water.

COMMUNICATIONS FROM THE CENTRE

(a) To the National Administration of Ports (A.N.P.).
(1) Time of arrival of each vessel (ahead of time or delayed).
(2) Movement of tugs.
(3) Information from Masters of vessels on his cargo or changes in his berth.

(b) To the Argentine Naval Prefecture:
(1) ETA of vessels which are going to Argentine Ports or to Coastal Ports.

COMMUNICATIONS TO THE CENTRE.

(a) From the National Ports Administration (A.N.P.)
(1) Designation of berths prior to 1700 hrs. on the previous day.
(2) Tugs and launches for guard and order purposes.
(3) Departures for Deep Sea and Coasting vessels.

(b) From the vessels:
(1) In Zone "ALFA". The Control Centre must be informed during navigation when the following points are passed:
(a) To the West of the Access Channel to the Port of Montevideo.
1. By Middle Channel:
The *Graf Spee*
The Panela Lighthouse
The Uruguayan Banco Ortiz Buoy
The Argentinian Banco Ortiz Buoy
2. By North Channel:
The *Graf Spee*
The Panela Lighthouse
The Jesus Maria Buoy
The Arazati Point
The Puerto Rosario.
(b) To the East of the Access Channel to the Port of Montevideo.
Punta Brava
Isla de Flores
(2) In Zone "BRAVO".
During navigation in the Access Channel:
The Eje Buoy
The Jetty

In both areas of control the communications as designated on the following tables should be effected.

Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Control Centre is controlled from the Sub-Prefecture of Nueva Palmira (Position Lat. 33° 52.7' S., Long. 58° 25.3' W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira is CWC 31 and when calling up it is permitted to use "CONTROL NUEVA PALMIRA PREFECTURA".

(c) The Control Centre of the Port of Nueva Palmira is located in the Sub-Prefecture of Nueva Palmira.
The Sub-Prefecture of Nueva Palmira is a dependency of the Prefecture of Colonia (2nd Circumscription P.N.N.).
Telephone No. of the Control Centre – 139.
Address – Port Area – Nueva Palmira – Department of Colonia.

AREAS OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira cover:

(1) Zone "ECHO". Zone of the River Plate and the River Uruguay is marked by the meridian 58° 12.5' W., (Punta Martin Chico Km. 101) and the parallel 33° 30' S., (Punta Amarillo Km. 46) and the middle line equidistant from both coasts with the exception of the Port of Nueva Palmira and the area of water limited by the port constructions (zone "FOX-TROT").

(2) Zone "FOX-TROT". The Port of Nueva Palmira and the areas of water limited by the port constructions (official quay, the Bed of the Company Navigen and the Higueritas Dock).

COMMUNICATIONS TO THE CENTRE:

(a) From Vessels:
(1) In zone "ECHO", the Control Centre must be informed during navigation of the following crossings:
Km. 101 (Punta Martin Chico),
Km. 121 (Sola Island).
Puerto Nueva Palmira.
Km. 22 (Punta Arenal Grande).
Km. 46 (Punta Amarilla).

In both Areas of Control, the communications as shown in following tables must be effected.

Control Centre and Information of the Maritime Movement of the Port of Paysandu.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Paysandu, located in the main Customs building (32° 18' 06" S., 58° 05' 08" W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Paysandu is CWC 32, and when calling up it is possible to use "CONTROL PAYSANDU PREFECTURA".

(c) The Control Centre and Information of the Maritime Movement of the Port of Paysandu is a dependency of the Prefecture of the Port of Paysandu (6th Circumscription P.N.N.).
Telephone No. of the Control Centre – 3099.
Address – Presidente Viera and Avenida Brasil – Paysandu (City).

CONTROL AREAS:

(a) The Control Centre and Information of the Maritime Movement of the Port of Paysandu covers:

(1) Zone "MIKE". The area of the river Uruguay marked by the parallel 32° 50' S. (Roman Island) and parallel 31° 53' S. (the mouth of the Malo Stream Km. 257 approximately) and the middle line equidistant from both sides with the exception of the zone included between the parallel 32° 20' S. (the mouth of the Stream "Sacra") and the parallel 32° 14' S. and the mouth of the Stream "San Francisco". (Zone "NOVEMBER").

(2) Zone "NOVEMBER". The area of the River Uruguay limited by the parallel 32° 20' S. which passes through the mouth of the Stream "Sacra" up to parallel 32° 14' S. which passes through the mouth of the Stream "San Francisco".

COMMUNICATIONS AT THE CENTRE:

(a) From vessels:

(1) In zone "MIKE" – The Control Centre must be notified during navigation when the following crossings are made:
Km. 140 (Roman Island)
Km. 160 (San Javier)
Km. 183 (Concepcion del Uruguay)
Punta "N" Almiron Island
Puerto Paysandu
International Bridge "General Artigas"
Punta Piedras
Arroyo Malo

In both Areas of Control the communications are shown in the following tables.

THE BRIDGE ZONE.

All vessels of 100 tons or more gross registered weight must comply with the following instructions:

(a) Navigation both by day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 11 and 12 in the bridge "General Artigas".

(b) It is prohibited to cross or overtake between Km. 208 and 211. For this purpose the following passage priorities are established:
(1) Those navigating downstream over those navigating upstream.
(2) Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.

(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.

(d) Between the limits indicated in point (b) – speed must be reduced to the minimum compatible with good steering and manoeuvring.

(e) In the zones included between the limits indicated in point (b) – it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of Punta del Este and Piriapolis.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Punta del Este (Lat. 34° 57' 48" S., Long. 54° 57' 06" W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Punta del Este is CWC 34.
For calling up purposes it is possible to use "CONTROL PUNTA DEL ESTE PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Piriapolis is CWC 33.
For calling up purposes it is possible to use "CONTROL PIRIAPOLIS PREFECTURA".

(d) The Control Centre of the Punta del Este is located in the Prefectura of the Port of Maldonado (3rd Circumscription P.N.N.)
Telephone No. of the Control Centre – 4.18.84.
Address – Calle 8 and 13 (Department of Maldonado).

(e) The Control Centre of the Port of Piriapolis is located in Sub-Prefecture of the Port of Piriapolis (3rd Circumscription P.N.N.)
The Sub-Prefecture of Piriapolis is controlled by the Prefecture of Maldonado.
Telephone No. – 18.
Address – Avenida Piria and Calle Maipu (Piriapolis).

ZONES OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Punta del Este covers:

(1) Zone "GOLF". Zone of the River Plate, Atlantic Ocean (Territorial Sea) situated between the meridians 55° 30' and 54° 15' Longitude West, the imaginary line which joins the Punta del Este with Punta Ballena and in the South by the continuation of the limit of the River Plate with the Argentine Republic and the Territorial Sea (Law 14.185/974 "Treaty of the Limits of the River Plate"), with the exception of the extent of water included between meridians which pass through Punta Iman (55° 16' 08" W.) and Punta Raza (55° 14' 00" W.) and the meridian of 34° 56' 30" S. (Zone "TANGO") - Piriapolis.

(2) Zone "HOTEL". The Bay of Maldonado and the Port of Punta del Este.
(a) The Bay of Maldonado: Zone situated between the coast and the imaginary line which joins Punta del Este with Punta Ballena, includes also "Boca Grande" and "Boca Chica".
(b) The Port of Punta del Este: Zone situated between the coast and an imaginary line which goes from the end of the jetty to a point which limits to the North of the Mansa Beach. It includes all the mooring areas.

(b) The Control Centre and Information of Maritime Movement of the Port of Piriapolis comprises:

(1) Zone "TANGO". Zone of the River Plate included between the parallels which pass through Punta Iman (55° 16' 08" W.) and Punta Raza (55° 14' 00" W.) and the meridian 34° 56' 30" S.

COMMUNICATIONS TO THE CENTRE

(a) From Vessels

(1) In zone "GOLF". The Control Centre must be informed during navigation when the following points are passed:
The Isla de Lobos (Wolf Island)
The Punta del Este Lighthouse.

(2) In zone "HOTEL". During navigation in the Access Channel and within the Port:
When the Bajo del Monarco Buoy is passed, and
When the Isla de Gorriti Small Lighthouse is passed.
Also within both Control areas the communications indicated in the following tables must be effected.

(b) From the Hydrographic Directorate of MTOP.
(1) The place assigned for berthing or mooring.
(2) Guard and order tugs (when they are present).

KEY TO LITERAL AND NUMERICAL REFERENCES USED IN THE COASTAL STATION NOMENCLATURE

(a) To transmit meteorological bulletins in accordance with the requirements of List VI of RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.

(b) To transmit Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.

(c) To transmit medical advice on request of navigators.

(d) To transmit urgent messages to Mariners immediately on receipt and to repeat them 3 minutes past every hour and at the normal times of transmission of messages to navigators.

(e) To participate in operations of Search and Salvage.

(f) To alert the Centre's Co-ordinator of Search and Salvage.

(g) To direct the system of Control Centres and Information of Maritime Movement and Port Operations. (FP, FT and FW).

(h) Receive meteorological observations (SHIP) made on the high seas by Masters of vessels.

(i) To effect special transmissions relating to hydrographic and mareographic Information.

(m) To receive reports from fishing vessels (National, Argentine and third nations who are authorised to operate within the area) and to remit them to the Director of the Control Centre System (CONDI) obligatorily in accordance with Maritime Legislation No. 6 P.N.N.

(n) To effect control and facilitate information within the area, receiving reports from vessels navigating within it (obligatory for vessels in accordace with IMP Uruguay).

(o) Effect control and facilitate the supply of information from the port.

(p) Receive by telex or radio requests for pilotage service.

(q) Radiogoniometric Service on VHF (RG).

1. Call up and listening service on a permanent basis and for announcing in advance the intention to transmit.
2. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 156.800 MHz (Channel 16).
3. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by the FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 2182 kHz (Simplex) and 4419.4 kHz (Duplex C.421).
4. Frequency used for the transmission of radiomedical advice on request.
5. Frequency used for operations of Search and Salvage.
6. Frequency used for reports from national fishing vessels.
7. Frequency for Coastal working purposes.
8. Frequency used in common with the Argentine Republic (Naval Prefecture) for the control of fishing vessels of both nations.
9. Provisional working frequency.
10. Working frequency for control and zonal information (Vessel Movement Service).
11. Working frequency for control and Port information (Port Operation Service).
12. Port operation frequency (tugs, traffic launches, tugs and control centres).
13. Duplex frequency Band from 4 to 23 MHz of the Mobile Maritime Service Section 17 REV. RR of the UIT.

CO – Station open exclusively to official correspondence.
CR – Station open to restricted public correspondence.
H24 – Continuous service, day and night.
HX – Intermittent service, day and night or station which has no fixed operating timetable.

SPECIAL SERVICES

Nomenclature of Radiodetermination Stations and Stations which offer Special Services with the P.N.N.

Key:
Key to numerical references used in the nomenclature of radiodetermination stations and stations which offer special services.
METEOROLOGICAL BULLETIN
(Forecast of weather within the 4 Maritime Areas)

1. SYNOPIS: Inform in clear Spanish text for the 4 Maritime Areas No. 1, 2, 3 and 4 stating:
   (a) General
      1. Name of Station
      2. Validity
      3. Significant Phenomena
      4. Weather Notices
      5. Synoptic Situation
   (b) By Area
      1. General Conditions (Phenomena or general character of the current weather)
      2. Winds (direction and speed)
      3. Sky
      4. Horizontal visibility
      5. Air temperature
      6. Strength of the sea
      7. Wave height
   (c) Reading of radio messages for Coastal Traffic and Radio Messages for local purposes (Notices to Mariners) per area.
2. Messages concerning water height.
3. Offer on request of a vessel, a weather forecast, height of water and local radio messages (Messages to Mariners).
4. The station transmits at any time meteorological safety messages preceded by the Safety signal (SECURITE) and repeat them after periods of silence and during normal transmission periods.
5. Meteorological bulletins, radio notices for coastal traffic (Notices to Mariners) and local Radio notices (Notices to Mariners), announcing the fact previously on frequency 2182 kHz, 4125 kHz Simplex and 4419.4 kHz (C.421) Duplex.
6. Meteorological bulletins, radio messages for coastal traffic (Notices to Mariners) and local Radio messages (Notices to Mariners) announcing the fact previously on Channel 16 (156.800 MHz).
7. For services being offered, listening and working frequencies see Nomenclature of Coastal Stations.
8. Radiogoniometric station on VHF.
   (Station of Radiodetermination which uses the receipt of radioelectric waves to determine the direction of a station or of an object).

COLONIA: 34.28 S. 57.51 W. (See Plan)

LOCATION: Lat. 34° 28' 28" S., Long. 57° 50' 38" W.

On the River Plate 92 miles from Montevideo and 27 miles in a straight line E.N.E. of the City of Buenos Aires.

DOCUMENTS: Vessels entering the port must provide the following: Machinery, Hull, Safety, Freeboard and Derat Certificates, Stores List, Crew List, List of Passengers or Negative, Cargo Manifest, Declaration of Transport of Inflammables or Explosives, or where not carried a certificate to that effect.

PILOTAGE: No port or river Pilot is required for coasting vessels.

ANCHORAGES: In the Roads with a depth of 10 ft.

In the foreport with a depth of 8 ft., for shallow draft vessels.

RESTRICTIONS: The port will be closed for all vessels when the wind intensity is 70 knots or more. Also all operations are prohibited in the port shelter area.

The port will be closed for vessels of all kinds when the visibility is 500 m. or less due to fog, squalls, etc. Under these conditions vessels are prohibited to carry out any kind of operation within the shelter area.

HEALTH: Inspection is by a Health Doctor, and is carried out jointly with Immigration, Police, Customs, and Naval Prefecture officials.

RADIO: VHF equipment. Operates permanently on Channel 16.

VHF: All communications are carried out by VHF, the call sign being CWC 23 and that for working Control Colonia Prefecture. Channels used are 6, 8, 9, 11, 12, 14, 15, 16, 25, 26, 68, 69.

The Control Centre listens out permanently on Channel 16, whose frequency is 156.800 MHz.

RADAR: Range 16 miles. Does not give service to vessels.

TUGS: There is no tug service.

BERTHING: Union Quay: Running East to West with a length of 178 m., equipped at its two ends with ramps for landing and shipment of cars and lorries.

Coastal Quay: Running North to South, with a length of 111 m.

Ultramar Quay: Running North to South, with a length of 142 m.

These quays are provided with water hydrants and electricity supply points, the Coastal Quay also having a fuel point for operation of tankers.

Warehouses: For general cargo, the National Port Administration has warehouses within the port area.

CRANES: On the Overseas Quay there are two mobile cranes on rails, with 3 tons and 5 tons capacity.

STEVEDORES: There is no permanent service of stevedores, and such requirements must be applied for in advance by the ships' agents at Nueva Palmira.

MEDICAL: 300 m. from the port is the local hospital with a First Aid room and ambulances.

TANKERS: Operate at the Coasting Quay with a watchman and a fireman on board.

FRESH WATER: Supplied by the National Port Administration.

FUEL: Supplied by road tankers.

FIRE PRECAUTIONS: There is a fire fighting pump with a pressure 8 kg./sq.cm.

CONSULS: Argentina and Italy.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMEN: There is a watchmen servic administered by the Prefecture of Colonia.

CUSTOMS ALLOWANCES: Tourists from neighbouring countries ma bring in: 5 kilos of food, 1 carton of cigarettes, 1 litre of alcoholic drin

No products derived from meat can be brought into the country (co meats, sausages, etc.), nor any plants or seeds.

REPATRIATION: Only to Buenos Aires.

AIRPORT: Located on Highway 1 linking Colonia with Montevideo, 7 km from Colonia.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: 1st and 6th January, Carnival, Touriso, 19th April, 1st Ma 18th May, 19th June, 18th July, 25th August, 12th Octobe 2nd November, 25th December.

POLICE/AMBULANCE/FIRE: Police Tel: 2962; Hospital Tel: 2994; Fir Brigade Tel: 2577; Prefecture 2020.

TELEPHONES: No arrangements for connecting the telephones o board vessels, but there are telephone boxes for communications withi and outside the country.

SERVICES: Bureau de Change via a branch of the Banco Republic There is a bus service with international service, working in conjunctio with arriving and departing vessels, connecting Colonia with the rest o the country.

Post Office: 200 m. from the port.

Mooring Gangs: Provided at the request of the ships' Agents by th National Port Administration.

AUTHORITY: See "Montevideo".

FRAY BENTOS: 33.06 S. 58.18 W. (See Plan

LOCATION: Km. 95 River Uruguay. On the right bank of the Rive Uruguay from seaward 213 miles by river from Montevideo or 145 mile from Buenos Aires.

PORT LIMITS: A vessel is considered to have arrived when she leave the channel and goes to the berth.

DOCUMENTS: Same requirements as for the port of Montevideo.

PILOTAGE: Obligatory, except where bilateral national agreements exis concerning navigation of the River Uruguay, and the Pilot must be take on board in Montevideo.

ANCHORAGE: Between the channel and the port.

RESTRICTIONS: When the port is closed due to bad weather, also th draft depends upon the depths of water in the "El Marques" and "Punt Caballo" passages.

MAX. SIZE: Controlled only by the draft of the vessel and the length o the berth. Max. draft 26 ft. (FW), water depends upon the river condition

HEALTH: Same requirements as for Montevideo.

RADIO: The call sign is CWC 25 "Control Fray Bentos Prefectura".

VHF: Port works on the following frequencies:

(a) Channel 16: frequency 156.800 MHz; Usage: Calling-up an safety.
(b) Channel 9: frequency 156.450 MHz; Usage: Port operations.
(c) Channel 11: frequency 156.550 MHz; Usage: Central Contr broadcasts on safety.
(d) Channel 13: Frequency: 156.650 MHz; Usage: Central Contr broadcasts on safety.
(e) Channel 15: frequency: 156.750 MHz; Usage: Meteorolog bulletins and Notices to Mariners.
(f) Channel 17: Usage: P.N.N.: Maritime Safety.
(g) Channel 68: Usage: P.N.N.: Maritime Safety.

Furthermore, on entering the area between Km. 6 and Km. 165 of th River Uruguay, the vessel must communicate to the Fray Bent Prefecture Control:

(a) flag.
(b) name.
(c) destination.
(d) position.
(e) course and speed.
(f) max. draft.

And on leaving this area:

(a) accident or fire occurred on board the vessel.
(b) whether vessel has given assistance to another vessel whic damaged or in difficulties.
(c) whether she has sighted any dangerous object to navigation an which is not marked.
(d) any serious reduction in visibility.

RADAR: None.

TUGS: None.

BERTHING: There are two types, quays for deep-sea vessels and coasters, both being of cement and wood.

Type	Deep-sea	Coasting
Length	125 m.	250 m.
Direction	East – West	N.W. – S.E.
Average depth	7 m. – 8 m.	5 m. – 6 m.
Signalling lights	Green light – West side Red light – East side	
Fresh water	2 connections	3 connections
Electricity	1 point A.C., 3-phase 220 V. South side quay in shed 3 points 220 V. D.C. (cranes)	3 points 220 V. D (cranes)

Also there is the Anglo Quay with a maximum depth of 26 ft., nor used for meat.

CRANES: There are in the port 3 cranes of 3 tons each and 1 of 5 tons which can move about the port. It is possible to use ship's derricks and shore cranes at the same time.
BULK HANDLING FACILITIES: There is a silo with a conveyor belt, having a storage capacity currently of 14,500 tons, and the conveyor has a loading or discharge rate of 100 t.p.h. See "Developments".
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Can be requested in advance or when the vessel arrives in port. The work is controlled by the following time table: order 0630 hrs., commence work 0700 hrs.; order 1230 hrs., commence work 1300 hrs.; order 1830 hrs., commence work 1900 hrs.
MEDICAL: Doctors and hospital facilities available.
DENSITY: 1000.
FRESH WATER: On the Deep Sea Berth there are 2 connections and on the Coasting Quay there are 3 connections controlled by the ANP. Cost of U.S. $1.20 per 1,000 litres.
FUEL: Not available.
FIRE PRECAUTIONS: Fire Brigade present.
CONSULS: Argentina, others at Montevideo.
REPAIRS: Only minor repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Same as for the port of Montevideo.
HATCHES: If steel, handled by vessel's crew. If wooden, handled by stevedores.
REPATRIATION: See "Montevideo".
AIRPORT: None, only Montevideo.
TIME: See "Montevideo".
HOLIDAYS: The following dates will be used as national holidays of a traditional character:

1st January; 6th January; Monday and Tuesday of Carnival Week; the 6th week following Carnival, which will be called Tourism Week; 1st May; 2nd November; 25th December.

The following dates will be celebrated as national holidays as they are linked with patriotic exaltation and commemoration.

19th April; 18th May; 19th June; 18th July; 25th August; 12th October. With regard to the holidays of 1st May, 19th April, 18th May, and 12th October, these will follow the undermentioned plan:

(a) If they occur on Saturday, Sunday or Monday, they will be observed on those dates.
(b) If they occur on Tuesday or Wednesday they will be transferred to the immediately preceding Monday.
(c) If they fall on Thursday or Friday, they will be transferred to the Monday immediately following.

POLICE/AMBULANCE/FIRE: National Prefecture: Tel: 321. Police: Tel: 201. Fire Brigade: Tel. 35. Hospital: Tel: 533.
TELEPHONES: Not possible.
SERVICES: None.
SHORE LEAVE: See "Montevideo".
IDENTIFICATION: Seaman's Book sufficient.
DELAYS: Normally there is no delay.
DEVELOPMENTS: Increase in the storage capacity of the silos of the Ministry of Agriculture and Fisheries by 5,500 tons, and increase of the capacity of the conveyor belt to 400 t.p.h.
AUTHORITY: National Port Administration, Herrera and 25 de Mayo, Fray Bentos, Uruguay.
Also see "Montevideo".

JOSE IGNACIO: 34.54 S. 54.43 W.

SBM: Position Lat. 34° 53' 43" S., Long. 54° 42' 45" W.
PILOTAGE: Compulsory. Pilot boards at the Fairway Buoy in position Lat. 34° 57' 14" S., Long. 54° 40' 06" W.
RADIO/VHF: Call sign "Control Punta del Este", Continuous watch on VHF Channel 16. Intership working on Channel 6.
GENERAL: ANCAP have installed a Single Buoy Mooring, 3,600 m. from the shore in 16.8 m. (55 ft.) depth of water. Vessels of 150,000 d.w.t. can be handled and the average rate of discharge of crude oil is 5,000 cu.m./hr.

The shore terminal receives, stores and pumps the crude to the refinery at Montevideo.

A River Pilot must be ordered from Montevideo for securing to the buoy, and he remains aboard until the vessel sails.

Five days before arrival, Agents must request Free Pratique from the Health Authorities in Montevideo, and the Customs, Prefecture and Immigration Officials, from Punta del Este.
AUTHORITY: Prefectura del Puerto de Maldonado, Calle 8 y 13, Punta del Este (Maldonado), Uruguay. *Tel:* 41884, 41967. *Contact:* Port Captain.

MONTEVIDEO: 34.55 S. 56.13 W. (See Plan)

Also see "General" at beginning of Uruguay section.
DOCUMENTS:
Health:
Maritime Declaration of Health.
1 List of Passengers Disembarking.
1 List of Crew Members.
1 Derat Certificate.
1 List of Crew International Vaccinations.
Immigration:
1 copy of Crew List.
2 Lists of Passengers Disembarking.
2 copies of List of Passengers in Transit.
Police:
2 copies of List of Passengers Disembarking.
1 copy of Crew List.
2 Lists of Passengers in Transit.
Prefecture:
2 Lists of Passengers in Transit.
1 Visaed copy of List of Passengers with Port of Origin.
2 Non-visaed copies of List of Passengers.
1 Passenger List – or Negative – from all ports visited.
1 Non-visaed Crew List.
1 Cargo Manifest for Montevideo.
1 Manifest for Cargo in Transit.
1 List of Inflammable Cargo or Hazardous Goods – visaed or straight.
1 List of Vessel's Data.
Customs:
1 Visaed Manifest
1 copy of Ballast loaded at each port.
1 Negative discharge statement for each port.
If there is no Consul in previous ports, the last port where there was one.
2 Stores Lists.
2 Lists of Cigarettes and Whisky.
2 Lists of Personal Effects.
3 Lists of Bunkers on Arrival.
1 copy of Passenger List for those disembarking, or negative, and their baggage in the same list (drawn up and signed by the passengers themselves).
Agents:
2 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
2 Crew Lists.
2 Stores Lists.
2 Manifests, including Inflammable Cargo.
2 Cargo Plans.
NOTE: The manifest must have a special section with all effects in transit or otherwise, for the free zones of Colonia and Nueva Palmira.

Crew Lists, amended Crew Lists and Inflammable Cargo Lists must be visaed at ports of sailing or loading.
ANTEPORT: The Anteport is to the North of the entrance, between the breakwaters, and has a depth of 33 ft. – 36 ft. Sufficient room for 10 vessels, depending on size.
PORT: The port is formed by the North side of the Montevideo Peninsula and the "Dique de Cintura", a breakwater running parallel to the coast, about 870 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels and 1 for river traffic.

Basins 1 and 2 have a depth of 33 ft., and the basin for river traffic 15 ft.
APPROACHES: The Roads of Montevideo consist of the Outer Roads situated to the South of the bay and Inner Roads situated outside the Western breakwater.

Both anchorages are very exposed and vessels are recommended to enter the anteport.

The entrance channel has 36 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 31 ft., and the River Traffic Basin, 15 ft. These depths depend on dredging being maintained, but even so vessels often "drag" when on the higher marks; the bottom is fine soft silt.
PILOTAGE:

1. The Pilot must be requested via the Agent 24 hours in advance, giving ETA in the roads by W/T (Cerrito Radio – CWA on frequency of 500 kHz). It is not possible to elect a Pilot for the area of the port of Montevideo, except where the vessel exceeds 10,000 tons.
2. On entering into the system of the Control Centres, communication must be made with them, giving the information laid out in the "Basic Rules of the System of Control and Information of Maritime Movements". See "Control" in General Section before first Uruguay port.
3. By VHF on the Channels stipulated in "Basic Rules of the System of Control and Information of Maritime Movements".
4. Channel 11 must be used to communicate with the pilot vessel. The vessel is a powered craft painted reddish orange, with white deckhouse with the inscription "Practicos". During daylight hours, it flies the pilot flag, HOTEL (white and red), and at night it is necessary to have white and red lights indicating "I have a Pilot on board". Where a vessel does not have VHF, light signals must be used to communicate with the pilots' launch.
Should this launch be out of service, Pilots are transported by tugs of A.N.P. and/or BEYLA.
5. The Pilot will await the vessel near the Axis Buoy located at Lat. 35° 00' S., Long. 56° 14' W.
6. In the event of bad weather the vessel must anchor near the Axis Buoy.
7. To take the Pilot on board, the gangway must be positioned on the side which gives most advantage *vis-a-vis* wind and sea.

ANCHORAGE: Vessels may anchor near the Axis Buoy with a draft of 30 ft. at zero tide. The sheltered anchorage is located in the foreport inside the shelter of the breakwaters. To gain access to it, the Pilot must be on board and the permitted draft will be that specified previously.

RESTRICTIONS:

1. The port is closed when winds are up to 60 km.p.h. However, up to 80 km.p.h. the Prefecture may authorise manoeuvres. The port is also closed when there is fog, channel obstruction or any other problem which may make manoeuvring difficult.
2. Vessels will not be handled when there is serious damage to engines, hull or rudder.

MAX. SIZE:

1. The largest vessels operating in the port, are of the LASH type, with dimensions approx. as follows:
Overall length 272.22 m.; Beam 30.48 m.; Draft 28 ft.
2. Tankers which berth at the inflammable dock A.N.C.A.P.:
Overall length: 241.50 m.; Beam 32.33 m.; Draft 28 ft.

With regard to the dimensions of the vessel, the state of the tide and time will be considered, the Pilot will advise the Master of the best measures to adopt.

Report: March 1982.

Max. draft to reach Montevideo safely is 31 ft.

Also see "Shipmaster's Report" dated May 1996.

HEALTH: The procedure is as follows:

1. Request the Owner or Agent to obtain Free Pratique which will be done via Cerrito Radio Station – call sign CWA.

In the event of there being any suspected illness or fever on board, the vessel must anchor in the roads to await instructions, at the same time communicating this to her Agent/Owner.

RADIO: Cerrito Radio Station CWA operating on 500 kHz, 421.5 kHz, 4346 kHz, 6434.5 kHz, 8602 kHz, 12750 kHz, 17208.8 kHz and 22563 kHz.

Timetable for broadcasting information to Mariners:

	Frequency	*Times*
Cerrito	4,346 kHz	1100 hrs.
CWA	8,602 kHz	1600 hrs.
	12,750 kHz	2100 hrs.
	16,871 kHz	
Sodre (CX 6)	650 kHz	0900 hrs.
Coastal Station		
Punta Carreta	2,768 kHz	1103 hrs.
CWD		1603 hrs.
		2103 hrs.

RADAR: Port Radar Control available. Additional coastal radar stations to be installed.

VHF: The Control Centre has a range of 60 miles on VHF. It also effects communications by "Phone-Patch" between the vessel and Agent or Owner; this, from their office or private address.

All the operations of the Centre of Control and Information of Marine Movement of the Port of Montevideo are set out in the booklet "Basic Rules of the System of Control and Information of Maritime Movements".

On entering waters of port jurisdiction, communication must be made with La Paloma Control, then Punta del Este Control and the Centre of Maritime Control of the National Naval Prefecture.

TUGS: 8 tugs owned by Port Authority, 1×4,000 h.p., 1×1,1950 h.p., 1×1,680 h.p., 1×1,100 h.p. and 4×500–700 h.p. Beyla S.A. (Private) operate 5 tugs of 250 h.p.–750 h.p. Tugs come alongside in the foreport. Lines are to be supplied by the vessel, and this is not optional. In the event that the vessel has no tug cable, this will be supplied by the tug at a cost of approx. U.S. $500 (as per tariff TM/6).

BERTHING: The berth will be allocated by A.N.P. and is to be requested by the Agent. Vessels may berth or unberth at any time of the day or night, except when the port is closed or due to lack of available berths. Generally, there are fenders placed along the berths. In the event that the vessel requires this service, it must be requested in advance via the Agent.

When berthing or unberthing, the gangway must not be in position due to the proximity of the cranes.

Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 ft. to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 ft. to 33 ft. depth alongside. La Teja: Ancap Basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipeline situated there. Conditional that they vacate the berth within 2 hours' notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala: On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now used as a container terminal.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 33 ft.

1×40 tonne container gantry crane installed in 1986.

River Traffic Basin: This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have bee built on the East side of this basin and are serviced by 3 electric crane

These berths can only be used by light-drafted vessels, as depth water is around 16 ft.

Basin No. 1: This basin is situated between piers "A" and "B". entrance between the "Dique de Cintura" and the pier head "A" is abo 150 m. wide. It encircles a total mooring space of 1,093 linear metre and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 382 m. long on the West side; 306 m. on the East sid and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, hav been constructed, consisting of a ground floor, 3 storeys and a basemen

On the City side of Basin 1, length 493 m., there are 3 bric warehouses, numbered 3, 4 and 5, consisting of a ground floor between 17,800 cu.m. and 19,600 cu.m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 bric and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 store having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, Berths No. 1, 2, 3, 4 and 5 are generally used for th discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging.

Basin No. 2: This basin is situated between Pier "B" and the foot Florida Street. The entrance to this basin is also about 150 m. wide. has a total mooring space of 722 m. and it can accommodate 4 vessel

Pier "B" is 294 m. long on the Western side, 328 m. long on th Eastern side, 148 m. at the Northern pier-head and 13 m. wide on th bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This ber is also used for general cargo operations in times of congestio Moorings must be strong and carefully watched as the berth is ver exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Bas No. 2, built of brick and concrete, with a ground floor and 1 storey an with a capacity of 33,320 cu.m. each. Warehouse 11 has 3 cold storag rooms with a total capacity of 26,000 cu.m. for storage of frozen mea chicken and fish products at −30°C.

Depths of water alongside vary, depending upon intensity of dredgin but are generally 28 ft. to 30 ft.

Coasting Quay Wall: From Florida Street to Mole F, which is the end the Port, and over a distance of 1,900 m., there is a quay used f coastal craft, and on part of which a fish-receiving and industrialis plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcoho Cement and Fuels, known as A.N.C.A.P., has a basin with concre walls for the discharge of tankers arriving with oil to their consignme This basin is known as the "Darsena de Inflamables", and has 1 ber for tankers on the North side in 30 ft. 6 in. and for liquid gas discha on the Southern side, max. draft 22 ft., while on the West or land si there is a berth for coastal vessels. Width of the basin here is 147 m which is the same as the entrance, while the South berth is 248.75 long. On the North berth the jetty protrudes 34 m., and is 96 m. lon

Vessels berth bows to shore, and on leaving turn immediately outsi the basin, if draft is less than 22 ft., otherwise they must reverse ba down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 maximum pressure 105 lbs. Fuel oil, 8 in. and 10 in. with a pump rate of 300 t.p.h. at temperatures between 40°C and 70°C. Diesel/G Oil/ Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naph 8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There no line for Gas. There are 3×5 ton electric cranes and 1×12 ton die crane. Coal and Cement are also discharged at this berth, the coal Decauville cars and the Cement to trucks, handling 750 tons per 8 ho day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 connection for loading or discharging Super Gas, at 200 t.p.h. There a no cranes at this berth.

The Western berth has the same installations except for Super G and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essen for berthing or unberthing. At the North berth, vessels fully loaded o lie up to 15 m. out from the quay, owing to accumulation of mud, a will gradually close in as the vessel lightens. Access gangways a placed by the Port.

Railway Connections: Basins 1 and 2, River Traffic Basin and a Deposits "A" and "B" have railway lines on all sides, belonging to Port Administration, which are connected with the main lines of Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusi in the port.

Cranes: The Port Administration has 2 heavy-lift floating cranes 80 tons and 200 tons capacity, a mobile crane of 20,000 kilos, a 46 movable electric cranes of 5,000 kilos each; 5 movable electric cra of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of aforementioned 5,000 kilos cranes, are placed alongside the quay w for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 k There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries: The Port Administration has purchased special lorries 12 auto cranes for receiving cargo, as the railway wagons availab not sufficient to carry all the cargo that is at present being handl this port.

Loading Operations: Loading is effected from carts, lorries a wagons and the cargo is hoisted on board with the cranes. Ca also loaded from lighters.

Grain Loading: There are 2 mobile grain vacuvators, each of whic load bulk grain at around 60 t.p.h, also 10 smaller machines th each load around 20 t.p.h.

Fumigation: Montevideo is the only port in Uruguay at which vessels can fumigate, using the cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to n.r.t. There are surcharges for overtime.

Disinfection of Mail Bags: To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health Officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above Water: Tide being very small, the height of quay above water only varies from 8 ft. – 10 ft. at LW to 10 ft. – 12 ft. at HW. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 ft. or 3 ft.

PORT EQUIPMENT: *Shore Cranes:*

Berth No.	*No. of Cranes*	*Capacity tons*	*Type*
Muelle de Escala	1	40	Portainer

Container Trucks	50	12	

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour: Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for tally clerks and 1 for stevedores, etc.

MEDICAL: Any urgent case must be advised in advance. In normal cases, the Health Service Doctor in the port will visit. For this purpose there are Clinics and Hospitals with optional assistance. Vaccination Certificates are issued by the Port Health Service. There are also private health and medical services which give on-board treatment.

TANKERS: Dirty ballast can be discharged depending on whether or not there is a berth at La Teja, Inflammable Materials Dock. A.N.C.A.P. have the necessary reducers for any type of operation.

Diameter of pipes: Crude – 12 in.
Fuel oil – 8 in.
Dirty ballast – 8 in.

Berth depths: North Quay – 29.6 ft.
South Quay – 22 ft.
West Quay – 14 ft.

DENSITY: This varies according to wind and tide (1006 – 1002). The degree of salinity (max. 10 gm. per litre) is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. Loading rate 20 cu.m./hr. Water also available by barge (capacity 170 tons) loading rate 18 t.p.h. – 20 t.p.h.

FUEL: This can be taken on board whilst anchored in the foreport via two barges, one of 595 tons delivering at a rate of 250 – 350 cu.m./hr., the other of 310 tons at the rate of 200 to 250 cu.m./hr.

Also available from the Uruguayan tanker "Valiente" (capacity 1,337 cu.m. of fuel, rate of 700 cu.m./hr.) or 196 tons of water at the rate of 70 cu.m./hr. This service can be effected outside the port.

A.N.C.A.P. Information: All grades subject to confirmation, the request being made via the Agent 15 days in advance.

REPAIRS: All kinds of repairs can be effected, either afloat or in drydock.

DRY DOCKS:

Nacional	Length between perpendiculars	141.30 m.
	Width	28.50 m.
	Height	10.46 m.
	Depth of water	14.11 ft. at zero
Tsakos (Floating)	Lifting power	12,000 tons
	Length	165.99 m.
	Width	28.50 m.
	Height	4.41 m.
	Max. height of stocks	23.16 m.
A.N.P. (Floating)	Length	60.00 m.
	Width	13.72 m.
	Height of water at the stocks	4.75 m.
Maua	Length	79.25 m.
	Length on stocks	74.42 m.
	Depth of water	12 ft.
	Width of pontoon	15.25 m.
	Capacity of operation	2,000 tons

GANGWAY/DECK WATCHMEN: Shore watchmen are compulsory. Arranged by Agents. 1 required on deck and 1 for each gangway. Vessels carrying dangerous cargo must also employ a guard of the Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sick crew members or to enter dry dock, need not employ Watchmen. Repairs afloat require a watchman, if they do not carry out commercial operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repair, and those at ANCAP moles may fix 12-hour shifts, paying a shift and a half.

If special watchmen are required for goods or working equipment, application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the ship has a crew member, cadet or officer permanently on watch to prevent pilferage. However, where ship's personnel are in the hold to watch the stowage of the cargo, no extra watchman is required. Masters should therefore, advise Agents if they intend to place crew members permanently in the holds during discharge, so that Agents can advise the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on duty from 0700 hrs. on, whereas it may be necessary to place the gangway safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receiving Commission may ask for the gangway to be opened before 0700 hrs., which is in order, but no one else should use the gangway to avoid claims from the Union.

Vessels lying in the anteport must provide launches for the transport of watchmen employed.

REPATRIATION: There are facilities for exchanging crews.

AIRPORT: Located 30 minutes away by car. There are various regular services to all parts of the world.

TIME: GMT minus 3 hours. (However changes are possible).

HOLIDAYS: 1st January (New Year); 6th January (Epiphany); 3 days in February (Carnival); 7 days in March or April (Tourist Week); 1st May (Labour Day); 18th May (Battle of the Stones); 19th June (Artigas' Birthday); 18th July (Swearing of the Constitution); 25th August (Declaration of Independence); 12th October (Day of the Race); 2nd November (All Souls'); 25th December (Christmas Day).

On these days, work will always proceed when the Agent or Owner requires it or also if the Port Authority requires it, should there be a number of vessels anchored in the Roads awaiting a berth.

POLICE/AMBULANCE/FIRE: Port Police (Immigration): 95.21.51; Fire Brigade: 91.51.51 to 56 – extensions 139/337. Ambulance: 91.51.51 – extensions 272/382.

Prefecture of the Port of Montevideo: 95.21.27 – 95.21.77, 95.54.05, 95.52.01, 95.22.27, 95.24.27 ext. 07, 91.51.51 ext. 199, 91.93.03, 91.53.71 ext. 199.

TELEPHONES: There are services on all quays. Telephones can be requested by the Agent from the Port Authority.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: The prefecture issues identity cards. Crew not allowed ashore without card.

DEVELOPMENTS: A container park and fish quay have been built alongside the Eastern Quay and in the Mantaras Zone respectively.

A battery of silos will be constructed at C.M.B. (between Warehouses 7 and 8) which will facilitate the loading and unloading of grain.

SHIPMASTER'S REPORT: July 1983 (Updated 1990).

Documents: As per "Guide to Port Entry".

Pilotage: Compulsory. Pilot boards at Sea Buoy. 24 hours' notice required.

Anchorages: As per B.A. Chart 2001.

Restrictions: Max. draft 28 ft. Possible to depart/enter 24 hours a day.

Max. Size: Largest vessels using the port are LASH vessels, length 272 m., beam 30 m. – 40 m., max. draft 28 ft.

Health: Inform Agents of vessel's state of health and request Free Pratique.

Radio: Cerrito Radio Station.

VHF: Vessels must abide by Uruguay Regulations as per Radio Signals Volume 6, Part 2 otherwise will be subject to very heavy fines.

As soon as vessel is inside Territorial Waters, i.e., S.W. of a line bearing 128° from Chui Lt. and West of 50° 50' W., they must report to the appropriate station on VHF.

Pilots and Port operate on Channel 16.

Tugs: Available.

Berthing: Vessel berthed at Darsena/Muella A. Least depth in channel from sea to berth was 30 ft., distance between sea and berth being 6 miles. Mean tidal range at berth is 2 ft. Nature of bottom at berth – mud.

Cranes: Sufficient quay cranes of 4 tons capacity available. One floating crane of 200 tons capacity available.

Equipment and storage available for breakbulk/palletised cargoes.

Stevedores: Stevedores were very helpful.

Medical: Doctor and hospital available.

Density: 1002.

Fresh Water: Available.

Fuel: Bunker fuel and diesel oil available.

Repairs: Can be undertaken.

Dry Docks: Available.

Surveyors: Lloyds' Surveyor based at the port.

Airport: Available.

General: Fresh provisions, meats, groceries and laundry services available.

SHIPMASTER'S REPORT: May 1996.

There is much information available on this port elsewhere, but I would like to deal here with the available depth in the vicinity of pilot boarding area, port channel and alongside, especially when a vessel attains 7.5 m. fresh water draft on arrival and or on departure.

We had sailed from Diamante, drawing fresh water draft 6.84 m. forward and 6.98 m. aft. It is important to note that Parana Pilots disembark at Zona Comun off La Plata. By earlier arrangement, the Montevideo Agents arrange a Pilot to board at Zona Comun (and relieves the Parana River Pilots) and he pilots the vessel up to the Montevideo Pilot Station, situated at approximately Lat. 35° 0.5' S., Long. 56° 14.5' W. The Harbour Pilot takes over from this position.

As our maximum draft was 6.98 m., and we were to load around 10,000 tonnes of bagged rice from Montevideo, our departure Montevideo draft was likely to be 10.0 m. (fresh water). By referring to the B.A. Chart No. 1749 and No. 2001, one would find that charted depth in the vicinity of forementioned pilot station position is 7.7 m. Also it may be seen that 10.0 m. charted depth contour extends upto about 9 miles E. × S. of pilot position and thereafter charted depth progressively increases beyond 10.0 m. It may be borne in mind that the buoyed channel as shown on Chart No. 2001, which extends from Km.9.35 Buoy (in the vicinity of the forementioned pilot position) upto Km.42.4 Buoy, is an abandoned channel. This channel was reported closed as per Notice to Mariners in 1990 and again in 1995. Most of the buoys of this channel are missing or out of position, as such it is absolutely unsafe to venture any passage through this.

The channel which is almost North of the Fairway Buoy in position Lat. 34° 59.85' S, Long. 56° 13.45' W., has maintained charted depth of 10.0 m. and leads to port through the breakwater. We berthed starboard side to Berth No. 1 of Darsena-I. The Agent advised that depth of water alongside in the region of ship's bow was about 9.0 m., but about 10.0 m. elsewhere (which found not correct as per ship's soundings).

It may be note that it is customary that any Master would like to have at least 1.0 m. under-keel clearance, but at times it would be impossible to have so much safety margin. But asking for at least 30 cm. under-keel clearance (above the charted Datum) is quite prudent, if the nature of the bottom permits, but even this minimum clearance of 30 cm. is a luxury for Montevideo port when your expected draft is likely to be 9.75 m.

It is very important to study the Charter Party which may incorporate N.A.A.B.S.A. Clause (not always afloat but safely aground) or "always afloat" or both. As per NAABSA Clause, which is generally applicable for Montevideo Channel and also for the Parana River, vessel may sometimes smell or touch bottom or run aground without sustaining significant damage due to nature of mud in the bottom, which is said to be about 1.0 m. or so. Abovementioned NAABSA Clause applies in the channel and river, but not alongside the berth. It is necessary to emphasise that, if vessel is likely to attain critical draft as mentioned above, it is better to seek necessary advice from the Owners/Charterers/Agent.

Alongside the berth, we sounded around the vessel and found minimum 10.3 m. depth on the sea side, while on the jetty side it was 10.0 m. forward, 9.0 m. midships and 8.6 m. near starboard quarter (density 1002).

Astronomical factor does very little to influence the rise and fall of tide in this region, which in fact is affected by the direction and force of the prevailing wind. As per tide tables, one would notice that there is a very nominal tidal range. But if the wind is from South with good force a lasting for a few days, the level of water in Montevideo and Parana Riv may increase as much as 2.0 m. or so. If there is persisting Norther wind, water runs out of the rivers, basins and estuaries, causing negative surge. Due to all above constraints, it is very difficult accurately predict the available depth.

Since it was my first call to Montevideo to load bagged rice upto abo 10.0 m. draft, I had knocked on all the doors to get a ruling on th confirmed maximum sailing draft, and the best I obtained was 9.75 m This draft was confirmed by the Agent and was duly verified and stampe by the Harbour Master's Office. I am also enclosing a guideline from th Senior Pilot of Montevideo port (See "Notice" below).

In order to limit our sailing draft to 9.75 m., we shut out 500 tons o cargo. We were touching the bottom (starboard side) while we we alongside during our loading. We chose our sailing time at top of th high water which, as per port tidal gauge recorded about 80 cm. abo the charted Datum. The passage through the channel until about 9 mile East of the Fairway Buoy was made at a regulated speed to preve any squatting. The Pilot accompanied us upto about 4 miles East of th Fairway Buoy. We did not at any time "smell" the bottom, touch or squa Also we did not notice any sluggish or erratic steering. We alwa remained close to, but South, of the "reported closed 1995 channel" a maintained a very good lookout for any drifting buoys.

Notice:

Guidance to the Deep Draft Ships Approaching
Montevideo Roads

(1) The buoyed channel from Km.31.5 to Fairway Buoy mark the natur deep waters of the river, although for many years it has not bee maintained, but track is commendable.

At night-time or poor visibility periods, care must be taken due t unlit, shifted or missing buoys, in this case navigation can b undertaken South of it. Report your transit to avoid crossin situations.

(2) There are no entry restrictions, but over 32 ft. it is advisable t Shipmasters to make contact in advance with Montevideo Po Control by VHF Channel 11 or 13, regarding height of the tide. I less than 0.50 m. above Zero, wait in proximity of Alpha Zone t rise.

Heights between 0.80 m. to 1.00 m. are normal.

(3) If awaiting a Pilot, anchor 1.5 miles E.S.E. from Fairway Buoy.

Maximum draft allowed by tide is 33 ft. (FW). Density of dock wat varies from 1000 to 1012, but mostly average 1005.

(4) Reduced speed and touching of the bottom will be expected i shallow waters, but little danger due to nature of bottom.

(5) Obviously all this information is subject to the Shipmaster's skill a does not reduce their liabilities.

I will be pleased to give further information or amendments throu local Agent.

Signed: Captain . . . . . ., Pilot Advisor.

AUTHORITY: Administracion Nacional de Puertos, Rambla 25 d Agosto de 1825 No. 160, Montevideo, Uruguay. *Tel:* 96-07-34, 95-0 58. *Telex:* Naveanp Uy 22351. *FAX:* 95-85-35. *Contact:* Ing. Eucli Cotignola, General Manager.

NUEVA PALMIRA: 33.53 S. 58.25 W. (See Pla

LOCATION: Situated on East bank of Uruguay River, 155 miles abo Montevideo. Km. 0 on River Uruguay.

DOCUMENTS: The following documents are required for Port clearan

Cargo or Ballast Manifest.
Negative Passenger List or List of Passengers, visaed by the Cons
Crew List.
Stores List.
List of Personal Effects.
Register.
Maritime Declaration of Health.

PILOTAGE: The information required from vessels navigating within t area of the Port Control are:

Time of entry and leaving the area.
International call sign.
Name of vessel.
Flag.
Estimated course.
Latitude.
Longitude.
Port of destination.
Estimated time at port of destination or other point of call.

The area appointed for effecting change of Pilots is the Port Ro The Pilots arrive at the vessel in a launch 10.6 m. overall length, w cabin, painted orange, owned by the Uruguay Pilots' Corporation.

ANCHORAGE: The area designated for anchoring is located within t roads, depth being between 30 ft. and 45 ft.

RESTRICTIONS: There are no restrictions for berthing in the port, ex those imposed by weather conditions (winds, etc.). Vessels berth wi the aid of tugs.

MAX. SIZE: *Old Port:* Max. draft 23 ft.

New Port: Max. draft 26 ft. 6 in.

Also see "Berthing".

HEALTH: The Health Authorities will require a Crew List and Ma Declaration of Health. In the event of disease being detected on bo the Health Official will proceed to inform the Aid Centre who will arr for a doctor to attend on board, with the vessel placed in quaran the patient will be transferred to hospital, depending upon the ill discovered. To date, no such occurrence has arisen in the port.

RADIO: VHF equipment with permanent listening out on Channel 16.
RADAR: There is no radar equipment.
VHF: All communications are effected by means of VHF equipment. The call sign is CWC 31 – "Control Palmira Prefecture", and the following Channels are used: 6, 8, 9, 11, 12, 13, 14, 16, 25, 26, 68 and 69. The station operates permanently on Channel 16, the frequency being 156.800 MHz.
TUGS: The service of a tug is not necessary for berthing vessels.
BERTHING: The port has the Official Quay and the quay owned by Navios.
Official Quay: Length 240 m., length of the head 80 m., width in the centre 40 m.
Navios Corporation Transfer Station: Navios Corporation is a private company that owns and operates a Transfer Station located in Nueva Palmira Free Zone.
Facilities: Unloading, storage and loading of materials in bulk, like ore and grains. For these services, it has 2 docks (one for barges and the other for vessels and barges), cranes, conveyor systems, warehouses and stockpile.
Unloading: It is possible to unload vessels up to 28 m. breadth and 16.5 m. depth by crane and clamshell in the exterior dock. The unloading rate is 300 tons/hr. for wheat, and it varies with the stowage factor of different commodities.

For unloading barges, Navios has 2 docks (exterior and interior). The exterior one, with Marion crane, can unload grains at 300 tons/hr. and ore at 400 tons/hr. The interior one (1991 investment), with Liebherr crane, admits simultaneous work with 2 barges on both sides of the dock (this avoids losing barge shifting time). Cleaning of barges and vessel's holds is performed by the Navios payloader.
Storage: Stockpile for ore with a capacity of 50,000 metric tons.

Three warehouses divided into 11 silos for grains (total capacity: 75,000 metric tons).

Goods' identity (classified by customer) is maintained to preserve quality and quantity.
Loading: Vessels must be ocean bulk carriers up to Panamax size (225 m. length, 32 m. breadth, 18 m. depth), and appropriate for being loaded by conveyor with flexible spout that is provided by Navios. Trimming and spout position will be carried out by Navios personnel. No manual trimming is performed. The vessel must shift from stern to bow by her own means and at her own expense. Loading rate from silo to vessel (grains) is 400 t.p.h. and 700 t.p.h. from stockpile to vessel (for ore).
Mooring Conditions: With Uruguayan "Rio Uruguay" Pilots and without tugs (bow towards North position).

Navios dock draft: 28 ft. below Chart Datum (the water level is almost always 2 ft. above zero). Vessels can arrive from Martin Garcia Bar (max. 21 ft.).

Sailing draft: 28 ft. across Parana River and Mitre Channel.
Transhipments: It is possible to load vessels directly from barges from both docks for grains and also for ore.
Conveyor System: It permits combined operations, including vessels, barges, trucks, stockpile and silos, in all imaginated combinations.

It is possible to work simultaneously by loading a ship from silo or barges, and unloading from the other dock to silo or stockpile avoiding the river transportation's delay.
Labour Rules: Navios does not use stevedores as it uses its own personnel. If customers require, it is able to work 24 hours a day, including Sundays and labour holidays.
Supplies: Navios supplies fresh water free of charge.
Operator: Corporacion Navios Sucursal Uruguaya, Zona Franca de Nueva Palmira, Nueva Palmira, Uruguay. Tel: (598-544) 6183, 6491. Fax: (584-544) 6492.

Montevideo Office: Juan Carlos Gomez 1445, Esc. 701 Esquina 25 de Mayo. Tel: (598-2) 956509, 964273, 963310. Fax: (598-2) 962874. Telex: 22041 Navigen Uy.
CRANES: The Official Quay is equipped with 3 cranes of the National Port Administration. They are mobile cranes on rails. Two are for 3,000 kg., and the third is for 5,000 kg.
STEVEDORES: As soon as the vessel communicates the ETA at the port, the Agent will make all necessary arrangements for stevedoring services to commence work as soon as the vessel has obtained Free Pratique. These services will be made available dependent upon the tasks required to be fulfilled.
MEDICAL: The local Public Health Aid Centre is entrusted with furnishing any medical aid which may be necessary on board.
BULK HANDLING FACILITIES: There are no tanks, but there are warehouses for storing grain and general cargo. These warehouses belong to the National Port Administration and to the Free Zone, and are located within the port area.
FRESH WATER: Fresh water is supplied by the National Port Administration.
FUEL: There is a fuel storage depot within the port area, and should it be necessary to supply bunkers to a vessel, application has to be made to ANCAP who will supply via tanker trucks.
FIRE PRECAUTIONS: Fire Station and fire engine available.
CONSULS: There are none at local level. In the town of Carmelo, 21 km. from Nueva Palmira, there is the Consulate of the Argentinian Republic.
REPAIRS: Minor repairs possible.
SURVEYORS: None available.
GANGWAY/DECK WATCHMEN: The service of watchmen is not necessary, unless the vessel is carrying flammable cargo.
HATCHES: Opening and closing of hatches is normally carried out by stevedores. MacGregor hatches opened/closed by crew.
CUSTOMS ALLOWANCE: Each crew member is permitted to carry out of the bonded ship's store, 5 kg. tobacco, 2 cartons of cigarettes and 2 bottles of wine.
CARGO GEAR: Normally, loading and discharge are effected by means of land-based equipment.
REPATRIATION: There are facilities for changing crews, and to effect any repatriation necessary. In both cases, the arrangements are carried out with the participation of the Immigration Authorities and the Maritime Agency concerned.
AIRPORT: There is the airport of Zagarzazu located between Nueva Palmira and Carmelo, approximately 15 km. from this town. Local airport for small airplanes (Suarez Noya) is 8 km. from city.
TIME: Local time is GMT minus 2 hours.
HOLIDAYS: 1st January, 19th April, 1st May, 19th June, 18th July, 25th August, 12th October, 8th December, 25th December. Holidays do not interrupt operations on vessels.
POLICE/AMBULANCE/FIRE: Police: Tel. 544-6042, Ambulance: Tel. 544-6082. No fire brigade.
TELEPHONES: It is not possible to have telephones installed on board vessels.
SERVICES: There are stevedoring services, Maritime Agents and Customs Clearance Agents.
SHORE LEAVE: Once Free Pratique is granted, there are no prohibitions for crew members going ashore.
DEVELOPMENTS: The lengthening of the head of the Official Quay by 200 m. to the North is planned. Grain Silo with capacity of 25,000 tons to be built.
AUTHORITY: El Sub-Prefectura de Nueva Palmira, Nueva Palmira, Uruguay. *Tel:* 544-6139. *FAX:* 544-6194.

Also see "Montevideo".

AGENT: Antonio Vico y Cia., Gral. Artigas 1171, 70101 Nueva Palmira, Uruguay. Tel: (0544) 6037, 6765. Fax: (0544) 6426. Telex: 29015.

PAYSANDU: 32.18 S. 58.06 W. (See Plan)

LOCATION: Situated on the East bank of Uruguay River, 380 km. above Montevideo. Km. 204 on River Uruguay.
DOCUMENTS/PILOTAGE/HEALTH/RADIO: See "General" at beginning of Uruguay section.
RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.
ANCHORAGE: Off Montevideo.
MAX. SIZE: Up to 15 ft. draft fresh water, depending on river conditions.
TUGS: Available.
BERTHING: Grain Elevator Berth: 20 ft. depth alongside at zero tide. Coastal Berth: Length 300 m. Depth 11 ft. at zero tide.

ANCAP Pier: 1 berth for tankers, 30 ft. depth at zero tide.

There is 1×5 ton crane on the grain quay and 3×3 ton cranes on the coastal berth. Loading on the ANCAP berth is by lorry.
STEVEDORES: Working hours: 0800 – 1200 and 1430 – 1800 hrs. Saturdays: 0800 – 1230 hrs.
MEDICAL: All assistance available.
FRESH WATER: Available at all berths.
FUEL: By negotiating through the intermediary of the Customs Clearance Agent the required quantity is delivered.
REPAIRS: Minor repairs can be effected.
CONSULS: Local representation for Argentina, Brazil, Italy and Paraguay. All other Consuls at Montevideo.
GENERAL: Refer to "Montevideo" for all general information.

Republic of Vanuatu

PORT VILA: 17.45 S. 168.18 E. (See Plan)

PORT LIMITS: A line drawn between Pango Point and Devil's Point.
DOCUMENTS:
Last Port Clearance.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores Lists.
Log Book, Derat and usual Ship's Certificates to be available for inspection.
PILOTAGE: Compulsory for all vessels over 60 m. in length. Pilot boards 2 miles West of the Fairway Buoy, on the leading lights. Pilot launch displays the Pilot (H) flag by day and white over red light at night when engaged on piloting.

24 hours' notice of ETA to be given.
